# Foreword

Despite South Africa's ongoing challenges, the 2025 Budget represents a critical step towards the achievement of a balanced and equitable economic future for the country. It focuses on growing the economy through strategic infrastructure investments aimed at accomplishing faster economic growth, while stabilising public finances and supporting vulnerable households.

Consolidated government spending is projected to increase at an average annual rate of 5.6 per cent, from R2.4 trillion in 2024/25 to R2.83 trillion in 2027/28. Notably, an estimated 60 per cent of total non-interest spending over the next 3 years is allocated to supporting the social wage through grants, unemployment insurance and compensation for workplace disability. The state also operates various public employment programmes, spending on which is set to increase by R4.5 billion in 2025/26, while a further R15.2 billion is provisionally allocated over the medium term.

The 2025 Budget adds R46.7 billion for public infrastructure projects across various levels of government over the next 3 years, bringing the total allocation for these projects to an estimated R1.03 trillion. This includes amounts for road (R50.4 billion), energy (R219.2 billion) and water and sanitation (R156.3 billion) infrastructure. As a result of this capital investment, economic development is the fastest-growing function, spending in which is projected to increase at an average annual rate of 8.1 per cent.

No new reductions are proposed over the medium term, but this budget covers spending pressures through additional allocations amounting to R232.2 billion over the period. Included in this are provisional allocations of R70.7 billion for frontline service delivery departments.

As the 2025 Budget accommodates the costs of the first 3-year public service wage agreement since 2018, additional allocations were required for compensation of employees. Government aims to implement the early retirement incentive announced in the 2024 Medium-term Budget Policy Statement to rationalise and rejuvenate the public service. The initiative is expected to motivate up to 30 000 state employees to apply for early retirement over the next 2 years, with R11 billion allocated to support the programme.

This budget lays the foundation for sustainable growth by addressing immediate spending pressures while prioritising investments in infrastructure and providing social support. It strikes a delicate balance between expenditure and incremental revenue adjustments to stabilise the economy while providing important social assistance to those in need.

*\* These are government components within votes*

# Introduction

The Minister of Finance is required by section 27(1) of the Public Finance Management Act (1999) to table the national budget in Parliament each year. The authorisation to spend funds allocated in the budget is sought through the tabling of the Appropriation Bill, which sets out the proposed amounts to be appropriated from the National Revenue Fund for the first year of the medium-term expenditure framework (MTEF) period, also referred to in this publication as the medium term, the next 3 years or the period ahead. The Appropriation Bill is divided into segments called votes, which represent the allocations to national government departments, including government components, by programme and main economic classification<sup>1</sup> for the first year of the MTEF period (2025/26).

The Estimates of National Expenditure (ENE) is tabled in Parliament with the Appropriation Bill. It provides detailed and transparent information based on the allocations set out in the bill, as well as government's proposed spending plans and resource allocations for the full MTEF period (2025/26 to 2027/28). Medium-term estimates are aimed at improving budget formulation by encouraging the development of spending plans based on existing resources and by promoting fiscal discipline. Explanations are provided for how institutions intend to use their allocations over the medium term to achieve their goals and priorities, which should be aligned with broader national development plans. Information on how government institutions have spent their budgets in the previous 3 financial years is also included.

The tables presented in the ENE show performance indicators and targets, departmental receipts and detailed expenditure trends and estimates by programme, subprogramme and economic classification for all votes including government components and public entities. Brief explanatory narratives set out the purposes of votes and their programmes, as well as their mandates, programme-level objectives and descriptions of subprogrammes. Detailed overviews of votes' expected expenditure (and revenue for public entities), over the MTEF period are also included.

All data tables published in the ENE, as well as additional tables containing information on provincial and municipal conditional grants, public-private partnerships, infrastructure spending and information at the level of site service delivery, where applicable, are available on National Treasury's website and the Vulekamali online portal.

## National macro organisation of government

As the 7th administration took office after the 2024 national and provincial elections, government was reorganised to enhance its efforts towards fulfilling the vision of a developmental state. Broadly, this entailed rationalising some national departments, the shifting of functions across departments and the abolishment of the Department of Public Enterprises. Reforms brought on by the national macro organisation of government are aimed at integrating functions, enhancing synergy among ministerial portfolios and maintaining accountability in line with the new government's objectives. Departments affected by these reforms have included details of these changes in their chapters.

## Budgeting by function

Budget discussions take place within function groups, which comprise various institutions across the 3 spheres of government, grouped according to the objectives or activities they are mandated to perform. There are 7 functions across programmes and subprogrammes within departments, depending on their assigned tasks. They are: social development, learning and culture, health, peace and security, general public services,

---

<sup>1</sup> Allocations are made by economic classification. The main classifications are: current payments (payments made for operational requirements such as compensation of employees and goods and services); transfers and subsidies; payments for capital assets (assets that can be used for more than 1 year); and payments for financial assets (loans or equity investments in public corporations).

community development and economic development. These functions are strategically grouped to facilitate subject-specific discussions that target service delivery requirements and policy priorities.

For example, the Department of Cooperative Governance falls under 3 function groups. The department's *Community Work Programme* programme is categorised under the economic development function group; the *National Disaster Management Centre* programme, the local government equitable share and the local and provincial conditional grants are categorised under community development; and the department's other programmes and subprogrammes are categorised under general public services. Section 7 of the MTEF technical guidelines<sup>2</sup>, which were issued to institutions at the start of the budget determination process, provides a composition of function groups in terms of technical groups (function sub-groups), as well as departments and institutions.

## A budget that supports growth-enhancing reforms

Geopolitical tensions, including the threat of intensifying trade disputes, along with slow productivity gains and trade and supply chain adjustments, could limit growth across regions. However, global growth is projected by the International Monetary Fund to stabilise in 2025 and 2026. Domestically, over the period ahead, GDP growth is expected to be underpinned by household consumption because of increasing purchasing power, moderate employment recovery and household wealth gains.

Economic growth is essential to improving overall living standards and attracting investment that promotes sustainable development. During the tabling of the 2024 Medium-term Budget Policy Statement, government set out a pro-growth agenda anchored by 4 priorities: maintaining macroeconomic stability, implementing structural reforms, building state capability and supporting public infrastructure investment to enhance growth. This is aimed at addressing economic and fiscal challenges, including curbing government's debt-service costs. It is projected that government debt will peak in 2025/26 while the primary budget surplus continues to grow.

The 2025 Budget does not propose new reductions to baselines, but redirects resources to areas that strengthen economic growth, create jobs and support sustainable development. It strives to allocate resources efficiently while protecting vital frontline services and strengthening the welfare of vulnerable citizens through protecting the social wage. This budget balances the national imperatives of stimulating economic growth and maintaining fiscal sustainability. The implementation of a 3-year 2025 public sector wage agreement contributes to certainty in public finances. Strategic interventions are also made to measures that enhance growth, including for large infrastructure projects in sectors such as water and rail transportation.

Budget proposals forwarded by institutions were examined within function groups. This led to the presentation of recommendations to the technical committee on the budget, which is constituted by the directors-general of departments from various government clusters. The committee considered the trade-offs and priorities for government as a whole and forwarded its recommendations to the Ministers' Committee on the Budget for endorsement.

## Composition of changes to government spending by function

Consolidated expenditure<sup>3</sup> amounts to a projected R8.1 trillion over the MTEF period (R2.6 trillion in 2025/26, R2.7 trillion in 2026/27 and R2.8 trillion in 2027/28). It is expected to grow by 1.1 per cent in real terms over the MTEF period. Main budget expenditure is set to increase from R2.2 trillion in 2024/25 to R2.5 trillion in 2027/28, at an average annual rate of 1.2 per cent in real terms. The effects on main budget spending per function group arising from the 2025 Budget are shown in Figure 1.1 alongside spending growth rates.

---

<sup>2</sup> The MTEF technical guidelines are available on National Treasury's website in the publications section.

<sup>3</sup> Consolidated expenditure comprises main budget expenditure and expenditure financed from revenue raised by government entities, provinces and social security funds. Consolidated government spending forms the basis for discussion in the Budget Review. Main budget-level expenditure refers to expenditure financed through revenue collected by national government, which is deposited into the National Revenue Fund. This forms the basis for discussion in the ENE.

Figure 1.1 Net changes and annual growth rates in allocations to function groups (2025/26 to 2027/28)

The changes are summarised below:

- Social development:** The R47.1 billion net increase is attributed to the extension of social relief of distress related to the COVID-19 pandemic by one more year, resulting in an increase of R34.9 billion in 2025/26. An additional R300 million is allocated to administer these funds in 2025/26. Social assistance grants are increased above inflation to offset the effects of anticipated revenue adjustments. As such, the *old age grant* increases by R9.3 billion, the *child support grant* is increased by R1.1 billion, *grant-in-aid* by R297.9 million and the *care dependency grant* by R225 million. The National Youth Development Agency receives R549.8 million in 2025/26 for the public employment programme. Transfers for the provincial equitable share in this function increase by a cumulative R395.4 million over the medium term.
- Economic development:** The R23.8 billion net increase for this function is mainly the result of increases over the MTEF period of R16.6 billion on the transfer to the South African National Roads Agency for debt repayment and the maintenance backlog for the Gauteng freeway improvement project. The Water Trading Entity receives R3.2 billion for the second phase of the Olifants management model programme. The Industrial Development Corporation is allocated R1.3 billion in 2025/26 for the Social Employment Fund.
- Peace and security:** The R15.6 billion net increase relates to increases of R7 billion to goods and services budgets and R4.4 billion to compensation of employees, mostly for carry-through costs related to the deployment of South African National Defence Force troops in the Democratic Republic of the Congo and the implementation of the 2025 public sector wage agreement. The Border Management Authority receives R909 million for infrastructure-related projects for ports of entry and the borderline, and the Electoral Commission is allocated R885 million in 2026/27 for the 2026 local government elections. The newly established Information Regulator receives R424.2 million over the medium term as a transfer.
- Learning and culture:** The net increase of R11.2 billion over the MTEF period is mainly due to an increase of R8 billion in the provincial equitable share, mostly for the implementation of the 2025 public sector wage agreement, and R1.2 billion in 2025/26 for the teacher assistants programme. The *education infrastructure grant* receives R5.3 billion, while allocations to the indirect component of the *school infrastructure backlogs grant* is reduced by R3.5 billion as it is phased out and incorporated into the *education infrastructure grant*. The *TVET infrastructure and efficiency grant* increases by R218.2 million in 2026/27 and R678.2 million in 2027/28. Transfers to sector education and training authorities over the period ahead are reduced by R2.4 billion and transfers to the National Skills Fund are reduced by R591.1 million.

- **Health:** The R7 billion net increase is mainly due to an increase of R4.6 billion in the provincial equitable share, mostly for the implementation of the 2025 public sector wage agreement. The *national health insurance indirect grant* is allocated R858 million in 2025/26 and R259 million in 2026/27.
- **Community development:** The R6 billion net increase is due to a R3.7 billion increase in allocations to the *urban development financing grant* while the Passenger Rail Agency of South Africa receives R2.8 billion in 2025/26 for its rolling stock fleet renewal programme. In 2025/26, R408 million is allocated for the once-off taxi gratuity project. Allocations to the *programme and project preparation support grant* are reduced by R1.2 billion.
- **General public services:** The R5.9 billion net increase, which excludes adjustments to debt-service costs, is mainly due to an increase of R3.5 billion in transfers to the South African Revenue Service to modernise its operations and enhance taxpayer services. R476.9 million is allocated to the provincial equitable share for the implementation of the 2025 public sector wage agreement.

## Baseline adjustments by function and vote

In the following tables, adjustments to main budget non-interest expenditure over the MTEF period are presented by function and for each vote within the function. The estimated function split of the changes in the provincial equitable share<sup>4</sup>, where relevant, is also shown in the tables as provinces have key service delivery mandates aligned with the functions they share with national departments.

All changes are shown relative to the initial indicative allocations per function for the MTEF period, which originate from the previous year's baselines. All changes to baselines are shown in the tables to account comprehensively for budget increases and decreases and function shifts, including those related to the national macro organisation of government process and other allocation decisions taken during the 2025 budgeting process. Budget amendments have been made through the addition, reduction and/or realignment of baseline funds.

## Social development

This function supports poverty reduction through social grants and welfare services, providing risk benefits through social insurance; development initiatives, empowerment programmes and gender equality initiatives; and advocacy for children, women, young people, the elderly and people with disabilities. It is allocated R326.3 billion in 2025/26, R306 billion in 2026/27 and R320.2 billion in 2027/28. The net increase in the function's baseline is R47.1 billion (5.2 per cent), from R905.4 billion in the 2024 MTEF period to R952.5 billion in the 2025 MTEF period.

**Table 1.1 Social development**

Function <sup>i</sup> by vote				
R million	2025/26	2026/27	2027/28 <sup>ii</sup>	MTEF total
<b>2024 MTEF function baseline<sup>iii</sup></b>	<b>288 376.2</b>	<b>301 698.4</b>	<b>315 329.7</b>	<b>905 404.3</b>
<b>2025 MTEF function baseline<sup>iii</sup></b>	<b>326 337.9</b>	<b>305 951.7</b>	<b>320 219.0</b>	<b>952 508.6</b>
<b>Annual growth rate (percentage)</b>	<b>8.4%</b>	<b>-6.2%</b>	<b>4.7%</b>	<b>2.3%</b>
<b>Net change from the 2024 baseline (percentage)</b>	<b>13.2%</b>	<b>1.4%</b>	<b>1.6%</b>	<b>5.2%</b>
<b>Social Development</b>	<b>36 648.0</b>	<b>3 144.8</b>	<b>3 218.9</b>	<b>43 011.7</b>
COVID 19 social relief of distress	34 869.2	–	–	34 869.2
Social assistance grants: Old age	1 680.6	3 504.2	4 104.9	9 289.7
Social assistance grants: Child support	80.0	635.3	408.6	1 123.9
South African Social Security Agency: Administration of social relief of distress	300.0	–	–	300.0
Social assistance grants: Grant-in-aid	297.9	–	–	297.9
Social assistance grants: Care dependency	225.0	–	–	225.0
Compensation of employees	15.2	25.3	33.4	73.9

<sup>4</sup> An aggregate amount is allocated from the National Revenue Fund for the provincial equitable share. These funds are then allocated to specific function areas through separate provincial budgetary processes and legislative approval. The details of the allocation of funds by each of the provinces per function are not known with certainty at the time of tabling the national budget.

- i. The estimate of the provincial equitable share that is allocated to this function is included. This amount is determined by provincial budgetary and legislative processes and is subject to change.
- ii. Modifications made to the 2027/28 function indicative baseline throughout the 2025 Budget process are shown. The first estimates for 2027/28 are shown in italics. The fiscal framework shown in the Budget Review depicts the budget baseline as it stands at the end of the process.
- iii. This table shows only the allocation of revenue from the National Revenue Fund for the function group. This differs from the presentation of the consolidated function group baseline shown in the Budget Review, which includes revenue generated through other sources.

## Learning and culture

This function comprises basic and higher education, and sport, arts and culture. It is allocated R477.5 billion in 2025/26, R499.5 billion in 2026/27 and R522.1 billion in 2027/28. The net increase in the function's baseline is R11.2 billion (0.8 per cent), from R1.488 trillion in the 2024 MTEF period to R1.499 trillion in the 2025 MTEF period.

- i. The estimate of the provincial equitable share that is allocated to this function is included. This amount is determined by provincial budgetary and legislative processes and is subject to change.
- ii. Modifications made to the 2027/28 function indicative baseline throughout the 2025 Budget process are shown. The first estimates for 2027/28 are shown in italics. The fiscal framework shown in the Budget Review depicts the budget baseline as it stands at the end of the process.
- iii. This table shows only the allocation of revenue from the National Revenue Fund for the function group. This differs from the presentation of the consolidated function group baseline shown in the Budget Review, which includes revenue generated through other sources.

## Health

This function supports the provision of equitable access to health care services, including free primary health care. It is allocated R275.5 billion in 2025/26, R288.5 billion in 2026/27 and R301.7 billion in 2027/28. The net increase in the function's baseline is R7 billion (0.8 per cent), from R858.8 billion in the 2024 MTEF period to R865.8 billion in the 2025 MTEF period.

## Peace and security

This function receives funding over the medium term to promote safer communities, boost business confidence, manage borders effectively, support development and enhance the criminal justice system. It is allocated R257 billion in 2025/26, R269.9 billion in 2026/27 and R280.2 billion in 2027/28. The net increase in the function's baseline is R15.6 billion (2 per cent), from R791.6 billion in the 2024 MTEF period to R807.1 billion in the 2025 MTEF period.

## Community development

This function supports access to housing and basic services, affordable public transport, and spatial transformation and urban development. It focuses on improving responses to disasters and provides oversight of local government. The function is allocated R257.8 billion in 2025/26, R262.8 billion in 2026/27 and R271.9 billion in 2027/28. The net increase in its baseline is R6 billion (0.8 per cent), from R786.5 billion in the 2024 MTEF period to R792.5 billion in the 2025 MTEF period.

- i. The estimate of the provincial equitable share that is allocated to this function is included. This amount is determined by provincial budgetary and legislative processes and is subject to change.
- ii. Modifications made to the 2027/28 function indicative baseline throughout the 2025 Budget process are shown. The first estimates for 2027/28 are shown in italics. The fiscal framework shown in the Budget Review depicts the budget baseline as it stands at the end of the process.
- iii. This table shows only the allocation of revenue from the National Revenue Fund for the function group. This differs from the presentation of the consolidated function group baseline shown in the Budget Review, which includes revenue generated through other sources.

## Economic development

This function promotes faster and sustained inclusive economic growth to address unemployment, poverty and inequality. It is allocated R190.4 billion in 2025/26, R191.7 billion in 2026/27 and R193.5 billion in 2027/28. The net increase in the function's baseline is R23.8 billion (4.3 per cent), from R551.8 billion in the 2024 MTEF period to R575.6 billion in the 2025 MTEF period.

- The estimate of the provincial equitable share that is allocated to this function is included. This amount is determined by provincial budgetary and legislative processes and is subject to change.
- Modifications made to the 2027/28 function indicative baseline throughout the 2025 Budget process are shown. The first estimates for 2027/28 are shown in italics. The fiscal framework shown in the Budget Review depicts the budget baseline as it stands at the end of the process.
- This table shows only the allocation of revenue from the National Revenue Fund for the function group. This differs from the presentation of the consolidated function group baseline shown in the Budget Review, which includes revenue generated through other sources.

## Provisional allocations

A net amount of R204.8 billion over the next 3 years is provisionally allocated but not appropriated and will be confirmed for spending once certain requirements have been met. The details of these provisional allocations will be finalised either during the 2025 Adjustments Budget or the 2026 Budget and thereafter allocated to specific votes.

**Table 1.8 Provisional allocations**

R million	2025/26	2026/27	2027/28	Total
Provisional allocations not appropriated	37 056	83 011	84 324	204 391
Infrastructure Fund not appropriated	—	—	425	425
<b>Total</b>	<b>37 056</b>	<b>83 011</b>	<b>84 749</b>	<b>204 816</b>

An additional R5 billion in 2025/26, R5.5 billion in 2026/27 and R11.1 billion in 2027/28 is set aside as a contingency reserve but not allocated in advance. This is to accommodate changes in the economic environment and meet unforeseeable spending pressures.

## Overview of expenditure for the MTEF period

The table below shows medium-term expenditure projections in 3 classification categories: consolidated government expenditure, main budget non-interest expenditure and the expenditure ceiling<sup>5</sup>.

**Table 1.9 Expenditure for the MTEF period**

R million	2025/26	2026/27	2027/28	Total	Average real growth (%)
<b>Consolidated government expenditure</b>	<b>2 592 306</b>	<b>2 702 978</b>	<b>2 834 867</b>	<b>8 130 151</b>	<b>1.1%</b>

Contingency reserve	5 000	5 500	11 127	21 627	

The details of the allocations of main budget expenditure to votes are discussed in the individual chapters, with summaries provided in the following tables.

<sup>5</sup> The expenditure ceiling is the maximum allowable level of expenditure to which government has committed itself. It excludes payments directly financed by dedicated revenue flows, as well as payments not subject to policy oversight.

Capital infrastructure <sup>3</sup>	127 597.4	143 764.1	131 051.8	152 814.8	158 276.0	161 245.5	162 034.9

1. Amounts include mega infrastructure projects and programmes for which the total cost is at least R1 billion over the project life cycle; large projects and programmes for which the total cost is at least R250 million but less than R1 billion over the project life cycle; and small projects and programmes for which the total cost is less than R250 million over the project life cycle. Amounts also include infrastructure transfers to other spheres, agencies and entities, and projects involving maintenance and repairs.

2. Current infrastructure refers to the maintenance and repairs of existing infrastructure assets and is aimed at maintaining the capacity and effectiveness of an asset at the designed level.

3. Capital infrastructure refers to the construction, replacement, upgrading, rehabilitation, renovation and refurbishment of infrastructure resulting in a new asset or an increase in the capacity, effectiveness and value of an existing asset.

1. Includes the departmental receipts of all departments within a vote.

2. There are receipts for which a department serves as a conduit to deposit funds into the National Revenue Fund. As such, they are included as other receipts for consolidation purposes. These receipts are, however, excluded from both departmental and entity financial statements.

# Information contained in each vote

The ENE describes in detail the planned spending in all national government votes over the MTEF period, which is government's 3-year expenditure planning window. The Minister of Finance tables the ENE in Parliament alongside the main budget. It serves as the explanatory memorandum to the Appropriation Bill. Through the bill and the ENE, the executive seeks Parliament's approval and adoption of its spending plans for the first year of the MTEF period. Once the president assents to the Appropriation Act and it has been published in a Government Gazette, funds allocated for the first year of the MTEF period are appropriated from the National Revenue Fund. As Parliament authorises expenditure annually, spending estimates for the 2 outer years of the MTEF period are not included in the Appropriation Bill. These estimates or indicative allocations form the basis of planning for the following year's budget and the next MTEF period.

Information in the Appropriation Bill is presented by vote. A vote specifies the total amount appropriated to a department or government component, where applicable. The main budget expenditure, determined by the fiscal stance adopted by government, includes direct charges against the National Revenue Fund, such as debt-service costs, the provincial equitable share and payments to the National Revenue Fund, among other things. Direct charges are spent in terms of section 213(2)b of the Constitution. They are not budgeted for in any vote's programme or included in any appropriation act, and therefore do not require parliamentary approval. To allow for expenditure related to emerging government policy priorities, main budget expenditure also includes a contingency reserve and any provisional allocations not assigned to votes at the time of finalising the main budget. Similarly, this expenditure is not contained in the Appropriation Bill.

