Estimates of National Expenditure

2010

National Treasury

Republic of South Africa

17 February 2010

ISBN: 978-0-621-39079-7

RP: 03/2010

The *Estimates of National Expenditure 2010* booklet for each vote is compiled with the latest available information from departmental and other sources. Some of this information is unaudited or subject to revision. In this booklet, more comprehensive coverage of goods and services, transfers, public entities and lower level institutional information is provided where applicable.

The *Estimates of National Expenditure 2010* as well as the *Estimates of National Expenditure 2010* booklets are also available on www.treasury.gov.za

Foreword

The Estimates of National Expenditure publication provides Parliament, departments and public entities, ministers, the media, civil society and the public with information about how tax payers' money is being spent: what it buys and for what purpose. Do not be concerned regarding the magnitude of this publication. Instead, let us use this unique reference tool to keep departments and agencies accountable and ensure that the expenditure of public funds achieves its intended policy outcomes, ultimately improving the welfare of our people.

Budgets link the policy choices that government makes with the services that are delivered to people – better budgeting plays an important role in improving service delivery. In line with the 2009 Medium Term Strategic Framework, government has adopted 12 desirable outcomes. At the output level, departments and agencies continue to set targets; for the first time these are in support of the attainment of officially stated outcomes. Budgeted spending on outputs and activities will increasingly reflect this.

Following the 2009 elections, a re-organisation of departments was proclaimed to give effect to the required government policy shifts and to accommodate the necessary changes in the programmes and activities of departments and entities. Several new national departments were created; some functions were transferred between departments. This also resulted in certain national departments being re-named to better capture the content of their new responsibilities. In terms of the new structure of government there are now 37 votes in the Estimates of National Expenditure publication, whereas in 2009 there were 34 votes.

This consolidated publication provides extensive vote level information on strategies and objectives. Legislation, policy developments and other factors affecting these are also noted. Information is presented in a format that aligns government's performance commitments with resource allocations. As with the 2009 Budget, we will publish booklets for individual votes that will provide full coverage of public entities and more detail on transfers and lower level institutional information.

Given the current economic climate, there are greater trade-offs in choosing between spending priorities or in the sequencing of programme implementation. Outputs and activities are constantly being re-evaluated to determine if more effective and cost efficient options are available. As a result, some programmes have to be delayed. Alongside the additions to spending, this publication also indicates details per national vote of savings amounting to R23 billion over the period ahead. These savings have been reallocated to other departments in order to augment funding for government's priorities.

All the figures, targets and outputs result from a wide ranging intergovernmental consultative process, leading to executive approval of additional spending allocations and savings. Many people have contributed to making this publication possible, especially my colleagues in national departments and agencies. Their collaboration and understanding during the allocation and publication processes has been invaluable. Thanks are also due to the dedicated National Treasury team for the publication of this useful resource.

Lesetja Kganyago

Director-General: National Treasury

Introduction

Transparent and accountable governance is strengthened when comprehensive budget documents are tabled for public scrutiny and legislative oversight. The Estimates of National Expenditure provides relevant public sector financial information in a timely and systematic manner, linking performance targets to budgeted expenditure. Specifically, it serves to:

- provide members of Parliament with detailed information on how departments and public entities plan to spend the money that is to be authorised by the legislature
- enable Parliament and society to keep departments and agencies accountable for service delivery commitments that are set out in each chapter
- provide parliamentary committees with a valuable source of information that can assist them in performing their oversight functions.

Although it contains a large volume of information, the 2010 Estimates of National Expenditure presents a summarised account of the spending plans of all national departments and agencies for the next three financial years (2010/11 to 2012/13), expenditure outcomes for the past three years (2006/07 to 2008/09) and revised estimates for the current year (2009/10). Newly formed departments are covered in the same way. Information is also provided on legislation and mandates, policy, strategies, objectives and performance targets over the seven-year period – as well as any changes in these, particularly as they relate to trends in planned expenditure. This provides a platform for review that could result in new policy options or operational alternatives in the achievement of government's objectives.

In keeping with ongoing improvements in the way that public finances are managed and reported, both the quality of information and presentation of the 2010 Estimates of National Expenditure have been enhanced. Information on new departments is mostly covered by way of a separate chapter, although in some cases departments are accommodated within a shared vote and discussed together in the same chapter. Information on savings and cost effective service delivery is included under a separate heading following the strategic overview section. Spending on selected key mega infrastructure projects is discussed in text boxes in the expenditure trends sections of relevant votes. For some votes a new personnel table has been included, showing personnel numbers in relation to the different salary levels and other information, such as the number and type of posts on funded establishment and posts filled. The 2010 Estimates of National Expenditure booklets, which are published separately for each vote, provide more extensive coverage on transfers, public entities, goods and services and lower level institutional information.

Value for money

Budget accountability has historically focused mainly on targeting the performance of government departments and agencies at the output level. Government has now adopted an approach which provides a new methodology that is focused on the attainment of 12 desirable outcomes, using measurable outputs and well defined activities to achieve better value, as well as better value for money. The medium term expenditure framework (MTEF) for the next three years targets spending on government's official outcomes and simultaneously seeks to change the culture in the public service towards greater prudence and efficiency in order to obtain better value for money.

