Explanatory notes on the statistical tables

General remarks

This Annexure presents details of the main budget, consolidated national and provincial expenditure, government debt and financial guarantees. Government revenues are concentrated at the national government level. However, expenditure shifted from the national to the provincial sphere after 1994. Equitable share transfers to the nine provinces as a statutory commitment of government began in 1998/99, and the 1998 Budget marked the introduction of the local government equitable share.

Since more than 60 per cent of total expenditure on the main budget comprises transfer payments to other levels of general government, economic and functional classifications of national budget expenditure are not comprehensive. For purposes of analysis, it would be preferable to present economic and functional classifications of the expenditure of *general government*. This requires information on expenditure at all levels of general government and on its financing through revenue, balances brought forward and transfer payments (mainly from the national budget). This information is not readily available for local government, making it impossible to present consolidated general government finances at the time of the national budget. Historical data on general government finances are, however, published by the South African Reserve Bank in its *Quarterly Bulletin* and by Statistics South Africa.

Disbursements of foreign grants and technical assistance, and expenditure of the social security funds are included in the consolidated national and provincial expenditure estimates in tables 5 and 6. The social security funds include the Unemployment Insurance Fund, the Road Accident Fund and the Compensation funds.

The revenue figures prior to 1994/95 have been adjusted to show income flowing to the revenue accounts of the former self-governing territories and TBVC-states as revenue. These include income taxes, general sales tax, value-added tax, non-resident shareholders tax, stamp duties and fees and mining leases as well as revenue previously collected on behalf of these authorities. Where applicable, similar adjustments have been made in 1994/95 and later years.

Treatment of foreign grants to the Reconstruction and Development Programme (RDP) Fund

Prior to 1999/00 foreign grants were paid to the National Revenue Fund and expenditure was included in departmental appropriations. From 1999/00 onwards, no foreign grants for RDP-related purposes are included in the appropriations of national departments. All foreign technical assistance and RDP-related grants are paid to the RDP Fund account that is separated from the accounts of government. Departments incur expenditure on RDP-related projects from an RDP Grant account, which is cleared with requisitions from the RDP Fund account.

Adjustments due to transactions in government stock

As part of the restructuring of government's debt portfolio, bonds are repurchased or switched into new government bonds. In the process, government may make a capital profit, which is a book entry change in the discount on government bonds and is regarded as an extraordinary receipt. As such, capital profit does not represent an actual cash flow and is regarded as a "book profit", recorded as a negative receipt and loan redemption for analysis purposes.

A premium may also be accrued or be payable when restructuring government's debt portfolio. Premiums paid are accounted for as extraordinary payments and premiums received as extraordinary receipts.

Sources of information

The information in tables 1 to 6 on national and provincial government finances is obtained from the following sources:

- Reports of the Auditor-General on the Appropriation and Miscellaneous Accounts in respect of General Affairs (1974/75 to 1993/94), the Accounts of the National Government (1994/95 to 1999/00), Audited Annual Financial Statements of National Departments (2000/01 to 2001/02) and the Revenue Accounts of the former self-governing territories and TBVC-states.
- Reports of the Auditor-General on the Appropriation Accounts of the nine provinces, Audited Annual Financial Statements of Provincial Departments, as well as draft Financial Statements for some of the provinces.
- Printed Estimates of Revenue and Expenditure for the national and provincial budgets.
- The South African Reserve Bank.
- The Development Bank of Southern Africa.
- Annual statements of the Branches: Inland Revenue and Customs and Excise (previously of the Department of Finance) and of the South African Revenue Service.
- Monthly press releases of the National Treasury, published in terms of Section 32 of the Public Finance Management Act.

In some cases the information on revenue of the former self-governing territories, TBVC states and the expenditure of the new provinces in tables 1 to 6 was either preliminary or a budget estimate. Where data were incomplete, collections of a particular tax have been adjusted by the average growth in collections of that tax in the rest of the self-governing territories and TBVC-states. For this and other reasons, the information in tables 1 to 6 cannot be regarded as actual and audited.

Revenue, expenditure, budget deficit and financing (Table 1)

Table 1 summarises the main budget balances since 1996/97 and medium term estimates to 2005/06. Repayments of loans and advances, which were previously shown as negative expenditure, have been reclassified as revenue. Given that the same amount is added to both revenue and expenditure, the national budget deficit is unaffected.

However, the size of the deficit figures presented in this table differ from those presented in budgets prior to 1995/96, as a number of items that were previously regarded as “below-the-line” expenditure have been included in total expenditure. In addition, revaluations of foreign loan obligations are now excluded from expenditure, in keeping with international practice.