Each chapter in the ENE relates to a vote. Each vote contained in the ENE follows the following format:

## Budget summary

This table shows the budgeted expenditure for the vote for the 3-year MTEF period.

R million	2025/26					2026/27	2027/28

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

The **2025/26 total** shows the total allocation per programme and the total allocation for the vote for 2025/26 and corresponds with the information in the 2025 Appropriation Bill.

The total vote allocation to be appropriated by Parliament is categorised by economic classification, into **current payments**, **transfers and subsidies**, **payments for capital assets** and **payments for financial assets**.

**Current payments** are payments made by an institution for its operational requirements.

**Transfers and subsidies** are payments made by an institution for which the institution does not directly receive anything in return.

**Payments for capital assets** are payments made by an institution for an asset that can be used for more than 1 year and from which future economic benefits or service potential are expected to flow.

**Payments for financial assets** are mainly payments made by institutions as loans to public corporations or as equity investments in public corporations. Payments are reflected as expenditure rather than financing because the purpose of the transaction is not profit oriented. This column is shown only in votes where such payments have been budgeted for. Payments for theft and losses are included in this category. As it is not possible to budget for these in advance, payments will appear in the historical information only once they are known.

For **2026/27** and **2027/28**, expenditure estimates in the vote are shown for the 2 outer years of the MTEF period.

**MTEF allocation** shows the expenditure allocation for the upcoming financial year and the expenditure estimates for the 2 outer years of the MTEF period for each programme.

**Direct charge against the National Revenue Fund** is an amount withdrawn directly from the National Revenue Fund, as envisaged in section 213(2)(b) of the Constitution. It is not budgeted for in any programme in a particular vote and is not included in the Appropriation Bill. As such, it is shown as a separate item.

**Total expenditure estimates** is the sum of expenditure on programmes plus direct charges against the National Revenue Fund.

The last 3 rows of the table provide accountability information: the vote’s executive authority, accounting officer and website.

Vote purpose

The purpose of the vote captures a department’s mandate, objectives or administrative functions, as stated in the 2025 Appropriation Bill.

Mandate

The institution’s mandate, as contained in the relevant act(s) or policy document(s) that govern(s) the institution’s establishment and operations, is described.

Selected performance indicators

This table highlights a vote’s performance in terms of key indicators for the past 3 years, the current year and the projections for the MTEF period.

Table [Vote number].1 Performance indicators by programme and related priority

Indicator	Programme	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28

The table presents only a selected set of a department or entity’s performance indicators and is not intended to provide a comprehensive view of the institution’s performance. The table, however, contains key indicators linked to strategic and annual performance plans, as informed by government’s medium-term development plan and ministerial delivery agreements. Managing, monitoring and measuring performance are integral to improving service delivery.

Footnotes are used in this table where there is no historical data available, where an indicator has been discontinued or a new one introduced, or where no projections are available. Reasons for revisions to targets from what was published in the 2024 ENE are contained in the annual performance plans of departments and entities. These include budget reductions, new focus areas or indicators, and changes requested by the executive authority and/or Parliament.

An **Indicator** is a measure that tracks progress towards meeting the target that the department or entity has set. An indicator may measure inputs, activities, outputs and outcomes, or, in certain instances, explanatory information relating to the internal or external environment.

The **Programme** links the indicator to the programme associated with it.

The **MTDP outcome** links the indicator to 1 or more of the 21 outcomes within the 3 strategic priorities targeted by government. These are aimed at encouraging inclusive growth and job creation, reducing poverty and tackling the high cost of living, and building a capable, ethical and developmental state.

The **Audited performance** column shows the achievements of the institution for the past 3 financial years.

The **Estimated performance** column shows what the institution expects to achieve in the current financial year.

The **MTEF targets** columns show what the institution expects to achieve over the MTEF period. Targets can be qualitative or quantitative. All quantitative indicators must have targets that are absolute values/numbers or percentages.

In the selected performance indicators table, a dash (–) accompanied by a footnote marker means that information is not available, usually because the indicator was introduced only in subsequent years. However, in all expenditure and revenue tables, a dash (–) indicates that information is either unavailable or equal to zero. Due to rounding off, the line item figures in tables may not necessarily add up to the total of the figures in the table.

## Expenditure overview

This is a narrative discussion that provides an outline of what the institution aims to achieve over the medium term and how it plans to spend its budget in support of this. The discussion centres on the institution's primary focus areas, including its policy and spending focus (significant spending items and key service deliverables) over the period ahead, as contained in its planning documents and aligned with key government priorities and objectives. Significant increases or decreases in expenditure, including in the past, are explained in terms of the institution's performance targets, service delivery methods, policies, personnel profiles or any other applicable factors. The average annual estimated rates of increase or decrease are presented in the tables in nominal, not real, terms.

## Expenditure trends and estimates

This table shows audited expenditure for the past 3 years, the adjusted appropriation for the current financial year and expenditure estimates over the MTEF period by programme and economic classification.

**Table [Vote number].2 Vote expenditure trends and estimates by programme and economic classification**

1. Tables with expenditure trends, annual budget, adjusted appropriation and audited outcome are available at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

Expenditure is set out first by **Programme** and then by **Economic classification**. Expenditure is classified as current payments, transfers and subsidies, payments for capital assets and payments for financial assets. Where programme structures have been changed in recent years, expenditure and budgets have, to the extent possible, been reallocated to the new approved programme structure for all the years shown, for comparability.

**Direct charge against the National Revenue Fund** is an amount spent in terms of section 213(2)b of the Constitution, other than appropriation legislation, and that is not budgeted for in any programme in a particular vote and is not included in any appropriation act. These amounts are shown as separate items, such as spending on debt-service costs, the provincial equitable share and payments to the National Revenue Fund.

**Audited outcomes** are presented as they appear in the institution's annual financial statements. However, reallocations are made for any subsequent approved budget changes to the programme structure.

**Adjusted appropriation** shows the adjusted total amount voted in a financial year. Most changes are typically made at mid-year at the time of the adjustments budget, but could include any other money bills tabled during the financial year. These adjustments can be made only in terms of the circumstances listed in section 30 of the Public Finance Management Act (1999) and sections 5 and 6 of the Appropriation Act (2024). These adjustments are included in an adjustments appropriation bill(s), which Parliament approves before expenditure, in certain instances, can take place. Details of the adjustments are tabled in acts of Parliament and the accompanying Adjusted Estimates of National Expenditure, and other publications.

The **Average growth rate (%)** shows the growth rate per year, averaged over the 3-year period, as a percentage.

The **Average: Expenditure/Total (%)** shows the proportion of total institutional expenditure that an expenditure item comprises, averaged over the 3-year period, as a percentage.

The **Medium-term expenditure estimate** shows expenditure estimates for 2025/26, 2026/27 and 2027/28. The estimates for 2025/26 are the appropriations proposed in the 2025 Appropriation Bill considered by Parliament. The estimates for 2026/27 and 2027/28 are indicative allocations and will form the basis for planning the 2026 Budget and the next MTEF period.

The **Average growth rate (%)** is the growth rate per year, averaged over the 3-year period, expressed as a percentage.

## Transfers and subsidies expenditure trends and estimates

This table shows the transfers and subsidies expenditure trends for the past 3 years, the revised expenditure estimate for the current financial year and expenditure estimates over the MTEF period by transfer item.

**Table [Vote number].3 Vote transfers and subsidies trends and estimates**

<b>Total</b>											

The **Audited outcome** is presented as it appears in the institution's annual financial statements.

**Adjusted appropriation** shows the adjusted total amount voted in a financial year. Most changes are typically made at mid-year at the time of the adjustments budget, but could include any other money bills tabled during the financial year. These adjustments can be made only in terms of the circumstances listed in section 30 of the Public Finance Management Act (1999) and sections 5 and 6 of the Appropriation Act (2024).

The **Average growth rate (%)** shows the growth rate per year, averaged over the 3-year period, as a percentage.

The **Average: Expenditure/Total (%)** shows the proportion of total institutional expenditure that an expenditure item comprises, averaged over the 3-year period, as a percentage.

The **Medium-term expenditure estimate** shows expenditure estimates for 2025/26, 2026/27 and 2027/28.

## Personnel information

Personnel information relating to salary level bands is set out for a 5-year period. The number of posts, the cost to the institution and the average unit cost of a post are shown as estimated by the department.

**Table [Vote number].4 Vote personnel numbers and cost by salary level and programme<sup>1</sup>**

Programme 3															

1. Data has been provided by the department and may not necessarily reconcile with official government personnel data.

2. Rand million.

Details of total personnel numbers are provided by **Salary level** and **Programme**.

**Number of funded posts** refers to the number of posts in an institution's establishment for which provision is made in its budget.

**Number of posts additional to the establishment** refers to posts that do not form part of the institution's approved establishment but have been budgeted for.

Information is provided on the **Number** and **Cost** of posts filled or planned to be filled in the total establishment by salary level.

The **Unit cost** is calculated by dividing the cost by the number of posts.

The **Average growth rate (%)** shows the growth rate per year, averaged over the 3-year period, as a percentage.

The **Average: Salary level/Total (%)** shows the proportion of total posts per salary level band, on average over the period, as a percentage.

Personnel information is typically discussed in the expenditure overview, particularly in relation to performance and spending.

## Departmental receipts

This table provides details of the revenue collected by the vote over a 7-year period.

**Table [Vote number].5 Departmental receipts by economic classification**

	Audited outcome			Adjusted estimate	Revised estimate	Average growth rate (%)	Average: Receipt item/ Total (%)	Medium-term receipts estimate			Average growth rate (%)	Average: Receipt item/ Total (%)

National Revenue Fund receipts												
<i>of which:</i>												
<b>Total</b>												

Departmental receipts are set out by **Economic classification** item.

The **Audited outcome** is presented as it appears in the institution’s annual financial statements.

The **Adjusted estimate** for 2024/25 shows the estimate of the institution’s receipts published in the 2024 Adjusted Estimates of National Expenditure.

The **Revised estimate** shows the current estimate of institutional receipts for 2024/25.

The **Average growth rate (%)** shows the growth rate per year, averaged over the 3-year period, as a percentage.

The **Average: Receipt item/Total (%)** shows the proportion of total departmental receipts in a particular economic classification item, averaged over a 3-year period, as a percentage.

## Information on each programme

### Programme purpose

The purpose of each programme is stated as it is set out in the 2025 Appropriation Bill. The programme purpose outlines the functions and activities of the particular programme, as per the approved budget programme structure. Programme 1 is usually the *Administration* programme, comprising the administrative functions and activities required to keep the department operating. It includes the ministry and deputy ministry, the director-general’s office and central corporate services.

### Objectives

Objectives are stated for each programme, with the exception in most cases of the *Administration* programme. A programme objective includes an explanation of its strategic intent, as well as of the specific interventions and progress measures for that objective. Objectives are broadly aligned with institutional strategic plans and annual performance plans, as informed by ministerial service delivery agreements and articulated in government’s medium-term development plan.

### Subprogrammes (per programme)

The key activities carried out by each subprogramme are described, usually with the exception of the *Administration* programme as it is typically standardised across all departments. Explanatory notes are provided on transfers to entities or partner organisations, and, where applicable, on subsidies, incentives or financial assistance programmes.

### Expenditure trends and estimates (per programme)

The table for each programme sets out expenditure by subprogramme and economic classification item over a 7-year period.

**Table [Vote number].6 [Programme name] expenditure trends and estimates by subprogramme and economic classification**

Table [vote number].0 [Programme name] expenditure trends and estimates by subprogramme and economic classification

Expenditure over the 7-year period is set out, first by **Subprogramme** then by **Economic classification**, as current payments, transfers and subsidies, payments for capital assets and payments for financial assets.

**Audited outcome** is presented as it appears in the institution's annual financial statements, with amounts reallocated for any subsequent approved changes to the budget programme structure.

**Adjusted appropriation** shows the adjusted total amount voted in a financial year. Most changes are typically made at mid-year at the time of the adjustments budget, but could include any other money bills tabled during the financial year. These adjustments can be made only in terms of the circumstances listed in section 30 of the Public Finance Management Act (1999) and sections 5 and 6 of the Appropriation Act (2024). These adjustments are included in an adjustments appropriation bill(s), which Parliament approves before expenditure, in certain instances, can take place. Details of the adjustments are tabled in acts of Parliament and the accompanying Adjusted Estimates of National Expenditure, and other publications.

The **Average growth rate (%)** shows the growth rate per year, averaged over a 3-year period, as a percentage.

The **Average: Expenditure/Total (%)** shows the proportion of total programme expenditure that a subprogramme or an expenditure item comprises, averaged over a 3-year period, as a percentage.

The **Medium-term expenditure estimate** shows programme expenditure estimates for the MTEF period. The estimates for 2025/26 are the appropriations proposed in the 2025 Appropriation Bill. The estimates for 2026/27 and 2027/28 are indicative allocations and will form the basis for planning the 2025 Budget and the next MTEF period.

Personnel information (per programme)

Personnel information relating to salary level bands is set out for a 5-year period. The number of posts, the cost to the institution and the average unit cost of a post are shown as estimated for the programme.

Programme personnel numbers and cost by salary level<sup>1</sup>

Table [Vote number].7 [Programme name] personnel numbers and cost by salary level<sup>1</sup>

Number of posts estimated for 31 March 2024/25			Number and cost <sup>2</sup> of personnel posts filled/planned for in funded establishment												Average growth rate (%)	Average: Salary level/ Total (%)	
Number of funded posts	Number of posts additional to the establishment																
		Actual			Revised estimate			Medium-term expenditure estimate

11 – 12																	
13 – 16																	
Other																	

1. Data has been provided by the department and may not necessarily reconcile with official government personnel data.  
2. Rand million.

Details of total personnel numbers are provided by **Salary level**.

**Number of funded posts** refers to the number of posts in a programme’s establishment for which provision is made in its budget.

**Number of posts additional to the establishment** refers to posts that do not form part of the programme’s approved establishment but have been budgeted for.

Information is provided on the **Number** and **Cost** of posts filled or planned to be filled in the total programme establishment by salary level.

The **Unit cost** is calculated by dividing the cost by the number of posts.

The **Average growth rate (%)** shows the growth rate per year, averaged over a 3-year period, as a percentage.

The **Average: Salary level/Total (%)** shows the proportion of the total programme posts per salary level band, on average over the period, as a percentage.

Programme personnel information is discussed in the expenditure overview, particularly in relation to performance and spending.

Entities

The information provided on entities is similar to what is reported for a department. However, as the basis of accounting used by entities is different to the basis used by departments, entities’ statements of financial performance and financial position are provided.

Entity accounts are prepared using the accrual basis of accounting, whereas departmental accounts are prepared using the modified cash basis of accounting.

In the accrual basis of accounting, a transaction is recorded whenever there is an economic event, regardless of when a cash transaction takes place. This basis of accounting also includes items that do not involve any flow of cash, such as adjustments to account for depreciation.

In the modified cash basis of accounting, a transaction is recorded only if cash has been exchanged and at the time that this exchange takes place.

Information on each of the entities generally consists of:

- selected performance indicators relating to the entity's mandate
- an entity overview narrative that provides an outline of the entity's mandate, what it aims to achieve over the medium term and its planned spending in support of this
- expenditure trends and estimates by programme/objective/activity
- statements of financial performance, cash flow and financial position
- personnel numbers and cost by salary level.

## The Presidency

1. No historical data available.

2. No targets as South Africa's G20 presidency runs until 30 November 2025.

## Expenditure overview

The department's core function is to provide executive support to the president and deputy president in fulfilling their constitutional duties, as outlined in chapter 5 of the Constitution. Accordingly, over the medium term, the department will focus on supporting the country's obligations to the global community and foreign relations, building capacity for the ministry in the Presidency, leading and coordinating government programmes, establishing the head of public administration, implementing the cluster system improvement plan, and building capacity for the repurposed policy and research services branch.

The department has a budget of R2.3 billion over the medium term, of which 87.9 per cent (R2 billion) is allocated to the *Administration* programme to provide technical and administrative support to the president, deputy president, ministry and management. Compensation of employees accounts for an estimated 62.1 per cent (R1.4 billion) of expenditure over the next 3 years. Total spending is set to increase at an average annual rate of 7.6 per cent, from R637.3 million in 2024/25 to R793.4 million in 2027/28.

### ***Supporting the country's obligations to the global community and foreign relations***

In supporting the country's commitment to upholding human rights and freedom, as well as other international obligations, the Presidency is representing South Africa in the case before the International Court of Justice against Israel for allegedly contravening the 1948 United Nations Convention on the Prevention and Punishment of the Crime of Genocide in its military actions in Gaza. For this purpose, an additional R37.2 million over the medium term is allocated to appoint legal representatives and cover the costs for interpreters and translators, and travel and subsistence. The allocation contributes to the projected increase in spending in the *Management* subprogramme in the *Administration* programme at an average annual rate of 4.1 per cent, from R402.3 million in 2024/25 to R453.9 million in 2027/28.

### ***Building capacity for the ministry in the Presidency***

The Minister in the Presidency is responsible for overseeing the department in addition to other institutions such as the Government Communication and Information System and the State Security Agency. The minister has assigned and delegated various leadership functions to her 2 deputy ministers in line with key functions in the departments under her portfolio. To provide executive, strategic and administrative support to the department's deputy ministers, R164.9 million is allocated over the period ahead in the *Ministry* subprogramme in the *Administration* programme. These funds will mainly be used for the offices of the 2 deputy ministers and 14 support staff.

### ***Leading and coordinating government programmes***

The department's project management office was established in 2019 to drive progress on implementing government's strategic priorities. Over the medium term, the office will focus on determining priorities and translating political objectives into actionable strategies, designing solutions to complex problems through an iterative and adaptive approach, identifying and aligning partners for key interventions, unblocking obstacles when monitoring shows slow progress, and introducing and using performance management approaches that are in line with best practice. Funding to carry out these activities is within the *Support Services to the President* subprogramme's allocation of R328.5 million over the MTEF period. This will be supplemented by additional funding of R28.5 million from the former Department of Public Enterprises' budget to employ 8 additional personnel to support the president in leading and coordinating government programmes such as the Operation Vulindlela economic reform programme and the public employment programme, which are aimed at accelerating and facilitating investment and promoting trade, economic growth and job creation. Accordingly, spending in the subprogramme is expected to increase at an average annual rate of 8.8 per cent, from R89.1 million in 2024/25 to R114.6 million in 2027/28.

### ***Establishing the head of public administration***

Chapter 13 of the National Development Plan highlights the need for a head of public administration to address challenges in public service management. The department fulfils this role, which entails ensuring the public service is managed effectively; managing career progression without undermining the political oversight of senior public servants; convening panels for recruitment processes, conducting performance assessments and instituting disciplinary processes where necessary; strengthening the oversight of heads of departments and ensuring that norms and standards are being adhered to; improving coordination and operational excellence across the public service; and mediating on issues as they arise. Funding for these activities is within the *Management* subprogramme's allocation of R1.3 billion over the MTEF period, supplemented by additional funding of R23.8 million from the former Department of Public Enterprises' budget to appoint 7 additional personnel. This is expected to ensure that these functions are executed effectively.

### ***Implementing the cluster system improvement plan***

The cluster system is a key component of the South African government established in 1998 to enhance governance through improved planning, decision-making and service delivery. In response to the system's deterioration over the years, the cluster system improvement plan was developed in 2021 and approved by the director-general in 2024. The plan is aimed at strengthening the role of the forum of South African directors-general secretariat in enhancing the strategic impetus of government clusters, improving the implementation of decisions made by the forum, and improving stakeholder relations. The plan is scheduled for implementation in 2025/26 at an estimated cost of R9.4 million in the *Cabinet Services* subprogramme in the *Executive Support* programme. These funds, also from the former Department of Public Enterprises' budget, will be used to appoint 4 personnel.

### ***Building capacity for the repurposed policy and research services branch***

The department's *Policy and Research Services* programme was re-established in 2019 to provide policy coordination and evidence-based advisory services to members of the executive through overseeing strategic policy interventions in collaboration with think tanks and research institutions. Over the medium term, it will seek to play a critical role in providing evidence-based advice to enable the executive authority to make high-quality decisions; supporting it in coordinating and integrating policy development, formulation and implementation; and driving cross-cutting priorities. These linked areas include policy coordination and integration, strategic planning and alignment, stakeholder engagements, interdepartmental task forces and working groups for progress tracking, and capacity building, training and project management; and promoting a progressive regulatory agenda that prioritises executive accountability. Funding for this work is within the *Economy, Trade and Investment* subprogramme's allocation of R55.2 million over the medium term. Spending in the subprogramme is set to increase at an average annual rate of 14.8 per cent due to the receipt of additional funding of R13 million over the medium term from the former Department of Public Enterprises' budget. This is expected to accommodate 4 additional personnel.

## Programme 1: Administration

### Programme purpose

Provide strategic leadership, management and support services to the department.

## Objectives

- Lead and coordinate government programmes on an ongoing basis by:
  - providing strategic, executive and personal support to the deputy president in the execution of his delegated responsibilities towards the attainment of the electoral mandate and the department's mission
  - mobilising society, promoting social cohesion and accelerating social transformation
  - strengthening executive and parliamentary accountability
  - overseeing the implementation of the Operation Vulindlela economic reform programme
  - facilitating interventions in selected hotspot municipalities with governance challenges and service delivery failures as part of intergovernmental coordination and collaboration
  - overseeing the implementation of an action plan to end load shedding and achieve energy security
  - providing leadership and technical assistance to resolve all challenges to the reliable provision of water and sanitation services
  - providing political oversight to implement Cabinet decisions on land and agrarian reform and related anti-poverty interventions
  - mobilising society towards attaining a low-carbon, green economy and pathways towards a just energy transition
  - accelerating the implementation of key economic and social infrastructure projects as part of economic recovery plans
  - playing an oversight role in the fight against gender-based violence and femicide through the implementation of the national strategic plan on gender-based violence and femicide
  - advancing South Africa's global and continental relations through effective leadership and coordination.

## Subprogrammes

- *Ministry* provides executive, strategic and administrative support to the ministers and deputy ministers in the Presidency.
- *Management* provides leadership, strategic management and administrative support within the Presidency.
- *Support Services to the President* provides strategic, executive and personal support services to the president in the execution of his constitutional responsibilities and in leading the work of government.
- *Support Services to the Deputy President* provides strategic, executive and personal support to the deputy president in the execution of his delegated responsibilities towards the attainment of the electoral mandate and the Presidency's mission.

