The Estimates of National Expenditure e-publications for individual votes are available on www.treasury.gov.za. These publications provide more comprehensive coverage of vote specific information, particularly about goods and services, transfers and subsidies, personnel, entities, donor funding, public private partnerships, conditional grants to provinces and municipalities, and expenditure information at the level of site service delivery, where appropriate.

Vote purpose

Create and maintain an equitable and sustainable land dispensation, and act as a catalyst in rural development, to ensure sustainable rural livelihoods, decent work and continued social and economic advancement for all South Africans.

Mandate

The Department of Rural Development and Land Reform executes its legislative mandate based on several acts:

- The Restitution of Land Rights Act (1994), which provides for the restitution of rights in land to persons or communities dispossessed of such rights after 19 June 1913. The act established a Commission on Restitution of Land Rights and a Land Claims Court. The minister is authorised to purchase, acquire and expropriate land or rights in land for the purpose of restitution awards.
- The Provision of Land and Assistance Act (1993), which provides for the designation of certain land, the regulation of the subdivision of such land and the settlement of persons on it. It also provides for the acquisition, maintenance, planning, development, improvement and disposal of property and the provision of financial assistance for land reform purposes.
- The Communal Property Associations Act (1996), which enables communities to form juristic persons, to be known as communal property associations, in order to acquire, hold and manage property on a basis agreed to by members of a community in terms of a written constitution.
- The Transformation of Certain Rural Areas Act (1998), which provides for the transfer of certain land to municipalities and certain other legal entities, as well as for the removal of restrictions on the alienation of land.
- The Physical Planning Act (1991), which promotes the orderly physical development of South Africa, with provisions for the division of the country into regions; and for the preparation of national development plans, regional development plans and urban structure plans.
- The Deeds Registries Act (1997), which provides for the administration of the land registration system and the registration of land rights.
- The Land Survey Act (1997), which provides for the regulation of the survey of land in South Africa.

- The Sectional Titles Act (1986), which provides for the division of buildings into sections and common property; the acquisition of separate ownership in sections coupled with joint ownership in common property; the control of certain incidents attached to separate ownership in sections, and joint ownership in common property; the transfer of ownership of sections, and the registration of sectional mortgage bonds and real rights in sections; the conferring and registration of rights in and the disposal of common property; the establishment of bodies corporate to control common property and for that purpose to apply rules; and the establishment of a sectional titles regulation board.
- The Spatial Planning and Land Use Management Act (2013), which provides for national land use management and spatial planning systems; the development of government facilities such as hospitals, clinics and schools; and rural development plans, guidelines, and norms and standards.

In addition to overseeing land restitution, the department is also mandated with initiating, facilitating, coordinating, catalysing and implementing an integrated rural development programme, which is linked to outcome 7 (comprehensive rural development and land reform) of government's 2014-2019 medium-term strategic framework.

Selected performance indicators

Table 39.1 Performance indicators by programme and related outcome

Indicator	Programme	Outcome		Past		Current	I		
			2013/14	2014/15	2015/16	2016/17	2017/18	2018/19	2019/20

Number of farms under recapitalisation	Land Reform		442	217	414	351	369	387	400
and development per year									

1. No historical data available.

2. The decrease in the number of infrastructure projects implemented per year from 2016/17 to 2019/20 was due to cost containment measures implemented on the programme.

3. The decrease in the number of hectares acquired per year from 2013/14 to 2019/20 was due to cost containment measures implemented on the programme.

Expenditure analysis

The Department of Rural Development and Land Reform has an ongoing commitment to build sustainable rural livelihoods. Over the medium term, the department will continue to focus on land distribution and agrarian transformation, and ensure the success of land distribution by supporting rural farmers, enterprises and industries. The department will do this through skills and capacity development, investing in rural social and economic infrastructure, and championing policy interventions that fortify and protect the rights of rural communities. The department's work aligns with outcome 7 (comprehensive rural development and land reform) of government's 2014-2019 medium-term strategic framework.

The department's total allocation over the MTEF period is R32.1 billion, to fund activities related to rolling out agri-parks, accelerating land reform, recapitalising and developing redistributed farms, creating opportunities for rural youths, transforming land tenure, and settling land claims.

Growing rural economies through agri-parks

The agri-parks initiative supports rural enterprises, develops rural industries and facilitates the efficient movement of rural produce to markets. The initiative develops networked systems of agro-production, processing, logistics, marketing, training and extension services in district municipalities and developments on underused land. Each agri-park supports smallholder farmers by providing capacity building, mentorship, farm infrastructure, extension services, and production and mechanisation inputs. Smallholder farmers own 70 per cent of an agri-park, while the remainder is owned by government and commercial farmers.

