## Programme 2: Lower Court Services

### Programme purpose

Facilitate the resolution of criminal and civil cases by providing accessible, efficient and quality administrative and quasi-legal support to the lower courts and justice service points.

### Objectives

- Deliver modern, accessible and people-centric justice services for all by:
  - increasing the number of court facilities refurbished and upgraded through minor capital works from 82 in 2024/25 to 100 in 2027/28
  - increasing the percentage of child justice preliminary inquiries finalised within 60 days of the date of first appearance from 80 per cent in 2025/26 to 85 per cent in 2027/28
  - increasing the percentage of maintenance matters finalised within 90 days of the date of proper service of process from 90 per cent in 2024/25 to 91 per cent in 2027/28
  - maintaining 70 per cent of certificates issued within 10 working days of the date of receipt of the compliant application of national register of sexual offences clearance over the MTEF period
  - ensuring that 92 district courts are upgraded in line with the national strategy for court-based support services for victims of domestic violence by 2027/28
  - increasing the percentage of decrees of divorce issued by the registrar or assistant registrar within 14 days of the finalisation of divorce from 85 per cent in 2024/25 to 95 per cent in 2027/28
  - increasing the percentage of domestic violence protection orders served by the clerk of the court on the respondent within 24 hours of the time the order is received from the court from 70 per cent in 2024/25 to 85 per cent in 2027/28.

### Subprogrammes

- *Lower Courts* funds the activities and operations of various regional and district courts.
- *Magistrate's Commission* funds the Magistrate's Commission, which makes recommendations on the appointment and tenure of magistrates.
- *Facilities Management* funds the provision of accommodation for courts and justice service delivery points, including the construction of new and additional accommodation and the leasing of privately owned premises for use by the department.
- *Administration of Lower Courts* funds the management of court administration and performance evaluation functions.

## Programme 3: State Legal Services

### Programme purpose

Provide legal and legislative services to government. Facilitate the resolution and mediation of family disputes. Supervise the registration of trusts, and the administration of deceased and insolvent estates and estates undergoing liquidation. Manage the Guardian's Fund. Prepare and promote legislation, facilitate constitutional development and undertake research in support of this.

### Objectives

- Ensure an improved master's service by:
  - increasing the percentage of liquidation and distribution accounts in deceased estates where letters of executorship have been examined and issued within 21 days of receipt of all required documents from 80 per cent in 2024/25 to 95 per cent in 2027/28
  - increasing the percentage of Guardian's Fund applications paid within 40 days of date of receipt of all required documents from 80 per cent in 2024/25 to 95 per cent in 2027/28.
- Ensure the transformation of colonial and apartheid-era justice-related legislation by submitting 14 pieces of colonial or apartheid-era legislation to the minister for review by 2027/28.
- Ensure a transformed state litigation service over the medium term by:
  - maintaining 80 per cent of legal opinions finalised within 30 working days of the date of receipt of the instruction
  - maintaining 80 per cent of suggested bills, regulations and subordinate legislation finalised within 30 working days of the date of receipt of the instruction.
- Ensure a transformed legal profession by:
  - maintaining the percentage of value of briefs allocated to historically disadvantaged legal practitioners at 83 per cent over the MTEF period
  - increasing the percentage of litigation cases settled from 55 per cent in 2024/25 to 58 per cent in 2027/28.
- Ensure advanced constitutionalism, human rights and the rule of law by:
  - increasing the number of strategic interventions towards the promotion and advancement of the constitution, human rights and addressing discrimination and related intolerance from 16 in 2024/25 to 24 in 2027/28
  - increasing the percentage of valid requests for extradition and mutual legal assistance in criminal matters processed and submitted to the director-general within 20 working days of receipt from 88 per cent in 2024/25 to 90 per cent in 2027/28.
- Deliver modern, accessible and people-centric justice services for all by:
  - maintaining the percentage of disputes brought before the family advocate resolved through alternative mechanisms and finalised within 6 months of the date of opening the matter at 85 per cent per year over the MTEF period
  - increasing the percentage of family litigation matters finalised within 6 months of the date of opening the matter from 65 per cent in 2024/25 to 70 per cent in 2027/28.

### Subprogrammes

- *State Law Advisers* provides legal advice, representation and legislative drafting services to the executive, state departments, state-owned enterprises and other government bodies through the Office of the Chief State Law Adviser.
- *Litigation and Legal Services* provides attorney, conveyancing and notarial services to the executive, state departments, state-owned enterprises and other government bodies through the offices of the state attorney and provides legal support to the department and the ministry.

- *Legislative Development and Law Reform* conducts research and prepares and promotes new and amended legislation.
- *Master of the High Court* funds the master's offices, which supervise the administration of deceased and insolvent estates, trusts, curatorships and the Guardian's Fund.
- *Constitutional Development* conducts research; coordinates the implementation of constitutionally mandated legislation such as the Promotion of Equality and Prevention of Unfair Discrimination Act (2000) and the Promotion of Administrative Justice Act (2000); promotes the Constitution and its values; helps and protects independent institutions that support constitutional democracy to ensure their independence and effectiveness; and coordinates, promotes and develops programmes in support of social justice and participatory democracy.
- *Family Advocate* funds family mediations in non-litigation matters with the goal of settling parental disputes out of court. This subprogramme also deals with international cases of children who were abducted or retained in foreign countries in terms of the Hague Convention on the Civil Aspects of International Child Abduction.

## Programme 4: National Prosecuting Authority

### Programme purpose

Provide a coordinated prosecuting service that ensures that justice is delivered to victims of crime through general and specialised prosecutions. Remove profit from crime. Protect certain witnesses.

### Objectives

- Ensure successful prosecution by maintaining conviction rates of 87 per cent in high courts, 74 per cent in regional courts and 88 per cent in district courts over the MTEF period.
- Enhance victim-centric services by increasing the total number of operational Thuthuzela care centres from 66 in 2024/25 to 72 in 2027/28.
- Ensure access to justice for victims of sexual offences by maintaining a conviction rate of 70 per cent over the MTEF period.
- Contribute to the fight against corruption by increasing the number of prosecutions of state capture, complex corruption and matters related thereto enrolled in the courts from 6 in 2024/25 to 10 in 2027/28.
- Contribute to the effectiveness of the criminal justice system on an ongoing basis by ensuring that no witnesses and related persons are threatened, harmed or killed while in the witness protection programme over the MTEF period.

## Subprogrammes

- *National Prosecutions Service* resolves criminal matters outside of the formal trial process through alternative dispute resolution mechanisms, settles admissions of guilt for minor offences, and considers dockets brought by the police where people have not been charged.
- *Investigating Directorate* deals with offences or criminal or unlawful activities involving serious, complex and high-profile corruption, including allegations of corruption arising from commissions of inquiry as determined by presidential proclamation.
- *Asset Forfeiture Unit* seizes assets that are the proceeds of crime or have been part of an offence through a criminal or civil process.
- *Office for Witness Protection* provides for protection, support and related services to vulnerable, intimidated witnesses and related people in judicial proceedings in terms of the Witness Protection Act (1998).
- *Strategy, Operations and Compliance* provides corporate support services to the National Prosecuting Authority in terms of finance, human resources, ICT, strategy support, integrity, security, communication and risk management.

## Programme 5: Auxiliary and Associated Services

### Programme purpose

Provide a variety of auxiliary services associated with the department's purpose. Fund the interdepartmental justice modernisation programme, the President's Fund, the Office of the Legal Services Ombud and transfer payments to public entities and constitutional institutions.

### Objective

- Deliver modern, digitised platforms for justice services by maintaining the number of government departments and entities connected to the integrated justice system transversal platform and exchanging information electronically at 11 over the MTEF period.

### Subprogrammes

- *Legal Aid South Africa* funds Legal Aid South Africa, which provides legal aid to indigent people and legal representation at the state's expense, as set out in the Constitution.
- *Special Investigating Unit* funds the Special Investigating Unit, which provides professional forensic investigating and litigation services to all state institutions at the national, provincial and local levels to combat maladministration, corruption and fraud, and protects state assets and public funds.
- *Public Protector of South Africa* funds the Public Protector of South Africa, which investigates any alleged improper conduct in state affairs, public administration or any sphere of government, as well as any conduct that results in impropriety or prejudice.
- *South African Human Rights Commission* funds the South African Human Rights Commission, which promotes and monitors the observance of human rights in South Africa.
- *Justice Modernisation* implements IT infrastructure and networks, and funds the integrated justice system programme, which seeks to re-engineer, automate and integrate business processes across the criminal justice value chain.
- *Information Regulator* funds the Information Regulator, which is responsible for the promotion and protection of the right to privacy as it relates to the protection of personal information and the right of access to information, as enshrined in the Protection of Personal Information Act (2013) and Promotion of Access to Information Act (2000).
- *Office of the Legal Services Ombud* funds the Office of the Legal Services Ombud, which is responsible for protecting and promoting public interest in relation to rendering legal services, investigating complaints of alleged misconduct against legal practitioners, and promoting independence and high standards of integrity in the legal profession.

#### Entity overview

The Information Regulator was established in terms of section 39 of the Protection of Personal Information Act (2013) and holds jurisdiction across South Africa. Its mandate is to promote and protect personal information processed by public and private entities. It is also responsible for monitoring and enforcing the constitutional right of access to information held by the state or private individuals, which is essential for exercising and safeguarding rights. Originally formed in 2013, the regulator is set to transition to a standalone public entity from 1 April 2025 after being classified as a schedule 3A public entity in terms of the Public Finance Management Act (1999) in March 2024.

Expenditure is anticipated to increase from R135.7 million in 2025/26 to R147.4 million in 2027/28, with compensation of employees constituting an estimated 77.9 per cent (R330.1 million) of the regulator's total budget. As part of its setup costs, the regulator has earmarked R96 million over the next 3 years to procure systems for financial management, payments, asset management, records management and human resources. The regulator expects to receive all its income, amounting to R424.1 million over the medium term, through transfers from the department. Revenue is projected to increase in line with spending.

### Entity overview

Legal Aid South Africa was established in terms of section 2 of the Legal Aid South Africa Act (2014) to provide state-funded legal aid and advice to eligible individuals, ensuring access to justice and upholding the right to legal representation as enshrined in the Constitution. Over the medium term, the entity will continue to focus on offering legal assistance to children, women and detainees, and in cases involving divorce, domestic violence, deceased estates and land rights matters at the state's expense.

Expenditure is anticipated to increase at an average annual rate of 3.6 per cent, from R2.3 billion in 2024/25 to R2.6 billion in 2027/28. Plans are under way to introduce cost-saving measures aimed at mitigating the potential impact on service delivery arising from reductions implemented in the 2024 Budget. These measures include a moratorium on filling new positions, filling only critical posts, and using reserves to cover any budget shortfalls to ensure the continuity and effectiveness of service delivery.

Compensation of employees is projected to account for an estimated 81.8 per cent (R8 billion) of total expenditure over the medium term, with the remainder allocated to goods and services and to account for depreciation of assets. The entity is expected to receive 92.1 per cent (R9 billion) of its revenue through transfers from the department and the remainder through interest on investments. Revenue is expected to increase in line with spending.

### Entity overview

The Public Protector of South Africa is an independent institution established under section 181 of the Constitution, functioning as a chapter 9 institution with the mandate to support and strengthen constitutional democracy. Operating as an oversight body, the entity investigates and addresses improper conduct in state affairs, providing universally accessible services to all citizens. The entity's focus over the MTEF period will remain on conducting thorough investigations to eliminate improper conduct and maladministration. In doing so, it will aim to finalise 80 per cent of early resolution cases within 6 months, service delivery cases within

12 months, and good governance and integrity cases within 24 months. Additional allocations of R20 million in 2025/26, R25 million in 2026/27 and R28 million in 2027/28 are intended to ensure that these targets are achieved through the hiring of additional investigators to manage the increasing caseload and improve the quality of reporting.

Expenditure is expected to increase at an average annual rate of 3.8 per cent, from R389.5 million in 2024/25 to R436 million in 2027/28, with compensation of employees accounting for an estimated 74.6 per cent (R1.2 billion) of this spending. The entity expects to receive 98.5 per cent (R1.6 billion) of its revenue over the period ahead through transfers from the department. Revenue is projected to increase in line with expenditure.

Number of litigious matters in which the commission is involved per year	Protection of human rights		11	16	10	14	14	14	14

### Entity overview

The South African Human Rights Commission was established in terms of section 184 of the Constitution as a chapter 9 institution. It is mandated to promote, protect and monitor human rights violations in South Africa. Its primary objectives include investigating human rights violations, educating the public about their rights, reporting on noncompliance by state institutions, ensuring accountability, and advocating for the realisation of constitutional rights for all citizens.

The commission aims to enhance the protection and promotion of human rights over the next 3 years by streamlining internal processes and improving stakeholder engagement with civil society and government bodies. This includes adopting a proactive approach to addressing human rights violations and managing daily complaints from the public. The commission also plans to maintain a consistent resolution of 6 500 complaints and enquiries per year over the period ahead.

Expenditure is projected to increase at an average annual rate of 4.5 per cent, from R215 million in 2024/25 to R245.2 million in 2027/28, with compensation of employees accounting for an estimated 69.4 per cent (R634.4 million) of this spending. To address the rising cost of compensation of employees, the commission will continue to freeze the filling of vacant posts and reduce the number of personnel from 199 in 2024/25 to a projected 186 in 2027/28.

The commission expects to receive 97.5 per cent (R891.5 million) of its revenue over the medium term through transfers from the department. Transfers are expected to increase at an average annual rate of 6 per cent, from R203.2 million in 2024/25 to R241.7 million in 2027/28. Included in this projection are additional allocations of R5 million in 2025/26, R8 million in 2026/27 and R10 million in 2027/28 to enhance the entity's capacity.

Number of cases issued in the special tribunal per year	Investigations and legal counsel		54	35	43	55	56	57	58

## Entity overview

The Special Investigating Unit derives its mandate from the Special Investigating Units and Special Tribunals Act (1996). Its primary function is to investigate serious malpractice, maladministration and corruption affecting the administration of state institutions and take or assist in taking appropriate and effective steps by referring cases for prosecution, instituting civil proceedings in the special tribunal and judicial bodies dedicated to expediting the recovery of public funds, and enforcing anti-corruption measures.

Over the medium term, R3.9 billion is set aside to increase the number of investigations closed per year from 1 600 in 2024/25 to 1 790 in 2027/28, and the number of investigative reports submitted to the Presidency from 30 to 45 over the same period. Expenditure is expected to increase at an average annual rate of 19.1 per cent, from R1.1 billion in 2024/25 to R1.9 billion in 2027/28. This increase is driven mainly by compensation of employees, which accounts for an estimated 74 per cent (R4.5 billion) of total expenditure and is set to increase at an average annual rate of 21.1 per cent, from R813.4 million in 2024/25 to R1.4 billion in 2027/28. This significant increase is mainly due to the anticipated increase in investigations, which in turn reflects the planned increase in the number of personnel from 780 in 2024/25 to 1 100 in 2027/28.

The unit expects to receive 33.1 per cent (R1.9 billion) of its revenue over the period ahead through transfers from the department and 66.9 per cent (R4.1 billion) through charging client departments and state institutions for services rendered, and other non-tax revenue. Total revenue is set to increase at an average annual rate of 23.3 per cent, from R1 billion in 2024/25 to R1.9 billion in 2027/28. This significant increase is mainly driven by anticipated non-tax revenue from the sale of goods and services other than capital, which is expected to increase at an average annual rate of 37.7 per cent, from R523.7 million in 2024/25 to R1.4 billion in 2027/28.

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Formulate policies and standards aimed at providing a comprehensive delivery system to military veterans and their dependants in recognition of their role in the democratisation of South Africa.

### Mandate

The Department of Military Veterans derives its mandate from the Military Veterans Act (2011), which requires it to provide national policy and standards on socioeconomic support to military veterans and their dependants, including benefits and entitlements to help create a dignified, unified, empowered and self-sufficient community of military veterans.

### Selected performance indicators

**Table 26.1 Performance indicators by programme and related outcome**

Indicator	Programme	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28

Number of bursaries provided to military veterans and their dependants per year	Empowerment and Stakeholder Management	Outcome 13: Improved education outcomes and skills	3 711	4 114	3 690	4 200	4 500	4 800	5 100

1. No historical data available.

2. Target of 2 000 for 2022/23 was not achieved mainly due to delays in finalising regulations for the military veterans pension benefit.

### Expenditure overview

Acknowledging the contributions of military veterans in the creation of South Africa's democracy is essential to fostering social cohesion and national unity, and addressing historical inequities. Central to this recognition is prioritising access to critical benefits such as pensions, housing, health care and education for military veterans and their dependants over the medium term. This comprehensive approach not only enhances the wellbeing of military veterans, but contributes to the broader development of society.

To this end, the department plans to intensify the rollout of pensions with the aim of reaching 9 600 deserving military veterans or their dependants by 2027/28. A strict means test will be applied to ensure the benefit is directed towards those in genuine need, thereby reducing the potential for misuse. The department also aims to deliver 900 houses to military veterans over the MTEF period, with provincial departments of human settlements constructing these on behalf of the department. Allocations amounting to R560.1 million over the medium term for pension and housing benefits are included in the *Socioeconomic Support Management* subprogramme in the *Database Management and Socioeconomic Support* programme.

The department plans to increase the number of bursaries provided to military veterans or their dependants from 4 200 in 2024/25 to 5 100 in 2027/28. Allocations for this benefit are in the *Empowerment and Stakeholder Management* programme, which has a budget of R852.5 million over the medium term.

To further enhance the quality of life for eligible military veterans, the department aims to ensure that 18 900 of them have access to fully subsidised health care services by 2027/28. This benefit is funded through the *Database Management and Socioeconomic Support* programme, which has a budget of R1.3 billion over the medium term.

Despite Cabinet-approved reductions amounting to R195 million over the MTEF period, total expenditure is expected to increase at an average annual rate of 5.6 per cent, from R812.4 million in 2024/25 to R955.6 million in 2027/28, mainly because the 2023 Budget provided additional funding to roll out the pension benefit. To mitigate the impact of these reductions on operational capacity, the department has reprioritised R11.9 million towards compensation of employees. This is expected to ensure that critical posts are filled over the period ahead.

## Programme 2: Database Management and Socioeconomic Support

### Programme purpose

Manage the national military veterans database; and develop and implement legislation, policy frameworks and service delivery cooperation agreements on compensation for injury in military service, counselling, health care, public transport, and pension and housing benefits for military veterans eligible for such support.

### Objectives

- Establish an enabling environment for the provision of socioeconomic support services to military veterans by:
  - maintaining the credibility and security of the national database of military veterans through consolidating data, and updating software and the personal files of military veterans on an ongoing basis
  - facilitating access to benefits espoused in section 5 of the Military Veterans Act (2011) for eligible military veterans by March 2028.
- Advance the delivery of social services to military veterans and their dependants by developing strategic partnerships with other organs of state and in broader society, where applicable, to ensure that by the end of 2027/28:
  - 900 military veterans are approved to access newly built houses
  - 9 600 military veterans and their dependants are provided with pension benefits
  - 18 900 military veterans have access to health care services.

### Subprogrammes

- Database and Benefits Management* establishes systems for the seamless transition of service personnel from active military service to civilian life, consolidates and ensures the credibility and security of the national database of military veterans, and oversees governance obligations and resource allocations based on the provisions of the Military Veterans Act (2011).
- Health Care and Wellbeing Support* facilitates the provision of health care services and wellbeing support to military veterans, including initiatives to prevent diseases.
- Socioeconomic Support Management* develops norms and standards for the provision of public transport, pension benefits, housing and social relief of distress for eligible military veterans; establishes strategic partnerships to advance service delivery; tracks delivery by service providers on agreed targets; and reports on service delivery and ensures continual improvement.

## Programme 3: Empowerment and Stakeholder Management

### Programme purpose

Manage and facilitate the implementation of military veteran empowerment and stakeholder management programmes.

### Objectives

- Ensure the empowerment of deserving military veterans by:
  - developing and implementing a special purpose vehicle to facilitate business opportunities over the MTEF period

- forming partnerships with 12 companies in the private sector and other organs of state, and entering into service-level agreements and memorandums of understanding over the MTEF period
- monitoring and evaluating the implementation of agreements and memorandums of understanding to ensure that support is provided annually
- providing 3 000 military veterans with access to relevant training and skills development, and concluding 12 formal agreements with institutions of higher education and training to provide skills development over the MTEF period
- increasing the provision of education support to eligible military veterans and their dependants from 4 200 in 2024/25 to 5 100 in 2027/28
- facilitating the integration of the South African National Military Veterans Association with the international community through the establishment of relevant exchange programmes over the MTEF period
- facilitating the integration of military veterans into the workforce on an ongoing basis.

## Subprogrammes

- *Provincial Offices and Stakeholder Relations* facilitates and coordinates military veteran stakeholder institutions and provides administrative support to secure stakeholders from public and private institutions that are willing to contribute towards the wellbeing of military veterans.
- *Empowerment, Skills Development and Education Support* provides education, skills programmes and related activities to ensure that military veterans contribute positively to mainstream economic activities.
- *Heritage, Memorials, Burials and Honours* provides services to honour the contributions made by military veterans in the struggle for democracy, and ensures that their memorials are adequately secured, articulated in a dignified manner and captured in historical texts.

Executive authority Minister of Justice and Constitutional Development  
Accounting officer Secretary-General of the Office of the Chief Justice  
Website [www.judiciary.org.za](http://www.judiciary.org.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

*Strengthen judicial governance and independence by rendering effective support to the Chief Justice in executing administrative and judicial powers and duties as both head of the Judiciary and the Constitutional Court.*

### Mandate

The Office of the Chief Justice renders support to the Chief Justice as the head of the judiciary, as provided for in section 165(6) of the Constitution, read together with the Superior Courts Act (2013). The Office of the Chief Justice is also required to: provide and coordinate legal and administrative support to the Chief Justice; provide communication and relationship management services and intergovernmental and internal coordination; develop policies, norms and standards for the administration of courts; support the development of judicial policy, norms and standards; support the judicial function of the Constitutional Court; and support the Judicial Service Commission and South African Judicial Education Institute in the execution of their mandates.

Number of judicial education courses conducted per year	Judicial Education and Support		168	124	155	120	80	80	80

1. No historical data available.

## Expenditure overview

Over the medium term, the Office of the Chief Justice will focus on modernising superior courts to improve access to justice, and providing judicial education and training courses to judicial officers, as well as secretarial and administrative support to the Judicial Service Commission for the appointment of judicial officers.

The department's budget is set to increase at an average annual rate of 5.6 per cent, from R2.6 billion in 2024/25 to R3.1 billion in 2027/28, with compensation of employees accounting for an estimated 79 per cent (R6.8 billion) of total expenditure over the next 3 years. An additional R821.2 million is allocated over the medium term to enhance capacity in superior courts and fill a targeted 178 vacant posts, address the historical funding shortfall on compensation of employees and cover operational costs, including judges' vehicles. The additional funding will also support the implementation of an online court system, called Court Online, to improve judicial efficiency. The department has also been allocated an additional funding of R59.6 million to provide for the cost of living adjustment over the medium term.

### ***Modernising superior courts through digitisation***

To improve access to justice, the department plans to modernise processes in the superior courts over the next 3 years through the implementation of cloud-based digital infrastructure. This will enable the department to initiate and manage cases online, and present evidence. The Court Online system is expected to be implemented in all superior courts in 2025/26, with an additional R98.2 million over the medium term allocated in the *Administration* programme to roll out and operationalise the system.

The criminal module of the system is expected to be developed further and automated from 2025/26 onwards, allowing the courts to fully digitise their processes, including civil and criminal court proceedings. This is expected to result in an increase in the finalisation of default judgments from 90 per cent in 2025/26 to 92 per cent in 2027/28, and the finalisation of 98 per cent of taxations of opposed legal bills of costs and 99 per cent of taxations of unopposed legal bills of costs over the MTEF period. These activities are funded in the *Superior Court Services* programme, which is allocated R3.6 billion over the MTEF period, accounting for 40.4 per cent of the department's total budget.

### ***Providing judicial education and training, and secretarial and administrative support***

The department plans to offer 80 judicial education and training courses each year over the medium term through the South African Judicial Education Institute to develop the skills of current and prospective judicial officers. The Judicial Service Commission's public procedure for appointing judicial officers to replace retired or deceased judges will continue to receive secretarial and administrative support from the department at a projected cost of R30.2 million over the MTEF period. This funding is within the *Judicial Service Commission* subprogramme's budget of R251.5 million over the MTEF period in the *Judicial Education and Support* programme.

## Programme 2: Superior Court Services

### Programme purpose

Provide court administration services to the superior courts.

### Objectives

- Improve court efficiency by:
  - increasing the percentage of default judgments finalised by registrars within 12 court days from 90 per cent in 2025/26 to 92 per cent in 2027/28
  - ensuring that 98 per cent of taxations of opposed bills of costs are finalised within 60 court days over the MTEF period
  - ensuring that 99 per cent of unopposed bills of costs are finalised within 40 court days over the MTEF period
  - delivering all warrants of liberation (J1 forms) within 1 day over the MTEF period
  - producing 4 judicial case flow management performance reports per year.

### Subprogrammes

- Administration of Superior Courts* provides administrative and technical support to the superior courts, monitors their overall performance and enhances judicial stakeholder relations.
- Constitutional Court* funds the activities and operations of the Constitutional Court, which has jurisdiction over constitutional matters and any matter of public importance.
- Supreme Court of Appeal* funds the activities and operations of the Supreme Court of Appeal, which adjudicates appeals in any matters arising from the high courts or courts of similar status.
- High Courts* funds the activities and operations of the various high court divisions, which have jurisdiction over defined geographical areas.
- Specialised Courts* funds the activities and operations of the Labour Court, the Labour and Labour Appeal Court, the Land Court, the Competition Appeals Court and the Electoral Court. These courts adjudicate over various types of matters excluded from the jurisdiction of the various high court divisions and lower courts.

## Programme 3: Judicial Education and Support

### Programme purpose

Provide education programmes to judicial officers, support services to the Judicial Service Commission, and policy development and research services to the department and the Judiciary for the optimal administration of justice.

### Objectives

- Enhance judicial performance by conducting 80 judicial education courses per year over the MTEF period.
- Enhance judicial governance by producing 3 judicial education newsletters per year over the MTEF period.
- Ensure enhanced judicial performance by producing 5 litigation monitoring reports per year over the MTEF period.
- Improve judicial performance over the MTEF period by:
  - producing 3 reports per year on judicial appointments and complaints
  - producing 2 reports per year on the status of disclosures for judges' registrable interests.

### Subprogrammes

- *South African Judicial Education Institute* provides strategic and administrative support for the training of judicial officers and aspirant judicial officers.
- *Judicial Policy, Research and Support* provides advisory opinions on policy development, undertakes research and offers legal support services to enhance the functioning of the judiciary.
- *Judicial Service Commission* provides secretariat and administrative support services to the Judicial Service Commission so that it can effectively fulfil its constitutional and legislative mandates.

Website	www.saps.gov.za					

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

## Vote purpose

Prevent, combat and investigate crime; maintain public order; protect and secure the inhabitants of South Africa and their property; and uphold and enforce the law.

## Mandate

The South African Police Service derives its powers and functions from section 205 of the Constitution and from the South African Police Service Act (1995). This legislation regulates the police service in terms of its core functions: preventing, investigating and combating crime; maintaining public order; protecting and securing the inhabitants of South Africa and their property; and upholding and enforcing the law.

Number of security breaches recorded during the in-transit protection of VIPs and identified VIP residences per year	Protection and Security Services		0	0	0	0	0	0	0

1. No historical data available as the wording of the indicator was changed to align with the department's 2025/26 annual performance plan.

2. Plus sign (+) represents an increase in the number of crimes reported.

## Expenditure overview

Over the medium term, the department will focus on building capacity in the South African Police Service; combating crimes in high-risk areas and gender-based violence and femicide; and addressing crimes that affect economic activity, including fraud, corruption, money laundering and the financing of terrorism. Expenditure is expected to increase at an average annual rate of 5.1 per cent, from R113.6 billion in 2024/25 to R131.9 billion in 2027/28, with an estimated 80.8 per cent (R398.5 billion) of the department's budget over the MTEF period allocated to compensation of employees.

### ***Building capacity in the South African Police Service***

The department aims to improve its capacity by reinforcing measures that promote accountability and enhance consequence management. This includes conducting lifestyle audits on identified members and ensuring that departmental investigations into allegations of corruption are carried out effectively. The introduction of a professionalisation framework will ensure that the police service remains focused on its mandate of law enforcement and public safety, free from political influence. Funding for these initiatives is within the *Administration* programme's allocation of R72.4 billion over the next 3 years. An additional allocation of R5.1 billion over the MTEF period (mostly for cost-of-living adjustments, overtime and goods and services) will provide for additional policing during the 2026 local government elections, improve security during South Africa's G20 presidency in 2025/26 and build capacity in the newly established Office of the Deputy Minister of Police. The number of personnel in the department is set to increase from 184 106 in 2023/24 to 188 018 over the medium term.

### ***Combating crime in high-risk areas and gender-based violence and femicide***

Over the period ahead, the department plans to enhance its data-driven approach to targeting violent crime hotspots. In line with the integrated crime and violence prevention strategy, it plans to work closely with community policing forums and provide secure channels for citizens to report criminal activity. This includes strengthening its anti-gang units and conducting intelligence-led operations in affected areas in collaboration with all relevant stakeholders. Hotspot policing will also entail deploying advanced technologies such as remotely piloted aircraft systems, and body and dashboard cameras.

The evidence-based approach, complemented by the continued resourcing of the family violence, child protection and sexual offences units, will also be central to efforts aimed at reducing gender-based violence and femicide, in line with the national strategic plan on gender-based violence and femicide. A key partnership between the department and the National Prosecuting Authority will ensure the expert and expedited processing of forensic evidence associated with prioritised gender-based violence and femicide cases.

Funding for these activities is within allocations over the MTEF period of R202.4 billion in the *Visible Policing* programme and R75.2 billion in the *Detective Services* programme.

### **Addressing corruption, and economic and organised crime**

The department will prioritise alleviating corruption, economic crime and organised crime over the period ahead. As such, in support of the national anti-corruption strategy, the Directorate for Priority Crime Investigation will focus on investigating serious corruption cases in the public and private sectors. Accordingly, it has set the target for the percentage of trial-ready case dockets for serious corruption in the public and private sectors at 70 per cent each year over the medium term. In addition, the department's anti-corruption strategy is expected to guide it in overseeing investigations into allegations of corruption within its own ranks.

As part of broader reforms intended to strengthen South Africa's capacity to combat financial crime, the department plans to maintain the percentage of serious money laundering investigation case files successfully investigated at 30 per cent per year over the MTEF period. Serious organised crime, including transnational activities such as drug trafficking, will be addressed by the Directorate for Priority Crime Investigation in collaboration with departments in the justice, crime prevention and security cluster. To this end, over the medium term, the department plans to bolster its organised crime investigation units to combat local organised crime groups involved in extortion schemes and illicit drug distribution.

Activities related to fighting corruption, economic crime and organised crime, as well as implementing broader reforms, are carried out through the *Detective Services* programme. Within this programme's allocation is a reprioritisation of R150 million in 2025/26 and 2026/27 from various non-core goods and services items for government's partnership with the private sector on the joint initiative on crime and corruption. The initiative seeks to enhance the state's digital and financial forensic capabilities to effectively prevent, investigate and prosecute complex crimes, including money laundering, cybercrime and terrorist financing. In doing so, it aims to implement Financial Action Task Force recommendations 30 and 31, which entail enhancing the functions, responsibilities, powers and tools of law enforcement to conduct investigations into money laundering and the financing of terrorism. This is expected to contribute to the removal of South Africa from the task force's grey list.

2. Rand million.

## Programme 2: Visible Policing

### Programme purpose

Enable police stations to institute and preserve safety and security, and provide for specialised interventions and the policing of South Africa's borders.

### Objectives

- Prevent prioritised violent crime through the implementation of the integrated crime and violence prevention strategy over the medium term by decreasing the murder rate by 17.57 per cent and aggravated robbery (trio crimes) by 14.76 per cent.
- Prevent violence against women and children over the medium term by decreasing contact crimes against women by 15.01 per cent and children by 13.26 per cent.
- Implement a data-driven approach to targeting violent crime hotspots through evidence-based policing in specified provinces such as Western Cape in 2025/26.

### Subprogrammes

- *Crime Prevention* provides for basic crime prevention and visible policing services at police stations and community service centres.
- *Border Security* provides for the policing of South Africa's borders.
- *Specialised Interventions* provides for interventions in medium- to high-risk operations, including the air wing, the special task force and crime combating units; and the protection of valuable and dangerous cargo.
- *Facilities* provides for office accommodation budgets and related expenditure devolved to the department by the Department of Public Works and Infrastructure.

## Programme 3: Detective Services

### Programme purpose

Enable the investigative work of the South African Police Service, including providing support to investigators in terms of forensic evidence and criminal records.

### Objectives

- Contribute to the successful prosecution of offenders by:
  - increasing the detection rate for priority contact crimes, including murder, to 11.3 per cent and aggravated robbery to 12.45 per cent in 2025/26
  - ensuring a 69.24 per cent detection rate for crimes against women in 2025/26
  - ensuring a 63.07 per cent detection rate for crimes against children in 2025/26
  - generating 92 per cent of original previous conviction reports within 15 calendar days over the medium term
  - maintaining detection rates for serious corruption in the public and private sectors at 70 per cent over the medium term.
- Enhance the investigation of economic and organised crime by improving methods and approaches for identifying crimes such as human trafficking, counterfeit goods and extortion to ensure a 10 per cent increase in effectiveness over the medium term.

### Subprogrammes

- Crime Investigations* provides for detectives at police stations who investigate crimes, including crimes against women and children.
- Criminal Record Centre* provides for effective and credible criminal record centres for crime scene management or processing and provides criminal records and related information.
- Forensic Science Laboratory* funds forensic science laboratories, which provide specialised, evidence-related technical analysis and support to investigators.
- Specialised Investigations* provides for the prevention, combating and investigation of national priority offences, including the investigation of organised crime syndicates, serious and violent crime, commercial crime and corruption.

## Programme 4: Crime Intelligence

### Programme purpose

Manage crime intelligence and analyse crime information, and provide technical support for investigations and crime prevention operations.

## Objectives

- Contribute to the prevention, investigation and prosecution of contact crime on an ongoing basis by ensuring that 70 per cent of network operations over the medium term are successfully terminated.
- Contribute to the successful prevention, investigation and prosecution of economic and organised crime by ensuring that 70 per cent of network operations over the medium term are successfully terminated.
- Contribute to the successful prevention, investigation and prosecution of serious corruption by ensuring that 70 per cent of network operations over the medium term are successfully terminated.

## Subprogrammes

- *Crime Intelligence Operations* provides for intelligence-based criminal investigations.
- *Intelligence and Information Management* provides for the analysis of crime intelligence patterns to facilitate detection in support of crime prevention and investigation.

## Programme 5: Protection and Security Services

### Programme purpose

Provide protection and security services to all identified dignitaries and government interests.

### Objectives

- Minimise security violations on an ongoing basis by:
  - protecting all identified local and foreign dignitaries while in transit, without any security breaches
  - protecting the locations in which dignitaries, including people related to the president and deputy president, are present, without any security breaches.

### Subprogrammes

- VIP Protection Services* provides for the protection of the president, deputy president, former presidents, their spouses and other identified dignitaries while in transit.
- Static Protection* provides for the protection of other local and foreign dignitaries and the places in which all dignitaries, including people related to the president and deputy president, are present.
- Government Security Regulator* provides for security regulations and evaluations, the administration of national key points, and strategic installations.
- Operational Support* provides administrative support to the programme, including personnel development.

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of security businesses inspected to enforce compliance with the Private Security Industry Regulation Act (2001) and other relevant legislation per year	Law enforcement	Outcome 20: Safer communities and increased business confidence	6 851	7 236	7 886	5 975	6 300	6 625	6 950
Number of security officers inspected to enforce compliance with the Private Security Industry Regulation Act (2001) and other relevant legislation per year	Law enforcement		30 744	36 406	39 119	30 640	3 1640	32 840	34 040
Percentage of cases on noncompliant security service providers prosecuted per year	Law enforcement		100% (1 038)	100% (859)	100% (1 008)	95%	96%	96%	97%
Number of security businesses in possession of firearms inspected per year	Law enforcement		1 988	2 285	2 252	1 800	1 875	1 950	2 025
Number of qualifications determined, developed and/or accredited per year	Communication and training		2	9	10	12	10	10	10

#### Entity overview

The Private Security Industry Regulatory Authority was established in terms of section 2 of the Private Security Industry Regulation Act (2001), which replaced the Security Officers Act (1987). It is mandated to regulate the private security industry and exercise control over security service providers in the public and national interest, as well as in the interest of the private security industry itself. Over the medium term, the authority will focus on curbing lawlessness within the private security industry, advancing its digital transformation to improve registration processes, and operationalising the Private Security Industry Guarantee Fund.

As part of the authority's commitment to combating lawlessness in the industry and ensuring compliance with the Private Security Industry Regulation Act (2001), its law enforcement unit is allocated R638 million over the medium term. Activities to enforce compliance will include confiscating illegal firearms through the newly established firearms unit, which comprises 7 employees. The authority also plans to expand the special operations unit from 9 to 20 employees over the medium term. This increased capacity is expected to contribute to achieving at least a 96 per cent prosecution rate for noncompliant security companies over the medium term. The total personnel cost for these units is expected to amount to R25.4 million.

Over the period ahead, R23.8 million is allocated to implement a new online registration system, which will include a module for collecting levies; and R44 million is allocated to operationalise the Private Security Industry Guarantee Fund by 2026/27, which will provide public liability insurance for the private security industry.

Total expenditure is projected to increase at an average annual rate of 13 per cent, from R544.5 million in 2024/25 to R785.6 million in 2027/28. Spending on compensation of employees accounts for an estimated 45.5 per cent (R1.3 billion) of the authority's total spending over the MTEF period, owing to the expected increase in personnel from 401 in 2024/25 to 461 in 2027/28.

More than 90 per cent (R2.6 billion) of the authority's revenue over the MTEF period is expected to be generated through the collection of annual and registration fees from private security businesses and security officers. The remainder will be generated through the sale of renewal certificates, training security officers and accreditation fees collected from training providers. Revenue is expected to increase in line with expenditure, mainly due to the anticipated increase in the registration of security officers from 192 000 in 2024/25 to 374 807 in 2027/28.

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

## Vote purpose

*Lead, support and promote the management of agricultural resources through policies, strategies and programmes to enhance sustainable use and achieve economic growth, job creation, food security, rural development and transformation.*

## Mandate

The Department of Agriculture is mandated to establish and administer legislative and policy frameworks that advance viable and sustainable agricultural and food sectors. The department's mandate is guided by a legislative framework that includes the:

- Animal Protection Act (1962), which consolidates and amends the law relating to the prevention of cruelty to animals
- Fencing Act (1963), which consolidates the laws and matters relating to fences and the fencing of farms and other holdings, and matters incidental thereto
- Plant Improvement Act (1976), which provides for the registration of premises from which the sale of certain plants or the cleansing, packing and sale of certain propagating material may be undertaken; and prescribes the conditions subject to which such plants or propagating material may be sold for cultivation
- Conservation of Agricultural Resources Act (1983), which provides for control over the use of South Africa's natural agricultural resources to promote the conservation of soil, water sources and vegetation, and the combating of weeds and invader plants
- Agricultural Product Standards Act (1990), which makes provision for control over the sale and export of certain agricultural products, and the sale of some imported agricultural products
- Agricultural Research Act (1990), which provides for the establishment of a juristic person to deal with agricultural research, and the determination of its objectives, functions, powers and duties
- Marketing of Agricultural Products Act (1996), which provides strategic advice to the minister on all agricultural marketing issues, improves market efficiency and access for all participants, optimises export earnings, and improves the viability of the agricultural sector.
- Onderstepoort Biological Products Incorporation Act (1999), which provides for the establishment of a company to manage Onderstepoort Biological Products.

## Selected performance indicators

**Table 29.1: Performance indicators by programme and related outcome**

Indicator	Programme	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of plant pest surveillance surveys conducted per year	Agricultural Production, Biosecurity and Natural Resources Management	Outcome 9: Economic transformation for a just society	3	3	3	3	3	3	3
Number of animal disease surveillance surveys conducted per year	Agricultural Production, Biosecurity and Natural Resources Management		3	3	3	3	3	3	3
Number of subsistence and smallholder producers supported per year	Food Security and Support		— <sup>1</sup>	— <sup>1</sup>	96 665	60 000	60 000	60 000	60 000
Number of producers supported through the blended funding scheme per year	Food Security and Support		— <sup>1</sup>	— <sup>1</sup>	— <sup>1</sup>	— <sup>1</sup>	100	100	100

## Expenditure overview

Over the medium term, the department will focus on revitalising agricultural infrastructure, improving agricultural production, increasing research and development capacity to improve agricultural outputs, and reducing threats to biosecurity. This will be achieved in collaboration with various stakeholders across the agricultural value chain, as part of implementing the agro-processing master plan. The master plan is expected to create an investment-friendly environment for improving agricultural production. It intends to do so through support to smallholder farming enterprises, mainly those owned by black women, in agro-processing value chains.

Expenditure is expected to increase at an average annual rate of 1.2 per cent, from R7.9 billion in 2024/25 to R8.2 billion in 2027/28. Transfers and subsidies, mainly to provinces for conditional grants and to entities, account for an estimated 56.7 per cent (R13.6 billion) of this spending. Compensation of employees accounts for an estimated 20.8 per cent (R5 billion) of the department's budget, increasing at an average annual rate of 3.7 per cent, from R1.5 billion in 2024/25 to R1.7 billion in 2027/28.

As part of the national macro organisation of government in 2024, the Department of Agriculture, Rural Development and Land Reform was split into two: the Department of Agriculture and the Department of Land Reform and Rural Development. This shift is expected to be completed by March 2025.

### ***Revitalising infrastructure and improving agricultural production***

To support an estimated 180 000 subsistence and smallholder producers with production equipment, such as irrigation and solar systems, and farm infrastructure, such as boreholes, reservoirs and fencing, the *comprehensive agricultural support programme grant* is allocated R5.2 billion over the medium term in the *Food Security and Support* programme. The grant seeks to provide effective agricultural support services, and promote and facilitate agricultural development by targeting beneficiaries of land reform, restitution and redistribution, and other black producers who have acquired land through private means and are engaged in value-adding enterprises domestically or are involved in exporting.

In an effort to increase food security, the department will continue to help vulnerable farming communities with production inputs to enable farmers to produce strategically identified commodities/products such as grains and oilseeds, and livestock. Expenditure for these activities is within the *Ilima/Letsema projects grant's* allocation of R2.1 billion over the medium term in the *Food Security and Support* programme.

### ***Improving agricultural outputs through research and development***

Over the period ahead, the department plans to enhance capacity in research and development to improve market access and the safety and quality of agricultural products, specifically to address the challenges faced by smallholder producers. This includes the development of disease-resistant livestock breeds, climate-resilient grazing systems and supporting smallholders in diversifying their output into value-added products to

improve profitability. The department will also focus on improving technology for animal identification and tracking systems; and developing early warning monitoring systems for both plant and animal diseases. These activities are funded through the *Agricultural Production, Biosecurity and Natural Resources Management* programme, which is allocated R7.7 billion over the medium term.

To further support research and development endeavours, transfers to the Agricultural Research Council account for an estimated 27.3 per cent (R3.8 billion) of total transfers to entities over the medium term.

### Reducing threats to biosecurity

To alleviate the threat of disease outbreaks and reduce interceptions of goods at export points and in production areas, the department will aim to conduct 3 animal disease (foot-and-mouth disease, goat plague and Newcastle disease) and 3 plant pests (exotic fruit fly, citrus greening disease and banana bunchy top virus) surveillance surveys per year over the medium term. It will also aim to intensify partnerships with traditional leaders to raise awareness about biosecurity and its importance in vulnerable areas and communities. Awareness initiatives will be conducted through traditional imbizos, media campaigns and training provided to farmers. These activities will be carried out with funds from the *Animal Production and Health* subprogramme, which is allocated R1.1 billion over the period ahead; and the *Plant Production and Health* subprogramme, which is allocated R541.7 million over the same period. These subprogrammes are in the *Agricultural Production, Biosecurity and Natural Resources Management* programme.

## Programme 2: Agricultural Production, Biosecurity and Natural Resources Management

### Programme purpose

Oversee livestock production, game farming, animal and plant health, natural resources, and disaster management.

### Objectives

- Manage biosecurity and related sector risks over the medium term by:
  - conducting 9 countrywide surveys of plant pests and diseases, particularly the exotic fruit fly, citrus greening disease and banana bunchy top virus, to manage their spread and/or incursion towards eradicating them
  - conducting 9 planned animal risk surveillance exercises on foot-and-mouth disease, goat plague and Newcastle disease.
- Ensure access to primary animal health care services by deploying 155 veterinary graduates to rural areas by March 2027 as part of their compulsory community service.
- Enforce an animal and plant disease regulatory framework to minimise the level of disease outbreaks and interception at export channels in production areas by conducting 3 planned animal risk surveillance exercises each year over the medium term on foot-and-mouth disease, goat plague and bird flu.
- Implement regulatory compliance and monitor interventions by March 2027 to prevent plant and animal pest and disease outbreaks through quarantine inspections, surveillance and the testing and registration of products used in agriculture.

### Subprogrammes

- *Inspection and Quarantine Services* enforces and ensures compliance with agricultural production, biosecurity, biosafety and food safety laws.
- *Plant Production and Health* develops policy, norms and standards, and regulates and promotes plant production and plant health.
- *Animal Production and Health* provides policies, norms and standards to ensure the biosecurity, regulation and promotion of livestock and animal production and game farming while ensuring the health and safety of animal products.
- *Natural Resources and Disaster Management* facilitates the development of infrastructure and the sustainable use of natural resources; and integrates, coordinates and implements disaster management policies and frameworks, with an emphasis on mitigating disasters in rural and agricultural areas.

- *Biosecurity* provides for measures taken towards the effective and efficient management of biosecurity threats related to the agricultural sector.
- *Agricultural Research Council* manages transfers to the Agricultural Research Council.
- *Onderstepoort Biological Products* prevents and controls animal diseases that affect food security, human health and livelihoods through the continued development and efficient manufacturing of innovative animal-related pharmaceuticals (including vaccines) and related products.

## Programme 3: Food Security and Support

### Programme purpose

Facilitate and promote food security and agrarian reform programmes and initiatives.

### Objectives

- Coordinate comprehensive support systems and programmes provided to producers over the medium term by:
  - supporting 180 000 subsistence and smallholder producers
  - supporting the commercialisation of 300 smallholder producers by providing financial support through the blended finance model
  - placing 1 000 unemployed agricultural graduates in farms each year across provinces

- supporting access to financial resources for the development of agribusinesses through the processing of all AgriBEE funding applications.

## Subprogrammes

- *Farmer Support* provides national frameworks to promote sustainable food security for households.
- *National Extension Support Services* provides strategic leadership in the coordination and implementation of extension and advisory services, including those executed by provinces.
- *Sector Capacity Development* facilitates the provision of agriculture education and training to support sustainable growth and equitable participation in the sector.

