Introduction

The annual budget process

The main budget announces government spending for three years going forward: that is, the years of the medium-term expenditure framework (MTEF). Through an accompanying Appropriation Bill, the executive seeks Parliament's approval and adoption of its spending plans for the new financial year. Amounts allocated for the first year of the new MTEF period are then appropriated from the National Revenue Fund in terms of the Appropriation Act, once approved by the President. The main budget also provides for a contingency reserve for expenditure related to unexpected circumstances.

Appropriation acts are divided into votes. Generally, a vote specifies the total amount appropriated per department. In some cases a vote may contain more than one department.

February: Minister of Finance tables main national budget and Appropriation Bill in National Assembly.

April: Start of new financial year.

October: Minister of Finance tables adjusted national budget and Adjustments Appropriation Bill in National Assembly.

In the middle of each year, the adjustments process provides an opportunity to revise the main budget in response to changes that have affected planned government spending for that year. The adjustments budget may allocate unused funds, mainly from the contingency reserve, and additional amounts that have been approved for particular types of spending. The adjusted budget includes the amount allocated in the main Appropriation Act as well as the effects of the adjustments. The adjusted budget is also tabled in the National Assembly by the Minister of Finance and is accompanied by an Adjustments Appropriation Bill. A Division of Revenue Amendment Bill is also tabled that sets out how the adjustments affect the Division of Revenue Act.

The *Estimates of National Expenditure (ENE)* describes in detail the planned spending of all national government votes over the MTEF period. The *Adjusted Estimates of National Expenditure (AENE)* describes in detail the revised spending plans for the first year of the MTEF period, that is the current financial year.

The adjustments

The Public Finance Management Act (1999) (PFMA)¹ specifies the type of spending the adjustments budget may provide for. The Treasury Regulations, issued by National Treasury in terms of the PFMA,² are instructions about how to comply with the PFMA.

The adjustments budget makes provision for:

- **Roll-overs:** Unspent funds from the preceding financial year may be rolled over when activities planned to be completed by the end of that year have not been completed but are close to completion. The Treasury Regulations³ restrict roll-overs as follows: compensation of employees funding may not be rolled over; a maximum of 5 per cent of a department's budget for goods and services may be rolled over; transfers and subsidies funding may not be rolled over for any purpose other than what the funds were originally allocated for; and unspent funds on payments for capital assets may only be rolled over to finalise projects or assets acquisitions already in progress.
- **Unforeseeable and unavoidable expenditure:** Unforeseeable and unavoidable expenditure is spending that could not be anticipated at the time of the main budget. The Treasury Regulations⁴ specify that the following cannot be regarded as unforeseeable and unavoidable expenditure: spending that was known

¹ Section 30(2)

² Section 76

³ Section 6.4

⁴ Section 6.6

when finalising the main budget but could not be accommodated in the allocations then; spending increases due to tariff adjustments and price increases; and spending to extend existing services or create new services that are not unforeseeable and unavoidable. Spending made necessary by adverse weather conditions is an example of unforeseeable and unavoidable expenditure.

