Selected expenditure trends for the first half of the 2006/07 financial year

Expenditure in the first six months of 2006/07 was R8,496 billion, or 33,5 per cent of the adjusted appropriation of R25,392 billion. Spending has slowed down because the equitable share is now paid every four months instead of every three months, and because of delayed expenditure following the completion of a contractual commitment for municipal profiling.

The year-on-year increase in total expenditure relates to higher budgeted allocations to the local government equitable share and municipal infrastructure grant.