## Programme 4: Economic Development, Trade and Marketing

### Programme purpose

Promote economic development, trade and market access for agriculture products, and foster international relations for the sector.

## Objectives

- Increase market access and maintain existing markets by certifying and accrediting producers of fresh produce for exports through good agricultural practice certification and an accreditation programme over the medium term.
- Build skills capabilities in international market research by transferring marketing skills to small and medium agro-processing entrepreneurs over the medium term.
- Provide technical sector leadership in trade negotiations and implement trade agreements to improve market access by linking producers to high-value markets over the medium term.

## Subprogrammes

- *International Relations and Trade* promotes, coordinates and supports international relations and trade through the development and implementation of appropriate policies and programmes.
- *Cooperatives Development* facilitates and supports the implementation of programmes and initiatives to promote cooperatives to participate in economic development.
- *Agro-processing and Marketing* ensures the transformation of primary product commodities into value-added products, and ensures domestic and international market access.
- *National Agricultural Marketing Council* manages transfer payments to the National Agricultural Marketing Council.

## Expenditure trends and estimates

**Table 29.12 Economic Development, Trade and Marketing expenditure trends and estimates by subprogramme and economic classification**

#### Selected performance indicators

**Table 29.14: Agricultural Research Council performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of cultivars registered per year	Increase agricultural production and productivity	Outcome 9: Economic transformation for a just society	6	7	7	4	6	8	5
Number of technical reports submitted to stakeholders per year	Increase agricultural production and productivity		170	316	163	181	186	174	174
Number of field trials conducted per year	Increase agricultural production and productivity		271	230	182	179	180	171	171
Number of services rendered to clients related to national resource management per year	Sustainable ecosystems and natural resources	Outcome 10: Reduced poverty and improved livelihoods	500	663	571	430	437	494	494
Number of services rendered to clients related to soil and water per year	A skilled and capable agricultural sector		305	487	410	245	260	270	270
Number of scientific publications published per year	A skilled and capable agricultural sector	Outcome 8: Dynamic science, technology and innovation for growth	479	428	288	277	269	276	276
Number of smallholder farmers participating in the Kaonafatso ya Dikgomo animal improvement scheme per year	A skilled and capable agricultural sector	Outcome 10: Reduced poverty and improved livelihoods	4 000	4 646	5 000	5 500	6 000	6 500	6 500
Number of farmers supported per year	A skilled and capable agricultural sector		154	748	281	94	105	120	120
Number of services rendered to smallholder farmers per year	A skilled and capable agricultural sector		129	152	104	104	104	104	104
Number of laboratory services rendered to clients per year	Enhanced resilience of agriculture		150	302	200	200	200	200	200

#### Entity overview

The Agricultural Research Council was established by the Agricultural Research Act (1990), and it is the main agricultural research institution in South Africa. The council's primary mandate is to conduct research and development, and transfer technology. To this end, the council's overarching goal is to promote the agricultural sector and contribute to a better quality of life and facilitate and ensure the conservation of natural resources.

Over the medium term, the council will focus on generating knowledge and technologies that enhance efficiencies in crop production, animal production and health, the management of natural resources, and research and development. Part of this entails the development of a foot-and-mouth disease facility in Onderstepoort, north of Pretoria, which is expected to lead to greater availability of vaccines for the disease. The council will also focus on providing support to 19 000 smallholder farmers participating in the Kaonafatso ya Dikgomo animal improvement scheme over the period ahead.

Total expenditure is expected to increase at an average annual rate of 1.7 per cent, from R1.8 billion in 2024/25 to R1.9 billion in 2027/28, with goods and services (mainly science and technology services, contractors, travel and subsistence, and training and development) accounting for an estimated 48.7 per cent (R2.8 billion). Spending on compensation of employees accounts for an estimated 47.3 per cent (R2.6 billion) of the budget. The council expects to derive an estimated 48 per cent (R3.3 billion) of its revenue over the medium term through transfers from the department and generate the balance through analytical services, research services, the sale of farm products and rental income.

## Programmes/Objectives/Activities

## Entity overview

The National Agricultural Marketing Council was established in terms of sections 3 and 4 of the Marketing of Agricultural Products Act (1996). It is mandated to investigate the establishment, continuation, amendment or revocation of statutory measures affecting the marketing of agricultural products, and evaluate the desirability, necessity or efficiency of these statutory measures.

By publishing research over the medium term, the council will provide information to policymakers and industry stakeholders on the cost of food, monitor food prices, conduct commodity value chain and trade policy analysis, identify market opportunities, and provide market access models to integrate a targeted 360 smallholder farmers into formal agricultural markets. The research will also focus on agro-food chains and markets, and trade and smallholder market access.

As the council relies on highly skilled personnel such as agricultural economists, scientists and researchers to fulfil its mandate, compensation of employees accounts for an estimated 70.3 per cent (R115.6 million) of total spending over the medium term. Expenditure is expected to increase at average annual rate of 2.8 per cent, from R52.3 million in 2024/25 to R56.8 million in 2027/28. The council expects to derive 90.9 per cent (R150.1 million) of its revenue over the period ahead through transfers from the department. Transfers received are set to increase at an average annual rate of 4.5 per cent, from R45.8 million in 2024/25 to R52.3 million in 2027/28.

### Entity overview

Onderstepoort Biological Products was established as a public company in terms of the Onderstepoort Biological Products Incorporation Act (1999), with government as its sole shareholder. The entity's mandate is to prevent and control animal diseases that affect food security, human health and livelihoods. The entity also maintains a reserve stock of vaccines for government to be used in the event of an outbreak of animal diseases.

Over the next 3 years, the company will focus on the development and production of new vaccines, and improve product availability at an estimated cost of R435 million over the medium term. To improve customer service, the company will aim to implement an updated marketing strategy. This is expected to ensure sustained customer loyalty to the company's vaccine brands. In conjunction with this, the company plans to establish 100 new distribution points over the medium term. An amount of R112.6 million over the next 3 years is allocated to cover associated costs.

Expenditure is expected to increase at an average annual rate of 4.4 per cent, from R283.6 million in 2024/25 to R322.7 million in 2027/28. The company generates revenue mainly from the sale and supply of livestock vaccines and uses it to fund its business operations. Revenue is projected to increase at an average annual rate of 10.7 per cent, from R297.9 million in 2024/25 to R404.5 million in 2027/28, driven mainly by an expected increase in sales as a result of new export markets.

### Entity overview

The Perishable Products Export Control Board is an independent service provider of quality assurance, food safety and cold chain management services for producers and exporters of perishable food products, as mandated by the Perishable Products Export Control Act (1983). The board also derives its mandate from the Agricultural Products Standards Act (1990), which requires it to monitor the minimum quality standards of perishable exports as required by government and bilateral agreements with importing countries.

Over the medium term, the board will continue to focus on the provision of relevant and timely export and shipping information and market trends to enhance the competitiveness of the industry. This will be done by processing a targeted 205 000 export certificates over the medium term through the electronic certification platform and conducting 3 400 food safety audits per year. Expenditure for issuing export certificates is within the statutory operations programme, which is allocated R1.6 billion over the medium term, while spending on conducting food safety audits is within the food safety programme, which is allocated R142.4 million over the same period.

Expenditure is expected to increase at an average annual rate of 6.2 per cent, from R739.7 million in 2024/25 to R885.4 million in 2027/28. As the board's work is labour intensive, compensation of employees accounts for an estimated 65.1 per cent (R1.6 billion) of total expenditure over the medium term. The board generates revenue by charging levies and tariffs to farmers on the export of perishable products, and fees for inspection, laboratory and export certification services. Revenue is projected to amount to R2.5 billion over the medium term and is in line with spending.

## Vote purpose

*Create an enabling environment for inclusive growth in the ICT sector by developing policies and legislation that promote infrastructure investment and socioeconomic development.*

## Mandate

The mandate of the Department of Communications and Digital Technologies is to foster digital transformation, with the overarching goals of promoting digital inclusion and driving economic growth. To achieve this, the department is guided by the 2016 National Integrated ICT Policy White Paper, which serves as a comprehensive framework for action and outlines strategies to engage a diverse range of stakeholders, ensuring that digital transformation is inclusive and participatory. The white paper addresses key challenges and opportunities presented by ICT convergence while establishing a new national postal policy framework. Through these provisions, the department aims to address critical issues such as the digital divide to ensure that all citizens have access to affordable digital services. Additionally, the policy framework encompasses measures to tackle both supply-side challenges, including infrastructure rollout, and demand-side considerations to enhance inclusivity. The department derives its mandate from several acts and policies. Key among these are the:

- Films and Publications Act (1996), as amended, which provides for the classification of certain films and publications, and establishes the Film and Publication Board and appeals tribunal
- Postal Services Act (1998), as amended, which makes provision for the regulation of postal services
- Broadcasting Act (1999), as amended, which establishes broadcasting policy in South Africa
- Independent Communications Authority of South Africa Act (2000), which establishes the regulator in the sector
- Electronic Communications Act (2005), as amended, which provides the legal framework for convergence in the broadcasting signal distribution and telecommunications sectors. It also allows for the granting of new licences and social obligations; the control of the radio frequency spectrum; and the regulation of electronic communication network services, electronic communication services and broadcasting services.

## Selected performance indicators

**Table 30.1 Performance indicators by programme and related outcome**

Indicator	Programme	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28

2. Project concluded.

## Expenditure overview

Over the MTEF period, the department will focus on coordinating the rollout of broadband internet to underserved areas through the South Africa Connect project; and on enabling digital transformation and inclusion through licensing spectrum to improve network quality, contribute to economic growth and lower data costs.

The department's total allocation over the MTEF period amounts to R7.8 billion, of which an estimated 69.1 per cent (R5.4 billion) is for transfers to entities for their operations and project-specific funding. Of this, R1.8 billion is allocated to the South African Post Office for its universal service obligations to provide postal services in underserved areas, R1.6 billion is allocated to the Independent Communications Authority of South Africa for regulating the ICT and postal sectors, and R707.4 million is allocated to the South African Broadcasting Corporation for various activities.

In line with the department's plan to revise its organisational structure and fill critical posts, expenditure on compensation of employees comprises an estimated 11.5 per cent (R1 billion) of total expenditure, increasing at an average annual rate of 5.1 per cent, from R312.5 million in 2024/25 to R362.8 million in 2027/28. Spending on goods and services accounts for 17.2 per cent (R1.3 billion) of total projected spending over the MTEF period. This is mostly for computer services for the implementation of the South Africa Connect project (R709.8 million), as well as travel and subsistence, consultants and operating leases for office accommodation. An amount of R8.4 million in 2025/26 is reprioritised towards hosting the G20 digital economy ministerial meetings and any technical preparatory meetings required.

### ***Rolling out broadband in underserved areas***

The department will continue to roll out the South Africa Connect project in underserved areas, supported by relevant state-owned entities such as Broadband Infraco, Sentech and the State Information Technology Agency. As a result, 970 government facilities will continue to be provided with connectivity over the MTEF period as part of phase 1. To this end, a projected R709.8 million over the medium term is allocated to the *Broadband* subprogramme in the *ICT Infrastructure Development and Support* programme.

### ***Licensing spectrum to improve network quality***

The Independent Communications Authority of South Africa completed the first phase of its allocation of spectrum by issuing radio frequency spectrum licences to successful bidders in May 2022. An additional allocation of R102 million is made available in 2025/26 for the second phase of licensing through an auction process. This is expected to increase investment in networks, improve network quality, contribute to economic growth and lower data costs.

## Programme 2: ICT International Relations and Affairs

### Programme purpose

Ensure alignment between South Africa's foreign policy and international activities in the ICT field.

### Objectives

- Advance South Africa's ICT interests in regional and international forums to secure partnerships for economic growth and development by March 2026 by:
  - developing a report on the G20 digital economy working group outcomes and implementation plan
  - developing 4 country positions to support national ICT priorities at the G20, Pan African Postal Union, Universal Postal Union, and World Telecommunication Development Conference.

### Subprogrammes

- *Programme Management for ICT International Relations and Affairs* provides for the overall management of the programme.
- *International Affairs* coordinates the functions and responsibilities of the department to meet South Africa's international ICT obligations. This subprogramme leads the country's ICT interests and advances strategic programmes in African bilateral forums and the BRICS forum.

- *ICT Trade/Partnership* develops and advances South Africa's interests in international and multilateral trade forums by participating in the World Trade Organisation's ICT-related initiatives and other international trade agreements. This subprogramme also makes payments for membership fees to international bodies.

## Programme 3: ICT Policy Development and Research

### Programme purpose

Develop ICT policies and legislation that support the development of an ICT sector that creates favourable conditions for accelerated and shared economic growth. Develop strategies that increase the adoption and use of ICT by the majority of South Africans to bridge the digital divide.

### Objectives

- Enable digital transformation and inclusion by:
  - developing a draft audio and audio-visual content services and online safety bill by March 2026
  - monitoring the implementation of the digital economy master plan over the medium term
  - developing a cost-to-communicate programme of action by March 2026.

### Subprogrammes

- *Programme Management for ICT Policy Development and Research* provides for the overall management of the programme.
- *ICT Policy Development* drafts legislation, regulations, policy and guidelines that govern the telecommunications, postal and IT sectors to ensure broad-based economic development.
- *Economic and Market Analysis* conducts economic analyses of the telecommunications, postal and IT sectors to determine trends and make projections. This subprogramme also conducts market research to explore areas that require policy intervention, and is responsible for reducing the cost of communication.
- *Research* is responsible for understanding the ICT landscape and delivering a national ICT strategy.
- *Small, Medium and Micro Enterprise* facilitates the growth and development of small, medium and micro enterprises in the ICT sector.
- *Broadcasting Policy* drafts legislation, regulations, policy, strategies and guidelines that govern audio-visual media sectors.
- *Presidential Commission on 4IR* coordinates, monitors and evaluates multisectoral initiatives to position South Africa as a globally competitive player in the fourth industrial revolution.

## Programme 4: ICT Enterprise and Public Entity Oversight

### Programme purpose

Oversee and manage government's shareholding interest in ICT public entities and state-owned companies. Facilitate the growth and development of small, medium and micro enterprises in the ICT sector.

### Objectives

- Improve the performance of the department's state-owned entities through proactive oversight by monitoring and evaluating their service delivery performance and compliance against strategic plans and relevant prescripts on an ongoing basis.
- Improve the impact of the State Information Technology Agency's service delivery and its market responsiveness by reviewing and redesigning the agency's business model with a view to repurpose the organisation by March 2026.

### Subprogrammes

- *Programme Management for ICT Enterprise and Public Entity Oversight* provides for the overall management of the programme.
- *Regulatory Institutions* monitors and evaluates the implementation of policies and provides guidance on and oversight of the governance matters of regulatory institutions. This subprogramme makes transfers to the Independent Communications Authority of South Africa and the Film and Publication Board.
- *Universal Service and Access* makes transfers to the South African Broadcasting Corporation, the Universal Service and Access Agency of South Africa, the Universal Service and Access Fund and the South African Post Office to provide subsidies for the fulfilment of their universal service and access mandates.
- *ICT Skills Development* makes transfers to and provides oversight of the National Electronic Media Institute of South Africa for the provision of skills development programmes.
- *State-owned Enterprise Governance and Support* strengthens the capacity of the department and that of its state-owned entities to deliver on their mandates effectively.

## Programme 5: ICT Infrastructure Development and Support

### Programme purpose

Promote investment in robust, reliable, secure and affordable ICT infrastructure that supports the provision of a multiplicity of applications and services.

### Objectives

- Increase access to secure digital infrastructure and services by:
  - monitoring the implementation of the revised South Africa Connect model for greater government, community and household internet connectivity on an ongoing basis.
  - hosting 2 computer security incident response team maturity workshops by March 2026
  - implementing 4 targeted cybersecurity awareness programmes aimed at vulnerable groups annually
  - implementing a cybersecurity master class for government cybersecurity officers by March 2026
  - conducting preliminary technical and regulatory studies to inform South Africa's position for the World Radiocommunication Conference by March 2026.

### Subprogrammes

- *Programme Management for ICT Infrastructure Development and Support* provides for the overall management of the programme.
- *Broadband* develops and facilitates the implementation of the broadband policy, strategy and rollout plan for the South Africa Connect project, and ensures that it achieves its goals.
- *ICT Support* is responsible for projects related to authentication, digital object architecture and internet governance.
- *Broadcasting Digital Migration* manages broadcasting digital migration with the aim of migrating from analogue to digital broadcasting. This subprogramme provides transfers to the Universal Service and Access Fund and Sentech for the implementation of broadcasting digital migration.

## Programme 6: ICT Information Society and Capacity Development

### Programme purpose

Develop and implement strategies to build capabilities to bridge the digital divide.

### Objectives

- Contribute towards building a digitally transformed economy and society by:
  - monitoring the automation of e-government services on government's e-portal website on an ongoing basis
  - coordinating the implementation of digital and future skills programmes on an ongoing basis
  - implementing the national artificial intelligence policy over the medium term.

### Subprogrammes

- Programme Management for ICT Information Society and Capacity Development* provides for the overall management of the programme.
- Information Society Development* supports the promotion of a digital society by facilitating the adoption and use of digital technologies.
- Capacity Development* facilitates capacity-building interventions to develop digital and future skills towards the creation of a digital society.

1. No historical data available.

### Entity overview

Broadband Infraco's legislative mandate, as set out in the Broadband Infraco Act (2007), is to provide ICT infrastructure and broadband capacity in South Africa. Its main objectives are to expand the availability and affordability of access to electronic communications, including in underdeveloped and underserved areas; ensure that bandwidth requirements for specific projects of national interests are met; and enable the state to provide affordable access to electronic communications networks and services. It is listed as a schedule 2 public entity in the Public Finance Management Act (1999).

Over the medium term, the entity will aim to maintain broadband connectivity to the 713 government sites it is responsible for as part of the first phase of the South Africa Connect project, reduce the time taken to restore faults on the core network from 7.5 hours to 7 hours, and increase its fibre network by 600 kilometres. Expenditure is expected to increase at an average annual rate of 4.2 per cent, from R836 million in 2024/25 to R944.7 million in 2027/28, mainly due to an increase in spending on broadband services, depreciation linked to capital investments for the second phase of South Africa Connect and other investments in infrastructure. The entity plans to spend a total of R2.6 billion over the MTEF period on capital expenditure, particularly on fibre networks and points of presence.

Broadband Infraco plans to increase its approved headcount to 201 personnel over the medium term, with spending on compensation of employees set to increase at an average annual rate of 6.8 per cent due to cost-of-living increases and planned recruitment, from R149.5 million in 2024/25 to R182.2 million in 2027/28. Revenue is expected to increase at an average annual rate of 17.5 per cent, from R518.8 million in 2024/25 to R842.3 million in 2027/28, mostly due to a projected increase in sales of electronic communications networks and services rendered as the entity expands its customer base.

### Entity overview

The Film and Publication Board was established in terms of the Films and Publications Act (1996), as amended. Its mandate is to regulate the creation, production, possession and distribution of certain publications and films by classifying them; imposing age restrictions on content; and rendering the exploitative use of children in pornographic publications, films or online material punishable. Since the operationalisation of the Films and Publications Amendment Act (2019) in 2022, the board is also mandated to issue, renew and revoke licences; impose fines and make recommendations for criminal prosecution to the National Director of Public Prosecutions; search and inspect premises; and stop illegal online activities.

The board plans to implement its digital roadmap strategy over the medium term and continue to monitor online platforms to enforce industry compliance. It will also undertake research and development to implement its content regulation mandate. As the board seeks to ensure that it remains a high-performing, digitised organisation, R93.4 million over the MTEF period is earmarked for maintaining and improving organisational governance, risk management and internal control. This is expected to be done by, among other things, filling key vacant posts, reviewing the board structure and committees to ensure the board provides effective oversight, conducting a risk and ethics maturity assessment, and re-engineering the organisation's business process.

Compensation of employees accounts for an estimated 62.2 per cent (R264.1 million) of planned expenditure over the period ahead, increasing at an average annual rate of 5.3 per cent, from R79.7 million in 2024/25 to

R93 million in 2027/28. A personnel plan is in place to ensure that compensation costs remain sustainable and aligned with the board's financial strategy and long-term objectives.

Total expenditure is expected to decrease in line with revenue at an average annual rate of 4.7 per cent, from R160.2 million in 2024/25 to R138.8 million in 2027/28, because of higher spending in 2024/25 as a result of National Treasury's approval to retain accumulated surplus funds. The board expects to derive 79.8 per cent (R338.1 million) of its revenue over the period ahead through transfers from the department and the remainder through fees charged for classification and registration.

### Entity overview

The Independent Communications Authority of South Africa was established by the Independent Communications Authority of South Africa Act (2000) to regulate the South African communications, broadcasting and postal services sectors, and is listed as a schedule 1 public entity in the Public Finance Management Act (1999). The regulator's mandate is defined in the Electronic Communications Act (2005) as licensing and regulating electronic communications and broadcasting services, and in the Postal Services Act (1998) as regulating the postal services sector. Enabling legislation also empowers the regulator to monitor licensee compliance with terms and conditions, develop regulations for the three sectors, plan and manage the radio frequency spectrum, and protect consumers in relation to these services.

Over the medium term, the authority will focus on the second phase of licensing high-demand spectrum, which will commence during the period ahead to be sold through an auction process, for which R102 million has been allocated in 2025/26. This will result in increased investment in ICT by the private sector and lower broadband prices for consumers. The authority will apply for approval from National Treasury to retain surplus funds to implement this and other projects. These include purchasing equipment to measure the quality of service of ICT networks, finalising regulations on the rapid deployment of electronic communications networks and facilities, and the provision of integrated business and IT service continuity solutions.

Spending on compensation of employees accounts for an estimated 68.3 per cent (R1.3 billion) of total expenditure, increasing at an average annual rate of 4.9 per cent, from R380 million in 2024/25 to R438.5 million in 2027/28. The authority expects to receive almost all of its revenue over the medium term (R1.7 billion) through transfers from the department. Revenue is expected to increase in line with expenditure.

### Entity overview

The National Electronic Media Institute of South Africa was established as a non-profit institute for education in terms of the Companies Act (1973) and is listed as a schedule 3A public entity in terms of the Public Finance Management Act (1999). The institute's programmes are structured to enhance the market readiness of students in a wide range of broadcasting disciplines. Its mandate was expanded to include the development of South Africans' digital skills capacity, and it is accordingly responsible for the implementation of digital programmes. Its expanded mandate includes providing digital skills and training for the fourth industrial revolution through identified partnerships, with the priority areas including digital transformation for government employees, creative media training, fourth industrial revolution-related courses and digital literacy.

Over the medium term, the institute will focus on the digital skills agenda in collaboration with government, the education sector, and business and civil society. Identified digital skills priority areas include government e-enablement, creative new media industries, e-inclusion and social innovation. Through programmes in these priority areas, the institute aims to train almost 500 000 learners over the period ahead in various digital and media programmes.

Spending on compensation of employees accounts for an estimated 39 per cent (R116.5 million) of the institute's planned spending over the medium term. Transfers and subsidies to higher education institutions to fund e-skills projects account for an estimated 14.3 per cent (R47.6 million) of expenditure over the period ahead. The institute is set to derive 98.4 per cent (R318 million) of its revenue over the medium term through transfers from the department and the balance through fees for training and development.

## Entity overview

Sentech was established in terms of the Sentech Act (1996), is listed as a schedule 3B public entity in the Public Finance Management Act (1999) and derives its mandate from the Electronic Communications Act (2005). It is responsible for providing broadcasting signal distribution services to licensed broadcasters. In 2002, after the deregulation of the telecommunications sector, the entity was licensed to provide international voice-based telecommunications and multimedia services.

Sentech will continue to invest in core infrastructure to ensure it maintains its unique position and continues to be a market leader in the sector. As such, it plans to continue with digital terrestrial television frequency migration, for which it has key coverage goals and digital dividend targets. As a result, spending on acquiring assets such as software and technical equipment is expected to amount to R537.8 million over the medium term, with depreciation on assets projected to reach R644.1 million over the same period.

Total expenditure is expected to increase at an average annual rate of 2.2 per cent, from R1.8 billion in 2024/25 to R1.9 billion in 2027/28. Because of higher-than-inflation increases in energy and lease costs, as well as fluctuations in foreign exchange rates, the company will implement cost-containment measures such as reducing spending on travel, among others. Additionally, its operating model has been restructured to prioritise spending on resources that create value for customers.

The entity expects to derive 98.2 per cent (R5.6 billion) of its revenue over the MTEF period through fees for television, radio and streaming services, and the remainder through other sources such as rental income. Revenue is expected to increase at an average annual rate of 3 per cent, from R1.8 billion in 2024/25 to R2 billion in 2027/28, after a slight decrease in 2025/26 due to the planned analogue switch-off.

### Entity overview

The South African Broadcasting Corporation derives its mandate from the Broadcasting Act (1999) and is listed as a schedule 2 public entity in the Public Finance Management Act (1999). It is mandated to provide broadcasting and information services through a wide range of programming that displays South African talent in educational and entertainment programmes; offer diverse views through various news, information and analysis; and advance national and public interests through popular sports. The corporation is charged with aligning with the democratic values of the Constitution and enhancing and protecting the fundamental rights of South Africa's people.

The corporation will focus on addressing its financial sustainability over the medium term. It has developed a strategy that details clear actions on new commercial capabilities to deepen its digital transformation to take advantage of new platforms and emerging technologies. This will be done through the increased commercialisation of the recently revamped over-the-top platform known as SABC+, for which the broadcaster aims to have 1 million registered users by 2027/28; and social media platforms such as TikTok and WhatsApp Channels to target the corporation's growing online audience.

Compensation of employees accounts for an estimated 38.9 per cent (R8.2 billion) of projected spending, increasing at an average annual rate of 4.8 per cent, from R2.5 billion in 2024/25 to R2.8 billion in 2027/28.

Goods and services accounts for 38.2 per cent of total expenditure, mostly for signal and broadcast costs, and programming, film and sports rights. Total expenditure is expected to increase at an average annual rate of 1.3 per cent, from R6.7 billion in 2024/25 to R7 billion in 2027/28. Despite necessary initiatives to optimise costs, the corporation will increase investment in activities that will contribute to financial sustainability, such as content acquisition, the filling of critical vacancies, and training and upskilling to improve services; and seek to increase spending on broadcasting, which will bring in additional advertising revenue.

The corporation expects to derive 78.3 per cent (R17.6 billion) of its revenue over the MTEF period through advertising and other commercial activities. Total revenue is expected to increase at an average annual rate of 6.2 per cent, from R6.5 billion in 2024/25 to R7.8 billion in 2027/28, mainly from the collection of licence fees and advertising revenue.

## South African Post Office

### Selected performance indicators

**Table 30.42 South African Post Office performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets <sup>1</sup>		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Percentage of customer queries resolved with 72 hours per year	Post office operations	Outcome 15: Social cohesion and nation building	91% (242/272)	83%	76%	96%	96%	96%	96%
Total number of points of presence	Post office operations		1 646	1 069	894	657	657	657	657
Percentage of regulated mail delivery standards achieved per year	Post office operations		68% (203 504/284 363)	52%	33%	92%	92%	92%	92%

1. Targets are based on unaudited figures from the entity and may not reconcile with departmental data.

### Entity overview

The South African Post Office is a schedule 2 public entity in terms of the Public Finance Management Act (1999). It is a government business enterprise established to provide postal and related services to the public, and derives its mandate from the Postal Services Act (1998) and the South African Post Office SOC Ltd Act (2011). The Postal Services Act (1998) grants the post office an exclusive mandate to conduct postal services and makes provision for the regulation of postal services and the operational functions of the postal company, including its universal service obligations.

The entity was placed under business rescue in July 2023 by the North Gauteng High Court. The final business rescue plan was submitted in November 2023 and was approved by the entity's creditors. Over the medium term, the entity will focus on providing universal access to postal and related services, with a strategic focus on courier; postal and financial services; and e-commerce, which entails partnering with retailers and logistics companies to provide services to them through online platforms. The entity's financial position is expected to improve over the medium term, with losses projected to reduce from R701.1 million in 2024/25 to a profit of R570.9 million in 2027/28. This is as it implements the business rescue plan through initiatives aimed at improving financial performance. To this end, R1.8 billion is allocated over the MTEF period to fund its universal service obligations.

Expenditure is set to increase by 0.1 per cent over the period ahead, to R4.5 billion in 2027/28, with compensation of employees accounting for a projected 34.7 per cent (R4.7 billion) of this spending. Transport, IT and property costs comprise the bulk of the remainder. The entity generates revenue by providing postal and courier services, and through fees for financial transactions. Revenue is expected to increase at an average annual rate of 10.2 per cent, from R3.8 billion in 2024/25 to R5.1 billion in 2027/28, which includes trading revenue, universal service obligations and interest revenue.

## State Information Technology Agency

### Selected performance indicators

**Table 30.46 State Information Technology Agency performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of e-government services implemented per year	Revenue generation stream	Outcome 19: Digital transformation across the state	100	100	100	100	100	100	100
Number of big data analytics use cases deployed through the integration of government data and systems per year	Revenue generation stream		3	4	10	12	12	12	12
Number of open innovation solutions commercialised per year	Revenue generation stream		1	3	4	5	5	5	5
Number of South Africa Connect sites connected and sustained per year	Revenue generation stream		970	970	970	970	970	970	970

### Entity overview

The State Information Technology Agency was established through the State Information Technology Agency Act (1998) and is listed as a schedule 3A public entity. The agency is mandated to provide IT, information systems and related services to and on behalf of government departments and organs of the state. This includes the provision and maintenance of transversal information, data-processing systems and their associated services, the maintenance of secure information systems, and the execution of its functions according to approved policies and standards.

The agency will focus on investment in digital infrastructure and improving efficiencies over the medium term through the network value chain to become a swift, agile, capable and responsive government entity for the convenience of citizens. In an effort to transform public services and customer experience, the agency will also scale up connectivity and mobility services for integration into government platforms. As such, R3 billion is earmarked to acquire assets over the medium term.

Spending on goods and services accounts for an estimated 63.5 per cent (R17.3 billion) of the agency's expenditure over the medium term, mainly for the provision of IT services. Compensation of employees accounts for an estimated 31.8 per cent (R8.7 billion) of the budget as the agency requires highly skilled personnel to fulfil its mandate. Vacant posts are expected to be filled over the period ahead to ensure that the agency it is capacitated in line with its approved structure. As such, the total number of employees is expected to increase to 3 603 in 2027/28.

The agency generates revenue by providing ICT infrastructure and services to government departments and organs of state. Revenue is expected to increase at an average annual rate of 6 per cent, from R8 billion in 2024/25 to R9.6 billion in 2027/28.

## Universal Service and Access Agency of South Africa

### Entity overview

The Universal Service and Access Agency of South Africa was established in terms of section 80 of the Electronic Communications Act (2005), as amended, and is listed as a schedule 3A public entity in terms of the Public Finance Management Act (1999). The agency's main aim is to promote universal access to telecommunications and digital services, especially in underserved and rural communities.

The agency will continue to manage the Universal Service and Access Fund over the MTEF period to ensure that it reaches qualifying beneficiaries in line with its legislative mandate. To ensure the fund is managed effectively and efficiently, the agency will put in place mechanisms to improve internal control systems and processes. This will ensure that its administration is sound and eliminates any irregular or fruitless and wasteful expenditure. The process to abolish the agency, in line with the Electronic Communications Act (2005) and directives from the department, will continue over the medium term.

Expenditure is expected to decrease at an average annual rate of 4.4 per cent, from R106.8 million in 2024/25 to R93.3 million in 2027/28. The decrease is due to higher spending in 2024/25 as a result of surplus funds retained with approval from National Treasury for projects such as ICT infrastructure, software and equipment. As some of these projects span multiple years, the entity has received approval from National Treasury to budget

for a deficit in 2025/26 to continue with these projects. Compensation of employees accounts for an estimated 73.6 per cent (R209.5 million) of total spending over the medium term. This spending is projected to increase at an average annual rate of 2.2 per cent. The agency expects to derive its entire budget over the medium term through transfers from the department.

### Entity overview

The Universal Service and Access Fund was established in terms of section 89(1) of the Electronic Communications Act (2005), as amended, and is listed as a schedule 3A public entity in terms of the Public Finance Management Act (1999). The fund's sole mandate is to subsidise ICT equipment and services, and electronic communications and broadcasting networks for needy people in underserved areas. It is managed by the Universal Service and Access Agency of South Africa.

The fund will focus on concluding the broadcasting digital migration project over the MTEF period after analogue broadcasting is switched off in the remaining districts. This will lead to the release of the high-demand spectrum that will mostly be used by mobile network operators to provide high-speed broadband services to their customers. The fund will provide aftermarket support to all qualifying beneficiaries of the project, such those who encounter problems with their installed set-top boxes. To improve the governance of the fund's subsidies and funding, it will monitor compliance with the broadcasting digital migration funding model, the funding policy and procedures manual, and track set-top box installations. The fund will also focus on increasing the deployment of sustainable and reliable digital communication, infrastructure and broadband services to underserved areas throughout the country.

As a result, expenditure is set to decrease at an average annual rate of 62.7 per cent, from R1.2 billion in 2024/25 to R60.1 million in 2027/28, as the broadcasting digital migration project concludes. The projected deficit of R1.8 billion in 2025/26 is due to the spending of funds retained from previous financial years with the approval of National Treasury in terms of section 53(3) of the Public Finance Management Act (1999). These funds are expected to be used mostly for activities related to broadcasting digital migration. The fund is set to derive all its revenue, amounting to an estimated R172.6 million over the medium, through transfers from the department.

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

*Reduce unemployment, poverty and inequality by pursuing the objectives of decent work for all through: employment creation and enterprise development; the setting of standards and protection of rights at work, including the facilitation of equal opportunities and social dialogue; and the provision of social protection.*

### Mandate

The Department of Employment and Labour derives its legislative mandate from the Constitution, particularly the Bill of Rights, which is given effect through several acts that regulate labour matters in South Africa. The most important of these are the Occupational Health and Safety Act (1993), the Labour Relations Act (1995), the Basic Conditions of Employment Act (1997), the Employment Equity Act (1998) and the Employment Services Act (2014).

The department is mandated to regulate the labour market through policies and programmes developed in consultation with social partners. These aim to:

- improve economic efficiency and productivity
- facilitate the creation of decent employment
- promote labour standards and fundamental rights at work
- provide adequate social safety nets to protect vulnerable workers
- promote and enforce sound labour relations
- promote equity and eliminate discrimination in the workplace
- enhance occupational health and safety awareness and compliance with health and safety laws in the workplace
- give value to social dialogue in the formulation of sound and responsive legislation and policies for flexibility in the labour market to enhance competition, balanced with the promotion of decent employment.

## Expenditure overview

In support of the National Development Plan's vision of eliminating poverty and reducing inequality, the department facilitates the resolution of workplace disputes, works towards improving labour relations and enhancing occupational health and safety, and facilitates various initiatives that create jobs. In giving effect to this over the medium term, the department will focus on increasing safety and fairness in the workplace, providing support to work seekers and regulating the workplace to establish minimum working conditions and fair labour practices.

The department's budget over the period ahead is R12.3 billion, increasing at an average annual rate of 2.6 per cent, from R3.9 billion in 2024/25 to R4.2 billion in 2027/28. Cabinet has approved increases to the department's baseline of R350 million in 2025/26 for the national pathway management network; R11.1 million in 2025/26, R11.5 million in 2026/27 and R12.1 million in 2027/28 to cover the costs of the appointment of an additional deputy minister; and R15.1 million in 2025/26, R16.2 million in 2026/27 and R17 million in 2027/28 to cover cost-of-living adjustments for public servants.

The department will lead the G20 employment working group in 2025/26 and coordinate Labour 20, which represents workers' interests. This will entail contributing to policy discussions and advocating inclusive and sustainable economic growth, job creation and social protection. R62 million in 2025/26 is allocated for G20 meetings, of which R50 million will be funded by the department, the Unemployment Insurance Fund and the Compensation Fund, with the remaining R12 million to be sourced through sponsorships.

### ***Increasing safety and fairness in the workplace***

Guided by the pillars of advocacy, inspections and enforcement, work in the *Inspection and Enforcement Services* programme is intended to ensure increased compliance with labour laws. Advocacy activities over the MTEF period include 12 seminars and 6 conferences that focus on improving fairness in the workplace (especially for young people, people with disabilities and women) and helping workers transition from the informal to the formal economy. As part of the drive to advance and measure compliance with occupational health and safety standards, the department, through the *Compliance, Monitoring and Enforcement Services* subprogramme, plans to conduct 924 122 employer inspections over the period ahead at a projected cost of R1.7 billion.

The *Inspection and Enforcement Services* programme will continue to implement the case management system in 2025/26 to ensure that its business processes are fully modernised to conduct focused inspections. The department further plans to improve and strengthen its enforcement function by 2027/28 by issuing fines and/or penalties to 70 per cent of employers who fail to comply with served notices and referring them for prosecution within 30 calendar days, and by serving 97 per cent of noncompliant employers with legal notices within 14 calendar days.

To carry out these activities, the *Inspection and Enforcement Services* programme is allocated R2.1 billion over the medium term. This spending is set to increase at an average annual rate of 4.9 per cent, from R637.8 million in 2024/25 to R735.4 million in 2027/28.

### ***Providing support to work seekers***

Activities in the *Public Employment Services* programme underscore the department's commitment to creating decent employment, mainly for young people. To this end, over the next 3 years, the department plans to register 3 150 000 eligible work seekers on the Employment Services of South Africa system and provide employment counselling to 840 000 work seekers within a month of registration on the system. In the department's efforts to fill at least 70 000 registered employment opportunities with registered work seekers each year over the period ahead, it will refer work seekers who are matched on the system to employers within 20 working days of receipt of work and/or learning opportunities.

It is estimated that 152 000 job opportunities will be created in 2025/26 through a presidential employment initiative allocation of R350 million in 2025/26 to continue the national pathway management network and the innovation fund, and to employ intern counsellors at labour centres. In addition to the employment opportunities that will be created, these initiatives are expected to support increased access to relevant education and training interventions, help young people make choices about learning and earning, and identify barriers that young people face when trying to enter the labour market.

To contribute to coordinating employment interventions across the country, the department plans to submit the approved national employment policy for public consultation over the medium term with the aim of finalising it for implementation by 2027/28. The revised national labour migration policy, a pillar of the national employment policy, will limit the availability of middle-level and lower-level jobs for foreign nationals in several sectors while helping to place excess skilled South Africans in other countries.

The department has a subsidy scheme for people with disabilities that currently supports the employment of 1 041 people in 4 provinces by co-funding their income. The scheme is set to be extended to all provinces in 2025/26 to provide support to an estimated 2 500 people and has a budget of R71.5 million over the MTEF period.

Spending for these initiatives to support work seekers is within the *Public Employment Services* programme's allocation of R2.6 billion over the MTEF period, accounting for an estimated 21.6 per cent of total projected departmental spending. Expenditure in the programme is set to decrease at an average annual rate of 5.5 per cent, from R917.5 million in 2024/25 to R774.1 million in 2027/28, as a result of allocations in 2024/25 and 2025/26 for the national pathway management network.

## Regulating the workplace

The department plans to develop mechanisms over the period ahead to measure the impact of its interventions on the economy, promote sound labour relations and collective bargaining, and conduct annual reviews of the national minimum wage. To carry out these activities, the *Labour Policy and Industrial Relations* programme is allocated R4.2 billion over the medium term, of which 76.8 per cent (R3.2 billion) is allocated to the Commission for Conciliation, Mediation and Arbitration to promote sound labour relations, labour peace and social justice, and to democratise the workplace.

The department also expects to finalise policy instruments and systems over the next 3 years to ensure the implementation of the employment equity amendments contained in the Employment Equity Amendment Act (2022). The employment equity system, an electronic tool to collect data, will be enhanced to enable these amendments and to issue employment equity certificates of compliance. The *Employment Equity* subprogramme in the *Labour Policy and Industrial Relations* programme is allocated R45.9 million over the MTEF period to carry out these activities.

## Programme 2: Inspection and Enforcement Services

### Programme purpose

Realise decent work by regulating non-employment and employment conditions through inspection and enforcement to achieve compliance with all labour market policies.

### Objectives

- Protect vulnerable workers through the inspection and enforcement of labour legislation by ensuring that decent work principles are adhered to by March 2026 by:
  - conducting 298 104 compliance inspections
  - serving 95 per cent of noncompliant employers inspected with a notice in terms of relevant employment law within 14 calendar days of inspection
  - referring for prosecution 65 per cent of employers who fail to comply with a served notice within 30 calendar days
  - increasing awareness of employment law through formal advocacy sessions at 4 seminars and 2 conferences.

### Subprogrammes

- *Management and Support Services: Inspection and Enforcement Services* manages the delegated administrative and financial responsibilities of the office of the deputy director-general and provides corporate support to line-function subprogrammes within the programme.
- *Occupational Health and Safety* promotes health and safety in the workplace by conducting inspections on compliance with the Occupational Health and Safety Act (1993), and regulating dangerous activities and the use of plant and machinery.
- *Registration: Inspection and Enforcement Services* registers incidents relating to labour relations and occupational health and safety, as reported by members of the public, and communicates these to the relevant structures within the *Compliance, Monitoring and Enforcement Services* subprogramme for investigation.
- *Compliance, Monitoring and Enforcement Services* ensures that employers and employees comply with labour legislation by conducting regular inspections and following up on reported incidents.
- *Training of Staff: Inspection and Enforcement Services* defrays all expenditure relating to staff training in the programme.
- *Statutory and Advocacy Services* gives effect to the legislative enforcement requirement and educates stakeholders on labour legislation.

## Programme 3: Public Employment Services

### Programme purpose

Assist companies and workers to adjust to changing labour market conditions.

### Objectives

- Provide public employment services by March 2026 by:
  - registering 1 000 000 work seekers on the Employment Services of South Africa system
  - providing employment counselling to 270 000 work seekers
  - filling 70 000 registered employment opportunities
  - registering 120 000 work opportunities on the Employment Services of South Africa system.
- Contribute to increasing employment opportunities for people with disabilities over the medium term by providing quarterly funding and monitoring disability organisations on an ongoing basis.

### Subprogrammes

- *Management and Support Services: Public Employment Services* manages delegated administrative and financial responsibilities; coordinates all planning, monitoring and evaluation functions; and provides corporate support to line function subprogrammes in the programme.
- *Employer Services* registers work opportunities, facilitates the employment of foreign nationals where such skills do not exist in South Africa, oversees placements, responds to companies in distress, provides a social plan and regulates private employment agencies.
- *Work Seeker Services* registers work seekers; retrenched workers; and work, learning, training and income-generating opportunities for the unemployed and underemployed.
- *Designated Groups Special Services* facilitates the transfer of subsidies to national councils and workshops for the blind to promote the employment of people with disabilities.
- *Supported Employment Enterprises* promotes work and employment opportunities for people with disabilities by improving the administration, production and financial management of supported employment enterprises.
- *Productivity South Africa* transfers funds to Productivity South Africa, which promotes workplace productivity, competitiveness and social plan interventions.
- *Unemployment Insurance Fund* provides for the possible future funding of the Unemployment Insurance Fund.
- *Compensation Fund* provides for costs incurred through claims from civil servants for injuries sustained on duty or occupation-related illnesses and diseases, and for the funding of claims from the Compensation Fund.
- *Training of Staff: Public Employment Services* defrays all expenditure relating to staff training in the programme to easily identify this expenditure for reporting purposes.

## Programme 4: Labour Policy and Industrial Relations

### Programme purpose

Facilitate the establishment of an equitable and sound labour relations environment. Support institutions of social dialogue and promote South Africa's interests in international labour matters. Conduct research and analysis, and evaluate labour policy. Provide statistical data on the labour market.

### Objectives

- Improve the implementation of employment equity and compliance monitoring mechanisms in the labour market by:
  - publishing the 2024/25 employment equity annual report and public register by 30 June 2025
  - developing the 2025/26 employment equity annual report and public register by 31 March 2026.
- Extend protection to vulnerable workers by publishing national minimum wages for all sectors by 31 March 2026.
- Promote sound labour relations and centralised collective bargaining by extending all collective agreements and registering all qualifying labour organisations by 31 March 2026.
- Monitor and evaluate the impact of labour legislation to promote an evidence-based labour policy framework by producing 2 research and 4 labour market trends reports by 31 March 2026.

### Subprogrammes

- *Management and Support Services: Labour Policy and Industrial Relations* manages delegated administrative and financial responsibilities; coordinates all planning, monitoring and evaluation functions; and provides corporate support to line-function subprogrammes in the programme.
- *Strengthen Civil Society* transfers funds to various civil society organisations that protect vulnerable workers by providing resources, support and expertise to improve the independence and self-reliance of workers so that they can contribute to a stable and well-functioning labour market.
- *Collective Bargaining* manages the implementation of the Labour Relations Act (1995) through policies and practices that promote sound labour relations by registering labour organisations and deregistering those that are noncompliant, publishing and extending collective agreements, supporting and advancing participation in collective bargaining structures, and participating in relevant National Economic Development and Labour Council activities.
- *Employment Equity* promotes equity in the labour market by developing and promoting employment equity policy instruments – as mandated by the amended Employment Equity Act (1998) – to eliminate discrimination and promote equitable representation in the workplace.

- *Employment Standards* protects vulnerable workers in the labour market by administering the Basic Conditions of Employment Act (1997) and publishing national minimum wages for all sectors, as mandated by the National Minimum Wage Act (2018).
- *Commission for Conciliation, Mediation and Arbitration* transfers funds to the Commission for Conciliation, Mediation and Arbitration, which promotes social justice and fairness in the workplace by providing dispute-prevention and resolution services.
- *Research, Policy and Planning* monitors and evaluates the impact of labour legislation and policies on the South African labour market.
- *Labour Market Information and Statistics* collects, collates, analyses and disseminates internal and external labour market statistics on changes in the South African labour market resulting from the implementation of labour legislation.
- *International Labour Matters* contributes to national and global policy formulation and facilitates compliance with international obligations through multilateral and bilateral relations.
- *National Economic Development and Labour Council* transfers funds to the National Economic Development and Labour Council, which promotes economic growth, participation in economic decision-making and social equity through social dialogue; and for the operations of the Presidential Climate Commission.

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Percentage of arbitration awards rendered sent to parties within 14 days of the conclusion of the arbitration proceedings (excludes extensions granted and heads of arguments filed)	Dispute resolution and enforcement services	Outcome 1: Increased employment and work opportunities	99.95% (15 938/ 15 946)	99.95% (17 947/ 17 956)	99.99% (17 130/ 17 131)	90%	98%	98%	98%
Percentage of disputes of interests resolved per year	Dispute resolution and enforcement services		58.2% (2 384/ 4 093)	67.9% (2 142/ 3 154)	58.8% (1 002/ 1 703)	54%	54%	54%	54%
Percentage of jobs saved compared to employees likely to be retrenched per year (as per cases referred to the commission)	Dispute resolution and enforcement services		39.9% (18 715/ 46 953)	50.9% (18 196/ 35 679)	38.7% (14 887/ 38 428)	38%	38%	38%	38%

### Entity overview

The Commission for Conciliation, Mediation and Arbitration derives its mandate primarily from the Labour Relations Act (1995), as amended. In terms of the act, the commission is expected to advance, among other things, economic development, social justice, labour peace and the democratisation of the workplace. This mandate is further extended by other statutes related to employment law. As the commission rolls out its 2025-2029 strategy, it will focus on resource optimisation, adaptation, resilience and end-user experience.

