# Vote purpose

Ensure the availability of water resources to facilitate equitable and sustainable socioeconomic development, and ensure universal access to water and sanitation services.

# Mandate

The mandate of the Department of Water and Sanitation is set out in the National Water Act (1998) and the Water Services Act (1997). The department's legislative mandate is to ensure that the country's water resources are protected, managed, used, developed, conserved and controlled by regulating and supporting the delivery of effective water supply and sanitation. This is done in accordance with the requirements of water-related policies and legislation that are critical in delivering on people's right to have enough food and water, growing the economy, and eradicating poverty.

# **Expenditure overview**

Over the medium term, the department will continue to focus on enhancing regulatory measures, ensuring that infrastructure is protected and restored, and ensuring that water and sanitation services are managed effectively.

The department's total budget over the medium term is R59.6 billion. Transfers and subsidies to departmental agencies, public corporations and municipalities comprise the largest share of the budget, amounting to R34.9 billion over the MTEF period. Total expenditure is expected to increase at an average annual rate of 5.6 per cent, from R17.7 billion in 2021/22 to R20.9 billion in 2024/25, mainly due to additional allocations of R5.3 billion over the medium term for capital projects involving water resource and regional bulk infrastructure. As a result of the expected decrease in the number of personnel from 3 787 in 2021/22 to 3 520 in 2024/25 due to natural attrition, expenditure on compensation of employees is expected to decrease at an average annual rate of 0.6 per cent, from R1.9 billion in 2021/22 to R1.8 billion in 2024/25.

Over the period ahead, the department will continue to ensure the delivery of safe water and the effective management of wastewater through enforcing various regulatory measures and strengthening its oversight functions. To this end, the blue drop, green drop and no drop regulatory standards are in place to improve asset management practices in municipalities. Over the MTEF period, the department expects to support 32 district municipalities with developing water and sanitation reliability plans and monitoring the compliance of all water services authorities with regulatory standards. Over the same period, the department aims to ensure that 80 per cent of applications to authorise water-use are finalised within 90 days and that 963 wastewater systems are assessed for compliance against green drop regulatory requirements. For activities related to water resources, R270.7 million over the MTEF period is allocated for regulatory compliance in the *Water Resources Regulation* subprogramme in the *Water Resources Management* programme; and R220.9 million is allocated for oversight in the *Water Resources Management* programme in the *Water Resources Management* programme. For activities related to water services, R323.9 million over the MTEF period is allocated for regulatory compliance and R71 million is allocated for oversight in the *Water Services Regulation* subprogramme in the *Water Services Management* programme.

The department will continue to invest in water resources and implement projects such as the phase 2D of the Olifants River water resource development project, the Mokolo-Crocodile water augmentation project, the

raising of the Tzaneen and Hazelmere dams, and the Umdloti River development project. Accordingly, spending in the *Water Resources Management* programme is expected to increase at an average annual rate of 10.7 per cent, from R3.6 billion in 2021/22 to R4.9 billion in 2024/25. This includes spending of R2.1 billion over the medium term to raise the Clanwilliam Dam wall.

Over the period ahead, 2 mega, 24 large and 28 small regional bulk infrastructure projects are expected to be implemented and finalised. These projects and related activities are carried out in the *Water Services Management* programme, spending in which is expected to increase at an average annual rate of 4.6 per cent, from R12.2 billion in 2021/22 to R13.9 billion in 2024/25. Included in this spending is an additional allocation of R3.6 billion over the medium term for the Olifants-Ebenezer water supply scheme, the lower Umkhomazi bulk water scheme, and the bulk potable water and remedial works programme in George local municipality.

# **Programme 1: Administration**

#### Programme purpose

Provide strategic leadership, management and support services to the department. Develop and promote international relations on water resources with neighbouring countries.

#### Objective

• Facilitate cooperation by implementing and evaluating the approved African and global international relations plan annually, in support of the national water and sanitation agenda.

#### **Subprogrammes**

- *Ministry* provides administrative and logistical support to the minister and deputy minister and their support staff and makes provision for their salaries.
- Departmental Management provides policy and strategic direction for water and sanitation management. This includes enterprise-wide support services comprising administrative support to the director-general, corporate planning, monitoring and evaluation, and the provision of salaries and operational budgets for the department's regional office heads.
- *Corporate Services* provides enterprise-wide support comprising human resources, legal services, communications, the learning and development academy, and transformation policy and coordination.
- Financial Management ensures the efficient management of daily financial operations, processes and systems.
- Office Accommodation makes payments for rental charges on all leased office space occupied by the department, and for municipal services such as electricity, water, sewage and waste removal.
- Provincial and International Coordination is responsible for the coordination of international relations on water and sanitation with neighbouring countries, and the provision of salaries and operational budgets for the department's regional office heads.