## Programme 2: Executive Support

Provide strategic and administrative support to enable Cabinet to foster accountability and policy coherence through integrated planning, policy coordination and the implementation of the strategic agenda of government.

## Objectives

- Strengthen support in the department on an ongoing basis by:
  - providing technical and strategic support to the president, deputy president and secretary to Cabinet on matters related to the functioning of Cabinet and Cabinet committees in relation to implementing government's strategic agenda
  - providing technical and strategic support to the head of the public administration on matters related to the functioning of the forum of South African directors-general in relation to the implementation of the strategic agenda of government
  - strengthening and aligning government legislative programmes and monitoring their implementation
  - strengthening government's executive decision-making system.

## Subprogramme

- Cabinet Services* provides strategic and administrative support to enable Cabinet and the forum of South African directors-general to foster accountability and policy coherence through integrated planning, policy coordination and the implementation of government's strategic agenda.

## Programme 3: Policy and Research Services

Provide policy and research support to the president and deputy president in exercising their constitutional mandates within the context of government priorities.

### Objectives

- Enhance governance, state capacity and service delivery over the medium term by:
  - formulating policy proposals independently from line departments or offering alternative policy recommendations
  - contributing to the setting of strategic agendas for Cabinet and the forum of South African directors-general
  - providing proactive advice to ensure that policy priorities remain focal amid the day-to-day demands of ministries and departments
  - facilitating interdepartmental coordination to formulate and implement policy
  - providing intellectual leadership through the periodic publication of journal articles, book chapters, newspaper articles, public engagements, seminars and roundtable discussions.

### Subprogrammes

- Economy, Trade and Investment* promotes coherence between economic, trade and investment policies and programmes.
- Socioeconomic Impact Assessment System* provides support to policy initiatives, legislation and regulations, and facilitates the strengthening of the socioeconomic impact assessment.

Executive authority	Speaker of the National Assembly and Chairperson of the National Council of Provinces					
Accounting officer	Secretary to Parliament					
Website	<a href="http://www.parliament.gov.za">www.parliament.gov.za</a>					

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

*Provide the support services required by Parliament to fulfil its constitutional functions, assist political parties represented in Parliament to secure administrative support and service constituents, and provide members of Parliament with the necessary facilities.*

### Mandate

Parliament's mandate is based on the provisions of chapter 4 of the Constitution, which establishes Parliament and sets out its functions. Parliament is elected to represent the people, ensure government by the people under the Constitution and represent the interests of provinces in the national sphere of government. Members of Parliament elect the president, pass legislation, scrutinise and oversee executive action. The parliamentary process provides a national forum for the public to consider issues and express their views.

## Vote purpose

Improve cooperative governance across the three spheres of government, in partnership with provinces, municipalities, civil society and communities, to enable accelerated service delivery.

## Mandate

The Department of Cooperative Governance is mandated to develop and monitor the implementation of national policy and legislation to enable government to fulfil its developmental role; promote and monitor mechanisms, systems and structures to enable integrated service delivery and implementation across spheres of government; and promote sustainable development by providing support and exercising oversight of local government, provincial government and its entities. This mandate is derived from the:

- Local Government: Municipal Structures Act (1998)
- Local Government: Municipal Systems Act (2000)
- Disaster Management Act (2002)
- Local Government: Municipal Property Rates Act (2004)
- Intergovernmental Relations Framework Act (2005).

1. No historical data available.

## Expenditure overview

Over the MTEF period, the department plans to focus on strengthening institutional arrangements and elevating service delivery standards, alleviating poverty through public employment, and strengthening local government's capabilities to manage disasters.

Expenditure is expected to increase at an average annual rate of 4.3 per cent, from R125.9 billion in 2024/25 to R143 billion in 2027/28. Transfers and subsidies account for 96.7 per cent (R397 billion) of the department's total spending over the period ahead. Expenditure on compensation of employees is expected to increase at an average annual rate of 10.1 per cent, from R369.9 million in 2024/25 to R493.9 million in 2027/28. This is driven by an anticipated increase in the number of personnel across all programmes from 454 in 2024/25 to 529 in 2027/28 as the department seeks to strengthen its operational capacity and oversight functions. Total expenditure over the MTEF period is expected to amount to R410.9 billion.

### ***Strengthening institutional arrangements and elevating service delivery standards***

Transfers to the local government equitable share are intended to supplement municipal revenue, cover the costs involved in providing free basic services to poor households, and subsidise administrative costs for municipalities with limited capacity to raise revenue. These transfers comprise an estimated 83.4 per cent (R332.4 billion) of the department's spending on transfers and subsidies over the medium term. This spending is in the *Policy, Governance and Local Government Administration* programme, allocations to which are expected to increase at an average annual rate of 4.5 per cent, from R101.6 billion in 2024/25 to R116.1 billion in 2027/28.

Funds from the *municipal infrastructure grant*, which amount to R57.4 billion over the period ahead, are used to build new and upgrade existing municipal infrastructure, and renew and refurbish infrastructure for water and sanitation services, electricity, roads and public transport, particularly for poor communities. The *integrated urban development grant*, which is allocated R4.1 billion over the next 3 years, is geared towards improving municipal infrastructure to ensure greater access and urban and rural integration, as well as enhancing the quality of municipal services. Included in the grant's total allocation is R244.7 million for the Alfred Duma local municipality that was previously within the *municipal infrastructure grant*. These two grants are funded through the *Local Government Operations and Support* programme, which accounts for an estimated 15.2 per cent (R63.1 billion) of the department's spending over the period ahead, increasing at an average annual rate of 5.8 per cent.

As part of the department's integrated service delivery strategy, it aims to support all 52 district and metropolitan municipalities over the medium term in implementing the district development model by coordinating joint planning, budgeting and implementation processes. This initiative will leverage tools such as district diagnostic profiles and service delivery simulators to standardise municipal plans, ensuring they are grounded in accurate insights to enhance service delivery to citizens. This work has an estimated budget of R474.6 million over the medium term in the *Municipal Systems Improvement Grant* subprogramme in the *Policy, Governance and Local Government Administration* programme.

### ***Alleviating poverty through public employment***

The community work programme strives to foster social and economic inclusion by providing individuals with a source of income in targeted high-unemployment areas. It also offers participants valuable work experience, a resource that can significantly increase their access to broader career opportunities when they exit the programme. The department plans to maintain the number of participants in the programme at 178 860 over

the medium term. The programme is funded through the *Community Work Programme* programme, which is allocated R10.3 billion over the period ahead. An estimated 70 per cent (R7.2 billion) of the programme's budget is set aside for participants' stipends and the remainder for items such as tools and materials, protective clothing, training, professional services and programme overheads.

### ***Strengthening disaster management capabilities at the municipal level***

The department intends to review its disaster management strategy over the MTEF period and continue to offer support to 30 priority district municipalities considered the most vulnerable. The department also strives to support all municipalities with interventions that mitigate the impact of natural and human-made hazards, and ensure that they have effective measures in place to respond adequately to disasters. Accordingly, to improve the implementation of disaster risk reduction strategies, the department aims to assess 14 municipal disaster management plans per year over the medium term.

These activities are carried out through the *National Disaster Management Centre* programme, allocations to which are set to decrease at an average annual rate of 30.2 per cent, from R2 billion in 2024/25 to R695.8 million in 2027/28. This is due to a high baseline after additional allocations were made to the programme in 2024/25 for unforeseen and unavoidable expenditure for the reconstruction and rehabilitation of infrastructure damaged by floods. Included in the programme's budget for 2025/26 is R709 million to be transferred to the *municipal disaster recovery grant* to rehabilitate flood-damaged infrastructure.

## Programme 2: Local Government Operations and Support

### Programme purpose

Facilitate and coordinate intergovernmental relations to support the development, implementation and monitoring of integrated plans and capacity building programmes.

### Objectives

- Improve reporting and accountability at the provincial and local government levels by providing legislative and policy oversight and implementing standardised reporting frameworks to streamline data collection on a quarterly basis.
- Coordinate and facilitate the development of municipal infrastructure to extend services to unserved communities by transferring funds from the *municipal infrastructure grant* and the *integrated urban development grant* in terms of the annual Division of Revenue Act on an ongoing basis.
- Support the development and maintenance of municipal infrastructure through partnerships with the Municipal Infrastructure Support Agent, sector departments and other entities by strengthening technical and operational capacity for infrastructure maintenance on an ongoing basis.
- Ensure improved service delivery for selected distressed municipalities by providing support and monitoring integrated plans and capacity-building programmes by March 2027.

### Subprogrammes

- *Management: Local Government Operations and Support* provides strategic oversight and leadership to ensure compliance with legislative mandates and alignment with the district development model.
- *Municipal and Provincial Governance Support and Capacity Building* provides targeted technical and institutional support to municipalities to strengthen their capacity to fulfil constitutional obligations and achieve developmental objectives.
- *Municipal Infrastructure Grant* makes transfers to supplement the capital budgets of municipalities to address infrastructure investment priorities for poor households.
- *Integrated Urban Development Grant* makes transfers to intermediate city municipalities to supplement their capital budgets for the implementation of the objectives of the integrated urban development framework.
- *Municipal Infrastructure Support Agent* makes transfers to help municipalities build in-house capacity and provide technical support for the sustained development of municipal infrastructure.

## Programme 3: Policy, Governance and Local Government Administration

### Programme purpose

Provide support and direction on the establishment and maintenance of efficient and effective municipal governance and administration policies and systems.

### Objectives

- Strengthen accountability by implementing the local government anti-corruption strategy in identified districts and metropolitan municipalities by March 2026.
- Support municipalities to improve their financial sustainability by monitoring and supporting, on an ongoing basis: the rating and valuation aspects of the implementation of the Local Government: Municipal Property Rates Act (2004); and the financial aspects of the Local Government: Municipal Systems Act (2000), including user service policies and tariffs, credit control and debt collection, indigent policies and related indigent registers.
- Support municipalities in building capable administrations in accordance with chapter 7 of the Local Government: Municipal Systems Act (2000) and related regulations, including capacity development initiatives, on an ongoing basis.
- Strengthen municipal governance by monitoring the functionality of council committees on an ongoing basis.
- Support the effective management of cooperative governance systems by strengthening reporting and developing a framework for local government powers and functions by March 2026.
- Strengthen the implementation of the integrated urban development framework by March 2026.
- Undertake a comprehensive review of the 1998 White Paper on Local Government in an effort to identify and rectify assumptions that have hindered the effective functioning of local government by:
  - developing a discussion document on the review of the 1998 White Paper on Local Government by March 2026
  - developing a reviewed White Paper on Local Government by March 2026.

### Subprogrammes

- *Management: Policy, Governance and Local Government Administration* provides strategic oversight and leadership to ensure compliance with legislative mandates and alignment with departmental targets with the aim of driving efficiency across programme initiatives.
- *Municipal Administration and Capacity* determines and monitors compliance with senior management's remuneration, appointments and disciplinary regulations in municipalities, complemented by the rollout of competency assessments, workshops and training to enhance adherence to municipal staff regulations.

- *Municipal Funding and Revenue Support* monitors and supports the implementation of free basic services policies, ensures compliance with the Division of Revenue Act, supports municipalities in property valuation and rating as per the Local Government: Municipal Property Rates Act (2004), oversees the municipal tariff policies and bylaws, and promotes revenue optimisation and legislative compliance.
- *Development Planning* drives the implementation of the national framework for local economic development and the integrated urban development framework, advancing urban and spatial development through strengthened instruments under the Spatial Planning and Land Use Management Act (2013) to promote sustainable municipal growth.
- *Municipal Demarcation Board* makes transfers to fund operational activities such as capacity assessments, ward delimitation and boundary redeterminations. This subprogramme transfers its budget to the Municipal Demarcation Board in full.
- *South African Cities Network* makes transfers to the South African Cities Network to fund operational activities and enable cooperation between South African cities. This subprogramme transfers its budget to the network in full.
- *Municipal Governance* directs and supports governance policy development, ensures effective configuration of powers and functions, promotes ethics, implements strategies to combat corruption and enhances financial management and audit outcomes in municipalities.
- *Knowledge Management, Monitoring and Report Systems* develops and institutionalises municipal performance monitoring and reporting systems on a set of local government indicators aligned with the Municipal Finance Management Act (2003) and drafts regulations under section 43 of the Local Government: Municipal Systems Act (2000) to standardise and improve local government reporting.
- *South African Local Government Association* makes transfers to the South African Local Government Association to fund its operations, including its participation in intergovernmental structures and legislatures.
- *Local Government Equitable Share* supplements municipal revenue for the provision of free basic services to poor households and creates greater institutional capacity in weaker municipalities.
- *Municipal Systems Improvement Grant* enhances municipal governance and operational efficiency by providing targeted technical assistance and capacity-building support. Its primary focus is on stabilising institutional frameworks and governance systems to ensure compliance with the Local Government: Municipal Systems Act (2000), the Local Government: Municipal Property Rates Act (2004) and related legislative frameworks by strengthening the in-house capacity of municipalities.

## Expenditure trends and estimates

## Programme 4: National Disaster Management Centre

### Programme purpose

Promote an integrated and coordinated system of disaster management with special emphasis on prevention and mitigation by all role players and stakeholders.

### Objectives

- Reduce disaster risk on an ongoing basis by facilitating the development, assessment and implementation of multisector disaster management plans across local government; and education, training, public awareness and research for all relevant role players in communities.
- Oversee institutional disaster management systems and improve legislative compliance by reviewing and amending regulatory and policy frameworks for disaster management on an ongoing basis.
- Improve and strengthen disaster management systems for all common disasters such as drought, floods, fire and disease in all provinces by raising public awareness about the effects and management of disasters on an ongoing basis.
- Coordinate effective, integrated disaster management and fire services by developing, strengthening and managing regulatory and institutional frameworks on an ongoing basis.
- Promote a culture of risk avoidance among stakeholders and role players by providing capacity for them through integrated education, training and public awareness programmes informed by scientific research on an ongoing basis.

### Subprogrammes

- *Management: National Disaster Management Centre* provides strategic leadership and ensures that activities are aligned with government's 2024-2029 medium-term development plan and that disaster management mandates are executed effectively.
- *Disaster Policy, Institutional Development and Compliance* facilitates the establishment of requirements for effective institutional arrangements in the national sphere of government to ensure the integrated and coordinated implementation of disaster risk management policy and legislation, and the application of the principles of cooperative governance.
- *Disaster Risk Reduction and Capacity Development* facilitates the development, assessment and implementation of multisectoral frameworks and plans to reduce and manage disaster risk. This subprogramme also promotes education, training, public awareness and research among role players and communities to improve the avoidance of disaster risk, reduce disaster risk and build community resilience.
- *Disaster Preparedness, Response and Recovery Coordination* develops and oversees the implementation of response and recovery strategies and projects in an integrated manner after a disaster has occurred.

- *Municipal Disaster Recovery Grant* rehabilitates and reconstructs municipal infrastructure damaged by disasters. This subprogramme makes transfers only when a disaster is declared.
- *Disaster Response Grant* provides immediate relief for legally classified disasters. This subprogramme makes transfers only when a disaster is classified.

## Programme 5: Community Work Programme

### Programme purpose

Create income security and work experience for participants and promote social and economic inclusion by targeting areas of high unemployment.

### Objective

- Provide and maintain 178 860 work opportunities per year over the medium term by managing programmes and strategic partnerships effectively and efficiently.

### Subprogrammes

- *Coordination, Partnerships and Implementation* ensures the effective management and coordination of partnerships and special projects with the public and private sectors to meet the programme's objective.
- *Monitoring and Evaluation* provides oversight and monitors the implementation of projects to ensure adherence to the programme's norms and standards so that targets are achieved.

Process for delimitation of municipal ward boundaries for local government elections per year	Demarcation and spatial transformation excellence	Outcome 16: Improved service delivery at local government	— <sup>1</sup>	— <sup>1</sup>	— <sup>1</sup>	Engage with all stakeholders on ward delimitation for the 2026 local government elections	All wards published in terms of the Local Government: Municipal Structures Act (1998)	— <sup>1</sup>	— <sup>1</sup>
Process for the determination of municipal boundaries per year	Demarcation and spatial transformation excellence		Municipal boundary redetermination proposals analysed	Determined or redetermined municipal outer boundaries published for class 1 redeterminations	Determined or redetermined municipal outer boundaries published for class 2-4 redeterminations	— <sup>1</sup>	Determined or redetermined municipal outer boundaries published for deferred cases	Municipal boundary redetermination proposals analysed	— <sup>1</sup>
Percentage of municipalities updating capacity assessment data per year	Research, spatial information and intelligence development		Capacity assessment data updated for 57% (142/249) of municipalities	— <sup>1</sup>	— <sup>1</sup>	Capacity assessment data updated for 60% of municipalities	— <sup>1</sup>	— <sup>1</sup>	Capacity assessment data updated for 70% of municipalities
Number of research reports produced per year in line with the board's research strategy	Research, spatial information and intelligence development		2	2	2	2	2	3	3
Number of outreach activities per year to strengthen public and stakeholder awareness and education on demarcation processes	Stakeholder engagement and communication		16	24	22	20	30	14	30

1. Achievements and targets are based on the municipal election cycle.

#### Entity overview

The Municipal Demarcation Board derives its legislative mandate from chapter 7 of the Constitution and section 3 of the Local Government: Municipal Demarcation Act (1998). The board is mandated to determine and redetermine municipal boundaries and render advisory services. In terms of the Local Government: Municipal Structures Act (1998), the board is also mandated to delimit wards, conduct capacity assessments for municipalities and assess the capacity of the executive council responsible for local government.

Over the medium term, the board will focus on finalising the delimitation of municipal wards, publishing final wards and handing those wards over to the Electoral Commission to prepare and conduct the 2026 local government elections. The board will also focus on producing 8 research reports and conducting 74 outreach activities over the period ahead to strengthen public and stakeholder awareness and education on demarcation processes.

Expenditure is expected to decrease at an average annual rate of 1.5 per cent, from R91.6 million in 2024/25 to R87.5 million in 2027/28 as a result of reductions implemented in the 2024 Budget. Compensation of employees accounts for an estimated 60 per cent (R157.2 million) of total expenditure over the period ahead to fund the

board's 48 posts. The board expects to receive 92.8 per cent (R242 million) of its revenue over the medium period through transfers from the department.

1. No historical data available.

### Entity overview

The Municipal Infrastructure Support Agent was established in terms of section 7(5)(c) of the Public Service Act (1994) to provide technical support to and build technical capacity in municipalities to enhance their capability to plan, deliver, operate and maintain municipal infrastructure efficiently.

The agent will continue to provide technical support to 108 municipalities over the medium term to be compliant with the Spatial Planning and Land Use Management Act (2013). To ensure the effective and efficient development, rollout and maintenance of municipal infrastructure over the period ahead, the agent plans to enrol 450 candidates for the young graduate programme and 300 young people in the agent's apprenticeship programme, and provide 1 500 municipal officials with technical skills training. The agent will also aim to help 62 municipalities enhance their procurement practices.

Expenditure is expected to decrease at an average annual rate of 0.2 per cent, from R406.7 million in 2024/25 to R404.8 million in 2027/28, due to the receipt of additional funding in 2024/25 for the eastern seaboard development project. Compensation of employees accounts for an estimated 63.9 per cent (R767.8 million) of the agent's total expenditure over the period ahead. The agent is set to receive all its revenue, amounting to R1.2 billion over the medium term, through transfers from the department. Revenue is set to decrease in line with spending.

### Programmes/Objectives/Activities

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

## Vote purpose

Provide a comprehensive communication service on behalf of government to facilitate the involvement of the majority of South Africans in governance, reconstruction and development, nation building, and reconciliation.

## Mandate

The mandate of the Government Communication and Information System is derived from section 195(g) of the Constitution, which stipulates that the public should be provided with information that is timely, accurate and accessible. This supports the constitutional principles of freedom of expression, and transparent and open governance. The department is responsible for providing strategic leadership and coordinating government communication to ensure that members of the public are informed and have access to government programmes and policies that benefit them.

## Selected performance indicators

**Table 4.1 Performance indicators by programme and related outcome**

Indicator	Programme	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Percentage compliance of government communications at the national level with qualitative elements in phase 2 of the government communication policy per year	Content Processing and Dissemination	Outcome 15: Social cohesion and nation building	— <sup>1</sup>	— <sup>1</sup>	— <sup>1</sup>	— <sup>1</sup>	20%	25%	35%
Percentage growth in the number of reads on SAnews stories per year	Content Processing and Dissemination		— <sup>1</sup>	— <sup>1</sup>	— <sup>1</sup>	— <sup>1</sup>	5%	7%	8.5%
Number of audio-visual products developed to profile national events, government programmes and the Presidency on various platforms to amplify reach per year	Content Processing and Dissemination		— <sup>1</sup>	100	486	100	2200	2300	2400
Number of people reached through central government campaigns per year	Content Processing and Dissemination		— <sup>1</sup>	— <sup>1</sup>	— <sup>1</sup>	15 million	20 million	23 million	25 million
Number of development communication projects aligned with the national communication strategic framework per year	Intergovernmental Coordination and Stakeholder Management		2 342	1 938	1 542	1 250	1 250	1 250	1 250

1. New indicator.

## Expenditure overview

The National Development Plan emphasises the need to unite all South Africans around a common goal, ensure that citizens are active in their development, and build a capable and developmental state. This is given expression by the priorities of government's 2024-2029 medium-term development plan, with which the department's work is aligned. To support the realisation of the visions contained in these guiding documents over the medium term, the department will focus on keeping South Africans informed and empowered, carrying out the communication activities for South Africa's G20 presidency, and achieving a well-functioning government communication system.

Expenditure is set to increase at an average annual rate of 3.4 per cent, from R760.8 million in 2024/25 to R842.2 million in 2027/28. The department's total budget over the medium term is R2.5 billion, 32.6 per cent (R804.5 million) of which is earmarked for transfers to its entities. Compensation of employees is the department's main cost driver, spending on which accounts for an estimated 39.2 per cent (R974.8 million) of its budget over the period ahead.

### ***An informed and empowered citizenry***

The content developed for and distributed through the department's various products and platforms is aimed at improving South African citizens' quality of life by keeping them informed and, as such, empowered. To ensure that government messages have a broad reach and that its services are widely accessible, the department uses key products such as Vuk'uzenzele newspaper, Cabinet statements and the State of the Nation Address, as well as digital and social media platforms. This work is funded through the *Products and Platforms* subprogramme in the *Content Processing and Dissemination* programme, which has a budget of R143.5 million over the MTEF period.

