Department Of Transport, Roads and Public Works

AMOUNT TO BE APPROPRIATED:	R 365 923 000
STATUTORY AMOUNT:	R 852 000
RESPONSIBLE EXECUTIVE AUTHORITY:	MEC FOR TRANSPORT, ROADS AND PUBLIC WORKS
ADMINISTERING DEPARTMENT:	DEPARTMENT OF TRANSPORT, ROADS AND PUBLIC WORKS
ACCOUNTING OFFICER:	HEAD OF DEPARTMENT

1. OVERVIEW

Vision

The vision of the Department of Transport, Roads and Public Works is:

to be trendsetters through excellence in service delivery.

Mission

The vision will be supported by the mission: Provide in the mobility and accommodation needs of clients.

The Mission will be promoted through a mission statement per programme. The five programme mission statements are as follow:

- Optimise the department's managerial processes;
- Meet the accommodation and other needs of the provincial departments;
- Provide and maintain integrated road infrastructure that is safe and functional to support social and economic development;
- Promote in the mobility of people;
- Alleviate poverty and create job opportunities.

A brief description of the core functions and responsibilities of the department, as well as its vision and mission statements

- *Road Construction, Maintenance and Repairs* The construction of new roads, maintenance of existing roads and the repair of damaged roads;
- *Public Transport* The planning and provision of urban and rural public transport facilities, the conducting of transport studies, the control of road transportation, the provision of transport planning frameworks and the management of public transport services and the public road network;
- *Strategic Planning and Development* The development of integrated provincial transport and development plans, as well as departmental policies and procedures.
- *Public Works:* Provide & maintain functional & accessible buildings, facilities and office accommodation according to the identified needs of provincial departments through planning, design and maintenance of safe and cost effective projects and buildings.

Where relevant, a brief analysis of the demands for and expected changes in the services, and the resources available to match these;

- The low increase in the equitable share resulted that the department had to cut on the tempo of service delivery which effects the following:
- A further deterioration of the road network;
- Possible legal claims, and
- Loss of 200 job opportunities.

The Acts, rules and regulations the department must consider

- The Public Finance Management Act, Act 1 of 1999;
- The Public Service Act, Act 103 of 1994 and regulations require strategic planning;
- The Preferential Procurement Policy Framework Act, Act 5 of 2000, providing specific guidelines in allocating tenders to historically disadvantaged individuals and entities;
- The National Land Transport Transitional Act, Act 22 of 2000, ensuring the annual updating of the National Land Transport Strategic Framework by the National Department of Transport to form the basis for provincial land transport strategies;
- The Skills Development Act, Act 97 of 1998, providing for training and committing departments to the spending of prescribed amounts on training of personnel;
- Promotion of Access to Information Act, Act 2 of 2000;
- Promotion of Administrative Justice Act, Act 31 of 2000.

Brief information on external activities and events relevant to budget decisions.

- Expanded Public Works Programme Labour intensive projects takes longer and is not the best way to address large backlogs, possible increases in rates per unit.
- Voted funds not sufficient to address running expenses, resulting in ever increasing backlog.
- The increase in voted funds increase by 8,3%, while wages increase by 7% and the escalation in leases are on average 8%.

2. REVIEW OF CURRENT FINANCIAL YEAR 2005/2006

The department has restructured its establishment during the 2004/05 financial year to align departmental activities in line with the departmental strategic plan and to execute the Expanded Public Works Programme.

The Supply Chain Management Policy of the department was approved in March 2005 and has subsequently being implemented by the Supply Chain Management Unit. All vacant financial posts were filled and the department has established a specification committee, evaluation committee and adjudication committee in the execution of the SCM functions. However, the department is still awaiting approval from the Provincial Treasury to fully implement the functions of the Supply Chain Management Unit.

Apart from the function of the SCM, the department has established a Finance Committee as well as a Sub-finance committee as part of a concerted effort in addressing the audit queries and implementing remedial measures with regard to financial related audit queries.

ACTIONS	DESCRIPTION/TARGET	TIME FRAME	PROGRESS
Public Transport	Taxi Council, Operating licenses board	Ongoing	To date, from a total of 1200 active permits, the Board received 1100 applications for conversion to operating licences. The board approved 790 of these applications and are envisaging to complete the process by March 2006
Bridges	Construction of new bridge – Riemvasmaak Bridge	Feb. 2006	80% complete 110 jobs were created
Joint Ventures	Partnerships: Farmers, Mines & Other Depts	Ongoing	A service level agreement signed with stakeholders. Design has been completed The tender has been published (Mamatwan road) Construction phase commenced in November 2005 and by the end of December 2005 the project was 13% completed.
Single Lane bridges	Various bridges in Prov Construction of single lane bridges	2005	Consultant was appointed in October 2005 for the design and supervision of the project Construction to commence in March 2006.
Slope stabilisation	Prevent rock falls – Teekloof pass	2005/06	Consultant was appointed in August 2005. The contractor was appointed at the beginning of February 2006. Construction to commence during February 2006. Due to the technical nature of the project we can only create few jobs.
Douglas and Belmont Rail lines	Rail infrastructure – 2,000 jobs	2005/06	National launch in October 2005

