VOTE 12

Transport

Operational budget	R6 572 237 486
MEC remuneration	R 1 491 514
Total amount to be appropriated	R6 573 729 000
Responsible MEC	Mr. W. Mchunu, MEC for Transport and Community Safety & Liaison
Administrating department	Transport
Accounting officer	Head: Transport

1. Overview

Vision

The department's vision is: Prosperity through mobility.

Mission statement

The department's mission is: *While delivering on the department's mandate and addressing the developmental needs of the province, the department will strive to provide the public with a road transportation system that is*:

- Safe;
- Integrated;
- Regulated;
- Affordable; and
- Accessible.

Strategic objectives

Strategic policy direction: The department's strategic policy direction is to support rural development, poverty alleviation and job creation as the department builds roads and bridges, provides safe integrated public transport systems, and manages traffic and the safety of all road users.

The department has set the following goals and strategic objectives in order to achieve this:

- Provide access and mobility within the province;
- Effective management of the transport infrastructure network;
- Create an integrated land transport system; and
- Promote a safe road environment.

Core functions

Turning the vision of the department into reality can only be achieved by focusing the attention and energy of all employees and relevant stakeholders on the performance of its core functions, namely:

Construct, maintain and repair the provincial road network

The department's mandate is to construct and maintain a balanced road network that meets the mobility needs of the citizens of KZN, and supports the national and provincial growth and development strategies.

Plan, regulate and provide an integrated transportation system

The department's mandate is to regulate public transport and ensure access to safe, efficient and affordable public transport. The department is further mandated to facilitate development in the freight transport industry and the minimisation of negative externalities resultant from the transport of freight.

Manage road traffic

The department's mandate is to create a safe road environment, through the reduction of road accidents. The main services rendered include road traffic enforcement, road safety education, the analysis and reengineering of hazardous locations and the registration and licensing of vehicles.

Legislative mandate

The key legislative mandates of the department are derived mainly from the following legislation:

- Administrative Adjudication of Road Traffic Offences Act (Act No. 46 of 1998)
- Broad-Based Black Economic Empowerment Act (Act No. 53 of 2003)
- Cross-border Act (Act No. 4 of 1998)
- Intergovernmental Relations Framework Act (Act No.13 of 2005)
- KZN Provincial Minibus Taxi Act (Act No. 4 of 1998)
- KZN Provincial Roads Act (Act No. 4 of 2001)
- KZN Provincial Supply Chain Management Policy Framework (2006)
- KZN Public Transport Act (Act No.3 of 2005)
- KZN Road Traffic Act (Act No. 7 of 1997)
- National Land Transport Transition Act (Act No. 22 of 2000)
- National Roads Act (Act No. 54 of 1971)
- National Road Traffic Act (Act No. 93 of 1996)
- Preferential Procurement Policy Framework Act (Act No. 5 of 2000)
- Public Finance Management Act (Act No. 1 of 1999, as amended) and Treasury Regulations
- Public Service Act (Act No. 103 of 1994) and Regulations
- Road Traffic Act (Act No. 29 of 1989)
- Road Traffic Management Corporation Act (Act No. 20 of 1999)
- The Constitution of the Republic of South Africa (Act No. 108 of 1996)
- The Construction Industry Development Board Act (Act No. 38 of 2000)
- Urban Transport Act (Act No. 78 of 1977)

2. Review of the 2010/11 financial year

Section 2 provides a review of 2010/11, outlining the main achievements and progress made by the department during the year, as well as providing a brief discussion on challenges and new developments.

Road safety and Operation KuShunquthuli

2010/11 was dedicated to road safety and Operation *KuShunquthuli*, a programme that focuses on transport infrastructure development, such as the building of access roads, pedestrian and vehicle bridges and the facilitation of public transport services in rural areas. The department continued to strive to ensure that the gains made in the reduction of crashes and fatalities on the province's roads are maximised. This was done by making sure that 'road safety is everybody's responsibility'. The department provided much needed infrastructure and services, and ensured that road safety was at the forefront of development.

2010 World Cup transportation

The success of the 2010 World Cup depended heavily on public transport. The department strived to achieve critical success factors, especially in light of the 2010 World Cup and developments in respect of the Dube TradePort (DTP) and the King Shaka International Airport (KSIA). The construction of roads leading to the DTP and the KSIA were completed by May 2010, ahead of the 2010 World Cup. The department committed itself to developing an integrated public transport strategy for 2010 and beyond. To further facilitate and enhance public transport, a study into the redesign of bus contracts was initiated. The department supported forums such as the Provincial and Local Public Transport Passenger Associations, through financial and technical assistance. The department also pursued activities involving the possible revitalisation of the rail network for the transportation of appropriate freight. Once this long-term strategy is finalised, it will culminate in the movement of appropriate freight by rail. This will result in less congestion on the roads, thus lengthening the lifespan of roads.

Integrated Public Transport Networks

The department continued to work with municipalities with regard to the development of Integrated Public Transport Networks (IPTNs) for 2010 and beyond. Requests were made to the Public Transport Infrastructure Fund (PTIF) to support these initiatives financially. The department intends developing IPTNs plans for the whole province, which will strive to ensure the efficient integrated movement of passengers within the province.

Expanded Public Works Programme (EPWP)

The department continued to expand community-based labour-intensive road construction and maintenance programmes, which align with the objectives of the EPWP. The department is committed to create over 5 200 000 person days of employment, equating to 57 000 jobs created, of which 60 per cent are for women and 20 per cent for youth over the 2010/11 MTEF. The department received additional funding of R153.562 million in 2010/11 from the EPWP Incentive grant to be utilised for the creation of EPWP job opportunities. The department continued the development of a Black Economic Empowerment (BEE) road construction and maintenance industry, through the provision of accredited business skills training for 200 *Vukuzakhe* contractors.

3. Outlook for the 2011/12 financial year

Section 3 looks at the key focus areas of 2011/12, outlining what the department is hoping to achieve during the year, as well as briefly looking at challenges and proposed new developments.

The key focus areas of 2011/12 will be to address the challenges in the maintenance of the provincial road network and address the maintenance backlog. In order to redress these challenges, the department has focused on prioritising the main corridors that will be the core stimulus of the economy.

Road safety

The department will continue to place greater emphasis on road safety education, including pedestrian safety, with the aim of shifting road safety to go beyond traffic regulation and enforcement, and towards a people-centred approach that deals with accident prevention and post accident support in a holistic manner.

The pedestrian bridge programme was implemented with the aim of ensuring that communities have access to schools, health facilities and amenities. There is currently a backlog of over 436 pedestrian bridges and the need for additional bridges is increasing. The department will construct ten pedestrian bridges per annum.

Transport infrastructure

In 2011/12, the department will continue with the road upgrade and construction programme that supports the corridors of the primary and secondary nodes through:

• Roads of national importance such as P318 Sani Pass, which is the only road link between KZN and Lesotho;

- The African Renaissance Roads Upgrading Programme (ARRUP), which encompasses the construction of the P577 (Duffs Road), and forms part of an alternative route between Pinetown and the KSIA;
- The upgrading of the P700 (Ulundi Road);
- R102, which is a development corridor route, providing strategic access to the KSIA and DTP;
- P496, John Ross Highway, leading to the port in Richards Bay; and
- Roads for rural development such as upgrade of P218 and P710 in the Endumeni area, construction of the Black Umfolozi river bridge linking P702 and P703 (Ulundi) and P58 serving the Ezinqoleni Rural Roads Transportation Forum (RRTF) area from Deemount to Ezinqoleni.

Operation KuShunquthuli

The Operation *KuShunquthuli* programme focuses on transport infrastructure development in rural areas, which are the areas of emphasis for service delivery. The department has identified key projects that will be a stimulus in linking the rural communities to the provincial hubs of activity. Some of the projects include the following:

- The upgrading of 55 kilometres from Impendle to Himeville (P127).
- The upgrading of gravel road to a standard blacktop surface (P73). This road traverses through District Council 21 (Ugu District Municipality), which serves the Umzumbe RRTF area and District Council 43 (Sisonke District Municipality) that serves the Ixopo RRTF area. This road provides access to residential areas.
- The upgrading of gravel to blacktop standards of 26 kilometres from Nongoma to Ceza in the Empangeni region (P487). This road provides access to numerous schools, clinics and other public amenities.
- The upgrade of gravel to blacktop of 38 kilometres between Muden and Tugela Ferry in the Ladysmith region (P368). The completed road will have two lanes and an overall surface width of seven metres. This road serves the Msinga community by providing access to Tugela Ferry, schools and clinics.

