

## **Additional information on the national borrowing requirement, the financing thereof and on national government debt for the 2012 MTBPS**

Tables 3.4 and 3.5 in Chapter 3 of the 2012 Medium Term Budget Policy Statement provide a summary of the total national government debt and of the main budget borrowing requirement and financing thereof. For clarity more detail is provided in the following tables.

### **National net borrowing requirement and financing**

A total of R10.7 billion in extraordinary receipts are expected in 2012/13, mainly due to premiums received on new bond issuance and bond switch transactions.

1. Domestic loan redemption figures are net of switches

2. Foreign loan redemptions in 2014/15 are net of anticipated switches

3. A positive change indicates a decrease in cash balances

4. Mainly surrenders of unspent money requested in previous financial years and late requests with regard to expenditure committed in previous years

Debt issuance in the domestic market will be maintained at current levels. The switch programme announced at the time of the 2012 Budget which aimed to reduce redemptions by R15 billion in 2013/14 and R34 billion in 2014/15 will continue. At the end of September 2012, the switch programme had already reduced redemptions in 2013/14 by R12.3 billion and by R19.3 billion in 2014/15. There are currently no plans for switches to reduce redemptions in 2015/16.

During 2012/13, forward exchange contracts entered into by the Reserve Bank will be settled using rand balances available resulting in higher foreign currency balances. These higher foreign balances will be utilised in 2013/14 to meet part of government's foreign currency commitments.