The Ministry for the National Planning Commission and the Ministry for Performance Evaluation and Monitoring are to ensure that planning and implementation in government institutions are focused on the achievement of outcomes and the improvement of performance. In line with this service delivery orientation, new functions and a reconfiguration of existing functions have led to a new national government structure. Taking account of the creation of new departments, 37 votes are now contained in the 2010 Estimates of National Expenditure. The table below provides a list of the new votes and alongside each, the department/s from which functions have been shifted in order to form the basis of the new department.

Newly created vote	Department/s from which all or some functions have been shifted
Agriculture, Forestry and Fisheries	Agriculture Water Affairs and Forestry Environmental Affairs and Tourism
Water Affairs	Water Affairs and Forestry
Human Settlements	Housing Water Affairs and Forestry
Environmental Affairs	Environmental Affairs and Tourism
Tourism	Environmental Affairs and Tourism
Basic Education	Education
Higher Education and Training	Education Labour (still exists)
Cooperative Governance and Traditional Affairs	Provincial and Local Government
Defence and Military Veterans	Defence
Economic Development	Trade and Industry (still exists)
Energy	Minerals and Energy
Mineral Resources	Minerals and Energy
International Relations and Cooperation	Foreign Affairs
Police	Safety and Security
Rural Development and Land Reform	Land Affairs Provincial and Local Government
Women, Children and People with Disabilities	The Presidency (still exists) Justice and Constitutional Development (still exists)

Savings

Given the shortfall in government revenue collection and the pressure on the available resources of the fiscus, this year's budget preparation has focused extensively on finding savings within departmental and agency baselines and on redirecting expenditure towards key priorities within these institutions. Savings arise from effecting changes in public sector spending habits and instituting cost-cutting measures. Over the period ahead, government is to reform procurement systems, rationalise public entities and review a range of programmes – in order to accommodate increased spending on government's priorities in the attainment of its desired outcomes.

During the Budget process, judgements on value for money in achieving outcomes are made by examining funding requests in relation to the implementation plans and costings presented, among other considerations. There is extensive consultation with departments, agencies and intergovernmental forums before proposals are presented to the ministers' committee on the budget¹, approved by Cabinet and then tabled in Parliament.

National departments undertook a rigorous budget baseline savings exercise, and identified R23 billion in savings over the medium term: R6.5 billion in 2010/11, R8.6 billion in 2011/12 and R7.9 billion in 2012/13.

1. A committee of cabinet ministers tasked with considering budgetary issues before they are presented to Cabinet.

About R2.6 billion in savings has been identified over the three years at local government level. Every endeavour was made to decrease spending on non-core goods and services, reschedule expenditure over time in the case of delays, effect exchange rate savings in respect of payments to foreigners, reduce transfers to certain public entities, improve financial management, reduce expenditure on administration in favour of frontline services and find alternative sources of financing.

Major savings amounts over the medium term expenditure framework period are:

- Defence and Military Veterans: R4.5 billion (cancellation of the A400M military aircraft contract)
- Social Development: R1.2 billion (slower uptake of social grants than anticipated and rationalisation of the South African Social Security Agency payments system)
- International Relations and Cooperation: R1.5 billion (revision of foreign costs and deferral of the building of the Pan African Parliament)
- Correctional Services: R4.8 billion (rescheduling of prison building plans)
- Transport: R3.4 billion (deferral of public transport infrastructure projects where planning and design have been delayed).

Additional allocations

The revised national Budget framework provides for additional expenditure by departments of R20.7 billion in 2010/11, R26 billion in 2011/12 and R39.9 billion in 2012/13. Including the government savings of R25.6 billion identified across all spheres, in total an additional R112.2 billion is allocated to government institutions to fund government's key priorities over the next three years. Of the R112.2 billion, national departments receive R56.2 billion (50.1 per cent): R13.1 billion in 2010/11, R18.2 billion in 2011/12 and R24.8 billion in 2012/13. Provinces and municipalities receive the remainder. Conditional grants to provinces and municipalities are reflected in both national budgets and the budgets of provinces or municipalities.

A summary of additional funding by national vote is provided below. Information on direct charges against the National Revenue Fund and the amounts for the provincial and local equitable shares are excluded. Adjustments to provincial and local conditional grants have been included. Details are only noted for national votes receiving relatively large additional allocations for implementing new programmes or extending existing programmes. The total amounts per vote in the discussion below represent the gross additional allocations, before the deduction of savings. This means that these total amounts are all bigger than the overall net change in the budget of a particular vote and therefore they do not balance to the amounts reflected in table 2. In the discussion that follows, these vote totals will be referred to as the *gross total allocation*, received over the MTEF period. In some instances, the savings on a specific vote exceed the *gross total allocation* to that vote and the overall net change in the budget is actually negative.

Central government and financial and administrative services

An amount of R448 million is the gross total allocation to **Parliament's** vote. This is mainly to enhance the capacity of the Office of the Speaker, including provision for the establishment of a budget office in terms of the Money Bills Amendment Procedure and Related Matters Act (2009). Also included is provision for increasing the capacity of the Parliamentary oversight committees.

National Treasury receives an addition of R1.1 billion for the neighbourhood development partnership grant for the regeneration of townships through the development of social and economic infrastructure. An amount of R1.5 billion is allocated in the first two years of the MTEF period for the recapitalisation of the Land Bank.