The department's provincial and district offices will drive communication interventions through community dialogues and radio programmes. To enable communities to be informed about government opportunities, programmes and policies, the department plans to facilitate engagements and outreach campaigns at taxi ranks, shopping centres and commuter trains. To this end, the department aims to undertake 1 250 community and stakeholder engagements in each year over the medium term. This includes supporting the president and deputy president imbizos, which are important public participation platforms that ensure key decision-makers hear the voices and perspectives of communities. The cost of rendering communication and support functions to citizens in provincial and district offices is expected to amount to R63.7 million over the medium term in the *Provincial and Local Liaison* subprogramme in the *Intergovernmental Coordination and Stakeholder Management* programme.

### ***Showcasing South Africa during its G20 presidency***

The department will drive integrated marketing and communication to ensure that all citizens are fully informed and updated on South Africa's G20 presidency, which runs until 30 November 2025. This will take the form of advertisements on community radio stations, radio promotions, talk shows, live feeds on digital and social media, community media briefings and networking sessions. Information and mobilisation material such as resource packages, flyers and posters will be distributed to attendees at outreach campaigns, and an official guide to South Africa will be printed for delegates. To this end, R48.9 million is allocated for these activities in 2025/26, of which R27.6 million is for departmental activities, while R21.3 million is allocated to Brand South Africa.

### ***A well-functioning government communication system***

As the professionalisation of government communication is central to improving the functioning of the system, the department will provide training opportunities for government communicators in partnership with the National School of Government. This will be supplemented by capacity-building and induction initiatives for new entrants to the system. Accordingly, the department plans to provide 31 training sessions in 2025/26, 39 in 2026/27 and 40 in 2027/28 to government communicators who will either be invited or apply to participate.

The department will facilitate the planning and implementation of priority campaigns on civic education, economic recovery and job creation, anti-corruption, and gender-based violence and femicide. These will be disseminated through various platforms at a projected cost of R20 million per year over the MTEF period. Of this, R17 million is provided through the *Communication Service Agency* subprogramme in the *Content Processing and Dissemination* programme and the remaining R3 million through the *Provincial and Local Liaison* subprogramme in the *Intergovernmental Coordination and Stakeholder Management* programme.

The department plans to strengthen the system by creating platforms for proactive communication between government and the media through strategic engagements. This is expected to facilitate the coordinated delivery of key messaging through platforms and channels such as regular briefings and roundtables, and timely and coherent reputation management. Parliamentary media relationships will be leveraged to amplify government messaging and sustaining channels with international media, including those based in South Africa, to ensure the country's development priorities receive global coverage. An amount of R2.9 million is allocated for these activities in the *Media Engagement* subprogramme in the *Intergovernmental Coordination and Stakeholder Management* programme over the MTEF period.

## Programme 2: Content Processing and Dissemination

### Programme purpose

Provide strategic leadership in government communication to ensure coherence, coordination, consistency, quality, impact and responsiveness.

## Objectives

- Provide strategic leadership and support in government communications by conducting research on public opinion and analysing media coverage to understand the communications environment and inform government messaging over the medium term.
- Increase the share of government's voice and messaging in the public domain by delivering government communication products and services over the medium term.
- Improve the dissemination of information by providing effective and efficient marketing and distribution services, cost-effective media bulk-buying services, and media products, platforms and services for government on an ongoing basis.

## Subprogrammes

- *Programme Management for Content Processing and Dissemination* coordinates strategic planning for communications in the department and other departments and ensures adherence to standards for government communications.
- *Research Analysis and Knowledge Services* monitors and evaluates the department and government's overall communication efforts to ensure continual improvement, monitors national and international media coverage affecting government and the country, conducts research into public opinion and provides knowledge management services to enhance effective government communication.
- *Products and Platforms* develops content for the department, provides language services for products that require translation, provides editing and proofreading services, manages the department and government's websites, produces government content, provides social media and news services, and develops the national communication strategy.
- *Communication Service Agency* provides media bulk-buying services and media production services to all spheres of government, develops distribution strategies for all government communications, oversees the outsourcing of distribution services to service providers, manages government's corporate identity, and provides marketing services for the department and other organs of state.
- *Policy Development, Analysis and Market Modelling* develops government policies, legislation and regulation that support the development of government communications, the nation brand and community media; and undertakes market research to explore opportunities for policy and regulatory intervention.
- *Brand South Africa* facilitates transfer payments to Brand South Africa.
- *Media Development and Diversity Agency* facilitates transfer payments to the Media Development and Diversity Agency.

## Programme 3: Intergovernmental Coordination and Stakeholder Management

### Programme purpose

Implement development communication through mediated and unmediated communication channels, and foster sound stakeholder relations and partnerships.

## Objectives

- Improve interdepartmental coordination to ensure that government messages are coherent and aligned by fostering joint planning and the sharing of messaging and communication functions across the 3 spheres of government over the medium term.
- Ensure that citizens are informed and empowered on government policies, plans, programmes, initiatives and achievements, and increase public participation in government's activities, by engaging with stakeholders over the medium term.
- Implement a proactive and reactive media engagement system by building, maintaining and improving relations with the media and setting narratives that drive the government communications agenda over the medium term.

## Subprogrammes

- *Programme Management for Intergovernmental Coordination and Stakeholder Management* ensures a well-functioning communications system that proactively informs and engages the public. This subprogramme manages and oversees the implementation of development communications by building sound stakeholder relations and partnerships and ensuring that the public is informed about government policies and programmes.
- *Provincial and Local Liaison* ensures that the national communication strategic framework is aligned with provincial and local communication strategies; procures advertising on media platforms and mobilises non-paid-for, direct communication platforms to promote government messages to the public locally; fosters collaboration and partnership among stakeholders; and coordinates the imbizo programme.
- *Media Engagement* leads and drives curated interaction and communication between government and the media; ensures effective liaison between government and the media; manages government's media liaison services by providing information; establishes, strengthens and maintains relationships with foreign and independent media; and establishes relations with South African missions to disseminate government information and key targeted messages.
- *Cluster Supervision (Human Development, Social Protection, and Governance and Administration)* provides strategic cluster communications advice and support to national departments and leadership on key cluster communication issues and campaigns; coordinates Cabinet cluster communications and the development of government's communications programme; develops communication strategies and key messages for the campaigns of departments in these clusters; and is responsible for the coordination of training and development in government communications.
- *Cluster Supervision (Economic and Infrastructure, Justice and International)* provides strategic cluster communication advice and support to national departments and leadership on key cluster communication issues and campaigns; coordinates Cabinet cluster communications and the development of government's communications programme; develops communication strategies and key messages for the campaigns of departments in these clusters; and, at least twice per year, convenes the government communicators' forum.

#### Entity overview

Brand South Africa was established in 2002 to manage South Africa's nation brand with the aim of improving the country's global reputation and competitiveness. The entity's primary objective is to develop and implement proactive and coordinated reputation management, and communications and marketing strategies for South Africa to attract investment, trade and tourism.

Over the medium term, the entity will focus on implementing integrated communications and marketing activities that contribute to shaping South Africa's image and reputation in a positive light. This will be done through interventions such as profiling South Africa as a preferred investment destination in Africa and assuring investors by positively positioning the nation brand. Forums that the entity will leverage to amplify nation brand messaging include South Africa's G20 presidency, the World Economic Forum in Davos, the Nation Brand Forum, the South African Investment Conference, the Mining Indaba and the Play Your Part programme. Expenditure for these activities is within the brand marketing and reputation management programme's allocation of R316.2 million over the medium term.

The entity intends to ensure that South Africa maximises its influence and visibility to international audiences during its G20 presidency to drive economic benefits and strengthen the country's global reputation. The G20 presidency presents a significant opportunity to influence global perceptions and engage with international audiences on critical issues such as sustainable development, economic equity and innovation. To give effect to

these aspirations, the entity's G20 marketing and communications plan outlines activities such as targeted international campaigns, stakeholder engagements and media partnerships. An additional allocation of R21.3 million in 2025/26 is set aside for these activities.

Expenditure is expected to increase at an average annual rate of 7.3 per cent, from R192.3 million in 2024/25 to R237.4 million in 2027/28, due to an additional allocation of R21.3 million in 2025/26 from the department related to South Africa's G20 presidency. The entity is set to derive 97 per cent (R678 million) of its revenue over the period ahead through transfers from the department. Revenue is expected to increase in line with expenditure.

1. No historical data available.

## Entity overview

Over the medium term, the agency will continue to provide financial and non-financial support to community and small commercial media, with an emphasis on promoting indigenous languages and contributing to community development. The agency also plans to intensify its focus on ensuring the sustainability of media projects in communities that are underserved by mainstream media. As such, most of the agency's budget over the period ahead is earmarked to provide grant funding for 66 community broadcast projects, either to help initiate new ones or strengthen existing ones; and 18 community and small commercial media print and digital projects. The agency also plans to implement its digital strategy for the sector by providing 60 media projects with digital support over the medium term. As content production is key in the sustainability of the sector, support will be provided to 30 content production initiatives. Expenditure for these projects is expected to amount to R172 million over the MTEF period.

In line with the agency's plans to ensure the sustainability of community media, it has developed capacity-building programmes that aim to provide community and small commercial media with skills, such as human resource and financial management, that are needed for effective performance at work. Over the period ahead, the agency will continue to provide grantee orientation training to funded beneficiaries, and accredited training in areas such as technical training for studio equipment, governance, ethics and disinformation through partnerships with stakeholders and training providers. Training will be supported through 12 media literacy initiatives across the country in areas with a strong community media presence. Expenditure for these initiatives is projected to be R15 million over the medium term. Related activities, including 6 research projects on key developments affecting the community media sector, are expected to cost R21 million over the medium term. This research is intended to develop a repository of knowledge that will provide insights into sectoral needs, key trends, patterns of innovation and proposals on innovative modalities that prioritise the sustainability of the sector while measuring audience engagement.

Expenditure is set to decrease at an average annual rate of 4.2 per cent, from R132 million in 2024/25 to R115.9 million in 2027/28, mainly due to reduced donations from mainstream media. Total expenditure is projected to amount to R340.5 million over the MTEF period. The agency is set to derive 57.7 per cent (R196.5 million) of its revenue over the period ahead through the mainstream broadcast sector as donations deductible from the Universal Service and Access Fund levy, and 37.1 per cent (R126.5 million) through transfers from the department.

## Vote purpose

*Efficiently determine and safeguard the identity and status of citizens. Regulate immigration to ensure security, promote development and fulfil South Africa's international obligations.*

## Mandate

The Department of Home Affairs derives its mandate from the Constitution, various acts of Parliament and policy documents. This mandate entails the management of citizenship and civil registration, international migration and refugee protection, and allows the department to be a key enabler of national security, citizen empowerment, efficient administration and socioeconomic development. These functions must be managed securely and strategically. The department's services are divided into 2 broad categories: civic services and immigration services.

## Selected performance indicators

## Expenditure overview

The department plays a crucial role in upholding dignity through delivering its core services, securing the nation, and fostering economic growth and job creation. Over the medium term, the department will continue to focus on digital transformation, a large part of which entails automation and using artificial intelligence to streamline processes, boost productivity and reduce error; and expanding its footprint by increasing its points of presence.

Expenditure is expected to increase marginally from R12.1 billion in 2024/25 to R12.5 billion in 2026/27, before decreasing slightly to R12.1 billion in 2027/28. This is due to additional allocations in 2026/27 of R885 million to the Electoral Commission for the 2026 local government elections and R306 million to the Border Management Authority to enhance border security and improve the management of South Africa's ports of entry. Spending on compensation of employees accounts for an estimated 35.9 per cent (R13.3 billion) of total expenditure over the MTEF period, while spending on departmental agencies and accounts is projected to comprise 38.2 per cent (R14.2 billion).

### Enabling digital transformation

The lack of a modern, digital system for processing applications, adjudicating cases and communicating outcomes creates national security vulnerabilities and inefficiencies because outdated paper-based processes are prone to fraud, corruption and discretionary misuse, making them susceptible to manipulation. Comprehensive digital transformation remains a priority for department and technical solutions are required to address persistent challenges. As such, over the MTEF period, the department plans to mitigate the vulnerabilities caused by manual processes through expediting the digitisation of paper records. To this end, it is expected that a total of 27 million civic service records – including birth, marriage and death certificates, as well as amendments – will be digitised per year over the MTEF period. As funding for this was allocated only until 2023/24, R300 million is reprioritised from the department's baseline in 2025/26 to continue this work.

### Enhancing service delivery through automation

Over the period ahead, the department plans to ensure that all the department's services are fully automated, digitised and accessible online, enabling clients to access them conveniently from their homes. Citizens who require routine civic services, such as applying for or renewing smart identity cards, passports or certificates, should be able to do so through a secure online platform that is integrated with their captured biometric data. Applications will be processed by an automated risk engine, requiring department personnel interventions only when anomalies are detected. Upon completion, these documents will be delivered directly to clients in South Africa or abroad. These activities are funded through the *Citizen Affairs Management* subprogramme in the *Citizen Affairs* programme, which is allocated R427.3 million over the medium term.

The process to apply online for passports and smart identity cards has been rolled out for clients to book appointments, apply and collect at 202 modernised offices and 30 banks. To improve access to smart identity cards and passports, and phase out green identity documents, an additional 10 front offices are expected to become operational in 2025/26. The department will also pursue its collaboration with banks in this regard. To this end, R16 million is allocated in 2025/26 in the *Transversal Information Technology Management* subprogramme in the *Administration* programme.

The department will continue to roll out the online birth registration system to health facilities to print birth certificates as births occur. Audits will be conducted to determine the number of facilities that are still without this functionality. The project will also be rolled out in 25 public and private hospitals in 2025/26. Related

activities are expected to cost R21 million in 2025/26. These funds are allocated in the *Management Support Services* subprogramme in the *Administration* programme.

To complement this initiative, application processes for birth certificates for South African citizens and foreign nationals will be automated in 46 public health facilities across the country. This will help minimise fraud and corruption, tighten the registration process and improve turnaround times for issuing unabridged certificates. To carry out this function, R16 million is allocated in the *Transversal Information Technology Management* subprogramme in the *Administration* programme in 2025/26.

### **Using artificial intelligence to boost productivity and reduce error**

The department will use artificial intelligence over the next 3 years to streamline routine tasks and, as such, reduce the need for human intervention. These advancements will be integral to increasing the speed of processing applications and reducing rates of error, and help address capacity shortages by implementing fit-for-purpose technology tailored to specific use cases.

Once rolled out, the electronic travel authorisation solution is expected to rely on artificial intelligence to process applications for travel documents. The prototype of this solution will be expanded to all visa or permit categories at a projected cost of R100 million over the medium term in the *Transversal Information Technology Management* subprogramme in the *Administration* programme.

### **Improving accessibility for greater presence**

A targeted 220 mobile offices are expected to be functional in 2025/26. These will be equipped with the required hardware, systems and connectivity to operate as standard Home Affairs offices, and will be deployed specifically in areas with populations of 40 000 or fewer. Funds for this, amounting to an estimated R45 million in 2025/26, are allocated in the *Citizen Affairs Management* and *Service Delivery to Provinces* subprogrammes in the *Citizen Affairs* programme.

To facilitate the application process for smart identity cards and passports, the department also plans to roll out virtual interactive self-service kiosks in 2025/26, which will enable clients to reprint birth, marriage and death certificates. These kiosks will be installed in 66 non-modernised offices at a projected cost of R60 million in the *Transversal Information Technology Management* subprogramme in the *Administration* programme.

## Programme 2: Citizen Affairs

### Programme purpose

Provide secure, efficient and accessible services and documents to citizens and lawful residents.

### Objectives

- Ensure that registration at birth is the primary entry point to the national population register by maintaining the number of births registered within 30 calendar days per year at 730 500 over the medium term.
- Ensure a high standard of service delivery over the medium term by:
  - issuing 2.75 million smart identity cards
  - issuing 90 per cent of machine-readable adult passports through the live-capture system within 13 working days
  - issuing 90 per cent of machine-readable children's passports through the live-capture system within 18 working days.

### Subprogrammes

- *Citizen Affairs Management* provides for the overall management of head offices and frontline offices, provides policy direction, sets standards and manages back-office processes.
- *Status Services* regulates all matters relating to the national population register. These include: maintaining an accurate register of all citizens and immigrants who have acquired the right to permanent residence; registering births, deaths and marriages; providing travel and citizenship documents; providing financial assistance to citizens abroad who wish to return to South Africa but have no means to; and determining and granting citizenship.
- *Identification Services* oversees issues relating to identity, including fingerprints, photographs and identity documents, by establishing and maintaining national identity systems such as the automated biometric identification system.
- *Service Delivery to Provinces* provides for all civic, immigration and refugee affairs functions in provinces by providing a client interface for the collection and processing of applications, issuing enabling documents that are available on demand (such as temporary identity certificates), and conducting quality assurance checks for civic and immigration applications.

## Programme 3: Immigration Affairs

### Programme purpose

Enable the secure movement of persons to and from South Africa in line with the Immigration Act (2002). Confirm and provide enabling documents to foreign visitors legally residing within the Republic of South Africa to encourage the movement of skilled professionals into its borders. Enforce immigration legislation and effect deportations. Determine the status of asylum seekers and regulate refugee affairs.

### Objectives

- Maintain the standard of service delivery for enabling documents over the medium term by:
  - maintaining the percentage of business visa outcomes (applications submitted within South Africa) issued within 8 weeks at 90 per cent
  - maintaining the percentage of general work visa outcomes (applications submitted within South Africa) issued within 8 weeks at 90 per cent
  - maintaining the percentage of critical skills visa outcomes (applications submitted within South Africa) issued within 4 weeks at 95 per cent
  - conducting 40 000 deportations of illegal immigrants per year over the period.

### Subprogrammes

- *Immigration Affairs Management* provides for the overall management of the branch and policy direction, sets standards and manages back-office processes.
- *Admission Services* enables the secure movement of people to and from South Africa in line with the Immigration Act (2002), and controls the processing of applications for permanent and temporary residence permits/visas, including those for work, study and business.
- *Immigration Services* deals with immigration matters in foreign countries; detects, detains and deports illegal immigrants in terms of the Immigration Act (2002); conducts investigations with other law enforcement entities; and provides policy directives on immigration matters.
- *Asylum Seekers* considers and processes applications for asylum; issues enabling documents to refugees; and facilitates processes to find lasting solutions to refugee problems, in line with the Refugees Act (1998).

## Programme 4: Institutional Support and Transfers

### Programme purpose

Provide institutional support and transfer funds to the Electoral Commission, the Represented Political Parties' Fund and the Border Management Authority.

### Objective

Defend, protect, secure and manage South Africa's borders by operationalising the Border Management Authority at 71 ports of entry, 10 land border law enforcement areas and 2 community crossing points over the medium term.

### Subprogrammes

- *Border Management Authority* transfers funds to the Border Management Authority to facilitate and manage the legitimate movement of people within the border law enforcement area and at ports of entry; facilitates and manages the legitimate movement of goods within the border law enforcement area and at ports of entry; and cooperates and coordinates its border law enforcement functions with the South African Police Service, the South African Revenue Service, the South African National Defence Force and border communities.
- *Electoral Commission* transfers funds to the Electoral Commission, which manages national, provincial and local government elections; ensures those elections are free and fair; and declares the results within a prescribed period.
- *Represented Political Parties' Fund* transfers funds to the Represented Political Parties' Fund to provide funding for political parties participating in Parliament and provincial legislatures.

Number of bilateral agreements signed with neighbouring countries per year	Operations		— <sup>1</sup>	— <sup>1</sup>	2	2	4	6	8

1. No historical data available.

2. Target not achieved mainly due to capacity constraints within the entity.

#### Entity overview

The Border Management Authority was established in terms of the Border Management Authority Act (2020) to strengthen border control within the border law enforcement area and at ports of entry. The act empowers the authority to facilitate and manage the legitimate movement of people and goods at ports of entry, prevent illegitimate activities at ports of entry and within the border law enforcement area, and cooperate and coordinate its border law enforcement functions with other organs of state and border communities.

Over the MTEF period, the authority will focus on deploying human resources and technology, and procuring equipment to ensure that it fulfils its mandate seamlessly. Accordingly, the authority plans to appoint an additional 200 border guards, regional commanders, port commanders and critical senior management officials at a projected cost of R80.8 million over the medium term. These positions are expected to anchor and support the frontline port functions transferred from the former departments of agriculture, land reform and rural development, and forestry, fisheries and the environment; the Department of Health; and the Department of Home Affairs. The authority also plans to invest in technology for developing improved systems, such as that needed to establish smart borders, which reduce the need for human intervention by processing border movements using biometric information; and enhancing internet connectivity at the 71 ports of entry. Spending on these activities is projected to amount to R116 million over the period ahead.

Expenditure is expected to increase at an average annual rate of 12.4 per cent, from R1.4 billion in 2024/25 to R2 billion in 2027/28. The main expenditure items are related to the procurement of border surveillance equipment; ICT for the support and maintenance of Sage business management software and movement control systems at ports of entry; and improvements to, and the repair and maintenance of, infrastructure. The relatively high rate of increase is mainly due to the reallocation of an additional of R909 million over the next 3 years from the Department of Public Works and Infrastructure's Property Management Trading Entity. This is intended to cover costs associated with managing infrastructure at ports of entry. The authority is set to derive 96.9 per cent (R5.5 billion) of its revenue over the period ahead through transfers from the department. Revenue is expected to increase in line with spending.

### Entity overview

The Electoral Commission was established in terms of the Electoral Commission Act (1996), which sets out the commission's composition, powers, functions and duties. It is mandated to manage national, provincial and local government elections; ensure that those elections are free and fair; and declare results within a prescribed period.

Over the medium term, the commission will focus on planning and conducting the 2026 local government elections. Planned operations over the period ahead include: procuring, printing, distributing and warehousing registration and election materials; making payments for rental and infrastructure for an estimated 23 300 voting stations; amending ballot papers as a result of legislative changes; appointing and training an estimated 518 000 electoral, expansion and counting staff; maintaining the voters' roll; making system enhancements to anticipate the outcome of electoral system reform on, among other things, candidate nomination, ballot paper generation and result and seat assignment systems; and procuring a building for the commission's national office. To facilitate the successful execution of the upcoming elections, in addition to the R2.9 billion allocated over the MTEF period in the electoral operations programme, the commission will receive an additional allocation of R885 million in 2026/27.

The commission plans to undertake extensive civic and democracy education and communication campaigns in preparation for the 2 national registration events leading up to the 2026 local government elections. These campaigns will be rolled out on various platforms, particularly social media. They aim to keep the electorate informed and improve voter turnout, and include a communication strategy to roll out the amended Electoral Act (1998). Expenditure on outreach is expected to amount to R709.2 million over the medium term.