An estimated 72.6 per cent (R2.4 billion) of the commission's budget over the period ahead is allocated to ensuring efficient dispute resolution. It will seek innovative ways of accommodating an anticipated 5 per cent increase in its caseload/referrals over the next 3 years, from 194 648 in 2024/25 to 224 000 in 2026/27, including case carryovers, by leveraging ICT to improve its efficiency and accessibility. To this end, the commission has allocated 10.5 per cent (R342.4 million) of its budget over the medium term to fund the rollout of its ICT strategy.

To address growing inequality in the labour market resulting from external factors that are changing the nature of work, the commission has allocated 1.3 per cent (R41.7 million) of its total budget over the MTEF period to proactive labour market interventions. Of this amount, R31.6 million is made available to fund job-saving initiatives. To promote sound labour relations, the commission also aims to reduce the potential for industrial action, including by increasing the use of pre-conciliation and proactive engagement.

Compensation of employees accounts for an estimated 60.7 per cent (R2 billion) of the commission's budget over the MTEF period as its work is labour intensive. Expenditure and revenue are expected to increase at an average annual rate of 4.7 per cent, from R992.9 million in 2024/25 to R1.1 billion in 2027/28. The commission expects to derive 97.9 per cent (R3.2 billion) of revenue over the next 3 years through transfers from the department and the remainder through interest earned and services rendered.

### Entity overview

The Compensation Fund is mandated to administer the Compensation for Occupational Injuries and Diseases Act (1993). The act makes provision for compensating employees who are injured and disabled because of occupational injuries sustained and diseases contracted at work, and the compensation of the nominated beneficiaries of employees who die as a result of such injuries or diseases.

Over the period ahead, the fund will focus on improving the services it renders to its beneficiaries and other stakeholders. It has implemented an online integrated employer portal that enables employers to register, submit returns on earnings, pay their annual assessments and obtain letters of good standing seamlessly. This is expected to ensure that 90 per cent of accepted and approved claims are adjudicated and processed within 25 working days over the period ahead.

Benefit payments account for a projected 43 per cent (R22.7 billion) of the fund's total budget over the MTEF period, increasing at an average annual rate of 2.2 per cent, from R7.4 billion in 2024/25 to R7.9 billion in 2027/28. The fund is set to derive 44.2 per cent (R37.7 billion) of its revenue over the next 3 years through assessment levies on active registered employers and 55.8 per cent (R48.7 billion) from investments. Revenue is set to increase at an average annual rate of 5.9 per cent, from R24.6 billion in 2024/25 to R29.2 billion in 2027/28. However, total spending is set to decrease at an average annual rate of 0.3 per cent, from R18.3 billion in 2024/25 to R18.1 billion in 2027/28, mainly due to decreases in spending on capital expenditure as a result of fewer capital projects and lower depreciation, and on goods and services as more meetings are held virtually.

1. No resolutions were made as no section 77 final reports were concluded.

2. No historical data available.

3. No agreements were concluded as no agreements were tabled.

### Entity overview

The National Economic Development and Labour Council was established by the National Economic Development and Labour Council Act (1994) and operates in terms of its own constitution and protocols. Other

legislation directly relevant to the council includes the Labour Relations Act (1995), which seeks to promote economic development, social justice, labour peace and democratisation in the workplace. The council's ongoing strategic focus is encouraging social partners to contribute meaningfully to processes to address economic growth and social equity.

Over the MTEF period, the council and the Presidential Climate Commission, which is temporarily housed within the council, will continue to curate social dialogues, bring stakeholders together on critical socioeconomic issues and provide input into policy and legislation. Focus will be placed on enabling inclusive growth and cushioning workers, businesses and communities from the effects of climate change and digitalisation.

Of the council's total budget, 36.4 per cent (R96.3 million) is earmarked for the operations of the Presidential Climate Commission. This arrangement will cease once the Climate Change Act (2024) is promulgated and the commission is established as a standalone schedule 3A public entity within the Department of Forestry, Fisheries and the Environment. Total expenditure and revenue are expected to increase at an average annual rate of 2.0 per cent, from R91.4 million in 2024/25 to R96.9 million in 2027/28. The council is set to derive 97.8 per cent (R273.5 million) of its revenue over the period ahead through transfers from the department.

### Entity overview

Productivity South Africa was established in terms of section 31 of the Employment Services Act (2014). It is mandated to promote employment growth and productivity, and thereby contribute to South Africa's socioeconomic development and competitiveness. Over the medium term, the entity will focus on improving South Africa's competitiveness and the sustainability of its enterprises.

Through its competitiveness improvement services programme, over the period ahead, the entity will aim to

create an enabling environment for a targeted 3 756 small, medium and micro enterprises and cooperatives in the formal and informal economies to improve productivity and competitiveness while maintaining their sustainability.

The entity has implemented a financial turnaround and sustainability strategy focusing on business development and expanding service offerings that are expected to generate additional revenue. Accordingly, revenue from the sale of goods and services is expected to increase at an average annual rate of 4.5 per cent, from R43.1 million in 2024/25 to R49.2 million in 2027/28.

The entity expects to receive 73.7 per cent (R408.1 million) of its revenue over the MTEF period through transfers from the Department of Labour and Employment, the Department of Trade, Industry and Competition, and the Unemployment Insurance Fund. Total expenditure and revenue are expected to increase at an average annual rate of 4.7 per cent, from R168 million in 2024/25 to R192.9 million in 2027/28.

## Unemployment Insurance Fund

### Selected performance indicators

**Table 31.30 Unemployment Insurance Fund performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Percentage of valid unemployment benefit claims with complete, accurate and verified information approved or rejected within 15 working days per year	Business operations	Outcome 11: Optimised social protection and coverage	94% (1 058 483/ 1 131 787)	89% (925 543/ 1 039 973)	94% (950 174/ 1 007 309)	92% within 15 working days	85% within 15 working days	87% within 12 working days	90% within 10 working days
Percentage of valid in-service benefit claims with complete, accurate and verified information approved or rejected within the specified timeframe per year	Business operations		93% (124 642/ 133 544) within 10 working days	85% (101 021/ 118 816) within 10 working days	90% (106 298/ 117 806) within 10 working days	92% within 10 working days	85% within 10 working days	87% within 10 working days	90% within 8 working days
Percentage of valid deceased benefit claims with complete, accurate and verified information approved or rejected within the specified timeframe per year	Business operations		97% (15 058/ 15 516) within 20 working days	89% (12 357/ 13 836) within 20 working days	96% (13 785/ 14 312) within 20 working days	92% within 20 working days	85% within 15 working days	87% within 12 working days	90% within 10 working days
Number of beneficiaries participating in employability programmes per year	Labour activation programmes		10 202	8 457	5 302	360 000	365 000	370 000	375 000
Percentage of approved temporary employer/ employee relief scheme applications paid within specified timeframes per year	Labour activation programmes		7% (2/27) within 15 working days	100% (4) within 20 working days	100% (4) within 20 working days	90% within 20 working days	92% within 20 working days	93% within 20 working days	94% within 20 working days

### Entity overview

The Unemployment Insurance Fund is mandated to alleviate poverty by providing effective short-term unemployment insurance to all workers who qualify for unemployment and related benefits, as legislated in the Unemployment Insurance Act (2001). The fund's primary operations include registering employers and employees, collecting contributions from employers and paying benefit claims to eligible contributors. Over the medium term, the fund will focus on providing social insurance benefits and improving coverage to vulnerable groups and contributors.

Reducing turnaround times for the payment of claims remains one of the fund's key deliverables. To this end, it plans to pay 90 per cent of claims within 10 days by 2027/28 at an estimated cost of R97.6 billion over the medium term as transfers and subsidies paid.

The fund plans to implement 331 labour activation programmes to create more than 1 million employment opportunities over the medium term. Participants will be selected from the Employment Services of South Africa system. These opportunities, which target 70 per cent of former fund contributors and 30 per cent of new work seekers, will run for between 12 and 36 months and be implemented through partnerships with organisations operating in 22 key sectors of the economy. Included in these targets is the employment of 140 000 teacher assistants as part of the presidential employment initiative at a projected cost of R4 billion in 2025/26 which will be implemented by the Industrial Development Corporation. R27.9 billion over the period ahead is allocated for implementing labour activation programmes.

Through the temporary employer/employee relief scheme and the turnaround solutions programme, the fund provides support to distressed businesses seeking to retain their employees. The Commission for Conciliation, Mediation and Arbitration, on behalf of the fund, is responsible for the administration of the scheme and adjudicating applications. Under the scheme, 75 per cent of an employee's basic salary, up to a maximum of R17 119.44 per month, is funded for a maximum of 12 months. Allocations for this projected spending amount to R4.6 billion over the period ahead.

The fund plans to deploy additional resources over the MTEF period, such as kiosks and buses, in strategic areas either to augment the capacity of existing labour centres or provide services to areas that are far from existing labour centres. As such, the fund plans to deploy 17 buses over the period ahead to enhance service delivery at a projected cost of R255 million.

Unemployment insurance contributions are set to increase at an average annual rate of 4.7 per cent, from R25.5 billion in 2024/25 to R29.3 billion in 2027/28, while benefits paid are expected to increase at an average annual rate of 1.9 per cent, from R31.1 billion in 2024/25 to R32.9 billion in 2027/28. Expenditure is expected to increase at an average annual rate of 2.7 per cent, from R41 billion in 2024/25 to R44.4 billion in 2027/28. Revenue is expected to decrease at an average annual rate 2 per cent, from R48.3 billion in 2024/25 to R45.4 billion in 2027/28.

Executive authority Minister of Forestry, Fisheries and the Environment  
 Accounting officer Director-General of Forestry, Fisheries and the Environment  
 Website [www.environment.gov.za](http://www.environment.gov.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

## Vote purpose

*Lead South Africa's environmental, forestry and fisheries sectors to achieve sustainable development towards a better quality of life for all.*

## Mandate

The Department of Forestry, Fisheries and the Environment is mandated to give effect to the right of citizens to an environment that is not harmful to their health or wellbeing and that is protected for the benefit of current and future generations. To this end, the department provides leadership on sustainability in environmental management, conservation and protection for the benefit of South Africans and the global community. The department's mandate is derived from the:

- Marine Living Resources Act (1998), which deals with the sustainable long-term use of marine living resources
- National Environmental Management Act (1998), which provides for specific legislation on biodiversity and heritage resources, oceans and coasts, climate change and air quality management, and waste and chemicals management
- National Forests Act (1998), which promotes the sustainable management and development of forests for the benefit of all, and creates the conditions necessary to restructure forestry in state forests for protection and sustainable use
- National Veld and Forest Fire Act (1998), which provides for the prevention and combating of veld, forest and mountain fires across South Africa
- National Environmental Management: Air Quality Act (2004), which reforms the law regulating air quality to protect the environment by providing reasonable measures for preventing pollution and ecological degradation, and securing ecologically sustainable development; and provides for national norms and standards that regulate the monitoring of air quality
- National Environmental Management Amendment Act (2004), which streamlines the regulation and administration of environmental impact assessment processes
- National Environmental Management: Biodiversity Act (2004), which significantly reforms the laws regulating biodiversity

- National Environmental Management: Integrated Coastal Management Act (2008), which promotes the conservation of the coastal environment and ensures that development practices and the use of natural resources are sustainable
- National Environmental Management: Waste Act (2008), which reforms the law regulating waste management to protect health and the environment by providing reasonable measures to prevent pollution
- National Environmental Management: Protected Areas Amendment Act (2009), which provides for the assignment of national parks, special parks and heritage sites in terms of the World Heritage Convention Act (1999).

## Selected performance indicators

**Table 32.1 Performance indicators by programme and related outcome**

Indicator	Programme	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of environmental authorisations inspected per year	Regulatory Compliance and Monitoring	Outcome 18: A capable and professional public service	197	217	217	195	200	210	220
Number of relief voyages to Antarctica, and Gough and Marion islands per year	Oceans and Coasts		3	3	3	3	3	3	3
Number of hectares of land added to the conservation estate per year	Biodiversity and Conservation	Outcome 1: Increased employment and work opportunities	680 532	382 517	81 500	90 000	100 000	105 000	110 000
Number of full-time equivalent work opportunities created through the expanded public works programme per year	Environmental Programmes		30 499	18 208	20 209	22 538	15 654	13 654	15 094
Number of work opportunities created through the expanded public works programme per year	Environmental Programmes		61 923	43 911	58 858	31 075	22 580	20 498	23 371
Tonnes of waste tyres processed per year	Chemicals and Waste Management		21 325	36 355	53 333	45 000	54 000	64 800	77 760
Number of hectares of temporary unplanted areas planted per year	Forestry Management		— <sup>1</sup>	1 124.7	1 848.6	1 800	1 800	1 800	1 800
Number of plantations handed over to communities per year	Forestry Management		2	3	8	8	8	8	8

1. No historical data available.

## Expenditure overview

Over the medium term, the department will focus on implementing the Climate Change Act (2024) to mitigate and adapt to climate change, creating jobs and work opportunities in the sector through the expanded public works programme, and building and protecting South Africa's conservation estate.

Expenditure is set to increase at an average annual rate of 4.1 per cent, from R8.8 billion in 2024/25 to R9.9 billion in 2027/28. An estimated 49 per cent (R14.5 billion) of the department's allocation over the MTEF period is earmarked for spending on goods and services, mostly for projects in the expanded public works programme, implementing the forestry master plan and rolling out the waste management plan. Transfers and subsidies to the department's entities accounts for an estimated 21.6 per cent (R5.5 billion) of expenditure over the period ahead. R10 million in 2025/26 is set aside to cover costs related to South Africa's G20 presidency, including ministerial meetings on climate and environmental sustainability and energy transition, and technical preparatory meetings.

### Mitigating and adapting to climate change

The Climate Change Act (2024) is South Africa's first piece of legislation designed specifically to mitigate and address the effects of climate change. To promote a low-carbon, climate-resilient economy in South Africa, the act seeks to establish a fair, long-term energy transition strategy and implement measures that address climate change. In its implementation of the act, over the medium term, the department will aim to develop climate change response plans and mitigating instruments to enhance South Africa's ability and capacity to reduce greenhouse gas emissions and build climate resilience while reducing the risk of job losses and promoting opportunities for new jobs in the emerging green economy. The act will also strengthen coordination between national departments to enable South Africa to meet its commitments in terms of the Paris Agreement. Activities related to climate change legislation, resilience and adaptation will be carried out through the *Climate Change and Air Quality* programme's allocation of R1.7 billion over the MTEF period.

### Creating jobs and work opportunities in the sector

The department aims to create employment opportunities and provide jobs through relevant interventions within government's expanded public works programme. To this end, as part of the programme, the department plans to create 44 402 full-time equivalent jobs and 66 449 work opportunities over the MTEF period. This will be achieved by rolling out projects and initiatives that involve increasing the percentage of land under conservation and managing the sustainable use of land (Working for Ecosystems); protecting, restoring and rehabilitating wetlands (Working for Wetlands); protecting water resources (Working for Water); addressing the issues facing the fisheries sector (Working for Fisheries); maintaining production, growth and transformation in the forestry sector (Working for Forests); and implementing projects and initiatives that involve restoring and rehabilitating degraded ecosystems (environmental protection and infrastructure programmes). To fund these initiatives, R9.1 billion is set aside over the medium term in the *Environmental Programmes* programme.

### Building and protecting South Africa's conservation estate

Over the medium term, the department plans to transform iconic sites such as the Kruger National Park, iSimangaliso Wetland Park and the Kirstenbosch National Botanical Garden into world-renowned destinations that set new standards for conservation, education and sustainable tourism. This will result in the creation of new green economy jobs and opportunities in fields such as environmental science, sustainable tourism and wildlife management. Associated training and capacity-building programmes will empower local communities and foster inclusive growth. Building and protecting South Africa's conservation estate will continue to be a priority over the medium term. To this end, the department plans to add 315 000 hectares of land to the conservation estate to protect the country's wealth of biodiversity and facilitate economic development. The department also intends to reimagine its role in botanical and zoological gardens beyond environmental stewardship towards unlocking their economic potential, and will look into ways to integrate cutting-edge technology, enhance visitor experience and implement innovative conservation practices. Expenditure for these activities is within an allocation of R4.1 billion over the MTEF period in the *Biodiversity and Conservation* programme.

## Programme 2: Regulatory Compliance and Monitoring

### Programme purpose

Promote the development of an enabling legal regime and licensing authorisation system that promotes enforcement and compliance, and ensure the coordination of sector performance.

### Objectives

- Prevent or mitigate the potential negative impact of significant developmental activities on the natural environment through the implementation of an environmental impact management authorisation system by processing and finalising or issuing all decisions for environmental authorisation applications within prescribed timeframes annually.
- Improve compliance with environmental legislation by increasing the number of environmental authorisation inspections from 195 in 2024/25 to 220 in 2027/28.

### Subprogrammes

- *Regulatory Compliance and Monitoring Management* provides for the administration and functioning of the programme by carrying out its planning and performance management functions.
- *Corporate Legal Support and Litigations* provides support for litigation, alternative dispute resolution and departmental debts and losses.
- *Law Reform and Policy Coordination* ensures the provision of effective and efficient support to the department's law reform programme so that appeals are dealt with effectively.
- *Integrated Environmental Authorisations* implements integrated environmental authorisation systems and administers appeals processes.
- *Compliance* promotes compliance with environmental legislation by undertaking inspections on all authorisations issued by the department.
- *Enforcement* coordinates the national environment programme and provides strategic support to the environmental management inspectorate.
- *Appeals and Strategic Environmental Instruments* provides for environmental sector performance and facilitates the development and implementation of strategic and operational plans for the sector.
- *Sector Knowledge and Information Management* provides information and advocacy for sustainable development through the development, implementation and management of knowledge and information management systems.

## Programme 3: Oceans and Coasts

### Programme purpose

Promote, manage and provide strategic leadership on oceans and coastal conservation.

### Objectives

- Strengthen knowledge, science and policy for the management of oceans and coastlines by conducting 4 research programmes on key areas of oceans management per year.
- Conserve ocean and coastal ecosystems and ensure their sustainable use by March 2028 by:
  - amending, applying and monitoring the implementation of the national estuarine management protocol in 5 national estuaries
  - enhancing sector monitoring and evaluation by developing and implementing the national oceans and coasts water quality monitoring programme.

### Subprogrammes

- *Oceans and Coasts Management* provides for the administration and coordination of activities in the programme.
- *Integrated Coastal Management and Coastal Conservation* provides national strategic direction, leadership, management and support within applicable legislation and policy on integrated coastal management.
- *Oceans and Coastal Research* provides national strategic direction, leadership, management and support to ocean and coastal research.
- *Oceans Economy and Project Management* manages, coordinates, facilitates, analyses and reports on the implementation of initiatives within the oceans economy.
- *Specialist Monitoring Services* provides specialist oceans and coastal monitoring, evaluation and reporting.

## Programme 4: Climate Change and Air Quality

### Programme purpose

Lead, promote, facilitate, inform, monitor and review the mainstreaming of environmental sustainability, low carbon emissions, climate resilience and air quality in South Africa's transition to sustainable development.

### Objectives

- Manage threats to environmental quality and integrity over the medium term by:
  - preparing, negotiating and informing the implementation of mini-lateral, bilateral and multilateral climate change agreements and reporting
  - ensuring that legislative and other measures are developed, implemented and maintained to protect and defend the rights of all to air that is of sufficient atmospheric quality and is not harmful to health and wellbeing

- managing, facilitating and coordinating the department's international relations engagements and cooperation agreements
- providing strategic environmental advisory and implementation support services in line with the department's national and international environmental and sustainable development mandates
- implementing the Climate Change Act (2024).

## Subprogrammes

- *Climate Change and Air Quality Management* provides for the management and administration of activities in the programme.
- *Climate Change Mitigation and Specialist Monitoring Services* leads, coordinates, supports and informs responses for mitigating climate change, and monitors and evaluates national responses to climate change to ensure informed decision-making.
- *Climate Change Adaptation* leads and/or supports, informs, monitors and reports efficient and effective national, provincial and local adaptive responses to climate change.
- *Air Quality Management* ensures that reasonable legislative and other measures are developed, implemented and maintained to protect and defend the rights of all to air that is of sufficient atmospheric quality and is not harmful to health or wellbeing.
- *International Climate Change Relations and Reporting* prepares for, negotiates and informs the implementation of mini-lateral, bilateral and multilateral climate change agreements and reporting.
- *International Governance and Resource Mobilisation* oversees, facilitates and coordinates the department's international relations, engagements and cooperation agreements.
- *South African Weather Service* transfers funds to the South African Weather Service for the management of meteorological services.

## Programme 5: Biodiversity and Conservation

### Programme purpose

Ensure the regulation and management of biodiversity, heritage and conservation matters in a manner that facilitates sustainable economic growth and development.

## Objectives

- Increase South Africa's land area under formal protection to ensure the conservation of ecosystems and minimise threats to ecological sustainability by adding 315 000 hectares of land to the conservation estate over the medium term.
- Improve access to, and the fair and equitable sharing of, natural resources over the medium term by finalising at least 35 benefit-sharing agreements arising from the use of biological resources.

## Subprogrammes

- *Biodiversity and Conservation Management* provides for the management and administration of activities in the programme.
- *Biodiversity Management and Permitting* plans, manages, protects and conserves South Africa's biological resources and ecosystems for human wellbeing and sustainable development.
- *Protected Areas Systems Management* oversees the establishment, management and maintenance of ecologically representative national and cross-border systems of protected areas to advance the heritage of humankind, and contributes to the objectives of the Convention on Biological Diversity and the sustainable development goals.
- *Biodiversity Monitoring Specialist Services* provides support services for intergovernmental and legislative biodiversity and science policy; and monitors, evaluates, analyses, negotiates and advises on national and international biodiversity conservation statuses and trends. This subprogramme also catalyses national and international negotiations by providing the best available scientific and policy information.
- *Biodiversity Economy and Sustainable Use* transforms the biodiversity economy through inclusive economic growth and fair and equitable access to resources.
- *iSimangaliso Wetland Park Authority* transfers funds to the iSimangaliso Wetland Park Authority to cover its personnel and operational expenditure.
- *South African National Parks* transfers funds to South African National Parks to cover personnel and operational expenditure.
- *South African National Biodiversity Institute* transfers funds to the South African National Biodiversity Institute to cover its personnel and operational expenditure.

## Programme 6: Environmental Programmes

### Programme purpose

Implement the expanded public works programme and green economy projects in the environmental sector.

### Objectives

- Promote the empowerment of designated communities by creating 66 449 work opportunities and 44 402 full-time equivalent jobs in environmental projects by March 2028 through the implementation of initiatives related to the expanded public works programme.
- Restore and maintain the structure and function of vegetation to contribute to ecosystem services by clearing or treating 710 287 hectares of invasive alien plants over the medium term.
- Facilitate the transition to an economy that is low in carbon emissions and uses natural resources efficiently by aiding the implementation of green initiatives and projects over the medium term.

### Subprogrammes

- Environmental Programmes Management* provides strategic leadership and management services to the programme.
- Environmental Programmes Region 1* manages the planning and implementation of the environmental protection and infrastructure programmes of the expanded public works programme (War on Waste, Working for Forests, Working for Wetlands, People and Parks, and open space management) across South Africa using labour-intensive methods that target the unemployed, women, young people, people with disabilities, and small, medium and micro enterprises (SMMEs). Region 1 comprises Limpopo, Mpumalanga and North West.
- Environmental Programmes Region 2* provides management, operational oversight and supervision for the optimal functioning and development of the natural resources management programmes of the expanded public works programme (Working for Water, Working for the Coasts, Working for Land, Working for Energy: Biomass, Working on Fire, Working for Forests, value-added industries, and partnerships for eradicating invasive alien non-plant species and protecting wetlands). Region 2 comprises Eastern Cape, KwaZulu-Natal and Western Cape.
- Environmental Programmes Region 3* provides management, operational oversight and supervision for the optimal functioning and development of the natural resources management programmes of the expanded public works programme (Working for Water, Working for Land, Working for Energy: Biomass, Working on Fire, Working for Forests, value-added industries, and partnerships for eradicating invasive alien non-plant species and protecting wetlands). Region 3 comprises Free State, Gauteng and Northern Cape.

- *Sector Coordination and Quality Management* ensures effective knowledge and information management support services for branch activities and manages the coordination of socioeconomic interventions for the sector.

## Programme 7: Chemicals and waste management

### Programme purpose

Manage and ensure that chemicals and waste management policies and legislation are implemented and enforced in compliance with chemicals and waste management authorisations, directives and agreements.

### Objectives

- Oversee, monitor and evaluate the performance of the waste sector to ensure that less waste is generated and existing waste is better managed by:
  - developing and implementing national waste management policies and strategies over the medium term
  - increasing the number of waste tyres diverted from landfill sites from 45 000 tonnes in 2024/25 to 77 760 tonnes in 2027/28.
- Contribute to the management of chemicals in the environment and reduce their impact by developing and implementing legislative instruments and providing specialist advisory services on chemicals and pollution management as and when requested.

### Subprogrammes

- Chemicals and Waste Management* provides strategic leadership and overall management services to the programme.
- Hazardous Waste Management and Licensing* develops and implements processes and systems for the efficient and effective administration of the department's authorisation of waste management activities. This subprogramme also ensures that less hazardous waste streams are released into the environment and that contaminated land is rehabilitated.
- Integrated Waste Management* ensures the development of national policies, strategies, legislation, norms and standards; builds capacity in government, industry and civil society to respond to the challenges of pollution resulting from poor general waste management; and contributes to the provision of basic waste services to all citizens of South Africa.
- Chemicals and Waste Management Policy and Specialist Monitoring Services* ensures the development of national policies, strategies, legislation, norms and standards, and monitors and evaluates the impact of chemicals and waste management policies.
- Chemicals and Waste Economy Programme Coordination* aims to improve the public perception of, and ensures support and enhanced capacity for, the chemicals and waste economy to unlock the economic value of waste.

- *Chemicals Management* manages, facilitates, plans and coordinates the department and South Africa's engagement and cooperation in multilateral chemicals and waste agreements, and related international cooperation and national programmes.
- *Waste Bureau* promotes and facilitates the minimisation, reuse, recycling and recovery of waste by providing specialist advice and support for the development of integrated waste management plans for industry and municipalities.

## Programme 8: Forestry Management

### Programme purpose

Develop and facilitate the implementation of policies and targeted programmes to ensure the management of forests, the sustainable use and protection of land and water, and the management of agricultural risks and disasters.

### Objectives

- Ensure sustainable production, growth and transformation in the forestry sector over the medium term by:
  - handing 32 plantations over to communities
  - placing 21 500 hectares under silvicultural practice, which includes weeding, pruning, coppice reduction and thinning.
- Ensure that threats to environmental quality and human health are mitigated by planting 600 000 trees by March 2028.

## Subprogrammes

- *Forestry Management* provides strategic leadership and overall management services to the programme.
- *Forest Land Management and Post-settlement Support* ensures the sustainable management of forestry operations.
- *Forestry Development* ensures the effective development of policies for forestry regulation and oversight.
- *Forestry Policy Management* ensures the effective management of policies for forestry regulation and oversight.

## Programme 9: Fisheries Management

### Programme purpose:

Ensure the sustainable use of and orderly access to marine living resources through improved management and regulation.

### Objectives

- Lead and coordinate access to and the sustainable use of marine and freshwater living resources over the medium term by:
  - implementing a national freshwater (inland) wild capture fisheries implementation plan
  - updating the small-scale fishing rights register.
- Ensure the conservation, protection, rehabilitation and compliance of depleted and degraded natural resources over the medium term by:
  - conducting 870 verifications of rights holders and verification documents
  - conducting 16 500 compliance and enforcement measures in the 6 priority fishery sectors (abalone, rock lobster, line fish, hake, squid and pelagic fish).

### Subprogrammes

- *Fisheries Management* provides strategic leadership and management services to the programme.
- *Aquaculture Development and Freshwater Fisheries* ensures the sustainable use of, and equitable and orderly access to, marine living resources through improved management and regulation.
- *Monitoring, Control and Surveillance* ensures the protection and promotion of the sustainable use of marine living resources by intensifying enforcement and compliance with the relevant legislation and regulations.
- *Marine Resources Management* ensures the sustainable use of, and equitable and orderly access to, marine living resources through improved management and regulation.
- *Fisheries Research and Development* ensures the promotion of the sustainable development of fisheries resources and ecosystems by conducting and supporting appropriate research.
- *Marine Living Resources Fund* transfers funds to the Marine Living Resources Fund to cover its personnel and operational expenditure.

Revenue to the park from commercial sources per year	Tourism and business development	Outcome 7: Increased investment, trade and tourism	R6.2m	R56.3m	R56.8m	R25.1m	R27.5m	R30.3m	R33.3m
Number of paid visitors to the park per year	Tourism and business development		66 250	261 019	220 778	180 000	215 000	236 500	260 000

#### Entity overview

The iSimangaliso Wetland Park Authority was established in terms of the World Heritage Convention Act (1999). It is mandated to ensure that active and effective measures are taken to protect and conserve the park; promote the empowerment of historically disadvantaged communities living adjacent to the park; promote, manage, oversee, market and facilitate optimal tourism and related development in the park; and encourage sustained investment and job creation. The authority's ongoing aim is to support and maintain biodiversity conservation and uphold the park's status as a world heritage site.

Over the medium term, the authority will focus on preserving the park's world heritage site status by monitoring adherence to laws such as the World Heritage Properties Conservation Act (1983) to mitigate the effects of illegal development on and deforestation of the habitats of animals and plants, clearing invasive alien plants from a targeted 225 000 hectares of protected wetland areas, and ensuring that at least 9 000 cubic metres of earthworks in wetlands are restored.

Expenditure is set to increase at an average annual rate of 3.7 per cent, from R270.1 million in 2024/25 to R301.4 million in 2027/28, with goods and services accounting for an estimated 49.9 per cent (R438.4 million) of total expenditure. The entity expects to receive 86.1 per cent (R762.5 million) of its revenue over the next 3 years through transfers from the department and generate the remainder through visitor fees. Total revenue is expected to increase at an average annual rate of 5.3 per cent, from R264 million in 2024/25 to R308.5 million in 2027/28.

### Entity overview

The Marine Living Resources Fund was established in terms of the Marine Living Resources Act (1998). The fund's core focus is on managing the development and sustainable use of South Africa's marine resources and protecting the integrity and quality of the marine ecosystem. The fund also ensures fair and equitable access to South Africa's marine resources to benefit all citizens.

Over the medium term, the fund will continue to focus on promoting economic transformation and job creation while facilitating the efficient protection of South Africa's maritime resources. To this end, it plans to carry out 16 500 enforcement and compliance operations in priority fisheries sectors, create 4 916 jobs in coastal and rural communities through the Working for Fisheries programme, and expand the aquaculture sector's reach by expanding the number of locations and species farmed.

Expenditure is expected to increase at an average annual rate of 4 per cent, from R433.6 million in 2024/25 to R487.3 million in 2027/28, with goods and services accounting for an estimated 98.7 per cent (R1.4 billion) of this spending. The fund expects to receive 68.8 per cent (R996 million) of its revenue over the MTEF period through transfers from the department and generate the remainder through levies on fish and fish products; application, licence, permit and harbour fees; and fines and confiscations. Revenue is expected to increase at an average annual rate of 2.8 per cent, from R448.6 million in 2024/25 to R487.3 million in 2027/28.

Percentage of company's total unplanted area in South Africa per year	Komatiland Forests		2.3%	1.9%	1.8%	3.5%	3.5%	3.5%	3.5%
Percentage of company's total unplanted area in Mozambique per year	Ifloma – Mozambique forestry operations		4.7%	4.8%	5.5%	5.5%	5.5%	5.5%	5.5%

### Company overview

The South African Forestry Company was established in 1992 in terms of the Management of State Forests Act (1992). Its mandate is to develop and manage the state's commercial plantation forests, timber processing plants and other assets within the entity's group. Through its community projects and other services, the company contributes to rural economies mainly in KwaZulu-Natal, Limpopo and Mpumalanga.

Over the medium term, the company plans to focus on increasing its sale of high-value products, especially those from plantations, processing and allied businesses. It also plans to commercialise its pipeline of strategic projects through the construction of a combined heat and power plant using forest biomass to mitigate the effects of power cuts on operations, allow for the sale of electricity to the nearby municipality, and commission a finger jointer and planer machine to generate high-quality products.

Expenditure is expected to increase at an average annual rate of 12.1 per cent, from R1.4 billion in 2024/25 to R2 billion in 2027/28. Spending on goods and services constitutes 72.3 per cent (R4.1 billion) of the company's budget over the MTEF period, while compensation of employees accounts for 23.6 per cent (R1.2 billion). The company expects to generate 98.9 per cent (R6.3 billion) of its revenue over the MTEF period from the sale of sawlogs and lumber, and the operations of Komatiland Forests. Revenue is expected to increase at an average annual rate of 16.2 per cent, from R1.4 billion in 2024/25 to R2.2 billion in 2027/28, in line with the anticipated increase in demand for the company's products.

### Selected performance indicators

**Table 32.35 South African National Biodiversity Institute performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of maintenance, development and capital infrastructure projects per year	National botanical and zoological gardens	Outcome 4: Increased infrastructure investment and job creation	45	50	50	50	50	50	50
Number of indigenous species added to the living collections of the Millennium Seed Bank partnership per year	National botanical and zoological gardens	Outcome 8: Dynamic science, technology and innovation for growth	311	384	267	100	150	150	150

**Table 32.35 South African National Biodiversity Institute performance indicators by programme/objective/activity and related outcome (continued)**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of risk analyses developed for alien and invasive species per year	Biodiversity science and policy advice	Outcome 6: Supportive and sustainable economic policy environment	36	45	45	45	45	45	45
Number of black biodiversity professionals supported through structured internships and postgraduate studentships per year	Human capital and development transformation	Outcome 1: Increased employment and work opportunities	197	228	175	150	155	160	160

### Entity overview

The South African National Biodiversity Institute was established in terms of the National Environmental Management: Biodiversity Act (2004). It is mandated to monitor and report on the status of South Africa's biodiversity; all listed threatened or protected species, ecosystems and invasive species; and the impact of any genetically modified organisms released into the environment.

Over the medium term, the institute aims to improve the conservation and sustainable use of South Africa's rich and unique biodiversity by providing advice on biodiversity science and policy; maintaining or refurbishing a targeted 150 infrastructure projects within national botanical gardens; managing conservation collections; facilitating access to biodiversity data; developing 135 risk analyses for alien and invasive species to inform action, policy and decision-making; and building human capacity in the biodiversity sector.

Expenditure is expected to increase at an average annual rate of 2.7 per cent, from R1.1 billion in 2024/25 to R1.2 billion in 2027/28. Compensation of employees accounts for an estimated 59.9 per cent (R2 billion) of the institute's budget over the next 3 years. The institute expects to derive 74.6 per cent (R2.6 billion) of its revenue over the MTEF period through transfers from the department and the remainder through entry fees charged at botanical and zoological gardens. Revenue is set to increase in line with spending.

			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of visitors to national parks per year	Administration	Outcome 16: Improved service delivery at local government	3 482 514	3 178 584	4 638 229	5 148 434	5 714 762	5 714 762	5 714 762
Gross operating tourism revenue (value of revenue raised from commercial activities) per year	Administration		R1.2bn	R1.2bn	R2.7bn	R1.7bn	R2bn	R2bn	R2bn
Number of free access entrants to parks per year	Administration	Outcome 1: Increased employment and work opportunities	28 018	20 000	50 000	100 000	100 000	100 000	100 000
Number of hectares of land brought into the national parks system per year	Administration		9 524	4 000	2 474	10 000	12 000	12 000	12 000

### Entity overview

South African National Parks was established in terms of the National Environmental Management: Protected Areas Act (2003). Its mandate is to conserve, protect, control and manage national parks and other defined protected areas and their biodiversity. As the presence of an efficiently managed system of national parks is a key component of the national tourism economy, the entity plays a significant role in the economy and acts as a catalyst for local economic development. Through the implementation of the expanded public works programme, the entity provides significant support to SMMEs, particularly in rural areas.

Over the medium term, the entity will focus on managing more than 4 million hectares of terrestrial and 369 657 hectares of marine protected biodiversity through a system of 21 national parks and 10 marine protected areas. While doing this, it also aims to fight poaching, particularly rhino poaching in the Kruger National Park and abalone poaching in Western Cape; and develop and upgrade infrastructure in national parks.

Expenditure is expected to increase at an average annual rate of 5.3 per cent, from R3.8 billion in 2024/25 to R4.4 billion in 2027/28, with compensation of employees accounting for an estimated 48 per cent (R6.3 billion) of this spending. The entity expects to generate 84.8 per cent (R11 billion) of its revenue over the medium term through tourism activities in the national parks and the remainder through transfers from the department. Revenue is set to increase in line with expenditure.

## South African Weather Service

### Selected performance indicators

**Table 32.43 South African Weather Service performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets			
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28	
Number of new or enhanced climate solutions for climate-sensitive sectors signed off per year	Administration		1	1	1	1	1	1	1	1
Number of new or enhanced customer-focused products and services produced per year	Administration	Outcome 18: A capable and professional public service	4	4	4	4	3	3	3	3
Number of research studies conducted to generate new scientific insights in atmospheric and related sciences per year	Research and innovation		37	53	36	30	30	35	40	

### Entity overview

The South African Weather Service was established in terms of the South African Weather Service Act (2001). Its core mandate is to provide 2 distinct services: the public good service, funded by government for fulfilling government's international obligations under the conventions of the World Meteorological Organisation and the International Civil Aviation Organisation; and commercial services, where the user-pay principle applies. Key activities include maintaining, extending and improving the quality of meteorological services; providing risk management information; and collecting meteorological data over South Africa and the surrounding southern oceans.

Over the medium term, the entity will focus on providing timely and accurate impact-based early warnings or alerts, including climate-response initiatives for inclement weather conditions; providing innovative meteorological and related products and services through the development and implementation of weather-smart products and services; and alerts and advisory services to safeguard lives and property against severe weather. These interventions include the regulation of tariffs for the aviation industry, the provision of lightning data and the sale of air quality-related products to various municipalities.

Expenditure is expected to decrease at an average annual rate of 1.7 per cent, from R694.9 million in 2024/25 to R659.9 million in 2027/28. To mitigate the effects of this decrease on the entity's planned activities for the period ahead, it will seek to contain costs on certain non-essential goods and services items. The weather service expects to derive 66.1 per cent (R1.2 billion) of its revenue over the medium term through transfers from the department and the remainder through commercial activities and services. Revenue is also expected to decrease at an average annual rate of 1.1 per cent, from R681.8 million in 2024/25 to R659.9 million in 2027/28, in line with a decrease in transfers from the department.

### Programmes/Objectives/Activities

### Vote purpose

Facilitate the creation of sustainable human settlements and improvement to household quality of life.

### Mandate

In terms of section 26 of the Constitution and section 3 of the Housing Act (1997), the Department of Human Settlements is mandated to establish and facilitate a sustainable national housing development process in collaboration with provinces and municipalities. In fulfilling its mandate, the department determines national policy, norms and standards for the development of housing and human settlements; prescribes national housing delivery goals; oversees provincial and municipal performance outcomes against national targets; and funds, capacitates and supports provinces and municipalities in the implementation of human settlements projects.

### Selected performance indicators

**Table 33.1 Performance indicators by programme and related outcome**

Indicator	Programme	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28

## Expenditure overview

Over the medium term, the department will focus on building integrated communities, increasing access to adequate housing and improving security of tenure, upgrading informal settlements, and providing temporary shelter for people affected by disasters such as fires and floods. Funding for these measures is provided mainly through the key grants: the *human settlements development grant*, the *urban settlements development grant*, the *informal settlements upgrading partnership grant* for municipalities and the *informal settlements upgrading partnership grant* for provinces.

An estimated 90 per cent of the department's budget of R101.2 billion over the MTEF period is allocated as transfers and subsidies to provinces and municipalities through these grants. Total expenditure is set to increase at an average annual rate of 0.2 per cent, from R33.7 billion in 2024/25 to R33.9 billion in 2027/2028. This marginal rate of increase is mainly driven by a decrease in transfers to the *informal settlements upgrading partnership grant* for provinces in the 2024 Budget. The department has adjusted some of its performance targets downwards in line with the projected low medium-term growth, while also considering the rising costs of delivering human settlements projects. An additional R15.9 million is allocated to the department over the medium term to make provision for the 2025 public sector wage agreement.

In addition to its core focus areas over the next 3 years, the department plans to operationalise the United Nations Habitat country office and programme to strengthen institutional capacity to deliver 5 programme mandates: adequate housing to transform informal settlements; integrated planning and climate resilience; safety and social inclusion; and urban finance. This intervention seeks to strengthen identified planning, intergovernmental coordination and delivery weaknesses in the sector across the 3 spheres of government. To fund the country office and programme, R60 million is allocated over the MTEF period in the *Affordable Housing* programme.

### Developing integrated human settlements

In collaboration with provinces and municipalities, the department expects to deliver 85 994 fully subsidised houses over the period ahead. Provincial allocations to subsidise low-income housing through the *human settlements development grant* amount to R43.5 billion over the medium term, while allocations to fund associated bulk infrastructure projects in metropolitan municipalities through the *urban settlements development grant* over the same period amount to R28.4 billion. These initiatives are budgeted for in the *Integrated Human Settlements Planning and Development* programme, in which spending is expected to increase at an average annual rate of 2.9 per cent, from R22.8 billion in 2024/25 to R24.8 billion in 2027/28.

### Upgrading informal settlements

The *informal settlements upgrading partnership grants* (with separate allocations for provinces and municipalities) were established to provide bulk infrastructure services and improve governance in response to rapid urban migration and an increase in the number of informal settlements across South Africa. Over the medium term, funds from grants will enable provinces and municipalities to provide a targeted 184 informal settlements with water, sewage disposal, stormwater disposal, solid waste removal, electricity and roads; and deliver a targeted 99 467 stands with supporting municipal bulk infrastructure services. Allocations to the *informal settlements upgrading partnership grant* for provinces amount to R4.7 billion, decreasing at an average annual rate of 33.1 per cent, from R3.3 billion in 2024/25 to R971.9 million in 2027/28 because of Cabinet-approved budget reductions announced in the 2024 Budget. Allocations to the municipal grant amount to R14.8 billion and increase at an average annual rate of 4.5 per cent, from R4.5 billion in 2024/25 to R5.2 billion in 2027/28. The grants are funded through the *Informal Settlements* programme, which is allocated an estimated R21.5 billion over the MTEF period.

### Increasing access to housing and improving security of tenure

Affordable finance is a critical lever in enabling access to housing for those who are ineligible for fully subsidised housing but do not earn enough to qualify for home financing in the formal mortgage market. To help this

growing segment, the first home finance programme, formerly the finance-linked individual subsidy programme, aims to provide 32 567 subsidies over the period ahead to help first-time home buyers afford alternative housing finance options. To this end, R1.3 billion is allocated over the medium term in the *Affordable Housing* programme. Spending in the programme is expected to increase at an average annual rate of 4.3 per cent, from R537.4 million in 2024/25 to R610.4 million in 2027/28.

To provide rental and social housing options for low-income and middle-income households, the department plans to provide affordable financing for implementing agents to deliver 10 614 affordable rental units and 1 717 community residential units. This will be funded through the *Rental and Social Housing* programme, allocations to which increase at an average annual rate of 4.6 per cent, from R923.9 million in 2024/25 to R1.1 billion in 2027/28. The department will focus on accelerating the delivery of affordable, well-located rental and social housing over the MTEF period. It aims to do so by providing capital subsidies amounting to R2.5 billion over the medium term to accredited social housing institutions through the Social Housing Regulatory Authority's consolidated capital grant. These funds are transferred to the authority through the *Rental and Social Housing* programme. Ultimately, this is expected to increase the supply of rental units and lower the cost of occupation for tenants.

### Providing emergency housing

Funds from the *emergency housing grant* are used during disasters to provide new building materials for destroyed homes, relocating and providing temporary emergency accommodation and repairing partially damaged formal houses. The grant was reclassified in 2023/24 from conditional grants to provinces and municipalities to the department's emergency housing unit, which administers the allocation in the *Informal Settlements* programme. The reclassification is intended to improve spending by enabling the department to implement housing emergency relief interventions directly and immediately in collaboration with provinces and municipalities. This will be made possible by allocations amounting to R1.6 billion in the *Informal Settlements* programme.

## Programme 2: Integrated Human Settlements Planning and Development

### Programme purpose

Manage the development of policy, planning and research in the creation of sustainable and integrated human settlements, oversee the delivery of the integrated residential development programme, and coordinate intergovernmental partnerships with stakeholders.

### Objectives

- Accelerate the development and delivery of spatially integrated housing and human settlements by:
  - transferring and monitoring the disbursement of the *human settlements development grant* to provinces and the *urban settlements development grant* to metropolitan municipalities in terms of the annual Division of Revenue Act
  - undertaking research and developing housing and human settlements policies and programmes as and when required.
- Promote the coordination of planning and strengthen intergovernmental cooperation across and within the different spheres of government on an ongoing basis by:
  - providing support to provinces and municipalities in the development of integrated implementation plans
  - facilitating intergovernmental forums and stakeholder partnerships.

## Subprogrammes

- *Management for Integrated Human Settlements Planning and Development* provides strategic leadership to the programme.
- *Macro Sector Planning* manages the development and evaluation of macro strategy and planning frameworks for human settlements.
- *Macro Policy and Research* undertakes research and develops policy that promotes spatial transformation and integration.
- *Monitoring and Evaluation* monitors and reports on housing and human settlements programmes and projects in terms of the national housing code.
- *Public Entity Oversight* provides regulatory, strategic and governance oversight of various public entities. This subprogramme also oversees compliance with and performance against legislated mandates and responsibilities.
- *Grant Management* manages and transfers conditional grants to provinces and municipalities for the implementation of housing and human settlements programmes.
- *Capacity Building and Sector Support* improves intergovernmental coordination and provides sector-specific technical capacity to provinces and municipalities.

## Programme 3: Informal Settlements

### Programme purpose

Provide policy, planning and capacity support for the upgrading of informal settlements and oversee the implementation of the informal settlements upgrading programme.

### Objectives

- Accelerate the provision of security of tenure, basic services and related infrastructure by:
  - managing the transfer of the *informal settlements upgrading partnership grant* to municipalities and provinces in terms of the annual Division of Revenue Act
  - undertaking evidence-based research and developing responsive policies on an ongoing basis
  - providing capacity support to provinces and municipalities through the national upgrading support programme on an ongoing basis.
- Strengthen cooperation and collaboration among the 3 spheres of government, between government and civil society organisations, and between government and communities by facilitating intergovernmental forums and stakeholder partnerships on an ongoing basis.

## Subprogrammes

- *Management for Informal Settlements* provides strategic leadership to the programme.
- *Grant Management* provides grant funding for the upgrading of informal settlements and monitors the expenditure and performance of these grants.
- *Capacity Building and Sector Support* improves coordination and provides sector-specific technical capacity to provinces and municipalities for the upgrading of informal settlements.

## Programme 4: Rental and Social Housing

### Programme purpose

Promote the provision of affordable rental housing, monitor the performance of the Social Housing Regulatory Authority and develop capabilities in the rental housing sector through intergovernmental collaboration and evidence-based research.