- **Virements** are the utilisation of savings or underspending from amounts appropriated under one main division (programme) towards the defrayment of increased expenditure under another main division within the same vote. Legislation⁵ and the Treasury Regulations⁶ set parameters within which virements can take place.
- **Shifts** are the utilisation of savings or underspending towards the defrayment of increased expenditure within a main division (programme) of a vote between different segments (subprogramme and economic classification) of the main division. Shifts include the reallocation of funds which may have incorrectly been allocated during the ENE process.
- **Function shifts:**⁷ When functions are shifted to another vote or institution in terms of legislation and/or following the reassignment of responsibility for the functions, the associated assets and liabilities also need to be shifted. Such shifts can also happen between main divisions (programmes) within a vote.
- **Unallocated amounts announced in the main budget:** In certain instances, an amount to be allocated for the three years of the MTEF period for a specific purpose will be announced by the Minister of Finance when the main budget is tabled, but the details of the annual allocations are to be decided later. This is usually when plans have not been finalised in time to decide on the specific allocation amounts for the main budget.
- **Adjustments due to significant and unforeseeable economic and financial events:** When unforeseeable economic and financial events affect the fiscal targets set by the main budget, adjustments may need to be made. Significantly higher inflation than anticipated in budget projections over the MTEF period is an example of such an event.
- **Emergencies:**⁸ The Minister of Finance can approve the use of unappropriated funds for spending of an exceptional nature. This happens if postponing the spending to a future parliamentary appropriation would seriously prejudice the public interest. The Minister of Finance must subsequently provide a report to Parliament.
- **Self-financing expenditure** is spending financed from revenue derived from a vote's specific activities. The revenue is paid into the National Revenue Fund. If self-financing expenditure is approved, these funds are allocated to the vote.
- **Declared savings** are unspent amounts that departments explicitly indicate they will not reallocate to fund their other spending. In many instances this would be because a virement of the funds is not possible in terms of the PFMA.⁹
- **Direct charges against the National Revenue Fund** are amounts spent in terms of statutes and do not require parliamentary approval, such as expenditure on state debt costs.
- **Gifts, donations and sponsorships** from the vote are also included in the adjustments budget.

Summary of the adjustments for 2011/12

The adjustments budget makes provision for an additional R10.296 billion in vote allocations for 2011/12, comprised as follows:

• roll-overs	R3.737 billion
• unforeseeable and unavoidable expenditure	R1.031 billion
• higher than expected personnel remuneration adjustment costs	R4.405 billion
• self-financing expenditure	R838.138 million
• state debt costs	R285.327 million

A contingency reserve of R4.090 billion was set aside in the main budget. Budget spending projections also make provision for about R7.071 billion in underspending at the national level (including declared savings) in addition to the R40 million that was unallocated. Offsetting this R11.201 billion available on the main budget against the R10.296 billion in the adjustments budget, the total estimated level of spending decreases by R905.053 million, from a budgeted R888.923 billion to a revised R888.018 billion.

Information in each chapter

The *Adjusted Estimates of National Expenditure* provides detailed information for each vote in the Adjustments Appropriation Bill, following the layout shown below. Votes are organised into functional groupings for analysis of interdepartmental initiatives and service delivery. These functional groupings are informal and are not the same as either the government's cluster system groupings or the standard chart of accounts' more rigorous classification of government functions; nor are they the same as the functional groupings used in government's medium-term expenditure framework (MTEF) budget allocation decision process. The groupings are as follows:

- Central Government Administration
- Financial and Administrative Services
- Social Services
- Justice, Crime Prevention and Security
- Economic Services and Infrastructure.

Adjusted budget summary

R thousand	Main appropriation	Adjusted appropriation	Decrease	Increase
Amount to be appropriated of which:				
Current payments				
Transfers and subsidies				
Payments for capital assets				
Payments for financial assets				
Direct charge against the National Revenue Fund				
Executive authority				
Accounting officer				
Website address				

This table summarises the adjustments to the main budget by main economic classification of payments.

Main appropriation shows the total amount voted for the current financial year in the main budget.

Adjusted appropriation shows the adjusted total amount to be voted for the current financial year, that is the sum of the main appropriation and the adjustment.

Decrease and **Increase** show the amount of the adjustment itself.

Current payments are payments made by a department for its operational requirements.

Transfers and subsidies are payments made by a department for which the department does not directly receive anything in return.

Payments for capital assets are payments made by a department for an asset that can be used for more than one year and from which future economic benefits or service potential are expected to flow.

Payments for financial assets mainly consist of payments made by departments as loans to public corporations or as equity investments in public corporations. The reason for expensing the payments rather than treating them as financing is that, unlike other financial transactions, the purpose of the transaction is not profit oriented. This column is only shown in votes where such payments have been budgeted for. Payments for theft and losses are included in this category; however, these payments are not budgeted for and will thus only appear in the historical information, which can be seen in the expenditure table.

Direct charges against the National Revenue Fund may also be adjusted. These are amounts spent in terms of statutes and do not require parliamentary approval. They are not budgeted for under any programme on a particular vote and include, for example, state debt costs.

