The existing school buildings were initially designed to be used as a Primary School, but have actually been used as a Secondary School. Due to this there was a serious overcrowding problem because of the lack of classroom space. It was therefore decided to provide additional resources for the learners, including new sports facilities. Furthermore due to the unacceptable condition of the existing school buildings it was agreed that a total refurbishment of all existing school buildings should be incorporated.

Technical details:

The specific requirements include 6 new classrooms, 4 new laboratories, new admin block, new media centre, 3 new toilet blocks, new tuck shop, new storerooms, new covered walkways, new paved areas, new parking, new sports field, athletic track and combi courts. In addition to this new work there will be a total refurbishment of all existing school buildings. This will comprise a full aesthetic upgrading including painting, new floor & ceiling finishes, repairs to roofs, doors, windows, etc., structural repair of unsafe buildings, repair of all existing water, storm water and sewer reticulation, repair of all electrical work—lights, plugs, external lighting and provision of fire-fighting equipment in all new and existing buildings.

The total area of the new accommodation is 1 075 m², the new covered walkways 987 m², the existing buildings 2 460 m², giving a total building area of 4 522 m². The area of paving, including the assembly area, is 3 051 m².

Services required:

The contractor will be required to complete the contract within a period of 12 months.

Compulsory tender briefing session:

All prospective tenderers are hereby invited, to attend a compulsory tender site meeting at the venue and date as indicated in this advert. Tenderers who do not attend will be disqualified automatically from the tender process.
