Foreword

We are proud to release the *2009 Tax Statistics* publication which builds and expands on the first publication in 2008. The objectives that guided the development of the first edition were to publicise available, comprehensive tax revenue data. These objectives remain valid and underpin the contents of this publication.

Enhancements to the *2009 Tax Statistics* supports the view that fiscal transparency is a key ingredient of good governance and contributes towards evidence based and well informed policy formulation and well planned strategies and action plans. Together with other sources of comprehensive and reliable taxpayer data, contributes to improving the effectiveness of fiscal and economic policy decisions. Fiscal transparency facilitates a more effective response to changing economic conditions thereby helping to reduce the incidence and severity of economic and financial crises. The published information will also serve to inform the general public of policy choices facing government in pursuing sound economic policies to achieve our developmental objectives and financial stability.

The *2009 Tax Statistics* publication also provides the analytical framework that complements other published economic and demographic data. It provides valuable data on taxpayers, the tax base and can contribute to an understanding of the socio-economic profile of our country. The data can be used for strategic and policy decisions, not only by government but also by the private sector, academia and non-governmental organisations.

Comments on the first *Tax Statistics* published in 2008, were very positive and covered a broad range of requests for additional data and information. SARS and the National Treasury are committed to provide and publish data obtained from taxpayers through their compliance with tax legislation. Given the magnitude of data provided and recent administrative reforms implemented to enhance the quality of the data captured on the systems, this will be an evolving process with the aim to increase the availability of further and improved taxpayer data. As an outflow of the comments received more regular updates may be made available electronically throughout the year.

Acknowledgement is given to the Department of Economics at the University of Pretoria for their contribution in processing the raw data and ensuring that the data published is reliable. Finally, we want to thank the employees at SARS and the National Treasury for their efforts to ensure an updated and improved *2009 Tax Statistics* publication.

G.N.V. Magashula

Director-General: National Treasury

About this publication

This *2009 Tax Statistics* publication is an overview of tax revenues for the period 2003/04 to 2008/09 subsequent changes are available on the SARS website or in budget documentation available on the National Treasury website.

This publication is the second publication of its kind providing tax revenue data at a more disaggregated level.

Chapter 1: Overview of revenue collections provides a summary of aggregate tax revenue collection trends in South Africa.

Chapter 2: Personal income tax gives an overview of assessed personal income tax (PIT) revenues of registered individual taxpayers. It provides information on taxable income by income categories, age, gender, source of income, fringe benefits, allowances and other deductions.

Chapter 3: Corporate income tax is an overview of corporate income tax (CIT) revenues. Information on taxable income by income category, sector and type of business entity is provided.

Chapter 4: Value-added tax gives an overview of value-added tax (VAT). It gives a breakdown of VAT receipts and refunds by sector and payment category.

Chapter 5: Customs/import duties provides information on the customs value of imported goods by product type in terms of the Harmonised System¹, second digit level (chapter-level), as well as VAT, customs/import duty and *ad valorem* excise duty revenues on imported goods.

All statistics are based on the income, expenses, deductions and other items reported by taxpayers and traders in their tax returns. Information on the sector (industry) classification is based on the classification as declared by taxpayers, based on their main source of income. Trade classification data is based on the classification as declared by the trader, based on the Harmonised System.

Disaggregated income tax data is based on assessed PIT and CIT returns. Given the time delay in the submission of tax returns by some taxpayers and the time taken to assess such returns, the later years' statistics are lower than that of earlier years.

The disaggregated income tax data was extracted from SARS's systems at the end of March 2009. Where figures have not been rounded, discrepancies may occur between the numbers of the component items and the totals in the tables. A single year e.g. 2007 refers to the tax year (i.e. 1 March to end of February) and a year with a forward slash e.g. 2006/07, refers to a fiscal year (i.e. 1 April to end of March).

An electronic version of this publication (as well as the Excel tables) is available for download on both the websites of the South African Revenue Service (SARS) (www.sars.gov.za) and that of the National Treasury (www.treasury.gov.za).

¹ The Harmonised System Nomenclature, also known as the International Convention on the Harmonised Commodity Description and Coding System (Harmonised System) is, essentially, the system according to which all internationally traded products, components, or commodities are classified. This international system is currently used by 200 countries and customs or economic unions, which account for about 98 per cent of world trade.

What's new

We have endeavoured to improve the *2009 Tax Statistics* by extending the data series and available information. Some of the improvements that we have made this year include:

- A new table on capital gains tax (CGT) has been added showing the capital gains tax raised for individuals and companies separately;
- The taxable income groupings in the tables in *Chapter 3: Corporate income tax* have been regrouped to provide a more representative spread of taxable income across the income groups. The five taxable income groups of R1 to R100 000 have now been consolidated into one taxable income group and the taxable income group of R10 million and over has been expanded into six taxable income groups; and
- A glossary of terminology has been added.

Other changes include:

- For ease of reference, all tables are now included in Annexure A at the back of the publication;
- The tax register tables for both individuals and companies now exclude the coded cases where the status was in suspense, estate or address unknown; and
- The percentage assessed has been removed from *Chapter 2: Personal income tax* and *Chapter 3: Corporate income tax*.

1

Overview of revenue collections

■ Introduction

The consolidated South African tax revenue for all three spheres of government (national, provincial and local government) was an estimated 28.4 per cent of GDP or R657.7 billion in 2008/09.

The largest portion of this revenue is collected at the national level by the South African Revenue Service (SARS). This revenue is estimated to be around 95 per cent of total revenue or 27 per cent of GDP. The provinces and local government accounted for less than 1 per cent and 4.1 per cent of the total tax revenue respectively or 0.2 per cent and 1.2 per cent of GDP respectively.

This chapter gives an overview of:

- South African government revenue
- Budget revenue and revenue performance
- Tax relief
- Tax rates
- Registered taxpayers
- Main sources of tax revenue
- Tax revenue by main category.

■ South African government revenue

The three spheres of government collect both tax and non-tax revenue. Nationally budget revenue is the amount of revenue available to the state to finance expenditure after taking into account tax revenue, other revenue sources and transfers to other members of the Southern African Customs Union (SACU).

Even though the provinces and local government collect some tax revenue from gambling (casino) taxes, motor vehicle licences and property rates, the bulk of tax revenue is collected nationally.

Table 1.1 shows total South African tax revenue from the three spheres of government - national, provincial and local - with the corresponding percentages of GDP. Total South African tax revenue increased from R324.7 billion in 2003/04 to R599.6 billion in 2007/08. The total South African tax revenue as a percentage of GDP increased from 24.9 per cent in 2003/04 to 28.3 per cent in 2008/09.

Provincial tax revenues account for less than 1 per cent of total South African tax revenue, approximately 0.2 per cent of GDP. The bulk of provincial tax revenue is derived from motor vehicle licences, with some revenue being derived from gambling (casino) taxes and liquor licences. Provincial tax revenue has increased from R3.3 billion in 2003/04 to R5.4 billion in 2008/09.

1. Source: South African Reserve Bank and Statistics South Africa.

2. Provincial numbers taken from the Provincial Budgets and Expenditure Reviews. The 2008/09 numbers are pre-audited.

3. Local government numbers taken from the Local Government Budgets and Expenditure Review. The financial year of the municipalities starts on 1 July to 30 June of the following year. The 2008/09 numbers are budgeted. The regional service council levies were abolished in 2006/07.

The contribution of local government (municipal) own tax revenue has decreased from 5.8 per cent in 2003/04 to around 4.1 per cent of total South African tax revenue in 2008/09. The decrease was mainly due to the abolition of the Regional Services Council (RSC) levies in 2006/07. Local government tax revenue accounts for around 1 per cent of GDP. Local government tax revenue is derived from property rates and RSC levies prior to 2006/07. Table A.1.1¹ provides a breakdown of provincial and local government tax revenues.

The rest of this publication focuses on national taxes only, as provincial and local government taxes are reported in other publications, namely the *Local Government Budgets and Expenditure Review* and the *Provincial Budgets and Expenditure Review*. Both are available on National Treasury's website (www.treasury.gov.za).

Budget revenue and revenue performance

National budget revenue consists of national tax revenue, and non-tax revenue less payments to Botswana, Lesotho, Namibia and Swaziland (BLNS countries) in terms of the Southern African Customs Union (SACU) agreement. About 98 per cent of budget revenue is accounted for by tax revenue whilst the remaining 2 per cent is non-tax revenue (Table 1.2). National budget revenue has increased as a percentage of GDP from 23 per cent in 2003/04 to 26.2 per cent in 2008/09.

¹ Tables numbered in italics are included in Annexure A.

Gross nominal tax revenue increased from R302.4 billion in 2003/04 to R625.1 billion in 2008/09, a nominal percentage increase of 15.6 per cent per year.

Table 1.2: Total budget revenue, 2003/04 – 2008/09

1. Mining leases and ownership has been reclassified as non-tax revenue. The historical years have been adjusted for comparative purposes.

2. Includes interest, dividends, rent on land, sales of goods and services, fines and penalties, sales of capital assets as well as financial transactions in assets and liabilities.

