**SPECIAL ADVERTISEMENTS****INDEPENDENT ELECTORAL COMMISSION****TENDER INVITATION REFERENCE No. IEC/IT-01/2003****APPOINTMENT OF PROFESSIONAL CONSULTANTS FOR INFORMATION TECHNOLOGY (IT)**

The Electoral Commission (IEC) hereby invites the information technology profession or suitably qualified individuals in association with information technology firms to supply the Commission with:

Specialist information technology (IT) consultancy services in the form of skills to support the total spectrum of IEC information technology services. The resources will be in the form of human skills to participate in the management, operations, joint system development, support and maintenance as well as add-on skills for information technology projects.

**Requirements:**

- Proven information technology capacity able to provide specialised information technology services.
- Capabilities and details of staff (numbers and qualifications) available for deployment to the assignment.
- Knowledge of broad IT sector activities.
- Ability to provide skilled human resources on an "as and when required basis".
- Willingness to undertake certain tasks with individuals from other firms.
- Any other information tenderers consider relevant.

**General:**

Currently the operations of the IEC cover the entire country, but work will be based in the national office in Pretoria. The IEC is responsible to manage and administer all democratic elections in South Africa (national, provincial, local government as well as by-elections).

Locally based firms with strong empowerment backgrounds will be given preference.

A panel of consultancy firms will be selected from which resources will be drawn, as and when required, to provide additional and specialised skilled resources.

Firms interested in tendering, should collect the tender document, complete and submit within the specified time frames.

**Tender documents:**

Tender documents are available weekdays between 08:30 and 16:00 from Thursday, 17 July 2003. The closing date for the tender is 15 August 2003 at 11:00. Interested service providers may collect tender documents at a non-refundable tender levy of R100,00 per document. Tender documents will also be available from the IEC's nine (9) provincial offices.

A non-compulsory tender briefing session will be held at Election House, 260 Walker Street, Sunnyside, Pretoria on Wednesday, 30 July 2003 at 11:00.

Tender documents must, however, only be deposited in the tender box situated in the foyer of Election House, 260 Walker Street, Sunnyside, Pretoria, 0002.

**OFFICE OF THE PUBLIC SERVICE COMMISSION****REQUIRED AT: OFFICE OF THE PUBLIC SERVICE COMMISSION, COMMISSION HOUSE****TENDER No. OPSC 004/03: SUPPLY, INSTALLATION AND MAINTENANCE OF AN ELECTRONIC SECURITY SYSTEM***Site inspection:* 6 August 2003.*Time:* 09h00 to 14h00.*Closing date:* 22 August 2003.

Documents will be available for collection from Office of the Public Service Commission, corner Hamilton and Ziervogel Streets, Arcadia, Commission House, from 1 August 2003.

*Contact:* Mr Rupert Penderis, IMP Security Services, Tel. (012) 998-3508/7674 / 082 891 3576.

**TENDER OPSC 004/2003: SUPPLY, INSTALLATION AND MAINTENANCE OF AN ELECTRONIC SECURITY SYSTEM FOR OFFICE OF THE PUBLIC SERVICE COMMISSION, COMMISSION HOUSE**

This document contains the specifications necessary for tendering for the security upgrades at the Office of the Public Service Commission Building. If there are any queries, omissions or errors, these must be referred directly to IMP Security Services for clarification. If you feel that any issues have been omitted, please contact IMP Security Services. If a specification is deemed missing or faulty, then the standard specification for the security installation industry will apply.

The work below is divided into various categories as numbered below. A company tendering for work may tender for one, all or a limited number of these items. A tendering company must indicate in advance which work they intend to tender for, but will not be held liable should they later change their minds. A tendering company will be required to sign a non-disclosure agreement before tendering for any work. A tendering company will be required to submit referrals of recent work done, list of company directors and any other information deemed relevant. The companies will also be subjected to preliminary vetting.

