Estimates of National Expenditure

2020

**National Treasury
Republic of South Africa**

ISBN: 978-0-621-48100-6

RP: 18/2020

The 2020 Estimates of National Expenditure is compiled with the latest available information from departmental and other sources. Some of this information is unaudited or subject to revision.

The Estimates of National Expenditure e-publications for individual votes are available at www.treasury.gov.za. Compared to the abridged Estimates of National Expenditure publication, the e-publications for each vote contain more comprehensive coverage of all public entities, transfers and subsidies and information on programme specific personnel expenditure.

Foreword

The Estimates of National Expenditure (ENE) publications remain an integral part of the annual budgeting process. In light of the prevailing economic climate, which requires careful consideration around the management of public funds, it has become necessary to focus our efforts on reprioritising existing government resources to areas where the most value can be derived for the benefit of all South Africans. To alleviate fiscal pressures, reductions have been effected on the baseline budgets of departments and public entities. The budgets unpacked in this document reflect the outcome of a robust negotiation process, which was led by a committee of senior officials in central government departments under the political guidance of the Ministers' Committee on the Budget. There was also wide-ranging intergovernmental consultation on budgets in the provincial and local spheres of government. Ultimately, the budgetary proposals emanating from these negotiations and consultations were considered and approved by Cabinet.

The abridged ENE provides a comprehensive account of the priorities, spending plans and service delivery commitments of the 41 national government votes, and for selected public entities. The e-publications for each vote, which are available on National Treasury's website, contain further details on goods and services, transfers and subsidies, other public entities, and lower-level spending information on service delivery. In addition, the Vulekamali online portal serves as a transparent, user-friendly source of information that includes supplementary detailed data as contained in the ENE publications. The portal is a valuable resource for anyone to learn about how government compiles its budget and spends public funds.

The Open Budget Survey, which is published biannually by the International Budget Partnership, assesses and ranks countries based on the availability of 8 key budget documents and the comprehensiveness of the data presented in these documents. In the latest survey, published in 2017, South Africa ranked joint first out of 102 countries with a score of 89 per cent. The next survey is expected to be published in 2020/21 and hopefully South Africa will retain that first position.

All information presented in the ENE publications and Vulekamali promotes a culture of public engagement, accountability in state institutions, and the appropriate spending of public funds to achieve the outcomes as envisaged in the National Development Plan.

A special thanks is extended to all contributors and government colleagues who assisted in making this possible, especially the political leadership shown by the executive and the spirited efforts of the National Treasury team.

Dondo Mogajane
Director-General: National Treasury

Introduction

Estimates of National Expenditure publications

Estimates of National Expenditure (ENE) publications describe in detail government's expenditure plans over the next three financial years, also known as the medium-term expenditure framework (MTEF) period. The 2020 MTEF period is from 2020/21 to 2022/23.

The ENE publications contain detailed information regarding the allocations set out in the Appropriation Bill, for the current financial year. Government's proposed spending plans for the full MTEF period, are shown. Information on how government institutions have spent their budgets in previous years is also included. Explanations are provided on how institutions intend to use their allocations over the medium term to achieve their goals, and the outputs and outcomes to which their spending is expected to lead. Tables present non-financial performance indicators and targets, departmental receipts, and detailed expenditure trends and estimates by programme, subprogramme and economic classification, and programme personnel data tables for each vote and all entities. Brief explanatory narratives set out the institution's purpose (and that of its programmes), mandate, programme-level objectives and descriptions of subprogrammes. An in-depth narrative analyses the institution's expected expenditure over the MTEF period.

Additional data tables containing information on provincial and municipal conditional grants, public-private partnerships, donor funding, infrastructure spending and information at the level of site service delivery, where applicable, are available on the National Treasury website and the Vulekamali online portal.

A separate 2020 ENE Overview publication is also available on the National Treasury website and summarises the ENE information across all votes. The 2020 ENE Overview contains a narrative explanation and budget-wide summary tables; and it also has a write-up on how to interpret the information that is contained in each section of the publications.

The Estimates of National Expenditure e-publications for individual votes are available at www.treasury.gov.za. These publications provide more comprehensive coverage of vote-specific information, particularly about transfers and subsidies, personnel and other public institutions. Additional tables in Excel format can be found at www.treasury.gov.za and www.vulekamali.gov.za.

Vote purpose

Provide or coordinate the provision of learning, training and development interventions that lead to improved performance and service delivery in the public sector.

Mandate

The National School of Government derives its mandate from the Public Service Amendment Act (2007). In terms of the act, the institution is mandated to provide training or effect the provision of training. The school responds to its mandate by developing relevant training and development programmes for delivery to South African public service officials at all levels. Through education and training, the school promotes the progressive realisation of the values and principles governing public administration, and enhances the quality of human resource capacity in public service institutions. The school uses its trading account, which was established in terms of the Public Finance Management Act (1999), as a delivery vehicle for its core output.