3. Source: Statistics South Africa; Gross Domestic Product (GDP), 3rd Quarter 2009.

The Southern African Customs Union

South Africa is one of the five signatories to the SACU agreement, along with Botswana, Lesotho, Namibia and Swaziland. The SACU countries apply a common external tariff and have similar customs and excise legislation, the same excise duties on imported and locally manufactured goods and the same import duties on imported goods. Excise and customs (import duty) revenues are pooled and distributed among the SACU members based on a formula. South Africa currently administers this revenue pool and makes quarterly payments to the BLNS countries.

Table 1.3 is a summary of contributions “paid into” the SACU pool by the individual countries. South Africa collects a significant amount of customs and excise revenues on behalf of BLNS countries. Customs duties are paid to South Africa on goods imported by BLNS countries from abroad and transported via South Africa in bond to the BLNS countries. Excise duty is collected at source and paid in South Africa on excisable goods exported from South Africa to BLNS countries.

Table 1.3: Contributions to SACU pool, 2003/04 – 2008/09

1. Includes amounts allocated to South Africa, the balance of the "surplus/deficit" for that fiscal year and allocations to the SACU Secretariat.

Tax relief

Both individuals and companies have benefited from the tax relief over the last few years. However, most of the tax relief has accrued to individuals. Table 1.5 provides a summary of tax relief.

Table 1.5: Summary of tax relief, 2003/04 – 2008/09

R million	Direct taxes				Indirect taxes				Total relief
	PIT	CIT	Other	Total	Excise	Fuel levy	Other ¹	Total

2008/09	-7 700	-7 400	–	-15 100	1 350	1 250	2 000	4 600	-10 500

1. The 2006/07 number includes R4.5 billion transfer duties. The electricity levy was not introduced in 2008/09.

Changes in tax policy between 2003/04 and 2006/07 included significant personal income tax relief, through adjustments to the personal income tax brackets and the primary and secondary rebate thresholds, and a marginal reduction in the headline corporate income tax rate.

The effectiveness of tax administration continued to improve during this period. This was supported by measures to improve the fairness of the tax system by closing down various tax loopholes and enhanced efforts at ensuring tax compliance.

■ Tax rates

Most of the maximum marginal tax rates for the major tax instruments have also been reduced over the period (see Table 1.6)². The headline CIT rate was reduced from 30 per cent to 28 per cent. The maximum PIT tax rate has remained constant at 40 per cent. PIT relief was provided over the last five years by significantly adjusting the income tax brackets while leaving the marginal tax rates unchanged.

Table 1.6: Maximum marginal tax rates, 2003/04 – 2008/09

Percentage	PIT ¹	CIT	STC	VAT	RFT ²
01 Apr 2003 – 31 Mar 2004	40.0%	30.0%	12.5%	14.0%	18.0%
01 Apr 2004 – 31 Mar 2005	40.0%	30.0%	12.5%	14.0%	18.0%
01 Apr 2005 – 28 Feb 2006	40.0%	29.0%	12.5%	14.0%	18.0%
01 Mar 2006 – 31 Mar 2006	40.0%	29.0%	12.5%	14.0%	9.0%
01 Apr 2006 – 28 Feb 2007	40.0%	29.0%	12.5%	14.0%	9.0%

1. An individual's tax year starts on 1 March and ends at the end of February the following year.

2. Tax on retirement funds.

■ Tax revenue collections

Between 2004/05 and 2007/08, tax revenue collections have exceeded budget estimates. This strong revenue performance was the result of robust economic growth, higher commodity prices and improvements in the effectiveness and efficiency of tax administration. In 2008/09 SARS, like numerous other tax authorities around the world, struggled to meet its revenue collection target. This was mainly due to the severe global economic crises and instability in financial markets that resulted in a significant contraction of the South African economy during the second half of the fiscal year.

Figure 1.1 Net quarterly tax revenue collections, 2003/04 – 2008/09

² Consult the SARS website and budget documentation on the National Treasury's website for subsequent changes.

Figure 1.1 and *Table A1.2.1* show the monthly and quarterly trends in the collection of tax revenues. The peaks in the different quarters, namely June, September, December and March, are largely due to provisional corporate tax payments.

Operating cost of SARS

The operating cost to revenue ratio is an indication of the efficiency with which revenue is collected. However, this ratio is influenced by the tax bases of the different taxes collected and systems development costs. *Table 1.7* shows that this ratio is around 1 per cent.

Table 1.7: Total tax revenue and cost of collections, 2003/04 – 2008/09

R million	Tax revenue collected	Operating cost ¹	Operating cost as a % of tax revenue
2003/04	302 442.6	3 562.8	1.18%
2004/05	354 978.8	4 311.7	1.21%
2005/06	417 195.7	5 135.5	1.23%
2006/07	495 548.6	5 156.1	1.04%
2007/08	572 814.6	5 615.3	0.98%
2008/09	625 100.2	6 528.1	1.04%

1. SARS's own account budget includes revenue transferred from National Treasury as well as other operating revenue.

Registered taxpayers

The South African income taxation system is a residence based system, which means residents are taxed on their worldwide income, irrespective of where their income was earned. Non-residents are, however, taxed on their income from a South African source. Foreign taxes on foreign income are credited against South African income tax payable.

The number of taxpayers registered as individuals, companies and trusts for income tax, employers for pay-as-you-earn (PAYE) and vendors for VAT are shown in *table 1.8*. It must be noted that the figures for registered taxpayers for income tax purposes exclude individual taxpayers earning less than R60 000 who are paying standard income tax on employees (SITE)-only.

Table 1.8: Registered taxpayers, 2003/04 – 2008/09

Number	Individuals ¹ (CIT) ¹	Companies	Trusts ¹	PAYE ¹	VAT ¹
2003/04	3 777 005	817 381	283 825	274 764	536 281
2004/05	4 115 293	933 136	318 967	302 880	578 138
2005/06	4 476 261	1 054 969	344 882	330 194	633 703
2006/07	4 764 105	1 218 905	374 411	349 077	677 153
2007/08	5 204 805	1 584 002	384 747	379 675	745 487
2008/09	5 540 646	1 834 009	392 260	393 974	737 885
Percentage year-on-year growth					
2003/04	10.6%	0.3%	11.5%	8.8%	6.0%
2004/05	9.0%	14.2%	12.4%	10.2%	7.8%
2005/06	8.8%	13.1%	8.1%	9.0%	9.6%
2006/07	6.4%	15.5%	8.6%	5.7%	6.9%
2007/08	9.3%	30.0%	2.8%	8.8%	10.1%
2008/09	6.5%	15.8%	2.0%	3.8%	-1.0%

1. Excludes cases where status is in suspense, estate and address unknown.

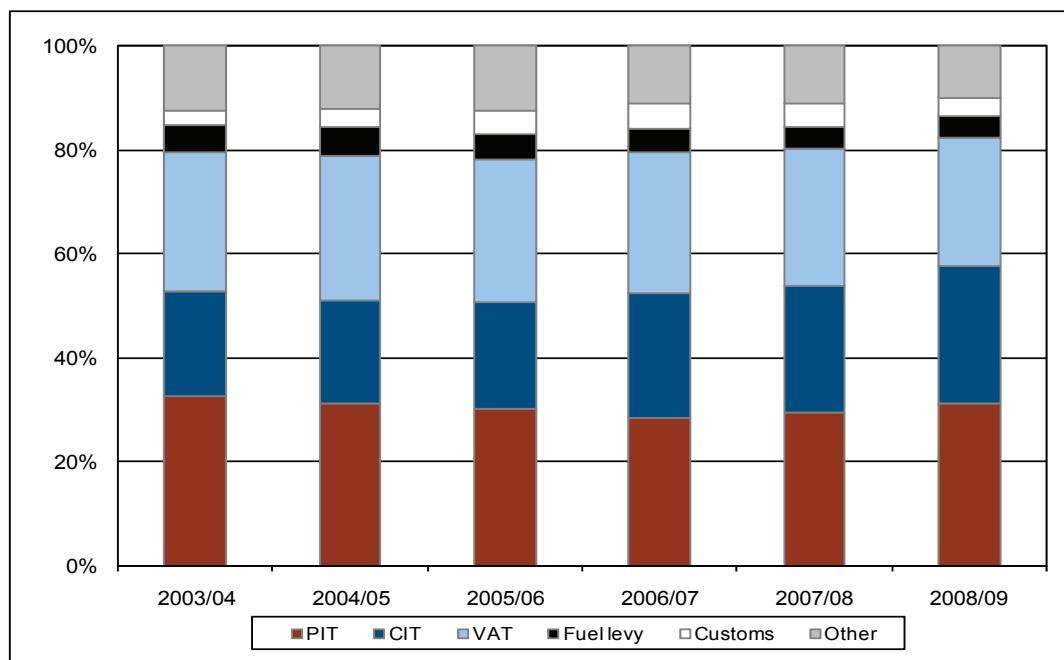

The tax year for individuals starts on 1 March and ends at the end of February the following year. The tax year for companies is normally the financial year of the company for financial reporting purposes.