### Objectives

- Promote the delivery of affordable rental housing by conducting research and developing policies and programmes as and when required.
- Accelerate the provision of affordable rental housing by:
  - providing capital and operational funding to the Social Housing Regulatory Authority to support the social housing sector on an ongoing basis
  - monitoring and evaluating the financial and non-financial performance of affordable rental housing programmes and projects on a monthly and quarterly basis.
- Strengthen cooperation and collaboration by facilitating intergovernmental forums and stakeholder partnerships on an ongoing basis.

### Subprogrammes

- *Management for Rental and Social Housing* provides strategic leadership to the programme.
- *Public Entity Oversight* provides regulatory, strategic and governance oversight of the Social Housing Regulatory Authority and oversees compliance with and performance against the authority's mandate and related legislation.
- *Capacity Building and Sector Support* manages capacity-development programmes, improves coordination and provides technical support in the affordable rental housing sector.

## Programme 5: Affordable Housing

### Programme purpose

Facilitate the provision of affordable housing finance, monitor market trends, develop research and policies that respond to demand and oversee housing finance entities reporting to the minister.

### Objectives

- Accelerate the provision of finance for affordable housing by:
  - providing capital and operational funding to the National Housing Finance Corporation for the administration of the finance-linked individual subsidy programme on an ongoing basis
  - researching and developing policies and programmes that promote the provision of finance for affordable housing as and when required
  - monitoring and evaluating the financial and non-financial performance of affordable housing programmes and projects on a monthly and quarterly basis.
- Strengthen cooperation and collaboration by facilitating intergovernmental forums and stakeholder partnerships on an ongoing basis.

### Subprogrammes

- *Management for Affordable Housing* provides strategic leadership to the programme.
- *Public Entity Oversight* provides regulatory, strategic and governance oversight to the National Housing Finance Corporation, oversees compliance with and performance against the corporation's mandate and related legislation, and provides operational and capital transfers to the corporation.
- *Capacity Building and Sector Support* improves coordination in the sector and provides sector-specific technical support.

Number of historically disadvantaged individuals trained as executive managing agents per year	Education and training		23	22	40	50	50	50	50

1. No historical data available.

#### Entity overview

The Community Schemes Ombud Service was established in terms of the Community Schemes Ombud Service Act (2011). It is mandated to provide dispute resolution services for community schemes, monitor and control the quality of governance documentation for all sectional title schemes, and take custody of, preserve and provide public access to governance documentation.

Over the medium term, the ombud will seek to ensure that community schemes become a viable tenure option by improving their regulatory compliance. It plans to do this by focusing on strengthening its regulation function by registering community schemes; ensuring that high percentages of community schemes seeking services from it are compliant and quality assured; and providing dispute resolution and adjudication services. As part of the ombud's strategy to increase revenue, it plans to implement a revenue management strategy focused on data cleansing and benchmarking with the aim of reviewing its levy collection model. To contribute to reducing barriers to entry in the property market, the ombud plans to train 150 historically disadvantaged individuals to become scheme governance managing agents.

Expenditure is expected to increase at an average annual rate of 0.6 per cent, from R410.5 million in 2024/25 to R417.7 million in 2027/28. This low increase is due to the comparatively high average annual increase of 9.9 per cent in the regulation programme being offset by the decreases in spending of 3.7 per cent in the administration programme and 1.8 per cent in the education and training programme. The decrease in the education and training programme is due the ombud's training programmes with the Rental Housing Tribunal shifting from in-person to online, reducing the cost of training. The decrease in the administration programme over the MTEF period is due to the ombud having completed the payment of penalties on outstanding debt owed to the South African Revenue Services in 2024/25. The ombud expects to generate 95.8 per cent (R1.2 billion) of its revenue through the registration fees and levies it charges community schemes over the MTEF period. Revenue is set to increase at an average annual rate of 6.7 per cent, from R344.3 million in 2024/25 to R417.7 million in 2027/28.

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of informal settlements provided with support for upgrading to phase 3 per year	Development management operation	Outcome 10: Reduced poverty and improved livelihoods	204	200	237	46	47	48	46
Number of hectares of well-located land released for human settlements development per year	Built environment and operations		3 243	1 659	1 617	1 000	1 000	1 000	1 000

### Entity overview

The Housing Development Agency was established in terms of the Housing Development Agency Act (2008). It is mandated to identify, hold, develop and release land for the development of integrated human settlements. The agency provides provinces and municipalities with project management, and technical and land geospatial services.

Over the medium term, the agency plans to develop 3 000 hectares of well-located land for human settlements projects and provide planning, management and technical support for the upgrading of 141 informal settlements to ensure secure tenure and access to basic services. Spending on these projects is within the built environment and operations and the development management operations programmes, which together represent 67.7 per cent (R1.3 billion) of the agency's total estimated expenditure over the MTEF period.

As the agency requires professional and highly skilled staff, compensation of employees accounts for an estimated 47.4 per cent (R871.7 million) of total spending over the period ahead. To manage increased spending on compensation of employees, the agency plans to keep its number of personnel at 266 over the MTEF period.

Total expenditure is expected to increase at an average annual rate of 9.9 per cent, from R504 million in 2024/25 to R668.4 million in 2027/28, due to projected increases in the procurement of land parcels. The agency expects to derive 45.2 per cent (R835 million) of its revenue over the MTEF period through transfers from the department. The remainder is expected to be generated by programme management fees that provinces pay from their respective *human settlements development grant* allocations. Revenue is expected to increase in line with expenditure.

### Entity overview

The National Home Builders Registration Council is a regulatory body in the home building industry established in terms of the Housing Consumers Protection Measures Act (1998). It is mandated to protect the interests of housing consumers by providing warranty protection against structural defects in newly built homes. The council is also responsible for the establishment and enforcement of technical building standards in the home building industry.

Over the medium term, the council will focus on strengthening its regulatory function by registering a targeted 11 595 new home builders and renewing the registration status of 44 504 home builders. To enforce compliance with technical building standards, the council plans to conduct 77 812 inspections on registered homes in the subsidy sector and 85 117 inspections on registered homes in the non-subsidy sector.

Due to the labour-intensive nature of the council's work, compensation of employees accounts for an estimated 63.8 per cent (R1.9 billion) of total expenditure over the MTEF period. This spending is expected to increase at an average annual rate of 1 per cent, from R617.5 million in 2024/25 to R636.6 million in 2027/28. To contain expenditure on compensation of employees, the council will maintain its wage bill at R636 million in each year over the medium term, either by reducing the number of employees or not filling vacant posts. Overall, expenditure is expected to increase at an average annual rate of 1.7 per cent, from R960.3 million in 2024/25 to R1 billion in 2027/28.

The council generates revenue by charging fees for home enrolment, registrations and renewals, and for technical services, as well as through interest and dividends earned on the warranty fund. Revenue is expected to increase at an average annual rate of 2.8 per cent, from R1.5 billion in 2024/25 to R1.6 billion in 2027/28.

## Entity overview

The National Housing Finance Corporation was established as a development finance institution in 1996 and is listed as a schedule 3A public entity in terms of the Public Finance Management Act (1999). Its primary mandate is to provide access to affordable housing finance for low- to middle-income households by leveraging private sector funding to finance housing developments and create affordable housing stock. The corporation also administers the former finance-linked individual subsidy programme (first home finance programme) with provincial departments of human settlements.

Over the MTEF period, the corporation plans to extend partnerships with financial institutions and non-traditional lenders to create differentiated loan products to expand the reach of affordable housing finance to different segments within the affordable rental market. As the corporation leverages more funds from the private sector, it expects to increase its loan book from R4.2 billion in 2024/25 to R10 billion in 2027/28.

The corporation will continue to focus on increasing access to affordable housing finance to intermediaries over the medium term by lending to these emerging developers. These include social housing institutions, retail financial intermediaries that provide microloans for home improvements, and developers and emerging contractors who invest in affordable rental housing stock. This spending accounts for an estimated 10.2 per cent (R483.3 million) of the corporation's budget over the medium term.

To further increase access to affordable housing finance, the department has revised the first home finance policy to extend to non-mortgage housing products such as unsecured loans through retail intermediaries, loans from community-based schemes, rent-to-buy options, and the augmentation of personal savings to purchase non-bonded homes. These financing instruments are funded through the corporation's affordable housing finance programme, which accounts for an estimated 21.8 per cent (R1 billion) of total expenditure over the MTEF period.

The corporation expects to disburse 33 846 first home finance subsidies to first-time home buyers over the MTEF period. The first home finance programme is funded through the grant facilitation: finance-linked individual subsidy programme, which accounts for an estimated 34.1 per cent (R1.4 billion) of expenditure over the MTEF period. Total expenditure is expected to increase at an average annual rate of 16.3 per cent, from R1 billion in 2024/25 to R1.6 billion in 2027/28 due to additional debt funding that will carry an increase in debt servicing costs.

The corporation generates 50.7 per cent (R2.8 billion) of its revenue over the MTEF period through interest on loans, income from its subsidiaries, rental properties and the sale of goods and services. Transfers from the department account for 28.2 per cent (R1.4 billion) of projected revenue over the period ahead to primarily fund the finance-linked individual subsidy programme (first home finance programme). Total revenue is expected to increase at an average annual rate of 17.6 per cent, from R1.2 million in 2024/25 to R2 billion in 2027/28. This high increase is the result of an expected increase in interest earned from debt owed to the corporation by delivery agents of affordable rental housing. The rental stream accounts for an estimated 29.4 per cent (R1.6 billion) of the corporation's revenue over the medium term. The corporation expects to generate 15 per cent (R715.4 million) of its revenue over the period ahead through subsidiaries in which it is a stakeholder.

## Property Practitioners Fidelity Fund

### Entity overview

The Property Practitioners Fidelity Fund is managed by the Property Practitioners Regulatory Authority. The fund was established to protect the interest of the public from negligence on the part of property practitioners in dealing with real estate transactions.

Expenditure is expected to increase at an average annual rate of 12.6 per cent, from R100.7 million in 2024/25 to R143.6 million in 2027/28, due to the introduction of additional categories of real estate practitioners in the Property Practitioners Act (2019), resulting in additional fees being charged and contributions from new property practitioners. The fund derives its revenue through administrative fees, interest on trust accounts by property practitioners and recovered claims. Revenue is expected to increase at an average annual rate of 13 per cent, from R100.7 million in 2024/25 to R145.5 million in 2027/28.

Number of property practitioners compliant with the continuous professional development programme per year	Education and training		16 027	14 046	6 367	12 000	15 000	20 000	22 000

## Entity overview

The Property Practitioners Regulatory Authority was established in terms of the Property Practitioners Act (2019). Its mandate is to regulate the conduct and activities of property practitioners when dealing with the marketing, promotion, management, sale, letting, financing and purchase of immovable property. The authority manages the Property Practitioners Fidelity Fund and provides education and training programmes to develop candidate and property practitioners.

The authority is responsible for ensuring that property practitioners are registered to operate legally. As the authority is now responsible for 10 new categories of property practitioners recognised by the Property Practitioners Act (2019), it plans to register 45 250 property practitioners on its database over the MTEF period. These new registrations will require compliance and enforcement measures. As such, to safeguard the interests of consumers and enhance compliance standards, over the medium term, the authority plans to expand its education and training programmes to confer 6 750 professional designations to candidate property practitioners, and 57 000 continuing professional development qualifications to property practitioners.

Compensation of employees accounts for an estimated 65.4 per cent (R403.2 million) of projected expenditure over the medium term. This spending is set to increase at an average annual rate of 2.7 per cent, from R130 million in 2024/25 to R141 million in 2027/28. Total expenditure is expected to increase at an average annual rate of 1.1 per cent, from R205.9 million in 2024/25 to R212.9 million in 2027/28, in line with the downward revenue adjustments projected over the medium term.

The authority expects to generate R613.1 million in revenue over the MTEF period, mainly through charging management fees for administering the Property Practitioners Fidelity Fund and contributions from property practitioners. Total revenue is expected to decrease at an average annual rate of 1.7 per cent, from R226 million in 2024/25 to R214.4 million in 2027/28, mainly due to an expected decrease in income from examination fees as less examinations are written, and income from fines, penalties and interest.

### Entity overview

The Social Housing Regulatory Authority's legislative mandate, as set out in the Social Housing Act (2008), is to invest and build capacity in and regulate the social housing sector. To achieve this, the authority administers a sustainable flow of capital subsidies to accredited social housing institutions to build affordable rental housing units for low- and middle-income households, provides capacity-building and support initiatives, and regulates all social housing institutions.

Over the MTEF period, the authority will focus on improving access to affordable housing by increasing the supply of new rental housing stock. To this end, it aims to deliver 10 614 social housing units over the period ahead through the authority's consolidated capital grant, which provides subsidies to reduce the capital cost of constructing rental units and the rental costs for tenants. This is funded through the authority's project development and funding programme, which accounts for an estimated 88.3 per cent (R2.5 billion) of total expenditure over the MTEF period. The authority aims to provide R2.5 billion in capital subsidies over the medium term through the consolidated capital grant and disburse R81 million through the authority's institutional investment grant to build capacity in the social housing sector by helping social housing institutions to become fully operational.

Total expenditure is expected to increase at an average annual rate of 4.5 per cent, from R864.1 million in 2024/25 to R986.1 million in 2027/28. The authority derives all its revenue through transfers from the department. Revenue is expected to increase in line with expenditure.

## Vote purpose

Regulate the minerals, mining and petroleum sectors for transformation, growth and development to ensure that all South Africans derive sustainable benefits from the country's mineral wealth.

## Mandate

The Department of Mineral and Petroleum Resources is mandated to ensure the transparent and efficient regulation of South Africa's mineral resources and minerals industry. Several acts regulate the mining and minerals sectors. These include the:

- Petroleum Products Act (1977), which regulates the petroleum industry at the manufacturing, wholesale and retail levels
- Mine Health and Safety Act (1996), which governs mine health and safety
- 1998 White Paper on Minerals and Mining Policy for South Africa, which ensures the transparent and efficient regulation of the development of South Africa's mineral resources and mineral industry to meet national objectives and bring optimum benefit to the nation
- Mineral and Petroleum Resources Development Act (2002), which provides the regulatory framework for equitable access to and the sustainable development of mineral resources and related matters.

## Selected performance indicators

Number of fuel samples tested per year	Minerals and Petroleum Regulation	Outcome 20: Safer communities and increased business confidence	1 197	1 083	1 080	1 080	1 080	1 080	1 080

## Expenditure overview

Over the medium term, the department will focus on ensuring transformation in and the regulation of the mining and petroleum sectors; enforcing, monitoring and evaluating compliance with mine health and safety requirements; rehabilitating derelict and ownerless mines; promoting investment in the mining sector; and improving efficiency and transparency in the granting of mining rights, permits and licences through the implementation of a cadastre mining licensing system. This is intended to oversee a mining sector that prioritises the welfare of its human resources and the environment, and ensures that South Africa has an adequate supply of liquid fuels to maintain economic activity and prevent disruptions.

Of the department's total allocation of R8.7 billion over the medium term, an estimated 40.8 per cent (R3.6 billion) is for transfers to its entities, which carry out a significant portion of its functions. Due to the labour-intensive nature of the department's work, which requires inspections to be conducted to ensure that mining companies comply with legislative requirements, expenditure on compensation of employees accounts for an estimated 32.1 per cent (R2.8 billion) of the total budget over the MTEF period. Spending on compensation of employees is expected to increase at an average annual rate of 3.1 per cent, from R903.4 million in 2024/25 to R990.8 million in 2027/28

### ***Ensuring transformation in and the regulation of mining and petroleum sectors***

Accelerating transformation in the mining sector remains a key priority. To facilitate this, over the medium term, the department will monitor and enforce compliance with the Mineral and Petroleum Resources Development Act (2002) by issuing a targeted 600 mining licences to historically disadvantaged South Africans and conducting a targeted 636 social and labour plan inspections and 1 500 mine economic inspections. Social and labour plans commit companies to investing in the upgrading of human settlements and skills development for mineworkers and surrounding communities, in line with regulation 46 of the act. To enforce compliance with regulatory standards in the petroleum sector, the department plans to inspect 1 500 petroleum retail sites per year over the period ahead. Funding for these activities is within the *Minerals and Petroleum Regulation* programme's allocation of R2.5 billion over the medium term.

### ***Ensuring mine health and safety***

The department plans to continue enforcing compliance with occupational health and safety legislation and regulations over the medium term by conducting investigations, inspections and audits on mines to ensure that

they comply with minimum health and safety requirements. Annually, this is expected to result in a 20 per cent reduction in occupational fatalities, a 20 per cent reduction in occupational injuries and a 10 per cent reduction in occupational diseases. As this work is labour intensive, spending on compensation of employees accounts for an estimated 82.3 per cent (R618.2 million) of the budget in the *Mine Health and Safety Inspectorate* programme over the MTEF period. An amount of R120.1 million over the medium term is allocated to goods and services for inspections, audits, fatal accident inquiries and investigations at mines, and travel and subsistence costs for inspectors.

### ***Rehabilitating derelict mines and protecting the environment***

Through its public entity Mintek, the department aims to protect the environment and rehabilitate 9 dangerous derelict and ownerless mine sites, including asbestos sites, at an estimated cost of R422.8 million over the MTEF period. The department also expects to conduct 4 122 environmental verification management inspections over the same period to ensure compliance with the National Environmental Management Act (1998). Research on mine rehabilitation will be conducted by the Council for Geoscience, which is allocated R70.5 million for this purpose over the medium term. These activities, including transfers to Mintek and the council, are funded through the *Minerals Compliance and Enforcement Management* subprogramme in the *Mineral and Petroleum Regulation* programme, which is allocated R732 million over the medium term.

### ***Promoting investment in the mining sector***

Minerals exploration is crucial for the sustainability and future growth of the mining industry. Recognising this, a dedicated exploration fund has been set up to uncover untapped mineral resources such as rare earth elements, lithium and copper within South Africa's borders. This will be done in partnership with the Council for Geoscience, which will provide technical services; and the Industrial Development Corporation, which will administer the fund and has committed R200 million to co-fund and operationalise it. The department has allocated R120 million for this purpose in 2025/26 in the *Mining and Minerals Policy Development* programme to establish the fund.

To complement this work, Petroleum Agency South Africa will evaluate shale gas resources and investigate geo-environmental baselines in the south-central Karoo Basin at a projected cost of R144.4 million over the medium term, and will receive R286.5 million in operational funding to promote the exploration and optimal development of onshore and offshore oil and gas resources over the same period. These activities are funded through the *Minerals and Petroleum Regulation* programme.

### ***Improving efficiency and transparency in the granting of mining rights***

The department has appointed a service provider for the design, implementation, maintenance and support of a cadastre mining licensing system, which manages and records information about mining licences, permits and mineral rights. This system will replace the current South African mineral resources administration database and is expected to become operational in 2025/26. Ultimately, it will increase transparency and efficiency in the application and processing of mining rights, permits and licences; improve access to information; and shorten processing times, thereby increasing investment. Spending on these activities is through the *Corporate Services* subprogramme, which is allocated R902.3 million over the medium term in the *Administration* programme.

## Programme 2: Minerals and Petroleum Regulation

### Programme purpose

Regulate the mining, minerals and petroleum sectors to promote economic growth, employment, transformation and sustainable development.

### Objectives

- Improve the participation of historically disadvantaged South Africans in the mining sector and contribute to its transformation by:
  - issuing mining rights and permits to 600 historically disadvantaged South Africans over the medium term
  - monitoring and enforcing compliance with procurement requirements that relate to historically disadvantaged South Africans, as prescribed by the mining charter, on an ongoing basis
  - monitoring and enforcing compliance with the statutory obligations of the Mineral and Petroleum Resources Development Act (2002) and the mining charter by conducting 636 social and labour plan verification inspections, 1 500 mine economic verification audits and 4 122 environmental verification inspections over the medium term.
- Ensure the development and transformation of the liquid fuels industry and the security of supply of petroleum and petroleum products by monitoring and enforcing technical and economic compliance with legislation, specifications, standards and licence conditions annually.
- Facilitate the orderly operation of the petroleum sector through an analysis of fuel supply and the efficient adjudication of licences for manufacturing, wholesaling and retailing activities on an ongoing basis.
- Strengthen the regulatory framework in the liquid fuels petroleum industry by implementing an accounting system to introduce a transparent fuel pricing mechanism that will provide appropriate returns to investors in the liquid fuels sector across the value chain on an ongoing basis.

### Subprogrammes

- *Minerals and Petroleum Management* provides overall management to the programme.
- *Mineral Regulation and Administration* administers and evaluates prospecting and mining rights and licensing. This subprogramme also makes transfers to the South African Diamond and Precious Metals Regulator, which implements and enforces the provisions of the Precious Metals Act (2005); and to Petroleum Agency South Africa, which regulates onshore and offshore oil and gas exploration and production activities.
- *Petroleum Licensing and Fuel Supply* manages petroleum licensing, regulates import and export permits for petroleum products, monitors fuel stock levels, and ensures the security of fuel supply.
- *Minerals Compliance and Enforcement Management* ensures that mining activities comply with the prescripts of the Mineral and Petroleum Resources Development Act (2002) and the National Environmental Management Act (1998).
- *Petroleum Compliance Monitoring, Enforcement and Fuel Pricing* ensures technical, economic and legal compliance by the petroleum industry with the prescripts of the Petroleum Products Act (1977) and its regulations through monitoring and enforcement.

## Programme 3: Mine Health and Safety Inspectorate

### Programme purpose

Ensure the health and safety of employees in the mining sector.

### Objectives

- Promote health and safety by:
  - annually reducing occupational fatalities by 20 per cent, occupational injuries by 20 per cent and occupational diseases by 10 per cent
  - implementing the occupational and health and safety improvement strategy and enforcing guidelines on an ongoing basis
  - conducting investigations, inspections and audits on an ongoing basis.
- Contribute to skills development in the mining sector by implementing, monitoring and evaluating the government certificate of competency model on an ongoing basis.
- Improve health care in the mining sector on an ongoing basis by ensuring:
  - 80 per cent adherence to prescribed timeframes for resolving medical appeals
  - 100 per cent adherence to timelines for appeals to the chief inspector of mines
  - 100 per cent adherence to timelines for applications in terms of the Mineral and Petroleum Resources Development Act (2002).

### Subprogrammes

- Mine Health and Safety Management* provides overall management to the programme.
- Mine Health and Safety Regions* develops strategies to reduce occupational diseases and injuries in the mining sector and conducts audits and inspections.
- Occupational Health* makes transfers to the Mine Health and Safety Council, which is tasked with promoting a culture of health and safety in the mining sector.

## Programme 4: Mining and Minerals Policy Development

### Programme purpose

Formulate, maintain and implement integrated minerals and petroleum policies to promote and encourage investment in the mining and petroleum industries.

### Objectives

- Promote investment in the mining, minerals and upstream petroleum sectors over the medium term by:
  - participating in local and international mining and petroleum conferences and events, engaging with stakeholders in various forums and leading the implementation of key government priorities
  - ensuring the full implementation of plans for developing the oceans economy for oil and gas exploration through Operation Phakisa
  - ensuring the full implementation of the shale gas action plan through consultations, advocacy, research and promotional activities for shale gas exploration
  - publishing mining and energy reports and publications.
- Manage diplomatic imperatives and relations with foreign countries to benefit South Africa by establishing and implementing bilateral and multilateral partnerships for mining and upstream petroleum development on an ongoing basis.
- Enable transformed, competitive and sustainable minerals and petroleum sectors by amending the Petroleum Products Act (1977), the Mine Health and Safety Act (1996) and the Mineral and Petroleum Resources Development Act (2002), and developing the South African Petroleum Company over the MTEF period.

### Subprogrammes

- Mining and Minerals Development Management* provides overall management to the programme.
- Mineral and Petroleum Policy* develops and reviews policy and legislative frameworks for the mining, minerals and petroleum sectors; conducts research; and monitors the impact of policy implementation.
- Economic Analysis and Statistics* conducts research, compiles and collates data, and advises the department on local and international mineral and petroleum economic trends.
- Economic Growth, Promotion and Global Relations* promotes economic growth and investment in the sector and makes transfers to the Council for Geoscience and Mintek.

## Entities

### Alexkor

Alexkor was established in terms of the Alexkor Limited Act (1992) to exploit marine and land diamonds in Alexander Bay, Northern Cape. The company holds a 51 per cent share interest in the Alexkor Richtersveld Mining Company Pooling and Sharing Joint Venture and the Richtersveld Community holds 49 per cent. Alexkor does not have any other mining operations outside the joint venture. Alexkor is listed as a schedule 2 public entity in the Public Finance Management Act (1999).

The company was shifted to the Department of Mineral and Petroleum Resources when the Department of Public Enterprises was abolished as part of the 2024 national macro organisation of government process. As the company is still in the process of finalising its budget, this information was not ready for publication in the 2025 ENE. Alexkor does not receive transfers from the department.

### Central Energy Fund

#### *Selected performance indicators*

Number of reportable environmental incidents at the African Exploration Mining and Finance Corporation per year	Mining, coal		2	2	2	2	2	2	2

#### *Entity overview*

The Central Energy Fund is listed in schedule 2 of the Public Finance Management Act (1999) and is governed by the Central Energy Fund Act (1977) and the Companies Act (2008). Its mandate is to contribute to South Africa and the region's security of the energy supply through exploration, acquisition, development, marketing and strategic partnerships. Through its subsidiaries, the fund is also mandated to finance and promote the acquisition of coal; exploit coal deposits; manufacture liquid fuel, oil and other products from coal; market these products; and acquire, generate, manufacture, market, distribute or research any other form of energy. The subsidiaries of the fund are the Petroleum Oil and Gas Corporation of South Africa (PetroSA), the South African Gas Development Company, Petroleum Agency South Africa, Oil Pollution Control South Africa, the Strategic Fuel Fund, the African Exploration Mining and Finance Corporation, ETA Energy Solutions and CCE Solutions.

Over the medium term, the fund will focus on operationalising the South African National Petroleum Company through the consolidation of PetroSA, the Strategic Fuel Fund and the South African Gas Development Company; diversifying income streams; and ensuring operational efficiency at group level through the implementation of shared services across the group.

To diversify income streams, the fund plans to reinstate the gas-to-liquid refinery, shale gas exploration, investment in oil and gas storage and logistics infrastructure to ensure security of supply, and the operationalisation of the Klippoortjie mine.

The fund's budget is mainly used for goods and services, accounting for an estimated 96 per cent (R227.4 billion) of total expenditure over the medium term. This covers exploration, production, refining and trading of oil, fuel and gas, as well as other operational costs involved with enhancing South Africa's energy supply. Spending on

compensation of employees accounts for an estimated 2.5 per cent (R5.6 billion) of total expenditure, increasing at an average annual rate of 6.9 per cent to accommodate additional posts aligned with the new organisational structure. Overall, expenditure is expected to increase at an average annual rate of 16.5 per cent, from R57.9 billion in 2024/25 to R91.6 billion in 2027/28, driven mostly by increased spending on oil and gas due to the reinstatement of the gas-to-liquid refinery after PetroSA's anticipated recovery in line with its turnaround plan.

Revenue is expected to increase at an average annual rate of 17.4 per cent, from R58 billion in 2024/25 to R93.9 billion in 2027/28, mostly driven by PetroSA's anticipated recovery, hydrocarbon trading and dividends from the entity's investment in the Republic of Mozambique Pipeline Investments Company.

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of papers published in conference proceedings per year	Statutory projects	Outcome 5: Energy security and a just energy transition	32	126	40	35	35	40	40
Number of peer-reviewed articles published per year	Statutory projects		30	40	34	35	40	40	40
Number of value-added applied geoscience outputs for minerals and energy per year	Statutory projects		4	7	9	9	9	9	9
Number of applied geoscience outputs for infrastructure, land use, health, groundwater and the environment per year	Statutory projects		7	6	11	9	7	8	8
Percentage of onshore geoscience map coverage	Statutory projects		10.7% (205/ 1 916)	12% (230/ 1 916)	16% (307/ 1 916)	18%	20%	22%	24%
Percentage of offshore geoscience map coverage	Statutory projects		0.05% (1/ 1 828)	0.2% (2/ 1 828)	0.3% (5.5/ 1 828)	0.45%	0.5%	0.6%	0.7%
Number of council publications per year	Statutory projects		8	12	10	9	9	10	12

### Entity overview

The Council for Geoscience was established in terms of the Geoscience Act (1993) to promote the search for and exploration of minerals in South Africa. Its mandate is to generate, compile, curate and publish world-class geoscience knowledge products, provide geoscience-related services to the South African public and the industry, and render advisory services related to geohazards and geo-environmental pollution. The data generated by the council enables key activities such as the assessment of environmental impacts from mining, geohazards and shale gas development.

The council will continue to implement its mapping and research programmes over the medium term to achieve 24 per cent onshore geoscience map coverage and 0.7 per cent offshore geoscience map coverage. This will provide geoscience information and knowledge to contribute towards South Africa's exploration strategy and implementation plan, which aims to secure a minimum of 5 per cent of global exploration. The council will invest in the acquisition of technical equipment and upgrading of key ICT systems to enhance operational efficiencies and bolster scientific output to a world-class standard at a projected cost of R116.5 million over the medium term. Greater mapping inventory and products will reduce risk and allow for more focused exploration activities to be undertaken.

To support these projects, spending on goods and services accounts for an estimated 42.4 per cent (R1 billion) of total expenditure over the MTEF period. Compensation of employees is allocated an estimated 54.4 per cent (R1.4 billion) of the total budget over the period ahead, increasing at an average annual rate of 7 per cent. This will allow for additional capacity for mapping and research services and to accelerate the national geoscience-mapping programme, including geohazard mapping and the assessment of mineral development potential. In line with this increase, the council's number of personnel is set to increase from 513 to 524 over the medium term.

The council expects to derive 79.9 per cent (R2 billion) of its revenue over the period ahead through transfers from the department and the balance through fees for providing geoscientific mapping and research services. This includes funds for collaborative activities with the department such as the rehabilitation of derelict and ownerless mines, and water ingress solutions.

Number of advice notes provided to the minister on occupational health and safety matters in the mining industry per year	Research, programme promotion and programme improvement in mining		5	3	3	3	3	3	3
Number of council programmes promoted in the mining industry per year	Research, programme promotion and programme improvement in mining		3	5	5	5	5	5	5

### Entity overview

The Mine Health and Safety Council was established in terms of the Mine Health and Safety Act (1996) and is listed as a schedule 3A public entity in terms of the Public Finance Management Act (1999). It is mandated to advise the Minister of Mineral and Petroleum Resources on occupational health and safety at mines, develop legislation, conduct research and liaise with other statutory bodies. The council operates through a partnership with organised labour, employers and the department.

Over the MTEF period, the council will focus on undertaking research to provide solutions to occupational health and safety challenges and reviewing mining industry regulatory frameworks to ensure that the sector becomes safer. This includes health and safety research directed at benefiting mineworkers, projects on various mining industry issues such as women in mining and occupational health, and finalising agreements on occupational health and safety standards. As a result, goods and services accounts for an estimated 49.3 per cent (R176.7 million) of total spending over the medium term, which includes spending on research and development. Depreciation is set to increase at an average annual rate of 18.5 per cent due to the procurement of additional research assets and renovation costs for the council's new office building. Compensation of

### Entity overview

Mintek's mandate, as set out in the Mineral Technology Act (1989), is to maximise the value derived from South Africa's mineral resources through activities such as research and development, technology transfer, and the creation of an enabling environment for the establishment and expansion of mineral industries. It specialises in mineral processing, extractive metallurgy and related areas, and is listed as a schedule 3B public entity in the Public Finance Management Act (1999). To this end, Mintek develops appropriate, innovative technology for transfer to the industry, and provides test work, consultancy and analytical and mineralogical services to clients across the world.

Over the medium term, Mintek will continue to focus on applied research and technologies for mineral-based industries. One of its core programmes will be the design, procurement and construction of a manufacturing facility for the establishment and production of ferroalloy research. Mintek will continue to foster an environment that promotes innovation, and invest in the development and transformation of its workforce to equip them with the necessary skills to address present and future challenges. As a result, compensation of employees is expected to amount to 47.8 per cent (R1.1 billion) of total expenditure over the medium term. Spending on goods and services is expected to amount to 45.8 per cent (R1.1 billion) over the same period, which includes specialised service fees to produce research.

The entity is set to derive 40.8 per cent (R991.5 million) of its revenue over the MTEF period through transfers from the department and generate 53.6 per cent (R1.3 billion) through commercial activities and funds for specific projects such as the rehabilitation of ownerless and derelict asbestos mines and holings. Commercial revenue, inclusive of the rehabilitation funds, is expected to increase at an average annual rate of 4.1 per cent, from R378 million in 2024/25 to R426.3 million in 2027/28 as the market is expected to improve over the MTEF period. Mintek will continue to engage with industry, the European Union and commercial customers to partner in research and funding to increase revenue.

Number of precious metals joint inspections conducted with law enforcement stakeholders per year	Regulatory compliance		4	20	25	30	35	40	45
Number of diamond joint inspections conducted with law enforcement stakeholders per year	Regulatory compliance		1	15	20	25	30	35	40

## Entity overview

The South African Diamond and Precious Metals Regulator was established in terms of section 3 of the Diamonds Act (1986). It is mandated to implement and enforce the provisions of that act, the Precious Metals Act (2005), the Diamond Export Levy (Administration) Act (2007) and the Diamond Export Levy Act (2007). It is a schedule 3A public entity in terms of the Public Finance Management Act (1999). The regulator's core functions include facilitating the buying, selling, exporting and importing of diamonds through its Diamond Exchange and Export Centre; and regulating the acquisition, possession, smelting, refining, beneficiation, use and disposal of precious metals.

Over the medium term, the regulator will focus on combating illicit trade in diamonds and precious metals in collaboration with law enforcement authorities and other relevant regulatory authorities; monitoring and enforcing compliance in the diamond and precious metals sector; and facilitating the entry of new players, in collaboration with industry players. In giving effect to this focus, the regulator plans to conduct 2 550 inspections on licensed precious metals premises and 2 550 inspections on licensed diamond premises over the medium term. It will also issue various types of licences and permits, and monitor compliance.

As regulation is labour intensive and skilled personnel are required to perform compliance inspections and audits, compensation of employees accounts for an estimated 71.4 per cent (R274.2 million) of total expenditure over the medium term. The regulator has received approval from National Treasury to budget for a deficit of R5.3 million in 2025/26 to fund its projected operational expenditure, with the shortfall arising due to lower-than-expected revenue because of poor industry conditions. This will be funded from accumulated cash reserves.

The regulator is set to derive 50.9 per cent (R196.5 million) of its revenue over the medium term through transfers from the department and 46.1 per cent (R171.5 million) through fees, mostly for licences and permits. Total revenue is projected to increase at an average annual rate of only 1.3 per cent, from R124.1 million in 2024/25 to R128.8 million in 2027/28, due to the depressed state of the diamond industry. To improve its revenue prospects, the regulator will review relevant legislation, including the assessment of fees, and investigate additional revenue streams.

### Entity overview

The State Diamond Trader is a state-owned entity, established in 2007 in terms of section 14 of the Diamonds Act (1986) to operate in the diamond industry and to support and facilitate growth in local diamond beneficiation. Its mandate, as defined in the Diamonds Amendment Act (2005), is to promote equitable access to and local beneficiation for the country's diamonds; and to conduct research, develop a client base, contribute to the growth of the local diamond beneficiation industry, and develop efficient ways to market diamonds not suitable for local beneficiation. It is listed as a schedule 3B public entity in terms of the Public Finance Management Act (1999).

Over the period ahead, the trader will continue to foster growth within the diamond trade industry, ensure

equitable access and promote its own sustainability. It will do this by enabling and increasing the participation of historically disadvantaged South Africans in the diamond beneficiation industry by purchasing up to 10 per cent of raw or unprocessed diamonds from all diamond producers in South Africa and selling them to beneficiation licence holders who are registered customers. As a result, goods and services account for an estimated 96.8 per cent (R2.4 billion) of total expenditure over the medium term, mostly for the procurement of rough diamonds. Total expenditure is set to increase at an average annual rate of 8.7 per cent, from R686.9 million in 2024/25 to R882 million in 2027/28.

Revenue is generated entirely from sales and is set to increase at an average annual rate of 8.7 per cent, from R690.7 million in 2024/25 to R888.1million in 2027/28. This is due to planned revenue enhancement initiatives such as a pilot project for purchasing rough diamonds outside of the country, as the local supply to service clients has diminished and the local supply chain has been experiencing disruptions.

Executive authority Minister of Science, Technology and Innovation  
Accounting officer Director-General of Science, Technology and Innovation  
Website [www.dst.gov.za](http://www.dst.gov.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Realise the full potential of science and technology in social and economic development by developing human resources, research and innovation.

### Mandate

The Department of Science, Technology and Innovation derives its mandate from the 2019 White Paper on Science, Technology and Innovation, which introduces the concept of the national system of innovation as a set of interacting organisations and policies through which South Africa creates, acquires, diffuses and puts into practice new knowledge to help achieve individual and collective goals. A coordinated and efficient national system of innovation will help the country achieve its national development priorities by promoting change through innovation, and enable all South Africans to enjoy the economic, sociopolitical and intellectual benefits of science, technology and innovation.

### Selected performance indicators

Indicator	Programme	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of doctoral students awarded bursaries per year, as reflected in reports from the National Research Foundation and relevant entities	Research Development and Support	Outcome 14: Skills for the economy	2 527	2 259	2 260	2 570	2 580	2 590	2 590
Number of pipeline postgraduate students (BTech, honours and masters students) awarded bursaries per year, as reflected in reports from the National Research Foundation and relevant entities	Research Development and Support		5 643	4 745	4 000	4 000	4 500	4 500	4 500
Number of researchers awarded research grants per year through programmes managed by the National Research Foundation, as reflected in the foundation's project reports	Research, Development and Support		4 700	4 700	4 700	4 700	4 800	4 800	4 800
Number of knowledge and innovation products added to the industrial development and green economy intellectual property portfolio per year through fully funded or co-funded research initiatives	Socioeconomic Innovation Partnerships	Outcome 9: Economic transformation for a just society	70	70	70	70	80	80	80
Number of knowledge products on innovation for inclusive development published per year	Socioeconomic Innovation Partnerships		4	4	4	4	5	5	5

## Expenditure overview

Over the medium term, the department will focus on building the national system of innovation and developing human capital through providing targeted postgraduate development and research support; and funding key infrastructure and innovation in line with the guiding policy imperatives of the national space strategy, the national integrated cyberinfrastructure system, the 2019 White Paper on Science, Technology and Innovation, and the 2022-2032 decadal plan on science, technology and innovation.

Expenditure is expected to increase at an average annual rate of 1.6 per cent, from R9.4 billion in 2024/25 to R9.9 billion in 2027/28. Transfers and subsidies, including transfers to the department's entities, constitute an estimated 92.4 per cent (R26.2 billion) of total expenditure over the MTEF period. These funds are intended to support the department's entities in carrying out various research and development projects, developing human capital, maintaining national research infrastructure and administering grants for scientific research. The second-largest cost driver is compensation of employees, spending on which is set to increase at an average annual rate of 4.2 per cent, from R385.4 million in 2024/25 to R422.7 million in 2027/28.

### ***Targeted postgraduate development and research support***

Human capital, research infrastructure and research support are essential in developing a globally competitive national system of innovation that is responsive to South Africa's developmental needs and science objectives. In recognition of this, over the medium term, the department aims to award 7 760 bursaries to doctoral students, award 13 500 bursaries to pipeline postgraduate (BTech, honours and masters) students in science, engineering and technology, and support 14 400 emerging and established researchers through research grants. Accordingly, R8.4 billion over the medium term is allocated in the *Human Capital and Science Promotions* subprogramme in the *Research Development and Support* programme to provide bursaries, scholarships, internships and support, mainly through the National Research Foundation and the South African Research Chairs Initiative.

## Funding key infrastructure and innovation

To build a strong and competitive national system of innovation, sufficient research infrastructure must be available, as outlined in the department's research infrastructure roadmap. Infrastructure includes specialised facilities for medicine and spacecraft development, as well as smaller production units where scientific procedures can be evaluated before being scaled up.

The Council for Scientific and Industrial Research implements the national integrated cyberinfrastructure system. It is designed to offer the required data processing, administration and transportation capabilities to support national projects. These include hosting the mid-frequency array of the global Square Kilometre Array and the building of a 64-dish MeerKAT radio telescope. To implement the system, R980.5 million is earmarked over the next 3 years for transfers to the council through allocations in the *Basic Science and Infrastructure* subprogramme in the *Research Development and Support* programme.

## Programme 2: Technology Innovation

### Programme purpose

Promote technology development and the protection and use of publicly funded intellectual property for innovation with socioeconomic impact.

### Objectives

- Facilitate and make strategic investments in space science and technology, energy, the bioeconomy, nanotechnology, robotics, photonics, indigenous knowledge systems, intellectual property management, technology transfer and technology commercialisation over the medium term by:
  - generating 125 knowledge products (including published peer-reviewed scientific articles and the filing of applications for, or the registration or granting of, intellectual property rights)
  - developing and/or maintaining 6 decision support interventions, which are strategies, tools and systems designed to assist policymakers, researchers and organisations in making informed choices about scientific research, technological development, and innovation policies. These are intended to improve the delivery of government services or functions.

## Subprogrammes

- *Space Science* supports the creation of an environment conducive to the implementation of the national space strategy and the South African Earth observation strategy, and addresses the development of space technologies, innovative solutions and human capital to respond to the national priority of socioeconomic growth. This subprogramme also oversees the South African National Space Agency.
- *Hydrogen and Energy* supports a reduction in greenhouse gas emissions and air pollution, contributing to a more diverse and sustainable energy mix by enabling the widespread commercialisation of battery, fuel cell, renewable and net-zero carbon technologies based on publicly funded intellectual property rights; and supports the penetration of clean and alternative energy technologies through research, development and validation efforts. Activities carried out through this subprogramme are intended to make these technologies competitive in terms of cost and performance, while fostering strategic partnerships with the public and private sectors to reduce the institutional and market barriers to their commercialisation.
- *Bio-innovation* leads the implementation of the national bioeconomy strategy approved by Cabinet in 2013 to ensure that the bioeconomy makes a significant contribution to South Africa's economy.
- *Innovation Priorities and Instruments* focuses on innovation instruments and emerging and convergent technological innovation platforms; drives strategic policy instruments targeted at supporting business innovation and innovation supplier programmes such as the Innovation Bridge portal and Design Innovation Seed Fund programmes; and supports the development of innovation and entrepreneurial skills in partnership with entities such as Technological Higher Education Network South Africa and the top 100 technology companies.
- *National Intellectual Property Management Office* ensures that intellectual property from publicly financed research and development is identified, protected, used and commercialised for the (social, economic, military or any other) benefit of the people of South Africa.
- *Office of the Deputy Director-General: Technology Innovation* provides management and administrative support to the programme and the office of the deputy director-general.

## Programme 3: International Cooperation and Resources

### Programme purpose

Strategically develop, promote and manage international partnerships that strengthen the national system of innovation. Enable an exchange of knowledge, capacity and resources between South Africa and its international partners, with a focus on building capacity to support science, technology and innovation in Africa. Support South African foreign policy through science diplomacy.

### Objectives

- Maximise South Africa's strategic interests in science, technology and innovation through international cooperation and promote a transformed, inclusive, responsive and coherent national system of innovation by leveraging resources through 130 projects with donor funders by March 2028.
- Develop human capabilities and skills for the economy and development by securing opportunities for 900 South African students to participate in international programmes over the medium term.
- Use knowledge for economic development in revitalising existing industries and stimulating research and

development-led industries by supporting 51 initiatives targeting the objectives of the African Union's Agenda 2063, focusing on the Southern African Development Community's regional indicative strategic development plan by March 2028. These objectives prioritise issues such as inclusive social and economic development, continental and regional integration, democratic governance, and peace and security.

- Support innovation within a capable state by engaging with 36 science, technology and innovation leaders in multilateral forums by March 2028.

## Subprogrammes

- *Multilateral Cooperation and Africa* advances and facilitates South Africa's participation in: bilateral science, technology and innovation cooperation initiatives with other African partners; African multilateral programmes, especially those of the Southern African Development Community and the African Union; and broader multilateral science, technology and innovation partnerships, with a strategic focus on South-South cooperation.
- *International Resources* works to increase the flow of international funding into South African science, technology and innovation initiatives, as well as African regional and continental programmes, to promote foreign investment and foster strategic partnerships with partners such as the European Union, philanthropic foundations and organisations, and the multinational private sector.
- *Overseas Bilateral Cooperation* promotes and facilitates South Africa's bilateral cooperation in science, technology and innovation with partners in Europe, the Americas, Asia and Australasia, especially for human capital development and collaborative research and innovation; and secures support for cooperation with other African partners.
- *Office of the Deputy Director-General: International Cooperation and Resources* provides management and administrative support to the programme and the office of the deputy director-general.

## Programme 4: Research Development and Support

### Programme purpose

Provide an enabling environment for research and knowledge production that promotes the strategic development of basic sciences and priority science areas through the promotion of science human capital development, and the provision of research infrastructure and relevant research support, in pursuit of South Africa's transition to a knowledge economy.

### Objectives

- Contribute to the development of representative, high-level human capital to pursue locally relevant, globally competitive research and innovation activities over the medium term by:
  - awarding 7 760 bursaries to doctoral students
  - awarding 13 500 bursaries to pipeline postgraduate (BTech, honours and masters) students
  - placing 2 250 graduates and students in department-funded work preparation programmes in science, engineering and technology institutions.
- Contribute to a transformed, inclusive, responsive and coherent national system of innovation by:
  - maintaining the number of research infrastructure grants at 25 over the medium term
  - increasing the total available broadband capacity provided by the South African National Research Network, from 6 800 Gbps in 2024/25 to 7 200 Gbps in 2027/28.

- Increasing knowledge generation and innovation output by:
  - commissioning and integrating 13 MeerKAT antennae with the 64-dish MeerKAT telescope by 2025/26
  - conducting 45 initiatives promoting public awareness of, and engagement with, science over the medium term
  - maintaining the number of research articles published by researchers funded by the National Research Foundation and cited in the Web of Science database at more than 26 750 over the medium term
  - maintaining the number of emerging researchers awarded research grants through programmes managed by the National Research Foundation at more than 8 739 over the medium term
  - finalising the national marine and coastal research activities annual plan by 2026/27
  - implementing a revised palaeosciences strategy aligned with the science, technology and innovation decadal plan by 2026/27.

## Subprogrammes

- Human Capital and Science Promotions* formulates and implements policies and strategies that address the availability of human capital for science, technology and innovation; provides fundamental support for research activities; and contributes to the development of a society that is scientifically literate and knowledgeable about science.
- Science Missions* promotes the development of research and the production of scientific knowledge and human capital in scientific areas in which South Africa enjoys a geographic advantage.
- Basic Science and Infrastructure* facilitates the strategic implementation of research and innovation equipment and facilities to promote knowledge production in areas of national priority and sustain innovation led by research and development.
- Astronomy* supports the development of astronomical sciences around a new multi-wavelength astronomy strategy and provides strategic guidance and support to relevant astronomy institutions for the implementation of strategic astronomy programmes.
- Office of the Deputy Director-General: Research Development and Support* provides management and administrative support to the programme and the office of the deputy director-general.