Under loan redemptions and financing, *short-term loans* include the net result of transactions in treasury bills. *Long-term loans* include all transactions in government bonds (i.e. new loan issues, repayments on maturity, consolidations, repurchases and switches).

Prior to the 1998 Budget Review, transfers from the Strategic Fuel Fund and the National Supplies Procurement Fund, as well as proceeds from the sale and restructuring of state assets, were treated as financing items. These, together with extraordinary payments unrelated to expenditure, are now shown below the deficit and before financing. The reclassification does not affect the budget deficit.

Transfers between the former State Revenue Account, the Stabilisation Account and the Tax Reserve Account are shown in table 1 as part of the changes in cash and other balances.

Main budget revenue (Tables 2 and 3)

Table 2 presents a summary of revenue and details are set out in table 3. Main budget revenue collections are recorded on an adjusted cash basis (cash book – revenue recorded as it is received in the ledgers of SARS) and are classified according to standard international categories:

- Current tax and non-tax receipts and capital revenue items (excluding sales of fuel stocks and proceeds from the restructuring of public enterprises) are regarded as *ordinary revenue*
- Grants received, recoveries of loans and advances and other repayments are included in *total revenue*
- Certain receipts into the National Revenue Fund are not regarded as revenue. These include proceeds from the sale of state assets, transfers from the IMF Deposit Account, transfers from the Tax Reserve Account, adjustments due to transactions in government stock and proceeds from the sales of fuel stocks.

On 1 April 2002, the National Treasury implemented a new revenue reporting format for departmental revenue that is fully compliant with the *2001 Manual on Government Finance Statistics*. This new format is supported by a newly developed revenue chart of accounts that will be implemented as part of the ledgers of national departments during 2004. This revised reporting format provides adequate detail for the classification of revenue transactions and will enhance the quality of departmental revenue reporting.

The historical data presented in table 3 have been reclassified to be in line with the new classification. However, a large portion of the data cannot be classified, as departments captured these revenue transactions within their ledgers as miscellaneous revenue. In order to report these revenue items in the new format all the relevant transactions would have to be recaptured, an exercise that will be extremely costly and time consuming. These amounts are therefore reported as unspecified revenue.

Medium-term expenditure estimates by votes (Table 4)

Table 4 contains estimates of expenditure on national budget votes for the period 1998/99 to 2005/06. These include amounts appropriated in the Main Budget and the Adjustments Budget. Preliminary estimates of underspending on each vote in 2002/03 are shown. In all years prior to 2000/01, capital works undertaken by the Department of Public Works on behalf of other departments are distributed to these votes to give estimated total expenditure for each of the departments. These capital works amounts are now included in the individual departments appropriations.

Consolidated national and provincial budgets (Tables 5 and 6)

Tables 5 and 6 show economic and functional classifications of national and provincial government expenditure. The national expenditure figures are for the 2003 Budget. In the provinces, however, expenditure estimates are preliminary, as their budgets are tabled after the National Budget. Provincial estimates are based on preliminary budget statements provided by the provinces and are subject to change before being tabled in the provincial legislature.

Treasury has embarked on a project to reform the classification system used in the budget documentation of national and provincial governments. The aim of the reform is to bring reporting in line with international best practice, thereby improving transparency and accountability. For this purpose a revised expenditure reporting format and standard chart of accounts are being developed, that is in line with international reporting requirements. The new chart of accounts will be based on the *2001 Manual on Government Finance Statistics*, International Public Sector Accounting Standards (IPSAS) and International Accounting Standards (IAS). Currently implementation of the new chart of accounts is scheduled for April 2004.

The introduction of the new chart of accounts will coincide with the introduction of a new economic and functional reporting format in the 2004 budget. In preparation for the change to the new classification system, the Classification Committee, consisting of representatives of the National Treasury, South African Reserve Bank and Statistics South Africa, is running a process to

reclassify government spending data to be in line with the new format. During this reclassification process a number of misclassifications have been identified that have been rectified in this years economic and functional tables. The reclassified data were used as the base for compiling the consolidated tables and are more consistent with GFS principles. This results in the data in tables 5 and 6 not being strictly comparable to the same tables published in previous budgets.