Social services

The gross total allocation to **Health** amounts to R8.8 billion, most of which is for transfers to the provinces. R8.4 billion is provided for the broadening of HIV and AIDS treatment programmes, in support of the rapid expansion of the antiretroviral treatment rollout. R50 million has been set aside for a mass immunisation campaign to combat measles and polio.

Social Development's gross total allocation is R12.5 billion, mainly this is for the extension of the child support grant up to 18 years of age, as a major intervention against child poverty.

Most of the gross total allocation of R3.1 billion to **Basic Education** is for transfers to provinces. An amount of R2.7 billion is allocated for the provision of workbooks in all official languages for grades R to 9, and R28 million is provided for national numeracy and literacy assessments for grades 3, 6 and 9. An additional R120 million is allocated for the national school nutrition programme.

A gross total allocation of R2.4 billion is set aside for **Higher Education and Training**, of which R1 billion is for subsidies for higher education institutions and R1.3 billion is a provincial conditional grant for further education and training colleges.

Justice, crime prevention and security

Police is allocated additional funding of R1.5 billion for an increase in police officers, the establishment of the Directorate for Priority Crime Investigation (the Hawks) and police station property management.

Gross total allocations to **Defence and Military Veterans** amount to R4.7 billion. R2.2 billion is for improving the South African National Defence Force remuneration system. R220 million is provided for expanding the military skills development system intake and R600 million for upgrading the *Landward Defence* programme.

Correctional Services is to receive gross total additional funding amounting to R2.8 billion. This covers the cost of the occupation specific salary dispensation for correctional officials and the impact of the general government employee wage increase.

Economic services and infrastructure

Human Settlements is to receive a R1 billion allocation for upgrading informal settlements and establishing community settlements. The rural household infrastructure grant is allocated R1.2 billion, specifically to support rural communities.

Funds for **Rural Development and Land Reform** are mostly for the rural development programme. An additional allocation of R860 million is for improving the quality of life within rural communities and broadening the base of agricultural production.

Energy receives a gross total allocation of R4.6 billion. R4.5 billion is to provide for part of the capital costs of building a pipeline for fuel from Durban to the Highveld. This allocation will be financed through the fuel levy imposed for this purpose.

Cooperative Governance and Traditional Affairs has a gross total allocation of R10.7 billion. The biggest vote allocation provides for an increase of R2.5 billion for the municipal infrastructure grant, to enable the further expansion of basic services infrastructure delivery aligned to government's 2014 universal access goals. R1.5 billion is allocated for the community work programme, within the expanded public works programme, which enables the non-governmental sector to assist government in providing guaranteed employment on a project basis.

A gross total allocation of R3.8 billion is set aside for **Trade and Industry**. Of this, R3.5 billion is shared equally by the clothing and textile sector and the automotive industry. A further R274 million is allocated for critical infrastructure and regulatory institutions such as the Competition Commission, the Companies and Intellectual Property Commission and other consumer orientated institutions.

Transport's R2.9 billion gross total addition includes funding for the secondary strategic road network, the Passenger Rail Agency of South Africa and the procurement of buses for the 2010 FIFA World Cup.

The main allocation of R500 million for the **Water Affairs** vote is for regional bulk infrastructure to roll out the basic services and water supply in support of human settlement development, in line with government's commitment to universal access by 2014. R498 million is also allocated for the working for water and working on fire programmes, within the expanded public works programme.

Overview of expenditure

The main Budget provides for total expenditure of R818.1 billion in 2010/11, increasing to R888.3 billion in 2011/12 and R964.3 billion in 2012/13. Non-interest expenditure comprises on average 90.1 per cent of total main Budget expenditure, and grows at an average annual rate of 7.6 per cent over the MTEF period. These budgeted estimates provide for a contingency reserve set aside to deal with unanticipated events, amounting to R6 billion in 2010/11, R12 billion in 2011/12 and R24 billion in 2012/13.

The allocations in the main Budget are detailed in the pages of this publication, with a consolidated account provided in the summary tables below.

1. Amounts include mega infrastructure projects and programmes (over R300 million per year for a minimum of three years, or R900 million total project cost), large projects and programmes (between R300 million and R50 million per year within a given MTEF period), small projects and programmes (less than R50 million per year). Infrastructure transfers to other spheres, agencies and entities, fixed installations transferred to households and maintenance and repair projects are also included. Details are provided in the additional tables in each vote.

1. Departmental receipts exclude extraordinary receipts which are deposited into the National Revenue Fund. Extraordinary receipts are included in the Budget Review.

Information contained in each chapter

The Estimates of National Expenditure publication describes in detail the planned spending of all national government departments for three years going forward: that is, the years of the medium term expenditure framework (MTEF). The Estimates of National Expenditure is tabled in Parliament by the Minister of Finance on the day the main Budget is tabled. It provides details about the allocation of expenditure to all national departments set out in the appropriation bill, which is tabled on the same day.

The appropriation bill is divided into votes. A vote generally specifies the total amount appropriated per department. Each chapter in the Estimates of National Expenditure relates to a vote. By appropriating funds from the National Revenue Fund through the approval of the appropriation bill, Parliament authorises expenditure.

Votes are arranged into the following functional groupings to facilitate analysis of interdepartmental initiatives and service delivery.

- central government administration
- financial and administrative services
- social services
- justice, crime prevention and security
- economic services and infrastructure.