To ensure compliance with applicable provisions of the Political Funding Act (2018), activities carried out through the party funding programme will focus on intensifying the commission's role in managing and administering the Political Representatives Fund, previously known as the Represented Political Parties' Fund, and the Multi-party Democracy Fund. This work, which is allocated R68.3 million over the next 3 years, is expected to include thorough monitoring and oversight through recording, producing and publishing quarterly reports containing declarations of direct funding by political parties.

Expenditure is expected to decrease at an average annual rate of 12.1 per cent, from R3.2 billion in 2024/25 to R2.2 billion in 2027/28, due to fluctuations in allocations in election and non-election years. The commission is set to derive 95.6 per cent (R7.6 billion) of its revenue over the medium term through transfers from the department and the remainder through interest on investments. Revenue is expected to increase at an average annual rate of 0.4 per cent, in line with increases in departmental transfers.

### Entity overview

Government Printing Works is mandated to provide secure printing and ancillary services to all organs of state in all spheres of government. The entity operates on sound business principles and fulfils its mandate subject to policies prescribed by the Minister of Home Affairs. It produces enabling documents such as smart identity cards, passports, examination and high-security certificates, and facilitates communication by various government institutions through coordinating and distributing the Government Gazette.

Over the medium term, the entity will continue to focus on its recapitalisation plans, which include: the procurement of state-of-the-art machinery to enhance manufacturing and operational capacity as part of its master plan project; and completing its new headquarters. The master plan project is allocated R1.8 billion over the MTEF period, with the Development Bank of Southern Africa as the implementing agent, while renovations to the headquarters are estimated to cost R230 million over the same period.

The entity is in the process of adopting standards for business continuity, ICT, occupational health and safety, information security, and security operations. These standards will be fully adopted by 2027/28 at a projected cost of R62.5 million. Particularly, the implementation of the entity's ICT strategy and plan is expected to ensure an extensively revamped and resilient ICT environment, with on-site and remote backup and restore facilities, to increase production capacity. The procurement of an enterprise resource planning solution through the State Information Technology Agency will enable the entity to streamline operations by incorporating them on to a single system. Overall expenditure for these initiatives is estimated to be R682 million over the MTEF period.

Total expenditure is projected to increase at an average annual rate of 4.1 per cent, from R1.8 billion in 2024/25 to R2 billion in 2027/28. The entity is set to generate 99.7 per cent (R6.1 billion) of its revenue over the medium

term through its business operations. Revenue is expected to increase at an average annual rate of 5.5 per cent, from R1.8 billion in 2024/25 to R2.1 billion in 2027/28.

## Vote purpose

*Formulate, coordinate, implement and manage South Africa's foreign policy and international relations programmes.*

## Mandate

According to the Constitution, the president is ultimately responsible for South Africa's foreign policy and international relations. It is the president's prerogative to appoint heads of missions, receive foreign heads of missions, conduct state-to-state relations, and negotiate and sign all international agreements. International agreements that are not of a technical, administrative or executive nature bind the country only after being approved by Parliament, which also approves

its ratification of or accession to multilateral agreements. All international agreements must be tabled in Parliament for information purposes. The Minister of International Relations and Cooperation is entrusted with the formulation, promotion, execution and daily conduct of South Africa's foreign policy. The department's overall mandate is to work for the realisation of South Africa's foreign policy objectives. This is done by:

- coordinating and aligning South Africa's international relations
- monitoring developments in the international environment
- communicating government's policy positions
- developing and advising government on policy options, and creating mechanisms and avenues for achieving objectives
- protecting South Africa's sovereignty and territorial integrity
- contributing to the creation of an enabling international environment for South African businesses
- sourcing developmental assistance
- assisting South African citizens abroad.

## Selected performance indicators

## Expenditure overview

Over the medium term, the department will continue to focus on strengthening bilateral relations, advancing the African Agenda and promoting regional development, continuing its active participation in multilateral forums, and enhancing its infrastructure portfolio in foreign missions.

Total expenditure over the MTEF period is anticipated to be R21.8 billion. This spending is expected to increase at an average annual rate of 2 per cent, from R7.1 billion in 2024/25 to R7.5 billion in 2027/28. Cabinet has approved a baseline increase of R226.5 million in 2025/26, of which R191.5 million is for South Africa's G20 presidency, which runs until 30 November 2025, and R35 million is for South Africa's requirements at the International Court of Justice in relation to its case against Israel for alleged human rights violations in Gaza. A further R36.6 million is allocated in 2026/27 for this purpose.

The department will lead the Sherpa Track during South Africa's G20 presidency. As the leader of the track, the department will oversee negotiations and discussions that will form the summit's agenda, and coordinate much of this work. Discussions will be on various topics, including agriculture, the digital economy, development, disaster risk, education, employment and energy transitions. The department has also established a secretariat to cover administrative and logistical tasks in preparation for South Africa's G20 presidency.

The department operates mainly through the 114 diplomatic missions in 102 countries where South Africa has representation. As such, compensation of employees is its main cost driver, accounting for an estimated 46.4 per cent (R10.2 billion) of expenditure over the medium term.

### ***Strengthening bilateral relations***

Participation in bilateral engagements remains a core mechanism through which national priorities are advanced and effective engagements are maintained on international forums. To this end, the department will continue to strengthen its political, economic and social relations over the medium term. This will be achieved by sourcing investment opportunities through its diplomatic missions as a way of contributing to government's priorities. As such, the department plans to maintain and strengthen bilateral relations over the medium term through 60 structured bilateral engagements and high-level visits, and 60 economic diplomacy activities and initiatives per year. These activities are carried out through the *International Relations* programme, which is allocated R10.8 billion over the medium term.

### ***Advancing the African Agenda and promoting regional development***

South Africa's national position is informed by its domestic policy, its constitutional values and the African Agenda on peace and security, human rights and economic and social development. The department will continue to pursue South Africa's multilateral interests at the continental level through its membership of and participation in the African Union (AU) and will continue to advance the implementation of the African Continental Free Trade Area and the AU's Agenda 2063. To support these activities, the department anticipates spending R1.1 billion over the medium term on AU membership fees within the *Membership Contribution* subprogramme in the *International Transfers* programme.

The Southern African Development Community (SADC) is pivotal to South Africa's pursuit of regional development and integration. The department intends to strengthen the coordination of South Africa's participation in SADC and Southern African Customs Union (SACU) processes through 10 statutory sectoral and senior officials' meetings and 6 SACU statutory meetings per year over the MTEF period. These meetings are intended to enhance trade relations and reduce conflict in Southern Africa. As a member of the SADC, South Africa will continue to ensure that its interests and those of other members are advanced. To achieve these objectives, the department will spend an estimated R567 million over the medium term on SADC membership fees within the *Membership Contribution* subprogramme in the *International Transfers* programme.

### ***Participating in global forums***

Through its membership of and participation in United Nations (UN) programmes and forums such as the Non-Aligned Movement, the G77, the G20, the Commonwealth and partnership arrangements, South Africa will continue to further its interests at the global level. Work to promote and advance the country's foreign and domestic policy imperatives, which includes advancing the African Agenda on peace and security, human rights and economic and social development, as well as supporting the UN's 2030 Agenda for Sustainable Development, will remain a priority for the department over the medium term. In support of furthering the country's multilateral interests and agendas, the department will hold various international engagements before hosting the 2025 G20 Johannesburg Summit in November 2025. To support these activities an estimated R215.7 million over the medium term is allocated in the *Public Diplomacy* subprogramme in the *Public Diplomacy and Protocol Services* programme.

### ***Managing infrastructure projects and properties***

Over the next 3 years, the department plans to purchase foreign properties for office and residential purposes to reduce rental costs. It also plans to repurpose underused state-owned properties in its global portfolio. Repurposing involves converting offices or large official residences into staff quarters. Plans are in place over the period ahead to construct office accommodation on South Africa's state-owned vacant land in New Delhi, India; refurbish and acquire property in 4 strategic countries where rental costs are high; and renovate and maintain 11 properties across the world in accordance with the outcomes of conditional assessments carried out to preserve and prolong the department's property portfolio. To carry out these activities, R567.2 million is allocated over the next 3 years to the *Foreign Fixed Assets Management* subprogramme in the *Administration* programme.

## Programme 2: International Relations

### Programme purpose

Promote relations with foreign countries.

### Objective

- Strengthen political, economic and social relations through structured bilateral agreements and high-level engagements to advance South Africa's national priorities, the African Agenda and South-South cooperation on an ongoing basis.

## Subprogrammes

- *Africa* embraces relevant national priorities by strengthening bilateral cooperation with individual countries in Africa, particularly through focusing on increasing exports of South African goods and services, foreign direct investment with technology transfers into value-added industries and mineral beneficiation, inbound tourism and skills enhancement. South Africa has representation in 47 diplomatic missions in Africa.
- *Asia and Middle East* embraces relevant national priorities by strengthening bilateral cooperation with individual countries in Asia and the Middle East, particularly through focusing on increasing exports of South African goods and services, foreign direct investment with technology transfers into value-added industries and mineral beneficiation, inbound tourism and skills enhancement. South Africa has representation in 30 diplomatic missions in Asia and the Middle East.
- *Americas and Caribbean* embraces relevant national priorities by strengthening bilateral cooperation with individual countries in the Americas and the Caribbean, particularly through focusing on increasing exports of South African goods and services, foreign direct investment with technology transfers into value-added industries and mineral beneficiation, inbound tourism and skills enhancement. South Africa has representation in 13 diplomatic missions in the Americas and the Caribbean.
- *Europe* embraces relevant national priorities by strengthening bilateral cooperation with individual countries in Europe, particularly through focusing on increasing exports of South African goods and services, foreign direct investment with technology transfers into value-added industries and mineral beneficiation, inbound tourism and skills enhancement. South Africa has representation in 23 diplomatic missions in Europe.

## Programme 4: Public Diplomacy and Protocol Services

### Programme purpose

Communicate South Africa's role and position in international relations in domestic and international arenas, and provide state protocol services.

## Objectives

- Provide ongoing consular assistance to South African citizens abroad.
- Ensure a better understanding of South Africa's foreign policy by providing ongoing strategic public diplomacy direction and state protocol services nationally and internationally.

## Subprogrammes

- *Public Diplomacy* promotes a positive image of South Africa; communicates foreign policy positions to domestic and foreign audiences; and markets and brands South Africa through public diplomacy platforms, strategies, products and services.
- *Protocol Services* facilitates incoming and outgoing high-level visits and ceremonial events, coordinates and regulates engagement with the local diplomatic community, provides protocol advice and support to various spheres of government, facilitates the hosting of international conferences in South Africa, and manages state protocol lounges and guesthouses.

## Programme 5: International Transfers

### Programme purpose

Fund membership fees and transfers to international organisations.

### Objectives

- Promote multilateral activities that enhance South Africa's economic and diplomatic relations on the continent and with the world by:
  - providing annual transfers to recapitalise the African Renaissance and International Cooperation Fund as a contribution to its operations.
  - providing for South Africa's annual membership fee contributions to international organisations such as the UN, the AU and SADC

### Subprogrammes

- Departmental Agencies* facilitates transfer payments to the African Renaissance and International Cooperation Fund.
- Membership Contribution* facilitates transfer payments to international organisations.

### Entity overview

The African Renaissance and International Cooperation Fund was established in terms of the African Renaissance and International Cooperation Fund Act (2000) to enhance cooperation between South Africa and other countries, particularly in Africa; promote democracy and good governance; prevent and resolve conflict; encourage socioeconomic development and integration; provide humanitarian assistance; and develop human resources.

Over the medium term, the entity will continue to focus on economic development and integration by supporting projects that enhance the use of the signed African Continental Free Trade Area agreement, prevent conflicts and advance conflict resolution, and respond effectively to crises by providing humanitarian aid assistance in Africa and the rest of the world. The aims of the African Continental Free Trade Area agreement are to increase socioeconomic development, reduce poverty and make Africa more competitive in the global economy.

The entity will also participate in development cooperation initiatives through funding international organisations such as the South Centre; and supporting South Africa's presidency of the G20 in 2025/26. Spending on these activities amounts to an estimated R85.6 million over the medium term as part of the entity's objective to promote socioeconomic development and integration.

To achieve these objectives, expenditure is expected to increase at an average annual rate of 4.1 per cent, from R53.6 million in 2024/25 to R60.5 million in 2027/28. The entity is set to derive 98 per cent (R171 million) of its revenue through transfers from the department. These increase at an average annual rate of 4.5 per cent, from R52.1 million in 2024/25 to R59.5 million in 2027/28. The remaining revenue is set to be generated through interest income. Overall, revenue is expected to increase in line with spending.

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

## Vote purpose

Provide or coordinate the provision of learning, training and development interventions that lead to improved performance and service delivery in the public sector.

## Mandate

The National School of Government is mandated to provide training or effect its provision in terms of the Public Service Amendment Act (2007). The school responds to its mandate by developing relevant training and development programmes for delivery to South African public service officials at all levels. Through education and training, the school promotes the realisation of the values and principles governing public administration and enhances the quality of human resource capacity in public service institutions. The school uses its trading account, established in terms of the Public Finance Management Act (1999), to deliver its core output.

Number of ICT projects enabling the school's operations per year	Administration		6	6	7	6	6	6	6

1. No historical data available.

## Expenditure overview

Over the medium term, the school will focus on driving digital transformation to contribute to building state capacity, developing and implementing its service delivery improvement plan, and mapping its key business processes. This is expected to enhance its operational efficiency and service delivery outcomes.

Expenditure is expected to increase at an average annual rate of 4.6 per cent, from R218.7 million in 2024/25 to R250.3 million in 2027/28. Transfers to the school's training trading account constitute 49.2 per cent (R353.5 million) of the department's budget over the medium term, with the remainder allocated to the *Administration* programme.

### Helping to build state capacity through digital transformation

The department plans to begin enhancing its digital capacity over the medium term to help build state capacity in line with government's 2024-2029 medium-term development plan. The initial strategy is set to be developed and reviewed until 2027 and implemented by 2030. In addition to digitalising business activities, the overarching goal of the digital transformation drive is for the school to integrate systems within the larger public sector ecosystem. This will be enhanced through the school's sustainable and strategic education and training partnerships in the ICT and digital space, as well as its established partnerships with 10 higher education institutions to roll out selected programmes from the school's suite of courses. To carry out these activities, R35.3 million over the MTEF period is allocated in the *Corporate Services* subprogramme in the *Administration* programme.

### Implementing the service delivery improvement plan

Over the next 3 years, the school will focus on developing and implementing its 2025-2030 service delivery improvement plan, which adopts a building-block approach aimed at enhancing service delivery across all the school's key functions. These include enhancing strategic alignment; revising its service delivery framework; improving service standards; improving key services; mapping and redesigning its processes; developing human resource and capacity; planning its finances and resources adequately; monitoring, evaluating and reporting on internal performance; and improving communication and stakeholder engagement.

The department will also undertake benchmarking exercises and consultations with key internal (public sector) and external (private sector) stakeholders to ensure that the service delivery improvement plan is effective and aligned with the evolving needs of the public service. The plan is expected to be approved in 2025/26 and implemented by 2027/28. Implementation will focus on establishing monitoring and evaluation mechanisms, rolling out targeted training and capacity-building initiatives, and enhancing collaboration across departments to ensure seamless execution. To carry out these activities, R13.9 million over the MTEF period is allocated in the *Corporate Services* subprogramme in the *Administration* programme.

### Mapping key business processes

Over the MTEF period, the department will focus on mapping key business processes to enhance operational efficiency and service delivery. This will involve identifying, documenting and analysing core processes to ensure that they are streamlined, aligned with organisational objectives and compliant with regulatory frameworks. To this end, the department aims to map 4 key business processes per year over the medium term. To carry out these activities, R13.5 million over the MTEF period is allocated in the *Corporate Services* subprogramme in the *Administration* programme.

## Programme 2: Public Sector Organisational and Staff Development

### Programme purpose

Facilitate transfer payments to the training trading account, which provides education, development and training to public sector employees.

### Objectives

- Ensure a capable and professional public sector by:
  - developing and rolling out innovative courses or programmes on an ongoing basis
  - providing knowledge-sharing platforms in the form of webinars, masterclasses or executive workshops annually
  - improving governance and social cohesion by training the boards of state entities and traditional leaders in all provinces on an ongoing basis.

1. No historical data available.

#### Entity overview

The National School of Government carries out its expanded mandate of building capacity in all spheres of government, state-owned entities and organs of state through its training trading account. Over the medium term, the school will continue to focus on providing training opportunities by collaborating with higher education and further education and training institutions, professional bodies and private training providers. It will aim to retain and sign memorandums of understanding and agreements aimed at supporting the delivery, relevance, professionalisation and quality of education, training and development offerings nationally and internationally.

These objectives will be achieved through cross-sector public service projects. Over the MTEF period, these include the development of a professionalisation framework and the provision of training programmes such as a course on championing anti-discrimination in the public service, the Nyukela senior management service pre-entry programme and the induction programme for boards. To inform this work, the entity plans to produce 20 skills assessment reports over the medium term on the training needs of specific departments or public sector institutions for relevant education, training and development interventions. These activities will be carried out through an allocation of R363.1 million over the MTEF period.

Expenditure is expected to increase at an average annual rate of 2.4 per cent, from R213.7 million in 2024/25 to

R229.5 million in 2027/28. Compensation of employees accounts for an estimated 55.8 per cent (R378.3 million) of the entity's budget over the period ahead. The school generates revenue mainly through course fees. Revenue is expected to increase in line with expenditure.

### Programmes/Objectives/Activities

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

## Vote purpose

*Support economic growth and development, good governance, social progress and rising living standards through the accountable, economical, efficient, equitable and sustainable management of public finances, the maintenance of macroeconomic and financial sector stability, and the effective financial regulation of the economy.*

## Mandate

National Treasury's legislative mandate is based on section 216(1) of the Constitution, which calls for the establishment of a national treasury to ensure transparency, accountability and sound financial controls in the management of South Africa's public finances. This role is further elaborated on in the Public Finance Management Act (1999) as well as the Municipal Finance Management Act (2003). The department is mandated to:

- promote national government's fiscal policy and the coordination of macroeconomic policy
- ensure the stability and soundness of the financial system and financial services
- coordinate intergovernmental financial and fiscal relations
- manage the budget preparation process
- enforce transparency and effective management in respect of revenue and expenditure, assets and liabilities, public entities, and constitutional institutions
- oversee the implementation of the provincial and local government infrastructure portfolio
- ensure financial management governance and compliance with the Public Finance Management Act (1999) and the Municipal Finance Management Act (2003) across all spheres and entities in government

Section 5(2) of the Municipal Finance Management Act (2003) further mandates the department to monitor municipal budgets and promote good budgeting and fiscal management by municipalities. The mandate extends to the issuance of regulations on all aspects of the act, including investments, borrowing, budgeting, accounting, assets, reporting, competencies, expenditure, cost containment, supply chain, public-private partnerships, financial misconduct and criminal procedures.

## Selected performance indicators

1. No historical data available.

## Expenditure overview

Over the next 3 years, the department plans to focus on: enforcing a responsive tax system; supporting infrastructure development and economically integrated cities and communities; managing future spending growth, fiscal risk and government's assets and liabilities; automating and streamlining government procurement; strengthening financial management in government; and enhancing international and regional economic advocacy.

The department's budget over the medium term is R3.5 trillion, of which 97.5 per cent (R3.4 trillion) constitutes direct charges against the National Revenue Fund. Transfers to provincial governments for the provincial equitable share amount to an estimated 56.9 per cent (R2 trillion) of direct charges, debt-service costs account for an estimated 38.3 per cent (R1.4 trillion) over the medium term, while public sector-related pension, post-retirement medical and other benefits in terms of statutory and collective agreements account for an estimated 0.7 per cent (R26 billion). Cabinet has approved additional allocations over the MTEF period of: R15.7 billion to the provincial equitable share for cost-of-living adjustments; R24.9 billion for debt-service costs; R2.7 billion to the post-retirement medical scheme for premium increases and expected membership growth; and R349 million for the payment of pension benefits to government employees discharged because of injuries sustained on duty.

The number of personnel in the department is expected to increase from 1 115 in 2024/25 to 1 172 in 2027/28. As such, spending on compensation of employees is set to increase at an average annual rate of 7.4 per cent, from R969.7 million to R1.2 billion over the same period. This includes a reprioritisation of R313 million over the medium term, derived through containing costs in other mostly non-essential spending areas, to fill identified critical posts.

### Enforce a responsive tax system

To meet government's revenue requirements and improve fairness in the tax system, over the medium term, the department will continue to develop tax policy proposals, and draft tax legislation such as the Rates and

Monetary Amounts Amendment Bill and Taxation Laws Amendment Bill, and draft tax regulations for implementation. Expenditure related to these activities is within the *Tax Policy* subprogramme, which is allocated R110.2 million over the medium term, in the *Economic Policy, Tax, Financial Regulation and Research* programme.

### ***Supporting infrastructure development and economically integrated cities and communities***

The department will continue to enhance the capacity of cities and metropolitan areas to sustainably contribute to economic development and generate tax revenue. As such, over the MTEF period, it will support and monitor the implementation of township economic development strategies in 5 targeted metros (City of Cape Town, City of Ekurhuleni, eThekwin, Nelson Mandela Bay and City of Tshwane) through the cities support programme, which is allocated R96.7 million over the medium term in the *Catalytic Infrastructure and Development Support* subprogramme in the *Public Finance and Budget Management* programme.

Several reforms will be implemented to improve the efficiency and effectiveness of conditional grants, as well as their alignment with government priorities. A new *urban development financing grant* will be introduced in 2025/26 to address declining service delivery in metropolitan municipalities caused by underinvestment in infrastructure and a lack of technical expertise. This grant, amounting to R3.7 billion over the MTEF period within the *Facilitation of Conditional Grants* subprogramme in the *Public Finance and Budget Management* programme, will consolidate the metro components of the direct *neighbourhood development partnership grant* and the larger share of the *programme and project preparation support grant*. The new grant will be augmented by the World Bank's performance for results incentive. National Treasury will incubate the new grant for up to six years before transferring its management to the Department of Cooperative Governance.

The *urban development financing grant* also includes R450 million for the cities' public employment programme. This funding will be disbursed to city-led projects such as upgrading informal settlements; maintaining, developing and managing public spaces and assets within human settlements and economic hubs; promoting greening and cleanliness initiatives; enhancing community safety measures; providing environmental services and management; and promoting community tourism.