Some of the major amendments to the economic and functional classifications can be summarised as follows:

- The contributions to medical aid schemes for retired civil servants previously included in *Other goods and services* have been reclassified as *Social contributions* that forms part of *Remuneration of employees*.
- Small amounts spent on current maintenance previously classified as *Capital expenditure* is now correctly reflected as *Current expenditure*.
- The *Basic Water and Sanitation Infrastructure* conditional grant to Local Government, included in the *Estimates of National Expenditure* for 2002 and 2003 as *Acquisition of fixed capital assets*, has been reclassified as *Capital transfers* in the economic table. The *Division of Revenue Act, Act No 5 of 2002*, lists this grant as an indirect conditional grant to local government. This implies that the spending should be appropriated on the national vote as capital expenditure, but in order to correctly present the local government share, the relevant amounts are reclassified as *Capital transfers to local government* on the economic classification summary.
- A number of transfers to extra-budgetary institutions were previously included as *Subsidies to government departmental enterprises*. These classifications have been amended to be in line with the latest version of the schedules of public entities listed in the *Public Finance Management Act*.
- In some departments *Subsidies to business enterprises* have in the past been included as spending on *Other goods and services*, which have been corrected in table 5.
- War veterans pensions previously included as function *Defence and intelligence* have now been included as part of *General government services*, in line with the requirements of the Government Finance Statistics classification.
- The administration portion of some departmental votes that previously was included in *General government services* have now been allocated to the specific function, influencing mainly the economic services, and some items previously classified as *Social services* reclassified as *General government services*.

Total government debt (Table 7)

Table 7 shows the major components of government debt. Total net government loan debt is calculated taking into account the cash balances of the National Revenue Fund. Realised losses on the Gold and Foreign Exchange Contingency Reserve Account is also disclosed. The projections for 2002/03 to 2005/06 are based on national budget data.

Financial guarantees by government (Table 8)

The national government furnishes guarantees to various institutions. These guarantees will realise as liabilities to the state only if these institutions are unable to meet their commitments. It is not possible to anticipate the portion of these guarantees that will realise as liabilities to the national government, and they are therefore disclosed as *contingent liabilities* in Government's *Statement of Liabilities and Financially Related Assets*. Amounts drawn in respect of guarantees and interest on these amounts, if guaranteed, are disclosed.

1) This table summarises revenue, expenditure and the main budget balance since 1996/97. As available data are incomplete, the estimates are not fully consistent with other sources, such as the government finance statistics series of the Reserve Bank.

2) Sales of fixed capital assets. Transfers from the National Supplies Procurement Fund and Strategic Fuel Fund are excluded.

3) Excluding discount on the sales of new government stock, premium on debt portfolio restructuring and revaluation of foreign loan repayments. Including management costs. Figures from 1996/97 onwards are not comparable with those before, because of the inclusion of interest on section 239 debt in the National Budget state debt cost.

Prior to 1996/97 provision for these amounts was included under transfers to provinces.

4) The provincial equitable share was introduced in 1998/99. Prior to this the provincial share was included in voted expenditure as a transfer to provinces.

5) Includes standing appropriations comprising realised guarantee liabilities, subscriptions payments to IDA and IBRD, as well as valuation

adjustment payments to the IMF and other statutory appropriations such as Judges salaries and skills development funds.

- 6) Expenditure on goods and services and current transfers to businesses, households, the rest of the world and other levels and funds of general government.
- 7) Acquisition of fixed capital assets, stock, land and intangible assets, and capital transfers to business, households, the rest of the world and other levels and funds of general government.
- 8) Includes premiums received on destination bonds in switch auctions, previously recorded as revenue.
- 9) Includes proceeds from the sales of state assets and strategic supplies. Also included is "book profit" on domestic government bond buy-backs and source bonds issued in switch auctions, previously included as non-tax revenue. This does not represent actual cash receipts and is therefore excluded from revenue.

1) Figures prior to 1994/95 (representing the former State Revenue Account) are adjusted to be comparable to the current National Revenue Fund (see introductory notes to this statistical annexure). Figures prior to 1995/96 include collections by the former TBVC states and self-governing territories.

2) Figures restated to be comparable to the cash basis of accounting.

3) Figures prior to 1999/00 exclude receipts from mining companies. Figures from 1999/00 onwards include receipts from all companies.

4) Including interest on overdue tax, non-resident shareholders' tax, non-residents' tax on interest and tax on undistributed profits.

5) Levy on payroll dedicated to skills development.

6) The 1998/99 and the 1999/00 figures include receipts of the demutualisation charge amounting to R279 million and R577 million respectively, which were not included in the budget estimates.

7) Including sales duty, which was replaced by a general sales tax in July 1978. The value added tax replaced the general sales tax in September 1991.

