# Introduction

## The budget cycle timeline

**February:** The Minister of Finance tables the main Budget and Appropriation Bill in the National Assembly.

**April:** Start of the new financial year.

**October:** The Minister of Finance tables the adjusted national budget and the Adjustments Appropriation Bill in the National Assembly.

## The main budget process

The main Budget announces government spending for three years going forward: that is, the years of the medium-term expenditure framework (MTEF). Through an accompanying Appropriation Bill, the Executive seeks Parliament's approval and adoption of its spending plans for the upcoming financial year. Amounts allocated for the first year of the new MTEF period are then appropriated from the National Revenue Fund in terms of the Appropriation Act, once approved by the President. The main Budget also provides for an unallocated reserve, which accommodates expenditure related to unforeseeable circumstances.

Allocations made in Appropriation acts are shown by vote. Generally, a vote specifies the total amount appropriated per department. In some cases, a vote may contain more than one department.

## The adjustments budget process

In the middle of each year, the adjustments process provides an opportunity to revise the main Budget in response to changes that have affected the planned government spending for that year. The adjusted budget may allocate unused funds, mainly from the unallocated reserve, and additional amounts that have been approved for particular types of spending, if that be the case. The adjusted budget includes the amount allocated in the main Appropriation Act, special appropriations as well as the effects of the adjustments. The adjusted budget estimates are also tabled in the National Assembly by the Minister of Finance, accompanied by an Adjustments Appropriation Bill. A Division of Revenue Amendment Bill is also tabled that sets out how the adjustments affect the Division of Revenue Act.

The Estimates of National Expenditure (ENE) describes in detail the planned spending of all national government votes over the MTEF period. The Adjusted Estimates of National Expenditure (AENE) describes in detail the revisions to spending plans for the first year of the MTEF period, that is, the current financial year.

## The adjustments

The Public Finance Management Act (1999) (PFMA)<sup>1</sup> specifies the type of spending the adjustments budget may provide for. The Treasury Regulations, issued by National Treasury in terms of the PFMA<sup>2</sup>, provide instructions on how to comply with the PFMA.

The adjustments appropriation makes provision for:

- **Adjustments due to significant and unforeseeable economic and financial events:** When unforeseeable economic and financial events affect the fiscal targets set by the main Budget, adjustments may need to be made. Inflation that is significantly higher than anticipated in the budget estimates projected for the MTEF period, is an example of such an event.
- **Unforeseeable and unavoidable expenditure:** Expenditure that could not be anticipated at the time of the main Budget. The Treasury Regulations<sup>3</sup> specify that the following may not be regarded as unforeseeable and unavoidable expenditure: spending that was known when the main Budget was being

<sup>1</sup> Section 30(2).

<sup>2</sup> Section 76.

<sup>3</sup> Section 6.6.

finalised but that could not be accommodated in the allocations at that time; spending increases due to tariff adjustments and price increases; and spending to extend existing services or create new services that are not unforeseeable and unavoidable. Spending made necessary by adverse weather conditions is an example of unforeseeable and unavoidable expenditure.