These functional groupings are informal and are not the same as either the government's cluster system groupings or the standard chart of accounts' more rigorous classification of government functions.

The Estimates of National Expenditure booklets for individual votes are available on www.treasury.gov.za. They provide more comprehensive coverage of vote specific information, particularly about goods and services, transfers, public entities and lower level institutional information.

The chapter for each vote contains the following information:

Budget summary

This table shows the budgeted expenditure for the vote for the MTEF period.

R million	2010/11					2011/12	2012/13
	Total to be Appropriated	Current payments	Transfers and subsidies	Payments for capital assets	Payments for financial assets	Total	Total

Item							
Total expenditure estimates							
Executive authority	Minister						
Accounting officer	Director-General / Chief Operating Officer						
Website address							

Due to rounding off, the figures do not necessarily add up to the total. Figures are mostly denoted in rand million unless otherwise indicated.

The **2010/11 total to be appropriated** shows the expenditure allocation for 2010/11 and corresponds with the information in the 2010 Appropriation Bill.

The totals to be appropriated by Parliament are categorised by economic classification into **current payments, transfers and subsidies, payments for capital assets** and **payments for financial assets**.

Current payments are payments made by the department for its operational requirements.

Transfers and subsidies are payments made by the department for which the department does not directly receive anything in return.

Payments for capital assets are payments made by a department for an asset that can be used for more than one year and from which future economic benefits or service potential are expected to flow.

Payments for financial assets mainly consist of payments made by departments as loans to public corporations or as equity investments in public corporations. The reason for expensing the payments rather than treating them as financing is that, unlike other financial transactions, the purpose of the transaction is not profit oriented. This column is only shown in departments where such payments have been budgeted for. Payments for theft and losses are included in this category; however, these payments are not budgeted for and will thus only appear in the historical information, which can be seen in the expenditure estimates table.

Estimates for the two outer years of the expenditure framework, **2011/12** and **2012/13**, are also shown. These estimates are not included in the 2010 Appropriation Bill as they are still only indicative of actual expenditure levels in the outer years of the MTEF period. Parliament typically only appropriates or authorises expenditure for one financial year at a time. These forward estimates or indicative allocations do, however, form the basis for the planning of the 2011 Budget.

Direct charges against the National Revenue Fund are amounts appropriated in terms of statutes and do not require parliamentary approval. They are not budgeted for in terms of a programme on a particular vote and include, for example, state debt costs.

The last lines of the table provide accountability information: the department's executive authority, accounting officer and website address.

Aim

The aim of the vote captures the department's mandate, strategic objectives or its administrative functions, and corresponds with the aim stated in the appropriation bill.

Programme purposes

Each vote is comprised of several programmes. The activities and functions performed by a department are typically divided into these programmes. Programme 1 is the *Administration* programme, which houses the administrative activities and functions required to keep the department operating. Each vote programme is listed individually with its purpose, as stated in the appropriation bill. The programme purpose outlines the activities and functions of the particular programme as per the approved budget programme structure, in terms of the Public Finance Management Act (1999).

Strategic overview: 2006/07 – 2012/13

This section describes the department's strategic direction over the period under review. It includes policy and mandate developments and legislative changes as well as a table of selected quantitative and trendable performance indicators.

Savings and cost effective service delivery

In this section, departments discuss details of the cost savings measures and reprioritisation of budgets effected in the 2009/10 financial year and to be effected over the MTEF period ahead.

Savings typically emanate from reduced expenditure on non-core goods and services, the rescheduling of expenditure over time in the case of delays, reduced transfers to certain public entities, improved financial management, reduced expenditure on administration in favour of frontline services and through seeking alternative sources of financing.

Selected performance indicators

Indicator	Programme	Past			Current	Projections		
		2006/07	2007/08	2008/09	2009/10	2010/11	2011/12	2012/13

The table presents only a selected set of a department or entity's performance information and is not intended to provide a comprehensive view of performance.

An **indicator** is a numerical measure that tracks a department's or entity's progress towards its goal. An indicator may measure inputs, activities, outputs, outcomes or in certain instances explanatory information relating to the internal or external environment.

The **programme** column links the indicator to the programme associated with it.

Expenditure estimates

This table shows expenditure outcomes and estimates over a seven-year period, by vote programme and by economic classification item.

Programme	Audited outcome			Adjusted appropriation	Revised estimate	Medium-term expenditure estimate

Economic classification item			
Payments for financial assets			
Total			

Expenditure is set out first by **programme** and then by **economic classification** over a seven-year period.

For comparability, where programme structures have been changed in recent years, expenditure has, where possible, been reallocated to the new approved programme structure for all seven years. The president's appointment of ministers and deputy ministers after the 2009 general elections has necessitated a reorganisation of national departments, including renaming departments and establishing new departments. As a result, functions may have shifted between departments as a whole or in part, and new functions may have been defined.

Audited outcomes are presented as they appear in the department or entity's annual financial statements, with amounts reallocated for any subsequent approved budget programme structure changes.

Adjusted appropriation includes the changes made to the appropriation voted in the 2009 main Budget for the financial year, with amounts reallocated for any subsequent approved programme structure changes. Changes are generally made mid-year at the time of the adjustments budget. These adjustments can only be made in terms of the circumstances listed in section 30 of the Public Finance Management Act (1999). Adjustments are included in the adjustments appropriation bill, which Parliament approves before expenditure can take place, and the details are published in the Adjusted Estimates of National Expenditure publication.