The Public Service Commission decision is final and no correspondence will be entered into once the tenders have been awarded. The tenders will not necessarily be awarded on price alone and the cheapest quote alone is not guaranteed of success.

**TENDER SPECIFICATIONS:****OPSC 004A/2003: BUILDING WORK****1. BUILDING WORK—INTERNAL FIRE ESCAPE DOORS**

The internal fire escape doors inside the building that face in the incorrect direction must be changed to face in the direction of the building egress, as indicated on the fire survey. The finish will have to match the existing interior finish inside the building.

**2. BUILDING WORK—EXTERNAL FIRE ESCAPE DOOR**

The fire escape door in the north-eastern corner must be completed, as per the fire survey. The wall will have to be broken out and a standard fire escape door to be added. The door must be an outward opening door. The finish will have to match the existing exterior finish on the building.

**3. BUILDING WORK—CCTV SECURE ROOM**

A secure room is to be constructed where the CCTV camera system equipment is to be located. This location will be inside the existing reception area. The existing dry walling will have to be removed and bricked up with double brick walls. A secure solid wooden door must be provided for. Access points must be provided for, for CCTV camera cables. Provision must be made for conducting for additional wall plugs as indicated on the site inspection. The finish will have to match the existing interior finish inside the building.

**4. BUILDING WORK—NORTHERN WALL**

The northern wall is too low and must be raised to at least 2.1 metres above ground level at all points along the wall. The existing razor wire must be re-installed on top of the wall, but must not interfere with the new electric fence. The finish will have to match the existing finish on the wall.

**OPSC 004B/2003: STEEL WORK****5. STEEL WORK—STEEL STAIRS**

Steel stairs must be installed at the north-eastern corner to allow staff to use the new fire escape door safely, as per the fire survey. (See tender point 2). The width must be sufficient to accommodate a wheelchair. There must be steel railings on either side of a minimum thickness of 50 mm. The stairs and landing must have a minimum thickness of 3 mm. The finish will have to be done in gloss black enamel paint in an acceptable finish.

**6. STEEL WORK—STEEL GATE**

A steel gate must be installed in the northern perimeter wall to allow staff to safely evacuate the building. (See tender point 2.) This gate must be able to be securely locked from the inside, with provision for a nearby key lockbox. Provision must be made for a tamperproof alarm cable route into the building so that this gate can be alarmed. The steel used must be of a minimum thickness of 2 mm and the gate and frame must be constructed of a minimum size of 50 mm square tubing. The frame must be securely bolted into the wall in at least three sides using a minimum of 8 mm roll bolts. The finish will have to match the existing finish on the exterior wall.

**OPSC 004C/2003: INSTALLATION****7. INSTALLATION—ELECTRIC FENCE**

An electric fence is to be installed on the northern and eastern perimeters. The energizer must be installed inside the secure CCTV room and a keypad inside the reception area. The energizer must deliver a minimum of 8 000 volt and comply with the legal limits on electric fences. A two-zone energizer is to be used, with each perimeter on a separate zone. All zones are to be wired in series to detect cutting or tampering of the electric fence.

**8. INSTALLATION—FIRE ESCAPE STAIRS**

The two ground floor fire escape doors on the stairwells leading into the basement parking area must be secured with locks that can only be opened from inside the stairwells. This applies to the north-eastern as well as the south-western stairwells. These locks are to comply with the fire survey specifications and requirements. These locks are to be approved by a fire consultant before acceptance. Provision must be made for these doors are to be alarmed.

**9. INSTALLATION—FIRE PROOF MATERIAL IN LIFT SHAFTS**

Fire retarding materials are to be installed in all the vertical shaft openings as indicated by the fire survey. This material is to be approved by a fire consultant before acceptance. The material must comply with the relevant SABS fire standards.

**10. INSTALLATION—ACCESS CONTROL SYSTEM**

A glass access control door must be installed at the reception area, closing off the lifts and adjacent stairs from the reception area and the basement parking areas. This door is to be locked with a magnetic lock with a minimum breaking strength of 450 kg. The access control door must provide enough access for a wheelchair and people with disabilities. An access control system is to be put in place for staff members. The access control system must be computerized with full reporting capabilities, including anti-pass back. Specifications of the proposed access control system must be provided with the tender.