- **Emergencies:**<sup>4</sup> The Minister of Finance can approve the use of unappropriated funds, if it is for spending of an exceptional and extraordinary nature. This happens if postponing the spending to a future parliamentary appropriation would seriously prejudice the public interest.
- **Appropriation of expenditure earmarked in the main Budget speech for future allocation:** In certain instances, an amount to be allocated for a specific purpose will be announced by the Minister of Finance when the main Budget is tabled, although the details of the annual allocation are to be decided later. This is usually when implementation plans have not been finalised in time to decide on the specific allocation amount for the main Budget.
- **Shifts:** The utilisation of unspent funds towards the defrayment of increased expenditure within a main division (programme)<sup>5</sup> of a vote, between different segments (subprogramme and economic classification) of the programme. Shifts may include the reallocation of funds incorrectly allocated during the ENE process.
- **Function shifts:**<sup>6</sup> Functions which are shifted to another vote or institution in terms of legislation and/or following the reassignment of responsibility for the functions. The associated assets, including personnel, and the liabilities also need to be shifted. Such shifts can also happen between programmes within a vote.
- **Virements:** The utilisation of unspent funds from amounts appropriated under one programme towards the defrayment of excess expenditure under another programme within the same vote. Enacted legislation<sup>7</sup> and the Treasury Regulations<sup>8</sup> set parameters within which virements may take place.
- **Roll-overs:** Unspent funds from the preceding financial year that may be rolled over, when activities planned to be completed by the end of that year have not been completed but are close to completion. The Treasury Regulations<sup>9</sup> restrict roll-overs as follows: compensation of employees funding may not be rolled over; a maximum of 5 per cent of a department's budget for goods and services may be rolled over; transfers and subsidies funding may not be rolled over for any purpose other than what the funds were originally allocated for; and unspent funds on payments for capital assets may only be rolled over to finalise projects or assets acquisitions already in progress.
- **Self-financing expenditure:** Spending financed from revenue derived from a vote's specific activities. The revenue is paid into the National Revenue Fund. If self-financing expenditure is approved, these funds are allocated to the vote.
- **Declared unspent funds:** Unspent amounts that departments explicitly indicate they will not require in the current financial year.
- **Direct charges against the National Revenue Fund:** Amounts spent in terms of statutes and that do not require parliamentary approval, such as expenditure on debt service costs.
- **Gifts, donations and sponsorships:**<sup>10</sup> If valued at more than R100 000 per transaction, these are included in the adjustments budget.

---

<sup>4</sup> Section 16 of the PFMA.

<sup>5</sup> 'Main division' refers to a budget programme within a vote, and is the formal term used in the PFMA and in the Appropriation Bill. In this publication the term 'programme' is used because this is the more commonly used term.

<sup>6</sup> Section 42 of the PFMA.

<sup>7</sup> Section 43 of the PFMA and also section 5 of the Appropriation Act (2015).

<sup>8</sup> Section 6.3.

<sup>9</sup> Section 6.4.

<sup>10</sup> Treasury Regulation 21.

## Summary of the adjustments for 2015/16

Adjustments to vote appropriations amount to R1 857.537 million, of which:

• national government public sector salary adjustments	R1 173.468 million
• unforeseeable and unavoidable expenditure	R753.106 million
• announced by the Minister of Finance in the 2015 Budget speech	R301.000 million
• roll-overs	R1 616.838 million
• self-financing expenditure	R1 196.821 million
• declared unspent funds (reductions to vote allocations)	(R3 183.696 million)

Adjustments to estimates of direct charges against the National Revenue Fund amount to R6 908.776 million more than anticipated at the time of the main Budget, of which:

• provincial equitable share: public sector salary adjustments	R3 826.532 million
• National Revenue Fund payments	R560.654 million
• debt service costs	R1 461.590 million
• skills levy and sector education and training authorities	R1 110.000 million
• magistrates' salaries: declared unspent funds	(R50.000 million)

The adjustments to vote appropriations and estimates of direct charges are offset against the R5 billion in unallocated reserves set aside in the main Budget. In addition, the revised budget framework makes provision for approximately R3 billion in projected underspending at the national government level, and R1.2 billion at the local government level. The total estimated adjustments spending for 2015/16 thus decreases by R433.687 million, from a budgeted R1 222.345 billion to a revised R1 221.911 billion. Total estimated expenditure amounts to R1 246.930 billion, after accounting for the Eskom Special Appropriation Act, 2015 and the estimated contribution to the New Development Bank.

# Information contained in each chapter

The Adjusted Estimates of National Expenditure provides detailed information for each vote in the Adjustments Appropriation Bill, following the layout shown below.

## Adjusted budget summary

	2015/16				
R thousand	Main appropriation	Special appropriation	Adjusted appropriation	Decrease	Increase
<b>Amount to be appropriated of which:</b>					
Current payments					
Transfers and subsidies					
Payments for capital assets					
Payments for financial assets					
<b>Direct charge against the National Revenue Fund</b>					
Executive authority					
Accounting officer					
Website address					

This table summarises the adjustments to the main Budget by main economic classification.

**Main appropriation** shows the total amount voted for the current financial year in the Appropriation Act (2015), in terms of the main Budget.

**Special appropriation** shows the total amount for the current financial year which is voted in a Special Appropriation Act. The Minister of Finance may table a Special Appropriation Bill in the National Assembly.