- *Individuals:* The number of registered individual taxpayers has increased from 3.8 million in 2003/04 to over 5.5 million taxpayers in 2008/09. The percentage year-on-year growth has declined from 10.6 per cent in 2003/04 to around 6.5 per cent in 2008/09. The moderate growth rate can be attributed to the adverse impact of the global economic crisis on the domestic economy, affecting key industries and giving rise to limited new opportunities in the labour market.
- *Companies:* The number of companies registered for income tax doubled from 817 381 in 2003/04 to over 1.8 million in 2008/09. The percentage year-on-year increase ranges from 0.3 per cent in 2003/04 to a high of 30 per cent in 2007/08 and then decreasing to 15.8 per cent in 2008/09. This may be due to adverse economic conditions.
- *Trusts:* The rate of registration of trusts has dropped over the last few years from 12.4 per cent in 2004/05 to 8.6 per cent in 2006/07 and to 2 per cent in 2008/09. This could reflect a change as far as financial planning via trusts is concerned.
- *PAYE:* The PAYE register grew by only 3.8 per cent from 2007/08 to 2008/09. The slowdown in the growth rate can be attributed to the poor economic conditions. SARS also undertook a register clean-up project which aimed to identify and remove from the register those entities that are no longer active thereby affecting the growth rate of the register.
- *VAT:* Although the number of registered VAT vendors has increased significantly over the previous years from 536 281 in 2003/04 to 745 487 in 2007/08, this number decreased by 1 per cent to 737 885 in 2008/09. The decrease was due to the register clean-up project initiated by SARS and to the slowdown in the economy.

■ Main sources of tax revenue

National tax revenues are derived from three major taxes: personal income tax (PIT), corporate income tax (CIT) and value-added tax (VAT). Combined, these account for around 80 per cent of total tax revenue, with the fuel levy, excise and customs duties accounting for around 11 per cent and other taxes accounting for the remainder (around 9 per cent).

Figure 1.2 Composition of main sources of tax revenue, 2003/04 – 2008/09

The contribution of the different types of taxes as a percentage of total tax revenue collections has changed over time (See *table A1.3.1* and figure 1.2). PIT, as a percentage of total tax revenue, has decreased from 32.6 per cent in 2003/04 to 28.4 per cent in 2006/07 and then increased to 31.2 per cent in 2008/09.

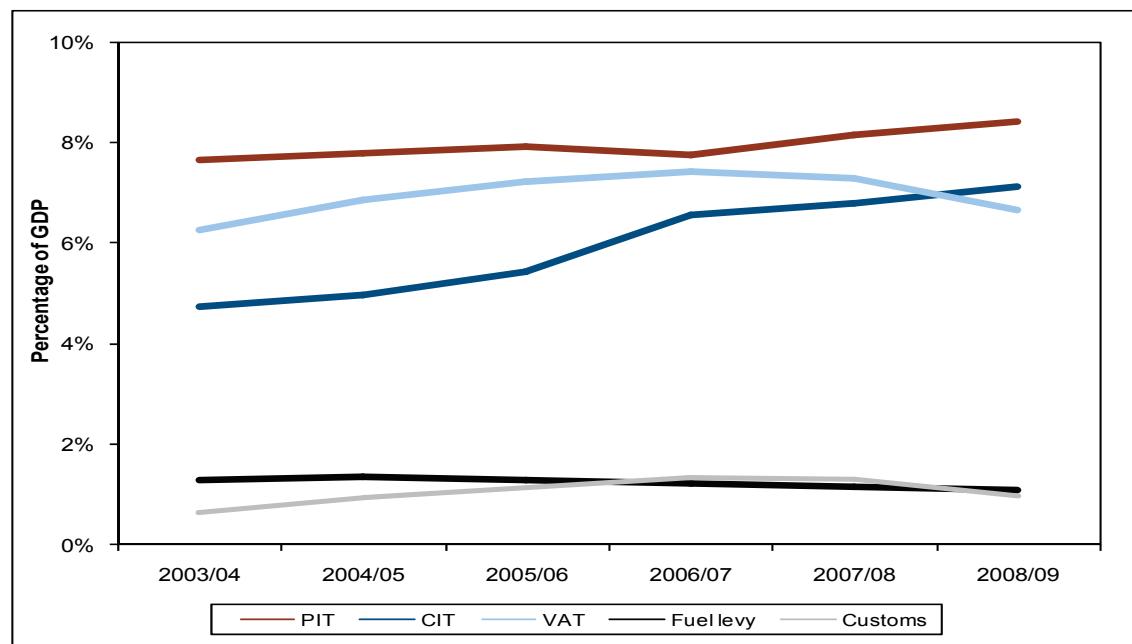

CIT, on the other hand, has increased as a percentage of total tax revenue from 20.1 per cent in 2003/04 to 26.5 per cent in 2008/09. Nominal corporate income tax revenue increased from R60.9 billion in 2003/04 to R165.4 billion in 2008/09, a cumulative percentage increase of 171.6 per cent or 22.1 per cent per year. The headline corporate income tax rate was reduced from 29 per cent in 2005/06 to 28 per cent in 2008/09. Thus, corporate income tax revenue increased while the headline corporate income tax rate decreased.

Nominal customs revenue have also increased cumulatively by 171.6 per cent between 2003/04 and 2008/09, or by 22.1 per cent per year, while revenue from the general fuel levy increased cumulatively by only 49.4 per cent between 2003/04 and 2008/09, or 8.4 per cent annually.

It should be noted that these numbers and percentages include inflation. Much of the increase in nominal tax revenue has been due to higher economic growth, higher commodity prices, improved tax administration and tax compliance.

Figure 1.3 shows the main sources of tax revenue as a percentage of GDP. PIT, as a percentage of GDP has been fluctuating at around 7.8 per cent over the past few years and is slightly up to 8.4 per cent in 2008/09. CIT, as a percentage of GDP, has shown a steady improvement from 4.7 per cent in 2003/04 to 7.1 per cent in 2008/09. VAT, as a percentage of GDP, was 6.3 per cent in 2003/04 increasing to 7.3 per cent in 2007/08 and then decreasing to 6.7 per cent in 2008/09 showing the early affects of the slowdown in the economy during the second half of 2008/09.

Figure 1.3 Main revenue sources as percentage of GDP, 2003/04 – 2008/09

■ Tax revenue by main category

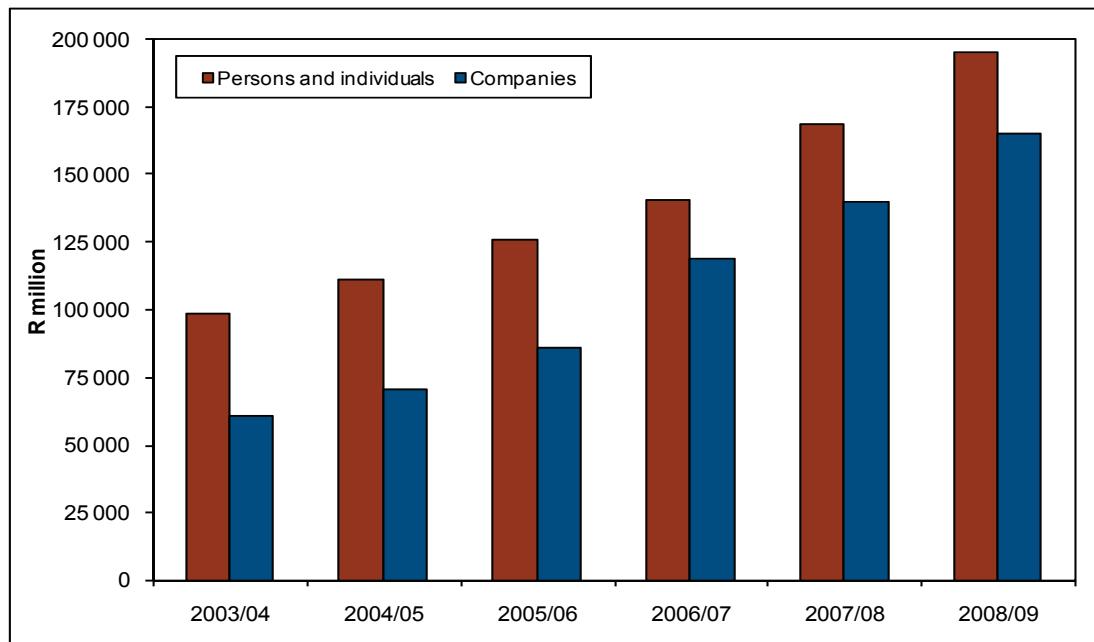

Table A1.4.1 shows tax revenue by main category.

Taxes on income and profits

Table A1.5.1 shows that taxes on income and profits comprise of the following tax instruments:

- *Persons and individuals*: Income tax is the government's main source of income and is levied in terms of the Income Tax Act (1962). Income tax is levied on residents' worldwide income, with appropriate relief to avoid double taxation. Non-residents are taxed on their income from a South African source. Tax is levied on taxable income that, in essence, consists of gross income less exemptions and allowable deductions. *Table A1.5.2* shows that on average around 95.3 per cent of taxes on persons and individuals is collected via the PAYE system (See Figure 1.4).

