The Estimates of National Expenditure e-publications for individual votes are available on www.treasury.gov.za. These publications provide more comprehensive coverage of vote specific information, particularly about goods and services, transfers and subsidies, personnel, entities, donor funding, public private partnerships, conditional grants to provinces and municipalities, and expenditure information at the level of site service delivery, where appropriate

Vote purpose

Develop, maintain and support a South African school education system for the 21st century.

Mandate

The Department of Basic Education derives its mandate from the following legislation:

- the National Education Policy Act (1996), which inscribed into law the policies, the legislative and monitoring responsibilities of the Minister of Basic Education, and the formal relations between national and provincial authorities
- the South African Schools Act (1996), which promotes access, quality and democratic governance in the schooling system, and makes schooling compulsory for children aged 7 to 15, to ensure that all learners have right of access to quality education without discrimination
- the Employment of Educators Act (1998), which regulates the professional, moral and ethical responsibilities of educators, as well as the competency requirements for teachers.

Selected performance indicators

Table 14.1 Performance indicators by programme and related outcome

| Indicator | Programme | Outcome | | Past | | Current | | Projections | - |

^{1.} No historical data available

Expenditure analysis

The Department of Basic Education is responsible for outcome 1 (quality basic education) of government's 2014-2019 medium-term strategic framework. Over the MTEF period, the department will focus on: improving school infrastructure; improving curriculum delivery; increasing the number of learners completing grade 12; providing educational opportunities to learners with severe to profound intellectual disabilities; ensuring the adequate supply of quality teachers; assessing the quality of teaching and learning; and continuing the national school nutrition programme.

Improving school infrastructure

Ensuring that all schools have access to water, sanitation, electricity and a safe structure, as per the minimum norms and standards for public school infrastructure, is a priority over the medium term. The department is revising the target date for this objective as the previous date, November 2016, was not met. Spending on infrastructure takes up most of the department's budget over the medium term. Most of the funds for infrastructure are provided through grants to provincial departments of education, which are responsible for the delivery of infrastructure.

The *education infrastructure grant* is allocated R37.6 billion over the MTEF period, or 51 per cent of the department's budget. The funds are to be used to build new schools, upgrade and maintain existing infrastructure, and provide school furniture. Allocations to the grant over the medium term have been reduced by R364 million, which provincial departments will absorb by ensuring that all infrastructure projects are planned and funded in line with cost-control measures introduced over the construction of new schools and additional buildings at existing schools. The *school infrastructure backlogs grant* will be shifted to the *education infrastructure grant* from 2018/19, accounting for the 80.9 per cent decrease in the department's budget for buildings and other fixed structures, as well as the 12.5 per cent growth in the *education infrastructure grant* over the medium term. By the time the *school infrastructure backlogs grant* is shifted, the department expects to have replaced 510 inappropriate and unsafe schools with newly built schools; and provided water to 1 120 schools, sanitation to 741 schools and electricity to 916 schools. A total of R2.6 billion is allocated to the *school infrastructure backlogs grant* in 2017/18 to complete the remaining projects.

Improving curriculum delivery

High-quality learning and teaching support materials, and their effective use, are crucial to improving curriculum delivery. The department's efforts to improve curriculum delivery over the medium term will therefore focus on providing well-designed printed and digital content to teachers and learners, expanding access to and improving the use of ICT at schools, and providing teachers the support and tools they need to be effective.

^{2.} Initiatives shifted to provinces from 2018/19.

The department plans to print and distribute about 174 million workbooks to schools, at a projected cost of R3.3 billion over the MTEF period, through the *Curriculum and Quality Enhancement Programmes* subprogramme. Cabinet-approved reductions of R51.5 million have been effected on expenditure on workbooks over the medium term; nonetheless, the department expects to provide about 58 million workbooks focusing on languages and mathematics each year over the period to learners in grades R to 9. The workbooks contain activities that ensure learners work to the required standard, and assist teachers in planning their work so the curriculum can be completed on time.

To improve access to and the use of ICT in basic education, R42 million has been allocated in the *Curriculum and Quality Enhancement Programmes* subprogramme over the MTEF period. Incorporating ICT in the delivery of basic education can provide learners access to resources that will allow them to meet curriculum requirements successfully and acquire adequate skills for the 21st century. These technologies also promote inclusivity for learners with disabilities, and improve teaching through online programmes that enhance the skills and knowledge of teachers. Ensuring the effective use of ICT in education is part of Operation Phakisa, government's programme to accelerate service delivery. The programme will fast-track the development and distribution of education-related digital content, with a specific focus on 15 gateway subjects, including mathematics, science and accounting. The programme will initially focus on 200 under-resourced rural and township schools with strong management. The schools will be provided e-libraries, workshops and support programmes that will be specifically broadcast to them. The department will also train teachers on using ICT, and provide offline and online learner and teacher support material.