## Programme 5: Socioeconomic Innovation Partnerships

### Programme purpose

Enhance government's growth and development priority areas through targeted science and technology-based innovation interventions, and the development of strategic partnerships with other government departments, industry, research institutions and communities.

### Objectives

- Inform and influence how science and technology can be used to achieve inclusive development through knowledge, evidence and learning over the medium term by:
  - publishing 15 knowledge products on innovation for inclusive development
  - maintaining and improving 10 decision support systems
  - supporting 23 localised facilities for inclusive development
  - generating 70 learning interventions.
- Identify, grow and sustain niche, high-potential science, technology and innovation capabilities for sustainable development and the greening of society and the economy by fully funding and co-funding 200 honours, masters and doctoral students, and adding 50 knowledge and innovation products to the intellectual property portfolio over the medium term.
- Identify, grow and sustain niche, high-potential science, technology and innovation capabilities that improve the competitiveness of existing industries with growth potential in aerospace, advanced manufacturing, chemicals, advanced metals, mining, ICT and sector innovation funds, and facilitate the development of new targeted industries led by research and development over medium term by:
  - fully funding or co-funding 600 masters and doctoral students
  - adding 160 knowledge and innovation products to South Africa's intellectual property portfolio.
- Introduce and manage interventions and incentive programmes that increase the level of private sector investment in scientific or technological research and development by providing preapproval decisions for the research and development tax incentive within 90 days of the date of receipt of applications on an ongoing basis.

### Subprogrammes

- *Sector Innovation and Green Economy* provides policy, strategy and direction for growth in strategic sectors of the economy led by research and development, and supports the transition to a green economy.
- *Innovation for Inclusive Development* supports the development of science and technology-based innovation

for tackling poverty, including the creation of sustainable jobs and human settlements, the enhanced delivery of basic services and innovation-driven local economic development.

- *Science and Technology Investment* leads and supports the development of indicators and instruments for measuring and monitoring investments in science and technology, the performance of the national system of innovation, and ways of strengthening policy in relation to the system.
- *Technology Localisation, Beneficiation and Advanced Manufacturing* funds development programmes for technology and innovation to advance strategic and sustainable economic growth, sector development priorities and service delivery over the medium and long terms.
- *Office of the Deputy Director-General: Socioeconomic Innovation Partnerships* provides management and administrative support to the programme and the office of the deputy director-general.

Number of proceedings reports, policy-maker booklets and statements published per year	Science advisory programme		8	1	8	8	8	8	8
New journal titles on the Scientific Electronic Library Online open-access platform per year	Scholarly publishing programme	Outcome 8: Dynamic science, technology and innovation for growth	2	2	2	2	2	2	2
Number of South African Journal of Science articles published per year	Scholarly publishing programme	Outcome 13: Improved education outcomes and skills	6	2	6	6	6	6	6
Number of Quest: Science magazines produced per year	Scholarly publishing programme		4	1	4	4	4	4	4

### Entity overview

The Academy of Science of South Africa was established in terms of the Academy of Science of South Africa Act (2001), as amended, to promote outstanding achievements in all fields of scientific inquiry, recognise excellence, and provide evidence-based scientific advice to government and other stakeholders.

The academy intends to continue achieving enhanced national capacity to produce and publish research over the medium term through its diverse membership base. This will facilitate the delivery of evidence-based scientific policy advice that adds value to government, and improve the quality and visibility of South African research publications. This work includes conducting consensus studies on health, education, climate change, energy, the science-policy nexus, biosafety and biosecurity, poverty reduction, and gender-responsive issues for young people, and people with disabilities.

Expenditure is expected to increase at an average annual rate of 2.5 per cent, from R37 million in 2024/25 to R39.9 million in 2027/28. Compensation of employees accounts for an estimated 67 per cent (R77.6 million) of the academy's total expenditure over the medium term as it relies on skilled personnel to fulfil its mandate. The academy is set to derive 91.7 per cent (R104.8 million) of its revenue over the medium term through transfers from the department.

## Council for Scientific and Industrial Research

### Selected performance indicators

**Table 35.20 Council for Scientific and Industrial Research performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of journal articles published per year	Science, engineering and technology operating units and centres	Outcome 13: Improved education outcomes and skills	315	320	320	298	327	327	338
Value of contract research and development income per year	Science, engineering and technology operating units and centres	Outcome 4: Increased infrastructure investment and job creation	R2.3bn	R2.4bn	R2.5bn	R3.1bn	R3.1bn	R3.2bn	R3.2bn
Number of new technology demonstrators per year	Science, engineering and technology operating units and centres	Outcome 8: Dynamic science, technology and innovation for growth	46	56	56	49	59	65	73
Number of science, engineering and technology staff per year	Science, engineering and technology operating units and centres	Outcome 14: Skills for the economy	1 497	1 598	1 598	1 642	1 642	1 642	1 659
Number of science, engineering and technology staff with doctorates per year	Science, engineering and technology operating units and centres		334	369	369	424	425	427	432
Number of new patents granted per year	Science, engineering and technology operating units and centres	Outcome 3: Structural reforms to drive growth and competitiveness	8	8	8	12	10	11	12

### Entity overview

The Council for Scientific and Industrial Research was established in 1945 and is governed in terms of the Scientific Research Council Act (1988). It fosters industrial and scientific development in the national interest through multidisciplinary research and technological innovation to improve the ability of the state to efficiently deliver basic services in fields such as health, education, social security, energy and shelter to all South Africans. In doing so, the council's broad aim is to reduce inequality.

Over the medium term, the council will focus on conducting high-quality, impactful research, advancing technological innovations to support industrial and scientific progress, and promoting industrial development in areas such as pharmaceutical innovation and agro-processing. To achieve this, it aims to grant 33 new patents and sign 59 technology licence agreements by the end of 2027/28. The council also intends to carry out several research, development and innovation initiatives in fields such as energy, security, defence and health. Spending on these activities is set to amount to an estimated 15.8 per cent (R1.6 billion) of total spending over the MTEF period in the science, engineering and technology operating units and centres programme.

The council's ability to generate revenue directly relates to its ability to attract and retain the requisite expertise to deliver favourable research outcomes. Competitive remuneration is a vital for retaining critical skills. Accordingly, spending on compensation of employees accounts for an estimated 59.3 per cent (R6 billion) of the council's budget over the next 3 years. Allocations for compensation of employees is set to increase at an average annual rate of 1.6 per cent, from R1.9 billion in 2024/25 to R2 billion in 2027/28.

The council generates revenue mainly by rendering services such as contract research and development. Other income is received through intellectual property rights, proceeds from technology transfers, and royalties. Revenue from these sources constitutes an estimated 78.2 per cent (R7.9 billion) of total revenue over the MTEF period, with the remainder derived through transfers from the department. Total revenue over the MTEF period is projected to amount to R10.1 billion. Revenue is projected to increase at an average annual rate of 2.8 per cent, from R3.2 billion in 2024/25 to R3.5 billion in 2027/28.

### Programmes/Objectives/Activities

### Entity overview

The Human Sciences Research Council was established in 1968 to undertake, promote and coordinate research in the human and social sciences. It is mandated to initiate, undertake and foster strategic, basic and applied research in human sciences; and address developmental challenges by gathering, analysing and publishing relevant data, especially through projects linked to collaborative programmes geared towards the public sector. The council's research outputs are widely disseminated to support policy development at all levels of government. As such, over the period ahead, the council will continue to focus on generating research that benefits the public, promoting good governance and effective public service delivery, addressing issues of poverty and inequality, supporting inclusive development, and strengthening the skills and expertise of scholars and researchers.

Expenditure is set to increase at an average annual rate of 5.7 per cent, from R538.3 million in 2024/25 to R636.4 million in 2027/28.

The council relies on human capital to carry out contract research initiatives, generate funding and produce research products. As a result, spending on compensation of employees accounts for an estimated 56.2 per cent (R1 billion) of its budget over the medium term. This spending is set to increase at an average annual rate of 5.5 per cent, from R306.3 million in 2024/25 to R359.6 million in 2027/28.

The council expects to receive 54 per cent (R977.2 million) of its revenue over the medium term through transfers from the department. These are set to increase at an average annual rate of 4.5 per cent, from R298.6 million in 2024/25 to R340.4 million in 2027/28. Remaining revenue is received through grants and research contracts from government departments, private sector foundations, and national and international organisations. Total revenue is also expected to increase by 5.7 per cent, from R538.3 million in 2024/25 to R636.4 million in 2027/28.

### Entity overview

The National Research Foundation was established in terms of the National Research Foundation Act (1998), as amended. It is mandated to fund research, develop human resources, promote indigenous knowledge, and provide research facilities to enable knowledge creation, innovation and development in all fields of science and technology.

The foundation will continue to focus on implementing its Vision 2030 strategy, which seeks to entrench scientific impact, excellence and sustainability in the science and technology sector while driving transformation. Over the medium term, this will include efforts to create a more diverse knowledge workforce to lead the knowledge economy, increase the scientific community's global competitiveness, build a skilled research and innovation workforce to renew and sustain South Africa's researcher base, introduce grant funding programmes targeted at women and black researchers, and expand research infrastructure in the Square Kilometre Array and iThemba Labs. To this end, over the MTEF period, capital expenditure of R8.8 billion is allocated in the national research infrastructure platforms programme for the expansion and maintenance of this infrastructure, and R8.1 billion is allocated in the research and innovation support and advancement programme for funding projects that advance research and develop human capacity.

The foundation receives funding mainly through transfers and subsidies, accounting for an estimated 85 per cent (R15.7 billion) of its projected revenue over the MTEF period. Other revenue is derived through contract funding for specific projects and income generated by sales and interest earned. Transfers from the department are expected to increase at an average annual rate of 2 per cent, from R4.9 billion in 2024/25 to R5.2 billion in 2027/28.

			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28	
Number of joint initiatives undertaken through formal international partnerships per year	Earth observation	Outcome 8: Dynamic science, technology and innovation for growth	7	7	7	10	12	14	14	
Number of awareness and training interventions to key users of space-related products and services per year	Earth observation		16	16	16	17	17	18	18	
Total revenue generated from space operations activities per year	Space operation	Outcome 4: Increased infrastructure investment and job creation	R69m	R70m	R72m	R 73m	R73m	R74m	R76m	
Number of students and interns supported for formalised training per year	Space science	Outcome 1: Increased employment and work opportunities	50	29	72	72	72	72	72	
Number of products and applications produced per year	Space science	Outcome 8: Dynamic science, technology and innovation for growth	2	2	2	2	2	2	2	

### Entity overview

The South African National Space Agency was established in terms of the South African National Space Agency Act (2008). The agency became operational in 2010 and is broadly required to promote the peaceful use of space, foster international cooperation in space-related activities, and facilitate the creation of an environment conducive to space technology and industrial development.

Over the medium term, the agency will continue to focus on broadening the suite of products and services available in the South African space sector and promoting socioeconomic development across Africa. This will be achieved by building adequate space capacity; improving geospatial information; developing key infrastructure in support of the sector; and providing technical skills interventions, research capacity and knowledge-management tools. These priorities are underpinned by the agency's agenda to transform the space industry in accordance with the national policy initiatives of achieving an integrated national space capability that responds to Africa's socioeconomic challenges by 2030. Accordingly, R684.5 million over the MTEF period is allocated to the space operation programme.

Expenditure is expected to decrease at an average annual rate of 7.2 per cent, from R647 million in 2024/25 to R516.7 million in 2027/28, due to an anticipated decrease in transfers from the department from the higher baseline in 2024/25, when an additional allocation was made to the Space Infrastructure Hub through the budget facility for infrastructure. As such, the decrease is not expected to negatively affect the agency's planned activities for the period ahead.

Expenditure on goods and services accounts for an estimated 63.8 per cent (R1.5 billion) over the medium term, driven by operating payments to Space Infrastructure Hub projects and conditional grants to researchers. As the agency relies on highly skilled professionals to fulfil its mandate, compensation of employees accounts for an estimated 36.2 per cent (R780.6 million) of its planned spending, increasing at an average annual rate of 7.7 per cent, from R219.4 million in 2024/25 to R274 million in 2027/28.

Transfers from the department account for an estimated 57.7 per cent (R1.4 billion) of the agency's revenue over the MTEF period. Additional revenue is generated by services rendered to government institutions and other organisations, mainly international clients in the space sector. Revenue is projected to be in line with spending.

### Entity overview

The Technology Innovation Agency draws its mandate from the Technology Innovation Agency Act (2008), as amended. The agency serves as the key institutional intervention to bridge the innovation gap between research and development outcomes from higher education institutions, science councils, public entities and private companies to maximise the potential of technological innovation to stimulate the economy.

Over the medium term, the agency will continue to focus on bridging the innovation gap between research and development by providing financial support to ensure that 763 products or technologies are developed. Priority will be given to patents, publication outputs and knowledge-based products such as prototypes, technology demonstrators and technology assistance packages. The agency will seek to empower historically disadvantaged individuals through deliberate investment decisions, stakeholder engagements and general mobilisation initiatives. Accordingly, to stimulate and intensify technological innovation to improve economic growth and the quality of life of all South Africans, this support will prioritise small, medium and micro enterprises to increase the participation of marginalised segments of society such as people in townships, rural communities, women, young people and people with disabilities.

To fund these initiatives, expenditure is expected to increase at an average annual rate of 11.5 per cent, from R593.6 million in 2024/25 to R822.4 million in 2027/28, as the agency expands its focus on commercialising technologies. Transfers and subsidies, mostly to grants for disbursements to projects over the medium term, is the main spending area and constitutes an estimated 71.9 per cent (R1.5 billion) of the agency's budget over the MTEF period. Compensation of employees accounts for an estimated 20.5 per cent (R414.6 million) of expenditure over the medium term.

The agency expects to receive 92.7 per cent (R1.9 billion) of its revenue over the MTEF period through transfers from the department. These are set to increase at an average annual rate of 11.6 per cent, from R555 million in 2024/25 to R770.9 million in 2027/28, as the agency aims to increase the number of technologies it licenses and commercialises.

## Vote purpose

Lead and coordinate an integrated approach to the promotion and development of entrepreneurship among small, medium and micro enterprises and cooperatives, and ensure an enabling legislative and policy environment to support their growth and sustainability.

## Mandate

The Department of Small Business Development is tasked with leading and coordinating an integrated approach to the promotion and development of entrepreneurship, small businesses and cooperatives; and ensuring an enabling legislative and policy environment to support their growth and sustainability. The realisation of this mandate is expected to lead to a transformed and inclusive economy driven by sustainable and innovative small, medium and micro enterprises (SMMEs) and cooperatives. The department's mandate is guided by a legislative framework that includes:

- section 3(d) of the Industrial Development Act (1940)
- the Businesses Act (1991)
- the 2004 cooperatives development policy
- the Cooperatives Act (2005), as amended
- the Cooperatives Amendment Act (2013)
- the National Small Enterprise Amendment Act (2024).

## Selected performance indicators

1. No historical data available.

## Expenditure overview

Over the medium term, the department will focus on exposing SMMEs and cooperatives to global market opportunities, refurbishing or building approved business infrastructure for SMMEs and cooperatives, supporting informal businesses, and reviewing policies to eliminate regulatory and administrative red tape in municipalities, which hinders the growth of SMMEs.

Expenditure is set to increase at an average annual rate of 5.6 per cent, from R2.7 billion in 2024/25 to R3.2 billion in 2027/28. Funds allocated to support SMMEs account for an estimated 84.4 per cent (R7.7 billion) of the department's budget over the MTEF period. Of this, R6 billion is transferred to the new Small Enterprise Development Finance Agency, which was formed through merging the Small Enterprise Development Agency, the Small Enterprise Finance Agency and the Cooperative Banks Development Agency.

To enable an estimated 120 000 township and rural enterprises and 1 000 start-up SMMEs to access business development support, R3 billion is allocated over the medium term to the *Funding Support and Coordination* subprogramme in the *Enterprise Development, Innovation and Entrepreneurship* programme. This programme also funds the craft customised sector programme, which is allocated an estimated R38.9 million over the period ahead to provide financial and non-financial support to a targeted 3 000 crafters.

As part of the department's efforts to implement SMME hubs across all districts over the medium term, in partnership with municipalities, it aims to establish 40 industrial clusters that provide accommodation, shared equipment and infrastructure among formal, informal and operational entrepreneurs. Spending on this is projected to be R958.8 million over the period ahead.

The department will also focus on empowering women, young people and people with disabilities by exposing a targeted 600 SMMEs and cooperatives to global market opportunities, and supporting a targeted 6 000 informal businesses over the next 3 years. To carry out these activities, a combined R173.4 million is allocated to the *Value Chain and Market Access Support* subprogramme and the *Economic Transformation Initiatives* subprogramme in the *Integrated Cooperatives and Micro Enterprise Development* programme.

## Programme 2: Sector Policy and Research

### Programme purpose

Oversee transversal support within the sector to provide a conducive environment for small, medium and micro enterprises.

### Objectives

- Create an environment in which SMMEs can thrive over the medium term by:
  - reducing regulatory and administrative burdens
  - providing enabling regulation and legislation for the small enterprise ecosystem
  - enhancing evidence-based business information and sector-wide monitoring and evaluation
  - increasing the contribution of SMMEs and cooperatives in priority sectors
  - improving the coordination of ecosystem support for small enterprises.

### Subprogrammes

- *Business Intelligence and Sector-wide Monitoring and Evaluation* manages the provision of evidence-based business information and sector-wide monitoring and evaluation.
- *Intergovernmental Relations and Business Efficiency* manages and facilitates intergovernmental relations to reduce administrative and regulatory burdens for SMMEs.
- *Sector-specific Support* manages initiatives to increase the development, participation and sustainability of small-scale manufacturers in key industries.

## Programme 3: Integrated Cooperatives and Micro Enterprise Development

### Programme purpose

Drive economic transformation through the provision of integrated development and support services for informal businesses, cooperatives and micro enterprises.

## Objectives

- Provide development and support services for informal businesses, cooperatives and micro enterprises to encourage economic transformation over the medium term by:
  - increasing the participation of SMMEs and cooperatives in domestic and international markets
  - expanding access to financial and non-financial support for small enterprises in rural and township economies.

## Subprogrammes

- *Integrated Cooperatives and Micro Enterprise Development* provides leadership to the branch and coordinates the provision of business infrastructure services to small businesses, cooperatives and the informal sector.
- *Economic Transformation Initiatives* manages economic transformation through providing development and support services to informal businesses, cooperatives and micro enterprises.
- *Value Chain and Market Access Support* manages the provision of support to access and grow markets in value chains.

## Programme 4: Enterprise Development, Innovation and Entrepreneurship

### Programme purpose

Oversee the promotion of a sector that enhances entrepreneurship and innovation during the establishment and growth of small, medium and micro enterprises, and ensures their sustainability.

### Objectives

- Enhance entrepreneurship and innovation over the medium term by:
  - improving integrated and streamlined business processes and systems for SMMEs
  - scaling up and coordinating support for SMMEs, cooperatives and village and township economies

- expanding access to financial and non-financial support to small enterprises as well as rural and township economies.

## Subprogrammes

- *Enterprise Development, Innovation and Entrepreneurship* provides leadership to the programme and manages the provision of innovative solutions that support the management of transversal applications and digital business support.
- *Entrepreneurship and Enterprise Development* manages the formulation of policy instruments and advocacy work aimed at the inclusion of SMMEs in the mainstream economy.
- *Funding Support and Coordination* oversees the expansion of access to finance for SMMEs, cooperatives and the informal sector through an integrated approach.

#### Entity overview

The Small Enterprise Development Finance Agency was established in 2024 in terms of the National Small Enterprise Amendment Act (2024). The agency consolidates previous functions of the Small Enterprise Development Agency, the Small Enterprise Finance Agency and the Cooperative Banks Development Agency into a single government entity that aims to streamline a cohesive and effective response to the needs of small enterprises, particularly among disadvantaged groups in underserved areas. Accordingly, the agency is mandated to provide comprehensive financial and non-financial support to small enterprises that are poised for growth and have the potential to drive job creation and economic activity.

Over the medium term, the agency will focus on promoting entrepreneurship and coordinating the small enterprise development ecosystem. It plans to do this while prioritising key growth and transformation sectors, including tradeable services, manufacturing, agriculture, construction, mining and green industries. By accelerating the rollout of the asset assist and general dealer grant support programmes, the agency aims to provide SMMEs with equipment and raw materials of up to 15 per cent of the value of the equipment. This is aimed at helping small businesses that do not qualify for funding from financial institutions. An estimated R900 million over the MTEF period is allocated for this purpose.

Expenditure is expected to decrease marginally to R2.4 billion in 2027/28, as funds are reprioritised between the department and the agency. Spending on goods and services is expected to account for the bulk of the agency's budget over the medium term (R4.3 billion), with spending on compensation of employees constituting an estimated R2.6 billion. Revenue is expected to increase from R2.6 billion in 2025/26 to R2.9 billion in 2027/28, due to accumulated unspent funds from the National Skills Fund that are rolled over to 2027/28.

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

## Vote purpose

*Provide an enabling environment for the sport, arts and culture sector by developing, transforming, preserving, protecting and promoting sport, arts and culture at all levels of participation to foster an active, winning, creative and socially cohesive nation.*

## Mandate

The Department of Sport, Arts and Culture is mandated to: provide leadership to the sport, recreation, arts, culture and heritage sectors to accelerate their transformation; provide enabling policies, regulations and legislative and institutional frameworks for the sectors; promote participation in sport, recreation, arts, culture and heritage; promote social cohesion and nation building through social transformation and social interaction; preserve, develop, protect and promote the cultural, heritage and linguistic diversity of South Africa; oversee the development and management of sport, recreation, arts, culture and heritage in South Africa in consultation with provinces; support the scouting, identification and development of talented athletes and creatives by providing them with opportunities to excel; support top athletes and creatives to achieve success at the continental and international levels; promote access to information in all official languages; and promote the enhancement of key structures and systems. The department derives its mandate from the:

- Heraldry Act (1962)
- Culture Promotion Act (1983)
- Pan South African Language Board Act (1995)
- National Archives and Records Service of South Africa Act (1996)
- Legal Deposit Act (1997)
- National Arts Council Act (1997)
- National Film and Video Foundation Act (1997)
- Cultural Institutions Act (1998)
- National Library of South Africa Act (1998)
- National Sport and Recreation Act (1998)
- South African Geographical Names Council Act (1998)
- South African Library for the Blind Act (1998)
- National Heritage Council Act (1999)
- National Heritage Resources Act (1999)
- Cultural Laws Second Amendment Act (2001)
- National Council for Library and Information Services Act (2001)

- South African Boxing Act (2001)
- Safety at Sports and Recreational Events Act (2010)
- Use of Official Languages Act (2012)
- South African Language Practitioners' Council Act (2014)
- South African Institute for Drug-free Sport Amendment Act (2024).

Other sector-specific prescripts governing the department include the:

- 2011 White Paper on Sport and Recreation, supported by the 2012 national sport and recreation plan
- revised 2017 White Paper on Arts, Culture and Heritage (endorsed in 2020), supported by the 2022 cultural and creative industries masterplan.

## Expenditure overview

The department's primary objective is to develop, transform, preserve, protect and promote sport, arts and culture at all levels of participation to foster an active, creative, winning, socially cohesive and unified nation. Over the MTEF period, the department will focus on: fostering a diverse and socially cohesive society with a unified national identity; increasing the economic impact of the sport, recreation, arts, culture and heritage sectors; ensuring access to sport, recreation, arts, culture and heritage infrastructure and information; advancing transformed, capable and professional sectors while promoting governance that is compliant and responsive at the national and international levels; and maintaining heritage assets.

Expenditure is projected to increase at an average annual rate of 2.2 per cent, from R6.1 billion in 2024/25 to R6.5 billion in 2027/28. Cabinet has approved increases to the department's baseline of R350 million in 2025/26 for the creative industries stimulus, a programme of the presidential employment initiative; R3.8 million in 2025/26, R4 million in 2026/27 and R4.2 million in 2027/28 to cover cost-of-living adjustments for public servants; and R6.5 million in 2025/26, R7 million in 2026/27 and R7.4 million in 2027/28 to cover cost-of-living adjustments for personnel paid from the *community library services grant* and the *mass participation and sport development grant*. The department's total budget amounts to R19.1 billion over the next 3 years, with transfers and subsidies accounting for an estimated 80.9 per cent (R15.5 billion) of spending over this period. An estimated 7.1 per cent (R1.4 billion) is allocated to compensation of employees.

R36 million in 2025/26 is reprioritised to cover costs related to South Africa's G20 presidency, including hosting 3 cultural working group meetings, the ministerial meeting and the G20 summit cultural performance.

### ***Promoting social cohesion and facilitating nation building***

Activities in the *Social Cohesion and Nation Building* subprogramme in the *Arts and Culture Promotion and Development* programme are carried out to coordinate the department's involvement in promoting social cohesion and advancing South Africa's ongoing nation building programme. As such, over the period ahead, R14.2 million is allocated for hosting 60 advocacy platforms and facilitating 45 community conversations, R14.1 million is allocated for supporting 15 Moral Regeneration Movement projects and R83.3 million is allocated for commemorating 18 national days.

### ***Creating job opportunities in the cultural and creative industries***

Over the period ahead, the *Cultural and Creative Industries Development* subprogramme in the *Arts and Culture Promotion and Development* programme is allocated R418.8 million to facilitate access to local and international markets. In 2025/26, activities in the subprogramme will be directed at: facilitating access to local and international markets for 34 projects at a projected cost of R32 million; assisting 16 cultural and creative industry bodies to form boards that will support programmes for their respective disciplines at a projected cost of R32 million; and supporting 4 transformative programmes focused on women, young people and people with disabilities through an allocation of R24 million.

The Mzansi golden economy programme unlocks the potential for economic growth by exposing creative products to markets and audiences to promote artists and create access to opportunities. Over the MTEF period, it aims to support 16 creative industry projects to improve access to finance and investment, fund 33 capacity-building projects and develop 13 innovation hubs for product development at a projected cost of R229 million in the *Mzansi Golden Economy* subprogramme in the *Arts and Culture Promotion and Development* programme. Allocations to the subprogramme are set to decrease at an average annual rate of 19.5 per cent, from R578.1 million in 2024/25 to R301.5 million in 2027/28, as a result of allocations in 2024/25 and 2025/26 for the presidential employment initiative. A significant portion of the subprogramme's total allocation of R1.2 billion over the medium term will be channelled into creating 10 000 job opportunities in the cultural and creative industries sector by March 2026 through Mzansi golden economy workstreams and cultural development programmes. An additional 3 000 job opportunities are expected to be created through an allocation of R54.8 million in the *Cultural and Creative Industries Development* subprogramme. The allocation of R350 million in 2025/26 for the creative industries stimulus is expected to lead to the creation of a further 25 000 jobs.

### ***Developing and promoting sport and recreation***

Sport has the power to unite diverse groups and foster a socially cohesive society with a shared national identity. In support of this, the *Recreation Development and Sport Promotion* programme receives 21.2 per cent (R4.1 billion) of the department's budget over the medium term, of which R1 billion is allocated to the *Infrastructure Support* subprogramme and R2 billion to the *mass participation and sport development grant*.

The grant will fund programmes related to school sport and club development over the MTEF period by providing equipment and/or attire to a targeted 10 500 hubs, clubs or schools to enable participation in sport and/or recreation, supporting 401 community sport and active recreation programmes, and supporting 9 athlete development programmes through provincial sport academies. The grant also enables provincial departments to support top athletes and develop talent. Key allocations in 2025/26 include R53.5 million to support 208 school sport programmes at the district level, R72 million to enable 5 000 learners to participate in the national school sport championships, R47.8 million for 126 organised community-based sport and recreation activities, and R83.9 million to provide sports equipment and/or attire to 3 500 hubs, clubs or schools. To enhance shared public spaces, R24 million in grant funding over the period ahead is allocated for constructing 30 community outdoor gyms and children's play parks.

To promote active lifestyles and lifelong participation in sport and recreation, the department also plans to implement 5 national sport and recreation events per year over the MTEF period (Move4Health, Nelson Mandela Sport and Culture Day, the Indigenous Games Festival, the Big Walk and National Recreation Day) through the *Active Nation* subprogramme's allocation of R96.8 million.

## Transforming and building capacity in the sport, arts and culture sectors

The department remains committed to upskilling and transforming the sport, arts and culture sectors. As part of the R98.5 million allocated to an estimated 50 compliant national sport federations through the *Winning Nation* subprogramme in the *Recreation Development and Sport Promotion* programme, the department will ensure the implementation of findings and recommendations from the eminent persons group report on transformation in sport.

Non-profit organisations will also be supported for programmes that focus on building capacity, such as skills-development initiatives to promote the socioeconomic empowerment of children, people with disabilities, older people and women. For this purpose, R36.1 million is set aside over the MTEF period in the *Social Cohesion and Nation Building* subprogramme in the *Arts and Culture Promotion and Development* programme.

## Maintaining heritage assets

The *Heritage Promotion and Preservation* programme receives 45.6 per cent (R8.8 billion) of the department's budget over the medium term. Key allocations include R5.2 billion for the *community library services grant*, funded through the *Public Library Services* subprogramme, and R2.2 billion for museum operations, funded through the *Heritage Institutions* subprogramme. To expand access to knowledge and information, the department plans to complete building 54 libraries over the next 3 years at an estimated cost of R584.6 million. This will be finalised before the *community library services grant* transitions to the provincial equitable share in 2027/28.

## Programme 2: Recreation Development and Sport Promotion

### Programme purpose

Support the provision of mass participation opportunities, the development of elite athletes, and the regulation and maintenance of facilities.

## Objectives

- Enhance the delivery of sport and recreation by providing annual financial support to all compliant sport and recreation organisations over the medium term.
- Foster a winning nation by continually creating an enabling environment for top athletes to excel on the international stage.
- Support the development of a winning nation by funding 9 provincially based athlete development programmes for emerging high-performance athletes per year over the medium term.
- Facilitate the implementation of the eminent persons group's transformation findings and recommendations related to the support of elite athletes for assessed sport federations over the medium term.
- Promote integrity in sports by providing financial support to the South African Institute for Drug-Free Sport and fulfilling annual commitments to the World Anti-doping Agency and regional anti-doping organisations.
- Strengthen the regulation of the boxing sector by offering ongoing support to Boxing South Africa as a departmental public entity.
- Celebrate South African sports talent by hosting annual events such as the South African Sports Awards, the Ministerial Outstanding Sports Performance Accolades and the G Sport Awards to honour achievements.
- Encourage lifelong participation in sport and recreation to enhance the wellbeing of South Africans by facilitating at least 5 sport and recreation events per year over the medium term and supporting 126 sport and recreation programmes in communities by March 2026.
- Expand access to school sport by March 2026 by supporting 208 school sport programmes at district and/or local level, enabling 5 000 learners to compete in the national school sport championship, and providing equipment and/or attire to 3 500 hubs, clubs or schools.
- Broaden opportunities for mass participation in sport and recreation across all provinces by managing and financially supporting initiatives through the mass participation and sport development grant on an ongoing basis.
- Improve community access to sport infrastructure by March 2026 by constructing 10 community gyms and play parks, and 4 multipurpose sports courts.
- Provide technical and management assistance to at least 52 municipalities per year to ensure compliance with norms and standards in the planning and implementation of sport infrastructure projects.
- Preserve and promote South African heritage, foster a culture of reading and support national memory through:
  - constructing, upgrading, maintaining, repairing and renovating departmental buildings and producing 8 progress reports by March 2026
  - developing and/or maintaining the Isibhubhu Cultural Arena and the Sarah Baartman Centre of Remembrance over the medium term
  - providing financial support for infrastructure upgrades to the buildings of 22 public entities by March 2026.

## Subprogrammes

- *Winning Nation* supports the development of elite athletes.
- *Active Nation* supports the provision of mass participation opportunities in sport and recreation.
- *Infrastructure Support* regulates and manages the provision of sport, recreation, arts and culture facilities. This subprogramme also provides technical support during the construction, repair and renovation of buildings belonging to public entities and other institutions in the sport, arts and culture sectors.

## Programme 3: Arts and Culture Promotion and Development

### Programme purpose

Promote and develop arts, culture and languages, and implement the national social cohesion strategy.

### Objectives

- Foster the development and promotion of official languages by supporting 4 multiyear language technology projects by March 2026.
- Enhance human resource capacity and promote excellence in the arts and culture sector by:
  - awarding 140 bursaries per year over the medium term to university students studying languages
  - supporting 33 capacity building programmes, including community art centre development programmes, incubators, academies and innovation hubs, by March 2026
  - collaborating with the Department of Basic Education to implement school-based arts education programmes by March 2026.
- Facilitate local and international market access by financially supporting 34 projects by March 2026.
- Transform the arts and culture sector by March 2026 by:
  - supporting 4 arts and social development programmes that focus on children, women, older people and people with disabilities
  - equipping 270 young people with skills to get them ready for employment in the sector through the national youth service programme
  - supporting 4 arts development programmes focused on young people.
- Drive integrated, outcomes-based research, planning, monitoring and evaluation across the sport, arts, culture, and heritage sectors by delivering 13 reports produced by the South African Cultural Observatory by March 2026.
- Strengthen international relations and partnerships by implementing the international relations strategy and providing quarterly progress updates on milestones achieved by March 2026.
- Promote South African cultural values by executing 2 sport and cultural diplomacy initiatives by March 2026.
- Advance social cohesion and nation building efforts annually by commemorating 6 national days, hosting 15 community conversations, organising 20 advocacy platforms and supporting 5 Moral Regeneration Movement projects.

- Address gender-based violence and femicide by supporting 2 targeted initiatives by March 2026.
- Develop, protect and promote the arts and culture sector by March 2026 by supporting:
  - 17 cultural and creative industry sector organisations to ensure the effective and efficient management of intellectual property rights
  - 4 programmes aimed at transforming the sector with a focus on women, young people and people with disabilities.
- Contribute to economic transformation by March 2026 by creating 10 000 job opportunities through the workstreams and cultural development programmes of the Mzansi golden economy strategy.

## Subprogrammes

- *National Language Services* promotes the use and equal status of all official languages. This entails developing terminologies and language technology, developing and providing translation and editing services in all official languages, and awarding bursaries.
- *Pan South African Language Board* transfers funds to the Pan South African Language Board, which creates an environment conducive to developing, using and promoting all official languages, including South African Sign Language and the Khoi, Nama and San languages.
- *Cultural and Creative Industries Development* supports cultural and creative industries by developing strategies, implementing sector development programmes, supporting the programmes of sector organisations and providing training support to arts and culture practitioners.
- *International Cooperation* helps to build continental and international relations for the promotion and development of South African sport, arts, culture and heritage by actively participating in and influencing decision-making in identified multilateral organisations and bilateral forums.
- *Social Cohesion and Nation Building* implements the national social cohesion strategy and brings under-represented groups (such as women, people with disabilities and people in rural areas) into the mainstream in the arts, culture and heritage sectors, including arts and culture in schools; and coordinates outcome 15 (social cohesion and nation building) of government's 2024-2029 medium-term development plan.
- *Mzansi Golden Economy* seeks to create job opportunities in the arts, culture and heritage sector by supporting programmes designed to develop audiences, stimulate demand, increase market access and develop skills.
- *Performing Arts Institutions* transfers funds to performing arts institutions, which provide a platform for the artistic and cultural expression of artists and those interested in performing arts.
- *National Film and Video Foundation* transfers funds to the National Film and Video Foundation to support the development of skills and local content and marketing in South Africa's film, audio-visual and digital media industry.
- *National Arts Council* transfers funds to the National Arts Council, which develops and supports various disciplines of arts and culture financially, in accordance with the National Arts Council Act (1997).

2. Rand million.

## Programme 4: Heritage Promotion and Preservation

### Programme purpose

Preserve and promote South African heritage, including archival and heraldic heritage. Oversee and transfer funds to libraries.

## Objectives

- Build capacity in the heritage sector by awarding 50 heritage bursaries to deserving tertiary students and providing internships to 50 unemployed heritage bursary graduates by March 2026.
- Promote awareness of national symbols by March 2026 by conducting 30 public activations; supplying 350 South African flags to government institutions, particularly schools and other beneficiaries; and hosting 5 workshops to enhance citizens' knowledge of national symbols.
- Increase public awareness of archival services by implementing an outreach programme and digitising 1 860 records over the medium term.
- Enhance access to information and foster a culture of reading by funding the construction of 22 new or modular community libraries by March 2026.
- Support the development, preservation, protection and promotion of heritage by:
  - publishing 3 gazettes per year on the standardisation of geographical names
  - producing 3 books documenting living human treasures by March 2026
  - creating exhibition content for 2 heritage legacy projects by March 2026
  - reviewing and analysing quarterly provincial reports on the progress of the resistance and liberation route programme by March 2026.

## Subprogrammes

- *Heritage Promotion* supports a range of heritage initiatives and projects, including the transformation of the heritage landscape, by conceptualising, equipping and operationalising legacy projects, the resistance and liberation heritage route and the relocation of statues; and, through the Bureau of Heraldry, registering and popularising national symbols by creating public awareness campaigns, promoting the national flag, coordinating the National Orders awards ceremony, and developing and reviewing heritage policies and legislation for the preservation, conservation and management of South African heritage.
- *National Archive Services* acquires, preserves and manages records with enduring value, and makes them accessible.
- *Heritage Institutions* funds and determines policy for declared cultural institutions and heritage bodies by ensuring that funds to these institutions are used to preserve, research, protect and promote heritage.
- *National Library Services* funds libraries and institutions such as the National Library of South Africa, the South African Library for the Blind and Blind South Africa, and develops related policy.
- *Public Library Services* transfers funds to provincial departments for conditional grant allocations to community library services for constructing and upgrading libraries, hiring personnel and purchasing library materials.
- *South African Heritage Resources Agency* transfers funds to the South African Heritage Resources Agency, which seeks to develop and implement norms and standards for managing heritage resources.
- *South African Geographical Names Council* transfers funds to the South African Geographical Names Council, an advisory body that facilitates name changes by consulting with communities to advise the Minister of Sport, Arts and Culture.
- *National Heritage Council* transfers funds to the National Heritage Council, which is mandated to enhance knowledge production on heritage and ensure the promotion and awareness of heritage.

Number of boxing practitioners licensed per year	Boxing development		802	1 098	900	1 000	1 000	1 000	1 000

#### Entity overview

Boxing South Africa was established in terms of the Boxing Act (2001), which mandates the entity to administer professional boxing; recognise amateur boxing; create and ensure synergy between professional and amateur boxing; and promote engagement and interaction between associations of boxers, managers, promoters and trainers.

Over the medium term, the entity will continue to focus on contributing to nation building, healthy lifestyles and social cohesion by promoting participation in boxing, especially among young people and women; strengthening the boxing regulatory environment; and ensuring the effective administration of the sport. In 2025/26, it aims to license 80 women boxers, train and develop 250 licensees, inspect 60 tournament venues and license 1 000 boxing practitioners at a projected cost of R23.9 million. Total expenditure over the period ahead is set to amount to R74.8 million.

The entity is set to receive 86.8 per cent (R64.9 million) of its revenue over the MTEF period through transfers from the department, increasing at an average annual rate of 4.2 per cent, and generate the remainder through fees for the sanctioning of boxing tournaments. Revenue and spending are expected to increase at an average annual rate of 4.3 per cent, from R23 million in 2024/25 to R26 million in 2027/28.

### Entity overview

The following heritage institutions were established in terms of the Cultural Institutions Act (1998) and derive their mandates from this act and the 1996 White Paper on Arts, Culture and Heritage: the Amazwi South African Museum of Literature, Die Afrikaanse Taalmuseum en -monument, Ditsong Museums of South Africa, Iziko Museums of South Africa, Freedom Park, the KwaZulu-Natal Museum, the Luthuli Museum, the National Museum, the Nelson Mandela Museum, the Robben Island Museum, the War Museum of the Boer Republics, the William Humphreys Art Gallery and the uMsunduzi Museum.

Heritage institutions will continue to focus on collecting, preserving, providing and promoting access to and awareness of South Africa's national heritage over the period ahead. This will mainly be done by hosting exhibitions as a means of encouraging educational and public outreach programmes and celebrating the diversity of the country's cultural and natural heritage. Over the next 3 years, heritage institutions plan to make the services offered by museums accessible to all by hosting 486 exhibitions and 192 302 school education outreach programmes to create awareness of museum services and celebrate the diversity of the country's cultural and natural heritage. To achieve these objectives, an estimated R1.2 billion over the medium term is allocated to the business development programme.

The institutions are set to receive 77.9 per cent (R3.3 billion) of their revenue over the period ahead through transfers from the department and the remainder through entrance fees, donor assistance and sponsorships. Revenue is set to increase in line with expenditure at an average annual rate of 9 per cent, from R1.1 billion in 2024/25 to R1.4 billion in 2027/28.

## Entity overview

The National Library of South Africa was established in terms of the National Library of South Africa Act (1998), which requires it to contribute to socioeconomic, cultural, educational, scientific and innovation development by collecting, recording and preserving the national documentary heritage, making it available and promoting an awareness and appreciation for it by fostering information literacy and facilitating access to the world's information resources. The South African Library for the Blind was established in terms of the South African Library for the Blind Act (1998) and is mandated to provide a national library and information services to blind and print-handicapped readers in South Africa.

In partnership with provincial library services, the National Library of South Africa is set to continue focusing on promoting a culture of reading, writing and literacy development by reprinting South African classics, hosting reading campaigns, and promoting and marketing the legal deposit of published documentary heritage. Expenditure for these activities is within an allocation of R11.6 million over the medium term through the *community library services grant*. The library also plans to digitise 139 000 heritage items and preserve and conserve 59 636 documentary heritage items over the period ahead, funded by allocations amounting to R85.7 million in the business development programme.

The South African Library for the Blind is funded through transfers from the department amounting to R117.8 million over the medium term. This is expected to enable it to produce 720 Braille book titles and 95 books for visually impaired people in alternative formats such as audio. These items will also be circulated for lending to the public. The library is allocated R33.5 million over the medium term through the *community library services grant* to manage the grant's monitoring and evaluation function, upgrade ICT infrastructure and software, support the establishment and maintenance of mini libraries in provinces, and promote a culture of reading among visually impaired people.

The libraries' total expenditure is set to increase at an average annual rate of 4.7 per cent, from R166.6 million in 2024/25 to R191 million in 2027/28. Transfers from the department account for 96.7 per cent (R563.3 million) of their revenue, increasing at an average annual rate of 4.8 per cent, from R170.5 million in 2024/25 to R196.1 million in 2027/28.

1. No historical data available.

### Entity overview

The National Arts Council derives its mandate from the National Arts Council Act (1997), which requires it to provide and encourage the provision of opportunities for people to practise the arts, foster the expression of a national identity and consciousness through the arts, provide historically disadvantaged artists with additional resources to give them greater access to the arts, address historical imbalances in the provision of infrastructure for the promotion of the arts, develop and promote the arts, and encourage artistic excellence.

The council endeavours to serve as a catalyst for positive change in the culture sector. Its ongoing focus is on cultivating emerging talent, promoting provincial equity and accessibility to the arts, providing continued support for established artists, and enhancing the capabilities of artists and arts organisations. To this end, over the medium term, an estimated 43 per cent (R172.5 million) of the council's budget is allocated to marginalised provinces and for entering into 30 memorandums of understanding for block bursaries.

As part of the council's commitment to fostering an inclusive arts environment, it plans to support initiatives aimed at promoting diversity in artistic expression, representation and audience engagement. As such, over the medium term, it plans to provide support to 29 indigenous art forms at a projected cost of R10.2 million.

Expenditure is expected to increase at an average annual rate of 4.6 per cent, from R123.4 million in 2024/25 to

R141.1 million in 2027/28. Revenue is expected to increase at an average annual rate of 2.8 per cent, from R129.7 million in 2024/25 to R141.1 million in 2027/28. Cabinet has approved a baseline increase of R117 million in 2025/26 for the creative industries stimulus. The council is set to receive 98.1 per cent (R513.5 million) of its revenue over the MTEF period through transfers from the department.

### Entity overview

The National Film and Video Foundation is governed in terms of the National Film and Video Foundation Act (1997), as amended by the Cultural Laws Amendment (2001). It is mandated to develop and promote the film and video industry in South Africa through the programmes it funds and carry out other enabling activities such as providing training to industry players, supporting and developing historically disadvantaged people in the audio-visual industry in line with South Africa's transformation agenda, increasing the number of people trained in scarce skills, and creating job opportunities in the film and video industry.

The foundation is focused on growing and developing the South African film industry while affording opportunities to historically marginalised and disadvantaged individuals to participate in it. As providing funding for content development in the film industry is at the core of the foundation's work, funding applications for feature films, documentaries, short films and television-format concepts are all considered.

Over the period ahead, the foundation plans to fund 105 South African films that are in development and 66 that are in production at an estimated cost of R204.3 million. In partnership with the Media Information and Communication Technologies Sector Education and Training Authority, over the medium term, the foundation plans to provide bursaries to 75 young people interested in studying film and provide 105 young people with opportunities to develop skills and empower themselves by gaining necessary workplace experience at an estimated cost of R54.9 million.

Cabinet has approved a baseline increase of R230 million in 2025/26 for the creative industries stimulus. As a result, expenditure and revenue are set to decrease at an average annual rate of 1.7 per cent, from R183.8 million in 2024/25 to R174.7 million in 2027/28. The foundation expects to receive 96.9 per cent (R712.5 million) of its revenue over the period ahead through transfers from the department and the remainder through interest.

## Entity overview

The National Heritage Council is a schedule 3A public entity established in terms of the National Heritage Council Act (1999) to preserve South African heritage as a priority for nation building and national identity. The council's focus over the period ahead will be on the pillars heritage conservation, cultural diplomacy, funding, advocacy,

education, development, transformation and strategic partnerships. Each of these represents a concerted effort to address longstanding challenges while leveraging emerging opportunities. The council is committed to expanding accessibility, promoting inclusivity and enhancing the visibility of heritage across communities.

The council will continue to preserve South Africa's living heritage and create awareness on cultural heritage and practices by funding community projects. It expects to distribute an estimated R20 million over the period ahead to at least 93 heritage projects through an open call for funding adjudicated by an independent panel. The council also plans to support 12 commemorative events over the MTEF period linked to the resistance and liberation heritage route at an estimated cost of R20 million, and 21 initiatives associated with living heritage at a projected cost of R10 million.

The council derives all of its revenue through transfers for the department. Expenditure and revenue are expected to increase at an average annual rate of 4 per cent, from R75.3 million in 2024/25 to R84.8 million in 2027/28.

### Entity overview

The Pan South African Language Board was established in terms of the Pan South African Language Board Act (1995) to develop South Africa's official languages, including the Khoi, Nama and San languages and South African Sign Language; promote multilingualism in South Africa; and investigate complaints about language rights and violations from any individual, organisation or institution.

The board plans to deliver 9 published dictionaries and complete 18 language-related stakeholder engagements each year over the medium term. Allocations to carry out this work are set to increase from R44.8 million in 2024/25 to R49.7 million in 2027/28. To develop dictionaries, transfer payments to the national lexicographical units will increase in line with inflation, from R28.3 million in 2024/25 to R32.1 million in 2027/28.

Total expenditure and revenue are expected to increase at an average annual rate of 5 per cent, from R130.4 million in 2024/25 to R150.8 million in 2027/28. The board is set to receive all of its revenue through transfers from the department, amounting to R431.7 million over the period ahead.