Figure 1.4 Taxes on income and profits – PIT and CIT, 2003/04 – 2008/09

- *Companies*: *Table A1.5.3* shows the breakdown of corporate income taxes. Revenue from taxes on companies have nearly tripled from R60.9 billion in 2003/04 to R165.4 billion in 2008/09 (See Figure 1.4).
- *Capital gains tax (CGT)*: CGT was introduced on 01 October 2001. CGT forms part of the income tax system (collections are reflected under persons and individuals, and companies) and is based on capital gains made on the disposal of assets. *Table 1.9* shows that CGT revenue has been rising since its inception in 2001, with a significant increase in 2008/09 that was probably as a result of increased asset disposals as taxpayers tried to adapt to harsh economic conditions of the worldwide recession.

Table 1.9: Capital gains tax raised, 2003/04 – 2008/09

R million	Capital gains tax raised		
	Individuals	Companies	Total
Prior to 2007/08	1 849.6	3 241.4	5 091.0
2007/08	1 167.3	2 493.6	3 660.9
2008/09	3 806.7	4 135.9	7 942.7

- *Secondary tax on companies (STC)*: STC is levied at a rate of 10 per cent (12.5 per cent prior to 1 October 2007) on profits of companies distributed by way of dividends.
- *Tax on retirement funds (TRF)*: TRF was a tax levied on the gross interest, net rental and foreign dividend income of retirement funds - in other words, pension, provident and retirement annuity funds. TRF was abolished in 2007.
- *Other*: Includes proceeds from the small business tax amnesty levy.

Taxes on payroll and workforce

- *Skills development levy*: The skills development levy is a compulsory levy to fund training by companies. SARS administers the collection of this levy in consultation with the Department of Labour. The rate is 1 per cent of a company's total payroll and is payable by employers that are registered with SARS for employees' tax purposes and which have an annual payroll of more than R500 000 (R250 000 before 1 August 2005).

Taxes on property

Table A1.6.1 shows that taxes on property comprise the following tax instruments:

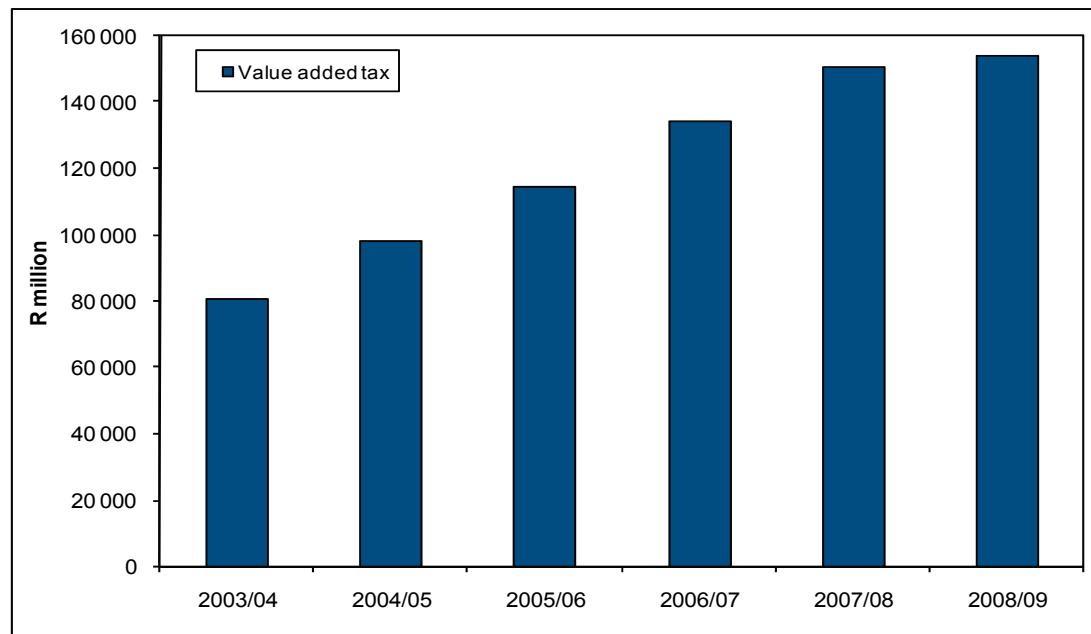

- *Donations tax*: Donations tax is levied at a flat rate of 20 per cent on the value of the donation. The first R100 000 donated in each year by a natural person is exempt from donations tax. In the case of a taxpayer who is not a natural person, the exempt donations are limited to casual gifts not exceeding R10 000 per year in total. Dispositions between spouses and donations to certain public benefit organisations are exempt from donations tax.
- *Estate duty*: For the purposes of estate duty, an estate consists of all property of the deceased including deemed property, such as life insurance policies. However, the estate of a deceased non-resident consists only of his or her South African assets. The duty, at a rate of 20 per cent, is calculated on the dutiable amount of the estate. Certain admissible deductions from the total value of the estate are allowed.
- *Securities transfer tax (STT)*: STT is a tax levied on every transfer of a security. A security in essence means any share in a company; member's interest in a close corporation; or any right or entitlement to receive any distribution from a company or close corporation. Only securities issued by companies incorporated, established or formed inside the Republic; and companies incorporated, established or formed outside the Republic, which are listed on a South African exchange, are taxable. The Securities Transfer Tax Act is effective from 1 July 2008 and applies to the transfer of listed and unlisted securities on or after 1 July 2008. It is levied at a rate of 0.25 per cent. This tax was known as Marketable securities tax prior to 2006/07 and as Uncertificated securities tax prior to 1 July 2008.
- *Transfer duties*: Transfer duty is payable by individuals when they acquire property at the rate of 5 per cent of the value above R500 000 and at 8 per cent of the value exceeding R1 million. When property is acquired by a person other than an individual, such as a company or trust, transfer duty is payable at a rate of 8 per cent of the value. All transactions relating to the supply of goods (property) that are subject to VAT are exempt from transfer duty.

Domestic taxes on goods and services

Table A1.7.1 shows that domestic taxes on goods and services comprise of the following tax instruments:

- *Value-added tax (VAT)*: VAT is levied at a standard rate of 14 per cent on most goods and services subject to certain exemptions, exceptions and zero-ratings, provided for in the Value-Added Tax Act (1991). VAT is levied on the supply of all goods and services rendered by registered vendors. VAT is also levied on the importation of goods and services into South Africa. (See table A1.7.2 and figure 1.5.)

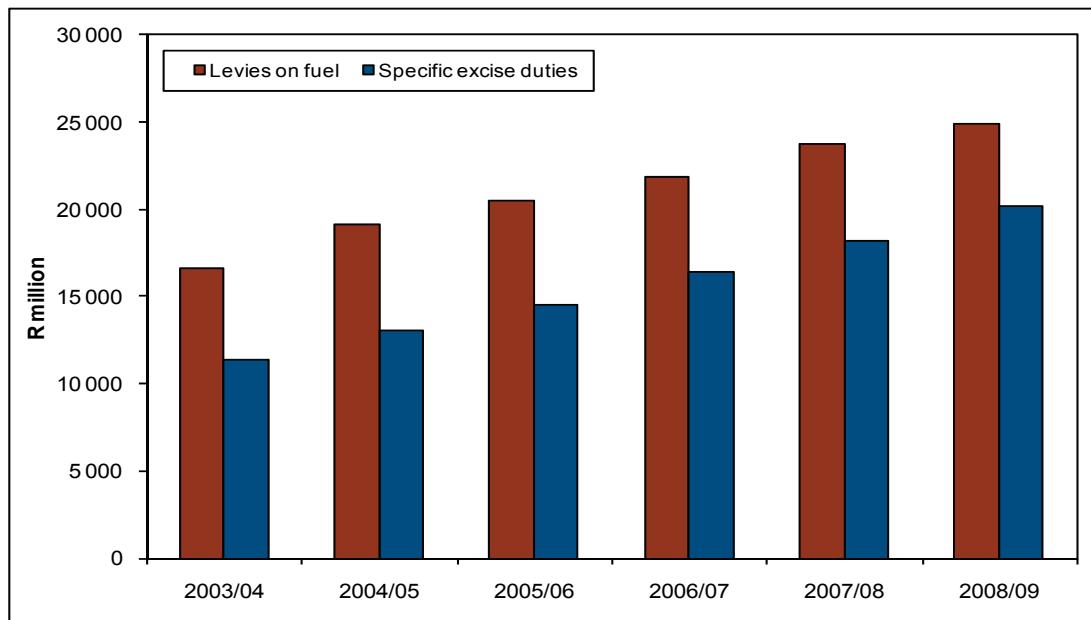

Figure 1.5 Domestic taxes on goods and services – VAT, 2003/04 – 2008/09

- *Excise duties*: Excise duties are levied on certain locally manufactured goods and on their imported equivalents. This duty is levied as a specific duty on tobacco and liquor, and as an *ad valorem* duty on cosmetics, televisions, audio equipment and motor cars. Relief from excise duty is available where excisable products are exported (See figure 1.6.).
- *Fuel levy*: The fuel levy is a specific excise tax imposed in terms of the Customs and Excise Act. Relief is available through a diesel refund system for farming activities, forestry, mining, offshore vessels, harbour vessels, locomotives used for rail freight, and large electricity generation plants (See figure 1.6.).
- *International air passenger departure tax*: Fee-paying passengers departing on international flights paid a tax of R120 per passenger³ and passengers flying to Botswana, Lesotho, Namibia and Swaziland paid R60 per passenger³.
- *Plastic bags levy -* : This environmental levy is a tax on certain types of plastic shopping bags. The levy aims to encourage the sustainable use of these bags.