The budget facility for infrastructure plays a pivotal role in mobilising private sector resources and expertise that enable the implementation of transformative projects aimed at addressing critical infrastructure needs. To this end, through the *urban development financing grant*, the City of Johannesburg will receive R578 million in 2026/27 and R533 million in 2027/28 for an innovative wastewater project, and the eThekwin metropolitan municipality will receive R56 million in 2025/26, R109 million in 2026/27 and R101 million in 2027/28 to fix leaking water infrastructure.

The *programme and project preparation support grant* will fall away, and its remaining portion will be integrated into the *neighbourhood development partnership grant*, which will focus on non-metropolitan municipalities. Its aim will be to facilitate spatial transformation by identifying, planning and investing in targeted locations to attract and sustain third-party capital investments. This includes developing a pipeline of investment-ready capital programmes and projects by institutionalising an efficient system for programme and project preparation. No funding through this grant is allocated for new projects as 40 ongoing catalytic projects at various stages of development will remain prioritised over the medium term in strategic areas to advance urban resilience and drive socioeconomic transformation. These well-coordinated, high-impact infrastructural investments include installing bulk water reticulation pipes, building public transportation facilities, and rehabilitating existing road and stormwater drainage systems. R1.4 billion within the *Facilitation of Conditional Grants* subprogramme in the *Public Finance and Budget Management* programme is allocated for this purpose.

The *smart meters indirect grant* was introduced in 2024/25 to help municipalities improve their efficiency, billing accuracy and overall service delivery through smart meter technology. This is expected to enhance revenue generation and cost recovery and underscores the department's commitment to sustainable development and prioritising investment in energy infrastructure at the local government level. The installation of smart, bi-directional meters in municipalities is expected to result in a reduction in distribution losses of electricity and water, and therefore improved revenue collection. The grant is allocated R2.3 billion over the next 3 years in the *Facilitation of Conditional Grants* subprogramme in the *Budget Management and Public Finance* programme.

### ***Managing future spending growth, fiscal risk and government's assets and liabilities***

The department will monitor public service expenditure over the medium term and maintain discipline to steer the country towards fiscal stability and ensure sustainable growth. To carry out these activities, R1.6 billion over the medium term is allocated in the *Public Finance, Budget Office and Coordination* and *Intergovernmental Relations* subprogrammes in the *Public Finance and Budget Management* programme.

The department will also continue to manage government's borrowing requirements to ensure that government can meet its funding needs. This entails monitoring budget deficits and redemption, reviewing funding strategies, and monitoring market conditions and investor demands to optimise borrowing costs. Additionally, the department will continue to enforce measures that require prudent financial management in all state-owned entities through financial analysis and oversight, which includes reviewing their corporate plans, annual reports and guarantee applications. To carry out these activities, R493.2 million is allocated over the next 3 years in the *Asset and Liability Management* programme.

### ***Automating and streamlining government procurement***

The Office of the Chief Procurement Officer aims to position the public procurement system as a pivotal mechanism for driving economic growth and facilitating job creation by integrating advanced technologies and streamlined processes. It has identified four focus areas to automate the procurement process: enhancing transparency in public procurement across government by improving access to data; developing an electronic government marketplace, which is planned to go live in 2025/26; automating the request for quotations process in 2026/27; and implementing a fully automated end-to-end open tendering solution in 2027/28. The office will also continue efforts aimed at professionalising supply chain management across government, monitoring compliance with the procurement regime, and improving the reporting of procurement expenditure. This work will be carried out in the *Office of the Chief Procurement Officer* subprogramme, which is allocated R282 million over the MTEF period in the *Financial Accounting and Supply Chain Management Systems* programme.

### ***Strengthening financial management in government***

The Office of the Accountant-General will continue to advocate for robust financial governance and the enhancement of capacity and competency across the 3 spheres of government and within public entities. This will be achieved by consolidating the compliance reporting framework to help institutions with the processes, principles and reporting of unauthorised, irregular and fruitless and wasteful expenditure. Part of this drive includes reviewing the municipal public financial management competency framework to ensure that personnel have the necessary knowledge, skills and behaviours to manage public funds responsibly and efficiently. This includes leveraging partnerships with capacity-building institutions to ensure that only those with the required skills and expertise are appointed.

The office will also prioritise completing the review of the legislative framework, which includes amending the Public Finance Management Act (1999) and the Municipal Finance Management Act (2003) in 2026/27. Proposed amendments to the Public Finance Management Act (1999) involve reviewing definitions of irregular and fruitless and wasteful expenditure to address how this expenditure is disclosed in annual financial statements and annual reports. Proposed amendments to the Municipal Finance Management Act (2003) will address how municipalities and municipal entities should detect and address irregular expenditure, including through implementing consequence management. To this end, R436.9 million is allocated over the next 3 years in the *Financial Management Policy and Compliance Improvement* subprogramme in the *Financial Accounting and Supply Chain Management Systems* programme. Allocations to the subprogramme will also fund the implementation of a comprehensive set of reforms to the local government system to improve governance and municipal finance management.

Further support to local government will be provided through the *local government financial management grant*, which is aimed at promoting and supporting financial management reforms and building capacity in municipalities. The grant is allocated R1.9 billion over the medium term in the *Facilitation of Conditional Grants* subprogramme in the *Public Finance and Budget Management* programme.

## Enhancing international and regional economic advocacy

Activities carried out through the *International Financial Relations* programme over the period ahead are aimed at influencing global economic policies and practices to promote fair trade, sustainable development and economic justice. This involves advocating for South Africa's economic interests in international organisations such as the World Trade Organisation, the International Monetary Fund and the World Bank, and regional institutions such as the African Development Bank, the Common Monetary Area and the Southern African Development Community. The department has allocated R2.8 billion over the medium term for equity in the African Development Bank as part of its recapitalisation, constituting 30.4 per cent of the *International Financial Relations* programme's allocation of R9.1 billion. A further R5.2 billion in the programme is earmarked to facilitate regional cooperation within the Common Monetary Area, particularly for compensation payments to Eswatini, Lesotho and Namibia for the use of the rand.

Allocations amounting to R106.1 million over the MTEF period in the *African Integration and Support* and *International Projects* subprogrammes, in the same programme, are intended to manage commitments for technical support for regional capacity building institutions such as the Collaborative Africa Budget Reform Initiative, the International Finance Facility for Immunisation, the Commonwealth Fund for Technical Cooperation, the African Institute for Economic Development and Planning, and the International Monetary Fund's Regional Technical Assistance Centre for Southern Africa.

As part of South Africa's presidency of the G20, R78.8 million in 2025/26 is allocated for G20 meetings, with National Treasury leading the finance track meetings involving finance ministries and central banks. These discussions will focus on global economic and financial policy issues, including the state of the global economy; international financial system stability; and trade, investment and development financing.

## Programme 2: Economic Policy, Tax, Financial Regulation and Research

### Programme purpose

Provide specialist policy research, analysis and advisory services in the areas of macroeconomics, microeconomics, the financial sector, taxation and regulatory reform.

### Objectives

- Improve South Africa's macroeconomic and microeconomic frameworks by conducting ongoing analytical work and research and developing policy advisory services.
- Build and maintain research capacity to inform economic policy in South Africa by providing academic and research institutions with funding annually.
- Promote an effective, equitable and efficient tax policy framework and tax administrative system by developing and updating tax policies and supporting legislation for the annual budget process.

### Subprogrammes

- *Programme Management for Economic Policy, Tax, Financial Regulation and Research* provides overall programme management and policy advice to government on the promotion of economic growth, employment, microeconomic and macroeconomic stability.
- *Financial Sector Policy* is responsible for developing policies on regulating the financial sector in South Africa, broadening access to financial services for all South Africans and improving the national savings rate through reforms to the legislative framework governing the savings industry through work towards implementing proposals for retirement reform.
- *Tax Policy* is responsible for drafting annual tax proposals and tax legislation as part of the national budget to promote an effective, equitable and efficient tax policy framework and tax administrative system that ensures sustainable growth and delivery on government's mandate to address the needs of all South Africans. This includes providing tax proposals towards improved environmental sustainability.
- *Economic Policy* provides macroeconomic and microeconomic forecasts, policy analysis on microeconomic and regulatory issues, economic impact assessments and scenario modelling to provide sound policy advice on the economic environment for the annual budget and other government processes. Although policy advice is mainly focused on creating decent employment through inclusive growth, this subprogramme also provides analytical work and policy advice on a wide range of issues, including inflation management; electricity pricing; economic growth; structural budget balances; industrial policy; policy related to small, medium and micro enterprises; and the exchange rate.

## Programme 3: Public Finance and Budget Management

### Programme purpose

Provide analysis and advice on fiscal policy and public finances, intergovernmental financial relations, and expenditure planning and priorities. Manage government's annual budget process and provide public finance management support. Facilitate employment creation and high-impact government initiatives, and strengthen infrastructure planning and delivery. Support the effective administration of pension, retirement and other benefits.

## Objectives

- Promote growth, social development and the reduction of poverty through the implementation of sound fiscal and financial policies, and the effective, efficient and appropriate allocation of public funds annually.
- Prepare an annual national budget that gives effect to government's economic, fiscal, social and developmental goals as expressed in the National Development Plan and government's 2024-2029 medium-term development plan to provide fiscal policy advice by monitoring economic and fiscal trends, and advise on policy options and the budget framework.
- Deepen transparency in the allocation of public finances through the annual production and publication of: the Estimates of National Expenditure, Adjusted Estimates of National Expenditure, Budget Review, Medium-term Budget Policy Statement and appropriation legislation containing relevant, accurate and clear financial information and associated indicators of service delivery and performance.
- Contribute to public policy and programme development by providing support for planning, policy and programme analysis, budgeting, project management and public finance reform in provinces and municipalities on an ongoing basis.
- Promote public and private investment in infrastructure and public services on an ongoing basis by providing technical support for capital expenditure planning and project analysis, advice on financing alternatives, support for municipal development, and financial assistance for neighbourhood development projects.
- Measure the use of public financial resources by monitoring, supporting and analysing public expenditure and service delivery for social and economic development and infrastructure investment on an ongoing basis.
- Support and enable budget analysis by a broad range of stakeholders, including Parliament, on an ongoing basis through increased public participation with regards to the budget.
- Build capacity in the public sector by providing diagnostic and advisory services and support for organisational development, specialised procurement, improved public finance management, and programme and project implementation on an ongoing basis.
- Enhance budgeting and financial management practices by strengthening public finance management capacity in municipalities and supporting provincial treasury oversight of local government financial management on an ongoing basis.
- Ensure liveable, sustainable, resilient, efficient and integrated towns and cities by promoting public and private investment in city development, integrated urban networks and neighbourhood development initiatives on an ongoing basis.
- Stimulate employment and inclusive growth by supporting innovative and partnership-based approaches to employment creation, work-seeker support and enterprise development on an ongoing basis.
- Ensure technical capacity in local government built environment by supporting infrastructure planning and implementation in all provinces and infrastructure skills development in all municipalities on an ongoing basis.

## Subprogrammes

- *Programme Management for Public Finance and Budget Management* provides support to the programme's planning, monitoring and delivery functions. Key activities include the oversight and management of processes related to the annual publication of the Medium-term Budget Policy Statement, the coordination of the annual budget and the production of the Division of Revenue Bill for the 3 spheres of government.
- *Public Finance* provides financial and budgetary analysis of government programmes, advises on policy and service delivery trends, and manages National Treasury's relations with other national departments.
- *Budget Office and Coordination* is responsible for the national budget process, including the publication of the Estimates of National Expenditure, Adjusted Estimates of National Expenditure, Budget Review and Medium-term Budget Policy Statement. This subprogramme also leads the budget reform programme, coordinates international technical assistance and donor funding, compiles public finance statistics, provides fiscal policy advice, provides advice on public service remuneration and pension arrangements, and ensures the effective administration of pension, retirement and other benefits.

- *Intergovernmental Relations* coordinates fiscal relations between national, provincial and local government; promotes sound provincial and municipal budgetary planning, reporting and financial management; and provides support for government with the aim of promoting improved infrastructure planning and management to support the service delivery targets in all spheres of government.
- *Financial and Fiscal Commission* facilitates the annual transfer payment to the Financial and Fiscal Commission, which provides independent, objective, impartial and unbiased advice to all 3 spheres of government on the division of revenue, as well as advice on the enactment of legislation pertaining to provincial taxes, municipal fiscal powers and functions, and provincial and municipal loans.
- *Facilitation of Conditional Grants* facilitates conditional grants administered by National Treasury aimed at strengthening public and private investment in improved living and working conditions in townships, and creating spatially resilient, efficient and integrated towns and cities. Funds disbursed through these grants are also intended to promote accelerated and inclusive development in major urban areas through better governance and built environment planning, improved human settlements and public transport management, local economic development, environmental sustainability and climate resilience.
- *Catalytic Infrastructure and Development Support Programme* provides technical assistance and support to National Treasury, provincial treasuries and municipalities by assigning professional advisers with experience and expertise in municipal financial management to facilitate key reforms and skills transfer through the municipal finance improvement programme. Activities in this subprogramme also help to develop capacity in infrastructure planning and project management.
- *Government Technical Advisory Centre* provides technical consulting services, specialised procurement and project management support, infrastructure advice and knowledge management in support of the efficient, effective and transparent management of public finances. This subprogramme also includes the Jobs Fund, which facilitates employment creation as it seeks to support innovative and partnership-based approaches to sustainable employment creation; provide work-seeker support and enterprise development through the Jobs Fund; and support research on employment, income distribution and inclusive growth.

## Programme 4: Asset and Liability Management

### Programme purpose

Manage government's annual funding programme in a manner that ensures prudent cash management and an optimal portfolio of debt and other fiscal obligations. Promote and enforce the prudent financial management of state-owned entities through financial analysis and oversight.

### Objectives

- Exercise oversight of state-owned entities on an ongoing basis by:
  - reviewing the corporate plans and annual financial statements of state-owned entities
  - coordinating the borrowing programmes of state-owned entities
  - tracking progress on capital expenditure programmes
  - reviewing applications for funding, guarantees and borrowing limits in terms of the Public Finance Management Act (1999), and monitoring progress.
- Meet government's annual gross borrowing requirement – consisting of the budget deficit and maturing debt – by sourcing funds from domestic and international markets and servicing government's debt optimally.
- Ensure that government's liquidity requirements are consistently met within credit risk guidelines by managing cash effectively and making sound cash flow forecasts on an ongoing basis.
- Minimise and mitigate risks emanating from government's fiscal obligations to develop and maintain a risk management framework for government's debt and contingent liabilities by implementing debt management strategies that minimise government's exposure to adverse risk on an ongoing basis.

### Subprogrammes

- Programme Management for Asset and Liability Management* provides support for planning, monitoring and delivering the programme's activities.
- State-owned Entity Financial Management and Governance* oversees and enables state-owned entities to meet government's policy objectives in a financially and fiscally sustainable manner that promotes sound corporate governance.
- Government Debt Management* is responsible for government's long-term funding needs. As such, it manages domestic and foreign debt, contributes to the development of financial markets and maintains sound investor relations.
- Financial Operations* provides for government's short-term funding needs, the prudent management of cash, the efficient accounting of debt and investment transactions in government, and quality information related

- *Strategy and Risk Management* develops and maintains a risk management framework for government's debt and contingent liabilities and implements debt management strategies that minimise its exposure to adverse risk.

## Programme 5: Financial Accounting and Supply Chain Management Systems

### Programme purpose

Facilitate governance and accountability by promoting and enforcing the transparent, economic and effective management of revenue, expenditure, assets, liabilities and supply chain processes in the public sector.

### Objectives

- Ensure compliance with the Public Finance Management Act (1999) and the Municipal Finance Management Act (2003) across the 3 spheres of government by facilitating and undertaking special investigations to reduce fraud and corruption on an ongoing basis.
- Ensure sound financial management systems to meet the requirements of the Public Finance Management Act (1999) and the Municipal Finance Management Act (2003) by:
  - providing capacity and support to all spheres of government on policies related to accounting and reporting, internal auditing and risk management on an ongoing basis
  - developing and implementing government transversal accounting and reporting systems over the medium term
  - maintaining the availability of government's financial systems at 98 per cent, and providing reliable, efficient and effective support and user training, over the medium term
  - modernising and automating financial management systems.
- Support government's efforts to build capacity in financial management across the 3 spheres of government by introducing minimum competency profiles and offering graduate internships in financial management annually.
- Improve financial management in provincial and local government by:
  - developing and implementing financial recovery plans and providing technical assistance on an ongoing basis
  - supporting municipalities in implementing financial management reforms and ensuring their compliance with the Municipal Finance Management Act (2003), as required, over the medium term.
- Modernise the supply chain management system for government over the medium term by:
  - introducing policy reforms to ensure that all procuring government institutions implement a single supply chain management policy
  - providing training solutions to bridge the skills gap for existing and future supply chain management practitioners.

### Subprogrammes

- *Programme Management for Financial Accounting and Supply Chain Management Systems* supports the planning, monitoring and coordination of deliverables such as modernising and automating financial management systems; and facilitates accountability and governance in the public sector, especially in terms of financial management.
- *Office of the Chief Procurement Officer* aims to modernise the state procurement system to be fair, transparent, competitive and cost effective; and enable the efficient, economic, effective and transparent use of financial and other resources, including state assets, for improved service delivery. This subprogramme also promotes, supports and enforces the transparent and effective management of state procurement and the sound stewardship of government assets and resources.
- *Financial Systems* maintains and improves existing financial management, supply chain and human resources systems and develops and implements modern, automated systems to replace outdated systems across national and provincial departments.
- *Financial Reporting for National Accounts* is responsible for accounting for the National Revenue Fund and the Reconstruction and Development Programme Fund, providing banking services to national government,

providing support for all spheres of government in implementing financial reporting frameworks, and preparing consolidated financial statements.

- *Financial Management Policy and Compliance Improvement* improves financial management and develops financial management regulatory frameworks with local and international best practice; develops and implements accounting policies; and improves government's financial management, risk management and internal audit capacity.
- *Audit Statutory Bodies* is a transfer payment to the Auditor-General of South Africa for the implementation of the amendments to the Public Audit Act (2004).
- *Service Charges: Commercial Banks* is a transfer payment that provides for bank charges for the deposit accounts of all government departments.

## Programme 6: International Financial Relations

### Programme purpose

Manage South Africa's interests in shaping regional and global policies that advance the economic, financial and development objectives of the country and Africa.

### Objectives

- Advance South Africa and Africa's economic interests by undertaking strategic analyses, engagements and negotiations at regional and global financial and economic forums on an ongoing basis.
- Increase sub-Saharan Africa's voice and South Africa's influence in multilateral international institutions such as the International Monetary Fund, the World Bank Group, the G20 and other influential global financial and economic forums by advancing the reform of these institutions through the lobbying of regional groupings on an ongoing basis.
- Enhance South Africa's participation in strategic regional, continental and global governance institutions by seconding South Africans into strategic positions in these institutions, as informed by government's secondment policy, on an ongoing basis.
- Promote regional economic integration in the Southern African Development Community region and the Southern African Customs Union, and strengthen economic links within Africa by:
  - providing ongoing support to the Southern African Development Community committees dealing with economic and financial protocols
  - providing ongoing support to the Southern African Customs Union to resolve regional challenges.

### Subprogrammes

- *Programme Management for International Financial Relations* supports the planning, monitoring and delivery of the programme's activities with the World Bank country office, the African Development Bank regional resource centre and the New Development Bank. This subprogramme oversees South Africa's representation in international and regional financial institutions; manages bilateral and multilateral relationships on behalf of National Treasury; and plans, implements and monitors programmes and activities that advance South Africa's national interests.
- *International Economic Cooperation* focuses on improving South Africa's participation in regional and international economic institutions. This entails working through key economic institutions and forums such as the Southern African Customs Union, the SADC, the United Nations Economic Commission for Africa, the African Union's New Partnership for Africa's Development, the International Monetary Fund, the G20, the G24, the BRICS (Brazil, Russia, India, China, South Africa, Egypt, Ethiopia, Indonesia, Iran and the United Arab

Emirates) group of countries, the Organisation for Economic Cooperation and Development, and the World Economic Forum.

- *African Integration and Support* enables National Treasury's participation in African interventions and arrangements aimed at bringing about support and integration between African states and institutions. This subprogramme facilitates the transfer of funds to Eswatini, Lesotho and Namibia for Common Monetary Area compensation. In this agreement, South Africa compensates the member countries for the use of the rand within their borders. It also includes technical support provided to regional capacity-building institutions such as the Collaborative Budget Reform Initiative, the Infrastructure Consortium for Africa, the African Capacity Building Foundation, the African Institute for Economic Development and Planning, and the International Monetary Fund's Regional Technical Assistance Centre for Southern Africa.
- *International Development Funding Institutions* provides for subscriptions and contributions to international development institutions and banks. This subprogramme transfers funds to the African Development Bank and the International Bank for Reconstruction and Development to pay for shares, and to the African Development Fund and the World Bank Group's International Development Association for the provision of concessional loans and grants to low-income countries. In line with South Africa's shareholding agreement, this subprogramme also facilitates capital transfers for the New Development Bank.
- *International Projects* transfers funds to international projects and interventions for various causes such as capacity building and catastrophe and disaster relief for affected low-income countries. To this end, the department contributes to the Commonwealth Fund for Technical Cooperation and the International Finance Facility for Immunisation. The facility transfers funds to the Global Alliance for Vaccines and Immunisation, a public-private global health partnership, to support health care, particularly the provision of vaccines to reduce the number of deaths preventable by vaccination among children in low-income countries.

## Programme 7: Revenue Administration

### Programme purpose

Ensure the efficient transfer of funds to the South African Revenue Service for the administration of an efficient tax system and for the provision of tax education to the public. Ensure maximum compliance with tax and customs legislation, maximise revenue collection and facilitate trade.

### Objective

- Maximise revenue collection by ensuring the monthly transfer of funds to the South African Revenue Service for the administration of an effective tax system, the provision of tax education to the public and maximum compliance with tax and customs legislation.

## Subprogramme

- *South African Revenue Service* transfers funds to the South African Revenue Service to provide core tax administration services and maintain the ICT services that support its operations.

## Programme 8: Financial Intelligence and State Security

### Programme purpose

Ensure the efficient transfer of funds to the Financial Intelligent Centre and State Security Agency to enhance the state's ability to combat financial crime, including money laundering and terror financing activities. Gather intelligence for the purposes of national security, defence and combating crime.

### Objective

- Enhance the state's ability to combat financial crime, including money laundering and terror financing activities, and gather intelligence for the purposes of national security, defence and combating crime by ensuring the monthly transfer of funds to the Financial Intelligence Centre and State Security Agency.