- 8) Including the former fuel levy directed to Regional Services Councils and the levy allocated to the National Road Fund for the period 1983/84 to 1986/87.
 9) Including various levies, mining leases and ownership, cinematographic tax and other special levies imposed since 1974/75, as well as receipts of the Universal Service Fund since 1998/99 and the Human resources fund for 1998/99 and 1999/00.
 10) Including diamond export duties, miscellaneous customs and excise income, as well as ordinary levy collections.
 11) Revenue received by SARS in respect of taxation which could not be allocated to specific revenue types. Previously shown as part of other non-tax revenue: Unspecified.
 12) Premiums received on destination bonds on switch options, previously included in revenue, are now reflected under extraordinary receipts.
 13) Domestic and foreign grants, transferred from the RDP Fund to finance RDP-related expenditure, and grants received from other spheres of government.
 14) SoNNuth African Custom Union payments (excluding payments to the former TBVC states and self-governing territories). Payments to the Central Revenue Fund of Namibia up to independence are included.
 15) Sales of strategic fuel stocks, proceeds from sales of state assets and certain other receipts are, by law, paid into the National Revenue Fund, but are not regarded as revenue.

- 5) Levy on payroll dedicated to skills development.
- 6) The 1998/99 and the 1999/00 figures include receipts of the demutualisation charge amounting to R279 million and R577 million respectively, which were not included in the budget estimates.
- 7) Including sales duty, which was replaced by a general sales tax in July 1978. The value added tax replaced the general sales tax in September 1991.

8) Including the former fuel levy directed to Regional Services Councils and the levy allocated to the National Road Fund for the period 1983/84 to 1986/87.

9) Including various levies, mining leases and ownership, cinematographic tax and other special levies imposed since 1974/75, as well as receipts of the Universal Service Fund since 1998/99 and the Human resources fund for 1998/99 and 1999/00.

10) Including diamond export duties, miscellaneous customs and excise income, as well as ordinary levy collections.

11) Revenue received by SARS in respect of taxation which could not be allocated to specific revenue types. Previously shown as part of other non-tax revenue: *Unspecified*.

12) Premiums received on destination bonds on switch options, previously included in revenue, are now reflected under extraordinary receipts.

13) Domestic and foreign grants, transferred from the RDP Fund to finance RDP-related expenditure, and grants received from other spheres of government.

14) South African Custom Union payments (excluding payments to the former TBVC states and self-governing territories). Payments to the Central Revenue Fund of Namibia up to independence are included.

15) Sales of strategic fuel stocks, proceeds from sales of state assets and certain other receipts are, by law, paid into the National Revenue Fund, but are not regarded as *revenue*.

1) Figures prior to 1994/95 (representing the former State Revenue Account) are adjusted to be comparable to the current National Revenue Fund (see introductory notes to this statistical annexure). Figures prior to 1995/96 include collections by the former TBVC states and self-governing territories.

2) Figures restated to be comparable to the cash basis of accounting.

3) Figures prior to 1999/00 exclude receipts from mining companies. Figures from 1999/00 onwards include receipts from all companies.

4) Excluding ad valorem excise duties and the general fuel levy.

5) Specific excise duties on petrol, distillate fuel, residual fuel and base oil.

6) Excise duties which are collected by the BLNS countries, former self-governing territories and TBVC states.

7) Revenue received by SARS in respect of taxation which could not be allocated to specific revenue types. Previously shown as part of other Non-tax revenue: Unspecified

8) South African Custom Union payments (excluding payments to the former TBVC states and self-governing territories). Payments to the Central Revenue Fund of Namibia up to independence are included.

9) Unallocated departmental revenue previously classified by departments as miscellaneous revenue.

10) Domestic and foreign grants, transferred from the RDP Fund to finance RDP-related expenditure, and grants received from other spheres of government.

11) Sales of strategic fuel stocks, proceeds from sales of state assets and certain other receipts are, by law, paid into the National Revenue Fund, but are not regarded as revenue.

1) Figures prior to 1994/95 (representing the former State Revenue Account) are adjusted to be comparable to the current National Revenue Fund (see introductory notes to this statistical annexure). Figures prior to 1995/96 include collections by the former TBVC states and self-governing territories.

2) Figures restated to be comparable to the cash basis of accounting.

3) Figures prior to 1999/00 exclude receipts from mining companies. Figures from 1999/00 onwards include receipts from all companies.

4) Excluding ad valorem excise duties and the general fuel levy.

5) Specific excise duties on petrol, distillate fuel, residual fuel and base oil.

Sources: South African Reserve Bank and National Treasury.

1) Debt of the Central Government, excluding extra-budgetary institutions and social security funds. Figures prior to 1994/95 exclude the converted debt of the former regional authorities in terms of section 239 of the 1993 Constitution and are, therefore, not comparable with those thereafter.

2) As projected at the end of December 2002.

3) Includes non-marketable bills and loan levies, floating rate bonds and debentures.