³ As from 1 October 2009, this has increased to R150 and R80 per passenger for international and BLNS travel respectively.

Figure 1.6 Domestic taxes on goods and services – Levies on fuel and specific excise duties, 2003/04 – 2008/09

Taxes on international trade and transactions

Taxes on international trade and transactions mainly comprise of customs duties:

- *Customs duties*: Customs or import duties are levies imposed on goods imported into South Africa. Import duties are imposed as a means to protect certain local producers. They also include anti-dumping and countervailing duties.
- *Miscellaneous customs revenue*: This primarily comprises customs duties that have yet to be allocated to the appropriate duty types.

Stamp duties and fees

- Stamp duty is levied on leases of fixed property and until June 2008 on the registration of transfer of unlisted marketable securities. This tax has been abolished with effect from 1 April 2009.

State miscellaneous revenue

- This is revenue received by SARS in respect of taxation that cannot be allocated to specific revenue types.

2

Personal income tax

■ Introduction

Personal income tax (PIT) is government's largest source of revenue. Income tax is levied on residents' worldwide income, with appropriate relief to avoid double taxation. Non-residents are taxed on their income from a South African source. Tax is levied on taxable income that, in essence, consists of gross income less exemptions and allowable deductions. Taxable capital gains also form part of taxable income.

Individuals generally receive most of their income as salary/wages, pension/retirement payments and investment income (interest and dividends). Some individuals may also have business income which is taxable as personal income, for example, sole proprietors and partners.

This chapter gives an overview of:

- Personal income tax rates
- Tax returns and individual taxpayers
- Taxable income and tax assessed
- Individual taxpayers with business income
- Individual taxpayers' allowances, fringe benefits and deductions.

■ Personal income tax rates

The top marginal income tax rate for individuals has remained constant at 40 per cent over the last few years although the personal income tax brackets were increased significantly which has compensated taxpayers for inflation (fiscal drag).

Table 2.1 illustrates the percentage increase in the personal income tax brackets between 2003/04 and 2008/09. The top personal income tax bracket increased from R255 001 in 2003/04 to R490 001 in 2008/09, a cumulative increase of 92.2 per cent. During this period, the bottom income tax bracket increased by 74.3 per cent. The primary rebate increased by 53.3 per cent, which resulted in a similar increase in the income tax threshold (the level of annual income below which no income tax is payable) for individuals younger than 65 years from R30 000 to R46 000 per year. For individuals aged 65 and above, the income tax threshold increased by 56.7 per cent from R47 222 to R74 000 per year.

From 2003/04 to 2008/09, R53.3 billion was granted in personal income tax relief across the board, for all income groups. The decreases in the individual tax burdens improved the disposable income of taxpayers.

Table 2.1: Personal Income Tax (PIT) brackets, 2003/04 and 2008/09

Rand	2003/04		2008/09		Marginal PIT rates	Cumulative percentage increase
Brackets	–	70 000	–	122 000	18%	74.3%
	70 001	110 000	122 001	195 000	25%	77.3%
	110 001	140 000	195 001	270 000	30%	92.9%
	140 001	180 000	270 001	380 000	35%	111.1%
	180 001	255 000	380 001	490 000	38%	92.2%
	255 001	and over	490 001	and over	40%	
Rebates						
Primary		5 400		8 280		53.3%
Secondary		3 100		5 040		62.6%
Tax thresholds						
Below age 65		30 000		46 000		53.3%
Age 65 and over		47 222		74 000		56.7%

Tax returns and individual taxpayers

It should be noted that information on the number of individual taxpayers relates only to those taxpayers who are required to register with SARS. A large number of formal sector workers – those earning taxable income between the minimum tax threshold of R46 000 in 2008/09 for persons below 65 years of age and R60 000 per annum (commonly referred to as standard income tax on employees (SITE)-only taxpayers) – are not required to register with SARS. There are an estimated 5 million formal SITE workers with their annual taxable income below R60 000.

Employees who pay SITE-only normally do not need to register for income tax or submit tax returns. The tables do, however, reflect some of these registered individual taxpayers with their taxable income below R60 000. A few individual taxpayers in this category are in fact registered due to claims for retirement fund contributions or medical expenses, prior year trading income or other non-SITE income, or assessed losses brought forward from previous tax years.

In addition, from the 2008 tax season (in respect of 2007/08) registered taxpayers earning remuneration below R120 000 per annum, with only a single IRP5 and no additional income or deductions, were not obliged to submit tax returns.

The number of individuals registered for income tax (excluding SITE-only taxpayers as indicated above) has grown from under 4.5 million in 2005 to 5.5 million in 2008 (See table 2.2). Subsequent to growing at a rate of 8.8 per cent in 2005 this rate levelled to around 6.5 per cent in 2008. It is important to note that this table differs from the table in the *2008 Tax Statistics* in that it excludes the coded cases where the status was either in suspense, estate or domicile unknown.

Table 2.2: Number of Individual taxpayers, 2005 – 2008

Tax year	Registered ¹	Percentage growth in register	Assessed
2005	4 476 261	8.8%	3 806 986
2006	4 764 105	6.4%	3 856 999
2007	5 204 805	9.3%	3 580 314
2008	5 540 646	6.5%	2 611 364

1. Number of individuals registered as at 31 March of each year.

■ Taxable income and tax assessed

Table 2.3 shows a summary of the number of taxpayers assessed, taxable income and tax assessed by taxable income group. The tax assessed as a percentage of taxable income has remained stable at around 21.7 per cent over the period.

Table 2.3: Individual taxpayers: Summary of taxable income and tax assessed, 2005 – 2008

Tax year	Number of taxpayers assessed	Taxable income (R million)	Tax assessed (R million)	Tax assessed as a % of taxable income
2005	3 806 986	441 507	95 994	21.7%
2006	3 856 999	496 949	107 918	21.7%
2007	3 580 314	537 137	113 546	21.1%
2008	2 611 364	485 055	105 978	21.8%

The total number of individual taxpayers has remained relatively stable during the period under review with a slight tapering-off in numbers during 2007, the reason being that relatively fewer tax returns had been assessed at the time the data was extracted. Taxable income and as a result, the tax assessed have increased. The tax burden as indicated by the tax assessed as percentage of taxable income has also remained relatively unchanged over the period under review.

Within the different taxable income groups, there have, however, been significant changes as indicated in Table 2.4. For the taxable income groups up to R150 000, the number of taxpayers, their taxable income and the tax assessed, expressed as a percentage of the total of these categories, have declined considerably. In contrast, increases occurred in both the number of taxpayers and tax assessed in the R150 000 and above taxable income groups.

Table 2.4: Distribution of individual taxpayers over selected taxable income groups, 2005 – 2008

Percentage	Taxable income group	2005	2006	2007	2008
Number of taxpayers	0 – R150 000	78.3%	75.2%	69.7%	58.7%
	R150 001 – R400 000	18.3%	20.6%	24.6%	33.2%
	R400 001 +	3.3%	4.2%	5.6%	8.1%
Total		100.0%	100.0%	100.0%	100.0%
Taxable income	0 – R150 000	43.0%	38.7%	32.9%	24.4%
	R150 001 – R400 000	35.7%	36.3%	37.5%	41.0%
	R400 001 +	21.3%	25.0%	29.6%	34.7%
Total		100.0%	100.0%	100.0%	100.0%
Tax assessed	0 – R150 000	26.5%	22.6%	17.4%	12.3%
	R150 001 – R400 000	40.0%	38.5%	36.8%	36.7%
	R400 001 +	33.5%	38.9%	45.7%	51.0%
Total		100.0%	100.0%	100.0%	100.0%

The table shows that during the 2007 tax year, the 69.7 per cent of taxpayers that were in the taxable income group up to R150 000, earned 32.9 per cent of taxable income and contributed 17.4 per cent of total tax assessed. The remaining 30.3 per cent were in the taxable income group of R150 000 and above, earned 67.1 per cent of taxable income and contributed 82.6 per cent of total tax assessed.

Further detail by taxable income group is provided in *table A2.1.1*¹ and *table A2.1.2*.

¹ Tables numbered in italics are included in Annexure A.