The last lines of the table give accountability information: the vote's executive authority, accounting officer and website address.

Aim

The aim of the vote captures a department's mandate, strategic objectives or administrative functions, and corresponds with the aim stated in the Adjustments Appropriation Bill.

Changes to programme purposes, objectives and measures

To maintain the link between a department's strategic and annual performance plans, its voted budget and its adjusted budget, any changes to programme purposes, objectives and measures are noted.

Mid-year performance status

Indicator	Programme	Annual performance		
		Projected for 2011/12 as published in the 2011 ENE	Achieved in the first six months of 2011/12 (April to September)	Changed estimate for 2011/12

Managing, monitoring and measuring performance are integral to improving service delivery. The table shows what a department has achieved in the first six months of the current financial year compared to what it projected for the year.¹⁰

An **indicator** is a numerical measure that tracks a department's progress towards its goal. An indicator may measure inputs, activities, outputs, outcomes or in certain instances explanatory information relating to the internal or external environment.

The **programme** column links the indicator to the vote programme associated with it.

Projected for 2011/12 as published in the 2011 ENE shows what the department projected it would achieve for the current financial year.

Achieved in the first six months of 2011/12 shows what the department has actually achieved in the first half of the current financial year.

Changed estimate for 2011/12 shows any change to the estimate originally published in the ENE. Estimates will typically change in cases where the funding provided for a particular programme has been amended in the Adjustments Appropriation Bill.

Changes to indicators and targets published in the 2011 ENE

Any significant deviations from any specific performance estimates for the current financial year are briefly explained below the table, as well as any changes to the indicators themselves. Changes to indicators are typically the result of significant policy or mandate changes, or budget programme structure changes; they can also be caused by the adjustments to a vote's estimates of expenditure.

Mid-year process

A brief discussion is then provided on the department's mid-year progress towards achieving the targets that were set.

¹⁰ This table is not intended to give a comprehensive analysis of a department's performance as it shows only a selection of a department's indicators, as published in the ENE.

Adjusted Estimates of National Expenditure 2011

Current payments							
Economic classification item							
Transfers and subsidies							
Economic classification item							
Payments for capital assets							
Economic classification item							
Payments for financial assets							
Total							

In this table, a vote's adjusted estimates of expenditure are set out by the type of expenditure adjustment, and by vote programme and by economic classification (current payments, transfers and subsidies, payments for capital assets and payments for financial assets).

Main appropriation shows the total amount voted for the current financial year in the main budget.

Adjustments appropriation shows the amounts of the adjustment for each of the types of expenditure adjustment by programme and by economic classification.

Roll-overs shows unspent funds from the preceding financial year reallocated to the current financial year to finalise activities close to completion.

Unforeseeable/unavoidable shows spending that could not be anticipated at the time of finalising the main budget.

Virements and shifts:

Virements are the utilisation of savings or underspending from amounts appropriated under one main division (programme) towards the defrayment of increased expenditure under another main division within the same vote.

Shifts are the utilisation of savings or underspending towards the defrayment of increased expenditure within a main division (programme) of a vote between different segments (subprogramme and economic classification) of the main division. Shifts include the reallocation of funds incorrectly allocated during the ENE process.

Other adjustments include: function shifts; unallocated amounts announced in the main budget; adjustments due to significant unforeseeable economic and financial events; emergency funding; self-financing expenditure; and declared savings.

Total adjustments appropriation shows the sum of all the expenditure adjustments by programme and by economic classification. This number may be negative. In most instances this would be because of a virement of funds out of that programme or economic classification.

Adjusted appropriation shows the adjusted total amount to be voted for the current financial year, that is the sum of the main appropriation and the adjustment.

Similar tables are then shown for each programme which has adjustments to appropriations.