**Adjusted appropriation** shows the adjusted total amount to be voted for the current financial year, which is the sum of the main appropriation, any special appropriation, and all the adjustments.

**Decrease** and **Increase** show the amounts of the adjustments per classification category.

**Current payments** are payments made by a department for its operational requirements.

**Transfers and subsidies** are payments made by a department for which the department does not directly receive anything in return.

**Payments for capital assets** are payments made by a department for an asset that can be used for more than one year and from which future economic benefits or service potential are expected to flow.

**Payments for financial assets** are mainly payments made by departments as loans to public corporations or as equity investments in public corporations. The reason for expensing the payments, rather than treating them as financing, is that the purpose of the transaction is not profit oriented. This column is only shown in votes where such payments have been budgeted for. While payments for theft and losses are included in this category, these payments are not budgeted for and will thus only appear in the historical information.

**Direct charge against the National Revenue Fund** is an amount spent in terms of a statute and therefore does not require parliamentary approval. An example is debt service costs. Such amounts are therefore not contained in the Adjustments Appropriation Bill, nor are they budgeted for under any programme on a particular vote.

The last three rows of the table provide accountability information: the vote's executive authority, accounting officer and website address.

## Vote purpose

*The purpose of the vote captures a department's mandate, objectives or administrative functions, as stated in the Adjustments Appropriation Bill.*

## Changes to programme names, purposes and objectives

To maintain the link between a department's strategic plan, annual performance plan, main appropriation, any special appropriation and the adjusted budget - any changes to programme names, purposes and objectives are noted.

## Mid-year performance status

Indicator	Programme	Outcome	Annual performance		
			Projected for 2015/16 as published in the 2015 ENE	Achieved in the first six months of 2015/16 (April to September)	Changed target for 2015/16

Managing, monitoring and measuring performance are integral to improving service delivery. The table shows what a department has achieved in the first six months of the current financial year, compared to what it projected for the year<sup>11</sup>.

An **indicator** is a measure that tracks a department's progress towards its goal. An indicator may measure inputs, activities, outputs and outcomes, or in certain instances, explanatory information relating to the internal or external environment.

The **programme** column links the indicator to the vote programme associated with it.

The **outcome** column links the indicator to one or more of the 14 government outcomes to which it contributes.

**Projected for 2015/16 as published in the 2015 ENE** shows what the department projected it would achieve for the current financial year.

**Achieved in the first six months of 2015/16** shows what the department has actually achieved in the first half of the current financial year.

**Changed target for 2015/16** shows any change to the target originally published in the ENE. Estimates will change only in some cases where the funding provided for a particular programme has been amended in the Adjustments Appropriation Bill.

### Changes to indicators and targets published in the 2015 ENE

Any specified deviations from stated performance targets for the current financial year are briefly explained, as well as any changes to the indicators themselves. Changes to indicators and/or targets are the result only of significant policy or mandate changes, budget programme structure changes, or the effects of the adjustments to a vote's estimates of expenditure.

### Mid-year progress

A brief discussion is provided on the department's mid-year progress towards achieving the targets that were set. The focus of the discussion is on indicators for which mid-year performance figures suggest that either an annual target may not be met, or that it may be exceeded.

<sup>11</sup> This table is not intended to provide a comprehensive view of a department's performance, because it shows a selected subset of a department's indicators, as published in the ENE. It should, however, contain the key performance indicators that form part of departmental performance plans.

## Adjusted Estimates of National Expenditure 2015

Programme	2015/16								Adjusted appropriation

<b>Economic classification</b>									
<b>Current payments</b>									
Economic classification item									
<b>Transfers and subsidies</b>									
Economic classification item									
<b>Payments for capital assets</b>									
Economic classification item									
<b>Payments for financial assets</b>									
<b>Total</b>									

In this table, a vote's adjusted estimates of expenditure are set out by the type of expenditure adjustment, and by vote programme as well as by economic classification (current payments, transfers and subsidies, payments for capital assets, and payments for financial assets).

**Main appropriation** shows the total amount voted for the current financial year in the Appropriation Act (2015), in terms of the main Budget process.

**Special appropriation** shows the total amount for the current financial year which is voted in a Special Appropriation Act. The Minister of Finance may table a Special Appropriation Bill in the National Assembly.