# **Programme 2: Water Resources Management**

#### Programme purpose

Ensure that South Africa's water resources are protected, used, developed, conserved, managed, controlled and planned in an integrated and sustainable manner.

#### **Objectives**

- Effectively manage water demand and supply by:
  - maintaining 6 water information systems on an ongoing basis
  - updating climate change risk and vulnerability assessments on an ongoing basis.
- Ensure the effective and sustainable management of water resources by distributing and monitoring funds transferred to the Water Trading Entity for the design, construction, commissioning and rehabilitation of bulk raw water infrastructure, including dam safety rehabilitation, on an ongoing basis.
- Improve the efficiency and effectiveness of the management of water resources by establishing 6 catchment management agencies by March 2024.
- Ensure the equitable allocation of water resources for social and economic development by processing 80 per cent of applications to authorise water use within 90 days on an ongoing basis.
- Protect and restore ecological infrastructure by:
  - implementing monitoring programmes for drinking water, wastewater and mine water quality on an ongoing basis
  - implementing the waste discharge charge system by March 2025.
- Ensure the protection of water resources by coordinating and monitoring compliance with standards, licence conditions and regulations across all sectors on an ongoing basis.
- Ensure the effective enforcement of compliance with water legislation by monitoring water use, conducting
  investigations and providing legal support in cases of unlawful water use on an ongoing basis.

#### **Subprogrammes**

- Water Resources Management Support provides strategic leadership, management and support services to the programme and makes provisions for associated salaries.
- Integrated Water Resources Planning develops comprehensive plans for the availability of adequate water resources to guide infrastructure development, systems and services management in the water sector.
- Water Ecosystems Management develops and implements measures to protect water resources. This entails
  determining measures to manage water resources, and developing guidelines and protocols for pollution
  control and rehabilitation.
- Water Resources Information and Management ensures the development and maintenance of data and information management systems to enable informed decisions in the water sector.

Rand million.

- Water Resources Infrastructure Management develops, rehabilitates and refurbishes bulk raw water resources infrastructure to meet South Africa's socioeconomic and environmental needs.
- Water Resources Policy and Strategy develops, monitors and reviews water resources management policies and procedures.
- Water Resources Regulation develops, implements, monitors and reviews regulations on water resources, particularly the regulation of raw water pricing, the authorisation of water use, compliance monitoring and enforcement, dam safety, resource protection and waste.
- Water Resources Institutional Oversight is responsible for the institutional governance and oversight of all water resources institutions, and facilitates their establishment and development.

# **Programme 3: Water Services Management**

#### Programme purpose

Develop, rehabilitate and refurbish water services infrastructure to meet the socioeconomic and environmental needs of South Africa.

#### **Objectives**

- Enhance the efficiency of water use and the management of water quality by assessing 8 large water systems for water losses annually.
- Ensure adequate water availability through the development and management of infrastructure for water resources, and enhance the provision of sustainable and reliable water supply and sanitation by:
  - implementing 24 large regional bulk infrastructure projects over the medium term
  - supporting 32 district municipalities with developing water and sanitation reliability plans over the medium term
  - assessing annual municipal strategic self-assessments across all water services authorities on an ongoing basis

<sup>2.</sup> Rand million

 transferring funds and monitoring the performance of municipalities on the regional bulk infrastructure grant and water services infrastructure grant in terms of the annual Division of Revenue Act.

#### **Subprogrammes**

- Water Services Management Support provides strategic leadership, management and support services to the programme, and makes provision for associated salaries.
- Water Services and Local Management develops comprehensive plans that guide water and sanitation services and management across the value chain.
- Regional Bulk Infrastructure Grant provides for the development of new infrastructure; the refurbishment, upgrading and replacing of aging infrastructure; and the servicing of extensive areas across municipal boundaries.
- Water Services Regulation develops, implements, monitors and reviews water resources regulations, particularly the compliance of water services authorities with water supply regulations.
- Water Services Policy and Strategy develops and reviews water services policies, procedures, norms and standards; and monitors their implementation.
- Water Services Infrastructure Grant provides for the construction of new infrastructure and the rehabilitation of existing water and sanitation infrastructure through the grant transfer of water services schemes to water services institutions.
- Water Services Institutional Oversight is responsible for the institutional governance and oversight of all water services institutions, and facilitates their establishment and development.