### Subprogrammes

- *Financial Intelligence Centre* facilitates transfer payments to the Financial Intelligence Centre, which enhances the integrity of the South African financial system while creating new ways for investigating authorities to combat criminal activity.
- *Secret Services* facilitates transfer payments to the South African Secret Services, which provides government with accurate, topical, policy relevant and timely foreign intelligence to promote, enhance and protect national security and the interests of South Africa and its citizens.

1. No historical data available.

#### Entity overview

The Accounting Standards Board was established to develop uniform standards of generally recognised accounting practice for all spheres of government in terms of section 216(1)(a) of the Constitution and the Public Finance Management Act (1999). The board also promotes transparency and effective management of the revenue, expenditure, assets and liabilities of the entities to which the standards apply.

In line with its mandate, the board will focus on educational activities for preparers and users of financial statements, and review and revise existing standards to ensure alignment with international best practice.

Expenditure is expected to increase at an average annual rate of 4.1 per cent, from R15.1 million in 2024/25 to R17.1 million in 2027/28, with compensation of employees accounting for an estimated 74.7 per cent

(R36.8 million) of expenditure over the period ahead. The board derives its revenue mainly through transfers from the department. Revenue is expected to increase in line with expenditure.

### Programmes/Objectives/Activities

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Cost-to-income ratio (bank wide)	Administration	Outcome 4: Increased infrastructure investment and job creation	23% (R1.4bn/ R6.1bn)	23% (R1.6bn/ R6.9bn)	19% (R1.7bn/ R8.8bn)	34%	32%	32%	31%
Total value of disbursements to infrastructure-related projects per year	Development finance		R12.9bn	R12.7bn	R17bn	R14.5bn	R15.5bn	R19.4bn	R20.6bn
Value of bank-wide net profit/(loss) per year	Development finance		R3.82bn	R5.21bn	R4.67bn	R3.16bn	R4.01bn	R4.05bn	R4.15bn
Net interest as a percentage of interest income	Development finance		66% (R5.9bn/ R9bn)	61% (R6.5bn/ R10.7bn)	59% (R7.7bn/ R13bn)	57%	57%	57%	56%

### Entity overview

The Development Bank of Southern Africa was reconstituted in terms of the Development Bank of Southern Africa Act (1997) as a development finance institution with the primary purpose of promoting economic development and growth. The bank also promotes the development of human resources and the building of institutional capacity by mobilising financial and other resources from the national and international private and public sectors. In doing so, it funds sustainable development projects and programmes in South Africa and other Southern African countries.

The bank aims to support the development of infrastructure in municipalities over the medium term to address backlogs and expedite the delivery of essential social services to create sustainable living conditions and improve quality of life. It also plans to disburse R30 million in 2025/26 to support more than 20 under-resourced municipalities in developing infrastructure plans for water, sanitation, electricity, roads, stormwater and other investments, and will set aside up to R239 million per year over the next 3 years for planning and implementation support for infrastructure projects in selected under-capacitated municipalities.

Expenditure is expected to increase at an average annual rate of 3.8 per cent, from R10 billion in 2024/25 to R11.2 billion in 2027/28. The bank derives its revenue mainly through interest on investments and fees. Revenue is expected to increase at an average annual rate of 5.2 per cent, from R13.2 billion in 2024/25 to R15.4 billion in 2027/28.

Number of policy briefs published per year	Research		11	11	10	10	10	10	10
Number of technical reports published per year	Research		1	1	1	1	1	1	1

### Entity overview

The Financial and Fiscal Commission derives its mandate from the Financial and Fiscal Commission Act (1997), which requires it to advise relevant authorities on financial and fiscal requirements for the national, provincial and local spheres of government in terms of section 220 of the Constitution. Over the medium term, the commission remains committed to bolstering the credibility of financial stewardship over fiscal resources, augmenting the efficacy of public spending and providing evidence-based recommendations to stakeholders, including legislatures and government institutions.

Expenditure is expected to increase at an average annual rate of 4.6 per cent, from R61.8 million in 2024/25 to R70.8 million in 2027/28. Compensation of employees accounts for an estimated 51.4 per cent (R102.4 million) over the period ahead, increasing at an average annual rate of 1.7 per cent, from R33.6 million in 2024/25 to R35.3 million in 2027/28. The expected decrease in the number of personnel from 42 in 2024/25 to 32 over the medium term is due to the contracts of 10 employees expiring in 2024/25. The commission derives its revenue mainly through transfers from the department. Revenue is set to increase in line with expenditure over the period ahead.

### Entity overview

The Financial Intelligence Centre was established in terms of the Financial Intelligence Centre Act (2001) to combat money laundering, the financing of terrorist and related activities and the proliferation of illicit weapons. In terms of the act, the centre's core functions include: identifying the proceeds of unlawful activities, exchanging information with law enforcement and other local and international agencies, supervising and

enforcing compliance with the act, and facilitating effective supervision and enforcement by supervisory bodies in terms of the act. The centre's legal mandate, powers and functions were expanded and enhanced through the provisions of the General Laws (Anti-Money Laundering and Combating Terrorism Financing) Amendment Act (2022) and the Protection of Constitutional Democracy Against Terrorist and Related Activities Amendment Act (2022). Key to this expansion is the mandate to produce forensic evidence related to the flow of financial transactions.

The centre will focus on increasing the level of and simplifying compliance with the Financial Intelligence Centre Act (2001) and supporting efforts to make South Africa safer. Over the medium term, it plans to continue to establish and develop the shared forensic capability unit to provide effective forensic support on high-impact investigation cases. This unit is expected to contribute to reducing costs that the state incurs by using private forensic service providers. An estimated R119.1 million in additional funding over the MTEF period is allocated to further develop and establish the unit. As a result, spending on compensation of employees is expected to increase at an average annual rate of 10.2 per cent, from R273.1 million in 2024/25 to R365.4 million in 2027/28 and, as such, the number of personnel from 305 to 354.

Total expenditure is expected to increase at an average annual rate of 8.5 per cent, from R427.2 million in 2024/25 to R545.7 million in 2027/28. The centre derives its revenue mainly through transfers from the department. Total revenue is projected to increase at an average annual rate of 9.3 per cent from, R409.1 million in 2024/25 to R533.7 million in 2027/28, due to additional allocations to establish the shared forensic capability unit.

### Entity overview

The Financial Sector Conduct Authority was established in 2018 in terms of the Financial Sector Regulation Act (2017). It is mandated to enhance the efficiency and integrity of financial markets, promote fair customer treatment by financial institutions, provide financial education and promote financial literacy, and help to maintain financial stability. Its mandate has since been expanded to include the administration of the Financial Sector and Deposit Insurance Levies Act (2022).

Over the medium term, the authority will focus on developing a licensing and supervisory risk model, implementing the integrated regulatory system, finalising the Conduct of Financial Institutions Bill, and promoting sustainable development by integrating regulatory and supervisory frameworks into financial decision-making to bolster investor confidence and customer trust. This will enable the authority to regulate and supervise market conduct in the financial services sector, ensure the integrity and efficiency of formal markets and allied institutions, protect consumers of financial services, and improve access to financial markets.

Expenditure is expected to increase at an average annual rate of 6 per cent, from R1.1 billion in 2024/25 to R1.3 billion in 2027/28, with compensation of employees accounting for an estimated 67 per cent (R2.4 billion) of the authority's budget over the medium term. The authority generates revenue mainly through levies raised from financial institutions. Revenue is expected to increase at an average annual rate of 3.8 per cent, from R1.1 billion in 2024/25 to R1.2 billion in 2027/28.

### Entity overview

The Government Pensions Administration Agency provides pension administration services to the Government Employees Pension Fund in terms of the Government Employees Pension Law (1996) and the Associated Institutions Pension Fund Act (1963). Post-retirement medical subsidies are administered as provided for and regulated by resolutions of the Public Service Coordinating Bargaining Council, military pensions are administered in terms of the Military Pensions Act (1976), injury-on-duty payments are administered in terms of the Compensation for Occupational Injuries and Diseases Act (1993) and special pensions are administered in terms of the Special Pensions Act (1996).

The agency intends to focus on accelerating the modernisation of its business solutions over the medium term to enable it to deliver effectively on its strategic outcomes. Related interventions are expected to lead to a reduction in turnaround times for processing and paying out benefits from 45 days to less than 25 days, improve the management and accuracy of client data, and enable the agency to reach 65 per cent of clients through digital platforms.

Expenditure is expected to increase at an average annual rate of 8.1 per cent, from R1.5 billion in 2024/25 to R1.9 billion in 2027/28. Spending on goods and services accounts for a projected 45.7 per cent (R2.5 billion) of the agency's total budget over the period ahead, while compensation of employees constitutes an estimated 44.4 per cent (R2.3 billion). The agency derives its revenue mainly through administration fees charged to its

major clients – the Government Employees Pension Fund and National Treasury. Revenue is expected to increase in line with expenditure.

### Entity overview

The Government Technical Advisory Centre was established in terms of the Public Service Act (1994) and is mandated to help organs of state build their capacity for efficient, effective and transparent financial management. The centre's overarching objectives are to render technical consulting services to government departments and other organs of state, provide specialised procurement support for high-impact government initiatives, render advice on the feasibility of infrastructure projects and provide knowledge management for projects as well as ancillary support. These objectives serve as the centre's ongoing focus areas.

Over the medium term, the centre will be restructured into 3 key hubs: the technical advisory hub, the infrastructure hub and the programme management hub. The technical and infrastructure hubs will deliver advisory and analytical services, whereas the programme management hub will focus on facilitating the implementation of government programmes and projects. This restructuring is designed to improve efficiency, foster innovation and provide targeted support for government's developmental agenda. It reflects the centre's commitment to enhancing the capacity of the state to manage public resources effectively, ensure value for money and deliver effective public services.

Expenditure is expected to increase at an average annual rate of 2 per cent, from R249.5 million in 2024/25 to R264.7 million in 2027/28, with compensation of employees constituting a projected 56.1 per cent (R442.6 million) of the centre's budget over the MTEF period. The centre is set to receive 30.2 per cent (R236.6 million) of its revenue through transfers from the department, 50.3 per cent (R401.8 million) through cost recoveries and 19.6 per cent (R157.7 million) through interest. Revenue is expected to increase in line with spending.

## Independent Regulatory Board for Auditors

### Selected performance indicators

**Table 8.48 Independent Regulatory Board for Auditors performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of planned inspections completed per year	Inspections	Entity mandate	121	117	105	109	109	109	109
Number of monitoring visits completed per year	Education		46	46	47	43	43	43	43
Percentage of target dates met for issuing audit pronouncements, audit reports and comment letters per year according to the committee for accounting standards project timetable	Standards		100% (17)	100% (6)	100% (11)	85%	85%	85%	85%
Number of investigations completed per year	Investigations		64	96	96	80	80	80	80

### Entity overview

The Independent Regulatory Board for Auditors was established in terms of the Auditing Profession Act (2005). The board is mandated to protect the public by regulating audits performed by registered auditors; improve the development and maintenance of internationally comparable ethical and auditing standards for auditors that promote investment and, as a consequence, employment in South Africa; set out measures to advance the implementation of appropriate standards of competence and good ethics in the auditing profession; and provide procedures for disciplinary action in instances of improper conduct.

The board's focus over the MTEF period will be on developing and maintaining auditing and ethics standards that are internationally comparable, and promoting transformation in the auditing profession by providing an appropriate framework for education and training. Other areas of focus include building and maintaining confidence by fostering partnerships with key local and international stakeholders through visible outreach and transparency, and engaging in strategic forums and outreach events.

Expenditure is expected to increase at an average annual rate of 4.4 per cent, from R218.2 million in 2024/25 to R248.3 million in 2027/28, with compensation of employees constituting a projected 68 per cent (R495.8 million) of the board's budget over the period ahead. The board is set to receive 21.8 per cent

(R155.4 million) of its revenue over the MTEF period through transfers from the department and generate the remainder through the registration of auditors and trainees, annual renewal charges, and fees for the inspection of registered auditors. Revenue is expected to increase in line with expenditure.

### Programmes/Objectives/Activities

**Table 8.49 Independent Regulatory Board for Auditors expenditure trends and estimates by programme/objective/activity**

R million	Audited outcome			Revised estimate 2024/25	Average growth rate (%) 2021/22 - 2024/25	Average: Expenditure/Total (%) 2021/22 - 2024/25	Medium-term expenditure estimate			Average growth rate (%) 2024/25 - 2027/28	Average: Expenditure/Total (%) 2024/25 - 2027/28

Value of development loan book disbursements per year	Administration		R4bn	R6.9bn	R6.8bn	R6.8bn	R6.8bn	R6.8bn	R6.8bn

### Entity overview

As a development finance institution, the Land and Agricultural Development Bank of South Africa is mandated to address agricultural and rural development. The bank operates in the primary agriculture and agribusiness sectors and is regulated by the Land and Agricultural Development Bank Act (2002) and the Public Finance Management Act (1999). It is expected to play a pivotal role in advancing agriculture and rural development.

Over the medium term, the bank will focus on improving existing financial services and products to the commercial farming sector and agribusinesses; facilitating the inclusion of new entrants and historically

disadvantaged people into the agricultural economy through support and initiatives aimed at reducing risk; and implementing its strategy to reduce debt and improve profitability.

Spending on interest accounts for an estimated 40.2 per cent (R2 billion) of total expenditure over the period ahead. This spending is projected to decrease at an average annual rate of 33.9 per cent, from R1.5 billion in 2024/25 to R446.4 million in 2027/28 as the bank intensifies efforts to reduce its debt. As such, total liabilities are expected to decrease from R9.9 billion in 2024/25 to R4 billion in 2027/28. The bank's revenue is expected to decrease at an average annual rate of 19.9 per cent, from R3.3 billion in 2024/25 to R1.7 billion in 2027/28, in line with the projected reduction in its loan book.

## Office of the Ombud for Financial Services Providers

### Selected performance indicators

**Table 8.56 Office of the Ombud for Financial Services Providers performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Percentage of complaints closed per year within 9 months of date of receipt	Resolve complaints in a fair, expeditious and informal manner to the satisfaction of customers	Entity mandate	94% (12 089/ 12 829)	97% (11 126/ 11 533)	97% (11 092/ 11 417)	92%	95%	95%	95%
Number of activities related to brand awareness, financial literacy and customer awareness activities per year	Enhanced stakeholder management		185	370	446	117	117	117	117

### Entity overview

The legislative mandate of the Office of the Ombud for Financial Services Providers is stated in the Financial Advisory and Intermediary Services Act (2002), in terms of which the organisation is established. The act gives the ombud statutory powers to consider and dispose of complaints against financial services providers, primarily intermediaries selling investment products.

Over the medium term, the ombud will focus on producing reports on stakeholder management, informing stakeholders of the ombud's role and functions through brand awareness, financial literacy and customer awareness activities, and acquiring and retaining appropriate skills to properly respond to its mandate. The entity will also ensure that its risks are adequately managed and that appeals or reviews of decisions are dealt with appropriately.

Expenditure is expected to increase at an average annual rate of 3.6 per cent, from R88.2 million in 2024/25 to R98 million in 2027/28, with compensation of employees constituting a projected 60.9 per cent (R173.8 million) of the ombud's expenditure over the medium term. The entity derives its revenue mainly through levies collected by the Financial Sector Conduct Authority from financial service providers. Revenue is expected to increase in line with expenditure.

## Office of the Pension Funds Adjudicator

### Selected performance indicators

**Table 8.60 Office of the Pension Funds Adjudicator performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of days taken per year for the new complaints unit to refer premature complaints to respondents per year	Dispose of complaints received	Entity mandate	5	5	5	5	5	5	5
Percentage of unresolved complaints referred to respondents within 5 working days per year	Dispose of complaints received		— <sup>1</sup>	87% (3 083/ 3 548)	91% (4 850/ 5 354)	90%	90%	90%	90%

1 No historical data available.

### Entity overview

The Office of the Pension Funds Adjudicator is mandated to investigate and determine complaints lodged in terms of the Pension Funds Act (1956). The adjudicator is required to resolve complaints in a procedurally fair, economical and expeditious manner by: ensuring that its services are accessible to all; investigating complaints in a procedurally fair manner; resolving complaints justly and expeditiously, in accordance with the law; incorporating innovation and proactive thought and action into its activities; and supporting, encouraging and providing opportunities for individual growth. Over the medium term, the adjudicator will focus on enhancing the integrity of the pension industry by continuing to serve as a trusted platform for resolving complaints, evaluating and modernising its internal case determination processes, and developing a digitisation strategy to adapt to evolving demands.

Expenditure is expected to increase at an average annual rate of 4.8 per cent, from R108 million in 2024/25 to R124.3 million in 2027/28, with compensation of employees accounting for an estimated 57.8 per cent (R205.9 million) of the entity's budget over the medium term. The entity derives its revenue mainly through levies collected from pension funds. Revenue is projected to increase in line with expenditure.

## Programmes/Objectives/Activities

### Entity overview

The Ombud Council is mandated in terms of the Financial Sector Regulation Act (2017) to help ensure that financial customers have access to and can use affordable, effective, independent and fair alternative dispute-resolution processes to complain about financial institutions. The council oversees both the statutory and industry financial sector ombud schemes. The council will focus on maintaining and strengthening its independent governance and operational frameworks over the medium term, promoting and improving awareness of the ombud system, and supporting the implementation of reforms to steer the future direction of the system.

Expenditure is projected to increase at an average annual rate of 3.7 per cent, from R27 million in 2024/25 to R30.1 million in 2027/28, with goods and services constituting an estimated 52 per cent (R43.3 million) of the council's budget over the next 3 years. The council receives its revenue through levies charged and collected on its behalf by the Financial Sector Conduct Authority. Revenue is expected to increase in line with spending.

Total amount of funds under management per year	Investments		R2.5tr	R2.6tr	R2.7tr	R2.8tr	R2.95tr	R3tr	3.14tr

### Entity overview

The Public Investment Corporation is a registered financial services provider in terms of the Financial Advisory and Intermediary Services Act (2002). It is wholly owned by the South African government, with the Minister of Finance as shareholder representative. The corporation is registered as a financial services provider and manages assets for its clients, all of which are public entities. Its ongoing focus is to invest funds on behalf of its clients based on their investment mandates and approved by the Financial Sector Conduct Authority. The corporation's strategic focus over the medium term will be on modernising and automating its systems and processes through implementing the approved digital and IT strategy to drive the integration of data and analytics into its operations, and artificial intelligence strategies to enhance treasury and risk management.

Expenditure is expected to increase marginally, at an average annual rate of 0.3 per cent. This is because spending on goods and services, the main cost driver, is projected to decrease at an average annual rate of 4.8 per cent, from R948.6 million in 2024/25 to R818.7 million in 2027/28, because of reduced spending on operating leases and payments. The corporation derives its revenue through fees for managing its clients' assets, interest income and board fees. Revenue is expected to increase at an average rate of 4.4 per cent, from R2 billion in 2024/25 to R2.3 billion in 2027/28.

### Entity overview

In terms of the South African Revenue Service Act (1997), the South African Revenue Service is mandated to collect all revenue due to the state and administer trade to support government in meeting its key developmental objectives for growth. This involves facilitating legitimate trade, protecting South Africa's ports of entry, and eliminating illegal trade and tax evasion. Accordingly, the revenue service's overarching strategic intent is to develop and administer a tax and customs system of voluntary compliance and enforce it responsibly and decisively.

To this end, its focus areas over the medium term include: digital transformation through embracing artificial intelligence and data-driven insights to improve tax administration and ensure seamless interactions with taxpayers; modernising efforts with a focus on digital identity, instant payment systems and value-added tax administration; enhancing compliance by increasing detection capabilities across the value chain; and investing in leadership and skills development to adapt to global changes.

The revenue service is allocated additional funding of R3.5 billion over the next 3 years to help improve its capabilities to raise revenue, and to invest in identified priority areas such as customs modernisation and other capital projects. Total expenditure is expected to increase at an average rate of 2.6 per cent, from R14.2 billion in 2024/25 to R15.4 billion in 2027/28, with compensation of employees accounting for an estimated 66.5 per cent (R29 billion) of projected expenditure over the period ahead. Spending on goods and services, driven mainly by ICT-related projects, is expected to increase at an average annual rate of 7.5 per cent, from R3.8 billion in 2024/25 to R4.8 billion in 2027/28.

The entity derives revenue mainly through transfers from the department, accounting for an estimated 94.2 per cent (R41.8 billion) of total revenue over the medium term. Revenue is expected to increase at an average rate of 2.3 per cent, from R14 billion in 2024/25 to R15 billion in 2027/28.

## South African Special Risks Insurance Association

### Selected performance indicators

**Table 8.76 South African Special Risks Insurance Association performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Percentage growth of gross written premium income per year compared to the previous financial year	Investment activities	Entity mandate	13% (R3.2bn)	44% (R4.6bn)	17% (R5.4bn)	10%	8%	8%	8%
Net insurance service result, less catastrophe bond claims (where the event exceeded R2 billion in claims), plus excess of loss premium, less other operating expenses, divided by insurance revenue, per year	Administration		— <sup>1</sup>	— <sup>1</sup>	— <sup>1</sup>	— <sup>1</sup>	80%	80%	80%

1. No historical data available.

### Entity overview

The South African Special Risks Insurance Association was established in 1979 and registered in terms of the Companies Act (1973). Its mandate is prescribed and informed by the Reinsurance of Material Damages and Losses Act (1989). In line with amendments to the South African Special Risks Insurance Association Act (1998), its ongoing focus is on supporting the insurance industry by providing cover for special risks such as civil commotion, public disorder, strikes, riots and terrorism.

Over the medium term, the insurer will focus on maintaining access to adequate capital through effective financial management and partnerships. The aim of this is to sustain operations and handle future risks, build internal systems and capabilities to enhance operational efficiency and data management, ensure long-term sustainability through strong financial performance, and contribute to industry transformation by enhancing skills development, fostering innovation and driving initiatives that promote financial inclusivity and resilience.

Expenditure is expected to increase at an average annual rate of 21.7 per cent, from R4 billion in 2024/25 to R7.2 billion in 2027/28, with goods and services accounting for a projected 94.8 per cent (R18.8 billion) of total expenditure over the period ahead. This spending is expected to increase at an average annual rate of 22.3 per cent, from R3.7 billion in 2024/25 to R6.9 billion in 2027/28, due to a projected increase in claims because of revisions to actuarial loss-ratio calculations, and in gross written premiums because of an increase in administration fees to agent companies for premium collection. The association generates revenue through insurance premiums. Cover is provided to individuals, corporate and commercial customers, sold as a coupon attached to an underlying insurance policy. Revenue is expected to increase at an average annual rate of 9.2 per cent, from R7.7 billion in 2024/25 to R10.1 billion in 2027/28.