The department has developed a national reading diagnostics assessment tool to assist teachers in measuring the reading progress of learners at different intervals in grades 1 to 3. The tool will help track and monitor learners' reading ability, and seeks to improve learners' reading proficiency levels in the foundation phase in underperforming rural and township schools throughout the country. The rollout of the assessment tool is set to begin in 2017 at 1 000 selected primary schools and will benefit an estimated 120 000 learners in grade 1, and R30.1 million has been allocated to the *Curriculum Implementation and Monitoring* subprogramme over the MTEF period for this. The programme will then be introduced as a national programme in grades 1 to 3 at all 18 500 public primary schools over the medium term.

The department will also provide support and resources such as laboratories and workshop equipment, apparatus and consumables, computer hardware, software, and learner and teacher support materials to 200 schools to improve skills in mathematics, science and technology. This is projected to cost R1.2 billion over the medium term, and is funded through the *maths, science and technology grant* in the *Curriculum Implementation and Monitoring* subprogramme. As provinces have in the past experienced difficulties in procurement, resulting in underspending of these funds, Cabinet-approved baseline reductions of R63 million in the period ahead have been effected on the grant to align the allocation with the capacity of the sector to spend these funds.

Growing the number of learners completing matric

The Second Chance matric programme began as a pilot in 2016/17 to provide support to 10 000 registered learners preparing to rewrite the national senior certificate examination. The programme has been allocated R268.8 million over the MTEF period through the *Curriculum Implementation and Monitoring* subprogramme in the *Curriculum Policy, Support and Monitoring* programme. The department plans to use these funds to have the programme enrol, by 2019/20, between 10 000 and 30 000 of the estimated 125 000 learners who qualify each year to write the supplementary examination. The programme provides face-to-face classes at 50 venues throughout the country, focusing on 11 subjects with high failure rates, with two teachers per subject at each venue; as well as online support. Unemployed educators, including Funza Lushaka graduates and retired teachers, will be appointed to provide tuition on a temporary basis.

Supporting learners with intellectual disabilities

A new conditional grant will be introduced in 2017/18 to provide access to quality publicly funded education and support for 8 000 learners with severe to profound intellectual disabilities. The grant will fund training for teachers and officials in 155 identified schools, 31 special schools and 280 special care centres. These learners, their caregivers and teachers will be supported by various specialist educators and therapists to ensure that educationally stimulating programmes are delivered at care centres and schools catering for learners with these

disabilities. The grant is allocated R478.3 million over the medium term in the *Curriculum Policy, Support and Monitoring* programme.

Ensuring the adequate supply of quality teachers

The department aims to improve the supply of newly qualified teachers by providing 40 500 Funza Lushaka bursaries to prospective teachers in priority subject areas such as mathematics, science and technology. A total of R3.5 billion has been allocated over the medium term for this. As university fees for the 2016 academic year did not increase, the Funza Lushaka allocation could support a greater number of students in that year. However, due to the expected increase in university fees over the medium term, the number of students supported is expected to decline from 14 343 in 2016/17 to 13 500 in 2017/18, where it is set to remain over the medium term. These bursaries are provided through the National Student Financial Aid Scheme, funded by transfers from the department in the *Education Human Resources Development* subprogramme in the *Teachers, Education Human Resources and Institutional Development* programme.

Assessing the quality of teaching and learning

The department aims to ensure that the education sector assesses the quality of teaching and learning, and provides remedial action in identified areas to improve learning outcomes in numeracy and literacy. The annual national assessments, the department's diagnostic of teaching and learning in the foundation and intermediate phases of schooling, have been discontinued and will be replaced in 2017/18 by a national integrated assessment framework, which will be made up of three distinct yet complementary assessments. Firstly, diagnostic tests will help teachers identify and fill gaps in the knowledge of learners. A systematic evaluation will also be conducted every three years on a sample of learners in grades 3, 6 and 9 at 2 000 schools to report on learner achievement and link it to system-wide indicators. And, finally, a national summative assessment, which is to form part of the year-end examinations, will be conducted in all schools for learners in grades 6 and 9 each year. A total of R282 million has been allocated for these assessments over the medium term in the *National Assessments and Public Examinations* subprogramme in the *Planning, Information and Assessment* programme.