**Adjustments appropriation** shows the amounts of the adjustment for each of the types of expenditure adjustment by programme and by economic classification.

**Roll-overs** show unspent funds from the preceding financial year reallocated to the current financial year to finalise activities close to completion.

**Unforeseeable/unavoidable** shows spending that could not be anticipated at the time of finalising the main Budget.

### Virements and shifts:

- **Virements** are the utilisation of unspent funds from amounts appropriated under one programme towards the defrayment of excess expenditure under another programme, within the same vote.
- **Shifts** are the utilisation of unspent funds towards the defrayment of increased expenditure within a programme of a vote, through the shifting of funds between the different segments (subprogramme and economic classification) of the programme. Shifts may include the reallocation of funds incorrectly allocated in the 2015 ENE.

**Declared unspent funds** are amounts that departments explicitly indicate that they will no longer require in the current financial year. The main appropriation of the vote is accordingly reduced by such amounts.

**Other adjustments** include function shifts, the appropriation of expenditure earmarked in the 2015 Budget speech for future allocation, adjustments due to significant and unforeseeable economic and financial events and self-financing expenditure.

**Total adjustments appropriation** shows the sum of all the expenditure adjustments by programme and by economic classification. This number may be negative. In most instances this would be because of a virement of funds out of the programme or economic classification, or due to function shifts.

**Adjusted appropriation** shows the adjusted total amount to be voted for the current financial year, which is the sum of the main appropriation, any special appropriation and the total adjustments appropriation.

Similar tables are then shown for each programme and for direct charges against the National Revenue Fund for which adjustments have been made.

## Special appropriation

This section gives an explanation of the funding proposed in a special appropriation.

## Details of adjustments to the Estimates of National Expenditure 2015

This section gives explanations by programme for:

- Roll-overs
- Unforeseeable and unavoidable expenditure
- Virements and shifts

Shifts within the programme as a percentage of the programme budget		per cent			
Virements to other programmes as a percentage of the programme budget		per cent			
Total			Total		

1. National Treasury approval has been obtained.

2. Only the legislature may approve this virement in terms of the Public Finance Management Act (1999).

**FROM:** specifies where funds have been reduced, by programme and by economic classification item. Virements to other programmes, as well as shifts within the same programme, are shown as a percentage of the programme budget.

**Motivation** states the reasons for funding reductions or, conversely the reasons for funds being made available.

**TO:** specifies what funds will be used for, by programme and by economic classification item. These funds which increase expenditure offset the funding reductions.

**R thousands** shows the monetary amounts.

Certain types of virements and shifts require either legislative approval or approval from National Treasury before they can be effected. All virements and shifts which have National Treasury's approval or which can only be approved by the legislature are footnoted in this table.

In terms of the PFMA<sup>12</sup>, the Treasury Regulations<sup>12</sup>, and the Appropriation Act (2015)<sup>12</sup>, the following require approval from National Treasury:

- Virements and shifts which will increase the funds appropriated for compensation of employees
- Virements and shifts which will increase the funds appropriated for transfers and subsidies to other institutions
- Virements and shifts which introduce a new transfer to other institutions
- Virements and shifts which utilise funds that were earmarked for a specific purpose by the National Treasury in the allocation letter
- Virements and shifts which utilise funds appropriated for payments for capital assets for the payment of current assets, other than for payment of compensation of employees
- Virements and shifts which utilise unspent funds appropriated as transfers and subsidies to specific institutions for payment to other institutions, provided that the purpose for which the funds are to be used remains consistent with the programme purpose of the vote programme within which it was originally appropriated

The following can only be approved by the legislature:<sup>12</sup>

- Virements and shifts which utilise unspent funds appropriated for items specifically and exclusively earmarked in an Appropriation Act
- Virements which utilise unspent funds of more than 8 per cent of the amount appropriated for that programme. (Shifts between different segments within a programme do not affect the overall amount appropriated for a programme; only virements away from a programme effectively reduce a programme budget.)
- Virements and shifts which utilise funds appropriated as transfers and subsidies that cannot be approved by the National Treasury
- Virements and shifts which utilise funds appropriated for payments for capital assets, that cannot be approved by the National Treasury.