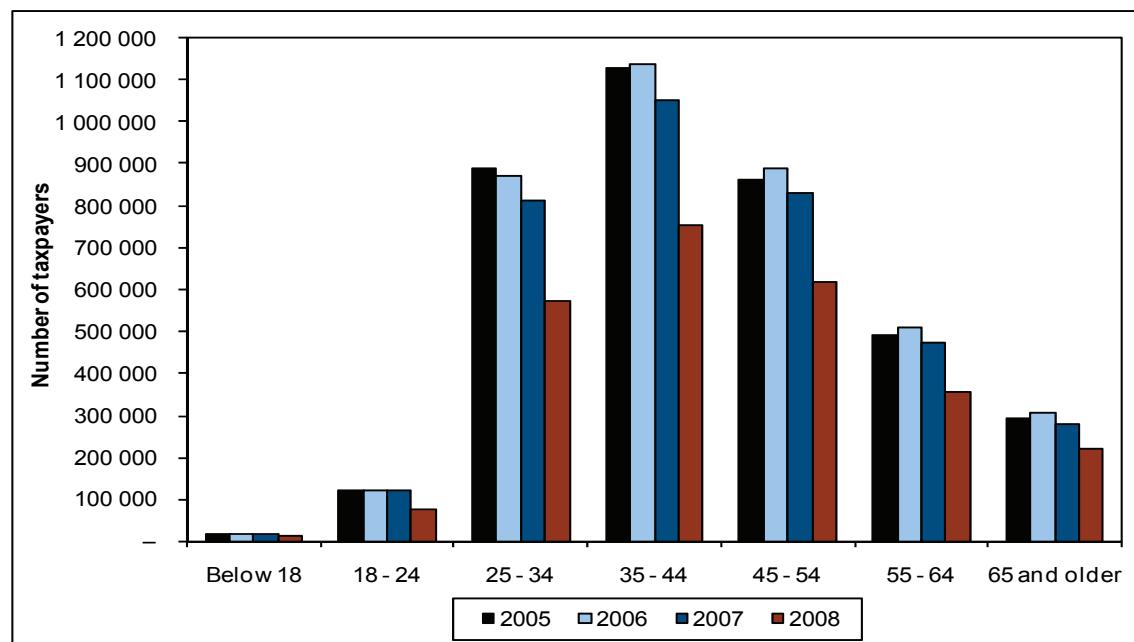

By province

The relative distribution of taxpayers, taxable income and tax assessed between provinces has been stable over the period under review. Nonetheless, there has been a decline in the relative share of personal income tax assessed in the Eastern Cape and a slight increase in Gauteng. Some 70 per cent of individual taxpayers are registered in three provinces (Gauteng, Western Cape and KwaZulu-Natal) and are responsible for about 80 per cent of the total tax assessed (see *Table A2.1.3*).

By age group

Table A2.1.4 and figure 2.1 give a breakdown of registered individual taxpayers by age group.

Figure 2.1 Numbers of individual taxpayers by age group, 2005 – 2008

The relative contributions of the different age groups of taxpayers show little change over the period. About 30 per cent of taxpayers fall in the 35 to 44 age group. Together this group earns about a third of the total taxable income and is responsible for a third of the total tax assessed.

By gender

In the 2007 tax year the gender classification indicates that males account for more than 56 per cent of taxpayers, they earn about 65 per cent of taxable income and contribute over 71 per cent of personal income tax assessed.

The data, however, show that between 2005 and 2007 the number of female taxpayers has increased slightly from 42 per cent to nearly 44 per cent of the total number of taxpayers. This compares with the 44 per cent that females made up of the number of employed persons in South Africa in 2007².

Table A2.1.5 shows the breakdown of taxable income and tax assessed by gender over the period.

² Statistics South Africa: Labour Force Survey, Revision, March 2009.

By source of income

Registered individual taxpayers employed in the Financing, insurance, real estate and business services sector account for the largest number of taxpayers and also make the largest contribution to tax assessed, both at about 20 per cent for the period under review.

At economic activity level, Finance, insurance, real estate and business services; Agencies and other services; Educational services; and Long-term insurance sectors employ just over 50 per cent of taxpayers and contributed close to 50 per cent of total tax assessed (*Tables A2.2.1 to table A2.2.2*).

Table A2.2.3 uses SARS's source of income codes, as in *table A2.2.1*, and attempts to reclassify these codes according to the Standard Industrial Classification (SIC). It should be noted that the source of income codes by SARS are not fully aligned with the SIC system used by Statistics SA. This means that the numbers per sector in these tables may differ from those published by Statistics South Africa.

Tax assessed by source of income as on IRP5 certificates (*Table A2.2.4*). This is based on the sector as indicated by the employer on the employee's IRP5 form.

■ Individual taxpayers with business income

Individual taxpayers with business income amounted to about 3.7 per cent of total individual taxpayers in 2007 (6.4 per cent of the total in 2005). Individual taxpayers with business income contribute almost a third to total assessed income (31.6 per cent in 2007) in the Financing, insurance, real estate and business services sector. This equates to 18.6 per cent of the total taxpayers with business income and is closely followed by the Medical, dental and other health and veterinary sciences sector, at 17.4 per cent of total assessed income and 25.3 per cent of total taxable income.

Tables A2.3.1 and A2.3.2 give a breakdown of the sectors in which individual taxpayers with business income are active. On average, around 22 per cent of individual taxpayers with business income recorded negative taxable income (making a loss) over the period.

■ Individual taxpayers' allowances, fringe benefits and deductions

Individual taxpayers' allowances

Table A2.4.1 provides a summary of the tax allowances available to individual taxpayers. The number of individual taxpayers who receive tax allowances increased from over 1.8 million (49.5 per cent of total number of individual taxpayers) in 2005 to close to 2 million (55.7 per cent) in 2007. Between 2005 and 2007, these allowances increased by 15.7 per cent to R50.1 billion.

The travel allowances remained the largest of all the allowances for individuals (55 per cent in 2007), but the number of taxpayers receiving it as well as the total amount of the allowance has decreased during the period under review. The drop in the share of this allowance from 65.1 per cent in 2005 can be partly explained by the changes introduced in 2006 to curb the rise in the granting of a travel allowance. This allowance should decrease significantly when the deemed business kilometre allowance is scrapped in 2010/11.

While the numbers of taxpayers who made use of share options nearly doubled between 2005 and 2007, the amount allowed nearly tripled to R7.3 billion during the same period, increasing to 14.6 per cent of all allowances in 2007 compared to 5.8 per cent in 2005.

The more significant allowances are shown per taxable income group in *tables A2.4.2 to A2.4.7*.

Individual taxpayers' fringe benefits

Table A2.5.1 provides a summary of fringe benefits. The number of taxpayers receiving fringe benefits was 1.2 million in 2005, growing to over 1.5 million in 2006. Total fringe benefits amounted to R7.8 billion in 2005, increasing to R11.7 billion in 2006.

Medical scheme contributions paid on behalf of employees remained the largest of the fringe benefits. In 2007, 56.5 per cent of taxpayers (over 870 000) who qualified for any form of fringe benefit received a medical fringe benefit. During 2007, the monetary value of this benefit nearly doubled to R5.5 billion (46.9 per cent of total fringe benefit payments).

The stricter rules pertaining to fringe benefits in respect of motor vehicles were also reflected by the decline in the number of taxpayers who benefited from the use of a company motor vehicle. As a percentage of the total number of taxpayers who received fringe benefits, the decline was from 9.4 per cent in 2005 to 6.3 per cent in 2007.

Other fringe benefits have been relatively stable or registered only slight declines in terms of the numbers of taxpayers as well as the amounts allowed. The exception is the payment of employees' debt which increased both in number and amounts.

The more significant fringe benefits are shown by taxable income group in *tables A2.5.2 to A2.5.9*.

Individual taxpayers' deductions

Table A2.6.1 provides a summary of individual taxpayers' deductions.

Since 2005, the number of taxpayers who qualify for deductions in respect of all forms of provision for retirement has decreased from 58.2 per cent to 53.4 per cent in 2007 of the total amount allowed. The percentage allowed has remained fairly constant at around 36 per cent of the total amount allowed.

Both the number of taxpayers and the amounts allowed as deductions for medical expenses (excluding disabled) have increased from 26.8 per cent to 33.8 per cent and from 20.7 per cent to 26.8 per cent from 2005 to 2007 respectively. This is in contrast to the other significant tax deductions where the number of qualifying taxpayers and amounts deducted both decreased.

The more significant deductions are shown by taxable income group in *tables A2.6.2 to A2.6.15*.

3

Corporate income tax

■ Introduction

For the period under review, there was a decline in the headline corporate income tax (CIT) rate. South African companies also pay secondary tax on companies (STC), a tax based on declared dividends. This tax rate was 12.5 per cent for most of the period under review and was reduced to 10 per cent in October 2007.

Not all taxes paid in a tax year are attributable to income earned in the same year, due to the system of provisional tax payments and tax returns being submitted and assessed long after the end of the tax year. Also, companies have financial years that may differ from the fiscal or calendar year, as companies are free to choose the period for their financial year (which is normally their tax year).

The South African tax system is residence based, meaning that South African residents are taxed on their worldwide income. A company that is incorporated in or effectively managed from South Africa is a South African resident for income tax purposes.

Tax on capital gains is included in company tax revenue, which means that capital gains tax is not recorded as a separate revenue item but included in corporate income tax.

Different sectors of the economy have different effective tax rates due to specific tax dispensations and deductions. Examples are the gold mining formula, farming deductions and valuation, insurance allowances and valuation. Small business corporations with a turnover of not more than R14 million can apply for a special tax dispensation in the form of a graduated income tax rate table.

This chapter gives an overview of:

- Number of companies
- Provisional tax payments by tax year
- Taxable income and tax assessed by taxable income group
- Taxable income and tax assessed by sector (industry)
- Companies with assessed losses or profits
- Tax assessed by main sector.