Providing meals to learners

The department expects to provide meals at 19 800 schools to feed about 9 million learners each year, in support of the vision of the National Development Plan (NDP) of eliminating poverty and supporting food security. An additional amount of R390 million over the medium term is allocated to the *national school nutrition* programme grant to reach these targets, despite the high rate of inflation for food prices. The total allocation to the grant over the medium term is R20.4 billion, funded through the *Educational Enrichment Services* programme.

^{1.} Estimates of National Expenditure data tables are available and can be downloaded from www.treasury.gov.za. These data tables contain detailed information by goods and services, and transfers and subsidies item by programme.

Programme 2: Curriculum Policy, Support and Monitoring

Programme purpose

Develop curriculum and assessment policies, and monitor and support their implementation.

Objectives

- Increase the number of learners who complete grade 12 by providing the Second Chance matric programme to learners who failed to meet the national senior certificate requirements annually.
- Improve the learning and teaching of critical foundational skills by developing, printing and distributing two volumes of grades 1 to 6 literacy/languages, grades 1 to 9 numeracy/mathematics, grades 1 to 6 English first additional language, and grade R workbooks to all learners in public schools each year.
- Improve learners' reading proficiency levels in the foundation phase in underperforming rural and township schools nationally using the early grade reading assessment tool to assess individual learner's reading levels. This will include learners' phonic knowledge, word recognition, fluency and comprehension skills in the early grades each year.
- Fast-track the rollout and implementation of ICT in schools by providing teacher training, ICT devices, digital content, software, connectivity, IT support to schools, and online learner and teacher support material annually.
- Increase learner participation and success rates in mathematics, science and technology by providing ICT equipment, machinery, subject-specific resources and teacher development to schools each year over the medium term by:
 - supporting 300 teachers in ICT integration training
 - providing 200 schools with funds for the maintenance of equipment and machinery
 - providing 1 000 schools with laboratory equipment, apparatus and consumables, including manipulatives for mathematics
 - supporting 50 000 learners in extracurricular services related to mathematics, science and technology
 - supporting 1 500 teachers and subject advisers in curriculum assessment policy statement training
 - supporting 1 000 teachers in structured teacher development programmes specific to mathematics, science and technology.

Subprogrammes

- Programme Management: Curriculum Policy, Support and Monitoring manages delegated administrative and financial responsibilities, and coordinates all monitoring and evaluation functions in the programme.
- Curriculum Implementation and Monitoring supports and monitors the implementation of the national strategy for learner attainment framework, to monitor the quality of teaching and to improve the quality of mathematics, science, technology and languages in all public schools from grades R to 12. The national curriculum framework for children from birth to the age of four will be implemented in registered early childhood development centres.

- Kha Ri Gude Literacy Project caters for illiterate learners who are 15 years and older in all official languages, in all provinces. The programme also caters for the disabled.
- Curriculum and Quality Enhancement Programmes supports programmes that enhance curriculum outcomes in the basic education system and increase participation and success in mathematics, science and technology through structured programmes.

Programme 3: Teachers, Education Human Resources and Institutional Development

Programme purpose

Promote quality teaching and institutional performance through the effective supply, development and utilisation of human resources.

Objectives

- Ensure the adequate supply of qualified recruits in the system by placing Funza Lushaka bursary holders, by June of the year after qualifying, in each year over the medium term.
- Improve the quality of teaching and learning by ensuring an adequate supply of young and qualified teachers through awarding 13 500 Funza Lushaka bursaries to prospective teachers in 2017/18.
- Improve the quality of teaching and learning by monitoring and supporting the implementation of the educator post provisioning policy in all nine provincial education departments annually.
- Enhance accountability each year by monitoring and supporting the implementation of educator performance management systems and school evaluations.

Subprogrammes

- Programme Management: Teachers, Education Human Resources and Institutional Development manages delegated administrative and financial responsibilities, and coordinates all monitoring and evaluation functions in the programme.
- Education Human Resources Management is responsible for education human resources planning, provisioning and monitoring; the oversight and strengthening of educator performance management systems and school evaluations; and education labour relations and conditions of service.
- Education Human Resources Development oversees and translates the integrated strategic planning framework for teacher education and development into a wide range of teacher training programmes, collaborative professional development activities, and agreements with partners and relevant service providers; and coordinates activities with the national institute for curriculum and professional development to promote best practice in classroom teaching and teacher development.
- Curriculum and Professional Development Unit manages and develops an innovative and effective teacher development and curriculum implementation system. This entails the creation of teacher development platforms; and the evaluation and impact assessment of teacher knowledge testing tools for determining teacher needs in content and pedagogical knowledge.