Expanded Public Works Programme

The department will continue to use labour-intensive methodologies in order to create employment and will continue to give preference to local suppliers of goods and services and undertake work using local *Vukuzakhe* contractors as far as is possible, in order to support growth of the local economy.

4. Receipts and financing

4.1 Summary of receipts

Table 12.1 gives the sources of funding of Vote 12 over the seven-year period 2007/08 to 2013/14. The table also compares actual and budgeted receipts against actual and budgeted payments.

The department receives a provincial allocation in the form of an equitable share, and national conditional grant allocations for the maintenance and construction of road infrastructure and the subsidising of bus transport in the province.

Table 12.1: Summary of receipts and financing

	Αι	Audited Outcome			Adjusted Appropriation		Medium-term Estimates		
R thousand	2007/08	2008/09	2009/10		2010/11		2011/12	2012/13	2013/14

Surplus/(deficit) after financing	(1 717)	(607 168)	6 802	-	-	-	-	-	

The Provincial Roads Maintenance grant (previously the Infrastructure Grant to Provinces or IGP) is aimed at accelerating the construction, maintenance, upgrading and rehabilitation of new and existing transport infrastructure. National Treasury is discontinuing the IGP in its current form from 2011/12, and replacing it with a specific grant for Education, Health and Transport. The increase in this grant results from a decision taken at a national level to change the way the grant is allocated between the three sectors. This grant in Transport will supplement existing infrastructure budgets in transport infrastructure and function in a similar manner to the existing IGP.

The deficit of R1.717 million in 2007/08 was mainly due to enhanced road safety initiatives, including law enforcement on public roads that was not budgeted for.

The amount of R16 million in 2008/09 against *Provincial cash resources* relates to additional funding allocated to cater for the higher than anticipated 2008 wage agreement.

The 2008/09 deficit of R607.168 million was mainly due to excessive cost increases on committed projects, which resulted from increased construction costs such as petrol, cement, steel, bitumen and other construction indices. In addition, the Department of Trade and Industry (DTI) withdrew funding of R77.500 million due to the budget for the Critical Infrastructure Programme for 2007/08 being limited and, therefore, it could not accommodate a long-standing commitment for the John Ross Highway project. In terms of Section 34(2) of the PFMA, the department is liable for the repayment of the over-expenditure. This resulted in the first instalment of the first charge of R185.492 million being implemented against the budget in 2009/10, and the second instalment of R185.466 million in 2010/11. The balance of the over-expenditure was financed through the 7.5 per cent reduction in the value of the department's *Goods and services*. The department is also liable for a first charge of R200 000 relating to the write-off of thefts and losses not approved by SCOPA as per Resolution 12 of 2009 (see Tables 12.7 and 12.8 below).

The department received amounts of R30 million and R616.773 million from the National Department of Transport (NDoT) as conditional grants in 2008/09, to continue with the upgrading of the P318 Sani Pass, and for repairs to roads damaged by the flood disaster in the South Coast area, respectively.

The department received a further allocation of R34.347 million in 2009/10 for the upgrading of the P318 Sani Pass. Further funding of R587.396 million in 2009/10, with carry-through in 2010/11 and over the MTEF, was allocated in respect of the Public Transport Operations grant for the payment of bus subsidies to operators.

The department was allocated funding of R83.900 million in 2009/10 in respect of the EPWP Incentive grant from Vote 14: Public Works, following an instruction by National Treasury, as well as the gazette published by National Treasury on 17 April 2009.

The surplus of R6.802 million in 2009/10 was part of the department's pledge of R17 million to assist with the Provincial Recovery Plan. This was due to under-spending on the Public Transport Operations grant by R54.146 million as a result of problems experienced with the eThekwini bus service, as well as

Estimates of Provincial Revenue and Expenditure

the withdrawal of the contract with Remnant Alton bus company. As a result, National Treasury, by way of a Gazette notice, reduced the grant by R60 million at the end of March 2010, and re-allocated it to the North West Province. The department then had to finance the difference of R5.854 million between the amount moved to the North West Province (R60 million) and the actual amount under-spent (R54.146 million) from its equitable share.

In 2010/11, the department received funding of R169.470 million in respect of the EPWP Incentive grant. However, in the 2010/11 Adjusted Appropriation, R16.340 million in respect of this grant was suspended from the department and reallocated to Vote 5: Education – R500 000, Vote 7: Health – R11.307 million, Vote 8: Human Settlements – R593 000, Vote 14: Public Works – R3.440 million and Vote 16: Sport and Recreation – R500 000, in line with Schedule 8 of the DORA, 2010.

Also in the 2010/11 Adjusted Appropriation, the department received R214.398 million in the form of a Provincial Disaster Relief grant for repair to roads and infrastructure damage caused by floods in 2009/10 in the South Coast area. Furthermore, R100 million was allocated to continue with the construction of the John Ross Highway, the upgrading of the R102 linking the DTP and the KSIA, the Sani Pass road, as well as R23.105 million to cater for the higher than anticipated 2010 wage agreement.

The department also received a roll-over of R432 066 in 2010/11 from 2009/10 relating to the EPWP Incentive grant. This amount relates to funds received in March 2010 from National Treasury, for exceeding the 2009/10 EPWP targets. The amount was received too late in 2009/10 to be allocated to the department for spending, and was therefore allocated in the 2010/11 Adjusted Appropriation.

The department is projecting to fully spend its entire budget allocation at the end of 2010/11, and it is showing a balanced budget from 2011/12 onward.

4.2 Departmental receipts collection

Table 12.2 below indicates the estimated departmental receipts for Vote 12. Details of departmental receipts are presented in *Annexure – Vote 12: Transport*.

	Au	Audited Outcome			Main Adjusted Appropriation Appropriation		Medium-term Estimates		
R thousand	2007/08	2008/09	2009/10		2010/11		2011/12	2012/13	2013/14

Total	861 293	1 008 826	1 139 462	1 120 697	1 120 697	1 160 448	1 207 948	1 294 383	1 341 890

Table 12.2: Details of departmental receipts

Table 12.2 shows that there is a steady increase in the amount of revenue collected by the department over the seven-year period, particularly from 2008/09 onward.

The increase in revenue collected from 2008/09 onward can be attributed to improved revenue collection strategies. The projections for the 2011/12 MTEF were based on the projected end-of-year collection for 2010/11, coupled with an incremental estimation for the various categories each year, as well as the increase in licence fee tariffs, and were adjusted by the expected change in the vehicle population over time. The increased tariffs are approved by the department, in consultation with Provincial Treasury. This practice will continue until motor vehicle licence fees are aligned to other provinces and international best practice, which is an exercise currently being undertaken by the nine provinces, collectively.

As reflected in Table 12.2 above, the majority of the department's revenue is derived from *Tax receipts* (*Motor vehicle licences*) collected in terms of the Road Traffic Act. This revenue consists of motor vehicle registration and licence fees, and the sale of personalised and specific number plates. The increase from 2008/09 onward is due to improved revenue and debt collection strategies, as well as improved registration in respect of classification of vehicles, such as abnormal loads and special vehicles. The high 2010/11 Revised Estimate can be attributed to the increase in the number of re-classified vehicles. The projections over the MTEF are based on the 2010/11 revenue collected, as well as the increase in licence fee tariffs, and inflationary increments.

The high amounts against *Sale of goods and services other than capital assets* in 2008/09 and 2009/10 are due to the higher than anticipated increase in the renewal of learners' and drivers' licences, as well as the conversion of drivers' licences. The low 2010/11 Main Appropriation and over the MTEF period in comparison to 2009/10 is due to the department budgeting conservatively as a result of its uncertain nature. The high 2010/11 Revised Estimate can be attributed to the higher than anticipated increase in the renewal of learners' and drivers' licences, as well as the conversion of drivers' licences. The increase over the MTEF can be ascribed to inflationary increments.