The **revised estimate** for 2009/10 represents National Treasury's current estimate, in consultation with the department, of expenditure outcomes. This does not imply a change in the amounts voted to departments in the 2009/10 adjusted appropriation; it is merely a more recent estimate of what the department will indeed spend.

The **medium-term expenditure estimates** are shown for 2010/11, 2011/12 and 2012/13. The spending figures for 2010/11 constitute the proposed appropriation to be funded from the National Revenue Fund that is contained in the main appropriation bill, which has to be considered by Parliament after it has been tabled. The medium-term expenditure estimates for 2011/12 and 2012/13 are indicative allocations, and will form the basis for planning the 2011 Budget.

Direct charges against the National Revenue Fund are amounts appropriated in terms of statutes and do not require parliamentary approval. They are not budgeted for in terms of a programme on a particular vote and include, for example, state debt costs.

The **totals**, which are the sum of the expenditure on programmes and direct charges, are also classified into current payments, transfers and subsidies, payments for capital assets and payments for financial assets.

Expenditure trends

The main expenditure trends and vote programme structure changes from 2006/07 to 2012/13 are described. Trends are generally represented over the MTEF period between 2009/10 and 2012/13, or over the entire period between 2006/07 and 2012/13.

An explanation of the spending focus over the MTEF period in relation to the strategic objectives and the performance targets that will be achieved over the period is given. Expenditure growth in the historical period is also typically compared to expenditure anticipated over the MTEF period. Reasons are given for trends that are identified, and the significant increases or decreases in expenditure are explained in terms of the underlying policies and service delivery objectives that inform the trends. A summary of the new (additional) allocations to the vote programme's baseline budget is given. The baseline is derived from the previous year's forward estimates. Expenditure on existing and new infrastructure is discussed.

Generally, unless otherwise indicated, average annual growth rates are reflected in nominal, not real, terms. Where inflationary growth has been excluded from the calculation and real growth estimates are provided, the consumer price index has been used to deflate the growth rate.

Departmental receipts

Departmental (non-tax) receipts for 2009/10 are described, as well as the anticipated receipts for the MTEF period.

R thousand	Audited outcome			Adjusted estimate	Revised estimate	Medium-term receipts estimate

Economic classification item								
Economic classification item								
Total								

Information on each programme

Each programme section (with the exception of the *Administration* programme) opens with the purposes of the subprogrammes that form that programme. The details of functions performed within subprogrammes and the principle for distributing funds across spending areas within subprogrammes are also described.

Programme 1 is always *Administration*, which includes spending on the ministry, the director-general's office and central corporate services.

Objectives and measures

Objectives and measures are indicated for each programme. Objectives should include an explanation of strategic intent as well as specific interventions and progress measures. (Programme 1 (*Administration*) is generally exempt from providing objectives and measures.)

For example: Improve service to eligible citizens and residents (objective) by reducing the time taken to issue passports and travel documents (specific intervention) from 10 days in 2008/09 to 5 days in 2011/12 (progress measure).

Service delivery focus

Information is provided on recent achievements for each programme, including service delivery and operational achievements for the previous year and for the current financial year to date. Reports are given relative to the targets that were presented in previous Estimates of National Expenditure and Adjusted Estimates of National Expenditure publications.

Expenditure estimates (per programme)

Tables for each programme set out expenditure by subprogramme and economic classification over a seven-year period.

Subprogramme	Audited outcome			Adjusted appropriation	Medium-term expenditure estimate

Expenditure trends (per programme)

Important expenditure trends for each programme are explained. The scope of the information provided in this section is similar to what is provided for the entire vote.

Public entities and other agencies

Where appropriate, the discussion of an entity is linked to a specific vote programme and is shown directly after the discussion of that programme.

The scope of information contained in the write-up on public entities is similar to what is reported for the department.

Information on each of the public entities generally consists of the following:

- key legislative mandates in terms of which the entity was established and within which it operates
- selected performance indicators relating to the entity's mandate
- planned deliverables for the next MTEF period
- key objectives achieved during the previous reporting periods
- financial data tables for the entity, focusing on the sources of funding for the entity, key spending areas and expenditure trends, and if applicable an analysis of some of the more important items on the entity's balance sheet
- reprioritisation and savings measures implemented.

Additional tables

Additional tables appear at the end of the vote. These include:

Summary of expenditure trends and estimates per programme and economic classification

This table shows the budgeted expenditure as well as the audited outcome and revised estimate for 2008/09 and 2009/10 respectively.

Summary of personnel numbers and compensation of employees

Employment information is provided in respect of the department. The amount spent by a department on compensation of employees is shown.

Information is provided on different categories of employees.

The **unit cost** refers to the average cost per person employed by the department. It is calculated by dividing the compensation figure by the personnel numbers.

Personnel numbers refers to the physical number (head count) of people employed by the department.

Details of establishment and personnel numbers per salary level

Employment information is provided in respect of the department. The amount spent by a department on compensation of employees is shown.

Information is provided on the number of posts in the department at different salary levels **per programme** as at 30 September 2009.

Number of posts on approved establishment refers to the number of departmental employment positions approved by the Department of Public Service and Administration.