After the virements and shifts table, the remaining explanations are given for:

- Declared unspent funds
- Other adjustments, including function shifts, the appropriation of expenditure earmarked in the 2015 Budget speech for future allocation, adjustments due to significant and unforeseeable economic and financial events, and self-financing expenditure
- Gifts, donations and sponsorships that are valued at more than R100 000 per transaction
- Direct charges against the National Revenue Fund (these are not linked to a programme within a vote).

## Expenditure outcome for 2014/15 and actual expenditure for 2015/16

Programme	2014/15 Audited outcome					2015/16 Actual expenditure			
	Adjusted appropriation	Apr 14 - Sep 14	Apr 14 - Sep 14 % of adjusted appropriation	Apr 14 - Mar 15	Apr 14 - Mar 15 % of adjusted appropriation	Adjusted appropriation	Adjusted appropriation/ Total (%)	Apr 15 - Sep 15	Apr 15 - Sep 15 % of adjusted appropriation

<b>Payments for financial assets</b>									
<b>Total</b>									

<sup>12</sup> Section 43 of the PFMA read in conjunction with Treasury Regulations 6.3 and Section 5 of the Appropriation Act (2015).

This table shows the expenditure outcome for the previous financial year and actual expenditure for the first six months of the current financial year, by programme and by economic classification.

**2014/15 Audited outcome** shows the outcome for the previous financial year.

**Adjusted appropriation** shows the adjusted total amount voted for the previous financial year.

**Apr 14 to Sep 14** shows the expenditure outcome for the first six months of the previous financial year.

**Apr 14 to Sep 14 % of adjusted appropriation** shows the expenditure outcome for the first six months of the previous financial year as a percentage of the adjusted appropriation for that year.

**Apr 14 to Mar 15** shows the expenditure outcome for the whole of the previous financial year.

**Apr 14 to Mar 15 % of adjusted appropriation** shows the expenditure outcome for the whole of the previous financial year as a percentage of the adjusted appropriation for that year.

**2015/16 Actual expenditure** shows the preliminary actual expenditure in respect of the current financial year.

**Adjusted appropriation** shows the adjusted total amount to be voted for the current financial year.

**Adjusted appropriation / Total (%)** shows for the adjustments budget to be voted for the current financial year; what proportion the adjusted budget for that programme comprises of the total vote's adjusted budget, as a percentage. The proportion that each economic classification forms of the total vote's adjusted budget is also shown.

**Apr 15 to Sep 15** shows the actual expenditure for the first six months of the current financial year.

**Apr 15 to Sep 15 % of adjusted appropriation** shows the actual expenditure for the first six months of the current financial year as a percentage of the adjusted appropriation for the year.

### Expenditure trends for the first half of 2015/16

Expenditure trends consider whether actual expenditure is in line with the budget. Mid-year actual expenditure for the current financial year is compared to mid-year expenditure for the previous year. Explanations are given for significant changes in expenditure compared to the previous financial year.

Where functions have shifted between votes or new votes have been created subsequent to the publication of the 2014 Adjusted Estimates of National Expenditure, the information in this publication may not be strictly comparable with that published last year.

### Departmental receipts

	2014/15					2015/16				
	Adjusted estimate	Audited outcome		Apr 14 - Mar 15 % of adjusted estimate	Budget estimate	Actual receipts			Apr 15 - Sep 15 % of adjusted estimate	
		Apr 14 - Sep 14	Apr 14 - Mar 15			Adjusted receipts estimate/ Total (%)	Apr 15 - Sep 15			
R thousand										
<b>Departmental receipts</b>										
Economic classification item										
Economic classification item										
<b>Total</b>										

This table shows the departmental receipts outcome for the last financial year, and the actual departmental receipts for the first six months of the current financial year.

**2014/15 Audited outcome** shows the departmental receipts outcome for the previous financial year.

**Adjusted estimate** shows the adjusted total amount of receipts in the previous year's adjustments budget.

**Apr 14 to Sep 14** shows the receipts outcome for the first six months of the previous financial year.

**Apr 14 to Sep 14 % of adjusted estimate** shows the receipts outcome for the first six months of the previous financial year as a percentage of the adjusted estimate for that year.