■ Number of companies

There are over 2 million corporations (1.6 million close corporations, 400 000 private companies and 40 000 public companies) registered with CIPRO¹. About 30 to 35 per cent of registered companies are dormant.

¹ The Companies and Intellectual Property Registration Office.

The number of companies registered for income tax purposes increased over the period from a little over 1 million in 2005 to 1.8 million in 2008. It must be noted that this table differs from the table in the *2008 Tax Statistics* in that it now excludes the coded cases where the status was in suspense, estate or address unknown.

At the time the data was extracted (31 March 2009), the number of companies assessed were 552 368 for 2005, 575 461 for 2006, 379 907 for 2007 and 189 873 for 2008.

Table 3.1: Number of companies, 2005 – 2008

Number	Registered ¹	Assessed
2005	1 054 969	552 368
2006	1 218 905	575 461
2007	1 584 002	379 907
2008	1 834 009	189 873

1. Excludes cases where status is in suspense, estate and address unknown. The tax year for companies is normally the financial year of the company for financial reporting purposes.

Provisional tax payments by tax year

The majority of provisional tax payments from companies are received during March, June, September and December. Provisional taxes for any given tax year are paid in three instalments: the first is due six months into the company's tax year; the second at the end of the tax year; and the third six months after the end of the tax year (unless the tax year ends at the end of February, then the third is due seven months after the end of the tax year).

Table 3.2: Companies: Provisional tax payments by tax year paid, 2003/04 – 2008/09

R million Tax year (down)	2003/04	2004/05	2005/06	2006/07	2007/08	2008/09

Total	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%

1. Due to timing differences these figures do not balance to actual provisional tax collections reflected in Table A1.5.3.

Under the provisional tax payment system, taxes for a specific tax year are paid over a number of fiscal years as indicated in table 3.2. In 2008/09 for example, nearly 95 per cent of the eventual tax liability was paid over two tax years: about 60 per cent in the specific tax year and about 35 per cent in the following year.

Tables A3.1.1² to A3.1.3 show a breakdown of the provisional tax payments by sector.

■ Taxable income and tax assessed by taxable income group

Table A3.2.1 shows taxable income and tax assessed by taxable income group for all companies. The number of companies assessed shows a steady increase of 4.2 per cent between the 2005 and 2006 tax years and although the number is lower in 2007 (mainly because of lagged assessments), the nominal amount of revenue collected in that year is roughly the same as in 2005, meaning a substantial increase in taxable income per company.

Table A3.2.2 shows that while around 57 per cent of the income tax assessed in 2006 is paid by large companies with taxable income exceeding R200 million, these companies represent only 0.1 per cent of the companies assessed for income tax purposes.

■ Taxable income and tax assessed by sector (industry)

Table A3.3.1 shows the taxable income and tax assessed by sector for all companies.

The Financing, insurance, real estate and business services; the Wholesale trade; and the Retail trade sectors make up about 45 per cent of the total number of taxpayers and are responsible for about 35 to 40 per cent of the total amount of tax assessed (*table A3.3.2*).

There are, however, substantial differences between the number of companies in the various sectors and the tax assessed. While the mining and quarrying category constitutes around 0.2 per cent of the number of taxpayers, the tax assessed is around 5 per cent of the total. In contrast, the Agencies and other services sector constitutes about 15 per cent of taxpayers with an assessed tax of 2.5 per cent of the total in 2005.

Table A3.3.3 uses SARS's source of income codes as shown in *table A3.3.1* and reclassifies these codes according to the Standard Industrial Classification (SIC). It should be noted that SARS's source of income codes are not fully aligned with the SIC system used by Statistics South Africa. This means that the figures in these tables are different from those published by Statistics South Africa.

Tables A3.3.4 to A3.3.6 shows the companies reporting positive, negative and zero taxable income respectively. Sectors with an increasing number of companies reporting zero taxable income between 2005 and 2006 include Catering and accommodation, Construction, and Social and related community services.

■ Companies with assessed losses or profits

Tables A3.4.1 to A3.4.3 shows the total number of companies and those with assessed losses or profits by sector.

² Tables numbered in italics are included in Annexure A.

In 2005, 73.2 per cent of the companies had assessed losses; 35.7 per cent of these companies were in the Financing, insurance, real estate and business services sector and 11.4 per cent in the Retail sector.

■ Tax assessed by main sector

Tables A3.5.1 to A3.8.4 shows for each of the tax years (from 2005 to 2008), the tax assessed and the number and percentage of companies assessed by main sector and taxable income group.

The statistics in the tables underline the information in the previous sections regarding the broad trends in company tax; the relatively large number of companies with negative or zero taxable income; the important taxpaying sectors, and the small percentage of companies in the taxable income group exceeding R10 million which contribute more than 80 per cent of company tax.

4

Value-added tax

■ Introduction

Value-added tax (VAT) is levied at a standard rate of 14 per cent by registered vendors on most goods and services subject to certain exemptions, exceptions and zero-ratings provided for in the Value-Added Tax Act (1991). VAT is also levied on the importation of goods and services into South Africa.

This chapter gives an overview of:

- Number of registered VAT vendors
- Domestic VAT: Payments and refunds
- Turnover.

■ Number of registered VAT vendors

The number of vendors registered for VAT shows a steady increase of over the past few years. The decline in 2008/09 is due to additional registration requirements and a clean-up of the VAT register that was undertaken. For purposes of table 4.1 below, a vendor was regarded as active if a payment was either received or a refund was made to a vendor during the fiscal year.

Table 4.1: Number of registered VAT vendors, 2003/04 – 2008/09

Number	Registered ¹	Active vendors	Percentage of registered
2005/06	633 703	483 389	76.3%
2006/07	677 153	509 615	75.3%
2007/08	745 487	526 403	70.6%
2008/09	737 885	530 223	71.9%

1. As per register as at 31 March of each year.

Excludes coded cases where status is in suspense, estate and address unknown.

■ Domestic VAT: Payments and refunds

Table A4.1.1¹ and *table A4.1.2* show the number of vendors, payments and refunds per sector. The largest number of VAT vendors in 2007/08 were in the Financing, insurance, real estate and business services sector (32.8 per cent), followed by the Agriculture, forestry and fishing (13 per cent) and the Retail trade (10.4 per cent) sectors.

¹ Tables numbered in italics are included in Annexure A.

Companies in the Mining and quarrying sector constitute 0.5 per cent of the number of vendors and 3.9 per cent of the total gross VAT payments for 2007/08, but are a negative contributor to net VAT (after refunds). The Financing, insurance, real estate and business services sector made the largest gross domestic VAT payments in 2007/08, totalling R53.6 billion (31.5 per cent).

By payment category

The requirement for monthly VAT payments applies primarily to larger vendors with taxable supplies (turnover) in excess of R30 million per year. Close to 90 per cent of vendors submit returns on a bi-monthly basis (see *table A4.2.1*) with only about 4 per cent submitting their returns 6-monthly. With regard to monthly returns, most vendors are from the Financing, insurance, real estate and business services sector followed by the Retail trade sector. A similar pattern occurs regarding the vendors submitting bi-monthly returns.

Tables A4.2.2 to A4.2.5 provide a breakdown of the various sectors' payments and refunds for the different payment periods.

By type of enterprise

Table A4.3.1 shows that corporations (companies and close corporations) constituted the bulk of VAT vendors in 2007/08 (66.5 per cent), followed by individuals – sole proprietors (23.6 per cent). Corporations accounted for 90.2 per cent of net domestic VAT collections in 2007/08.

■ Turnover

In 2008/09, 54.8 per cent of VAT vendors had a turnover of R1 million or less and accounted for -3.4 per cent of net domestic VAT collections. Included in the 0-to-R100 000 category are vendors with no turnover (e.g. property developers) that contributed -R2.2 billion (69.6 per cent) to the net VAT of -R3.2 billion of this turnover group.

The top-6 per cent of VAT vendors had an annual turnover in excess of R20 million and accounted for 74.7 per cent of VAT payments and 80.6 per cent of VAT refunds. It should be noted that 1.4 per cent of vendors had an annual turnover greater than R100 million and this category accounted for 57.5 per cent of VAT payments and 69.8 per cent of VAT refunds (See *table A4.4.1*).

5

Customs/import duties

■ Introduction

Customs/import duties are imposed on certain goods that are imported into South Africa. Import duties are imposed to protect local producers. In addition, excise duties are also imposed on selected imported goods. Excise duties are also imposed on similar goods that are produced in South Africa.

This chapter gives an overview of customs VAT, customs duty, Duty 1-2B.

■ Customs VAT, customs duty, Duty 1-2B (*Ad valorem* excise duties on imports)

Table A5.1.1¹ and A5.1.2 show the customs value of imports, customs VAT, customs/import duties and excise duties on imports by sector.

Machinery and mechanical appliances, electrical equipment is the category that accounts for the largest value of goods imported (21.2 per cent of total customs value in 2008/09), followed by Mineral products (18.9 per cent) and then Vehicles, aircraft, vessels and associated transport equipment (9.3 per cent).

Import/customs duty revenues (including specific excise duties on alcohol and tobacco products) are mostly derived from the following categories: Vehicles, aircraft, vessels and associated transport equipment (21.3 per cent in 2008/09); Textiles and textile articles (13.4 per cent); Machinery and mechanical appliances, electrical equipment (12.7 per cent) and Prepared foodstuffs, beverages, spirits and vinegar (11.4 per cent).