#### **Entity overview**

The Breede-Gouritz Catchment Management Agency was established in terms of the National Water Act (1998). The agency's main role is to protect, use, develop, conserve and manage water resources within the Breede-Gouritz catchment area. Over the medium term, the agency plans to continue engaging with users within its area of operation as part of its *Public Participation* programme, while monitoring and authorising their water usage. At a cost of R176 million over the MTEF period, the agency plans to finalise 85 per cent of user registrations as part of its authorisation project.

Expenditure is expected to increase at an average annual rate of 7.8 per cent, from R75.1 million in 2021/22 to R94.2 million in 2024/25. The agency's main cost driver is compensation of employees, which accounts for an estimated 64.1 per cent (R168.9 million) of its total expenditure over the period ahead. The agency derives all its revenue through transfers from the department. Revenue is expected to increase in line with expenditure.

<sup>1.</sup> Measured in megalitres.

#### Expenditure overview

The water boards are primarily mandated to provide bulk industrial and potable water services to municipalities and industries within their areas of operation, as mandated by the Water Services Act (1997). The water boards vary in size, activities, customer mix, revenue base and capacity. Rand Water and Umgeni Water are the two largest water boards, whose combined bulk sales accounted for an estimated 81.5 per cent of total sales in 2021/22.

Consolidated expenditure is expected to increase at an average annual rate of 8.8 per cent, from R24.6 billion in 2021/22 to R31.7 billion in 2024/25. The water boards' main cost drivers include the purchasing of raw water, pumping and chemicals, accounting for an estimated 76.4 per cent (R68.5 billion) of total expenditure over the period ahead. Their consolidated revenue is set to increase at an average annual rate of 11.1 per cent, from R29.1 billion in 2021/22 to R39.3 billion in 2024/25, as the sale of bulk water is expected to increase from R26.9 billion in 2021/22 to R37.1 billion 2024/25.

#### **Entity overview**

The Inkomati-Usuthu Catchment Management Agency was established in 2004 in terms of the National Water Act (1998). The agency plays a major role in the use, protection and development of water resources in the Inkomati-Usuthu water management area. The agency's water resource management functions include resource allocation, protection, use, conservation, monitoring, planning, development and operation. Over the medium term, the agency will continue focusing on monitoring, planning and developing activities to manage water resources, and ensuring that all authorisations and recommendations related to water quality are forwarded to the department.

Expenditure is expected to increase at an average annual rate of 11.8 per cent, from R139.7 million in 2021/22 to R195.4 million in 2024/25. Transfers from the department account for an estimated 66.5 per cent (R373.4 million) of the agency's revenue over the period ahead, with the remainder generated through licence fees for water use. Revenue is expected to increase in line with expenditure.

#### **Entity overview**

Rand Water was established in terms of the Water Services Act (1997) and is mandated is to supply quality bulk potable water within its area of supply. Its customers include 3 Gauteng metropolitan municipalities, 13 municipalities, 40 mines and 926 industries. Over the MTEF period, the board will continue to supply bulk water to customers from its primary purification plants through its distribution network, which includes 3 056 kilometres of bulk pipelines to feed 58 service reservoirs.

To meet projected demand and sell 1.7 million megalitres of water in 2024/25, the water board will invest in infrastructure refurbishment projects while maintaining an average loss of non-revenue water at 4.6 per cent over the medium term. Expenditure is expected to increase at an average annual rate of 9.8 per cent, from R14.4 billion in 2021/22 to R19 billion in 2024/25, driven mainly by water purification and pumping costs. Revenue is expected to increase at an average annual rate of 10.8 per cent, from R17.8 billion in 2021/22 to R24.2 billion in 2024/25, mainly driven by projected tariff increases and increased sales.

#### **Entity overview**

The Trans-Caledon Tunnel Authority is a specialised liability management entity that derives its mandate from the National Water Act (1998). It is responsible for financing and implementing the development of bulk raw water infrastructure and providing treasury management services to the Department of Water and Sanitation. By 2024/25, the authority will merge with the Water Trading Entity to form the National Water Resources Infrastructure Agency.