Platfontein Access Road	Access Road 80 trainees	2005-2006	Design - 100% Theoretical training commenced in March 2005 The construction phase is not progressing as planned due to the problem regarding the stipends and related matters.			
Roads	Strydenburg Access Road	2005-2006	The project commence in August 2005 with layerworks. One learnership is accommodated. Project is 60% completed and 45 jobs created.			
	Upington-Grobbelaarshoop – widening of the shoulder of the road	2005/06	The project commenced in April 2005. 74 jobs created. Progress to date 37%			
ACTIONS	DESCRIPTION/TARGET	TIME FRAME	PROGRESS			
	Niekershoop Road- Upgrading of gravel road to surfaced road	2005/06	The project commenced May 2004 and was completed August 2005. Farmers contributed R 500 000,00. The project is 93% completed. 25 job created.			
Transfrontier Park	Upgrading of the gravel road to a surfaced road : EPWP 300 jobs created	01 Nov 2004- 30 Nov 2007	The construction using labour based methods of construction commenced in November 2004. The progress to date is 17% It is envisaged that the project will be completed in 2007 8 learnerships are accommodated.			
	Kommaggas – Upgrade to surfaced road	2005/06	Construction commenced during the last week of September 2005. 43km was completed during the previous financial year Progress to date 25%.			
EPWP: Infrastructure	R30 Million: Paving of Streets	2005-2006	Access Roads and Streets Construction started in February 2005 Budget R30 million. 2800 jobs were created. Completed December 2005.			
		2005-2006 December 2005 – 31 March 2006	Access Roads and Streets. Construction started December 2005 and will end 31 March 2006. Budget R14 Million 2240 jobs were created			
EPWP job creation – Maintenance programme	R5 Million: Painting of schools, clinics and hospitals	2005-2006	Started October 2005 and will end February 2006. Budget R5 Million and 1092 jobs were created.			

3. OUTLOOK FOR THE COMING FINANCIAL YEAR 2006/07

Good governance will be promoted by excellent in-service delivery. To put this into practice a new structure was agreed upon where the chief financial officer reports directly to the head of department.

To ensure the ongoing alleviation of poverty, the department provided members of the community with the opportunity for ongoing employment opportunities after the creation of initial assets by way of the community based road maintenance programme. These projects presented the opportunity to develop the capacity of communities through their direct participation in the development of the projects. Through these projects it was possible to provide opportunities for "emerging" engineering consultants to become involved in the planning, design and administration of projects within the department. Empowerment of staff through developmental initiatives will be taken a step further with the implementation of a full-time bursary scheme for scarce occupations and/or skills.

3.1 Expected outputs

• Routine Maintenance

The province is divided into two maintenance regions and regional engineers are responsible for the budget. The budget is split between the regions according to their expenditure in the previous years.

The total length of paved roads in the province that the Department maintains is 5 633 km of surfaced roads. Of the 5633km, 1905km was taken over by South African National Road Agency Limited (SANRAL) as from July 2005 and a further 697km is in the process of being handed over. The Departmental teams concentrate on the maintenance of the paved road surface e.g. pothole repairs, crack sealing and edge breaks, road signs etc. This means that more maintenance activities by the departmental teams will be done as compared to the other years due to budget constraints.

The total length of unpaved roads in the province that the Department maintains through district municipalities, as agents, is 21 838km.

The Department is in a process of developing a Service Level Agreement with the district municipalities. The purpose of this agreement is to:

- optimize the use of funds by the district municipalities;
- strengthen control measure;
- formalize reporting by district municipalities.

• Reseal and Regravel

Resealing and regravelling are preventative action for routine maintenance of paved and unpaved roads respectively. However, these activities are behind schedule thus causing backlogs on road maintenance. Management agreed to regravel and reseal by hand. This is intended to create more job opportunities and the development of SMME's. Various roads will be regravelled and resealed.

• Alexander Bay - Khubus

The road is between Alexander Bay and Khubus in the Namakwa District Municipality. The project was raised as a priority due to the several mines that are located next to the road including Alexcor and Transhex mines. Surrounding communities e.g. Reunion, lack access to basic services and also in a very bad condition. This road also leads to the Richtersveld nature reserve which is a tourism attraction. It will attract more tourists to the area. The two road sections identified for the upgrading are:

- Divisional Road 3246: (42.12 km) Alexander Bay to turn-off to Reunion
- Divisional Road 3247: (11.78 km) Turn-off from DR3246 to the community of Reunion. This section will be constructed using EPWP principles

The total length is 53.9km.

An amount of R25m and R12m for reseal and regravel respectively are needed for these projects.

• Grootmier – Rietfontein

This road is the continuation of the Upington – Andriesvale road. The road construction was stopped before the end of (Rietfontein) meaning that, from the tarred road, the Rietfontein and neighbouring communities will have to travel on a very bad gravel road for the remaining 30 to 35 km. Thus it was decided to tar this last portion to complete the road to Rietfontein. This will reduce the vehicle operating costs and will increase business.