**Apr 14 to Mar 15** shows the receipts outcome for the whole of the previous financial year.

**Apr 14 to Mar 15 % of adjusted estimate** shows the receipts outcome for the whole of the previous financial year as a percentage of the adjusted estimate for that year.

**2015/16 Actual receipts** shows the preliminary receipts outcome for the current financial year.

**Budget estimate** shows the total amount of receipts anticipated for the current financial year in the main Budget.

**Adjusted estimate** shows the adjusted total amount of receipts anticipated in the adjustments budget for the current financial year.

**Adjusted receipts estimate / Total (%)** shows what proportion the adjusted receipt item comprises of the total adjusted estimate of vote receipts for the current financial year, as a percentage.

**Apr 15 to Sep 15** shows the preliminary receipts outcome for the first six months of the current financial year.

**Apr 15 to Sep 15 % of adjusted estimate** shows the preliminary receipts outcome for the first six months of the current financial year as a percentage of the adjusted estimate for the year.

## Revenue trends for the first half of 2015/16

Any differences from the information published in the ENE for the current financial year are explained in the text that follows the table.

Where functions have shifted between votes or new votes have been created subsequent to the publication of the 2014 Adjusted Estimates of National Expenditure, the information in this publication may not be strictly comparable with that published last year.

## Changes to transfers and subsidies, including conditional grants

### Summary of changes to transfers and subsidies per programme

R thousand	2015/16								Adjusted appropriation
	Main appropriation	Special appropriation	Adjustments appropriation					Total adjustments appropriation	
			Roll-overs	Unforeseeable/unavoidable	Virements and shifts	Declared unspent funds	Other adjustments		
<b>Programme name</b>

**Summary of changes to conditional grants: Provinces**

R thousand	2015/16								Adjusted appropriation
	Main appropriation	Special appropriation	Adjustments appropriation					Total adjustments appropriation	
			Roll-overs	Unforeseeable/unavoidable	Virements and shifts	Declared unspent funds	Other adjustments		
Programme name									
Conditional grant name									

**Summary of changes to conditional grants: Local government**

R thousand	2015/16								Adjusted appropriation
	Main appropriation	Special appropriation	Adjustments appropriation					Total adjustments appropriation	
			Roll-overs	Unforeseeable/unavoidable	Virements and shifts	Declared unspent funds	Other adjustments		
Programme name									
Conditional grant name									

These tables show changes to transfers and subsidies and to conditional grants (provinces and local government), by programme.

**Main appropriation** shows the total amount voted for the current financial year in the Appropriation Act (2015), in terms of the main Budget process.

**Special appropriation** shows the total amount for the current financial year which is voted in a Special Appropriation Act. The Minister of Finance may table a Special Appropriation Bill in the National Assembly.

**Adjustments appropriation** shows the amounts of the adjustment for each of the types of expenditure adjustment, by programme and by economic classification.

**Roll-overs** show unspent funds from the preceding financial year reallocated to the current financial year to finalise activities close to completion.

**Unforeseeable/unavoidable** shows spending that could not be anticipated at the time of finalising the main Budget.

**Virements and shifts:**

- **Virements** are the utilisation of unspent funds from amounts appropriated under one programme towards the defrayment of increased expenditure under another programme within the same vote.
- **Shifts** are the utilisation of unspent funds towards the defrayment of increased expenditure within a programme of a vote by shifting funds between the between different segments (subprogramme and economic classification) of the programme. Shifts may include the reallocation of funds incorrectly allocated in the 2015 ENE.

**Declared unspent funds** are amounts that departments explicitly indicate that they will no longer require in the current financial year. The main appropriation of the vote is accordingly reduced by such amounts.

**Other adjustments** include function shifts, the appropriation of expenditure earmarked in the 2015 Budget speech for future allocation, adjustments due to significant and unforeseeable economic and financial events and self-financing expenditure.

**Total adjustments appropriation** shows the sum of all the expenditure adjustments by programme and by economic classification. This number may be negative. In most instances this would be because of a virement of funds out of the programme or economic classification, or due to function shifts.

**Adjusted appropriation** shows the adjusted total amount to be voted for the current financial year, which is the sum of the main appropriation, any special appropriation and the total adjustments appropriation.