Ad valorem excise duty revenues (Duty 1-2B) are mostly derived from the Vehicles, aircraft, vessels and associated transport equipment category (55.7 per cent in 2008/09) and the Machinery and mechanical appliances, electrical equipment category (39 per cent).

Glossary

<i>Ad valorem</i> excise duties/ customs duties	<i>Ad valorem</i> means duty calculated on the value. These duties are levied on certain selected locally manufactured goods. Corresponding <i>ad valorem</i> customs duties are levied at the same rate of duty on imported goods of the same class or kind. <i>Ad valorem</i> customs duties and <i>ad valorem</i> excise are levied on those items specified in schedule 1 Part 2B of the Harmonized System. <i>Ad valorem</i> excise duty is calculated on the basis of the value of the goods. Discounts are, however, granted on locally manufactured goods.
Air passenger departure tax	Fee-paying passengers departing on international flights pay a tax of R120 per passenger. ¹ Passengers flying to Botswana, Lesotho, Namibia and Swaziland (BLNS) pay R60 per passenger.
Capital gains tax (CGT)	CGT was introduced in October 2001. It forms part of the income tax system and is based on capital gains made upon the disposal of assets.
Corporate income tax (CIT)	CIT comprises all provisional and assessed taxes paid by companies (net of refunds).
Customs duties/import duties	These are levies imposed on goods imported into South Africa. Import duties are imposed as a means to protect certain local producers. They also include anti-dumping and countervailing duties.
Direct taxes	Taxes charged on taxable income or capital of individuals and legal entities.
Donations tax	Is levied at a flat rate of 20 per cent on the value of the donation. The first R100 000 donated in each year by a natural person is exempt from donations tax. In the case of a taxpayer who is not a natural person, the exempt donations are limited to casual gifts not exceeding R10 000 per year in total. Dispositions between spouses and donations to certain public benefit organisations are exempt from donations tax.
Duty 1-2B	Refers to the <i>Ad valorem</i> excise duties on imports.

¹ As from 1 October 2009, this has increased to R150 and R80 per passenger for international and BLNS travel respectively.

Employees' tax	Employees' tax is the tax that employers must deduct from the employment income of employees – such as salaries, wages and bonuses - and pay over to SARS monthly. It is withheld daily, weekly, or monthly, when these amounts are paid or become payable to the employees.
Environmental levy (Plastic bags levy)	This is a tax on certain types of plastic shopping bags. The levy aims to encourage the sustainable use of these bags.
Estate duty	Is calculated at a rate of 20 per cent on the dutiable amount of the estate. Certain admissible deductions from the total value of the estate are allowed.
Gross domestic product (GDP)	A measure of the total national output, income and expenditure in the economy.
Fiscal drag	The effect of inflation on effective tax rates. When salaries are adjusted to compensate for the effect of inflation on the value of money, the taxpayer is pushed into a higher income tax brackets where higher rates apply. In this way the individual's effective tax rate is increased, even though real incomes may not be increasing.
Fiscal year	Is the financial year of government i.e. from 1 April to 31 March of the following year.
Fuel levy	Is a specific excise tax imposed in terms of the Customs and Excise Act. Relief is available through a diesel refund system for farming activities, forestry, mining, offshore vessels, harbour vessels, locomotives used for rail freight, and large electricity generation plants.
Harmonised system	The Harmonised System Nomenclature, also known as the International Convention on the Harmonised Commodity Description and Coding System (Harmonised System) is, essentially, the system according to which all internationally traded products, components, or commodities are classified. This international system is currently used by 200 countries and customs or economic unions, which account for about 98 per cent of world trade.
Income tax	Is a tax on income and profit and is levied on individuals, companies and trusts. It is the national government's main source of income and is imposed by the Income Tax Act 58 of 1962.
Marginal income tax rate	The rate of tax on an incremental unit of income.
Marketable securities tax	See <i>Securities transfer tax</i> .
National Revenue Fund	The consolidated account of the national government into which all taxes, fees and charges collected by SARS and departmental revenue must be paid.
Non-tax revenue	Income received by the government in the form of interest and dividends (from parastatals) and as a result of administrative charges, licences, fees, and sales of goods and services.

Operating cost to revenue ratio	Is an indication of the efficiency with which revenue is collected.
Pay-As-You-Earn (PAYE)	Ensures that an employee's income tax liability is settled in a continuing fashion, at the same time that the income is earned. The advantage of this is that the tax liability for the year is settled over the course of the whole year of assessment.
Personal income tax (PIT)	PIT comprises all assessed and provisional taxes as well as PAYE paid by individuals (net of refunds).
Plastic bags levy	See <i>Environmental levy</i> .
Primary rebate	A reduction in income tax that is available to all taxpayers.
Progressive tax	A system of taxation that collects proportionately more from the rich than from the poor.
Provisional tax (companies)	The majority of provisional tax payments from companies are received during March, June, September and December. Provisional taxes for any given tax year are paid in three instalments: the first is due six months into the company's tax year; the second at the end of the tax year; and the third six months after the end of the tax year (unless the tax year ends at the end of February, then the third is due seven months after the end of the tax year).
Provisional tax (individuals)	Is a system that makes taxpayers provide for their final tax liability by paying two amounts during the course of the year of assessment, and a third payment 7 months after the end of the year of assessment.
Provisional tax (Paragraph 19(3))	Paragraph 19(3) of the Fourth Schedule to the Income Tax Act allows the Commissioner to call upon the taxpayer to justify an estimate made by the taxpayer, or to provide particulars of income and expenditure or any other particulars that may be required for the year of assessment in respect of which the provisional tax payment is being made. If the Commissioner is not satisfied with the estimate, he may increase it to an amount that he considers reasonable.
Residence based tax system	Where residents are taxed on their worldwide income, irrespective of where their income was earned.
Secondary tax on companies (STC)	Tax on dividends declared by a company, calculated at the rate of 10 per cent (12.5 per cent prior to 1 October 2007) of the net amount of dividends declared.
Securities transfer tax (STT)	STT is a tax levied on every transfer of a security. It is levied at a rate of 0.25 per cent. This tax was known as Marketable securities tax prior to 2006/07 and as Uncertificated securities tax prior to 1 July 2008.

Skills development levy (SDL)	SDL is a compulsory levy to fund training by companies. The rate is 1 per cent of a company's total payroll and is payable by employers that are registered with SARS for employees' tax purposes and which have an annual payroll of more than R500 000 (R250 000 before 1 August 2005).
Southern African Customs Union (SACU)	An agreement that allows for the unrestricted flow of goods and services, and the sharing of customs and excise revenue between South Africa, Botswana, Namibia, Lesotho and Swaziland.
Specific excise duty	A tax on each unit of output or sale of goods, unrelated to the value of the goods.
Stamp duty	Was levied on leases of fixed property and until June 2008 on the registration of transfer of unlisted marketable securities. This tax has been abolished with effect from 1 April 2009.
Standard Income Tax on Employees (SITE)	SITE, is not a separate type of tax. It is merely a method that means employees who earn less than a certain amount pay income tax as a full and final liability on the information to the specific employer. SITE generally applies to individuals whose net remuneration does not exceed R60 000 annually; who do not receive a travelling allowance; and who do not receive any other income.
Tax amnesty	A period allowed by tax authorities during which taxpayers who are outside the tax net, but should be registered for tax purposes, can register for tax or disclose previously unreported taxable income without incurring penalties.
Tax base	The aggregated value of income, sales or transactions on which particular taxes are levied.
Tax on retirement funds (TRF)	TRF was a tax levied on the gross interest, net rental and foreign dividend income of retirement funds i.e. pension, provident and retirement annuity funds. TRF was abolished in 2007.
Tax-to-GDP ratio	For public finance comparison purposes, a country's tax burden or tax-to-GDP ratio is computed by taking the total tax payments for a particular fiscal year as a fraction or percentage of the GDP for that year.
Tax revenue	In terms of the System of National Accounts (SNA), tax revenue is defined as "a compulsory, unrequited payment to government".
Tax year	This is the 12-month period for which tax is calculated. For individuals it starts on 1 March and ends at the end of February the following year, and for companies it is normally the financial year of the company for financial reporting purposes.
Taxable income	This refers to the income of an individual or a company which is subject to tax. This is not the same as actual income, since deductions may be claimed for medical expenses, for instance, in the case of individuals or for depreciation, in the case of companies.

Transfer duties	The duty payable by individuals when they acquire property at the rate of 5 per cent of the value above R500 000 and at 8 per cent of the value exceeding R1 million. When property is acquired by a person other than an individual, such as a company or trust, transfer duty is payable at a rate of 8 per cent of the value.
Uncertificated securities tax	See <i>Securities transfer tax</i> .
Value-added tax (VAT)	VAT is levied at a standard rate of 14 per cent on most goods and services subject to certain exemptions, exceptions and zero-ratings, provided for in the Value-Added Tax Act (1991). VAT is levied on the supply of all goods and services rendered by registered vendors. VAT is also levied on the importation of goods and services into South Africa.