Number of skills training and development programmes conducted per year	Public engagement		68	71	72	72	72	76	76

### Entity overview

Performing arts institutions are schedule 3A public entities established in terms of the Cultural Institutions Act (1998). They are mandated to advance, promote and preserve the performing arts in South Africa, enhance the contribution of arts and culture to the economy, create job opportunities and create initiatives that enhance nation building. The following institutions receive annual transfers from the department: Artscape, Cape Town; the Playhouse Company, Durban; the Market Theatre, Johannesburg; the Performing Arts Centre of the Free State, Bloemfontein; the South African State Theatre, Pretoria; and the Mandela Bay Theatre Complex, Gqeberha.

In making performing arts more accessible to the public, the institutions will, over the medium term, focus on staging 1 292 productions, organising 78 festivals and conducting 224 training and development programmes that represent South Africa's cultural diversity. In support of these targets, an estimated R217.2 million over the medium term is allocated to the business development programme and R129.8 million to the public engagement programme. Expenditure is expected to increase at an average annual rate of 1 per cent, from R556.9 million in 2024/25 to R573.9 million in 2027/28.

The institutions are set to receive 88.9 per cent (R1.4 billion) of their revenue over the period ahead through transfers from the department, which they will augment with the revenue they derive mainly from ticket sales, venue hire and investment income. Total revenue is expected to increase at an average annual rate of 1.7 per cent, from R526.3 million in 2024/25 to R553.9 million in 2027/28.

Number of monuments and memorial sites rehabilitated and erected per year	Business development		24	5	4	4	4	4	4

### Entity overview

The South African Heritage Resources Agency is a schedule 3A public entity established in terms of the National Heritage Resources Act (1999). It is mandated to formulate national principles, standards and policies for the identification, recording and management of the national estate in terms of which heritage resource authorities and other relevant bodies must function.

The agency focuses on coordinating the identification, management, promotion and preservation of the national estate. In doing so, it assesses and approves permits for the development of heritage sites and reviews heritage impact assessment reports submitted by property developers. Over the period ahead, the agency plans to assess and grade 15 heritage resources, declare 12 and monitor and inspect 90 heritage resources at a projected cost of R4.6 million.

Total expenditure and revenue are set to decrease at an average annual rate of 15.9 per cent, from R143.6 million in 2024/25 to R85.6 million in 2027/28. This is attributed to the use of the deferred capital allocation in 2024/25 for security upgrades and fencing off the agency's heritage facilities to address vandalism, the Delville Wood memorial project, and the procurement of a new office building. The agency is set to receive 93.8 per cent (R229.6 million) of its revenue over the MTEF period through transfers from the department.

### Entity overview

The South African Institute for Drug-Free Sport was established in terms of the South African Institute for Drug-Free Sport Act (1997), as amended in 2024. The institute is mandated to promote participation in sport that is free from the use of prohibited substances or methods intended to artificially enhance performance. It is the custodian of anti-doping and ethics in South African sport and actively collaborates with colleagues in the rest of Africa to keep sport clean.

Over the period ahead, the institute plans to conduct 6 000 urine drug tests on South African athletes, complete 900 blood test in the athlete biological passport project, conduct 300 erythropoietin tests and have 300 elite athletes in the registered testing pool. The institute has budgeted an estimated R41.7 million over the period ahead to carry out these activities. Expenditure is set to increase at an average annual rate of 0.7 per cent, from R36.1 million in 2024/25 to R36.9 million in 2027/28.

The institute expects to receive 91.2 per cent (R97.3 million) of its revenue over the period ahead through transfers from the department and the balance through services rendered. Revenue is expected to increase at an average annual rate of 3.3 per cent, from R33.5 million in 2024/25 to R36.9 million in 2027/28.

## Vote purpose

*Promote and support the growth and development of an equitable, competitive and sustainable tourism sector, enhancing its contribution to national priorities.*

## Mandate

The mandate of the Department of Tourism, as outlined in the Tourism Act (2014), is to promote the growth and development of the tourism sector; promote quality tourism products and services; provide for the effective domestic and international marketing of South Africa as a tourist destination; enhance cooperation and coordination between all spheres of government in developing and managing tourism; and promote responsible tourism for the benefit of South Africa and for the enjoyment of all its residents and foreign visitors.

In recognition of tourism as a national priority with the potential to contribute significantly to economic development, the 2024 White Paper on the Development and Promotion of Tourism in South Africa provides for the promotion of domestic and international tourism. The national tourism sector strategy provides a blueprint for the sector to meet the National Development Plan's growth targets.

Number of capacity-building programmes implemented per year	Tourism Sector Support Services		10	4	5	5	2	2	2

## Expenditure overview

Over the medium term, the department will continue its efforts to protect and reignite the demand for tourism in South Africa. This is part of its ongoing work to ensure that the sector realises its potential in contributing to economic growth. To achieve this, it intends to focus on enhancing and maintaining core tourism assets and infrastructure while creating work opportunities, including by supporting tourism enterprises owned by historically disadvantaged individuals; and enhancing growth and development in the sector through various incentives.

Expenditure is set to increase at an average annual rate of 3.8 per cent, from R2.4 billion in 2024/25 to R2.7 billion in 2027/28. An estimated 53.4 per cent (R4.1 billion) of these funds is set aside for transfers and subsidies to South African Tourism for its operations and to promote South Africa as a top domestic and international destination for business and leisure travel.

### ***Enhancing and maintaining core tourism assets and creating work opportunities***

The *Working for Tourism* subprogramme in the *Destination Development* programme is a component of the expanded public works programme, which provides funding for infrastructure projects and skill-building initiatives. Activities carried out through the subprogramme involve enhancing and developing tourism infrastructure through employing labour-intensive methods aimed at benefiting unemployed women, young people and people with disabilities, and small, medium and micro enterprises (SMMEs). This will be given effect by continuing to carry out multiyear spatial planning and infrastructure projects that boost township and rural economies, and by providing non-financial assistance through offering skills development programmes. As such, over the next 3 years, the department aims to generate an estimated 4 200 job opportunities through the expanded public works programme. This will not only support growth in the tourism sector, but ensure that communities, particularly those near important landmarks and attractions in rural areas, benefit from them. A key project to be undertaken over the period ahead is the improvement of facilities at the Robben Island Museum, which is a world heritage site.

Expenditure for these activities is within the *Working for Tourism* subprogramme's allocation of R806.3 million over the medium term, representing 10.6 per cent of the department's total budget.

### ***Enhancing growth and development in the sector***

Funding through the *Tourism Incentive Programme* subprogramme in the *Tourism Sector Support Services* programme is geared towards establishing South Africa as a destination of choice, transforming the sector and accelerating growth. Related activities are carried out through the green tourism incentive programme, the Tourism Equity Fund, the Tourism Transformation Fund, the market access support programme and the tourism grading support programme. Privately owned tourism enterprises will be encouraged to embrace responsible tourism practices by installing solutions for sustainable energy and water consumption. To this end, the *Tourism Incentive Programme* subprogramme is allocated R623.2 million over the medium term, representing 8.2 per cent of the department's budget. It is anticipated that the work done through this programme will ease the strain on the country's limited water supply and power grid, and help enterprises gradually lower their operating expenses.

## Programme 2: Tourism Research, Policy and International Relations

### Programme purpose

Enhance the strategic policy environment, monitor the tourism sector's performance and enable stakeholder relations.

### Objectives

- Enhance the tourism sector's performance by monitoring and evaluating 3 tourism projects and initiatives over the medium term by:
  - evaluating the impact of the Women in Tourism programme
  - developing biannual monitoring performance reports for the tourism sector
  - developing 4 implementation reports for the tourism sector master plan
  - developing and implementing the second phase of the application system for the market access support programme.
- Encourage regional integration by implementing 4 outreach programmes with the diplomatic community over the next 3 years.

### Subprogrammes

- Tourism Research, Policy and International Relations Management* provides strategic direction, comprehensive administration and operational support services, research, and information and knowledge management services. This subprogramme also manages policy development and evaluation, and promotes sector transformation and responsible tourism.
- Research and Knowledge Management* oversees tourism research, knowledge management and impact evaluation of the sector.
- Policy Planning and Strategy* oversees and guides policy and strategy development for the tourism sector, and ensures the efficient and effective management of stakeholder relations.
- South African Tourism* stimulates sustainable international and domestic demand for South African tourism experiences, and regulates the standard of tourism facilities and services.
- International Relations and Cooperation* drives South Africa's interests through international relations and cooperation.

## Programme 3: Destination Development

### Programme purpose

Facilitate and coordinate tourism destination development.

## Objectives

- Diversify tourism offerings and enhance visitor experience in identified priority areas by implementing 3 destination enhancement and route development projects over the medium term, which entails:
  - implementing the budget resort network and brand concept
  - managing a pipeline of nationally prioritised greenfield and brownfield tourism investment opportunities
  - facilitating 2 digital platforms to promote investment in tourism.
- Maintain exceptional site quality by supporting destination enhancement initiatives over the medium term by:
  - implementing infrastructure maintenance and beautification programmes in 4 provincial state-owned attractions (in Gauteng, KwaZulu-Natal, North West and Northern Cape)
  - monitoring the implementation of 5 community-based tourism projects
  - undertaking tourism enhancement projects at the Robben Island Museum.
- Contribute to economic growth and sustainable livelihoods by creating a targeted 4 200 work opportunities through Working for Tourism projects over the medium term.

## Subprogrammes

- *Destination Development Management* provides strategic leadership and administrative support to the programme.
- *Tourism Enhancement* increases the competitiveness of South Africa's tourism industry.
- *Destination Planning and Investment Coordination* ensures that tourism infrastructure supports growth in the sector.
- *Working for Tourism* facilitates the development of tourism infrastructure projects as part of the expanded public works programme through labour-intensive methods targeted at young people, women, unemployed people, people with disabilities and SMMEs.

## Programme 4: Tourism Sector Support Services

### Programme purpose

Enhance transformation, increase skill levels and support the development of the sector to ensure that South Africa is a competitive tourism destination.

### Objectives

- Encourage resource efficiency and cleaner production by providing compliance and resilience training to 150 SMMEs over the medium term through the business support programme.

- Facilitate skills development by implementing 6 capacity-building programmes across the sector over the medium term.
- Support tourism SMMEs over the medium term by:
  - training 750 SMMEs on occupational health and safety norms and standards in all provinces
  - implementing 3 business development incubation interventions
  - implementing the compliance and resilience support programme for 150 tourism SMMEs
  - implementing the green tourism incentive programme.

## Subprogrammes

- *Tourism Sector Support Services Management* provides administrative support to the programme.
- *Tourism Human Resource Development* manages and facilitates the efficient management and implementation of human resource development initiatives for the tourism sector.
- *Enterprise Development and Transformation* manages and facilitates inclusive participation and sustainability in the tourism sector.
- *Tourism Visitor Services* manages and coordinates the integrity of information to facilitate accurate information for travelling.
- *Tourism Incentive Programme* manages the establishment of capital and non-capital tourism incentives to promote and encourage the development and growth of the tourism sector.

### Entity overview

The Tourism Act (2014) mandates South African Tourism to market South Africa internationally and domestically as a preferred tourism and business events destination while monitoring the performance of the tourism sector. To support this, over the medium term, the entity will continue to focus on marketing South Africa to domestic, regional and international markets as a premium tourist destination for business and leisure. Carrying out these activities is projected to cost R2.8 billion over the medium term in the leisure tourism marketing programme.

The entity will aim to drive business tourism over the period ahead by bidding to host events such as corporate meetings, conferences and exhibitions in all provinces, including in rural areas and small towns. These initiatives are geared towards increasing tourism in a variety of industries, including leisure travel, manufacturing, agriculture, finance, wholesale and retail trade, and mining and minerals. To this end, an allocation of R788.2 million over the MTEF period in the business events programme is earmarked for hosting a targeted 345 international and regional business events.

Expenditure is expected to increase at an average annual rate of 5.5 per cent, from R1.4 billion in 2024/25 to R1.7 billion in 2027/28. This is mainly driven by spending on goods and services, which accounts for an estimated 85.3 per cent (R4.1 billion) of total expenditure over the medium term, the bulk of which is designated for promoting South Africa as a top travel and business destination.

The entity expects to derive 94.5 per cent (R4.5 billion) of its revenue over the medium term through transfers from the department. The remaining revenue will be sourced from the private sector through voluntary levies, income from grading fees and exhibitions, and interest on investments.

### Programmes/Objectives/Activities

Executive authority Minister of Trade, Industry and Competition  
Accounting officer Director-General of Trade, Industry and Competition  
Website [www.thedti.gov.za](http://www.thedti.gov.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

## Vote purpose

Lead economic development policy formulation and planning. Facilitate access to sustainable economic activity and employment for all South Africans through an understanding of the economy, knowledge of economic opportunities and potential, and anticipation of future economic trends. Catalyse economic transformation and development, and provide a predictable, competitive, equitable and socially responsible environment for investment, enterprise and trade for economic citizens. Contribute to achieving government's vision of an adaptive and restructured economy characterised by accelerated economic growth, employment creation and greater equity.

## Mandate

The Department of Trade, Industry and Competition derives its mandate from a broad legislative framework, which includes the:

- Industrial Development Act (1940)
- Manufacturing Development Act (1993)
- Competition Act (1998), as amended
- International Trade Administration Act (2002)
- Broad-based Black Economic Empowerment Act (2003)
- Companies Act (2008)
- Consumer Protection Act (2008)

## Expenditure overview

Over the next 3 years, the department will continue to focus on implementing the reimagined industrial strategy, which provides a multifaceted approach to industrial development and emphasises building partnerships with the private sector to secure investment and create jobs. This entails supporting the implementation of the key interventions of South Africa's economic reconstruction and recovery plan by focusing on providing industrial finance, developing industrial infrastructure and enhancing competitiveness and localisation.

Total expenditure is expected to increase at an average annual rate of 4.4 per cent, from R9.4 billion in 2024/25 to R10.7 billion in 2027/28, driven by spending in the *Incentives* programme, mainly to disburse funds for industrial assistance. Spending in the programme is expected to increase at an average annual rate of 10.7 per cent, from R4.2 billion in 2024/25 to R5.7 billion in 2027/28.

The department will receive additional funding of R1.3 billion in 2025/26 to continue creating work opportunities through the presidential employment initiative. Despite this additional allocation, spending in the *Transformation and Competition* programme is expected to decrease at an average annual rate of 25.8 per cent, from R1.8 billion in 2024/25 to R724 million in 2027/28. This is attributable to allocation for the Small Enterprise Finance Agency moving from the Department of Trade, Industry and Competition to the Department of Small Business Development over the medium term.

### *Providing industrial finance through incentives*

Activities in the *Incentives* programme will continue to be aimed at supporting initiatives that enhance competition, as outlined in the economic reconstruction and recovery plan. This will be done through growing sustainable and competitive enterprises by providing direct and indirect industrial financing. Of the R16.3 billion allocated to incentive schemes over the period ahead, manufacturing development incentives account for 57.4 per cent (R9.3 billion), followed by incentives in infrastructure investment support (R3.6 billion) and services sector development (R3.2 billion). Through these incentives, it is expected that 18 000 job opportunities will be created over the MTEF period.

Through the *Incentives* programme, the department will also continue to financially support a targeted 225 clothing and textile firms through the clothing and textiles competitiveness programme, which has a budget of R1.7 billion over the period ahead. Through its incentive programmes, including the clothing and textiles competitiveness programme, the department plans to leverage investments from the private sector amounting to R30 billion over the medium term.

In partnership with the Department of Mineral and Petroleum Resources, the department plans to approve and implement the regional critical minerals strategy, which aims to increase value addition in the energy and related sectors and support a just transition to a low-carbon economy. For this purpose, R1 billion is set aside over the medium term for the industrial development support programme, an incentive scheme that aims to increase and stimulate participation and investment in infrastructure by firms in selected manufacturing sectors. The purpose of the incentive is to enhance the local production and assembly of new-energy vehicles, batteries and projects focused on operational efficiency and competitiveness in new manufacturing projects. The incentive is expected to attract R30 billion in investment from the private sector.

### ***Developing industrial corridors***

The economic reconstruction and recovery plan identifies infrastructure development as a catalyst for investment. In working towards this over the medium term, the department will continue to subsidise bulk infrastructure and top structures (factories) in special economic zones and roll out infrastructure to revitalise targeted industrial parks. These subsidies are provided through the *Infrastructure Investment Support* subprogramme in the *Incentives* programme. The subprogramme is allocated R3.6 billion over the medium term, increasing at an average annual rate of 20 per cent, from R542.7 million in 2024/25 to R1.2 billion in 2027/28. Of this, R2.9 billion is allocated for special economic zones, R153.2 million for industrial parks and R482.3 million for critical bulk infrastructure such as water, electricity and sewerage connections. To encourage investment, the department also aims to provide 420 interventions to facilitate and reduce red tape for investors through its one-stop shop initiative at a projected cost of R56.1 million over the medium term in the *Investment and Spatial Industrial Development* programme.

### ***Enhancing industrial competitiveness and localisation***

Over the next 3 years, the department will strive to improve industrial competitiveness at the firm and sector levels through conditions on financial incentives and local procurement policies that encourage industry to use local products. This will be done through implementing programmes in various sectors, including but not limited to maritime, aerospace and defence; electro-technical industries and white goods; construction; chemicals, cosmetics and plastics; and pharmaceuticals. This work will be carried out through an allocation of R2.9 billion over the medium term in the *Industrial Competitiveness* subprogramme in the *Sectors* programme.

The department will also continue to coordinate the implementation of the recently approved medical devices sector master plan in addition to existing master plans for the automotive, poultry, sugar, steel and metal fabrication, clothing and textiles, and furniture sectors. Through its competition and transformation interventions, the department anticipates leveraging R24 billion over the medium term in investments from the private sector.

## Programme 3: Investment and Spatial Industrial Development

### Programme purpose

Support foreign direct investment flows and promote domestic investment by providing a one-stop shop for investment promotion, investor facilitation and aftercare support for investors, and increase participation in industrialisation.

### Objectives

- Increase the quality and quantity of South Africa's fixed investments over the medium term by:
  - marketing and promoting the country to ensure investment opportunities through dedicated investment promotion, facilitation and aftercare support
  - coordinating and leading the establishment of one-stop shops on behalf of government to facilitate investment
  - coordinating and leading the reform of the investment climate with the World Bank on the ease of doing business
  - developing a pipeline of potential projects and contributing to South Africa being a preferred destination for investment
  - undertaking aftercare forums with investors to retain and expand investment.
- Provide a dedicated service to all investors over the medium term by:
  - facilitating the entire investment value chain
  - developing an investment pipeline of possible projects through lead creation, marketing, project development, facilitation and aftercare.
- Provide specialist advisory services and policy advocacy to improve the investment climate by fast-tracking and unblocking investor issues through reducing bureaucratic red tape over the medium term.
- Facilitate economic transformation to promote industrial development, investment, competitiveness and employment creation by implementing a strategy for special economic zones and the revitalisation of 16 industrial parks by March 2026.

### Subprogrammes

- *Investment Promotion* facilitates an increase in the quality and quantity of foreign direct investment, domestic investment and outward investment by providing support for investment attraction, targeted lead generation and recruitment.

- *Investment and Interdepartmental Clearing House* promotes and facilitates investment and provides support services to the investment and interdepartmental clearing house, provides specialist advisory services, fast-tracks and unblocks processes, and reduces bureaucratic red tape for investors.
- *Investor Support and Aftercare* provides specialist advisory services through research, information marketing, aftercare and policy advocacy to facilitate new investment and retain and expand existing investment.
- *Spatial Industrial Development* promotes regional industrial development in targeted areas such as special economic zones, industrial parks and townships.

## Programme 4: Sectors

### Programme purpose

Design and implement policies, strategies and programmes to strengthen the ability of manufacturing and other sectors of the economy to create decent jobs and increase value addition and competitiveness in both domestic and export markets.

### Objectives

- Upscale industrial policy through the development and implementation of the reimagined industrial strategy using the master plans as a key instrument and, as a result, achieve increased industrialisation, localisation and transformation on an ongoing basis.
- Develop policies, strategies and programmes for manufacturing and related sectors of the economy to contribute to the direct and indirect creation of decent employment, value-added services and competitiveness in domestic and export markets on an ongoing basis.
- Ensure that technical infrastructure policies and institutions (including standards, quality assurance, accreditation and metrology) play a strategic role in industrial policy on an ongoing basis, particularly in dealing with unsafe and poor-quality imports and promoting access to high-value export markets.
- Respond to the commercial imperatives of climate change and environmental concerns, and the economic opportunities that arise, through the promotion of green industries and resource efficiency on an ongoing basis.
- Leverage large-scale public procurement to promote industrial development through the national industrial participation programme on an ongoing basis.

### Subprogrammes

- *Industrial Competitiveness* develops policies, strategies and programmes to strengthen the ability of manufacturing and other value-added sectors to create decent jobs and increase the addition of value in these sectors and competitiveness in domestic and export markets.
- *Customised Sector Programmes* develops and implements high-impact sector strategies focused on manufacturing and other value-added sectors to create decent jobs and increase the addition of value and competitiveness in domestic and export markets, as set out in the reimagined industrial strategy.

## Programme 5: Regulation

### Programme purpose

Develop and implement coherent, predictable and transparent regulatory solutions that facilitate easy access to redress and efficient regulation for economic citizens.

## Objectives

- Increase access to economic opportunities for small businesses and historically disadvantaged citizens on an ongoing basis by:
  - developing and reviewing legislation, policies and regulations
  - conducting impact assessments of legislation, policies and regulations on businesses and economic citizens.
- Develop efficient regulation to reduce regulatory burdens on businesses and increase confidence and certainty in South African business regulation on an ongoing basis by:
  - developing and reviewing legislation, policies and regulations
  - conducting impact assessments of legislation, policies and regulations on businesses and economic citizens.
- Create a business regulatory environment that promotes competitive, fair and efficient markets on an ongoing basis by:
  - developing and reviewing legislation, policies and regulations
  - conducting impact assessments of legislation, policies and regulations on businesses and economic citizens.
- Provide access to redress for economic citizens to increase market confidence on an ongoing basis by:
  - conducting research on the impact of legislation on economic citizens
  - developing and reviewing related legislation, policies and regulations
  - conducting impact assessments of legislation, policies and regulations on businesses and economic citizens.
- Promote an awareness of rights, duties and responsibilities to increase activism and public participation by conducting capacity-building sessions, workshops, and education and awareness campaigns on an ongoing basis.
- Share and exchange regulatory experience with partners and stakeholders nationally and internationally to promote simple, appropriate and effective regulatory solutions by holding consultations, seminars and conferences on policy issues on an ongoing basis.

## Subprogrammes

- *Policy and Legislative Development* develops policies, laws and regulatory frameworks.
- *Enforcement and Compliance* analyses trends and conducts socioeconomic impact assessments for policies, legislation and market surveys; implements legislation on matters pertaining to liquor; monitors and evaluates the effectiveness of regulation; and oversees the performance of the department's regulatory entities (the Companies and Intellectual Property Commission, the Companies Tribunal, the National Consumer Commission, the National Consumer Tribunal, the National Credit Regulator, the National Gambling Board and the National Lotteries Commission).
- *Regulatory Services* oversees the development of policies, laws and regulatory frameworks; oversees the implementation of the division's mandate; and provides strategic support to the programme's business units in line with legislation and applicable governance systems.

## Programme 6: Incentives

### Programme purpose

Stimulate and facilitate the development of sustainable and competitive enterprises through the efficient provision of effective and accessible incentive measures that support national priorities.

### Objectives

- Support industrial development that enhances productivity and bolsters competitiveness on an ongoing basis by:
  - designing, administering, monitoring and evaluating incentive programmes based on industrial policies and sector strategies
  - providing financial support in labour-intensive sectors.
- Develop world-class economic infrastructure by supporting industrial parks, special economic zones and other infrastructure that contributes to accelerated growth for manufacturing and internationally traded services on an ongoing basis.

### Subprogrammes

- *Broadening Participation and Industrial Incentives* provides incentive programmes that promote broader participation in the mainstream economy by businesses owned by individuals from historically disadvantaged communities and marginalised regions. This subprogramme comprises the black industrialist programme, the support programme for industrial innovation and the technology and human resource industry programme.
- *Manufacturing Incentives* provides incentives to promote additional investment in the manufacturing sector. The manufacturing investment cluster comprises the manufacturing competitiveness enhancement programme, the projects feasibility programme, the automotive investment scheme, the export marketing and investment assistance scheme, the sector-specific assistance scheme and the section 12I tax incentive scheme.
- *Services Investment Incentives* provides incentive programmes that promote increased investment and job creation in the services sector. These include incentive schemes such as the global business services programme and the film and television production programme for South African and foreign productions.
- *Infrastructure Investment Support* provides grants for 2 industrial infrastructure initiatives (special economic zones and the critical infrastructure programme) aimed at enhancing infrastructure and industrial development and increasing investment and export of value-added commodities.
- *Product and Systems Development* reviews, monitors and develops incentive programmes to support the reimagined industrial strategy, and develops sector strategies to address market failures.

- *Strategic Partnership and Customer Care* facilitates access to targeted enterprises by reviewing the success of incentive schemes and improving them where possible.

## Programme 7: Export

### Programme purpose

Increase export capacity and support direct investment flows through targeted strategies and an effectively managed network of foreign trade offices.

### Objectives

- Promote the implementation of the African Continental Free Trade Area to increase South Africa's exports to the rest of the continent on an ongoing basis.
- Contribute to strengthening economic diplomacy with South Africa's largest and potential trading partners on an ongoing basis.
- Contribute to reducing reliance on a small domestic market and transitioning to an export-oriented economy by increasing exports on an ongoing basis.
- Contribute to industrialisation, transformation and building a capable state by expanding and improving the effectiveness of export measures and implementing new export initiatives on an ongoing basis.

### Subprogrammes

- *African Bilateral Economic Relations* facilitates deeper and broader bilateral trade and investment relations with African economies and supports the deepening of regional integration through an outward investment-led trade approach.

- *Export Promotion and Marketing* promotes the export of South African value-added goods and services to increase market share in targeted high-growth markets and sustain market share in traditional markets.
- *Trade and Investment Foreign Services Management Unit* promotes trade and investment, and administers and provides corporate services to the department's network of foreign economic representatives to enable South African businesses to access global markets.
- *Export Development and Support* manages the national exporter development programme, which is designed to contribute to positioning South Africa as a reliable trade partner and improve and expand the country's exporter base.

## Programme 9: Research

### Programme purpose

Undertake economic research, contribute to the development of trade and industrial policies, and guide policy, legislative and strategy processes to facilitate inclusive growth.

### Objectives

- Coordinate job drivers, sector or spatial projects and the implementation of the new growth path for job creation, inclusive growth, industrialisation and social inclusion by regularly reviewing systemic obstacles over the medium term.
- Increase employment at the sectoral and workplace levels by facilitating social dialogue and implementing social accords over the medium term.
- Support productivity, innovation and entrepreneurship by engaging in public policy forums over the medium term.
- Promote the development of evidence-based economic policy, industrial strategies and intervention measures by conducting in-depth research on an ongoing basis.

### Subprogrammes

- *Economic Research and Policy Coordination* undertakes economic research, contributes to the development of policy options and guides policy through consultation with stakeholders.
- *Macroeconomic and Microeconomic Policy* evaluates and develops macroeconomic and microeconomic policy options to achieve inclusive growth and promote decent work outcomes, productivity, entrepreneurship and innovation.
- *Growth Path and Decent Work* develops and coordinates master plans and constituency-based interventions on behalf of business, labour and communities to support the creation of decent work, entrepreneurship and innovation.

## Entities

### Companies and Intellectual Property Commission

#### Selected performance indicators

**Table 39.24 Companies and Intellectual Property Commission performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of proactive investigations in response to contraventions of the Companies Act (2008) into companies identified in the state capture commission report per year	Business regulations and reputation	Outcome 1: Increased employment and work opportunities	— <sup>1</sup>	4	4	8	8	8	8
Number of non-binding work products issued per examiner per year	Innovation and creativity promotion	Outcome 3: Structural reforms to drive growth and competitiveness	— <sup>1</sup>	24	24	24	24	24	24
Number of training initiatives offered to small-scale enterprises per year	Innovation and creativity promotion		— <sup>1</sup>	6	4	4	4	4	4

1. No historical data available.

#### Entity overview

The Companies and Intellectual Property Commission was established in terms of section 185 of the Companies Act (2008) to register companies, close corporations, cooperatives, trademarks, patents, designs and copyright, and enforce related rules and regulations.

Over the medium term, the commission will continue to focus on creating a reputable business environment by regulating companies' compliance with regulations and the intellectual property environment. The commission will also aim to continue to improve its capabilities to protect intellectual property, increase knowledge and awareness of intellectual property rights, and promote compliance with company law and relevant legislation. To this end, over the period ahead, the commission plans to initiate 24 proactive investigations into companies identified in the state capture commission report for alleged contravention of the Companies Act (2008). Expenditure for these activities is within an allocation of R271.3 million over the medium term within the business regulations and reputation objective. The introduction of more regulations into the informal sector make it necessary for the commission to increase education and awareness campaigns on compliance and intellectual property. To this end, it plans to offer 12 training initiatives to small-scale enterprises at a cost of R1.6 million over the medium term.

Expenditure is expected to increase at an average annual rate of 4.6 per cent, from R718.9 million in 2024/25 to R823.3 million in 2027/28, driven by investment in ICT infrastructure and digitisation projects planned to improve operational efficiency. Compensation of employees accounts for an estimated 61.6 per cent (R1.5 billion) of total expenditure, increasing at an average annual rate of 4.6 per cent, from R443.2 million in 2024/25 to R507.2 million in 2027/28.

The commission expects to derive 93.4 per cent (R2.4 billion) of its revenue from fees charged for the registration of companies, cooperatives, trademarks, patents, copyrights and annual returns. Total revenue is projected to increase at an average annual rate of 7.2 per cent, from R718.9 million in 2024/25 to R885.1 million in 2027/28, driven by an estimated increase in company registrations from 950 319 in 2024/25 to 1 443 111 in 2027/28.

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Percentage of decisions and orders issued on opposed applications within 40 working days of the last set-down or final submission by parties, whichever is applicable, per year	Adjudicate and resolve disputes in a credible and just manner	Outcome 9: Economic transformation for a just society	100% (17)	100% (17)	100% (19)	95%	95%	95%	95%
Percentage of decisions and orders issued on unopposed applications within 30 working days of the last date of submission by parties per year	Adjudicate and resolve disputes in a credible and just manner		97.4% (114/117)	89.6% (129/144)	89.8% (185/206)	95%	95%	95%	95%
Percentage of cases finalised in terms of alternative dispute resolution within 25 working days of the date of final submission by parties per year	Adjudicate and resolve disputes in a credible and just manner		100% (10)	100% (9)	100% (7)	95%	95%	95%	95%

### Entity overview

The Companies Tribunal was established in 2011 as a juristic person in terms of the Companies Act (2008) and became operational in 2012. It is mandated to mediate and adjudicate disputes between companies and make orders in a manner that is simple, ethical, efficient, equitable, transparent, accountable and impartial without fear, favour or prejudice.

Over the period ahead, the tribunal will continue to contribute to the creation of a just, fair and ethical regulatory business environment by facilitating the resolution of company disputes through mediation, conciliation and arbitration. To achieve this, the tribunal aims to increase applicants' uptake of the case management system while issuing 95 per cent of decisions and orders within prescribed timeframes at a projected cost of R14.6 million over the medium term.

Compensation of employees accounts for an estimated 59 per cent (R67.7 million) of the tribunal's budget over the period ahead, increasing at an average annual rate of 8.7 per cent, from R18.5 million in 2024/25 to R23.8 million in 2027/28. This is due to an expected increase in personnel from 15 in 2024/25 to 24 in 2027/28.

The tribunal expects to derive 88.8 per cent (R99.9 million) of its revenue over the medium term through departmental transfers and generate the remainder through interest. Expenditure and revenue are expected to increase at an average annual rate of 5.9 per cent, from R33.2 million in 2024/25 to R39.3 million in 2027/28.

### Entity overview

The Competition Commission is a statutory body constituted in terms of the Competition Act (1998), as amended. It is empowered to investigate, control and evaluate restrictive business practices, including the abuse of dominant positions and mergers, and to promote the advocacy of competition issues to achieve equity and efficiency in the South African economy.

Over the medium term, the commission will continue to focus on enforcing competition laws to investigate, control and evaluate restrictive business practices and enhance competition regulation. To this end, it intends to initiate 6 market inquiries in identified economic sectors, complete 30 cartel investigations in priority sectors and initiate 17 cases of abuse of dominance and restrictive behaviour in prioritised sectors. Over the medium term, an estimated R134.8 million is set aside to conduct market inquiries in the digital and fresh produce sectors, R144.5 million is earmarked to complete cartel investigations and R154.2 million is allocated for initiating cases on the abuse of dominance.

As a result of the commission's organisational review and in line with its efforts to strengthen internal capacity, the number of personnel is set to increase from 273 in 2024/25 to 279 in 2027/28. As such, spending on compensation of employees, the commission's main cost driver, is projected to increase at an average annual rate of 5.2 per cent, from R326.5 million in 2024/25 to R380.3 million in 2027/28.

Total expenditure is expected to decrease at an average annual rate of 4.4 per cent, from R650.2 million in 2024/25 to R568.9 million in 2027/28, due to a reduction in the use of consultants as the commission continues to build internal capacity. The commission is set to derive 83.1 per cent (R1.3 billion) of its revenue over the medium term through transfers from the department and the remainder through fees for filing mergers and acquisitions.

### Entity overview

The Competition Tribunal is established in terms of the Competition Act (1998) to promote and maintain competition in South Africa by adjudicating matters pertaining to restrictive practices, the abuse of dominant positions and mergers. The tribunal's work supports national and departmental priorities aligned with economic transformation, job creation and the facilitation of a capable, ethical and developmental state.

Over the medium term, the tribunal will focus on building internal capacity to adjudicate cases in a timely, responsive and reliable manner. For this work, expenditure in the responsive and reliable adjudication programme is expected to account for 52.5 per cent (R112.2 million) of total spending over the medium term. Spending on compensation of employees is expected to increase at an average annual rate of 1 per cent, from R49.3 million in 2024/25 to R50.8 million in 2027/28. Total expenditure is expected to increase marginally at an average annual rate of 0.1 per cent, from R71 million in 2024/25 to R71.2 million in 2027/28.

The tribunal is set to derive 63.7 per cent (R132.6 million) of its revenue over the medium term through transfers from the department and the remainder through fees for merger applications. Revenue is expected to be in line with projected expenditure.

## Programmes/Objectives/Activities

## Export Credit Insurance Corporation

### Selected performance indicators

**Table 39.40 Export Credit Insurance Corporation performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Value of approved transactions per year	Contribute to trade facilitation	Outcome 7: Increased investment, trade and tourism	US\$249.9m	US\$509m	— <sup>1</sup>	US\$570m	US\$580m	US\$590m	US\$600m
Number of approved transactions per year	Contribute to trade facilitation		4	3	— <sup>1</sup>	4	4	4	4
Approved transactions within expanded sectoral coverage per year	Contribute to trade facilitation		— <sup>2</sup>	US\$8.2m	US\$8.3m	US\$80m	US\$90m	US\$100m	US\$90m
Number of companies benefiting from the export passport programme per year	Contribute to trade facilitation		— <sup>2</sup>	— <sup>2</sup>	— <sup>2</sup>	7	8	9	10

1. No approval as projects are delayed due to low economic activity in countries where investments are facilitated.

2. No historical data available.

### Entity overview

The Export Credit Insurance Corporation was established in terms of the Export Credit and Foreign Investments Insurance Act (1957), as amended. It is mandated to provide political and commercial risk insurance on behalf of government for the facilitation of export trade and cross-border investments. By providing comprehensive export credit and investment insurance solutions to South African exporters doing business in risky sectors or countries, the corporation contributes to the expansion of exports, economic growth and job creation.

Over the medium term, the corporation will continue to focus on attracting business from new and existing customers to facilitate an increase in exports and cross-border investment. For this purpose, the corporation has set aside R100.9 million to approve 12 projects (transactions) worth a total of US\$1.8 billion. In addition, 27 export companies are set to benefit from the export passport training programme, a joint initiative funded by partners including the Department of Trade, Industry and Competition, the Industrial Development Corporation and the National Empowerment Fund. The corporation also expects a significant increase in short-term exposure following the launch of its trade credit product and the export passport insurance facility in 2024/25. As a result, approved transactions in the expanded sectoral offering are set to increase from US\$80 million in 2024/25 to US\$90 million by 2027/28.

Total expenditure is expected to increase at an average annual rate of 24.1 per cent, from R350.7 million in 2024/25 to R670.8 million in 2027/28, mainly due to an increase in insurance service and finance expenses as these are dependent on the size of projects underwritten and changes in the discount curve. Revenue is expected to decrease at an average annual rate of 8.8 per cent, from R1.9 billion in 2024/25 to R1.4 billion in 2027/28, mainly because of the anticipated decrease in foreign exchange gains over the medium term.

## Programmes/Objectives/Activities

Value of funding disbursed per year	Administration		R7.2bn	R17.8bn	R15.9bn	R21.4bn	R22bn	R23bn	R24bn
Number of jobs expected to be created/saved from committed funds per year	Administration		27 110	34 035	17 826 <sup>1</sup>	34 023	35 030	36 067	37 134
Value of funds committed and facilitated for black industrialists per year	Administration		R3.2bn	R7.6bn	R10bn	R7.4bn	R8.6bn	R10bn	R11.6bn
Value of funds committed and facilitated for black-owned businesses and businesses with broad-based ownership per year	Administration		R6.5bn	R10.7bn	R13bn	R11.9bn	R13.6bn	R15.5bn	R17.7bn
Value of funds committed and facilitated for women entrepreneurs per year	Administration		R1.1bn	R1.1bn	R11.4bn	R3.5bn	R4bn	R4.5bn	R5.1bn
Value of funds committed and facilitated for youth entrepreneurs per year	Administration		R400m	R501m	R456m	R1.5bn	R1.7bn	R1.9bn	R2.1bn
Value of funds committed and facilitated for businesses that support priority sectors and master plans per year	Administration		R22bn	R32.5bn	R42.2bn	R24.9bn	R27.3bn	R29.8bn	R32.5bn
Value of funding approved with agreements signed for businesses in spatial priorities, including special economic zones and industrial zones, per year	Administration		R1.1bn	R2.4bn	R36.8bn	R16.7bn	R18.2bn	R19.8bn	R21.5bn

1. Projects were delayed due to low economic activity in countries where investments are facilitated.

### Entity overview

The Industrial Development Corporation is a development finance institution established in terms of the Industrial Development Act (1940) to lead the development of industrial capacity by investing in individual business enterprises, and by acting as a catalyst for the creation or revitalisation of industries. The corporation's mandate includes proactively maximising its development impact through driving an ambitious programme of inclusive and sustainable employment to create and improve industrialisation in South Africa and the region.

Over the next 3 years, the corporation plans to contribute to the creation of employment and inclusive economic growth by facilitating investment worth R175.3 billion. This investment will be leveraged through R30.2 billion set to be provided to black industrialists; R66.1 billion earmarked for companies owned by historically disadvantaged groups, including women and young entrepreneurs; and R149.1 billion aimed at supporting businesses operating in targeted industries such as manufacturing, agriculture and agro-processing, mining and minerals beneficiation, as well as in special economic zones that promote localisation. This is expected to lead to the creation or retention of almost 108 231 jobs over the period ahead.

Expenditure is expected to increase at an average annual rate of 0.8 per cent, from R20.3 billion in 2024/25 to R20.8 billion in 2027/28, in line with the expectation that disbursements will be low due to projects in certain countries being delayed. Revenue is expected to increase at an average annual rate of 4.1 per cent, from

R28.4 billion in 2024/25 to R32.1 billion in 2027/28. The corporation expects to generate 57.6 per cent (R50.9 billion) of its revenue over the medium term through interest income from loans and other revenue streams such as dividends from equity investments. The sale of goods and services by the corporation's subsidiaries accounts for the remaining 42.4 per cent (R38.2 billion) of revenue.

### Entity overview

The International Trade Administration Commission was established in terms of section 7 of the International Trade Administration Act (2002). It is mandated to foster economic growth and development, raise income levels and promote investment and employment in South Africa and the common customs area by establishing an efficient and effective administration system for international trade.

Over the period ahead, the commission will continue to conduct customs tariff investigations, institute trade remedies and provide import and export controls by regulating the movement of specific goods across South Africa's borders. It will also conduct trade remedy investigations in accordance with policy through domestic and international law, and set tariffs to promote domestic manufacturing activity, employment retention and creation and international competitiveness. To achieve these objectives over the next 3 years, the commission plans to issue 16 000 import and 12 000 export permits per year, conduct 120 scheduled container inspections and 1 800 unscheduled container inspections per year, and initiate investigations on 80 per cent of new anti-dumping cases.

As the commission's work is labour intensive, compensation of employees constitutes an estimated 81.5 per cent (R310.3 million) of its spending over the period ahead. Total expenditure is expected to increase at an average annual rate of 4.4 per cent, from R117 million in 2024/25 to R132.9 million in 2027/28. Transfers

from the department account for an estimated 97.1 per cent (R371.5 million) of the commission's revenue over the period ahead. Revenue is set to increase in line with expenditure.

### Entity overview

The National Consumer Commission was established in terms of section 85 of the Consumer Protection Act (2008) and has jurisdiction across South Africa. The commission conducts investigations against suppliers who allegedly engage in prohibited conduct; promotes the resolution of disputes between consumers and suppliers; and promotes compliance with the act through advocacy, education and awareness.

Over the medium term, the commission will continue to focus on enforcing compliance with the act by ensuring that cases of noncompliance by suppliers are investigated and prosecuted. To minimise noncompliance and ensure that consumers have greater awareness of their rights, the commission plans to conduct 105 education and awareness campaigns over the period ahead. To ensure that consumers receive redress over the period ahead, the commission intends to finalise 95 per cent of investigations and finalise further enforcement action against noncompliant suppliers. The commission also plans to roll out the opt-out registry over the medium term to protect consumers against unwanted marketing at a projected cost of R16.1 million.

Compensation of employees accounts for an estimated 66.3 per cent (R155.6 million) of projected spending over the medium term. Total expenditure is expected to increase at an average annual rate of 3.6 per cent, from R74.1 million in 2024/25 to R82.4 million in 2027/28. The commission expects to derive 93.5 per cent (R222.3 million) of its revenue over the next 3 years through transfers from the department and the remainder through interest on investments.

## National Consumer Tribunal

### Selected performance indicators

**Table 39.56 National Consumer Tribunal performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Average number of days from the date of complete filing of debt rearrangement agreement to date of issuing order to filing parties per year	Adjudication	Outcome 18: A capable and professional public service	65	60	55	50	48	45	43
Average number of days from the date of close of pleadings of non-debt rearrangement agreement to the date of issuing notice of set-down to filing parties per year	Adjudication		15	15	15	15	14	12	12
Average number of days from date of final adjudication of non-debt rearrangement agreement to date of issuing judgment to filing parties per year	Adjudication		20	20	20	20	20	20	20

### Entity overview

The National Consumer Tribunal was established in terms of the National Credit Act (2005) as an independent adjudicative entity. It is mandated to review decisions made by the National Credit Regulator and the National Consumer Commission and adjudicate applications and referrals in terms of the National Credit Act (2005) and the Consumer Protection Act (2008). The tribunal's main focus over the period ahead will be on adjudicating cases and improving efficiency by aiming to reduce the average number of days to issue orders to filing parties from 50 in 2024/25 to 43 in 2027/28. This is intended to ensure that various parties are provided with judgments timeously.

Due to the nature of the tribunal's work, compensation of employees accounts for an estimated 69.2 per cent (R167.4 million) of its total budget over the medium term. Spending on goods and services is expected to increase at an average annual rate of 8.5 per cent, from R20.5 million in 2025/26 to R26.2 million in 2027/28. The tribunal expects to receive 69.5 per cent (R167.4 million) of its revenue over the medium term through transfers from the department and generate the remaining 30.5 per cent (R77.8 million) through filing fees. Revenue is set to increase in line with expenditure.

### Programmes/Objectives/Activities

## National Credit Regulator

### Selected performance indicators

**Table 39.60 National Credit Regulator performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of consumer awareness activities conducted on credit marketing practices per year	Improved regulatory environment through consumer education and registrations of entities/persons	Outcome 18: A capable and professional public service	120	130	140	150	150	160	170
Number of investigations conducted on credit providers related to the total cost of credit to ensure compliance with regulations per year	Enforcement of the National Credit Act (2005)		462	440	575	490	500	510	520
Percentage of enforcement action taken on noncompliance investigations related to reckless lending per year	Enforcement of the National Credit Act (2005)		96.7% (474/490)	96.3% (343/356)	93% (535/575)	85%	85%	90%	95%
Number of investigations conducted on credit providers related to reckless lending per year	Enforcement of the National Credit Act (2005)		490	400	410	420	430	430	500
Percentage of enforcement action taken on investigations into identified noncompliance by credit bureaus per year	Enforcement of the National Credit Act (2005)		100% (3)	— <sup>1</sup>	— <sup>1</sup>	80%	83%	86%	90%

1. No enforcement action was required as all credit bureaus were found to be compliant.

## Entity overview

The National Credit Regulator was established in terms of the National Credit Act (2005) and is responsible for regulating the South African credit industry. It is mandated to promote the development of an accessible credit market, particularly to address the needs of historically disadvantaged people, low-income individuals and remote, isolated or low-density communities.

Over the period ahead, the regulator will continue to focus on carrying out education, research and policy development; registering industry participants; investigating complaints; and enforcing the National Credit Act (2005). It plans to give effect to this focus by conducting 1 530 investigations into the cost of credit and taking enforcement action in cases where noncompliance is detected; conduct 1 360 investigations into reckless lending and/or the collection of prescribed debt and take enforcement action in cases where noncompliance is detected; and conduct 15 investigations into the removal of debt records and take enforcement action in cases where noncompliance is detected. The regulator has allocated R193.6 million over the period ahead to carry out these activities.

Total expenditure is expected to decrease at an average annual rate of 1.8 per cent, from R178.6 million in 2024/25 to R169.3 million in 2027/28, in line with an expected decrease in spending on goods and services mainly due one-off capital projects implemented in 2024/25. The regulator is set to derive 52.2 per cent (R253.6 million) of its revenue over the next 3 years through transfers from the department and generate the remainder through registration fees. Revenue is set to increase at an average annual rate of 4.6 per cent, from R148 million in 2024/25 to R169.3 million in 2027/28.

Job opportunities supported per year	Administration		11 429	4 598	6 526	10 500	77 000	140 000	210 000

### Entity overview

The National Empowerment Fund was established in terms of the National Empowerment Fund Act (1998) to promote and facilitate black economic empowerment and economic transformation. In providing financial and non-financial support to black businesses and structuring accessible retail savings products for black people, the fund is mandated to implement the codes of good practice for black economic empowerment. Funding is disbursed to beneficiaries through 5 core divisions: small, medium and micro enterprises; rural development; venture capital; corporate finance; and women's empowerment.