The amount of R571 000 in 2008/09 against *Transfers received* consists of revenue received from the sale of scrap, waste and other used current goods.

Fines, penalties and forfeits reflects the collection of traffic fines resulting from road traffic infringements. The increase in 2009/10 and the 2010/11 Revised Estimate can be attributed to improved recovery strategies and measures put in place for the collection of fines receivable (such as traffic fines, parking transgressions, etc.). The decrease in the 2010/11 Main Appropriation and over the 2011/12 MTEF can be attributed to conservative budgeting due to the difficulty in budgeting for this item because of its uncertain nature.

Interest, dividends and rent on land mainly consists of items such as interest on staff debts. The fluctuating trend can be attributed to the difficulty in accurately projecting for these items due to their uncertain nature.

Sale of capital assets reflects the sale of redundant vehicles and departmental plant. The department decentralised the auctioning function to the provincial departments in the latter part of 2008/09, who now undertake the auctioning of their own vehicles and departmental plant, hence the low amount in 2008/09. The fluctuations from 2008/09 onward can be attributed to the difficulty in projecting with certainty the collection of these receipts. The increase over the MTEF can be attributed to inflationary increments.

The department also collects revenue from *Transactions in financial assets and liabilities*, which is made up of recoveries of staff debts and stale cheques. The fluctuations over the seven years under review can be attributed to the difficulty in budgeting for this item due to its uncertain nature. The high collection in the 2010/11 Revised Estimate can be attributed to improved revenue and debt collection strategies relating to recoveries from previous years.

4.3 Agency receipts

Tables 12.3 and 12.4 below present details of agency receipts that are received by the department.

The department receives funding from the South African National Roads Agency Limited (SANRAL), to cater for an extended overload control function on the national road network in the province. The 2011/12 MTEF allocation in respect of overload control remains constant, due to conservative budgeting, as a result of the uncertainty over the amount that will be transferred to the department. This also explains the fluctuations over the seven-year period under review.

The agency funding for bus subsidies from NDoT ended in 2008/09, and was replaced from 2009/10 onward by the Public Transport Operations grant to subsidise public transport.

Table 12.3: Details of agency receipts

5. Payment summary

This section summarises the payments and budget estimates for the vote in terms of programmes and economic classification. Details of the economic classification per programme are presented in *Annexure – Vote 12: Transport*.

5.1 Key assumptions

The department applied the following broad assumptions when compiling the budget:

- The cost-cutting measures as defined in Provincial Treasury Circular PT (1) of 2010/11 (as reissued by the Provincial Treasury in 2011/12) will continue to be adhered to over the 2011/12 MTEF.
- Provision was made for the R800 per month housing allowance for staff on levels 1 to 10 as per the 2010 wage agreement.
- Provision was made for the carry-through costs of the 2010 wage agreement and an inflationary wage adjustment of 5.5 per cent for each of the three years of the 2011/12 MTEF, and an annual 1.5 per cent pay progression.
- Provision has been made for the filling of vacant posts. However, if the moratorium on the filling of non-critical posts is not lifted, these funds may be reallocated in the Adjustments Estimate process.
- The incremental budgeting approach was used for the 2011/12 MTEF, as was the case in the 2010/11 MTEF.
- All inflation related increases are based on headline CPI projections.

5.2 Additional allocations for the 2009/10 to 2011/12 MTEF

Table 12.5 shows additional funding received by the department over the three MTEF periods: 2009/10, 2010/11 and 2011/12. Note that the table reflects only the provincial additional allocations, and excludes additional allocations in respect of conditional grants.

The purpose of such a table is two-fold. Firstly, it shows the quantum of additional funding allocated to the department in the past and current MTEF periods. Secondly, it indicates the policies and purposes for which the additional funding was allocated.

The carry-through allocations for the 2009/10 MTEF period (i.e. for the financial years 2012/13 and 2013/14) are based on the incremental percentages used in the 2010/11 MTEF and 2011/12 MTEF. A similar approach was used for the carry-through allocations for the 2010/11 MTEF period.

Table 12.5:	Summary of additional provincial allocations for 2009/10 to 2011/12 MTEF	
-------------	--	--

R thousand	2009/10	2010/11	2011/12	2012/13	2013/14
2009/10 MTEF period	22 720	24 129	133 060	139 713	147 397
Carry-through of 2008/09 Adjustments Estimate - 2008 wage agreement	22 720	24 129	25 504	26 779	28 252
National priorities - Roads and other economic functions	-	-	107 556	112 934	119 145
2010/11 MTEF period		31 948	35 669	39 430	41 599
Carry-through of 2009/10 Adjustments Estimate - 2009 wage agreement		31 423	35 118	38 851	40 988
Policy on Incapacity Leave and III Health Retirement (PILIR)		525	551	579	611
2011/12 MTEF period			307 972	505 522	672 959
Carry-through of 2010/11 Adjustments Estimate - 2010 wage agreement			41 057	29 196	23 974
Provincial priorities - Maintenance of the provincial road network			269 250	479 452	653 022
National Cabinet decision to cut provinces by 0.3 per cent			(2 335)	(3 126)	(4 037)
Total	22 720	56 077	476 701	684 665	861 955

Over the 2009/10 MTEF, the department was allocated additional funding to cater for the carry-through effect of the higher than anticipated 2008 wage agreement, as well as additional funding for roads and other economic functions, commencing in 2011/12. This funding is in respect of the enhancement of law enforcement and road safety campaigns, as well as for roads of national importance, including the upgrade of the John Ross Highway, Sani Pass, main roads to the KSIA and new construction of the P577.

In the 2010/11 MTEF, additional funding was allocated for the carry-through effect of the higher than anticipated 2009 wage agreement and for the Policy on Incapacity Leave and Ill Health Retirement.

Over the 2011/12 MTEF, the department received additional allocation for the maintenance of the provincial road network, and carry-through costs of the higher than anticipated 2010 wage agreement. Also, in the 2011/12 MTEF, National Cabinet took a decision to cut all national votes and the provincial equitable share by 0.3 per cent. The bulk of this equitable share reduction in KZN was sourced by capping the interest on the overdraft provision and by marginally decreasing the budgeted surplus of the province. The balance was sourced proportionately from all 16 provincial votes. The effect of this on the department is a slight reduction of R2.335 million, R3.126 million and R4.037 million over the MTEF.

5.3 Summary by programme and economic classification

Changes to the budget and programme structure: The budget and programme structure of the department has been amended to align it with the revised uniform budget and programme structure for the Public Works and Transport sectors, as illustrated in Table 12.6 below.

As reflected in the table below, the department still maintains five programmes, as in the previous year. However, changes have been made to the programme names, and some of the sub-programmes have been removed in order to align to the sector.

Detailed information on each programme change is explained under the section pertaining to the programme. It should be noted that, as far as possible, the department attempted to restate prior years' figures, but this was not possible in every instance. As a result, it is difficult to explain trends from 2007/08 to 2010/11, particularly at programme and sub-programme levels

The services rendered by the department are categorised under five programmes, which were realigned to conform to the revised uniform budget and programme structure of the Public Works and Transport sectors. The department's mission is to provide the public with integrated and accessible road and public transport infrastructure and to promote road and public transport safety, through the interaction of these five programmes.

Table 12.6:	Reconciliation of structural changes to Vote 12: Transport
-------------	--

Tables 12.7 and 12.8 provide a summary of the vote's payments and budgeted estimates over the sevenyear period, by programme and economic classification, respectively.

As explained previously, the department was liable for the repayment of previous year's overexpenditure, resulting in a first charge against the department's budget in 2009/10 and 2010/11, which is reflected under Programme 1: Administration and against *Payments for financial assets*. This is reflected as a footnote in Tables 12.7 and 12.8 below.

The spending in 2008/09 is inflated by the over-expenditure incurred that year, which resulted from increased construction costs, as well as the withdrawal of funding by the DTI towards the John Ross Highway, as mentioned previously.