Agri-parks are expected to contribute to government's targets of creating 1 million new jobs in rural economies by 2030, through the development of 300 000 new small-scale farmers and the creation of 145 000 agro-processing jobs by 2019. Since the inception of the initiative in 2015/16, approximately 10 566 smallholder

farmers have been identified to benefit from agri-parks, and 69 692 hectares of land has already been distributed. A total of R2 billion per year, over a 10-year period beginning in 2015/16, was allocated for the development of agri-parks in 44 districts. Over the medium term, R2.9 billion is allocated for the *Rural Infrastructure Development* subprogramme of the *Rural Development* programme, which constitutes 9.2 per cent of the department's budget.

Accelerating land reform

The *Land Reform* programme has been allocated R8.3 billion over the MTEF period for the acquisition of land and the creation of productive and profitable farms. The One Household, One Hectare initiative is the key mechanism used to provide the landless access to land and promote agrarian transformation. The objective of the initiative is to create smallholder producers for the agri-parks initiative, focusing on 44 of the poorest districts in the country and other sites in densely populated areas. The department projects that 16 500 households will participate in the One Household, One Hectare initiative over the MTEF period, at an estimated cost of R4.3 billion, budgeted for in the *Agricultural Land Holding Account* subprogramme.

Recapitalising and redeveloping redistributed farms

The recapitalisation and development programme ensures that redistributed land becomes productive and profitable by providing mechanised irrigation, farmer mentorship and farm inputs. Since the programme began in 2008/09, 1 496 farms have been created from more than 4.7 million hectares of land acquired. Over the medium term, the department aims to acquire approximately 281 165 hectares of strategically located land. The Office of the Valuer-General, which has been operational since 2015/16, ensures efficient acquisition and equitable valuation of land. The total allocation for this activity over the medium term is R187.7 million, funded through the *Office of the Valuer-General* subprogramme in the *Land Reform* programme.

Creating opportunities for rural youths

The national rural youth services corps is a skills development initiative, which forms part of the comprehensive rural development programme's job-creation model. The initiative recruits unemployed youth from rural areas between the ages of 18 and 25, who have passed grade 12 or have higher qualifications, and equips them with business and entrepreneurial skills. The initiative expects to increase the number of new participants by 2 700 each year over the medium term to reach a total of 8 100 by 2019/20. The *National Rural Youth Services Corps* subprogramme receives an allocation of R1.2 billion over the medium term. However, the allocation is set to decrease from R437.5 million in 2017/18 to R406.6 million in 2019/20 due to cost-containment measures, which will not affect output targets due to increased allocative efficiency.

Transforming land tenure

The Communal Property Associations Amendment Bill was published in the Government Gazette in April 2016. The amendment extends the application of the act to labour tenants who acquire land, provides for general plans for land administered by an association, and repeals the provisions relating to provisional associations. It also provides improved protection of the rights of communities, in respect of movable and immovable property administered by an association, and adds clarity on the content of annual reports expected from associations.

Over the medium term, the department will implement the Extension of Security of Tenure Act (1997) and the complementary Land Rights Management Facility Act (2015). The 2015 Extension of Security Tenure Amendment Bill seeks to clarify the rights of occupiers and provide for obligations regarding alternative accommodation for evicted people. A total of R317 million was reprioritised within the *Land Reform* programme over the MTEF period for these activities.

Settling land claims

In 2016, the Constitutional Court ruled the Restitution of Land Rights Amendment Act (2014) invalid and contrary to the Constitution. The Commission on Restitution of Land Rights was tasked to re-submit the act within two years. In the same period, the commission plans to settle claims lodged before 1998. In terms of the judgment, should all claims emanating from original lodgement be processed before the two-year period lapses, the Commission may approach the Constitutional Court for a review of the judgment.

Consultants are extensively utilised as part of the pre-settlement of claims, and is a major cost driver in the *Restitution* programme. Over the MTEF period, R503.7 million will be spent on consultants conducting research to confirm the validity of claims that have been launched. The total number of claims over the two-year period, from 2017/18 to 2018/19, is expected to be 2 152. A total of R10.3 billion is allocated for settling land restitution claims over the MTEF period, which constitutes 32 per cent of the department's total budget.

