Off-site file storage, retrieval and delivery services. The Masters Branch of the Department of Justice and Constitutional Development is in the process of upgrading its document management and administration system. We require off-site storage services for our old hardcopy files/documents. The successful tenderer(s) will render the services in respect of the 2 Masters Offices of Pretoria and Pietermaritzburg. The Pretoria Master's Office is situated at corner Church and Queen Streets, Pretoria, whilst the Pietermaritzburg office is situated at corner Commissioner and Church Streets, Pietermaritzburg. There are approximately 700 000 and 500 000 old archival files for Pretoria and Pietermaritzburg respectively that need to be stored off-site in order to release space for the implementation of a computerized file tracking system on-site. The system must be designed to manage the storage, retrieval and capable of recommending timely destruction of records. Records must be maintained in a secure and auditable environment to ensure that files are quickly, accurately and completely accounted for and that only authorized personnel have access to such records. An efficient and effective filing system is one of the Department of Justice and Constitutional Development's identified enablers to providing accessible, faster, accurate and secure services to the public. This improved service delivery system characterized by the promotion of good governance principles such as accountability are the major focus areas. <p>On-site computerised file tracking system. The Masters Branch of the Department of Justice and Constitutional Development is in the process of upgrading its document management and administration system. We need a service provider to implement on-site computerized file tracking system for the current and not-so-current hardcopy files which we frequently retrieve. The system must be designed to effectively and efficiently manage the storage, retrieval, tracking and recommendation for timely off-site storage of files/records, among other things. The system must be able to track and locate any files whenever it is necessary. The system will consist of a central physical filing infrastructure organized in such a way that facilitates an efficient and effective file tracking system linked, in a systematic way, to a computerized information management centre. The system must also be able to handle "itemized" filing, hence able to add new documents into an existing file and must be able to generate the necessary management reports such as file usage and other statistics. There are approximately 500 000 and 300 000 current and not-so-current hardcopy files for Pretoria and Pietermaritzburg respectively that require this service. An efficient and effective filing system is one of the Department of Justice and Constitutional Development's identified enablers to providing accessible, faster, accurate and secure services to the public.