Table 12.8: Summary of payments and estimates by economic classification

The increase in 2008/09 compared to 2007/08 against Programme 1: Administration relates to a claim of R15 million against the department for the court settlement relating to a bicycle accident where the department was found to have been at fault, as well as the payment of additional legal fees relating to claims against the department. The high 2009/10 and 2010/11 amounts include R185.492 million and R185.666 million, respectively, relating to the first charge, hence the reduction over the 2011/12 MTEF. These amounts are reflected against *Payments for financial assets*. The decrease in the 2010/11 Adjusted Appropriation can be attributed to savings reprioritised as a result of non-filling of non-critical posts to Programme 2: Transport Infrastructure and Programme 4: Transport Regulation to cater for the higher than anticipated 2010 wage agreement.

The increases under Programme 2 over the seven-year period are specifically related to the department's investment in the provincial road network, housed under *Goods and services* and *Buildings and other fixed structures*. The high 2008/09 amount can be attributed to the over-expenditure in that year, as previously explained. The increase in the 2010/11 Adjusted Appropriation is attributed to amounts of R432 066 rolled over from 2009/10 relating to the EPWP Incentive grant, R100 million to continue with the construction of the John Ross Highway, the upgrading of the R102 linking DTP and KSIA, and the Sani Pass road and R214.398 million in the form of a Provincial Disaster Relief grant, as previously mentioned. In addition, funds were moved from Programme 1 and Programme 5: Community Based Programme for the higher than anticipated 2010 wage agreement and to cater for the R40 per month increase in the salaries of the *Zibambele* contractors from December 2010. The increase over the MTEF relates to the additional allocation for the maintenance of the provincial road network, as well as additional funding for roads and other economic functions.

Programme 3: Transport Operations shows a significant increase from 2009/10 onward due to the allocation in respect of the Public Transport Operations grant received from NDoT in 2009/10 relating to the payment of bus subsidies to operators. This is reflected against *Transfers and subsidies to: Public corporations and private enterprises.* The increase over the MTEF is due to the growth of the grant.

Programme 4 reflects steady growth from 2008/09 onward. The growth relates to the investment in the computerised licence testing project and an increase in law enforcement and road safety campaigns. The increase in the 2010/11 Adjusted Appropriation relates to additional funding for the higher than anticipated 2010 wage agreement. Funds were also moved from Programme 1 in this regard. The increase over the MTEF can be ascribed to the substantial allocation for the enhancement of law enforcement and road safety campaigns, which form part of the additional funding for roads and other economic functions.

Estimates of Provincial Revenue and Expenditure

The high expenditure against Programme 5 in 2007/08 and the increase in 2010/11 is due to the increase in the allocation for the learnerships in support of the EPWP and for the training of *Vukuzakhe* emerging contractors. The decrease in 2008/09 resulted from delays in the training of contractors as a result of the late recruitment of facilitators due to longer than anticipated recruitment processes. A further decrease in 2009/10 can be attributed to cost-cutting. The increase in the 2010/11 Main Appropriation relates to additional funding for learnerships in support of the EPWP, and for the training of *Vukuzakhe* emerging contractors. The decrease in the 2010/11 Adjusted Appropriation can be attributed to savings, due to cost-cutting, reprioritised to Programme 2 to cater for the higher than anticipated 2010 wage agreement. The increase in 2011/12 in comparison to 2012/13 and 2013/14 is due to the allocation for learnerships in support of the EPWP and the training of *Vukuzakhe* emerging contractors in 2011/12 only, at this stage.

Compensation of employees shows a steady increase over the seven-year period under review. The increase can be attributed to funding in respect of the higher than anticipated annual wage agreements, as well as filling of posts in line with the Provincial Recovery Plan. The increase in the 2010/11 Adjusted Appropriation is due to additional funding allocated to the department, and savings reprioritised from *Goods and services* to cater for the higher than anticipated 2010 wage agreement.

The high expenditure against *Goods and services* and *Buildings and other fixed structures* in 2008/09 relates to the over-expenditure incurred in that year, as explained previously. The extended road safety awareness campaigns conducted in the 2008/09 festive season also contributed to the high spending against *Goods and services*.

The amounts against *Transfers and subsidies to: Provinces and municipalities* in 2007/08 and 2008/09 relate to transfers to the Msunduzi Municipality and the eThekwini Metro in respect of infrastructure planning, such as the construction of bus shelters, or extension of roads that relate to transport infrastructure in support of the Taxi Recapitalisation Programme. There are no amounts from 2009/10 onward due to a decision taken by the department to take over this function themselves, as a result of non-submission of business plans by the relevant municipalities.

The amount against *Transfers and subsidies to: Departmental agencies and accounts* relates to payment made in respect of the Skills Development Levy. In terms of the guidelines for Skills Development Levy, national and provincial departments are exempt from paying the levy and, as such, the department has ceased the payment of this levy, hence there is no expenditure and budget estimates from 2008/09 onward. However, the department is required by the Skills Development Act to budget at least 1 per cent of its salary expense for staff training. This is reflected under Section 7.2, Table 12.33 below.

Transfers and subsidies to: Households caters for the payment of leave gratuities. The fluctuating trend can be attributed to the difficulty in projecting for this category due to its uncertain nature. The high 2008/09 amount in comparison to previous years relates to a claim of R15 million against the department, as explained earlier. The increase in the 2010/11 Adjusted Appropriation is due to funds reprioritised from *Goods and services* to cater for higher than anticipated leave gratuities.

The low 2009/10 amount against *Machinery and equipment* relates to enforced savings (such as no new furniture purchased, computers and office equipment). The increase in 2010/11 is due to provision made to cater for the appointment of new staff, as well as the replacement of computer equipment, vehicles, etc., that are damaged or obsolete. This allocation remains constant from 2010/11 onward, as the department is not anticipating any major purchases due to cost-cutting.

The amounts against *Software and other intangible assets* in 2008/09 and 2009/10 were in respect of the once-off need for the upgrade computer software licences, and hence there are no projections in 2010/11 and over the MTEF.

5.4 Summary of payments and estimates by district municipal area

Table 12.9 provides a summary of spending (excluding administrative costs) by the department in each district municipality.

Table 12.9: Summary of payments and estimates by district municipal area

	Audited	Revised

Umkhanyakude	160 547	230 498	260 621	283 468	304 544	
uThungulu	477 991	587 623	640 414	684 531	716 567	
llembe	275 437	312 511	350 808	381 599	410 273	
Sisonke	319 495	339 303	377 718	414 456	431 036	
Total	4 207 422	4 698 205	5 051 815	5 444 907	5 783 370	

The department has reprioritised its budget to support the Provincial Spatial Economic Development Strategy (PSEDS), and service delivery is equitably distributed throughout the province. Budget allocations are determined and projects are prioritised based on various factors, including the relative size of the affected community, the poverty index in the area and the comparative extent of the backlog in the area. As such, there is an equitable balance in allocation between areas of high economic activity and large populations, and areas of high poverty levels but low population numbers, hence the increase in budget against Uthukela, Amajuba and Umkhanyakude District Municipalities.

As reflected in Table 12.9, the highest expenditure is shown against the department's head office in the uMgungundlovu District Municipality, in respect of projects that cannot be easily split across the individual district municipalities over the five-year period.

The expenditure in the eThekwini Metro area can be mainly ascribed to the expenditure in respect of the Public Transport Operations grant, as well as the additional funding received for the roads providing access to the DTP and the KSIA, and the construction of the P577 (Duffs Road to KwaDabeka) and the upgrading of access roads and pedestrian bridges.

A significant portion of the spending occurs in the uThungulu district municipal area, and this relates to the upgrading of the John Ross Highway and other ARRUP projects. The Zululand District Municipality reflects the expenditure on ARRUP projects, as well as other major projects such as the P235 and part of the P700 being undertaken in this district.

The expenditure in the Ugu district municipal area is in respect of projects such as P73-1 Umzumbe, P68-St Faith, P58-Nqabeni to Harding, etc. The spending against the Sisonke district municipal area relates to projects in Umzimkulu to improve the area, as well as the upgrading of the P318 Sani Pass. The substantial funding allocated is in respect of the incorporation of Umzimkulu into KZN to be used for improving service delivery within the area to the same level as the other areas of the province.