Number of funded posts refers to the number of departmental employment positions which are provided within the budget.

Number of posts additional to the establishment typically refers to additional employment positions that have been allocated on an ad hoc basis and that do not form part of the approved departmental establishment.

Summary of expenditure on training

Information is provided on the funds spent on training, and the number of people trained by the department.

Summary of conditional grants to provinces and municipalities

A conditional grant refers to an allocation made by the national government, from its nationally raised revenue, to a province, local government or municipality, on condition that certain requirements or services are met.

Summary of departmental public private partnerships projects

Disclosure notes with additional details are provided for the projects signed in terms of Treasury Regulation 16.

Public private partnerships refer to contractual arrangements in which a private party performs part of a government function and assumes the associated risks. In return, the private party receives a fee according to predefined performance criteria. A public private partnership may also be a project in which a private party uses state assets for its own commercial purposes, and government benefits from the profits generated by the enterprise.

Unitary fee refers to the total payment made to the private party for the provision of all types of services.

A **signed** project is a public private partnership project which has reached financial close and is being implemented.

Projects in preparation are in some stage of inception, feasibility or procurement, but have not yet reached financial close.

Project monitoring costs are associated with the ongoing evaluation and monitoring of public private partnerships in operation.

Advisory fees are costs related to the hiring of transaction advisors who assist government with feasibility studies and procurement in the public private partnership project process.

Revenue generated is shown in cases where public private partnership projects have revenue generating potential such as tourism projects or toll roads.

Summary of donor funding

Donor funding is funding received by departments over and above the allocations provided in the South African government's appropriation legislation.

Donor funding comprises official development assistance and other local and international donations.

Official development assistance is an official resource flow from the international donor community to the South African government in the form of grants, technical cooperation and financial cooperation.

The **programme** column links the donor funding to the vote programme that is associated with it.

The **spending focus** shows what the department aims to achieve by using the funding.

Summary of expenditure on infrastructure

The infrastructure table includes new and replacement assets, maintenance and repairs, upgrades and additions, and rehabilitation, renovation and refurbishment of assets.

Infrastructure transfers to other spheres, agencies and departments refers to transfers and grants to other government components for expenditure on infrastructure.

Fixed installations transferred to households shows the transfer of funds to individual South Africans to be used for the construction of fixed 'on-site' structures that enhance the welfare of households.

Maintenance on infrastructure refers to all maintenance, repairs and refurbishment expenditure on infrastructure that prolongs the life and retains the value of the infrastructure asset. This item does not include day-to-day maintenance.

In all tables a dash (-) indicates that information is unavailable or zero.

Aim

The aim of the Department of Women, Children and People with Disabilities is to drive, accelerate and oversee government's equity, equality and empowerment agenda on women, children and people with disabilities especially in poor and rural communities.

Programme purpose

Programme 1: Administration

Purpose: Effective leadership, management and administrative support services to the minister and other branches in the department.

Programme 2: Women Empowerment and Gender Equality

Purpose: Facilitate the translation of national and international instruments into empowerment and socioeconomic development programmes, as well as to oversee and report comprehensively on the national realisation of women's rights and the progressive realisation of equality.

Programme 3: Children's Rights and Responsibilities

Purpose: Consolidation of the children's rights agenda and alignment of conceptual frameworks and strategies across the three spheres of government to advance delivery against Constitutional and international instruments.

Programme 4: Rights of People with Disabilities

Purpose: Strengthen strategic leadership and management of the national and international instruments for the realisation of the rights of people with disabilities.

Strategic overview: 2009/10 – 2012/13

The intention to establish this new department was announced in May 2009. This was a response to the realisation that the operating authority and budget of the former offices on the status of women, rights of the child and status of people with disabilities in The Presidency had not been adequate in providing the necessary strategic leadership and management of the issues affecting these groups. The new structure will thus ensure that each of the three areas has the necessary authority to: interface effectively in government and civil society; secure critical competencies and technical skills; and to advance equality, empowerment and the development of women, children and people with disabilities.

Main objective

The department's main objective is to formulate and lead the strategic agenda of government on women empowerment and gender equality, children's rights and responsibilities, and the rights and equality of people with disabilities. In realising its main objectives the department aims to: collaborate with civil society to ensure conditions for integrated transformation in the three sectors; improve government's capacity to align planning across the three spheres of government; monitor policy implementation and the realisation of sector specific targets for attaining the national goal to halve poverty and unemployment by 2014; and develop global partnerships to strengthen the development of women, children and people with disabilities.

Policy focus over the medium term

The following priority imperatives will shape the outputs of the department over the medium term: the consolidation and management of a national vision and national strategy to ensure coherence in the protection of the rights and development of women, children and people with disabilities; leadership in the development, management and oversight of compliance obligations in relation to matters affecting women, children and disabilities at the national, regional and international levels; and the development of indicators and systems for disaggregated data on women, children and disabilities, to feed into the broader government wide monitoring and evaluation system.

The department will place particular emphasis on facilitating access to rights and development opportunities for women, children and people with disabilities in poor and rural communities, especially in relation to the protection of the rights of HIV and AIDS infected and affected people in the three groups. It will also focus on making sure that issues affecting women, children and people with disabilities become part of the broader African agenda.

The department is developing policies, systems and procedures aimed at ensuring that national departments, provinces and municipalities support the delivery of the department's mandate.