Operational capacity

Cabinet has approved reductions on compensation of employees of R78.6 million over the medium term as part of its decision to lower the national aggregate expenditure ceiling. Personnel numbers are expected to decrease from 4 359 in 2017/18, 4 313 in 2018/19 and 4 289 in 2019/20. Over the medium term, the budget for compensation of employees is R2.2 billion in 2017/18, R2.3 billion in 2018/19 and R2.5 billion in 2019/20. Reductions of R1.2 billion over the MTEF period have also been applied, of which, R522.9 million was from the agricultural land holding account. This will not impact negatively on service delivery because the department will prioritise critical service delivery units.

The Department of Rural Development and Land Reform, through the Department of Public Works, secured a site to construct a single campus for the department's national office in Pretoria, Gauteng. Over the MTEF period, R961.1 million has been set aside to finance the project, R478.7 million in 2017/18, R239.4 million in 2018/19 and R243 million in 2019/20.

Programme 2: National Geomatics Management Services

Programme purpose

Provide geospatial information, cadastral surveys, deeds registration, spatial planning and other technical services in support of sustainable land development.

Objectives

- Facilitate an integrated spatial planning and land use management system in all provinces by advising affected stakeholders to adhere to the Spatial Planning and Land Use Management Act (2013) in their development planning by 2020.
- Develop and implement the national spatial development framework through the enactment of the Spatial Planning and Land Use Management Act (2013), to appropriately direct government investment in order to yield results with maximum impact by 2020.
- Support all municipalities with the implementation of the Spatial Planning and Land Use Management Act (2013), thereby stimulating development in poor areas and reducing spatial inequalities, by holding workshops on its implementation by 2020.

- Improve the efficiency of cadastral surveys management by reducing the turnaround time for the approval of cadastral documents from 21 days in 2012/13 to 14 days by 2020.
- Ensure an integrated and comprehensive land administration system by constructing a cadastre modernisation programme that will result in a secure, accessible, integrated, scalable, cost-effective and self-sustainable solution that provides accurate, reliable and secure land administration and information by 2020.

Subprogrammes

- *National Geomatics Management Services* is responsible for: examining and approving all surveys of land and real rights that are intended to be registered in the deeds office; maintaining records; compiling; maintaining and revising maps of property boundaries; providing cadastral advisory services to other government institutions; promoting and controlling all matters related to geodetic and topographical surveying; establishing and maintaining a network of national geo-referencing stations; facilitating state surveys related to land reform; and providing cadastral and geospatial information services, including South African spatial data infrastructure.
- Spatial Planning and Land Use Management provides for national land use management and spatial planning systems; develops the national spatial development framework and rural development plans, guidelines, norms and standards; and ensures compliance with the Spatial Land Use Management Act (2013). This subprogramme also provides support to the South African Council for Planners, provides technical assistance to other spheres of government by providing spatial development frameworks and land use schemes, and establishes functional municipal land use tribunals.
- *Registration of Deeds Trading Account* provides a deeds registration system in which secure titles are registered and accurate information is provided.
- South African Council for Planners transfers funds on an annual basis to the South African Council for Planners, a non-profit organisation dealing with the registration and other activities of the planning profession.
- South African Geomatics Council regulates and promotes the transformation of the geomatics profession.

Table 39.9 National Geomatics Management Services expenditure trends and estimates by subprogramme and economic classification

1. Estimates of National Expenditure data tables are available and can be downloaded from www.treasury.gov.za. These data tables contain detailed information by goods and services, and transfers and subsidies item by programme.

Programme 3: Rural Development

Programme purpose

Catalyse, initiate, facilitate and coordinate the implementation of a comprehensive rural development programme, leading to sustainable and vibrant rural communities.

Objectives

- Facilitate the development of 235 sustainable rural enterprises and industries in areas with economic development potential and opportunities by providing entrepreneurial skills training by 2020.
- Facilitate infrastructure development to support rural economic transformation by building infrastructure in rural areas in collaboration with other parts of government by 2020.
- Increase job opportunities through the comprehensive rural development programme and land reform initiatives by skilling youth through training and equipping them for the job market by 2020.
- Create skills development opportunities through the national rural youth services corps and rural development and land reform initiatives by skilling youth through training and equipping them for the job market by 2020.

Subprogrammes

- *Rural Infrastructure Development* facilitates access to social and economic infrastructure and provides income generating opportunities through improved physical infrastructure in rural areas.
- *Rural Enterprise and Industrial Development* creates an enabling institutional environment for sustainable rural development and provides for social, economic and sustainable livelihoods development in rural communities. Its functions are based on the social mobilisation of communities to ensure that rural communities take ownership of rural development projects and programmes; establish rural development forums and partnerships; increase food security; promote youth development and social organisation; create jobs through cooperatives; and develop rural enterprises and industries.
- National Rural Youth Services Corps trains rural youth in various skills sectors, which include administration, agriculture, construction, education, engineering, health and safety, hospitality, renewable

energy, and transport, to match the economic priorities of the communities and provinces from where the youth were recruited from.

