| Administering Department | Public Service Commission <br> Accounting Officer | Director-General of the Office of the Public Service Commission |  |

## Aim

The aim of the Public Service Commission is to promote the constitutional values and principles of public administration in the public service.

## Programme purpose and measurable objectives

## Programme 1: Administration

Purpose: Manage and organise the Office of the Public Service Commission.

## Programme 2: Human Resource Management and Labour Relations

Purpose: Enable the Commission to perform its human resource management and labour relations functions effectively by investigating, monitoring and evaluating human resource policies and practices, and by the application of merit and equity principles in this regard.

Measurable objective: To improve fair labour practices and promote a high standard of professionalism in the public service.

## Programme 3: Good Governance and Service Delivery

Purpose: Establish a culture of professional ethics in the public service and assess the implementation of risk management strategies.

Measurable objective: To investigate and evaluate management practices and service delivery to promote good governance in the public service.

## Strategic overview and key policy developments: 1999/00-2005/06

During 2002/03 a number of strategic priorities emerged for the Public Service Commission, including three not initially covered by its work plan: developing an integrated and transversal monitoring and evaluation system; doing anti-corruption investigations; and assisting with performance management in the public service, in particular in the evaluation of heads of departments.

The Commission is in the process of implementing the transversal monitoring and evaluation system, which will equip it with the tools to investigate, monitor, and evaluate the public service and its administration, and the personnel practices of the public service. The system is based on
assessing the performance of public service entities according to a limited number of strategic performance indicators, based on the constitutional principles governing the public service and administration. The system will make use of participatory and self-evaluation techniques, and rely on existing data wherever possible. The intention is for the system to indicate clearly to departments where they need to concentrate their efforts to improve.

Cabinet requested the Public Service Commission to develop an appropriate framework for evaluating heads of department. This has been approved, and has been regulated by the Minister for the Public Service and Administration. The first evaluation period to be covered by the framework was the 2000/01 financial year. Although the implementation of the framework was, in its first phase, only obligatory for heads of national departments, premiers were advised to consider implementing it in the provinces as well. All provinces with the exception of the Western Cape have decided to do so.

Individual cases of corruption and other related matters are reported to the Public Service Commission and require investigation. The Commission has established a dedicated anticorruption unit, which deals with the alleged corruption matters referred to it by all public sector institutions. It investigates these and compiles reports for the Portfolio Committee on Public Service Administration or the responsible executive authority.

The Public Service Commission has adopted additional mandates to those discussed above. These include: establishing and managing an anti-corruption, whistle-blowing hotline; updating and managing a register of the financial interests of public servants; managing a register of cases of financial misconduct by public servants and the outcomes of these cases, according to the Public Finance Management Act (1 of 1999) (PFMA).

## Expenditure trends

The Public Service Commission's budget grew by an annual average rate of 19 per cent between 1999/00 and 2002/03 due to the establishment of regional offices in all nine provinces. This rate of growth will decline to an annual average of 8,6 per cent over the medium term as departmental structures consolidate.

A large percentage of the Commission's budget is consumed by personnel expenditure, given the relatively large proportion of staff at the senior management level.

## Departmental receipts

Property income included interest received on loans for the Subsidised Motor Vehicle Scheme and bursaries. Miscellaneous income derived from recoveries from parking facilities, telephone calls, and stale cheques. Financial transactions included capital repayment of loans associated with subsidised motor finance and bursaries. The decrease in revenue after 2002/03 is the result of interest on bursaries coming to an end.

## Programme 1: Administration

Administration manages the Office of the Public Service Commission. It provides for policy formulation by the Minister, the Commission itself, the Director-General and members of the Office's management. Other functions include organising the Office, providing centralised administrative and legal support services, managing departmental personnel and financial administration, determining working methods and procedures, and exercising internal control of the Department.

## Expenditure trends

Administration grew by an annual average rate of 9,0 per cent between 1999/00 and 2002/03 as a result of capacity building. However, the annual average growth rate will fall to 5,9 per cent over the medium term as more financial resources are allocated to line functions.