5.5 Summary of conditional grant payments and estimates

Tables 12.10 and 12.11 provide a summary of the conditional grant payments and budgeted estimates over the seven-year period, by grant name and economic classification, respectively.

Table 12.11:	Summary of conditional grant payments and estimates by economic classification
--------------	--

There is a significant increase against the conditional grant allocations over the period under review, particularly from 2008/09 onward, as explained per grant below:

Sani Pass Road grant: Once-off amounts of R30 million and R34.347 million were allocated against *Buildings and other fixed structures* for the upgrading of the P318 Sani Pass in 2008/09 and 2009/10, respectively.

Transport Disaster Management grant: A once-off amount of R616.773 million was allocated against *Buildings and other fixed structures* in 2008/09 for repairs to roads damaged by the flood disaster in the South Coast area.

Provincial Disaster Relief grant: A once-off amount of R214.398 million was allocated against *Goods and services* in the 2010/11 Adjusted Appropriation for repair to roads and infrastructure damage caused by floods in 2009/10 in the South Coast area.

Public Transport Operations grant: Funds were allocated against *Transfers and subsidies to: Public corporations and private enterprises* for the Public Transport Operations grant from 2009/10 onward, as previously explained. The increase over the MTEF is due to the growth in the grant.

EPWP Incentive grant: Funds were allocated against *Goods and services* in respect of the EPWP Incentive grant in 2009/10 from Vote 14: Public Works, with further amounts being allocated in 2010/11 and 2011/12 only at this stage. The low 2010/11 Adjusted Appropriation is due to R16.340 million being suspended from the department and reallocated to several departments. This was offset by R432 066 rolled over from 2009/10.

Provincial Roads Maintenance grant: The grant allocation, which has increased significantly over the seven years under review, is in respect of maintenance and construction of road infrastructure in the province. The increase over the MTEF is due to the growth in the grant. The allocations are reflected against *Buildings and other fixed structures*.

5.6 Summary of infrastructure payments and estimates

Table 12.12 presents a summary of infrastructure payments and estimates by category for the vote. A more detailed listing of infrastructure projects to be undertaken by the department can be found in the *Annexure – Vote 12: Transport*.

Total	2 198 836	3 931 911	3 310 471	3 585 243	3 914 233	3 914 233	4 536 965	4 951 094	5 373 198

Note: Current infrastructure includes salary costs of Zibambele contractors, as well as Compensation of employees to maintena

The infrastructure expenditure and budget increase substantially from 2008/09 to 2013/14. This is due to the increase in construction activities in respect of infrastructure investment in the province, as well as construction projects relating to the 2010 World Cup (such as the DTP and KSIA) and additional funding in respect of the maintenance of the provincial road network. The high 2008/09 amount is inflated by the over-expenditure incurred in that year, against Upgrades and additions.

New and replacement assets increases steadily over the period under review and includes the construction of the P700 (Ulundi to Hluhluwe/Mfolozi Game Reserve), the construction of the P577 (Duffs Road to KwaDabeka) and the upgrading of access roads and pedestrian bridges.

The amounts against Upgrades and additions from 2008/09 onward include several large road construction projects, including the P318 Sani Pass, the roads to support DTP and KSIA, the P496 (the John Ross Highway linking Empangeni and Richards Bay), ARRUP road projects and access roads. The increase in the 2010/11 Adjusted Appropriation relates to R100 million allocated for the continued construction of the John Ross Highway, the upgrading of the R102 linking the DTP and KSIA, and the Sani Pass road, being roads of strategic importance to the province. The slight decrease over the MTEF is in line with the national initiative to increase the maintenance budget.

There is steady growth against *Rehabilitation, renovations and refurbishments* with the exception of 2009/10, where funds were reprioritised to Upgrades and additions to offset spending pressures relating to increased costs in construction, as well as towards the flood damage in the South Coast area in 2009/10. There is steady growth over the MTEF period.

Maintenance and repairs caters for routine, preventative, mechanical and other maintenance. The growth from 2008/09 onward relates to maintenance of the existing road network. The department realigned its budget for infrastructure in line with the requirements set by National Treasury as part of the Infrastructure Reporting Model (IRM). These changes include the classification of all maintenance activities as Current infrastructure. The increase in the 2010/11 Adjusted Appropriation relates to amounts of R432 066 rolled over from 2009/10 relating to the EPWP Incentive grant, and R214.398 million in the form of a Provincial Disaster Relief grant for repair to roads and infrastructure damage caused by floods in 2009/10, as well as R40 per month increase in the salaries of the Zibambele contractors from December 2010. The increase was offset by a reduction of R16.340 million in respect of the EPWP Incentive grant, as explained earlier. The increase over the MTEF is also as a result of additional funding in respect of the maintenance of the provincial road network, as well as the reclassification of the infrastructure budget in line with the national initiative to increase the maintenance budget. This category also includes the salary of the Zibambele contractors and other departmental staff that undertake maintenance.

The amount against Infrastructure transfers in 2007/08 relates to the maintenance of provincial roads that was undertaken by municipalities. As explained previously, there are no transfers made to the municipalities from 2008/09 onward due to the department taking over this function themselves.

5.7 Summary of Public Private Partnerships – Nil

5.8 Transfers to public entities listed in terms of Schedule 3 of the PFMA – Nil

5.9 Transfers to other entities

Table 12.13 below reflects departmental transfers to other entities.

Table 12.13:	Summary of departmental transfers to other entities
--------------	---

	Sub-programme	Au	dited Outco	me	Main Appropriation	Adjusted Appropriation	Revised Estimate	Mediu	m-term Esti	mates

The amount against Bus operators from 2009/10 onward relates to the Public Transport Operations grant for the payment of bus subsidies to operators.

The amount in 2007/08 was in respect of fines and penalties amounting to R25 000. However, this amount was offset by an amount of R2 000 relating to non-life insurance premiums.

5.10 Transfers to municipalities

Table 12.14 details the transfers to municipalities, summarised according to categories A, B and C. Table 12.15 provides the departmental transfers to the municipalities by grant name. Detailed information on the departmental transfers to municipalities by transfer/grant type, category and municipality is presented in the *Annexure – Vote 12: Transport*.

The amounts in 2007/08 and 2008/09 against Categories A and B municipalities relate to Municipal Transport Planning and Infrastructure in respect of the construction and upgrading of public transport infrastructure in support of the Taxi Recapitalisation Programme, and the amount against Category C relates to Maintenance Main Roads allocated to municipalities for the maintenance of provincial roads. As explained previously, there are no amounts against Categories A and C from 2008/09 and from 2009/10 against Category B, as the department has taken over these functions.

5.11 Transfers and subsidies

Table 12.16 below is a summary of spending on *Transfers and subsidies* by programme and main category. The table reflects a substantial increase from 2009/10 to 2013/14 due to the allocation in respect of the Public Transport Operations grant. Details are provided in the paragraphs below the table .

Table 12 16	Summary of transfers and subsidies by programme and main category	,
	Summary of transfers and subsidies by programme and main categor	

Transfers and subsidies to: Households under all five programmes caters for staff exits, which are difficult to predict, accounting for the fluctuations over the period under review. The high amount in 2008/09 against Programme 1 relates to a claim of R15 million against the department for the court settlement relating to a bicycle accident where the department was found to be at fault.

Transfers and subsidies under Programme 1 fluctuate over the seven-year period, largely due to the nature of transfers made, which are explained below:

• The amount against *Departmental agencies and accounts* is in respect of the Skills Development Levy, which is no longer paid, as explained previously.

Transfers and subsidies under Programme 2: Transport Infrastructure is explained as follows:

- *Provinces and municipalities* relates to the maintenance of provincial roads that used to be undertaken by municipalities, but the department in 2008/09 has taken over this function, as previously explained.
- Public corporations and private enterprises relates to non-life insurance premiums.

Under Programme 3, Transfers and subsidies is made up as follows:

• *Provinces and municipalities* relates to Municipal Transport Planning and Infrastructure transfers for infrastructure planning such as the construction of bus shelters, or extension of roads, as explained.

• *Public corporations and private enterprises* relates to the Public Transport Operations grant for the payment of bus subsidies to operators from 2009/10 onward.