The system must be upgradeable in future. The access control company is to provide proximity access control cards with laminated staff ID photographs on the cards. The company must also make provision for excess cards for additional staff and visitors.

**11. INSTALLATION—METAL ROLLER SHUTTER**

The metal roller shutter door for the parking area must be motorized. The motor must be on battery backup and be able to work independently of the 220 volt power. Provision must be made for this door to be alarmed. An infrared beam must be installed.

**12. INSTALLATION—ADDITIONAL LIGHTING**

Additional exterior lighting must be installed outside both roller shutter doors and all fire escape stairs and doors. Metal halide or mercury vapour will be the only acceptable lighting, unless otherwise indicated. Additional lighting must be installed outside the main entrance door—this must match the existing fittings. All additional lighting is to be connected to a daylight switch, which must be tamperproof. SABS approved light fittings will be the only acceptable fittings.

**13. INSTALLATION—INTERCOMS**

An intercom must be installed outside the metal roller shutter door to the reception area. An intercom must be installed at the main front door to the reception area. The intercoms are to be installed within protective metal housings.

**14. INSTALLATION—RECEPTION AREA**

The reception area must be secured with bulletproof glass. The bulletproof glass must be of a sufficient thickness to stop known handguns and must be from a registered manufacturer. The glass will have to be marked with an SABS mark after installation. The window and frame must prevent any bullets from a firearm penetrating the reception area. The glass must have an opening for parcels to be passed through without security having to move out of the control room.

**15. INSTALLATION—RECEPTION AREA**

The reception area must be secured with a secure steel plate door lockable from the inside. The steel plate must be a minimum of 4 mm thick and the hinges and doorframe must not allow any blunt instrument to be inserted between the door and the frame. The door and doorframe must prevent any bullets from a firearm penetrating the reception area.

**16. UPGRADE—ALARM SYSTEM**

The existing alarm system must be upgraded to cover all fire escape stairs doors and all outside perimeter doors. This must include the steel gate in the northern perimeter wall. (See tender point 6.) The alarm system is to be based inside the reception area within the secure CCTV camera system room. (See tender point 3.) An alarm indication must be placed within the reception area.

**17. INSTALLATION—ARMED REACTION**

Armed reaction connection to be installed and connected to the alarm system. Armed reaction signs are to be installed on the outside of the building. There must be panic buttons in the reception area as well in both basement parking areas. All panic button locations are to be visibly marked. (See tender point 16.)

**OPSC 004D/2003: CCTV CAMERA SYSTEM****18. INSTALLATION—CCTV CAMERA SYSTEM**

A CCTV camera system must be installed to cover the building exterior as well as staff access areas. The CCTV camera system is to be based inside the reception area within the secure CCTV camera system room. (See tender point 3.) The following CCTV cameras are to be installed but not necessarily limited to these points. The tendering company is welcome to suggest or advise on additional CCTV camera points. The CCTV camera system must include a PC based digital recording system. This system must be network enabled and this capability must be demonstrated before handover will be accepted.

**Minimum CCTV camera system features:**

1. 8 black & white CCTV cameras along outside perimeter wall with minimum lux levels of 0,05. Lens sizes minimum of 16 mm to optimally cover the perimeter walls.
2. 1 colour CCTV camera at main door with minimum lux levels of 1.
3. 2 color CCTV cameras at roller shutter doors with minimum lux levels of 1.
4. 2 black & white CCTV cameras inside basement parking areas with minimum lux levels of 0,05.
5. 1 colour CCTV camera inside reception area with minimum lux levels of 1.
6. Minimum of 100 G byte hard disc capacity within the PC.
7. 17 inch PC display screen.
8. PC must contain Windows 2000, CD writer and network card.

Please contact IMP Security Services if you have any queries.