Programme 4: Restitution

Programme purpose

Settle land restitution claims under the Restitution of Land Rights Act (1994) and provide settlement support to beneficiaries.

Objectives

- Facilitate the restoration of land rights and alternative forms of equitable redress by 2020 by finalising 1 269 land claims, settling 2 052 new claims, approving 250 phased projects, and researching 4 500 new claims.
- Reopen the lodgement of restitution land claims for those who did not meet the 1998 deadline by soliciting and receiving new claims by 2019 in order to provide redress to those who were unfairly dispossessed of their land.

Subprogrammes

- *Restitution National Office* provides administrative and professional support to the Commission on the Restitution of Land Rights for processing and investigating restitution claims, develops and coordinates restitution policy, and oversees court cases.
- *Restitution Regional Offices* is responsible for the research, validation, verification and negotiation of settlements, and provides administrative support services for the settlement of claims.
- *Restitution Grants* redresses restitution claims by restoring land or providing alternative land, provides financial compensation and alternative relief, offers settlement planning and facilitation assistance, and contributes funds to the resettlement of communities.

Expenditure trends and estimates

Programme 5: Land Reform

Programme purpose

Provide sustainable land reform programmes in South Africa.

Objectives

- Acquire strategically located land for equitable redistribution and agricultural development in line with national economic job drivers through the purchase of land by 2020.
- Provide comprehensive farm development support to small-scale household producers and land reform beneficiaries for agrarian transformation through the provision of land and farming equipment, such as tractors, and seeds by 2020.
- Enable agrarian reform in all provinces by 2020 through functional systems and institutional arrangements for tenure and land administration by:
 - confirming the vesting of state land parcels in communal areas
 - supporting the transfer of rural areas to communities
 - supporting communal property associations with compliancy to legislation
 - supporting farm dwellers with secure tenure rights and ensuring the completeness of the immovable asset register.

Subprogrammes

- *Land Redistribution and Development* is responsible for: the implementation of the One Household, One Hectare initiative; the recapitalisation and development of existing projects; and the proactive land acquisition strategy of the department.
- *Land Tenure and Administration* provides functional systems and institutional arrangements for tenure and land administration to enable agrarian reform in all provinces.
- *Land Reform Grants* provides funding for project and programme planning, land acquisition and settlement; and allows the department to maintain, plan, develop or improve property.
- *KwaZulu-Natal Ingonyama Trust Board* provides quarterly transfers for administering land owned by the Ingonyama Trust.
- Agricultural Land Holding Account is responsible for buying and holding land until suitable beneficiaries are identified in terms of the Provisions of Land and Assistance Act (1993). This subprogramme's total budget is also used for recapitalisation, development and land acquisition.
- *Office of the Valuer-General* is responsible for providing valuations of land earmarked for land reform and land restitution purposes.

1. Estimates of National Expenditure data tables are available and can be downloaded from www.treasury.gov.za. These data tables contain detailed information by goods and services, and transfers and subsidies item by programme.

Entities

Comprehensive coverage of the following public entities is provided with the more detailed information for the vote at www.treasury.gov.za under the budget information link.

- The **agricultural land holding account** was established in terms of the Provision of Land and Assistance Act (1993). Section 10(1)(a) gives legal effect to the proactive acquisition of land by the minister, from money appropriated by Parliament for this purpose. The state will proactively target land and merge this with the demand or need for land. The account's total budget for 2017/18 is R742 million.
- The KwaZulu-Natal Ingonyama Trust Board is a land management agency that ensures that commercial activity on communal land is developmental and beneficial to local communities. The KwaZulu-Natal Ingonyama Trust Act (1994) makes provision for the 2.8 million hectares of land spread across KwaZulu-Natal to be held in trust and managed on behalf of communities. The affairs of the trust are administered by the Ingonyama Trust Board. The board's total budget for 2017/18 is R130 million.
- The **registration of deeds trading account** makes provision for the administration of the land registration system and the registration of rights in land. It requires that deeds and documents are prepared and lodged in the deeds registry by a conveyancer or public notary, and are scrutinised for accuracy and compliance with common law, case law and statutory law. The main goal of the trading account is to contribute to effective land planning, administration and property registration. The account's total budget for 2017/18 is R749 million.