The fund will focus on supporting government's national priorities over the medium term by transforming the domestic economy in priority sectors such as manufacturing, agro-processing, minerals beneficiation, infrastructure and tourism. To achieve this, the fund plans to secure strategic partners, such as venture capitalists, to invest in the economy. As a result, the value of disbursements is set to increase significantly, in line with a projected increase in lending activities, from R1.5 billion in 2024/25 to R35 billion in 2027/28. As such, the number of jobs supported is expected to increase from 10 500 in 2024/25 to 210 000 by 2027/28.

Total expenditure is expected to increase at an average annual rate of 20.8 per cent, from R442.1 million in 2024/25 to R780.1 million in 2027/28. This is mainly due to an increase in spending on goods and services, driven by an increase in business and advisory services to assist with the projected increase in lending activities. Spending on compensation of employees constitutes an estimated 47.9 per cent (R911.1 million) of the fund's total expenditure over the period ahead, increasing at an average annual rate of 6 per cent, from R267.7 million in 2024/25 to R318.6 million in 2027/28.

The fund expects to derive its revenue over the medium term entirely through interest and dividends. Revenue is expected to increase at an average annual rate of 46 per cent, from R445 million in 2024/25 to R1.4 billion in 2027/28, driven by an expected increase in lending.

### Entity overview

The National Gambling Board was established in terms of the National Gambling Act (2004). It is mandated to maintain a legal, safe and crime-free gambling environment and protect gamblers from exploitation. The board's ongoing focus is on monitoring the socioeconomic patterns of gambling activities; conducting research on the impact of addictive and compulsive gambling; maintaining a national central electronic monitoring system, a national registry of gambling machines and devices and other prescribed national registers; and conducting public education and awareness campaigns on the dangers of gambling.

Over the period ahead, the board will focus on developing policies and regulations intended to establish norms and standards for the gambling industry across all spheres of government. To achieve this, the board plans to commission 3 economic analysis and research reports on the impact of gambling at a projected cost of R139.7 million over the medium term. To promote responsible gambling, the board plans to intensify public awareness about its risks and socioeconomic impact by conducting 90 broad-based public education interventions across the country at a cost of R16 million over the next 3 years.

Spending on goods and services accounts for an estimated 76.8 per cent (R578.7 million) of total expenditure over the medium term. The goods and services budget is expected to decrease at an average annual rate of 6.4 per cent, from R223.1 million in 2024/25 to R182.8 million in 2027/28, mainly driven by a decrease in management fees for the national central electronic monitoring system associated with the recent unfavourable economic conditions. Total expenditure, similarly, is expected to decrease at an average annual rate of 4.1 per cent, from R279.3 million in 2024/25 to R246.6 million in 2027/28.

The board expects to generate 86.3 per cent (R678.4 million) of its revenue over the medium term from the national central electronic monitoring system and the remainder through transfers from the department. Revenue is expected to decrease at an average annual rate of 2.2 per cent, from R279.7 million in 2024/25 to R262 million in 2027/28, mainly as a result of improved compliance, resulting in fewer fines and penalties.

## National Lotteries Commission

### Selected performance indicators

**Table 39.72 National Lotteries Commission performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Percentage of eligible funded projects monitored per year to ensure that funds are used for the intended purpose	Grant funding	Outcome 18: A capable and professional public service	– <sup>1</sup>	– <sup>1</sup>	– <sup>1</sup>	100%	100%	100%	100%
Number of education and awareness engagements facilitated nationally per year	Administration		40	80	132	90	120	150	200
Percentage of applications adjudicated within 150 days per year	Grant funding		63% (6 919/ 10 982)	81.1% (7 645/ 9 427)	4.8% (254/ 5 303) <sup>2</sup>	90%	80%	100%	100%
Percentage of grants disbursed in line with the regulated 60-day timeframe per year	Grant funding		74% (4 051/ 5 478)	74.4% (1 815/ 2 441)	14% (156/ 1 117) <sup>2</sup>	25%	70%	80%	90%

1. No historical data available.

2. Fewer applications processed than anticipated due to capacity issues in the adjudication unit.

## Entity overview

The National Lotteries Commission was established in terms of the Lotteries Act (1997). The commission has a dual mandate: regulating and prohibiting unfair practices in lotteries and sports pools and providing for matters connected with them; and ensuring that funds are distributed equitably and expeditiously to advance the socioeconomic wellbeing of communities in need.

Over the medium term, the commission will focus on awarding the fourth lottery licence since its inception, as the current licensee's contract expires in May 2025. To improve compliance, the commission has committed to monitor all eligible funded projects by 2027/28.

During the transition to a new licensee, lottery activities are briefly halted and tickets are not sold until the new operator is appointed. This affects expenditure and revenue. As a result, expenditure is expected to decrease at an average annual rate of 10.1 per cent, from R807.8 million in 2024/25 to R587.5 million in 2027/28. Revenue is set to decrease in line with spending. The entity derives the bulk of its revenue from a share of lottery ticket sales, which are received as transfers from the National Lottery Distribution Trust Fund.

## Programmes/Objectives/Activities

			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of new and improved national measurement standards, reference materials and methods developed per year	Keep, maintain and disseminate national measurements	Outcome 20: Safer communities and increased business confidence	28	23	15	2	2	2	2
Number of courses provided, including for small, medium and micro enterprises, per year	Keep, maintain and disseminate national measurements		20	21	25	25	30	30	30

**Table 39.76 National Metrology Institute of South Africa performance indicators by programme/objective/activity and related outcome (continued)**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of inter-laboratory comparisons and proficiency testing schemes initiated, administered or participated in per year	Keep, maintain and disseminate national measurements	Outcome 20: Safer communities and increased business confidence	25	23	22	20	20	20	20
Percentage of metrological services covered by calibration and measurement capabilities per year	Keep, maintain and disseminate national measurements		91% (946/ 1 039)	91% (947/ 1 041)	91% (941/ 1 034)	86%	87%	88%	90%
Number of base units of the International System of Units realised per year	Keep, maintain and disseminate national measurements		6	6	6	6	6	6	6

### Entity overview

The National Metrology Institute of South Africa is mandated by the Measurement Units and Measurement Standards Act (2006) to ensure that the country has a scientifically valid and internationally comparable and accepted measurement system, and that the International System of Units is correctly applied. Without this measurement infrastructure, it is difficult to manufacture to international specifications and tolerances and ensure the integrity of export and import commodities. This makes the institute's work vital for trade, health, safety and law enforcement.

Over the medium term, the institute intends to ensure accurate measurements for the country and the region and promote the integrity of measurements at various stages within the value chains of different commodities and manufactured products. This will be achieved through the annual realisation of the 6 base units that are traceable to the International System of Units; and investing in the development of 6 new and improved national measurement standards, reference materials and reference methods in line with industrial requirements. It also plans to initiate, administer and participate in 60 inter-laboratory comparisons and proficiency testing schemes. This work is expected to result in expenditure of R315.1 million over the medium term.

Total expenditure is expected to increase at an average annual rate of 1.9 per cent, from R202.5 million in 2024/25 to R214.2 million in 2027/28, with spending on compensation of employees constituting an estimated 61.4 per cent (R373.7 million) of the institute's total budget over the period ahead. The institute expects to derive 84.2 per cent (R514.2 million) of its revenue over the medium term through transfers from the department and the remainder through services rendered and interest income.

Number of inspections performed in accordance with compulsory specifications and procedures per year	Maximise compliance with all specifications and technical regulations	Outcome 18: A capable and professional public service	21 065	21 293	22 430	22 430	22 430	22 430	22 430
Percentage of inspections conducted on locally produced, imported and exported canned fishery and meat product consignments per year	Maximise compliance with all specifications and technical regulations		100% (23 666)	101% (25 961/ 25 709)	100% (24 302)	100%	100%	100%	100%
Number of inspections conducted on locally produced frozen products and fishery and canned meat processing factories and vessels per year	Maximise compliance with all specifications and technical regulations		2 247	2 701	2 458	2 562	2 771	2 892	3 057
Percentage of approval applications processed within set timeframes per year	Maximise compliance with all specifications and technical regulations		100% (436)	100% (658)	100% (871)	100%	100%	100%	100%
Percentage of product approval applications processed within set timeframes per year	Maximise compliance with all specifications and technical regulations		93% (17 498/ 18 809)	95% (14 739/ 15 505)	72% (15 198/ 21 106)	95%	95%	95%	95%
Number of compulsory specifications/technical regulations (new and amended) submitted to the department per year	Develop, maintain and administer compulsory specifications and technical regulations		12	12	12	13	4	4	8

### Entity overview

The National Regulator for Compulsory Specifications was established in terms of the National Regulator for Compulsory Specifications Act (2008), as amended, to administer compulsory specifications, otherwise known as technical regulations. Over the medium term, the regulator plans to regulate safety-critical products and undertake surveillance activities to ensure that products traded in the South African economy comply with relevant compulsory specifications or technical regulations. To this end, the number of inspections conducted on food processing factories and vessels is set to increase from 2 562 in 2024/25 to 3 057 by 2027/28 and spending on maximising compliance with all specifications and technical regulations is expected to account for 65.5 per cent (R1.1 billion) of total expenditure over the medium term.

The regulator also plans to expand and strengthen the scope of its legal metrology framework, in line with the Legal Metrology Act (2014), to protect consumers against inaccurate measurements. This will include ensuring that 95 per cent of product applications are processed and approved within set timeframes at a projected cost of R38.1 million over the MTEF period.

As the regulator's work relies on personnel with specialised skills, compensation of employees accounts for an estimated 84.3 per cent (R1.4 billion) of total spending over the medium term. Total expenditure is expected to increase at an average annual rate of 4 per cent, from R510.3 million in 2024/25 to R574.4 million in 2027/28.

The regulator is set to derive 71.8 per cent (R1.2 billion) of its revenue over the medium term through levies charged to manufacturers and the remainder through transfers from the department. Revenue is expected to increase in line with spending.

### Programmes/Objectives/Activities

### Entity overview

The South African Bureau of Standards was established as a statutory body in terms of the Standards Act (2008) and is part of South Africa's standardisation, quality assurance, accreditation and metrology technical infrastructure institutions. The bureau is mandated to develop, promote and maintain South African national standards; render conformity assessment services; and promote the quality of commodities, products and services to protect the integrity of the South African market and consumers, create a competitive advantage, and facilitate access for South Africans to local and international markets.

Over the medium term, the bureau will focus on implementing its digital transformation and infrastructure plan, revitalising testing operations and implementing local content verification projects submitted to it by government entities. An amount of R2.3 billion is made available for this purpose over the medium term in the conformity assessment programme. The bureau also intends to improve its standard development processes to enable faster turnaround times and industrialisation. It expects to do this by enhancing digital collaborative tools to effectively engage with stakeholders that participate in its technical committees. Accordingly, it plans to equip 30 laboratories with rollout planning and scheduling tools over the medium term at a projected cost of R687.4 million.

Expenditure is expected to increase at an average annual rate of 5.2 per cent, from R894.9 million in 2024/25 to R1 billion in 2027/28, with compensation of employees accounting for a projected 56.8 per cent (R1.7 billion) of this spending. The bureau expects to generate 68.4 per cent (R2.1 billion) of its revenue over the period ahead through fees for certification, testing, the sale of publications, and consulting and training services, and the remainder through transfers from the department. Revenue is expected to increase at an average annual rate of 5.7 per cent, from R898.1 million in 2024/25 to R1.1 billion in 2027/28.

Number of registered black assessors per year	Accreditation provision	drive growth and competitiveness	314	324	391	400	430	450	470

### Entity overview

The South African National Accreditation System was established in terms of the Accreditation for Conformity Assessment, Calibration and Good Laboratory Practice Act (2006). It is mandated to accredit or monitor for good laboratory practice and compliance; promote accreditation as a means of facilitating international trade to enhance South Africa's economic performance and transformation; and promote the competence and equivalence of accredited bodies and good laboratory practice facilities compliant with the act. The entity provides accreditation services that directly affect conformity assessment bodies, industry sectors and the economy by facilitating the acceptance of test, inspection and certification results nationally, regionally and internationally. This work significantly reduces the risk of South Africa's goods and services being rejected.

Over the medium term, the entity will continue to focus on expanding the acceptance of its results for conformity assessments. To this end, it plans to accredit at least 2 350 organisations per year over the medium term. An amount of R212.5 million is earmarked for this purpose through the accreditation programme over the period ahead, accounting for an estimated 42.8 per cent of total expenditure.

Expenditure is expected to decrease at an average annual rate of 9.1 per cent, from R215.6 million in 2024/25 to R161.7 million in 2027/28. This is mainly due to a decrease in spending on goods and services because of the use of reserves in 2024/25 to implement ICT infrastructure projects. Spending on compensation of employees is expected to constitute 49.8 per cent (R251 million) of total expenditure over the same period.

The entity expects to generate 79.2 per cent (R365.6 million) of its revenue over the medium term through fees collected from accredited facilities, new applications and commercial training and interest income, and the remainder through transfers from the department. Revenue is expected to increase at an average annual rate of 3.9 per cent, from R144.1 million in 2024/25 to R161.7 million in 2027/28.

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Percentage of transactions reviewed and approved per year	Administration	Outcome 18: A capable and professional public service	100% (50)	100% (39)	100% (34)	100%	100%	100%	100%
Percentage of rulings and exemptions issued per year	Administration		100% (244)	100% (218)	100% (278)	100%	100%	100%	100%
Percentage of requests for advisory opinions processed per year	Administration		100% (2)	100% (4)	100% (7)	100%	100%	100%	100%

## Entity overview

The Takeover Regulation Panel was established in terms of section 196 of the Companies Act (2008) as an organ of state within the public administration, but also as an institution outside of the public service. Its mandate is to regulate takeovers (defined as “affected transactions” in section 117 of the act), with the primary focus on protecting the interests of shareholders and maintaining market integrity.

Over the medium, the panel will focus on fostering a dynamic and inclusive equity capital market in South Africa. To achieve this, it will continue to ensure efficiency and transparency for all stakeholders by reviewing and approving all eligible transactions. The panel will actively engage with international peers to benchmark its efforts and ensure that it adheres to global best practices. Through these initiatives, the panel aims to process all advisory opinions that seek to position South Africa as a globally competitive market for investment. The panel has a budget of R102.9 million over the medium term for this work.

Expenditure is expected to increase at an average annual rate of 3.7 per cent, from R32.3 million in 2024/25 to R36.1 million in 2027/28, with 59.9 per cent (R63.2 million) of this spending allocated to compensation of employees. The panel generates revenue through levies collected from listed companies, fees charged on the regulation of affected transactions and income received from strategic investments. Revenue is expected to increase at an average annual rate of 1 per cent, from R38.9 million in 2024/25 to R40.1 million in 2027/28.

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

## Vote purpose

Lead the provision of an integrated, sustainable, reliable and safe transport system through planning, developing, coordinating, promoting and implementing transport policies, regulations and strategies.

## Mandate

The Constitution identifies the legislative responsibilities of the national, provincial and local levels of government for all modes of transport, with associated infrastructure and operational requirements. The Department of Transport is responsible for the legislation and policies for rail, pipelines, roads, airports, harbours and the intermodal operations of public transport and freight. Accordingly, it conducts sector research, formulates legislation and policy to set the strategic directions of subsectors, assigns responsibilities to public entities, regulates by setting norms and standards, and monitors implementation.

## Selected performance indicators

## Expenditure overview

Over the medium term, the department will continue to focus on investing in infrastructure to revitalise passenger rail services and freight and logistics infrastructure, maintaining South Africa's road network and facilitating integrated road-based public transport networks. In doing so, it aims to create a conducive environment for growth and job creation through inclusive economic activities and access to services.

The department's total budget over the next 3 years is projected to be R287.3 billion, with transfers and subsidies to public entities and departmental agencies (R161.8 billion) and provinces and municipalities (R101.3 billion), made through various grants, accounting for an estimated 91.5 per cent of this amount. Expenditure is expected to increase at an average annual rate of 3.3 per cent, from R86.4 billion in 2024/25 to R95.2 billion in 2027/28.

The 2024 national macro organisation of government resulted in the abolishment of the Department of Public Enterprises. As a result, the department's mandate now includes oversight of South African Airways and Transnet.

### *Investing in rail corridors infrastructure to revitalise passenger and freight rail services*

The department and the Passenger Rail Agency of South Africa continue to make concerted efforts to recover essential rail corridors. The agency's core interventions over the MTEF period will involve restoring rail services in all corridors to enable economic activity. To achieve this, funds allocated to the agency through the *Rail Transport* programme over the period ahead are intended for maintaining, recovering and renewing its fleet of

rolling stock, modernising rail infrastructure, rebuilding the signalling system, rolling out new train sets to priority corridors and increasing rail passenger trips. Total transfers to the agency amount to an estimated R66.1 billion over medium term, of which R40.8 billion is earmarked for capital expenditure. R2.8 billion over the MTEF period is reprioritised from the South African National Roads Agency to the Passenger Rail Agency of South Africa to address funding shortfalls in the rolling stock fleet renewal programme.

R3.3 billion over the MTEF period is provisioned through the budget facility for infrastructure and transferred to Transnet through the *Rail Transport* programme and *Maritime Transport* programme for necessary operational enhancements and infrastructure upgrades to the entity's Gauteng to Eastern Cape high-capacity rail corridor and Cape Town's container terminal expansion.

### ***Maintaining South Africa's road network***

The *Road Transport* programme facilitates initiatives for building and improving road infrastructure, maintaining road networks and providing adequate access to safer roads. The programme is set to receive R161.7 billion over the MTEF period, of which 66 per cent (R106.8 billion) is allocated to the South African National Roads Agency, the primary implementing agent for these objectives. Of the allocation to the agency, R54.9 billion is earmarked for the non-toll network, R19.3 billion for the Gauteng Freeway Improvement Project, R4.3 billion for the N2 Wild Coast project, R3.2 billion for the R573 (Moloto Road) development corridor and R94.2 million for piloting and implementing a single-ticketing system for public transport in Gauteng that will allow commuters to access all public transport facilities with a single pass.

The *provincial roads maintenance grant* has 2 components, maintenance and refurbishment, to fund the priorities of various strategies geared towards preserving and upgrading the provincial road network and related assets. Disbursements from the grant, amounting to R53.1 billion over the MTEF period, are intended for provinces to rehabilitate 12 627 lane kilometres, reseal 16 105 lane kilometres, re-gravel 24 250 kilometres and blacktop-patch 8 202 790 square metres of the provincial road network, while R1.4 billion in 2025/26 will be used to finalise the construction of 96 bridges as part of the Welisizwe rural bridges programme. R94 million over the medium term is reprioritised from the grant towards goods and services in the *Road Transport* programme for the provision of the technical interventionist support to provincial roads authorities to improve the standard of maintenance of the road network.

### ***Facilitating integrated road-based public transport networks***

The department disburses the *public transport network grant* to municipalities to carry out infrastructure projects and cover the indirect costs of bus rapid transit services in Cape Town, Ekurhuleni, George, Johannesburg, Nelson Mandela Bay, Polokwane, Rustenburg and Tshwane. The grant's allocation amounts to R22.4 billion over the medium term. Activities carried out with these funds are expected to result in an increase in the number of weekday passenger trips on bus rapid transit services from a combined 245 141 in 2024/25 to 337 048 in 2027/28. The *public transport operations grant* subsidises road-based public transport services provided through provincial departments of transport. Allocations to this grant are expected to increase at an average annual rate of 4.5 per cent from R7.7 billion in 2024/25 to R8.8 billion in 2027/28.

## Programme 2: Integrated Transport Planning

### Programme purpose

Integrate and harmonise macro transport-sector policies, strategies and legislation. Coordinate and develop sector-related policies, research activities, and regional and intersphere relations. Facilitate sector transformation and provide sector economic modelling and analysis.

### Objectives

- Reduce greenhouse gas emissions from transport by:
  - implementing and monitoring the transport sector just transition plan by March 2027
  - ensuring that the reviewed green transport strategy is approved by March 2026.
- Improve competition and access in the transport sector by establishing a transport economic regulator in accordance with the proclamations of the Economic Regulation of Transport Act (2024) by March 2026.

## Subprogrammes

- *Macro Sector Planning* examines land use and transport planning in all spheres of government from a multimodal perspective and manages and facilitates the implementation of the planning provisions contained in the National Land Transport Act (2009).
- *Freight Logistics* develops and coordinates the implementation of freight logistics strategies aimed at unblocking bottlenecks in the freight logistics system and related supply chains, with emphasis on integrating elements of the system across all modes of transport.
- *Modelling and Economic Analysis* undertakes economic studies, provides innovative and enabling funding options for transport infrastructure that respond to the socioeconomic needs of the national agenda, and applies economic analysis tools for policy development in the transport sector.
- *Regional Integration* manages, coordinates and facilitates the development of strategies for engagements in the Southern African Development Community region and the rest of Africa.
- *Research and Innovation* ensures research, innovation and monitoring in the transport sector to enhance sustainability.
- *Integrated Transport Planning Administration Support* provides strategic leadership and administrative support to the programme.

## Programme 3: Rail Transport

### Programme purpose

Facilitate and coordinate the development of sustainable rail transport policies, rail economic and safety regulation, and infrastructure development strategies that reduce system costs and improve customer service. Oversee rail public entities and the implementation of integrated rail services.

### Objectives

- Improve the legislative and policy environment guiding rail developments by submitting the National Rail Bill to Parliament by March 2026.
- Improve access to commuter rail services by monitoring and reviewing the performance of the Passenger Rail Agency of South Africa on an ongoing basis.
- Increase access to affordable and reliable transport systems in the rail sector by:
  - finalising the private sector participation framework implementation plan by March 2026
  - developing the national rail master plan by March 2026
  - developing a national rail security strategy by March 2026.

### Subprogrammes

- *Rail Regulation* is responsible for the development of rail policies and safety and economic regulations.
- *Rail Infrastructure and Industry Development* coordinates the development and maintenance of investment in rail infrastructure.
- *Rail Operations* coordinates the implementation of integrated rail services, and monitors and analyses service delivery challenges in the rail industry.
- *Rail Oversight* manages and tracks the performance of the Passenger Rail Agency of South Africa and the Railway Safety Regulator and manages transfer payments to these entities.
- *Rail Administration Support* provides strategic leadership and administrative support to the programme.

## Programme 4: Road Transport

### Programme purpose

Develop and manage an integrated road infrastructure network, regulate road transport and ensure safer roads. Oversee road public entities.

### Objectives

- Improve transport safety and security by March 2026 by:
  - monitoring the implementation of the National Road Traffic Amendment Act (2024)
  - reviewing the national road safety strategy for submission to Cabinet for approval
  - finalising general laws amendment bills for submission to Cabinet for approval.
- Improve competition and increase access to a reliable transport system by:
  - obtaining approval for the road infrastructure funding policy from Cabinet by March 2026
  - monitoring and reviewing the performance of the *provincial roads maintenance grant* in terms of the annual Division of Revenue Act on an ongoing basis.

### Subprogrammes

- *Road Regulation* synchronises road safety and traffic management legislation and oversees the inspectorate for driving licences and vehicle testing stations.

- *Road Infrastructure and Industry Development* facilitates and coordinates the planning, development and implementation of a sustainable and reliable integrated road infrastructure network and the enhancement of capacity in the industry.
- *Road Oversight* reviews and analyses the performance of road transport public entities and monitors their compliance with regulations and legislation. This subprogramme also transfers funds to the South African National Roads Agency, the Road Traffic Management Corporation and the Road Traffic Infringement Agency and transfers the *provincial roads maintenance grant* to provinces.
- *Road Administration Support* provides strategic leadership and administrative support to the programme.
- *Road Engineering Standards* develops and implements road engineering standards and coordinates the development of an asset management system for safe and resilient road infrastructure.

## Programme 5: Civil Aviation

### Programme purpose

Facilitate the development of an economically viable air transport industry that is safe, secure, efficient, environmentally friendly and compliant with international standards through regulation and investigations, and oversee aviation entities.

### Objectives

- Ensure competitive and accessible markets by drafting a comprehensive civil aviation policy for submission to Cabinet by March 2026.
- Improve air transport safety and security by:
  - submitting the draft South African Maritime and Aeronautical Search and Rescue Amendment Bill to Cabinet by March 2026
  - establishing and operationalising an independent body to investigate aircraft incidents by March 2026.
- Improve transport safety and security by reviewing the effectiveness and monitoring the implementation of the general aviation safety strategy.

### Subprogrammes

- *Aviation Policy and Regulations* develops and maintains the civil aviation regulatory regime to respond to national imperatives and international norms, standards and protocols.
- *Aviation Economic Analysis and Industry Development* provides aviation economic analysis and develops relevant frameworks for industry development and airfreight logistics activities.
- *Aviation Safety, Security, Environment, and Search and Rescue* develops and monitors South Africa's aviation safety, security, environment, and search and rescue regime; and manages investigations into aviation accidents and serious incidents to identify deficiencies and make safety recommendations on mechanisms to address them.
- *Aviation Oversight* monitors the performance of Airports Company South Africa, the Air Traffic and Navigation Services Company and the South African Civil Aviation Authority, in line with the legislative framework.
- *Aviation Administration Support* provides strategic leadership and administrative support to the programme.

## Programme 6: Maritime Transport

### Programme purpose

Promote a safe, reliable and economically viable maritime transport sector through the development and implementation of policies and strategies, and oversee maritime public entities.

### Objectives

- Increase access to affordable and reliable maritime transport by monitoring the implementation of the Operation Phakisa oceans economy 3-foot plan to encourage growth in the sector on an ongoing basis.
- Improve transport safety and security by developing the draft maritime decarbonisation roadmap by March 2026.

### Subprogrammes

- *Maritime Policy Development* develops and maintains a maritime regulatory regime that is responsive to national imperatives and international norms, standards and protocols. This subprogramme is also responsible for the development and maintenance of maritime policies and strategies.
- *Maritime Infrastructure and Industry Development* facilitates the development of integrated maritime infrastructure and an integrated maritime industry.
- *Implementation, Monitoring and Evaluation* ensures that legislation, policies and strategies pertaining to maritime safety, security and environmental protection are implemented.
- *Maritime Oversight* makes transfers to public entities in the maritime field, the South African Maritime Safety Authority and the Ports Regulator of South Africa and oversees these entities' compliance with relevant regulations and legislation.
- *Maritime Administration Support* provides strategic leadership and administrative support to the programme.

## Programme 7: Public Transport

Provide and regulate safe, secure, reliable, cost effective and sustainable public transport services in South Africa through legislation, policies and strategies.

### Objectives

- Promote sustainable public transport and improve access and reliability by implementing identified taxi industry economic empowerment projects on an ongoing basis.
- Improve the accessibility, quality and reliability of public transport by:
  - finalising the promulgation of the 2020 Transport Appeal Tribunal Amendment Bill by March 2025 and ensuring the implementation of the act by March 2026
  - implementing and monitoring the redesigned national land transport information system on an ongoing basis
  - submitting the public transport subsidy policy to Cabinet by the end of 2025/26.
- Improve transport safety and security by implementing the national strategic plan to end gender-based violence in the taxi industry on an ongoing basis.

### Subprogrammes

- Public Transport Regulation* manages the development and maintenance of policy, legislation and regulation, and coordinates and facilitates implementation. This subprogramme is responsible for managing information on public transport systems developed in terms of the National Land Transport Act (2009).
- Rural and Scholar Transport* develops and reviews rural, scholar and non-motorised transport strategies, and coordinates and evaluates their implementation.
- Public Transport Industry Development* oversees and facilitates the implementation of public transport policy, legislation and strategy, develops public transport empowerment schemes, manages the taxi recapitalisation programme, and facilitates stakeholder relations and conflict resolution in the industry.
- Public Transport Oversight* oversees the use of public transport subsidies and grants, and monitors compliance with the annual Division of Revenue Act in terms of transferring funds, reporting, allocations and adjustments.
- Public Transport Administration Support* provides strategic leadership and administrative support to the programme.
- Public Transport Network Development* develops norms and standards for integrated public transport systems to help provide accessible, reliable, affordable and integrated public transport network services in municipalities.

## Programme 8: State-owned Companies Governance Assurance and Performance

### Programme purpose

Oversee the governance and performance of the department's state-owned entities.

### Objectives

- Ensure effective shareholder oversight of state-owned companies on an ongoing basis by:
  - providing governance systems and legal support
  - developing and maintaining shareholder risk profiles and mitigating strategies
  - monitoring, evaluating and reporting on financial and non-financial performance, and proposing interventions when required.

### Subprogrammes

- *Technical Services* provides technical advisory services through feasibility studies, approvals, budgets, strategic/corporate plans and annual reports.
- *Public Entity Oversight* provides financial assessments of state-owned companies, and coordinates and ensures compliance with performance and financial requirements.
- *Governance Services* facilitates, monitors and evaluates the implementation of good governance frameworks.
- *State-owned Companies Risk and Ethics* provides for the risk profiling of state-owned companies and the development of mitigation strategies to support the department as shareholder.
- *Business Enhancement Services* provides sector business enhancement to enable the shareholder to enhance the strategic operations of its state-owned companies.
- *State-owned Companies Governance Assurance and Performance Administrative Support* provides strategic leadership and administrative support to the programme.

## Entities

### Air Traffic Navigation Services Company

#### Selected performance indicators

**Table 40.22 Air Traffic and Navigation Services Company performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of air traffic safety incidents per year (per 100 000 flights)	Communication	Outcome 4: Increased infrastructure investment and job creation	7	7	2	2	2	2	2
Number of serious air traffic safety incidents per year (per 100 000 flight hours)	Surveillance		3	3	4	4	4	4	4
Average delay (in seconds) per delayed flight per year			360	360	360	360	360	360	360
Average communication system availability percentage per year	Communication		99.7%	99.7%	99.7%	99.7%	99.7%	99.7%	99.7%
Average navigation system availability percentage per year	Investigations		94.6%	98.7%	98.7%	98.7%	98.7%	98.7%	98.7%
Average surveillance system availability percentage per year	Surveillance		99.8%	99.8%	99.8%	99.8%	99.8%	99.8%	99.8%

#### Entity overview

In terms of the Air Traffic and Navigation Services Company Act (1993), the Air Traffic and Navigation Services Company is mandated to provide safe, orderly and efficient air traffic navigational and associated services to the air traffic management community. The company's services are in accordance with the standards of the International Civil Aviation Organisation and civil aviation regulations issued in terms of the Civil Aviation Act (2009). The company is responsible for providing air traffic management services across South Africa's airspace (roughly 6.1 per cent of the world's airspace). Over the medium term, the company will continue to focus on providing safe, efficient and cost-effective air traffic management solutions and related services.

To ensure that the company continues to fulfil its mandate, in the 2024 MTEF period, R422 million (R204 million in 2024/25 and R218 million in 2025/26) was allocated for the company to upgrade its navigational systems. Total expenditure is expected to increase at an average annual rate of 7.4 per cent, from R2 billion in 2024/25 to R2.5 billion in 2027/28. Compensation of employees comprises an estimated 62.3 per cent (R4.4 billion) of total expenditure over the period ahead, while spending on goods and services accounts for an estimate 26.9 per cent (R1.9 billion).

As a self-funding entity, the company expects to generate 96.6 per cent (R7 billion) of its revenue over the medium term by providing calibration and aeronautical services to the aviation industry, mainly through en-route and approach fees. Total revenue is expected to increase at an average annual rate of 8.9 per cent, from R2 billion in 2024/25 to R2.6 billion in 2027/28.

### Selected performance indicators

**Table 40.26 Airports Company South Africa performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets			
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28	
Number of departing passengers accommodated at national airports per year	Airport management	Outcome 4: Increased infrastructure investment and job creation	10.5 million	13.6 million	18.3 million	18.9 million	20.7 million	21.1 million	21.6 million	
Number of arriving aircraft accommodated at all airports per year	Airport management		176 813	193 247	201 832	235 353	246 095	246 365	232 535	
Aeronautical revenue per departing passenger per year	Airport management		R170.50	R178.36	R227	R218.29	R227.11	R241.70	R254.04	
Non-aeronautical revenue per departing passenger per year	Airport management		R91.23	R82.51	R213.91	R188.87	R189.92	R199.98	R208.26	

### Entity overview

Airports Company South Africa was established in terms of the Airports Company Act (1993). The company owns and operates the 9 principal airports in South Africa, including the 3 main international gateways: OR Tambo International Airport, Cape Town International Airport and King Shaka International Airport. The company is committed to creating and delivering value to all its stakeholders within an evolving global aviation industry. To this end, over the medium term, it will implement its adapted strategy to reinforce innovation, improve infrastructure and foster recovery and growth.

Total expenditure is expected to increase at an average annual rate of 4.9 per cent, from R6.9 billion in 2024/25 to R8 billion in 2027/28, with goods and services accounting for an estimated 45.5 per cent (R10.5 billion) of the company's total budget over the next 3 years. Revenue is projected to increase at an average annual rate of 9 per cent, from R7.7 billion in 2024/25 to R10 billion in 2027/28, driven by the tariff increase in 2024/25 and an expected above-inflation increase in non-aeronautical revenue.

## Cross-Border Road Transport Agency

### Selected performance indicators

**Table 40.30 Cross-Border Road Transport Agency performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Percentage of temporary permits issued in front office within 8 working hours per year	Regulatory services	Outcome 7: Increased investment, trade and tourism	98.7% (25 267/ 25 600)	98.7% (24 983/ 25 320)	98.2% (25 180/ 25 635)	98%	98%	98%	98%
Percentage of temporary permits issued in remote office within 1 day per year	Regulatory services		95.6% (23 067/ 24 138)	97.8% (23 600/ 24 125)	97.8% (23 892/ 24 425)	98%	98%	98%	98%
Number of permits issued per year	Regulatory services		62 464	68 710	93 449	83 139	87 295	91 659	96 242

### Entity overview

The Cross-Border Road Transport Agency is mandated to regulate the cross-border road freight and passenger

industry in terms of the Cross-Border Road Transport Act (1998). It facilitates an unimpeded flow of freight and passenger road transport across the region. To fulfil its responsibilities, the agency will continue to implement harmonised systems and processes to ensure optimal cross-border road transport services.

Expenditure is expected to increase at an average annual rate of 4.6 per cent, from R388.3 million in 2024/25 to R443.9 million in 2027/28, driven mainly by spending on administration, law enforcement, regulatory services and facilitation. The agency generates revenue mainly through administrative and permit fees. Revenue is expected to increase at an average annual rate of 4.8 per cent, from R388.4 million in 2024/25 to R447.3 million in 2027/28.

### Programmes/Objectives/Activities

## Driving licence card account

### Selected performance indicators

**Table 40.34 Driving licence card account performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of driving licence cards produced per year	Production	Outcome 3: Structural reforms to drive growth and competitiveness	2.3 million	3.4 million	2.8 million	1.5 million	3.1 million	3.2 million	3.4 million
Number of days taken to produce and distribute driving licence cards per year	Production		14	22	18	11	14	14	14
Percentage of driving licence cards delivered within 7 working days of production per year	Production		97% (201 450/ 208 398)	97% (203 723/ 209 432)	98% (202 315/ 206 482)	95%	95%	95%	95%

### Entity overview

The driving licence card account was established in terms of the Public Finance Management Act (1999) to manufacture driving licence cards based on orders from testing centres across South Africa. To enhance productivity, the entity plans to procure a new card manufacturing machine at an estimated cost of R173 million over the medium term. Expenditure is projected to increase at an average annual rate of 5.4 per cent, from R274.9 million in 2024/25 to R321.6 million in 2027/28.

The entity generates its revenue mainly through the sale of driving licence cards. However, delays in procuring the new machine have led to reliance on the old, less efficient machine. The use of the old machine is expected to result in a decrease in revenue at an average annual rate of 4.3 per cent, from R377.7 million in 2024/25 to R331.1 million in 2027/28. This trend is likely to be reversed, and revenue is expected to increase over the medium term once the new machine is successfully procured and in use.

Number of new train sets delivered for Metrorail per year	Metrorail		33	57	60	60	60	50	50

### Entity overview

The Passenger Rail Agency of South Africa was established in terms of the Legal Succession to the South African Transport Services Amendment Act (2008). The agency's primary mandate is to provide rail commuter services within, to and from South Africa in the public interest. It also provides long-haul passenger rail and bus services within, to and from South Africa.

The agency will continue to focus on ensuring the recovery of commuter rail services over the medium term by implementing its corridors recovery programme and modernising its infrastructure. This includes maintaining, recovering and renewing its rolling stock fleet, modernising rail infrastructure, improving signalling, rolling out new train sets to priority corridors and increasing rail passenger trips. As a result, spending on Metrorail and administrative support is expected to amount to 86.2 per cent (R50.4 billion) of the agency's budget over the MTEF period. As the agency anticipates increasing its spending on procurement and contracts, its goods and services budget is expected to account for 48.2 per cent (R28 billion) of total expenditure over the medium term, and compensation of employees for 36.1 per cent (R21.1 billion). Total expenditure is expected to increase at an average annual rate of 6.1 per cent, from R17.2 billion in 2024/25 to R20.5 billion in 2027/28.

Revenue is expected to increase at an average annual rate of 5.3 per cent, from R22.2 billion in 2024/25 to R25.9 billion in 2027/28, in line with transfers from the department and an anticipated improvement in revenue from Metrorail fares. Transfers from the department are projected to constitute 87 per cent (R66.1 billion) of the agency's revenue over the next 3 years. Other sources of revenue include fares and ticket sales, rental income and interest.

## Ports Regulator of South Africa

### Selected performance indicators

**Table 40.42 Ports Regulator of South Africa performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of global port pricing comparator studies conducted per year	Economic regulation	Outcome 3: Structural reforms to drive growth and competitiveness	1	1	1	1	1	1	1
Number of National Ports Authority tariff assessments conducted per year	Economic regulation		1	1	1	1	1	1	1
Number of port capacity and usage reviews conducted per year	Industry development		1	1	1	1	1	1	1

### Entity overview

The Ports Regulator of South Africa was established in terms of the National Ports Act (2005) to regulate South Africa's ports infrastructure system. Its mandate, and ongoing focus, is to set tariffs for the Transnet National Ports Authority and oversee complaints and appeals to maintain fairness, transparency and competitive practices for ports infrastructure.

Expenditure is expected to increase at an average annual rate of 4.9 per cent, from R45.7 million in 2024/25 to R52.8 million in 2027/28, with compensation of employees accounting for an estimated 71.6 per cent (R107.2 million) of the total budget over the period ahead. The regulator derives its revenue mainly through transfers from the department. Revenue is set to increase in line with expenditure.

## Railway Safety Regulator

### Selected performance indicators

**Table 40.46 Railway Safety Regulator performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of safety initiatives conducted per year	Administration	Outcome 3: Structural reforms to drive growth and competitiveness	30	42	40	48	40	40	40
Number of safety performance agreements signed for high-risk operators per year	Operations		30	33	35	35	35	35	35
Number of industry safety risk profiles developed per year	Operations		1	1	1	1	1	1	1
Number of interface agreements aligned with operational risks per year	Operations		1	1	1	1	1	1	1
Number of common safety methods developed and implemented per year	Operations		1	1	1	1	1	1	1

### Entity overview

The Railway Safety Regulator was established in terms of the National Railway Safety Regulator Act (2002). The regulator is mandated to oversee railway operations, monitor operators and enforce a safe operating environment. This includes rail operators in neighbouring countries whose operations enter South Africa. Over the medium term, the regulator will continue to focus on issuing safety permits, conducting inspections and audits, investigating railway accidents, and developing regulations and safety standards.

Total expenditure is expected to increase at an average annual rate of 4.5 per cent, from R281 million in 2024/25 to R320.7 million in 2027/28, with compensation of employees comprising an estimated 64.8 per cent (R601.6 million) of planned operational expenditure over the medium term. The regulator expects to generate 70.2 per cent (R649.5 million) of its revenue over the MTEF period through administrative fees and the remainder through transfers from the department.

## Road Accident Fund

### Selected performance indicators

**Table 40.50 Road Accident Fund performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Percentage reduction of 3-year-old open claims per year	Payment of claims to accident victims	Outcome 11: Optimised social protection and coverage	14.5%	16.8%	20%	25%	30%	35%	35%
Percentage of claims processed within 120 days per year	Payment of claims to accident victims		0.3%	0.2%	9.8%	15%	20%	25%	30%
Percentage of claims validated and verified within 60 days per year	Payment of claims to accident victims		59%	53%	89%	80%	95%	95%	95%

### Entity overview

The Road Accident Fund was established in terms of the Road Accident Fund Act (1996) and is mandated to compensate South African road users for losses or damages caused by motor vehicle accidents within the borders of South Africa. Over the medium term, the fund aims to reduce its claims backlog, enhance operational efficiency and optimise revenue collection while managing its existing resources to address cost pressures and improve efficiencies.

Expenditure is expected to increase at an average annual rate of 19.1 per cent, from R53 billion in 2024/25 to R89.7 billion in 2027/28, mainly because of an anticipated increase in claims from victims of motor vehicle accidents. The fund derives revenue mainly through the road accident fund levy, which is collected by the South African Revenue Service. Revenue is projected to increase at an average annual rate of 10.3 per cent, from R50.7 billion in 2024/25 to R68 billion in 2027/28.

## Road Traffic Infringement Agency

### Selected performance indicators

**Table 40.54 Road Traffic Infringement Agency performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Percentage of representations received and adjudicated within 21 days per year	Discourage contravention of traffic laws	Outcome 20: Safer communities and increased business confidence	100% (281 827)	100% (192 547)	100% (198 235)	100%	100%	100%	100%

### Entity overview

The Road Traffic Infringement Agency was established in terms of the Administrative Adjudication of Road Traffic Offences (AARTO) Act (1998) to facilitate and administer procedures to discourage the contravention of road traffic laws, adjudicate infringements, enforce penalties for the contravention of road traffic laws, provide specialised prosecution support services, and carry out community education and awareness programmes in matters related to road safety. Over the MTEF period, the agency will focus on efficiency in administrative processes, adjudication and support, and rolling out the AARTO programme.

Expenditure is expected to increase at an average annual rate of 4.4 per cent, from R500.6 million in 2024/25 to R596.5 million in 2027/28, with goods and services accounting for an estimated 58.3 per cent (R56.3 million) of the agency's total budget over the period ahead. The agency derives its revenue mainly through administrative fees, which are projected to total R1.1 billion over the medium term; and 32 per cent (R524.3 million) through transfers from the department, of which R492 million is earmarked for the planned AARTO rollout in 2025/26.

## Programmes/Objectives/Activities

Number of vehicle testing stations using digitised roadworthiness testing sheet forms per year	Strategic services		116	82	75	120	120	120	60

### Entity overview

The Road Traffic Management Corporation was established in terms of the Road Traffic Management Corporation Act (1999). It is mandated to provide strategic planning and law enforcement, and pool public sector resources for national road traffic management. The corporation intends to implement the national road traffic law enforcement code over the medium term, which is expected to integrate and harmonise the enforcement of traffic laws and facilitate the integration and development of road safety regulations and the fair and efficient use of resources.

Expenditure is expected to increase at an average annual rate of 8.9 per cent, from R1.6 billion in 2024/25 to R2.1 billion in 2027/28, driven mainly by spending on compensation of employees and goods and services. The corporation expects to derive 54.9 per cent (R3.1 billion) of its revenue over the medium term through transaction fees and administrative fees at driving licence testing centres. Revenue is set to increase in line with spending.

1. No historical data available as these indicators were adopted after the airline's business rescue process.

## Entity overview

South African Airways was established in April 1990 in terms of the Companies Act (2008) and is listed as schedule 2 entity in terms of the Public Finance Management Act (1999). As part of the airline's business rescue process, over the medium term, it will focus on sustainability and stabilisation despite its constrained working capital. This will entail densifying its schedule and expanding its fleet and routes.

Expenditure is expected to increase at an average annual rate of 31.5 per cent, from R10.8 billion in 2024/25 to R24.5 billion in 2027/28, mainly as a result of an increase and optimisation of operations. Spending on goods and services accounts for a projected 91.2 per cent (R58.5 billion) of total expenditure over the medium term, mainly driven by fuel, aircraft leases, maintenance and related costs. Compensation of employees constitutes 7.6 per cent (R4.5 billion), with the number of personnel set to increase from 1 888 in 2024/25 to 1 951 in 2027/28.

The airline derives revenue mainly through the sale of air tickets. Revenue is expected to increase at an average annual rate of 34.4 per cent, from R10.8 billion in 2024/25 to R26.2 billion in 2027/28. This significant increase is attributed to the airlines anticipated increase in operations, resulting in the sale of more tickets.

Number of aviation security inspections conducted or certificates issued per year	Continually improve civil aviation security		877	1 109	1 133	1 133	1 133	1 133	1 133

### Entity overview

The South African Civil Aviation Authority was established in terms of the Civil Aviation Act (2009). It is mandated to oversee the safety and security of the civil aviation industry and ensure compliance with and adherence to the standards and recommended practices of the International Civil Aviation Organisation. The authority will continue to focus on implementing safety and security programmes over the next 3 years, in line with the standards and recommended practices issued by the organisation and South African civil aviation regulations.

Expenditure is estimated to increase at an average annual rate of 7.4 per cent, from R984 million in 2024/25 to R1.2 billion in 2027/28, with compensation of employees accounting for an estimated 67.6 per cent (R2.3 billion) of total expenditure over the period ahead. Passenger safety charges, user fees and the aviation fuel levy are expected to comprise 78.9 per cent (R2.7 billion) of the authority's revenue over the period ahead, with transfers from the department accounting for an estimated 8.3 per cent (R282.2 million). Revenue is expected to increase in line with expenditure.

## South African Maritime Safety Authority

### Selected performance indicators

**Table 40.70 South African Maritime Safety Authority performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of reportable maritime pollution incidents from all types of vessels per year	Prevent and combat pollution of marine environment by ships	Outcome 3: Structural reforms to drive growth and competitiveness	2.1	1.9	0.5	<4	<4	<2	<2

**Table 40.70 South African Maritime Safety Authority performance indicators by programme/objective/activity and related outcome (continued)**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Reportable maritime incident rate from all types of vessels	Ensure the safety of life and property at sea	Outcome 3: Structural reforms to drive growth and competitiveness	14.66	14	12.94	<20	<20	<15	<15
High-priority foreign vessels inspected under port state responsibility per year	Ensure the safety of life and property at sea		100%	100%	100%	100%	100%	100%	100%
Number of maritime fatalities reported from all types of vessels per year	Ensure the safety of life and property at sea		1.77	0.93	2.12	<2	<2	<2	<2
Number of merchant vessels registered on the South African ships register per year	Promote South Africa's maritime interests		1	1	1	1	1	1	1

### Entity overview

The South African Maritime Safety Authority was established in terms of the South African Maritime Safety Authority Act (1998). It is responsible for regulating and enforcing maritime safety and marine pollution from ships and promoting South Africa's maritime interests. Its continued focus is on ensuring the safety of life and property at sea, and preventing and combating marine pollution.

Expenditure is expected to increase at an average annual rate of 5.7 per cent, from R475.8 million in 2024/25 to R561.7 million in 2027/28, with compensation of employees constituting an estimated 62.6 per cent (R1 billion) of total expenditure over the MTEF period. The authority derives its revenue through levies, fees and user charges. Revenue is expected to increase at an average annual rate of 5.7 per cent, from R476.3 million in 2024/25 to R563.1 million in 2027/28.