Selected performance indicators

Table 7.1 Women, Children and People with Disabilities

Expenditure trends

Between 2006/07 and 2009/10, the following were subprogrammes within the Presidency: the Office on the Status of Women, the Office on the Rights of the Child and the Office on the Status of People with Disabilities. These subprogrammes have now been moved into the Department of Women, Children and People with Disabilities, whose mandate includes operating these subprogrammes.

Expenditure grew at an average annual rate of 11.2 per cent between 2006/07 and 2009/10, from R49.6 million to R68.2 million. Over the MTEF period, expenditure is expected to increase substantially at an average annual rate of 19 per cent to reach R114.9 million in 2012/13. The anticipated substantial increase in the department's expenditure over this period is due to the initial costs in setting up the department, which include operating and support systems for the new minister, recruitment of staff, capital expenditure relating to the refurbishment of premises, setting up of IT infrastructure, and mandate implementation costs.

Expenditure trends

Over the MTEF period, the *Administration* programme will be incurring significant initial expenditure for setting up the department. Expenditure is set to increase from R4.2 million in 2009/10 to R26 million in 2012/13, at an average annual rate of 84.1 per cent. This will provide for expenses related to moving the department into its own offices, refurbishment, IT infrastructure, and office furniture, equipment and fittings.

Programme 2: Women Empowerment and Gender Equality

- *Policy and Planning* covers the policy review and planning functions necessary for the translation of policy into women empowerment, and transformation and socioeconomic development programmes in the three spheres of government.
- *Mainstreaming and Capacity Development* covers the functions required for integrated action and synergy among government, civil society and the private sector.
- *Monitoring and Evaluation and Research* covers the functions of tracking delivery on constitutional, regional and international mandates.
- *Commission for Gender Equality*

Funding in these subprogrammes will mainly be used for compensation of employees and goods and services such as office equipment.

Objectives and measures

- Accelerate the empowerment of women over the MTEF period by:

- mainstreaming women empowerment and gender equality considerations into governance processes in all three spheres of government
- developing and maintaining a monitoring and evaluation framework
- adapting international and continental instruments into local gender equity initiatives
- developing and managing women empowerment and gender equality catalytic projects
- facilitating public private partnerships in the interests of women.

Service delivery focus

Over the medium term, this programme will use the assigned authority, related skills, competencies and funding to consolidate gender equality achievements and systems and advance empowerment and gender equality.

Expenditure trends

The largest portion of this programme's budget is taken up by transfer payments to the Commission for Gender Equality, which increased from R37.8 million in 2006/07 to R49.1 million in 2009/10, at an average annual rate of 9.2 per cent, and is expected to increase to R57.9 million in 2012/13, at an average annual rate of 5.7 per cent.

Over the medium term, overall programme expenditure is anticipated to increase at an average annual rate of 8 per cent, from R54.1 million in 2009/10 to R68.2 million in 2012/13, to cater for increased staff capacity to deliver on the programme's mandate.

Programme 3: Children's Rights and Responsibilities

- *Policy and Planning* covers the policy review and planning functions required to align children's rights and responsibilities at the three spheres of government.
- *Mainstreaming and Capacity Development* deals with functions required for integrated action on children's rights and synergy in government, including collaboration with civil society and the private sector.
- *Monitoring and Evaluation and Research* covers the functions of tracking delivery on constitutional, regional and international mandates.

Funding in these subprogrammes will mainly be used for compensation of employees and goods and services.

Objectives and measures

- Ensure the realisation of children's rights and responsibilities over the MTEF period by:
 - providing leadership and support for planning, coordination, oversight and comprehensive reporting in the national children's rights and responsibilities programme
 - developing and maintaining a children's rights and responsibilities monitoring and evaluation framework
 - developing and managing catalytic projects for children's rights and responsibilities
 - facilitating public private partnerships in the interests of children

- participating in sectoral coordination and in country children's rights forums.

Service delivery focus

Over the medium term, this programme will use the assigned authority, related skills, competencies and funding to consolidate children's rights achievements and systems and advance delivery on the rights and age appropriate responsibilities of children.

Expenditure trends

Expenditure grew from R4.1 million in 2006/07 to R5 million in 2009/10, at an average annual rate of 6.3 per cent. Over the medium term, expenditure is expected to increase significantly at an average annual rate of 27.7 per cent, from R5 million to R10.3 million, to cater for the appointment of staff to deliver on the programme's mandate.

Programme 4: Rights of People with Disabilities

- *Policy and Planning* covers the policy review and planning functions required to align conceptualisation at the three spheres of government, and ensures equity and quality of life for people with disabilities.
- *Mainstreaming and Capacity Development* covers the functions required for integrated action on disabilities and synergy in government and in collaboration with civil society and the private sector.
- *Monitoring and Evaluation and Research* covers the functions of tracking delivery on constitutional, regional and international mandates.

Funding in these subprogrammes will mainly be used for compensation of employees and goods and services.

Objectives and measures

- Ensure the progressive realisation of the rights of people with disabilities over the MTEF period by:
 - reviewing and facilitating amendments to policies and legislation with the potential to advance the rights of people with disabilities
 - developing and maintaining a monitoring and evaluation framework for the rights of people with disabilities
 - adapting continental and international instruments on people with disabilities into local initiatives
 - developing and managing catalytic projects for the rights and responsibilities of people with disabilities in line with constitutional and international mandates
 - facilitating public private partnerships in the interests of people with disabilities
 - coordinating and participating in forums on the rights of people with disabilities regionally and internationally.