Transfers and subsidies under Programme 4 is explained as follows:

- *Provinces and municipalities* relates to the maintenance of provincial roads that was undertaken by municipalities.
- *Public corporations and private enterprises* relates to fines and penalties.

6. **Programme description**

The services rendered by the department are categorised under five programmes, which conform to the revised uniform budget and programme structure of the Public Works and Transport sectors. As mentioned earlier, the department has amended its budget and programme structure for the 2011/12 MTEF to comply with the revised uniform budget and programme structure for the sector, and has realigned its expenditure and budget estimates as far as possible for comparative purposes. Details of each programme's change have been explained under the section pertaining to the programme below.

The payments and budgeted estimates for each programme are summarised in terms of economic classification, details of which are presented in the *Annexure – Vote 12: Transport*.

6.1 **Programme 1: Administration**

The purpose of Programme 1 is to provide the department with the overall management and administrative, strategic, financial and corporate support services (including human resource management, labour relations and legal services) in order to ensure that it delivers on its mandate in an integrated, efficient, effective and sustainable manner.

This programme has been amended for the 2011/12 MTEF to conform to the revised uniform budget and programme structure for the sector. The programme now consists of the sub-programmes: Office of the MEC, Management, Corporate Support and Departmental Strategy (being the new sub-programme which has replaced the Programme Support Services sub-programme). It should be noted that expenditure and estimates have been restated for comparative reasons.

Tables 12.17 and 12.18 below summarise payments and budgeted estimates relating to Programme 1 for the financial years 2007/08 to 2013/14.

As explained previously, in terms of Section 34(2) of the PFMA, the department is liable for the repayment of the 2008/09 over-expenditure, resulting in a first charge against the department's budget. In 2009/10, the first instalment of R185.492 million was implemented against the budget and the second instalment of R185.466 million was implemented in 2010/11. Apart from the first charge amounts, the department is also liable for a first charge of R200 000 in line with SCOPA Resolution 12 of 2009. The first charge amounts implemented are allocated under the sub-programme: Management, against *Payments for financial assets*, and the amount available for spending in 2009/10 and 2010/11 has been reduced by the instalment amounts, as reflected in the footnote of Tables 12.17 and 12.18 below.

	Audited Outcome			Main Appropriation	Adjusted Appropriation	Revised Estimate	Medium-term Estimates

Table 12.18: Summary of payments and estimates by economic classification - Programme 1: Administration

The decrease against the sub-programme: Office of the MEC in the 2010/11 Main Appropriation is due to the department incorrectly budgeting for the MEC's office costs under the sub-programme: Management. This was corrected in the 2010/11 Adjusted Appropriation where the funds were shifted from the sub-programme: Management to this sub-programme. The increase over the 2011/12 MTEF relates to annual salary adjustments and provision for the filling of critical vacant posts.

The 2009/10 allocation increased substantially, especially under the sub-programmes: Management and Corporate Support, due to redefining the sub-programmes that were previously reflected against other programmes, such as the movement of the Communications function from Programme 4 and the Information Technology function from Programme 2 to Programme 1. As explained, the high 2009/10 and 2010/11 amounts relate to the first charge, hence the decrease over the MTEF. The decrease in the 2010/11 Adjusted Appropriation is due to funds shifted to the sub-programme: Office of the MEC, as mentioned earlier.

The Corporate Support sub-programme reflects a steady increase over the period under review. The increase from 2010/11 onward is in respect of annual salary adjustments and provision made to cater for the filling of critical vacant posts.

The sub-programme: Departmental Strategy increases from 2010/11 onward due to redefining the functions of the sub-programme in line with the amended budget and programme structure and to cater for the filling of critical vacant posts.

The decrease in the 2010/11 Adjusted Appropriation against *Compensation of employees* relates to funds moved, due to non-filling of non-critical posts, to Programme 2: Transport Infrastructure and Programme 4: Transport Regulation for the higher than anticipated 2010 wage agreement. The increase over the MTEF caters for annual salary adjustments, filling of critical posts, and inflationary increments.

Transfers and subsides to: Households reflects a high 2008/09 amount due to the R15 million paid as a claim against the department for the court settlement, as explained previously. The increase in the 2010/11 Adjusted Appropriation relates to funds moved from *Goods and services* due to cost-cutting in respect of the payment of leave gratuities. This also explains the decrease against *Goods and services* over the same period. The allocations over the MTEF are also to cater for leave gratuities.

The amount against *Software and other intangible assets* in 2009/10 was in respect of a once-off upgrade of computer software licences, and hence there are no projections in 2010/11 and over the MTEF. The amounts against *Payments for financial assets* from 2007/08 to 2009/10 relate to write-off of

irrecoverable staff debts. As explained previously, the amounts in 2009/10 and 2010/11 are in respect of the department's first charge for the 2008/09 over-expenditure.

6.2 Programme 2: Transport Infrastructure

The purpose of Programme 2 is to promote accessibility and safe and affordable movement of people, goods and services through the delivery and maintenance of transport infrastructure that is sustainable, integrated and environmentally sensitive, and which supports and facilitates social empowerment and economic growth. Programme 2 is aimed at determining the needs for the development of road, freight and public transport infrastructure, implementing maintenance programmes, providing access roads for communities to unlock economic potential, and promoting community development and eco-tourism.

This programme has been amended for the 2011/12 MTEF to conform to the revised uniform budget and programme structure for the Public Works and Transport sectors. As a result, the department has realigned its expenditure and estimates for comparative purposes. The programme originally consisted of six sub-programmes. However, it now consists of five sub-programmes in the 2011/12 MTEF, in line with the sector specific budget format, namely: Programme Support Infrastructure, Infrastructure Planning, Infrastructure Design, Construction and Maintenance.

Tables 12.19 and 12.20 below summarise the payments and budgeted estimates relating to Programme 2: Transport Infrastructure, for the financial years 2007/08 to 2013/14.

	٨	Audited Outcome			Adjusted	Revised	Medium-term Estimates		
	~				Appropriation	ppropriation Estimate		Medium-term Estimates

There has been a significant increase in the level of funding allocated to this programme over the sevenyear period under review. The increase from 2008/09 onward against the sub-programme: Programme Support Infrastructure can be attributed to the provision for administrative functions, such as planning and design of construction projects for all regions. The slight decrease in the 2010/11 Adjusted Appropriation is due to savings reprioritised as a result of the moratorium on the filling of non-critical posts to the Infrastructure Design sub-programme to cater for the higher than anticipated 2010 wage agreement. The Infrastructure Planning sub-programme increased from 2008/09 to 2009/10 due to planning undertaken for the construction of the taxi ranks and bus stations in the build-up for the 2010 World Cup, hence the drop in 2010/11. The increase over the 2011/12 MTEF is in respect of the integrated modal transport facilities such as the IPTNs.

The increase in 2009/10 against the sub-programme: Infrastructure Design relates to the design projects undertaken in respect of the 2010 World Cup. As explained earlier, the increase in the 2010/11 Adjusted Appropriation can be ascribed to funds moved from the sub-programme: Programme Support Infrastructure. The increase over the 2011/12 MTEF is due to inflationary increments in respect of annual wage agreements, as well as design projects for road and transport infrastructure including the necessary support functions, such as Environmental Impact Assessments, Traffic Impact Assessments, survey, expropriation, material investigations and testing.

The Construction sub-programme consists of *Buildings and other fixed structures*. The increase in 2008/09 includes R616.773 million that was allocated in respect of the Transport Disaster Management grant to cover the costs of repairs that resulted from the flood disaster in the South Coast area, and R30 million in respect of the Sani Pass Road grant for the upgrading of the P318 Sani Pass. The high 2008/09 amount was inflated by the over-expenditure that occurred in that year. The amount in 2009/10 includes R34.347 million to continue with the upgrading of the P318 Sani Pass. An additional R100 million was allocated for the continued construction of the John Ross Highway, the upgrading of the R102 which links the DTP and the KSIA, and the Sani Pass road in the 2010/11 Adjusted Appropriation. The slight decrease over the MTEF is in line with the national initiative to increase the maintenance budget, as explained previously.