Programme 4: Planning, Information and Assessment

Programme purpose

Promote quality and effective service delivery in the basic education system through planning, implementation and assessment.

Objectives

- Improve the delivery of school infrastructure over the medium term by providing oversight and support to provinces through quarterly reporting on schools' furniture needs and deliveries, the national education infrastructure management system, and the *education infrastructure grant*.
- Contribute to improved teaching and learning through improving and upgrading infrastructure by 2017/18 by:
 - building 76 schools to replace all unsafe structures
 - providing electricity to 134 schools
 - providing water to 344 schools
 - providing sanitation to 167 schools.
- Track improvements in the quality of teaching and learning by providing standardised national annual assessments for grade 3, 6 and 9 learners, as well as the administration of a credible public examination in grade 12 each year.
- Strengthen the capacity of district offices to support schools through quarterly provincial visits that monitor, evaluate and make recommendations on curriculum oversight and institutional management and governance support provided to human resource management operations.

Subprogrammes

- Programme Management: Planning, Information and Assessment delegates administrative and financial responsibilities, and coordinates all monitoring and evaluation functions in the programme.
- Financial Planning, Information and Management Systems develops systems and procedures to support and maintain the integrated education management systems based on learner unit record information. This is done to monitor and report on the implementation of education information policy in the basic education sector. This subprogramme also focuses on cross-cutting aspects such as resource planning, financial support, and the development and monitoring of national funding norms and standards with the provincial education departments.
- School Infrastructure uses funding from the school infrastructure backlogs grant to eradicate infrastructure backlogs by providing water, sanitation and electricity to schools that do not have these facilities, and replacing school buildings constructed from inappropriate materials, such as mud. The education infrastructure grant provides co-funding for the ongoing infrastructure programme in provinces to allow for the provision of infrastructure requirements, which includes the maintenance of existing stock and new infrastructure where required, and to progressively meet the minimum norms and standards for school infrastructure.
- National Assessments and Public Examinations provides standardised national assessments for grade 3, 6 and 9 learners, and the regulation and standardisation of assessment through the implementation of an integrated assessment framework for grades 4 to 11; and administers credible public examinations in grade 12. This provides reliable data on learner performance to support the improvement of the quality of basic education.
- National Education Evaluation and Development Unit facilitates school improvement through systematic
 evaluation. The unit evaluates how district offices, provincial departments and the national department
 monitor and support schools, school governing bodies and teachers. This entails identifying critical factors
 that inhibit or advance the attainment of sector goals and school improvement, and making focused
 recommendations for addressing problem areas that undermine school improvement and the attainment of
 sector goals.
- Planning and Delivery Oversight Unit assists the department in meeting objectives by monitoring the planning and delivery of selected priorities, and assisting provinces with this. The unit works with provinces to ensure that provincial initiatives are aligned with national priorities and provides institutional support for their effective delivery.

Programme 5: Educational Enrichment Services

Programme purpose

Monitor and support provinces to implement care and support programmes for learning and teaching.

Objectives

- Reduce barriers to learning through the implementation of school sport, safety and social cohesion programmes each year over the medium term to ensure the holistic development of learners, enhance their learning experience and maximise their school performance.
- Improve learner health and wellness through the implementation of school health programmes, including the provision of nutritious meals to all learners in quintiles 1 to 3 primary, secondary and identified special schools on an annual basis.

Subprogrammes

- Programme Management: Educational Enrichment Services manages delegated administrative and financial responsibilities, and coordinates all monitoring and evaluation functions in the programme.
- Partnerships in Education partners with stakeholders in support of education in an attempt to make education a societal issue; and manages policy, programmes and systems aimed at creating a safe and cohesive learning environment. The goal is to promote holistic learner development through facilitating sports and enrichment programmes in schools; and to promote gender equity, non-racism, non-sexism, democratic and constitutional values in education; an understanding of human rights, and social cohesion in public schools and school communities.
- Care and Support in Schools manages policies, the provision of meals, and the promotion of learner access to public services such as health and poverty-alleviation interventions.
