### Mid-year progress

In the first half of 2018/19, the department leveraged R13 billion from private sector investment, exceeding the mid-year target of R7.5 billion. This is due to more investment approvals than expected being granted for the projects supported by manufacturing incentive programmes such as the automotive incentive scheme, the black industrialists programme, the critical infrastructure programme and the business processing incentive.

The department has exceeded the mid-year target for new jobs supported from approved enterprises by 1 123. This is mainly due to the automotive incentive scheme, the business processing incentive and the

critical infrastructure programme attracting more investments than expected, and those investments being finalised sooner than anticipated.

In the first half of 2018/19, the department supported the retention of 15 926 jobs from approved enterprises. This is mainly due to investments attracted through the automotive incentive scheme, the business processing incentive and the critical infrastructure programme, and finalised sooner than anticipated.