Details of adjustments to the Estimates of National Expenditure 2011

This section gives explanations by programme for:

- Roll-overs
- Unforeseeable and unavoidable expenditure
- Virements and shifts

Virements and shifts

Programmes

1. Programme name
2. Programme name
3. Programme name

FROM:			TO:		
Programme by economic classification	Motivation	R thousand	Programme by economic classification	Motivation	R thousand
Programme number			Programme number

Percentage of programme budget per cent					
Programme number			Programme number		
Economic classification item			Economic classification item		
Programme number			Programme number		
Economic classification item			Economic classification item		
Percentage of programme budget per cent					
Total					

FROM: shows where funding reductions have been effected, by programme and by economic classification item. The percentage by which the programme budget is being changed is also shown.

It should be noted that funds may be shifted within the same programme and that in such instances, the percentage by which the programme budget is effectively reduced is less than the percentage indicated.

TO: shows where increased spending has been offset by these reductions, by programme and per economic classification item.

Motivation explains how the funding reductions occurred on the one hand, and on the other what they will be spent on.

R thousand shows the monetary amounts.

Certain types of virements and shifts require either legislative approval or approval from National Treasury before they can be effected. All virements and shifts which have National Treasury's approval or which can only be approved by the legislature are footnoted in this table. In terms of the PFMA,¹¹ the Treasury Regulations,¹² and the Appropriation Act (2011),¹³ the following virements and shifts require approval from National Treasury:

- Virements and shifts which will increase the funds appropriated for compensation of employees
- Virements and shifts which will increase the funds appropriated for transfers and subsidies to other institutions
- Virements and shifts which introduce a new transfer to other institution
- Virements and shifts which utilise funds that were treasury earmarked for a specific purpose

¹¹ Section 43

¹² Section 6.3

¹³ Section 5

- Virements and shifts which utilise funds appropriated for payments for capital assets for the payment of current assets
- Virements and shifts which utilise savings of funds appropriated as transfers and subsidies for payment to another institution.

The following virements and shifts can only be approved by the legislature:¹⁴

- Virements and shifts that utilise savings on funds appropriated for items specifically and exclusively earmarked in an Appropriation Act
- Virements and shifts which utilise savings of more than 8 per cent of the amount appropriated for that programme
- Shifts between different segments within a programme do not affect the overall amount appropriated for a programme, only virements from a programme effectively reduce the programme budget.

After the virements and shifts table, the remaining explanations are given:

- Other adjustments: function shifts: between votes and within a vote; unallocated amounts announced in the main budget; adjustments due to significant and unforeseeable economic and financial events; emergency funding; self-financing expenditure; and declared savings
- Gifts, donations and sponsorships
- Direct charges against the National Revenue Fund (these are not linked to a programme on a vote).

Expenditure 2010/11 and preliminary expenditure 2011/12

¹⁴ Section 43 of the PFMA read in conjunction with Section 5 of the Appropriation Act (2011)

This table shows the expenditure outcome for the last financial year and preliminary expenditure for the first six months of the current financial year, by programme and per economic classification.

2010/11 Expenditure outcome shows the outcome for the previous financial year.

Adjusted appropriation shows the adjusted total amount voted for the previous financial year.

Apr 10 to Sep 10 shows the expenditure outcome for the first six months of the previous financial year.

Apr 10 to Sep 10 % of adjusted appropriation shows the expenditure outcome for the first six months of the previous financial year as a percentage of the adjusted appropriation for that year.

Apr 10 to Mar 11 shows the expenditure outcome for the whole of the previous financial year.

Apr 10 to Mar 11 % of adjusted appropriation shows the expenditure outcome for the whole of the previous financial year as a percentage of the adjusted appropriation for that year.

2011/12 Preliminary expenditure shows the preliminary expenditure for the current financial year.

Adjusted appropriation shows the adjusted total amount to be voted for the current financial year.

Apr 11 to Sep 11 shows the preliminary expenditure for the first six months of the current financial year.

Apr 11 to Sep 11 % of adjusted appropriation shows the preliminary expenditure for the first six months of the current financial year as a percentage of the adjusted appropriation for the year.