The increase from 2008/09 onward against the sub-programme: Maintenance can be attributed to additional funding in respect of road maintenance. The increase in 2009/10 includes funding for repair to roads and infrastructure damage caused by floods in the South Coast area and R80.900 million in respect of the EPWP Incentive grant. The increase in the 2010/11 Adjusted Appropriation is due to the roll-over of R432 066 relating to the EPWP Incentive grant from 2009/10, R214.398 million allocated in the form of a Provincial Disaster Relief grant for repair to roads and infrastructure damage caused by floods in 2009/10 in the South Coast area. In addition, funds were moved from Programme 1 and Programme 5 to cater for the higher than anticipated 2010 wage agreement and to fund the R40 per month increase in the salaries of the *Zibambele* contractors from December 2010. The increase over the 2011/12 MTEF relates mainly to additional funding for the maintenance of the provincial road network.

The amount against *Software and other intangible assets* in 2008/09 was in respect of the once-off upgrade of computer software licences, and hence there are no projections made from 2009/10 onward. Amounts against *Payments for financial assets* relate to write-off of irrecoverable staff debts.

Service delivery measures – Programme 2: Transport Infrastructure

Table 12.21 illustrates some of the main service delivery measures pertaining to Programme 2: Transport Infrastructure. The performance indicators provided comply largely with the customised measures for the Public Works and Transport sectors.

Outputs		Performance indicators	Estimated performance	Medium-term targets				
			2010/11	2011/12	2012/13	2013/14

Table 12.21: Service delivery measures – Programme 2: Transport Infrastructure

6.3 Programme 3: Transport Operations

The purpose of Programme 3 is to plan, regulate and facilitate the provision of integrated land transport services through co-ordination and co-operation with national planning authorities, non-governmental organisations (NGOs) and the private sector to enhance the mobility of all communities, especially those without or with limited access, and to implement road safety education and awareness programmes.

This programme has been amended for the 2011/12 MTEF to conform to the revised uniform budget and programme structure for the Public Works and Transport sectors. As a result, the department has realigned its expenditure and estimates for comparative reasons. The programme originally consisted of seven sub-programmes. However, it now consists of three sub-programmes in the 2011/12 MTEF, in line with the sector specific budget format, namely: Programme Support Operations, Public Transport Services and Transport Safety and Compliance.

The main functions include the development of policies and plans for public and freight transport service and supporting infrastructure, the regulation of public and freight transport services, and the enforcement of legislation in respect of public transport. Tables 12.22 and 12.23 summarise payments and estimates relating to Programme 3.

	Audited Outcome			Main Appropriation	Adjusted Appropriation	Revised Estimate	Medium-term Estimates

Specialised military assets	-	-	-		-	-	-	-	-
Biological assets	-	-	-	-	-	-	-	-	-
Land and sub-soil assets	-	-	-	-	-	-	-	-	-
Software and other intangible assets	11	-	-	-	-	-	-	-	-
Payments for financial assets	•	•	8	-	•	•	•	•	-
Total	100 774	113 228	653 313	779 702	779 702	779 702	878 888	929 113	981 634

There is a significant increase against this programme from 2009/10 onward, due to the allocation in respect of the Public Transport Operations grant received from NDoT for the payment of bus subsidies to operators. This function was previously administered on an agency basis. This is allocated under the sub-programme: Public Transport Services, against *Transfers and subsidies to: Public corporations and private enterprises.*

The decrease in 2009/10 and the 2010/11 Main Appropriation against the sub-programme: Programme Support Operations and against *Goods and services* can be attributed to cost-cutting. The increase in the 2010/11 Adjusted Appropriation relates to savings reprioritised from the sub-programme: Transport Safety and Compliance due to cost-cutting, to cater for the higher than anticipated spending on contractors on project management. The increase over the 2011/12 MTEF provides for annual wage agreements, as well as inflationary increments.

The sub-programme: Transport Safety and Compliance decreased substantially in 2009/10 due to costcutting. The decrease in the 2010/11 Adjusted Appropriation is due to funds moved to the subprogramme: Programme Support Operations, as mentioned above. The increase over the 2011/12 MTEF relates to the filling of critical vacant posts and inflationary increments.

Compensation of employees increases steadily over the period under review. The slight increase in the 2010/11 Adjusted Appropriation is due to funds moved from *Goods and services* as a result of costcutting to cater for the higher than anticipated 2010 wage agreement. The increase over the MTEF is due to the filling of critical vacant posts, as well as the annual wage agreements and inflationary increments.

The amounts against *Transfers and subsidies to: Provinces and municipalities* in 2007/08 and 2008/09 were in respect of the upgrading of public transport facilities in support of the Taxi Recapitalisation Programme, as previously explained. The department used the eThekwini Metro and Msunduzi Municipality as agents for this programme, hence the amounts are reflected against this category. There are no allocations from 2009/10 onward, as the department now undertakes this function, as previously mentioned.

Service delivery measures – Programme 3: Transport Operations

Table 12.24 below illustrates some of the main service delivery measures applicable to Programme 3. The performance indicators provided comply largely with the customised measures for the Public Works and Transport sectors.

Outp	uts	s Performance indicators		Medium-term targets			
			2010/11	2011/12	2012/13	2013/14	
1.	Facilitate behavioural and attitude change of road users	No. of schools involved in road safety education	350	350	350	350	
		No. of adults trained	35 000	35 000	35 000	35 000	
		No. of school children trained	125 000	131 250	137 800	144 700	
2.	An integrated public transport system	Kilometres of public transport routes subsidised	60 000	60 000	60 000	60 000	
		Kilometres of subsidised trips monitored	36 000	36 000	36 000	36 000	

Table 12.24: Service delivery measures – Programme 3: Transport Operations

6.4 Programme 4: Transport Regulation

The purpose of this programme is to ensure the provision of a safe road environment through the regulation of traffic on public infrastructure, law enforcement and the registration and licensing of vehicles and drivers.

Estimates of Provincial Revenue and Expenditure

This programme has been amended for the 2011/12 MTEF to conform to the revised uniform budget and programme structure for the Public Works and Transport sectors. The department has realigned its expenditure and estimates for comparative purposes. The programme originally consisted of six sub-programmes. However, it now consists of four sub-programmes in the 2011/12 MTEF, in line with the sector specific budget format, namely: Programme Support Regulation, Operator Licence and Permits, Transport Administration and Licensing, and Law Enforcement.

Tables 12.25 and 12.26 below summarise payments and estimates for the period 2007/08 to 2013/14.

	Au	Audited Outcome A		Main Appropriation	Adjusted Appropriation	Revised Estimate	Medium-term Estimates

Total	356 135	444 223	479 700	546 925	559 925	559 925	619 209	666 796	719 540

The increase in 2010/11 and over the MTEF against the Programme Support Regulation sub-programme is in line with the expansion of the components in this sub-programme.

The decrease in 2008/09 against the sub-programme: Operator Licence and Permits is due to the fact that this sub-programme was considered to be adequately funded, and funds were reprioritised to the Law Enforcement sub-programme, partly because of the build-up to the 2010 World Cup. The substantial increase in the 2010/11 Main Appropriation relates to the expansion of the component. The decrease in the 2010/11 Adjusted Appropriation is due to savings reprioritised to the sub-programme: Law Enforcement to cater for the higher than anticipated 2010 wage agreement. The slight drop over the 2011/12 MTEF is in line with the amended programme and budget structure, as funds are reprioritised to the Programme Support Regulation sub-programme in respect of the expansion of the component.

The sub-programme: Transport Administration and Licensing increases steadily over the period under review, and caters for the registration and licensing of vehicles and drivers.

The increase against the sub-programme: Law Enforcement in 2008/09 can be attributed to the employment of additional traffic officers to enhance law enforcement on roads, which increased spending against *Compensation of employees*, and the extended road safety awareness campaigns conducted from the festive season onward, which are reflected against *Goods and services*. The increase in 2009/10 is due to the carry-through effect of personnel related expenditure, and *Goods and services* increases due to

costs associated with the filling of these posts. The increase in the 2010/11 Adjusted Appropriation can be attributed to funds moved from the sub-programme: Operator Licence and Permits to cater for the higher than anticipated 2010 wage agreement.