## Programme 2: Human Resource Management and Labour Relations

Human Resource Management and Labour Relations aims to enable the Public Service Commission to perform its human resource management and labour relations functions effectively. The programme is organised into three subprogrammes:

- Labour Relations investigates, monitors and evaluates the application of merit and equity principles and sound human resource practices and policies.
- Human Resource Management and Development investigates, monitors and evaluates human resource policies and practices themselves.
- Senior Management and Conditions of Service manages the performance of heads of department and the development of the conditions of service of the Senior Management Service.

| Total | 7521 | 9676 | 12180 | 13828 | 15235 | 16080 | 17008 |

## Expenditure trends

The programme's average annual growth rate was 22,5 per cent between 1999/00 and 2002/03. This is mainly attributable to the Senior Management and Conditions of Service subprogramme,
which has as one of its functions the evaluation of heads of department. As this subprogramme stabilises, the annual growth will fall to 7,1 per cent over the medium term.

## Service delivery objectives and indicators

## Recent outputs

Most of the outputs for 2002/03 have been achieved. A few planned projects were replaced by more relevant ones. Many of the projects have changed from producing quantitative overviews to doing more qualitative and analytical work. It is now possible for the Commission to provide more critical and sensitive comments to the Department of Public Service and Administration on human resource management and labour relations in the public service.

One of the highlights of the Human Resource Management and Labour Relations programme has been managing the evaluation of heads of department, in line with Government's emphasis on improving managerial efficiency and performance management in the public service.

Focused analysis of elements of labour relations, conditions of service, human resource practices, affirmative action, and the profile of officials in terms of their qualifications, has contributed to a thorough understanding of the challenges to be met in the public service.

## Medium-term output targets

## Programme 3: Good Governance and Service Delivery

Good Governance and Service Delivery aims to enable the Public Service Commission to perform its management and service delivery improvement functions, develop professional ethics, and improve risk management in the public service. The programme is organised into three subprogrammes:

- Management and Service Delivery Improvement investigates, monitors and evaluates management practices and service delivery in the public service.
- Professional Ethics and Risk Management seeks to establish a culture of professional and ethical behaviour, and to monitor and assess the implementation of risk management strategies.
- Special Investigations manages the execution of special investigations.

| Total | 5957 | 10852 | 14180 | 17067 | 20008 | 22773 | 25187 |

## Expenditure trends

The programme's annual average growth rate was 42 per cent between 1999/00 to 2002/03, mainly due to the establishment of the Special Investigations subprogramme. Good Governance and Service Delivery is also responsible for rolling out and implementing the monitoring and evaluation system in government departments. Additional funds have thus been allocated over the medium term, and this programme's annual growth rate is higher than that of the other programmes. Additional funds have also been earmarked for anti-corruption investigations, under professional and special services.

## Service delivery objectives and indicators

## Recent outputs

The PSC has completed an impressive number of research projects that have generated very specific as well as sector-wide findings. Through this research the Commission is creating a solid knowledge base that allows it to contribute to improved service delivery and a higher standard of professional ethics.

Creating a culture of whistle blowing forms part of the Commission's efforts to promote accountable and transparent administration. Other activities in this programme have focused on allowing citizens to articulate their views on service delivery so that public service agencies are made aware of their users' concerns and suggestions. Targeted investigations into specific irregularities in government institutions have complemented these efforts. The recommendations that have emerged have highlighted the magnitude of the task of ensuring that public administration is accountable and responsive to the public.

## Medium-term output targets

Good Governance and Service Delivery
Measurable objective: To investigate and evaluate management practices and service delivery to promote good governance in the public service.

| Subprogramme | Output | Measure/lndicator | Target |
| :--- | :--- | :--- | :--- |
| Management and <br> Service Delivery <br> Improvement | Evaluation of service delivery | Number of reports with recommendations <br> produced | 5 reports by March <br> 2004 |