• Vosburg to Carnavon: Britstown to Vosburg

This road connects Britstown, Vosburg and Carnavon. This is the shortest route from Britstown to Calvinia. Currently motorists use the alternate route which is 100km longer via Victoria West to Calvinia. The proposed road will enhance accessibility to basic services by the community of Britstown, Carnarvon and Vosburg and will also increase movement of agricultural products offered by Calvinia and neighbouring towns. The road is divided into two project namely Britstown to Vosburg and Vosburg to Carnavon.

There is rutting and excessive loss of fine material on the road. The gravelling is the main contributor of the poor riding quality; hence this increases the vehicle operating costs due to replacement of shock absorbers.

Other factors that influence safety are:

- Loose materials on the roads, which will create safety hazard for oncoming traffic especially at night.
- Exposure of rough underlying layers, which might puncture tyres.
- Potholes there are a lot of potholes, which will derail motorists even if traveling at the design speed.
- Undulation when approaching storm water drainage pipes. Some of the covering on the drainage pipes are exposed.
- Rutting caused by tyre tracks and it becomes dangerous when changing tracks.

• Access Roads (EPWP)

The department intends to create jobs for the communities on these projects as well as giving them access and better roads to travel on. The designs of these roads will be done internally, thus saving the cost. The learnerships of the department will be deployed on these projects to assist them with their practical training on EPWP.

The use of limited budget has been prioritized in such a way as to protect the existing asset as best possible and has been allocated as follows:

- ▶ Routine maintenance of surfaced roads R29,960 million:
- Routine maintenance of gravel roads R49,373 million: :
- Regravelling of roads R12 million:
- Reseal of surfaced roads. R25 million :

• LAND TRANSPORT

Includes the regulation of the taxi industry, as well as the management of the National Department of Transport bus subsidy programme.

The implementation of the remaining sections of the National Land Transport Transitional Act will be the priority during this year. This will include the finalisation of Registration, Conversion of Permits, establishment of Transport Planning Authorities at Local Government level, and the implementation of the various planning guidelines and requirements in conjunction with Planning Authorities.

4. RECEIPTS AND FINANCING

The expected revenue for 2005/2006 will be R5,8 million.

In table 4.1 a summary is presented of the revenue the department is responsible to collect. In the annexure to the vote a specification of departmental collected revenue is presented.

Table 4.1 Summary of receipts: Transport, Roads and Public Works

The following sources of funding are used for the Vote: 5 Transport, Roads and Public Works

FINANCIAL YEAR 2006/2007 FINANCIAL YEAR 2007/2008 FINANCIAL YEAR 2008/2009

R366, 775 MILLION R446, 629 MILLION R494, 600 MILLION

5.1 Key assumptions

- The departmental budget should make adequate provision for Expanded Public Works Programme principles to be implemented in most of the projects.
- Assumptions for salary increases should be taken into account, amongst others, adjustments contained in the wage agreement as well for performances.
- Assumptions for inflation related items should be based on CPIX projections instead of a fixed percentage increase that are being used especially in lease agreements.
- The balance of the budget should focus more on maintenance of the existing infrastructure because of the enormous backlog instead of building of new infrastructure.
- The increase in infrastructure projects of client departments has stretched the resources to the limit.

5.2 Summary per programme and economic classification

Tables 5.2 to 5.3 below illustrate the budget position of the Department of Transport, Roads and Public Works for the financial years 2002/2003 to 2008/09.

6. PROGRAMME SUMMARY

6.1 PROGRAMME 1 - ADMINISTRATION

Programme Descriptions

Policy formulation by the Member of the Executive Council and Department's management, organising the department, managing it's personnel and financial administration, determining working methods and procedures and exercising control through head office and regional offices and rendering administrative and office auxiliary services.

Tables 6.1 and 6.1.1 Below summarises expenditure relating to Programme 1: Administration, for the financial years 2002/2003 to 2008/09.

Service delivery measures

Objective	Output	Performance Measure	2006 target		
	Establish a complaints office	Electronic record system	System will be operational		
Maintain and renovate buildings to client needs	Put service level agreements in place	Number of agreements	Implement service level agreements with 70% of clients		
	Structure formal client meetings	Scheduled meetings arranged with clients	Meetings arranged with all clients		
Vesting of land in the province	Register applications at the Provincial State Land Disposal Committee	All land in the name of the province registered	30% of the land belonging to the province registered and all registers in magisterial districts E to H.		

To provide accommodation to officials and political office bearers	Policy finalised for officials & political office bearers in accommodation.	Policy approved and tenants satisfaction	Implement policy as operational document
	Develop a register for collection of rental from residents in state houses	Register in place and all rentals updated	Register 100% operational
Optimal utilisation of state property	Proper record on condition of assets	Records on all state owned property are available	95% updated records
Identify redundant state property	Phasing out and dispose of redundant state property	Approved disposal certificates for redundant property	Operational plan approved for disposals

6.3 PROGRAMME 3 – ROADS

Programme Description

To plan, design and construct new roads and plan, rehabilitate and maintain the existing proclaimed road infrastructure in the province.

Tables 6.3 and 6.3.1 below summarises expenditure relating to Programme 3: Roads, for the financial years 2002/2003 to 2008/2009.