Compensation of employees increases steadily over the period under review. The high 2010/11 Adjusted Appropriation is due to savings reprioritised from *Goods and services* as a result of cost-cutting to cater for the higher than anticipated 2010 wage agreement.

The high 2009/10 amount against *Goods and services* can be attributed to the road safety campaigns undertaken to address the increase in fatalities at the start of the 2009 festive season. As explained above, the decrease in the 2010/11 Adjusted Appropriation is due to savings reprioritised to *Compensation of employees*. The increase over the 2011/12 MTEF relates to the enhanced road safety campaign that will be undertaken, costs associated with the filling of vacant posts, as well as inflationary increments.

The decrease against *Machinery and equipment* in 2009/10 can be attributed to cost-cutting. The increase in 2010/11 is due to provision for the appointment of new staff, as well as computer equipment, vehicles, etc., that are damaged or obsolete. This allocation remains constant from 2010/11 onward, as the department is not anticipating any major purchases due to cost-cutting.

Service delivery measures – Programme 4: Transport Regulation

Table 12.27 illustrates the main service delivery measures relating to Programme 4.

Outputs		es Performance indicators		Medium-term targets			
			2010/11	2011/12	2012/13	2013/14

6.5 Programme 5: Community Based Programme

The purpose of this programme is to direct and manage the implementation of programmes and strategies that lead to the development and empowerment of communities. These include the following:

- The strategic planning and monitoring of programmes to further Broad Based Black Economic Empowerment;
- Programmes to bring about the development and empowerment of impoverished communities; and
- The co-ordination of EPWP in the province.

The programme consists of four sub-programmes in the 2011/12 MTEF, in line with the sector specific budget format, namely: Programme Support Community Based, Community Development, EPWP Co-ordination and Monitoring and Innovation and Empowerment.

Tables 12.28 and 12.29 below summarise this pro-	ogramme's payments and estimates.

Total	110 799	96 775	75 309	106 627	101 232	101 232	80 131	69 485	73 150

The budget for the sub-programme: Programme Support Community Based reflects the provision for the administrative functions for community-based programmes in accordance with the revised uniform budget and programme structure for the sector. The decrease in 2009/10 is due to cost-cutting. The substantial decrease in the 2010/11 Main Appropriation is due to the department incorrectly budgeting for this sub-programme under the sub-programme: EPWP Co-ordination and Monitoring. This was corrected in the 2010/11 Adjusted Appropriation, where the funds were moved from the EPWP Co-ordination and Monitoring sub-programme to this sub-programme. The decrease over the 2011/12 MTEF is in line with the amended budget and programme structure.

The sub-programme: Community Development increases steadily over the period under review. The decrease in the 2010/11 Adjusted Appropriation can be attributed to savings moved due to cost-cutting to the sub-programme: EPWP Co-ordination and Monitoring to cater for the higher than anticipated 2010 wage agreement.

The substantial decrease in the 2010/11 Adjusted Appropriation against the EPWP Co-ordination and Monitoring sub-programme can be attributed to funds shifted to the sub-programmes: Innovation and Empowerment and Programme Support Community Based in order to correct their budgets, which were incorrectly captured under this sub-programme. Funds were also reprioritised to Programme 2 in respect of the higher than anticipated 2010 wage agreement. The increase in 2011/12 in comparison to 2012/13 and 2013/14 is due to the allocation in respect of the EPWP Incentive grant in 2011/12 only, at this stage.

The high 2007/08 amount against the sub-programme: Innovation and Empowerment was in respect of learnerships in support of the EPWP. This also explains the high amount against *Goods and services*, as the appointments are on a contractual basis, and are included as part of the project costs. The decrease from 2008/09 onward is due to the *Zibambele* contractors that were moved to the sub-programme: Maintenance under Programme 2 against *Goods and services*. A further decrease in 2009/10 is due to cost-cutting. As mentioned above, the substantial increase in the 2010/11 Adjusted Appropriation was due

to funds moved from the EPWP Co-ordination and Monitoring sub-programme to correct this sub-programme's budget.

The increase in *Compensation of employees* in the 2010/11 Adjusted Appropriation can be attributed to funds moved from *Goods and services* to cater for the higher than anticipated 2010 wage agreement, hence the increase over the 2011/12 MTEF in comparison to the 2010/11 Main Appropriation.

The low 2009/10 amount against *Machinery and equipment* is due to cost-cutting. The increase in 2010/11 and over the MTEF is in line with the appointment of new staff. However, only critical posts will be filled.

Service delivery measures – Programme 5: Community Based Programme

Table 12.30 below reflects the main service delivery measures relevant to Programme 5.

Ou	tputs	Performance indicators	Estimated	N	ledium-term targe	ts

7. Other programme information

7.1 Personnel numbers and costs

Personnel numbers per programme for full-time equivalent positions are given in Table 12.31 below for the previous and current financial years, along with estimates over the MTEF.

The increase over the MTEF is due to the department budgeting for the vote's full structure. Filling of vacant posts will be undertaken in phases over the MTEF, taking into consideration the moratorium on the filling of non-critical posts.

Personnel numbers	As at 31 March 2008	As at 31 March 2009	As at 31 March 2010	As at 31 March 2011	As at 31 March 2012	As at 31 March 2013	As at 31 March 2014
1. Administration	270	280	316	300	310	310	310

Unit cost (R thousand)	167	196	212	250	268	289	314

Estimates of Provincial Revenue and Expenditure

Table 12.32 below reflects the summary of personnel numbers in the department, specifying the number of posts in the Human Resources and Finance components, incorporating Financial Management services, SCM and associated services.

The high number of staff in 2007/08 and 2008/09 under the Finance component can be attributed to the high number of consultants employed in respect of the banking and Inter-departmental accounts in those periods and were paid for under *Compensation of employees*. The substantial decrease from 2009/10 is mainly due to the high staff turnover, as well as non-renewal of contracts. The department could not fill the vacant posts due to a review of the department's organisational structure, as well as the non-filling of non-critical vacant posts in line with the Provincial Recovery Plan. The department uses contract workers for support functions.

It is noted that the tables include information relating to the Traffic Training College and the Technical Training Centre and, as such, the amounts are far higher than the item Training and development in the *Annexure – Table 12.B.* The training budget in Programme 2 includes costs for technical training for the *Zibambele* contractors for road maintenance. The training under Programme 4 includes the costs for the Traffic Training College in respect of the training of traffic officers, and the training conducted under Programme 5 relates to training, learnerships and mentorships for the *Vukuzakhe* and EPWP projects.

The department is required by the Skills Development Act to budget at least 1 per cent of its salary expense for staff training. This requirement gives credence to government policy on human resource development. To facilitate this process, the department is affiliated to the line function Sectoral Education and Training Authority (SETA), and the Construction Education and Training Authority (CETA).

The decrease in the training budget against Programmes 1 to 4 in 2009/10 can be attributed to costcutting. The department undertook in-house training in order to control expenditure and to cater for the payment of its first charge.

The increase against Programme 5 over the same period, as well as from 2010/11 onward, relates to training with regard to learnerships in support of EPWP projects.

The increase in the training budget against Programme 1 in 2010/11 and over the MTEF relates to the increase in the training needs of the programme coupled with additional functions, arising from the revised budget and programme structure.

The increase in the training budget against Programme 2 in 2010/11 and over the MTEF is a reflection of greater emphasis being placed by the department on training for the *Zibambele* contractors within the construction and maintenance categories.

The increase in the training budget against Programme 3 in 2010/11 and over the MTEF can be attributed to training in respect of safety and compliance programmes such as road safety education, including pedestrian safety.

Similarly, the substantial increase against Programme 4 from 2010/11 onward is in respect of traffic safety programmes.

The number of personnel trained decrease from 1 835 personnel in 2007/08 to 1 600 personnel in 2013/14 due to a reduction in the number of internships offered, as well as a reduction in training opportunities in Tertiary and Seminars due to cost-cutting. The increase in the number of bursaries offered, on the other hand, reflects the initiative by the department to attract professionals, such as engineers.

ANNEXURE – VOTE 12: TRANSPORT