Over the medium term, the authority will continue with the implementation of the Berg River-Voëlvlei augmentation scheme, the Mzimvubu water project and phase 2 of Mokolo-Crocodile water augmentation project. In support of water demand management in the Mgeni system, the authority plans to build an  $81m^2$  dam and conveyance infrastructure.

Expenditure is expected to increase at an average annual rate of 24.2 per cent, from R7.9 billion in 2021/22 to R15.1 billion in 2024/25. The authority projects a surplus of R5.6 billion over the period ahead mainly due to delays in the delivery tunnel for the Lesotho Highlands water project, while revenue is expected to increase at an average annual rate of 27.3 per cent, from R8.4 billion in 2021/22 to R17.4 billion in 2024/25, mainly due to funding for construction received from the Water Trading Entity.

#### **Entity overview**

Umgeni Water was established in terms of the Water Services Act (1997) to provide water and sanitation services in mostly rural areas in KwaZulu-Natal and the eThekwini metropolitan area. It supplies water to an estimated 6 million consumers. Its ongoing objective is to support socioeconomic development through investing in water infrastructure in its area of operation. Over the medium term, Umgeni Water plans to finalise the construction of phase 1 of the Greater Mpofana regional water scheme, the Impendle bulk water supply scheme, and phase 3 of the Maphumulo bulk water supply scheme, targeting largely indigent municipal areas. It also plans to implement the Umkhomazi-Mgeni transfer scheme to provide bulk potable water in the area.

Expenditure is expected to increase at an average annual rate of 5.1 per cent, from R4.3 billion in 2021/22 to R5 billion in 2024/25. Revenue is expected to increase at an average annual rate of 10.5 per cent, from R5.2 billion in 2021/22 to R7 billion in 2024/25, mainly due to an expected increase in bulk water sales.

#### **Water Research Commission**

# Selected performance indicators

Table 41.35 Water Research Commission performance indicators by programme/objective/activity and related priority

Indicator	Programme/Objective/Activity	MTSF priority	Audi	ted perform	ance	Estimated performance	ŗ	ATEF targets	
			2018/19	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25
Number of research projects completed per year	Research and development		104	80	84	80	80	80	80
Number of students financially and technically supported (including historically disadvantaged students) per year	Research and development	Entity mandate	411	250	326	250	300	350	350

#### **Entity overview**

The Water Research Commission was established in terms of the Water Research Act (1971). It is mandated to conduct research in the water sector by determining needs and priorities for research; promoting coordination, cooperation and communication for the development of water research; stimulating and funding water research; promoting the effective transfer of information and technology; and enhancing knowledge and building capacity in the water sector.

Over the medium term, the commission plans to bridge knowledge gaps in the sector by prioritising research informed by government policies, needs and international trends. Accordingly, the commission's research will focus on the desalination of seawater, climate change modelling and water availability.

Expenditure is expected to increase at an average annual rate of 5 per cent, from R337 million in 2021/22 to R390.7 million in 2024/25. Spending on *Research and Development*, and *Innovation and Impact* programmes account for an estimated 51 per cent (R557.9 million) of the commission's total expenditure over the period ahead. Compensation of employees is the commission's main cost driver, increasing at an average annual rate of 8.6 per cent, from R113.6 million in 2021/22 to R145.5 million in 2024/25.

The commission expects to derive 80.6 per cent (R889 million) of its revenue over the MTEF period through the water research levy. Revenue is expected to increase in line with expenditure.

#### **Entity overview**

The Water Trading Entity was established in 1983 and was converted into a trading entity in 2008 in terms of the Public Finance Management Act (1999). The entity's primary role is to manage water infrastructure and resources, and the sale of raw water. Over the medium term, the entity will continue to focus on maintaining existing water resource infrastructure and supplying bulk water to strategic users, such as large industrial companies, to stimulate and support economic development. By 2024/25, the entity will merge with the Trans-Caledon Tunnel Authority to form the National Water Resources Infrastructure Agency.

In supporting the long-term sustainability of water resources, the entity will implement 16 dam safety rehabilitation projects over the MTEF period. Expenditure is expected to increase at an average annual rate of 4.9 per cent, from R15.6 billion in 2021/22 to R18 billion in 2024/25. An additional R2.1 billion is allocated over period ahead to finalise the Olifants-Doorn River water resources project.

The entity expects to generate 82.8 per cent (R50.8 billion) of its revenue through the sale of raw water. Total revenue is expected to be R60.8 billion over the MTEF period.
