### **Selected expenditure trends for the first half of the 2006/07 financial year**

Expenditure in the first six months of the 2006/07 financial year was R1,688 billion, or 54,16 per cent of the adjusted appropriation of R3,117 billion for the year as whole.

The increases in the *Administration* and *Provision of Land and Accommodation* programmes are mainly as a result of the creation of the property management trading entity from April 2006. The R247 million devolved to the Department of Public Works was reallocated to the *Administration* Programme as earmarked funds payable to the property management trading entity as accommodation charges for all properties occupied by the Department of Public Works. The large increase under departmental agencies and accounts is as a result of R450 million that was transferred to augment the trading entity.

The 46,5 per cent increase in the *National Public Works Programme* is due to the 2006 National Construction Week and the mentorship support that the department had to provide in the countrywide implementation of expanded public works programme. The 73,5 per cent increase in the *Auxiliary and Associated Services* Programme is mainly due to improvements to the transport system for members of Parliament and sessional officials and to the State funeral for the late Minister of Public Works.