Main expenditure trends for the first half of 2011/12

Expenditure trends show whether actual expenditure is in line with the budget. Mid-year preliminary expenditure for the current financial year is compared to mid-year expenditure for the previous year. Explanations are given for significant changes in expenditure compared to the previous financial year.

Where functions have shifted between votes or new votes have been created, subsequent to the publication of the 2010 Adjusted Estimates of National Expenditure, the information in this publication may not be strictly comparable with that published last year.

Departmental receipts

R thousand	Adjusted estimate	2010/11			2011/12		
		Audited outcome			Actual receipts		
		Apr 10 - Sep 10 % of adjusted estimate	Apr 10 - Mar 11 % of adjusted estimate	Budget estimate	Apr 11 - Sep 11 % of adjusted estimate	Adjusted estimate	Apr 11 - Sep 11 adjusted estimate
Departmental receipts							
Economic classification item							
Economic classification item							
Total							

This table shows projected departmental revenue for the current financial year.

2010/11 Audited outcome shows the departmental receipts outcome for the previous financial year.

Adjusted estimate shows the adjusted total amount of receipts anticipated in the previous year's adjustments budget.

Apr 10 to Sep 10 shows the receipts outcome for the first six months of the previous financial year.

Apr 10 to Sep 10 % of adjusted estimate shows the receipts outcome for the first six months of the previous financial year as a percentage of the adjusted estimate for that year.

Apr 10 to Mar 11 shows the receipts outcome for the whole of the previous financial year.

Apr 10 to Mar 11 % of adjusted estimate shows the receipts outcome for the whole of the previous financial year as a percentage of the adjusted estimate for that year.

2011/12 Actual receipts shows the preliminary receipts outcome for the current financial year.

Budget estimate shows the total amount of receipts anticipated for the current financial year in the main budget.

Adjusted estimate shows the adjusted total amount of receipts anticipated in the adjustments budget for the current financial year.

Apr 11 to Sep 11 shows the preliminary receipts outcome for the first six months of the current financial year.

Apr 11 to Sep 11 % of adjusted estimate shows the preliminary receipts outcome for the first six months of the current financial year as a percentage of the adjusted estimate for the year.

Main departmental revenue trends for the first half of 2011/12

Any differences from the information published in the ENE for the current financial year are explained in the text that follows the table.

Where functions have shifted between votes or new votes have been created, subsequent to the publication of the 2010 Adjusted Estimates of National Expenditure, the information in this publication may not be strictly comparable with that published last year.

Changes to transfers and subsidies, including conditional grants

		2011/12					
R thousand	Main appropriation	Adjustments appropriation				Total adjustments appropriation	Adjusted appropriation
		Roll-overs	Unforeseeable/ unavoidable	Virements and shifts	Other adjustments		
Programme name							
Conditional grant name							

These tables show changes to transfers and subsidies and to conditional grants (provinces and local government), by programme and per economic classification item.

Main appropriation shows the total amount voted for the current financial year in the main budget.

Adjustments appropriation shows the amounts of the adjustment for each of the types of expenditure adjustment, by programme and per economic classification.

Roll-overs shows unspent funds from the preceding financial year reallocated to the current financial year to finalise activities close to completion.

Unforeseeable/unavoidable shows spending that could not be anticipated at the time of the main budget.

Virements and shifts

Virements are the utilisation of savings or underspending from amounts appropriated under one main division (programme) towards the defrayment of increased expenditure under another main division within the same vote.

Shifts are the utilisation of savings or underspending towards the defrayment of increased expenditure within a main division (programme) of a vote between different segments (subprogramme and economic classification) of the main division. Shifts include the reallocation of funds incorrectly allocated during the ENE process.

Other adjustments include: function shifts; unallocated amounts announced in the main budget; adjustments due to significant unforeseeable economic and financial events; emergency funding; self-financing expenditure; and declared savings.

Total adjustments appropriation shows the sum of all the expenditure adjustments by programme and by economic classification. This number may be negative. In most instances this would be because of a virement of funds out of that programme or economic classification.

Adjusted appropriation shows the adjusted total amount to be voted for the current financial year, that is the sum of the main appropriation and the adjustment.