### Programmes/Objectives/Activities

## South African National Roads Agency

### Selected performance indicators

**Table 40.74 South African National Roads Agency performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets			
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28	
Percentage of travel undertaken per year on national roads with roughness less than 4.2m/km	Roads asset infrastructure management	Outcome 4: Increased infrastructure investment and job creation	95%	95%	95%	95%	95%	95%	95%	95%
Percentage of travel undertaken per year on national roads with rut depth less than 20mm	Roads asset infrastructure management		95%	95%	95%	95%	95%	95%	95%	95%
Percentage of travel undertaken per year on national roads with macro texture higher than 0.4mm	Roads asset infrastructure management		95%	95%	95%	95%	95%	95%	95%	95%
Percentage of travel over or under bridges on national roads per year with an overall condition index higher than 70	Roads asset infrastructure management		90%	90%	90%	90%	90%	90%	90%	90%

**Table 40.74 South African National Roads Agency performance indicators by programme/objective/activity and related outcome (continued)**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Length of national road network with active routine road maintenance contracts (km)	Roads asset infrastructure management	Outcome 4: Increased infrastructure investment and job creation	22 262	22 262	23 559	24 384	24 162	24 162	24 162
Length of national road network with active resurfacing contracts (km)	Roads asset infrastructure management		1 000	1 200	1200	950	2 000	2 000	2 000
Length of national road network with active strengthening, improvement or construction contracts (km)	Roads asset infrastructure management		600	300	270	200	300	400	400

### Entity overview

The South African National Roads Agency was established in terms of the South African National Roads Agency Limited and National Roads Act (1998). Its primary responsibility is planning, design, construction, operation, management, control, maintenance and rehabilitation of the national road network, including financing these functions, for toll and non-toll roads.

Over the medium term, the agency will focus on undertaking preventative maintenance to improve and preserve the national road network. Accordingly, over the MTEF period, it plans to resurface 6 000 kilometres of road, strengthen or improve 1 100 kilometres of road, and build 19 interchanges and 43 bridges. As a result, capital spending is expected to increase at an average annual rate of 3.5 per cent, from R25.3 billion in 2024/25 to R28 billion in 2027/28.

Total expenditure is expected to increase at an average annual rate of 4.3 per cent, from R29.8 billion in 2024/25 to R33.8 billion, driven mostly by an acceleration of spending on infrastructure projects. Goods and services accounts for an estimated 73.2 per cent (R78.9 billion) of total spending over the MTEF period. Spending on compensation of employees is expected to increase at an average annual rate of 6.3 per cent, from R841.2 million in 2024/25 to R1 billion in 2027/28, in line with the agency's plans to retain key personnel such as engineers.

The agency derives its revenue transfers from the department for the non-toll network, and from toll fees. Transfers are expected to amount to R90.1 billion over the medium term, while toll revenue is expected to amount to R21.8 billion, increasing at an average annual rate of 23 per cent, from R4.3 billion in 2024/25 to R8.1 billion in 2027/28 due to the annual increase in toll fees and an anticipated increase in road traffic. Revenue is expected to increase at an average annual rate of 6.7 per cent, from R36.2 billion in 2024/25 to R44 billion in 2027/28.

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Metric tons of dry bulk goods transported per year	National Ports Authority	Outcome 3: Structural reforms to drive growth and competitiveness	173.1	149.5	163.9	206	210.3	212.8	215.1
Number of automotives handled at port terminals per year	Transnet port terminals		719 114	869 368	784 143	827 600	867 258	872 209	875 824
Total petroleum volumes (million litres) transported per year	Transnet pipelines		15 350	15 500	15 782	16 000	16 385	16 605	16 812

### Entity overview

Transnet was established in April 1990 in terms of the Companies Act (2008) and is listed as a schedule 2 entity in terms of the Public Finance Management Act (1999). The company operates in the transportation and logistics sector, with a primary focus on rail, ports and pipelines.

To support economic growth and job creation and lower the cost of doing business, the company plans to spend 73.8 per cent (R245 billion) of its total budget over the medium term on building and upgrading rail infrastructure, R89.3 billion on ports infrastructure and R15.7 billion on pipeline infrastructure. Spending on freight rail activities accounts for an estimated 56.4 per cent (R186.8 billion) of total spending over the period ahead. Compensation of employees constitutes an estimated 33.4 per cent (R108.5 billion) of total spending, while goods and services constitute an estimated 27.7 per cent (R92.7 billion). Total expenditure is expected to increase at an average annual rate of 5.1 per cent, from R98.9 billion in 2024/25 to R114.9 billion in 2027/28.

Transnet derives its revenue mainly through its freight, port and pipeline operations. Revenue is expected to increase at an average annual rate of 8.4 per cent, from R100 billion in 2024/25 to R127.4 billion in 2027/28. This increase is mainly attributed to the projected increase in volumes, tariffs and rental income from leasing property and rolling stock.

### Programmes/Objectives/Activities

### Vote purpose

Ensure the availability of water resources to facilitate equitable and sustainable socioeconomic development and ensure universal access to water and sanitation services.

### Mandate

The mandate of the Department of Water and Sanitation, as set out in the Water Services Act (1997) and the National Water Act (1998), is to ensure that the country's water resources are protected, managed, used, developed, conserved and controlled by regulating and supporting the delivery of effective water supply and sanitation. This is done in accordance with the requirements of water-related legislation and policies, which are critical in honouring people's rights to have enough food and water, growing the economy and eradicating poverty.

1. No historical data available.

2. Target achieved.

## Expenditure overview

Over the medium term, the department will prioritise efforts to improve service delivery and support maintenance of public infrastructure. This will entail focusing on providing reliable water and sanitation services; improving the regulation of water quality through the application of blue drop, green drop and no drop incentive schemes; and prioritising the integration of water resource planning and development, and the sustainability of waterboards.

Expenditure is expected to decrease marginally, by 0.8 per cent, from R23.8 billion in 2024/25 to R23.3 billion in 2027/28, as allocations from the budget facility for infrastructure come to an end in 2027/28 and transfers to the Water Trading Entity decrease. Transfers and subsidies constitute an estimated 64.6 per cent (R48 billion) of total spending over the medium term, while compensation of employees accounts for 8.6 per cent (R6.6 billion).

### Providing reliable water and sanitation services

To improve the provision of reliable water and sanitation services in municipalities, over the medium term, the department plans to complete 60 regional bulk infrastructure project phases (15 mega, 32 large and 13 small) and 291 small water infrastructure projects through the *regional bulk infrastructure grant* and the *water services infrastructure grant*, which supports municipal water services authorities and certain water boards. The department also plans to construct new water and sanitation infrastructure and refurbish existing infrastructure over the MTEF period to respond to recent water shortages. In doing so, it will accelerate the provision of interim and intermediate water supply to rural communities in the 27 district municipalities, also through the *water services infrastructure grant*. With funds from the *regional bulk infrastructure grant* amounting to R19.8 billion over the medium term, municipalities will continue to construct water and sanitation infrastructure to enable them to provide essential services. These grants are funded through the *Water Services Management* programme, which is allocated R43.2 billion over the next 3 years.

The department plans to strengthen its role in regulating, supporting and intervening in municipalities where water and sanitation services are degrading. Over the medium term, it will focus on strategic areas such as water use efficiency, water demand, conservation management and non-revenue water. This work is carried out in the *Water Services and Local Management* subprogramme in the *Water Services Management* programme. Spending in the subprogramme is expected to increase at an annual average rate of 6 per cent, from R380.2 million in 2024/25 to R453 million in 2027/28.

### Regulating water quality and access

As part of its regulatory oversight role, over the medium term, the department plans to assess 1 004 wastewater systems in 2025/26 and 2027/28 for compliance with the green drop regulatory requirements and assess 1 032 water supply systems in 2026/27 for compliance with blue drop requirements. For this purpose,

R768.3 million is allocated over the medium term to the *Water Resources Regulation* subprogramme in the *Water Resources Management* programme. With R1.3 billion from the *Water Services and Local Management* subprogramme in the *Water Services Management* programme, the department also plans to assess 144 water services authorities for compliance with no drop regulatory requirements in 2026/27.

Over the next 3 years, the department plans to reduce the turnaround time for processing water use licence applications from 300 days to 90 days. This is also funded through the *Water Resources Regulation* subprogramme in the *Water Resources Management* programme, in which overall spending is expected to increase at an annual average rate of 4.6 per cent, from R234.3 million in 2024/25 to R268.2 million in 2027/28.

### ***Integrating and improving water resource planning and development***

To ensure that there is a sustainable supply of water to meet the demands of a growing population and to facilitate economic growth, planning and development need better integration at all levels. Accordingly, the department will continue to invest in 17 strategic infrastructure projects over the medium term. These include the uMkhomazi bulk water supply scheme; raising the Clanwilliam Dam wall; and the phases 2D and 2F of the Olifants management model programme for bulk water distribution infrastructure, which includes pipelines, reservoirs and reticulation, as well as other projects aimed at meeting high water demand for large strategic users such as Eskom, Sasol and Exxaro.

These projects are funded through transfers to the Water Trading Entity, which are made through the *Water Resources Infrastructure Management* subprogramme in the *Water Resources Management* programme. However, transfers to the entity are expected to decrease at an average annual rate of 2.5 per cent, from R5.2 billion in 2024/25 to R4.8 billion in 2027/28, due to additional funding from the budget facility for infrastructure coming to an end in 2026/27 as projects are completed.

The department intends to diversify its water mix over the period ahead by exploring other sources such as groundwater and aquifer systems, and by treating acid mine drainage water and desalinating sea water. There are also plans in place to rehabilitate conveyance systems (infrastructure constructed for the purpose of transferring water from a natural water sources to points of use) to secure water supply and reduce reliance on surface water. Funding for these initiatives is allocated in the *Water Resources Infrastructure Management* subprogramme in the *Water Resources Management* programme, allocations to which are expected to decrease at an average annual rate of 2.2 per cent, from R5.5 billion in 2024/25 to R5.2 billion in 2027/28, due to anticipated decreases in transfers to the Water Trading Entity.

## Programme 1: Administration

### Programme purpose

Provide strategic leadership, management and support services to the department. Develop and promote international relations on water resources with neighbouring countries.

### Objectives

- Facilitate cooperation by implementing and evaluating the approved African and global international relations plan annually in support of the national water and sanitation agenda.
- Establish and sustain stakeholder engagements and partnerships in the water and sanitation sector by implementing an annual stakeholder management and partnerships programme.

## Subprogrammes

- *Ministry* provides administrative support to the minister, the deputy minister(s) and their support staff, and makes provision for their salaries.
- *Departmental Management* provides policy and strategic direction for water and sanitation management. This includes enterprise-wide support services comprising administrative support to the director-general, organisational planning, performance monitoring and the development of organisational structures.
- *Corporate Services* provides enterprise-wide support comprising human resources, legal services, communications, and the learning and development academy.
- *Financial Management* ensures the efficient management of daily financial operations, processes and systems.
- *Office Accommodation* makes payments for rental charges on all leased office space occupied by the department, and for municipal services such as electricity, water, and sewage and waste removal.
- *Provincial and Entity Governance and International Cooperation* coordinates entity oversight, the development of sector partnerships, the transformation agenda and international relations with neighbouring countries.

## Programme 2: Water Resources Management

### Programme purpose

Ensure that South Africa's water resources are protected, used, developed, conserved, managed, controlled and planned in an integrated and sustainable manner.

### Objectives

- Effectively manage water demand and supply on an ongoing basis by:
  - maintaining 6 water information systems
  - updating climate change risk and vulnerability assessments.

- Ensure the effective and sustainable management of water resources by distributing and monitoring funds transferred to the Water Trading Entity for the design, construction, commissioning and rehabilitation of bulk raw water infrastructure, including dam safety rehabilitation, on an ongoing basis.
- Ensure the equitable allocation of water resources for social and economic development by finalising 80 per cent of applications to authorise water use within 90 working days on an ongoing basis.
- Protect and restore ecological infrastructure by classifying water resources and determining 2 water resource quality objectives of river systems in 2026/27 and 2027/28.
- Assess catchment management agencies performance in water user compliance monitoring and enforcement activities to ensure South African water is protected, used, developed, conserved, managed, controlled and planned in an integrated and sustainable manner on an ongoing basis.

## Subprogrammes

- *Water Resources Management Support* provides strategic leadership, management and support services to the programme and makes provisions for associated salaries.
- *National Water Resources Planning* develops comprehensive plans for the availability of adequate water resources to guide infrastructure development, systems and services management in the water sector.
- *Water Ecosystems Management* develops and implements measures to protect water resources. This entails determining measures to manage water resources, and developing guidelines and protocols for pollution control and rehabilitation.
- *National Water Resources Information and Management* ensures the development and maintenance of data and information management systems to enable informed decisions in the water sector.
- *Water Resources Infrastructure Management* develops, rehabilitates and refurbishes bulk raw water resources infrastructure to meet South Africa's socioeconomic and environmental needs.
- *Water Resources Policy, Strategy and Evaluation* develops, monitors and reviews management policies and procedures for water resources.
- *Water Resources Regulation* develops, implements, monitors and reviews regulations on water resources, particularly the regulation of raw water pricing, the authorisation of water use, compliance monitoring and enforcement, dam safety, resource protection and waste.
- *Water Resources Institutional Oversight* augments the water resource management functions devolved to catchment management agencies that cannot be fully recovered from the water users.

## Programme 3: Water Services Management

### Programme purpose

Develop, rehabilitate and refurbish water services infrastructure to meet the socioeconomic and environmental needs of South Africa.

### Objectives

- Ensure adequate water availability through the development and management of infrastructure for water services and enhance the provision of dignified sanitation by:
  - monitoring the implementation of the water and sanitation reliability plans of 44 district municipalities over the medium term
  - implementing 82 regional bulk infrastructure project phases over the medium term
  - assessing annual municipal strategic self-assessments across all water services authorities on an ongoing basis
  - transferring funds and monitoring the performance of municipalities using the *regional bulk infrastructure grant* and *water services infrastructure grant* in terms of the annual Division of Revenue Act.

### Subprogrammes

- *Water Services Management Support* provides strategic leadership, management and support services to the programme, and makes provision for associated salaries (including the budget for the salaries of provincial heads).
- *Water Services and Local Management* develops comprehensive plans that guide water and sanitation services and management across the value chain.
- *Regional Bulk Infrastructure Grant* provides for the development of new infrastructure; the refurbishment, upgrading and replacing of aging infrastructure; and the servicing of extensive areas across municipal boundaries.
- *Water Services Regulation* develops, implements, monitors and reviews water services regulations, particularly the compliance of water services authorities with water supply regulations.
- *Water and Sanitation Services Policy, Strategy and Evaluation* develops and reviews water services policies, procedures, norms and standards; and monitors their implementation.
- *Water Services Infrastructure Grant* provides for the construction of new infrastructure and the rehabilitation of existing water and sanitation infrastructure through the grant transfer of water services schemes to water services institutions.

- *Water Services Interventions* determines and implements priority interventions to improve poor service delivery in water services authorities and incorporates the construction management unit that implements water services projects.

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2026/27
Percentage of water registrations finalised per year	Water projects	Outcome 3: Structural reforms to drive growth and competitiveness	86.5% (416/481)	97.1% (465/479)	97% (485/500)	85%	80%	80%	80%
Percentage development of the catchment management strategy	Water resources management	Outcome 4: Increased infrastructure investment and job creation	– <sup>1</sup>	– <sup>1</sup>	– <sup>1</sup>	30%	70%	100%	– <sup>2</sup>
Percentage of pollution incidents responded to within 78 hours of reporting	Water resources management	Outcome 16: Improved service delivery at local government	– <sup>1</sup>	– <sup>1</sup>	– <sup>1</sup>	85%	100%	100%	100%

1. No historical data available.

2. Development of strategy completed.

## Entity overview

The former Breede-Gouritz Catchment Management Agency was established in 2005 in terms of the National Water Act (1998). In November 2022, the agency's boundary and area of operation was extended to form the Breede-Olifants Catchment Management Agency. The agency is mandated to protect the use of water resources in its area of operation through resource allocation, protection, use, conservation, monitoring, planning, development and operations.

Over the medium term, the agency plans to engage with users in the Breede-Olifants water management area as part of its public participation programme to raise awareness about all elements of water use, including conservation and management; monitor and authorise their water usage; and finalise 80 per cent of user registrations each year. It also plans to finalise a catchment management strategy by 2026/27 to guide the management of water resources and respond to incidents of pollution within the water management area within 78 hours of reporting.

Total expenditure is expected to increase at a marginal average annual rate of 0.6 per cent, from R214 million in 2024/25 to R217.8 million in 2027/28, in line with revenue from water resource and wastewater charges. Spending on compensation of employees is set to increase at average annual rate of 7.4 per cent, from R120.6 million in 2024/25 to R149.4 million in 2027/28, because of cost-of-living adjustments. Spending on goods and services is set to decrease at an average annual rate of 9.9 per cent, from R93.4 million in 2024/25 to R68.4 million in 2027/28, as the agency finalises its catchment management strategy by 2026/27. Goods and services items include consultants, computer equipment, vehicles and office furniture.

The agency is set to derive 57.8 per cent (R333.4 million) of its revenue over the medium term through water resource management charges, wastewater charges and income from a cooperation agreement with the South African National Biodiversity Institute. Transfers from the department are expected to account for 42.2 per cent (R288.4 million) of total revenue, increasing at an average annual rate of 16.4 per cent, from R63.7 million in 2024/25 to R100.5 million in 2027/28, because of the agency expanding its service area to cover the entire Western Cape.

Volume <sup>1</sup> of bulk water sales by Vaal Central Water per year	Bulk activities		— <sup>2</sup>	— <sup>2</sup>	183 935	188 922	191 981	193 851	195 739

1. Measured in megalitres.

2. On 3 July 2023, Bloem Water was renamed Vaal Central Water in terms of section 28 (1) (b) of the Water Services Act (1997).

3. Mhlathuze Water was dissolved on 30 June 2023 in terms of section 28 of the Water Services Act (1997) and merged with Umgeni Water to form the uMngeni-uThukela Water.

### Entity overview

The water boards are mandated in terms of the Water Services Act (1997) to provide bulk industrial water services to industries and bulk potable water services to municipalities within their areas of operation. The water boards vary in size, activity, customer mix, revenue base and capacity. The two largest boards are Rand Water and uMngeni-uThukela Water, whose combined bulk sales are set to account for an estimated 82.6 per cent (R30.7 billion) of total sales in 2025/26.

Consolidated expenditure is expected to increase at an average annual rate of 7.7 per cent, from R33.5 billion in 2024/25 to R41.8 billion in 2027/28, with goods and services (mainly materials and supplies) constituting 74.2 per cent (R86.6billion) of this spending over the medium term. The water boards' main cost drivers are the rising costs of raw water due to increased water demand, higher energy tariffs imposed by Eskom and higher chemical costs attributable to increased turbidity levels in raw water.

Revenue, derived mainly from the sale of water, is set to increase at an average annual rate of 8.7 per cent, from R38.2 billion in 2024/25 to R49.2 billion in 2027/28.

### Programmes/Objectives/Activities

Percentage of high-risk water use licence applications processed and recommended within 74 working days	Protection and use of water resources		—1	—1	—1	—1	≥90%	≥90%	≥90%
Percentage of planned inspections conducted for related uses of various sectors per year	Protection and use of water resources		—1	—1	—1	—1	≥95%	≥95%	≥95%

1. No historical data available.

## Entity overview

The former Inkomati Catchment Management Agency was established in 2004 in terms of the National Water Act (1998), and its area of operation was extended in May 2014 to form the Inkomati-Usuthu Catchment Management Agency. The agency is mandated to protect the use of water resources in its area of operation through resource allocation, protection, use, conservation, monitoring, planning, development and operations.

Over the medium term, the agency will continue to focus on implementing effective river operations within the Inkomati-Usuthu water management area to manage floods, droughts, and surface and groundwater resources. This will be achieved over the MTEF period by monitoring 25 strategic ecological water requirement points per year for resource quality, processing and recommending at least 90 per cent of high-risk water use licence applications within 74 working days and conducting at least 95 per cent of planned inspections for the related uses of various sectors. These activities will be carried out in the protection and use of water resources programme, which accounts for an estimated 44.2 per cent (R298.7 million) of total spending over the next 3 years.

Total expenditure is expected to increase at an average annual rate of 19.3 per cent, from R140.3 million in 2024/25 to R238.2 million in 2027/28, as spending on compensation of employees increases due to cost-of-living adjustments, the agency prioritising the filling of critical posts and reviewing unadjusted salary components. Compensation of employees constitutes an estimated 69 per cent (R449.9 million) of expenditure over the medium term.

The agency is set to derive 61.2 per cent (R438.4 million) of its revenue through transfers from the department and the remaining 38.8 per cent (R242.3 million) from water resource charges, wastewater discharge charges and interest. Total revenue is set to increase at an average annual rate of 19.3 per cent, from R140.3 million in 2024/25 to R238.2 million in 2027/28, in line with expenditure.

### Entity overview

Rand Water was established in terms of the Water Services Act (1997). It serves an estimated 18 million people, providing bulk potable water in Gauteng and parts of Mpumalanga, Free State and North West. The entity stores, treats and delivers water to municipalities, mines, industries, farmers and households.

The entity will continue to focus on meeting projected demand over the medium term by selling an estimated 5.4 million megalitres of water, refurbishing infrastructure and maintaining the average loss of non-revenue water at 4.7 per cent. Given the projected increase in water demand from the current 4 554 megalitres per day to 5 500 megalitres per day by 2030, Rand Water will focus on refurbishing and augmenting its infrastructure through projects such as pipeline renewals and the construction of reservoirs at an estimated cost of R46.5 billion over the medium term. In line with these investments, spending is expected to increase at an average annual rate of 9.1 per cent, from R19.1 billion in 2024/25 to R24.8 billion in 2027/28.

Bulk water sales constitute an estimated 93.9 per cent (R79.1 billion) of total revenue over the medium term, increasing at an average annual rate of 8.8. per cent, from R22.4 billion in 2024/25 to R28.8 billion in 2027/28. Total revenue is expected to increase at an average annual rate of 9.3 per cent, from R23.6 billion in 2024/25 to R30.8 billion in 2027/28, driven by increased demand for the water board's products and services.

## Trans-Caledon Tunnel Authority

### Selected performance indicators

**Table 41.28 Trans-Caledon Tunnel Authority performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Percentage completion of 160km pipeline	Mokolo-Crocodile water augmentation project	Outcome 4: Increased infrastructure investment and job creation	–1	–1	–1	–1	5%	25%	45%
Percentage completion of 6.3km pipeline	Berg River-Voëlvlei augmentation scheme		–1	–1	–1	–1	0%	30%	100%

1. No historical data available.

### Entity overview

The Trans-Caledon Tunnel Authority is a specialised liability management entity that derives its mandate from the National Water Act (1998). It is responsible for financing and implementing the development of bulk raw water infrastructure and providing treasury management services to the department. The authority will merge with the Water Trading Entity over the medium term to form the National Water Resources Infrastructure Agency.

Over the medium term, the agency will continue to implement the Berg River-Voëlvlei augmentation scheme,

which is expected to increase the yield of the Western Cape water supply system, which serves the City of Cape Town, by 23 million cubic metres a year; implement phase 2 of the Mokolo-Crocodile water augmentation project, which augments bulk raw water supply by 30 million cubic metres per year from the Mokolo Dam to Medupi and Matimba power stations; and implement phase 1 of the uMkhomazi water project to increase the yield of the uMngeni system from 394 million cubic metres to 608 million cubic metres per year by December 2032. The capital expenditure required for the construction of these strategic water resource projects is expected to increase at an average annual rate of 24.1 per cent, from R5.3 billion in 2024/25 to R10.2 billion in 2027/28. These projects will result in the provision of new infrastructure, the rehabilitation and upgrading of existing infrastructure, and improvements to the management of water and sanitation infrastructure.

The authority generates revenue through the fees it charges for financing and managing projects for the department. Revenue is expected to increase at an average annual rate of 8.1 per cent, from R5.2 billion in 2024/25 to R6.6 billion in 2027/28, mainly driven by revenue generated from the construction of water infrastructure.

## uMngeni-uThukela Water

### Selected performance indicators

**Table 41.32 uMngeni-uThukela Water performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Costs per kilolitre per year	Bulk activities	Outcome 16: Improved service delivery at local government	R5.41	R5.58	R7.13	R8.66	R9.54	R10.68	R11.67
Weighted average cost of capital per year	Bulk activities		10.8%	11%	11%	12.1%	12%	11.9%	11.9%
Volume (megalitres) of water sold per year	Bulk activities		562 483	580 726	649 420	605 896	577 767	568 682	569 624

### Entity overview

The former Umgeni water board was established in terms of the Water Services Act (1997) to provide water and sanitation services in its service area, which comprised mostly rural areas in KwaZulu-Natal and the eThekweni metropolitan area. The entity's area of operation was expanded in May 2023 to incorporate the former Mhlathuze Water board's area of operation and renamed uMngeni-uThukela Water. The entity supplies water and sanitation services to an estimated 12.4 million people.

Over the medium term, the entity will continue with the construction of the potable water component of the uMkhomazi water project; the Stephen Dlamini Dam, which provides a yield of 3.1 million cubic metres per year (8.4 megalitres per day); the Ncwabeni off-channel storage dam project, which will increase the yield of the uMzimkulu River to fulfil the water resource requirements of Umzumbe municipality; the implementation of the raw water component in the lower uMkhomazi bulk water supply scheme project; the upgrading of the Thukela-Goedertrouw inter-basin transfer scheme, which is critical for providing raw water security to the Richards Bay area, particularly during droughts; and 2 rural development projects – phase 1 of the greater Mpofana regional scheme and phase 3 of the Maphumulo bulk water supply scheme.

To cater for these activities, total expenditure is expected to increase at an average annual rate of 2.2 per cent, from R7.3 billion in 2024/25 to R7.8 billion in 2027/28. Revenue is expected to increase at an average annual rate of 6.4 per cent, from R8.2 billion in 2024/27 to R9.9 billion in 2027/28, mainly driven by an anticipated increase in the sale of bulk water.

## Water Research Commission

### Selected performance indicators

**Table 41.36: Water Research Commission performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of emerging researchers supported for capacity building per year	Research and development	Outcome 3: Structural reforms to drive growth and competitiveness	250	432	262	250	250	265	300
Percentage of water quality and health research projects initiated per year	Research and development	Outcome 17: Improved governance and performance of public entities	— <sup>1</sup>	— <sup>1</sup>	— <sup>1</sup>	— <sup>1</sup>	25%	25%	25%
Percentage of water use research initiated per year	Research and development		— <sup>1</sup>	— <sup>1</sup>	— <sup>1</sup>	— <sup>1</sup>	40%	40%	40%
Percentage of water availability research projects initiated per year	Research and development		— <sup>1</sup>	— <sup>1</sup>	— <sup>1</sup>	— <sup>1</sup>	30%	30%	30%

<sup>1</sup>No historical data available.

### Entity overview

The Water Research Commission's legislative mandate is set out in the Water Research Act (1971). Its primary functions include promoting coordination, cooperation and communication in water research and development; establishing water research needs and priorities; enhancing knowledge and building capacity within the water sector; and stimulating and funding priority-based water research.

Over the MTEF period, the commission will continue to focus on 5 strategic areas: water availability, water use, water quality and health, water advisory support and knowledge. In line with this, the commission's projects over the period ahead will be measured against the percentage of research projects it initiates (25 per cent of projects per year related to water quality and health, 40 per cent of projects per year on water use and 30 per cent per year on water availability). These activities, along with providing support to emerging researchers, will be funded through the research and development programme, in which spending is expected to decrease at an average annual rate of 6.5 per cent, from R233.5 million in 2024/25 to R190.7 million in 2027/28.

Expenditure is expected to decrease at an average annual rate of 0.6 per cent, from R459.1 million in 2024/25 to R451.1 million in 2027/28. This is due to fluctuations in leverage income and associated research expenditure in respect of projects funded by partners. The commission is set to generate 78.1 per cent (R1.1 billion) of its revenue over the period ahead through water research levies and the remainder through donations, royalties, recovery of study bursaries and insurance settlement claims. Revenue is expected to decrease in line with spending.

### Programmes/Objectives/Activities

**Table 41.37 Water Research Commission expenditure trends and estimates by programme/objective/activity**

## Water Trading Entity

### Selected performance indicators

**Table 41.40 Water Trading Entity performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets			
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28	2027/28
Number of raw water projects completed per year	Operations, maintenance and refurbishment of national water resources schemes	Outcome 4: Increased infrastructure investment and job creation	– <sup>1</sup>	1	– <sup>1</sup>	– <sup>1</sup>	1	– <sup>1</sup>	1	1
Number of dam safety rehabilitation projects completed per year	Implementation of dam safety projects		1	– <sup>1</sup>	– <sup>1</sup>	2	2	1	2	2
Percentage of water users validated within the catchment area per year	Implementation of water resources management activities		63.2% (612/ 968)	62.3% (562/ 902)	60.4% (811/ 1 342)	80%	80%	80%	80%	80%
Percentage of planned maintenance projects completed per year as per the approved asset management plan	Operations, maintenance and refurbishment of national water resources schemes		44.2% (351/ 795)	45.2% (473/ 1 046)	38.7% (474/ 1 224)	70%	70%	70%	70%	70%
Percentage of unscheduled maintenance projects completed per year as a proportion of planned maintenance projects	Operations, maintenance and refurbishment of national water resources schemes		39.2% (312/ 795)	34.8% (364/ 1 046)	10.3% (126/ 1 224)	≤30%	≤30%	≤30%	≤30%	≤30%

1. As these are infrastructure projects that take more than 1 year to complete, the department commences with a project only every alternate year.

### Entity overview

The Water Trading Entity was established in 1983 to manage water infrastructure and resources and the sale of raw water. It was converted into a trading entity in 2008 in terms of the Public Finance Management Act (1999). Over the MTEF period, the entity will continue to focus on maintaining existing water resource infrastructure, supporting the long-term sustainability of water resources, and supplying bulk water to strategic users such as large industrial companies to stimulate and support economic development.

To leverage the entity's assets to finance water resource infrastructure more equitably and efficiently, it is expected to have finalised its merger with the Trans-Caledon Tunnel Authority to form the National Water Resources Infrastructure Agency over the medium term. This will help generate funding for national water resource infrastructure projects through raising capital from financial markets, including banks, pension funds and development finance to make it less reliant on the fiscus.

The financing and investment in raw water infrastructure programme makes transfers to the Trans-Caledon Tunnel Authority for the repayment of loans, interest and management fees. Allocations to the programme are set to increase at an average annual rate of 4.5 per cent, from R11.7 billion in 2024/25 to R13.4 billion in 2027/28.

In each year over the medium term, the entity plans to implement 70 per cent of planned infrastructure maintenance projects and retain unscheduled maintenance at below 30 per cent of the annual asset maintenance plan. Related activities are funded through the operations, maintenance and refurbishment of national resources programme. The programme's budget is estimated to increase at an average annual rate of 4.5 per cent, from R2.5 billion in 2024/25 to R2.9 billion in 2027/28.

Through the bulk water supply to strategic users programme, the entity plans to measure the operational functionality of the national water resource infrastructure in adherence to bulk water supply agreements to strategic users such as Eskom and Sasol. Allocations to the programme increase at an average annual rate of 4.5 per cent, from R3.3 billion in 2024/25 to R3.7 billion in 2027/28.

The entity receives transfers from the department for strategic infrastructure projects. Over the medium term, these include the raising of the Clanwilliam Dam wall; the uMkhomazi bulk water supply scheme; the Olifants management model programme (phases 2B and 2B+ of the raw water pipeline and phases 2D and 2F for bulk distribution water infrastructure), including pipelines, reservoirs and reticulation. Funding for these projects, amounting to R4.2 billion over the MTEF period, is made available through the budget facility for infrastructure.

Total expenditure is expected to increase at an average annual rate of 4.5 per cent, from R19 billion in 2024/25 to R21.7 billion in 2027/28. The entity expects to generate 72.6 per cent (R57.5 billion) of its revenue over the MTEF period from the sale of raw water, while transfers from the department account for 23.9 per cent (R19.8 billion). Total revenue is expected to increase at an average annual rate of 1.8 per cent, from R23.9 billion in 2024/25 to R25.2 billion in 2027/28.

## Other entities

The following entities will be receiving transfers from the department from 1 April 2025 after taking over water resource management functions that were previously carried out by the Water Trading Entity.

- The **Limpopo-Olifants Catchment Management Agency** was established in terms of the National Water Act (1998). It is mandated to protect the use of water resources in the Limpopo-Olifants water management area. Its functions include resource allocation, protection, use, conservation, monitoring, planning, development and operations. As the entity is not yet generating any revenue, it is set to receive transfers from the department amounting to R99.3 million over the next 3 years to cover its operations and expenditure.
- The **Mzimvubu-Tsitsikamma Catchment Management Agency** was established in terms of the National Water Act (1998) with a mandate to protect the use of water resources in the Mzimvubu-Tsitsikamma water management area. Its functions include resource allocation, protection, use, conservation, monitoring, planning, development and operations. As the agency is not yet generating any revenue, it is set to receive transfers from the department amounting to R70.7 million over the next 3 years to cover its operations and expenditure.
- The **Pongola-Umzimkulu Catchment Management Agency** was established in terms of the National Water Act (1998) with a mandate to protect the use of water resources in the Pongola-Umzimkulu water management area. Its functions include resource allocation, protection, use, conservation, monitoring, planning, development and operations. As the agency is not yet generating any revenue, it is set to receive transfers from the department amounting to R70.7 million over the next 3 years to cover its operations and expenditure.
- The **Vaal-Orange Catchment Management Agency** was established in terms of the National Water Act (1998) with a mandate to protect the use of water resources in the Vaal-Orange water management area. Its functions include resource allocation, protection, use, conservation, monitoring, planning, development and operations. As the entity is not yet generating any revenue, it is set to receive transfers from the department amounting to R88.9 million over the next 3 years to cover its operations and expenditure.

## Vote purpose

*Provide equitable access to land, integrated rural development, sustainable agriculture and food security for all.*

## Mandate

The Department of Land Reform and Rural Development is mandated to facilitate equitable access to land, promote comprehensive rural development and address the historical injustices of land dispossession by implementing land restitution programmes and supporting sustainable livelihoods across rural areas. The department's mandate is guided by a legislative framework that includes the:

- Deeds Registries Act (1937), which makes provision for the administration of the land registration system and the registration of land rights
- State Land Disposal Act (1961), which makes provision for the disposal of certain state land and prohibits the acquisition of state land by prescription
- Provision of Land and Assistance Act (1993), which makes provision for the designation of certain land, the regulation of the subdivision of such land and the settlement of people thereon. It also provides for the acquisition, maintenance, planning, development, improvement and disposal of property and the provision of financial assistance for land reform
- KwaZulu-Natal Ingonyama Trust Act (1994), which makes provision for the establishment of the Ingonyama Trust and allows for certain land to be held in trust
- Restitution of Land Rights Act (1994), which makes provision for the restitution of rights to land to people or communities dispossessed of such rights after 19 June 1913 because of racially discriminatory laws or past practices
- Interim Protection of Informal Land Rights Act (1996), which makes provision for the temporary protection of certain rights to and interests in land that are not otherwise adequately protected by law
- Land Reform (Labour Tenants) Act (1996), which makes provision for security of tenure for labour tenants and those occupying or using land because of their association with labour tenants. It also makes provision for the acquisition of land and rights in land by labour tenants
- Extension of Security of Tenure Act (1997), which makes provision for facilitating the long-term security of land tenure, regulating the conditions of residence on certain land and regulating the conditions on and circumstances under which the right of people to reside on land may be terminated
- Land Survey Act (1997), which provides for the regulation and surveying of land in South Africa

- Spatial Planning and Land Use Management Act (2013), which seeks to facilitate the transformation of South Africa's settlement patterns by adopting an innovative approach to spatial planning and the management of land use.

## Selected performance indicators

**Table 42.1 Performance indicators by programme and related outcome**

Indicator	Programme	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of infrastructure projects completed per year	Rural Development	Outcome 4: Increased infrastructure investment and job creation	76	197	174	58	33	35	35
Number of young people trained through the national rural youth service corps programme per year	Rural Development	Outcome 1: Increased employment and work opportunities	1 679	1 079	2 889	1 751	681	1 000	1 500
Number of hectares allocated per year	Land Reform and Restitution	Outcome 10: Reduced poverty and improved livelihoods	3 429	42 456	67 376	44 578	44 000	46 000	48 000
Number of land claims finalised per year	Land Reform and Restitution		442	80	641	389	271	284	289

## Expenditure overview

Over the medium term, the department will focus on accelerating land reform, finalising restitution claims, administering land, creating opportunities for young people in rural areas and accelerating socioeconomic projects. Expenditure is expected to increase at an average annual rate of 5.9 per cent, from R9.1 billion in 2024/25 to R10.8 billion in 2027/28. Transfers and subsidies account for an estimated 40.8 per cent (R12.7 billion) of total expenditure over the medium term and spending on compensation of employees accounts for an estimated 27.8 per cent (R8.6 billion). The bulk of the department's transfers over the medium term are to land reform and restitution grants (R8.5 billion) and its public entities (R3.5 billion).

As part of the 2024 national macro organisation of government, the Department of Agriculture, Rural Development and Land Reform was split into two departments, the Department of Agriculture and Department of Land Reform and Rural Development. The split is expected to be finalised by 31 March 2025.

### Accelerating land reform

Over the medium term, the department will proactively prioritise the acceleration of land reform by identifying suitable for land redistribution that has a high potential for development. This will be achieved by analysing vacant, unused and underused state land and implementing and coordinating the state land lease disposal policy and the land allocation and beneficiary selection policy to ensure that land is allocated fairly to historically disadvantaged communities. To this end, the department plans to procure 138 000 hectares of strategic land for redistribution at an estimated cost of R3 billion over the medium term in the *Agricultural Land Holding Account* subprogramme in the *Land Reform and Restitution* programme.

The department aims to provide necessary post-settlement support, such as farming training, production inputs and linkages to markets, to qualifying beneficiaries to ensure that land that is acquired and redistributed remains productive. Expenditure for these activities is projected to amount to R826.6 million over the medium term in the same subprogramme.

### Finalising restitution claims

The department aims to expedite the finalisation of all outstanding land claims by prioritising those that have been unresolved for extended periods, particularly all pre-1998 claims lodged under the Restitution of Land Rights Act (1994). To finalise a targeted 844 land restitution claims, R11.6 billion over the medium term is allocated in the *Restitution* subprogramme in the *Land Reform and Restitution* programme.

## Creating opportunities for young people in rural areas

Through the national rural youth service corps programme, the department will aim to provide 3 181 young people with training in fields such as gardening, horticulture, and plant and animal production. After completing their training, young people are deployed in various rural communities in an effort to increase productivity and improve standards of living. R569.8 million over the MTEF period is allocated for this work in the *National Rural Youth Services Corps* subprogramme in the *Rural Development* programme.

## Accelerating socioeconomic projects

As part of the department's efforts to accelerate socioeconomic advancement, the department plans to complete 103 infrastructure projects over the period ahead. These are intended to improve quality of life for people in rural areas and provide greater opportunities. Planned projects over the medium term include the construction of animal handling facilities, fencing, irrigation schemes, community centres, access roads, solar projects for rural farmers in Northern Cape and the completion of the Makhathini Gin cotton project in Jozini, KwaZulu-Natal. R2.1 billion over the period ahead is budgeted for this work in the *Rural Infrastructure Development* subprogramme in the *Rural Development* programme.

## Programme 2: Land Administration

### Programme purpose

Provide and maintain an inclusive, effective and comprehensive system of planning, geospatial information and cadastral surveys; legally secure tenure; and conduct land administration that promotes social, economic and environmental sustainability.

### Objectives

- Ensure spatial transformation and efficient land administration by:
  - rolling out and implementing the electronic deeds registration system over the medium term
  - processing general plans, sectional plans and diagrams within 14 working days by 2027/28.

### Subprogrammes

- *National Geomatics Management Services* examines and approves all surveys of land and real rights intended to be registered in the deeds office; maintains records and data related to property boundaries; maintains and revises maps of property boundaries; provides cadastral advisory services to other government institutions; promotes and controls all matters related to geodetic and topographical surveying; establishes and maintains a network of national georeferencing stations; facilitates state surveys related to land reform; and provides cadastral and geospatial information services, including infrastructure for spatial data.
- *Spatial Planning and Land Use* provides for national land use management and spatial planning systems; develops spatial plans for rural areas in terms of the national spatial development framework; provides for the development of national technical tools, policies, standards and guidelines for geospatial information management; ensures compliance with the Spatial Planning and Land Use Management Act (2013) through the development of guidelines, norms, and standards; ensures compliance with the Planning Profession Act (2002) and supports the South African Council for Planners; and ensures compliance with the Spatial Data Infrastructure Act (2003) and supports the committee for spatial information. This subprogramme also provides spatial data infrastructure and professional and technical support to organs of state.
- *Deeds Registration* provides a deeds registration system in which secure titles are registered and accurate information is provided.
- *South African Council of Planners* makes annual transfers to the South African Council for Planners, a non-profit organisation dealing with registrations and other activities in the planning profession.
- *South African Geomatics Council* regulates and promotes the transformation of the geomatics profession.
- *Integrated Land Administration* provides an overarching, coordinated and streamlined land administration system that underpins economic, social, institutional and environmentally sustainable development.

- *South African Spatial Data Infrastructure* provides a national technical institution and policy framework to facilitate the capturing, management, maintenance, integration, distribution and use of spatial information and data in South Africa.

## Expenditure trends and estimates

2. Rand million.

## Programme 3: Land Reform and Restitution

### Programme purpose

Acquire and redistribute land.

### Objective

- Redress equitable access to land by conducting research and finalising land claims on an ongoing basis.

### Subprogrammes

- *Commission on Restitution of Land Rights* investigates and negotiates land restitution claims and recommends settlements in terms of the Restitution of Land Rights Act (1994).
- *Restitution* settles land restitution claims under the Restitution of Land Rights Act (1994).
- *Land Redistribution and Tenure Reform* develops and coordinates policies and programmes in support of the implementation of land redistribution and tenure reform.
- *Agricultural Land Holding Account* is responsible for land acquisition, development support and rates and taxes on land in terms of the Provision of Land and Assistance Act (1993).
- *Ingonyama Trust Board* provides quarterly transfers for administering land owned by the KwaZulu-Natal Ingonyama Trust.
- *Office of the Valuer-General* provides land valuations on land earmarked for reform and restitution.

## Programme 4: Rural Development

### Programme purpose

Facilitate rural development strategies for socioeconomic growth.

### Objective

- Promote an integrated and inclusive rural economy through the coordination and implementation of rural development strategies over the medium term.

### Subprogrammes

- National Rural Youth Service Corps* provides social organisation, youth development and economic upliftment in rural areas.
- Rural Infrastructure Development* facilitates infrastructure development in rural areas.
- Technology Research and Development* develops and adapts innovative and appropriate technologies in rural areas.
- Rural Development Coordination* facilitates, coordinates and supports the planning, implementation, monitoring and reporting on rural development initiatives and programmes implemented by departments in all spheres of government, in line with the integrated rural development sector strategy and comprehensive rural development programme, with the aim of ensuring access to socioeconomic development services.

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of hectares of strategically located land acquired per year	Administration	Outcome 10: Reduced poverty and improved livelihoods	55 235	50 701	34 839	35 355	38 000	40 000	42 000
Number of farms supported through the land development support programme per year	Administration		35	83	66	45	36	27	30

#### Entity overview

The agricultural land holding account was established in terms of the Provision of Land and Assistance Act (1993) for acquiring strategically located land and other movable and immovable properties to be held by the state for use by beneficiaries or lessees of the land reform programme. The entity is further mandated to provide comprehensive farm development support to land reform beneficiaries.

Over the medium term, the entity will focus on acquiring strategically located land, providing financial and technical support to farmers, and ensuring that farms with high commercial capacity are equipped with adequate infrastructure to realise their potential. To this end, over the MTEF period, the entity plans to acquire 120 000 hectares of land and provide financial and technical support to 93 farmers at an estimated cost of R3.1 billion.

Expenditure is set to increase at an average annual rate of 7.5 per cent, from R864.8 million in 2024/25 to R1.1 billion in 2027/28, due to an anticipated increase in expenditure on property payments. The entity expects to derive 80.2 per cent (R3 billion) of its revenue over the period ahead through transfers from the department and the remainder (R692.9 million) through lease revenue and other sources. Revenue is projected to increase at an average annual rate of 4.3 per cent, from R1.1 billion in 2024/25 to R1.3 billion in 2027/28.

1. No historical data available.

2. The board decided not to measure this indicator in this year.

## Entity overview

The KwaZulu-Natal Ingonyama Trust Act (1994) makes provision for 2.8 million hectares of land across KwaZulu-Natal to be held in trust and managed on behalf of communities. The trust is administered for the benefit, material welfare and social wellbeing of the members of the tribe, communities and residents. The KwaZulu-Natal Ingonyama Trust Board, which was established in terms of the act, administers the affairs of the trust.

Over the medium term, the board will focus on improving its administration of land tenure, protecting land from illegal occupants with help from community leaders, and engaging in spatial planning to ensure integrated development. This includes promoting secure tenure and equitable land access to address inequity and improve the quality of life for communities on trust land, and fostering collaborative partnerships with traditional authorities, government entities and other stakeholders.

Expenditure is expected to increase at an average annual rate of 1.9 per cent, from R29.8 million in 2024/25 to R31.5 million in 2027/28, with compensation of employees accounting for a projected 69 per cent (R63.1 million) of total spending over the period ahead. The board is set to receive 76.4 per cent (R71.7 million) of its revenue over the medium term through transfers from the department and generate the remainder through interest. Total revenue is projected to increase in line with spending.

in a timely and cost-effective manner at the estimated cost of R468.3 million over the medium term.

Expenditure is set to increase at an average rate of 4.5 per cent, from R142.8 million in 2024/25 to R163.1 million in 2027/28, with goods and services accounting for an estimated 56.4 per cent (R265.7 million) of the entity's budget over the period ahead. The office expects to derive all of its revenue over the medium term through transfers from the department. Revenue is expected to increase in line with expenditure.

## Registration of deeds trading account

### Selected performance indicators

**Table 42.25 Registration of deeds trading account performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of deeds and documents registered per year	Registration of title deeds	Outcome 10: Reduced poverty and improved livelihoods	1 002 221	960 454	829 709	889 004	894 151	894 901	872 245

### Entity overview

The Deeds Registries Act (1937) makes provision for the administration of the land registration system and the registration of rights in land. It requires that deeds and documents are prepared and lodged in the deeds registry by a conveyancer or public notary, and are scrutinised for accuracy and compliance with common law, case law and statutory law. The main aim of the trading account is to contribute to effective land planning, administration and property registration.

The entity will focus on implementing the electronic deeds registration system over the MTEF period at an estimated cost of R187 million. This is expected to improve security, accessibility, integration and innovation in a cost-effective manner while ensuring a self-sustainable deeds registration system that provides accurate and reliable information for land administration. The system will also accommodate the registration and recording of other insecure land tenure rights.

Expenditure is expected to increase at an average annual rate of 3.9 per cent, from R1.1 billion in 2024/25 to R1.2 billion in 2027/28. Compensation of employees accounts for an estimated 69.1 per cent (R2.4 billion) of the entity's budget over the medium term. The entity mainly generates its own revenue by selling deeds information and registering properties. Revenue is expected to increase in line with expenditure.

### Programmes/Objectives/Activities