Service delivery focus

Over the medium term, this programme will use the assigned authority, related skills, competencies and funding to consolidate the achievements in the rights of disabled people rights, as well as systems to advance delivery on the rights, equality and development of people with disabilities.

Expenditure trends

Expenditure grew from R4.3 million in 2006/07 to R5 million in 2009/10, at an average annual rate of 5.1 per cent. Over the medium term, expenditure is expected to increase significantly at an average annual rate of 27.7 per cent, from R5 million to R10.3 million, mainly to cater for the appointment of staff to deliver on the programme's mandate.

Public entities

Commission for Gender Equality

Strategic overview: 2006/07 – 2012/13

The Commission for Gender Equality is an independent statutory body established in terms of section 187 of the Constitution of the Republic of South Africa (1996). The powers and functions of the commission are further outlined in the Commission on Gender Equality Act (1996), and its specific mandate is to advance gender equality through monitoring, investigating, educating, researching, lobbying, advising and reporting.

The commission's priorities are in line with government's renewed focus on support to vulnerable people:

Through consultative processes, the commission will engage with stakeholders on the social impact of working women in relation to maternity benefits to develop awareness on the inherent discrimination in the current legislative framework.

In the absence of specific legislation on human trafficking, the commission will heighten its advocacy interventions, especially among vulnerable communities.

As part of extending the protection of sex workers' rights, the commission will increase awareness and engage government to fast-track the decriminalisation of sex work.

The objective of the gender barometer tool is to assess the extent of gender mainstreaming in all spheres of government and to publicise information and share recommendations with Parliament and government departments. The rollout of the barometer started in 2009/10 and should be completed by 2011/12. In 2009/10, training on the tool was offered to internal staff, specifically officers who will provide support to government departments. Engagement with deputy directors-general of national departments is under way to ensure compliance by the respective departments.

The commission monitors government's compliance with its obligations under the Convention on the Elimination of all forms of Discrimination Against Women.

The Beijing +15 platform for action identified 12 critical areas of concern. The commission will focus on those activities which are in line with its own thematic areas.

Over the medium term, the commission will focus on its monitoring functions by using the gender barometer, the Convention on the Elimination of all forms of Discrimination Against Women and the Beijing platform for action. Reports will be produced and tabled in Parliament. The commission will continue its advocacy work on international instruments and gender related matters. In addition, the commission will heighten the speedy resolution of gender related complaints received from the general public in order to ensure maximum protection to everyone, as envisaged in the Commission on Gender Equality Act (1996).

Savings and cost effective service delivery

The Commission for Gender Equality's savings measures include: stringently managing telephone costs, targeting a 15 per cent reduction in 2009/10; cancelling non-essential plant hire contracts; reducing travel expenses by having more teleconferences; and eliminating all unfunded and non-essential positions. Over the medium term, the commission envisages replicating these savings through ongoing internal control measures undertaken by management.

Selected performance indicators

Service delivery focus

In 2008/09, out of 649 complaints lodged by the public for investigation by the commission, 348 cases were finalised, representing 54 per cent against a target of 67 per cent. The underperformance is due to vacant positions for legal officers in some of the provincial offices. These vacancies were filled in 2009/10 and it is therefore anticipated that performance will improve as per the projections. The commission has also litigated 2 cases from 7 cases received on behalf of the public.

In 2008/09, the commission conducted 27 legal clinics out of the 36 planned. For 2009/10, no legal clinics were planned or conducted as the emphasis shifted more to advocacy work to educate the public through dialogues and similar awareness interventions.

146 gender dialogues were held in 2008/09 against a target of 204. The target was not met due to capacity constraints within the institution. To meet its future targets, 5 provincial vacancies need to be filled with urgency. The target for 2009/10 is 170 gender interventions/dialogues, of which 57 have been finalised. The ongoing problem of not being able to fill vacancies within the commission has resulted in the very slow rollout of planned activities.

10 short concept papers and discussion papers were finalised in 2008/09, meeting the target. For 2009/10 it is projected that 14 concept/discussion papers will be developed. 10 have been finalised thus far.

Private sector companies will be monitored in January and February 2010 against the gender barometer tool. 92 government departments were monitored in 2008/09, and the target for 2008/09 is 94.

Expenditure trends

The Commission for Gender Equality is primarily funded through transfers from the Department of Justice and Constitutional Development. Between 2006/07 and 2009/10, the commission's budget grew at an average annual rate of 9.5 per cent, rising from R37.8 million to R49.5 million. The commission has been allocated a budget of R51.9 million in 2010/11, R55.2 million in 2011/12 and R57.9 million in 2012/13. This represents growth at an average annual rate of 5.7 per cent. Over the medium term, additional allocations of R1 million, R1.1 million and R1.2 million are allocated for salary adjustments.

Total expenditure increased at an average annual rate of 14.2 per cent between 2006/07 and 2008/09. Expenditure is expected to increase at a slower average annual rate of 5.7 per cent between 2009/10 and 2012/13, rising from R33.2 million in 2006/07 to R58.5 million in 2012/13. The key cost drivers are personnel expenditure and goods and services.