Expenditure analysis

Chapter 13 of the National Development plan outlines a vision for building a capable and developmental state that hinges on promoting a culture of excellence in the public service. This vision is given expression by priority 6 (a capable, ethical and developmental state) of government's 2019-2024 medium-term strategic framework, with which the work of the National School of Government is directly aligned. Accordingly, over the medium term, the department plans to focus on contributing towards the fulfilment of the educational, training and development needs of the public service; and revising the trading entity's funding model to ensure that the school generates more revenue.

Expenditure is expected to increase at an average annual rate of 7.9 per cent, from R187.9 million in 2019/20 to R236.3 million in 2022/23. Spending on compensation of employees accounts for 29.9 per cent (R198.3 million) of the department's total expenditure over the medium term. Most of the department's activities are carried out in the *Administration* programme, allocations to which increase at an average annual rate of 4.8 per cent, from R108.1 million in 2019/20 to R124.5 million in 2022/23. Part of spending in the programme includes the outsourcing of services such as IT facilities management.

Contributing towards fulfilling the educational needs of the public service

The department's ongoing and overarching objective is to support excellence in the public service through the provision of appropriate training and development measures. To realise this objective, over the medium term, the department plans to provide strategic leadership to ensure the proper functioning of the school and administration of its training trading account, administrative support such as oversight of personnel-related expenditure, and supply chain management services that relate to the management of official assets and the school's asset register; and conduct internal audits that provide independent and objective assurance and consulting services that are designed to add value and improve the department's operations.

Over the period ahead, the school intends to expand its education, training and development activities across the 3 spheres of government with the intention of promoting quality training and outputs. Accordingly, the school intends to implement 12 mandatory programmes in all spheres of government by March 2023; and induct and train 15 000 public servants annually on quality education, training and development interventions. The school also plans to develop a quality management policy in 2020/21 through which quality training will be monitored.

The department's mandate and objectives are largely executed through transfer payments to the National School of Government training trading account, and other revenue generated from training programmes the school provides to public service employees. Accordingly, transfers to the training trading account constitute 46.7 per cent (R313.3 million) of the department's total expenditure over the medium term. To ensure that the department's operations are sustained, 9 newly registered learning facilities will be made available in each year over the medium term. Related activities are carried out in the *Administration* programme, allocations to which account for 53.3 per cent (R356.9 million) of the department's total budget over the medium term.

Revising the trading entity's funding model

The current cost recovery model of the school's training trading account comprises partial funding from transfers from the department and income generated by training course fees, which are managed in the training trading account. This approach requires that the entity should recover all costs associated with the design and development of learning materials and the implementation of training courses from course fees. In this regard, by 2020/21, the department plans to implement revisions to the trading account's tariff structure to ensure that the school generates more revenue.

Programme 2: Public Sector Organisational and Staff Development

Programme purpose

Facilitate transfer payments to the training trading account, which provides education, development and training to public sector employees.

Objectives

- Ensure competent and ethical public servants who are empowered to do their jobs by:
 - assessing 80 000 public servants through online diagnostic tool assessments to determine skills gaps and needs over the medium term
 - ensuring that 5 000 public servants undergo ethics education, training and development interventions annually
 - reviewing the curriculum and making available 40 active online learning education, training and development interventions available by March 2023.
 - establishing sustainable partnerships and collaboration with local and international stakeholders to support education, training and development interventions by implementing the local and international partnership strategy over the medium term.
- Implement quality education, training and development interventions by:
 - implementing 12 mandatory programmes in all spheres of government by March 2023
 - inducting and training 15 000 public servants annually on quality education, training and development interventions.

Entity overview

The National School of Government training trading account functions within the National School of Government as a mechanism for the partial recovery of the costs of training programmes. The branches of the trading account directly facilitate and monitor the provision of leadership development and management training at all levels of government in collaboration with provincial academies and local government training entities. Over the medium term, the trading account will continue to focus on fulfilling the training needs of the public service by providing inductions and training on administration, management and leadership.

Expenditure is expected to increase at an average annual rate of 5.7 per cent, from R226.4 million in 2019/20 to R267.1 million in 2022/23. Spending on compensation of employees accounts for 55.9 per cent (R388.1 million) of the entity's total expenditure over the medium term. Revenue is expected to increase at an average annual rate of 5.6 per cent, from R226.4 million in 2019/20 to R266.7 million in 2022/23. The entity's revenue is partly derived from transfers from the department, which amount to R313.3 million over the MTEF period. Remaining revenue is generated from course fees for training programmes and interest received, which amount to R450.4 million over the medium term.