Website [www.dpme.gov.za](http://www.dpme.gov.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

## Vote purpose

Improve government service delivery through integrated planning, monitoring and evaluation.

## Mandate

The Department of Planning, Monitoring and Evaluation is mandated to:

- support the National Planning Commission
- facilitate the implementation of policies, legislation and regulation related to the National Development Plan (NDP) with the aim of optimising the national planning system, coordinating national medium-term plans and delivery agreements, and monitoring and evaluating their implementation
- ensure the alignment of departmental strategic and annual plans with budget allocations and government's medium-term development plan
- monitor the performance of individual national and provincial government departments and municipalities, and facilitate targeted intervention programmes
- monitor frontline service delivery, manage the presidential hotline, develop and implement the annual national evaluation plan, and support the national evaluation system
- promote good planning, monitoring and evaluation practices in government.

## Expenditure overview

In line with the department's aim to strengthen its planning, monitoring and evaluation programmes over the medium term to support the implementation and achievement of government priorities, it will focus on: supporting the implementation of the NDP through the National Planning Commission; coordinating and strengthening the national planning system; monitoring the implementation and achievement of government programmes and priorities; and producing research, evaluation and data-driven analysis to support evidence-based planning and interventions on government priorities.

Expenditure is expected to increase at an average annual rate of 3.8 per cent, from R494 million in 2024/25 to R552.1 million in 2027/28. As the department mainly relies on personnel for its work, spending on compensation of employees accounts for an estimated 72.7 per cent (R1.2 billion) of its budget over the period ahead. As part of the 2024 national macro organisation of government, the administrative duties of the Department of Public Enterprises in terms of the Public Service Act (1994) were transferred to the department, along with the responsibility to establish a state-owned holding company. Amounts of R35.6 million in 2025/26, R29.4 million in 2026/27 and R30.8 million in 2027/28 will be transferred to the department to support this.

### ***Supporting the implementation of the NDP through the National Planning Commission***

The department is tasked with facilitating the implementation of the NDP. This is carried out by the National Planning Commission, which is mandated to provide an independent and critical view of the country's developmental trajectory, monitor its implementation and provide feedback and guidance. Over the medium term, the commission plans to conduct and complete 1 report per year on research projects to support the implementation of the NDP while engaging all social partners and forging new partnerships. In 2025/26, it will start developing a new national development plan to go beyond the NDP's Vision 2030. This work is expected to be completed by the end of 2026/27. Part of this work entails the commission facilitating strategic engagements and partnerships to develop cross-cutting views on issues such as the investment needed in the water and energy, social security and social protection sectors with the aim of finding sustainable and innovative solutions to obstacles that hinder the realisation of Vision 2030.

Related activities are carried through the *National Planning Commission Secretariat* subprogramme in the *National Planning Coordination* programme. Spending in the subprogramme accounts for an estimated 51.3 per cent (R124.9 million) of the programme's budget over the medium term.

### ***Coordinating and strengthening the national planning system***

The pursuit of the NDP's vision is supported by government's 2024-2029 medium-term development plan (MTDP), which reflects government's strategic priorities, outcomes and interventions for the current administration's five-year term. Government's 2024-2029 MTDP translates the NDP's goals into strategic priorities, outcomes, interventions and targets while considering the government of national unity's electoral mandate. Guided by the MTDP, in 2025/26, the department will aim to develop an annual budget prioritisation framework to outline key annual planning cycle priorities for departments and will collaborate with National Treasury in the annual budgeting process.

The department convenes various planning forums in its efforts to improve and strengthen integrated planning across government. These include the national steering committee on integrated planning, which is a platform for engagements, consultations and communication between the department, other central government departments and premiers' offices in relation to planning and its supporting instruments and mechanisms. The purpose of this is to provide strategic leadership and enhance coordination across the 3 spheres of government towards improved development results. To improve the quality of strategic plans, the department will issue circulars and other guidance to departments on institutional planning in line with the revised framework for strategic and annual performance plans.

To ensure that the planning system encourages sustained spatial transformation, the department will, over the next 3 years, support other departments in analysing spatial trends and dynamics during their planning processes in line with the national spatial development framework. The department will also address the integration of the framework in government's 2024-2029 MTDP; develop supporting guidelines; and continue to provide geospatial analysis and mapping in support of planning, monitoring and evaluation activities.

This work will be facilitated through the *National Planning Coordination* subprogramme in the *National Planning Coordination* programme, which is responsible for national planning processes and systems. Spending in the subprogramme accounts for an estimated 45.5 per cent (R113.6 million) of the programme's budget over the MTEF period.

### ***Monitoring the implementation and achievement of government programmes and priorities***

Over the period ahead, the department will monitor the performance of individual national and provincial government departments and municipalities, and facilitate targeted interventions such as research, rapid assessment and site visits to validate and verify data and certain outcomes reported by government institutions. The research will ensure evidence-based monitoring and the proposal of innovative solutions to challenges that emerge. These activities are carried out in the *Outcomes Monitoring and Support* subprogramme in the *Sector Monitoring Services* programme. Spending in the subprogramme accounts for an estimated 84 per cent (R187.9 million) of the programme's total budget over the MTEF period.

As the department is tasked with monitoring frontline services to find areas of improvement, it plans to produce 2 reports per year over the medium term on frontline service delivery. These services include complaints and compliments received through the presidential hotline, which is estimated to cost the department an estimated R63 million over the medium term. The department will also support the performance management and development of heads of departments, and monitor and strengthen governance capabilities and the implementation of capacity development measures across the public sector to improve planning, monitoring and evaluation. These activities are carried out in the *Public Service Monitoring and Capacity Development* subprogramme in the *Public Sector Monitoring and Capacity Development* programme. Spending in the subprogramme accounts for an estimated 95.2 per cent (R253 million) of the programme's budget over the MTEF period.

### ***Research, evaluation and analysis to support evidence-based planning and interventions***

Decision-making that is based on evidence strengthens accountability, transparency and informed policymaking. Accordingly, as part of its support for the production, collation, accessibility and timely use of high-quality evidence to enhance planning, performance monitoring and evaluation, the department will aim to update the national evaluation policy framework over the medium term towards developing the 2025-2029 national evaluation plan. It also plans to produce 5 evidence reports in each year over the MTEF period, comprising 2 evaluations, 2 research projects and 1 development indicator report. These activities will be carried out through the *Evaluation, Research, Knowledge and Data Systems* subprogramme, which is allocated an estimated R113.9 million over the MTEF period in the *Evidence and Knowledge Systems* programme.

## Programme 2: National Planning Coordination

### Programme purpose

Facilitate and coordinate macro and transversal planning functions across government, and coordinate planning functions in the department.

### Objectives

- Ensure the realisation of the NDP's Vision 2030 by:
  - participating and initiating research projects in support of the NDP on an ongoing basis
  - engaging with social partners and forging partnerships through stakeholder engagements on an ongoing basis
  - providing advice and developing cross-cutting views on issues to find sustainable and innovative solutions to obstacles that hinder the implementation of the NDP on an ongoing basis
  - supporting the implementation of the 2024-2029 MTDP annually through the institutional planning cycle
  - coordinating planning functions across government by annually assessing the alignment of the strategic and annual performance plans of national departments with the 2024-2029 MTDP
  - developing an annual budget prioritisation framework
  - embedding the national spatial development framework in the strategic and annual performance plans of national and provincial departments over the medium term
  - regulating institutional strategic plans and annual plans in line with government's development goals over the medium term
  - coordinating planning functions across government through the national steering committee on integrated planning and other planning structures for national and provincial government.

### Subprogrammes

- *Management: National Planning Coordination* provides management and support services to the programme.
- *National Planning Coordination* contributes to improved national development outcomes through the coordination and institutionalisation of an integrated government planning system.
- *National Planning Commission Secretariat* contributes to improved national development outcomes through the coordination and institutionalisation of an integrated government planning system.

## Programme 3: Sector Monitoring Services

### Programme purpose

Ensure government policy coherence. Develop, facilitate, support and monitor the implementation of sector plans and intervention strategies.

### Objective

- Ensure the effective implementation of government's 2024-2029 MTDP by monitoring the achievement of its 3 overarching priorities and reporting progress to Cabinet biannually, and supporting the development and implementation of special intervention programmes as and when required.

### Subprogrammes

- *Management: Sector Monitoring Services* provides management and support services to the programme.
- *Outcomes Monitoring and Support* facilitates the implementation of the MTDP's 3 priorities and 21 outcomes through continual performance monitoring and the provision of appropriate support.
- *Intervention Support* develops and supports special intervention strategies and plans.

## Programme 4: Public Sector Monitoring and Capacity Development

### Programme purpose

Support the implementation of the medium-term development plan by monitoring and improving the capacity of state institutions to develop and implement plans and provide services.

### Objectives

- Strengthen state governance, efficiency, effectiveness and equity by:
  - monitoring the achievement of targets related to MTDP priority 3 (build a capable, ethical and developmental state) and reporting progress to Cabinet biannually
  - ensuring the alignment of performance agreements for heads of departments with government's 2024-2029 MTDP annually
  - facilitating service delivery improvements through frontline and citizen-based monitoring, and effective complaints monitoring through the presidential hotline, on an ongoing basis
  - monitoring public service capabilities and the governance of public entities on an ongoing basis.

### Subprogrammes

- Management: Public Sector Monitoring and Capacity Development* provides management and support services to the programme.
- Public Service Monitoring and Capacity Development* monitors and supports the implementation of the priorities outlined in government's 2024-2029 MTDP. This subprogramme also develops and implements strategic interventions to support and unblock the implementation of government programmes.

## Programme 5: Evidence and Knowledge Systems

### Programme purpose

Coordinate and support the generation, collation, accessibility and timely use of quality evidence to support planning, monitoring and evaluation across government.

### Objectives

- Support the department's planning, monitoring and evaluation functions by:
  - managing and supporting evaluations of priority government policies, programmes and systems in line with the national evaluation policy framework over the medium term

- conducting research and evaluation in identified key policy areas, and producing 4 evidence reports annually
- improving the department's capability for data integration, analytics and knowledge management to support its role in evidence-based planning, monitoring and evaluation across government over the medium term.

## Subprogrammes

- *Management: Evidence and Knowledge Systems* provides management and support services to the programme.
- *Evaluation, Research, Knowledge and Data Systems* provides evaluation, research, knowledge management, and data integration and analysis services.

## Expenditure trends and estimates

## Vote purpose

*Formulate energy policies, regulatory frameworks and legislation, and oversee their implementation, to ensure energy security, sustainability and access to affordable and reliable energy.*

## Mandate

The Department of Electricity and Energy is mandated to ensure the secure and sustainable provision of energy to support socioeconomic development. Several pieces of legislation determine the department's mandate. These include the:

- Electricity Regulation Act (2006), which establishes a national regulatory framework for the electricity supply industry, including registration and licensing
- National Energy Act (2008), which empowers the minister to plan for and ensure security of supply for the energy sector. The act sets out core aspects of the department's mandate and empowers the Minister of Electricity and Energy to:
  - ensure that diverse energy resources are available in sustainable quantities and at affordable prices in the South African economy to support economic growth and poverty alleviation, while considering the natural environment
  - plan for the increased generation and consumption of renewable energy, a contingency energy supply, the holding of strategic energy feedstock and carriers, adequate investment in appropriate upkeep, and access to energy infrastructure
  - collect data and information regarding energy demand, supply and generation
  - promote electricity regulation, energy research and the efficient generation and consumption of energy.

In addition, the 1998 White Paper on Energy Policy, alongside the 2003 White Paper on Renewable Energy, sets out government's overarching position on the supply and consumption of energy. Other applicable policies include the integrated energy plan, the integrated resource plan, the electricity pricing policy, and the Paris Agreement on climate change.

## Selected performance indicators

**Table 10.1 Performance indicators by programme and related outcome**

Indicator	Programme	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Kilometres of existing medium-voltage power lines upgraded per year	Energy Programmes and Projects	Outcome 5: Energy security and a just energy transition	0	0	5	50	50	50	50
Amount of energy savings realised and verified from the energy efficiency and demand-side management grant per year (terawatt-hours)	Energy Programmes and Projects		1.58 TWh	0.5 TWh	1.072 TWh	0.5 TWh	0.5 TWh	0.5 TWh	0.5 TWh
Number of additional households electrified with grid electrification per year	Energy Programmes and Projects		147 013	145 877	162 894	220 000	100 000	100 000	100 000

Number of additional substations upgraded per year	Energy Programmes and Projects		2	7	3	3	3	3	3
Kilometres of new medium-voltage power lines constructed per year	Energy Programmes and Projects		67	94	84	50	50	50	50
Number of additional households electrified with non-grid electrification per year	Energy Programmes and Projects		23 738	20 950	7 780	15 000	15 000	15 000	15 000
Number of shareholder compacts signed per year	State-owned Companies Support Services		1	1	1	1	1	1	1
Number of corporate plans reviewed per year	State-owned Companies Support Services		1	1	1	1	1	1	1
Number of state-owned companies' quarterly financial reviews conducted per year	State-owned Companies Support Services		4	4	4	4	4	4	4
Number of annual energy statistics reports published per year	Energy Planning and Policy Development		4	0	2	4	4	4	4

## Expenditure overview

Over the medium term, the department will focus on ensuring and extending reliable access to electricity, enhancing energy efficiency, and managing nuclear energy in accordance with international commitments. This work is intended to ensure that South Africa has an adequate and disruption-free supply of electricity to sustain productivity and economic activity.

Expenditure is expected to increase at an average annual rate of 5.5 per cent, from R6.1 billion in 2024/25 to R7.1 billion in 2027/28, with transfers and subsidies to public entities and municipalities accounting for an estimated 86.8 per cent (R17.9 billion) of the department's planned spending over the MTEF period. Most of this is allocated for activities in the integrated national electrification programme, which is set to receive R13.2 billion through the *Energy Programmes and Projects* programme.

As part of the 2024 national macro organisation of government, the Department of Mineral Resources and Energy and was split into two departments, the Department Electricity and Energy and the Department of Mineral and Petroleum Resources. The split is expected to be finalised by 31 March 2025. As the new department builds capacity, spending on compensation of employees is expected to increase at an average annual rate of 8.9 per cent, from R313.6 million in 2024/25 to R404.9 million in 2027/28. Accordingly, the number of personnel is expected to increase from 359 in 2024/25 to 414 in 2027/28. An estimated 13.1 per cent (R2.7 billion) of the department's expenditure over the next 3 years is set aside for operational expenditure, of which R1.2 billion is for compensation of employees and R1.6 billion is for goods and services.

As part of South Africa's presidency of the G20 until November 2025, the department is responsible for leading the G20 energy transitions platform. This entails hosting ministerial and related working group and technical preparatory meetings. For this purpose, R6.5 million in 2025/26 is set aside in the department's baseline.

### ***Expanding access to electricity***

As part of the integrated national electrification programme, which aims to extend access to electricity to all households across South Africa, 300 000 households are expected to be connected to the electricity grid over the medium term. The department anticipates that a further 15 000 households per year over the same period will be provided with non-grid (mainly solar) electrification systems. To support this, 6 new bulk substations are expected to be built and 9 are earmarked for upgrades over the medium term.

Transfers to municipalities through the *Energy Programmes and Projects* programme for the direct component of the integrated national electrification programme are expected to remain at R1.7 billion per year over the MTEF period due to reductions and reprioritisations implemented in previous budget cycles. However, transfers to Eskom for the indirect component are expected to increase at an average annual rate of 4.4 per cent, from R2.2 billion in 2024/25 to R2.5 billion in 2027/28. A significant portion of households yet to be electrified are in sparsely populated rural areas, mostly in Eastern Cape and KwaZulu-Natal. A further R747.2 million is allocated for the non-grid component.

### ***Enhancing energy efficiency***

Over the medium term, municipalities that apply for and receive funding will undertake initiatives to upgrade infrastructure that is not energy efficient, such as converting street and traffic lights to use solar power and retrofitting government buildings with energy-efficient technologies. This is expected to lead to a targeted 1.5 terawatt hours of energy savings over the medium term. These activities are carried out through disbursements from the *energy efficiency and demand-side management grant*, which is allocated R773 million over the medium term in the *Clean Energy* subprogramme in the *Energy Programmes and Projects* programme. This subprogramme is also set to make transfers amounting to R253.2 million over the medium term to the South African National Energy Development Institute for research and development for green energy and energy efficiency.

### ***Regulating nuclear energy***

An estimated 96.2 per cent (R4.7 billion) of the *Nuclear Energy Regulation and Management* programme's budget is transferred to the department's entities that work with nuclear energy. These funds mainly subsidise the operational costs of the South African Nuclear Energy Corporation and the decommissioning and decontamination of old nuclear facilities. Other transfers include R146.1 million to the National Nuclear Regulator to regulate safety standards for nuclear activities in South Africa and R157.1 million to the National Radioactive Waste Disposal Institute for the long-term care and disposal of radioactive waste. In collaboration with other stakeholders, the department plans to implement a multipurpose reactor research project that will replace the SAFARI-1 nuclear research reactor by 2030 as it approaches the end of its useful life. The project, for which R1.3 billion over the medium term is allocated for preparatory work, aims to allow nuclear research and development to continue and ensure that South Africa remains one of the top radioisotope producers in the world. Spending in the *Nuclear Energy Regulation and Management* programme is expected to increase at an average annual rate of 15.1 per cent, from R1.1 billion in 2024/25 to R1.7 billion in 2027/28.

## Programme 2: Energy Planning and Policy Development

### Programme purpose

Formulate, maintain and implement integrated energy policies to promote and encourage investment in the energy industry and improve security of supply.

## Objectives

- Improve energy security by:
  - implementing the revised Electricity Regulation Amendment Act (2007) and its regulations over the medium term
  - amending the National Radioactive Waste Management Disposal Institute Act (2008) and its regulations over the medium term
  - amending the Gas Act (2001) over the MTEF period
  - revising the integrated resource plan by 2025/26
  - publishing 4 annual energy statistics reports per year.

## Subprogrammes

- *Nuclear, Electricity and Gas Policy* develops and reviews policy and legislative frameworks for the nuclear, electricity and gas sectors, conducts research, and monitors the impact of policy implementation.
- *Energy Planning* ensures the secure supply of energy resources through evidence-based planning, manages the development of energy plans, and conducts research and analysis of market trends that inform and influence the energy economy.
- *Intergovernmental Relations, International Collaborations and Transformation* promotes economic growth, investment and transformation in the sector.

## Programme 3: Energy Programmes and Projects

### Programme purpose

Manage, coordinate and monitor programmes and projects focused on access to energy resources.

### Objectives

- Increase access to electricity by managing the funding and monitoring of the implementation of the integrated national electrification programme on an ongoing basis.
- Increase public awareness on energy issues while empowering disadvantaged and vulnerable groups by identifying, implementing, managing and coordinating upliftment programmes and projects on an ongoing basis.
- Ensure the efficient management of electricity supply on an ongoing basis by:
  - enhancing the application of business principles for project management to help programme and project managers
  - coordinating, monitoring and reporting on the implementation of programmes and projects focused on the development, improvement and transformation of the energy generation, refinement, transmission and distribution industry and its infrastructure.
- Promote the sustainable use and management of energy resources over the medium term by managing the funding and monitoring of the *energy efficiency and demand-side management grant* to municipalities.

### Subprogrammes

- *Energy Programmes and Project Management* provides overall management to the programme.
- *Integrated National Electrification Programme* oversees and manages the financing and implementation of the electrification programme, and makes transfers to Eskom, municipalities and private providers.
- *Programmes and Projects Management Office* provides specialised assistance to management to apply management principles, coordinate project information and report on projects.
- *Electricity Infrastructure and Industry Transformation* oversees programmes and projects focused on the development, improvement and transformation of the electricity generation, transmission and distribution sector, as well as independent power producers.
- *Clean Energy* advances energy efficiency and renewable energy in South Africa through planning and coordinating initiatives and interventions focused on the energy efficiency and renewable market.

## Programme 4: Nuclear Energy Regulation and Management

### Programme purpose

Oversee and regulate the South African nuclear energy industry, control nuclear materials in line with international obligations and standards, and develop national legislation and policies to ensure the peaceful use of nuclear energy.

### Objectives

- Improve security of supply for nuclear energy by managing and coordinating the implementation of the nuclear build programme over the MTEF period.
- Strengthen the control of nuclear material, equipment and related technologies by implementing all legislative and international agreement requirements related to nuclear non-proliferation and radiation security on an ongoing basis.
- Strengthen and promote the use of nuclear technology by implementing the technical cooperation programme over the medium term.
- Promote the use of nuclear technology by interfacing with regional and inter-regional organisations in the nuclear field, and leading South Africa's global participation in promoting nuclear research, development and technology applications for peaceful use over the medium term.

### Subprogrammes

- *Nuclear Energy Management* provides overall management to the programme.
- *Nuclear Safety and Technology* manages and implements all matters related to nuclear safety and technology as required by legislation and international agreements; implements nuclear energy policy in line with the requirements of the integrated resource plan; and administers all matters related to nuclear technology, safety, liability and emergency management with the aim of improving the governance of the nuclear sector. This subprogramme also makes transfers to the South African Nuclear Energy Corporation, the National Nuclear Regulator and the National Radioactive Waste Disposal Institute, and is responsible for paying membership fees to international organisations.
- *Nuclear Non-proliferation and Radiation Security* manages and implements all matters related to nuclear non-proliferation and radiation security, as required by legislation and international agreements. This subprogramme also administers the use of nuclear material, related equipment and facilities, including nuclear technology, to ensure compliance with legislation and international agreements.

## Programme 5: State-owned Companies Support Services

### Programme purpose

Provide and enforce state-owned companies' governance, legal assurance, and financial and non-financial performance monitoring, evaluation and reporting systems in support of the shareholder to ensure alignment with government priorities.

### Objectives

- Ensure effective shareholder oversight of state-owned companies on an ongoing basis by:
  - providing governance systems and legal support
  - developing and maintaining shareholder risk profiles and mitigating strategies
  - monitoring, evaluating and reporting on financial and non-financial performance, and proposing intervention measures when required.
- Contribute to the performance of state-owned companies on an ongoing basis by:
  - conducting reviews and research, and modelling pipeline and new business enhancement opportunities within them
  - assessing their operations and developing mitigation instruments in conjunction with regulatory bodies and industry
  - conducting research, modelling job creation and transforming instruments to facilitate alignment with their shareholder compact agreements.

### Subprogrammes

- *Energy Resources* exercises shareholder oversight of Eskom.
- *State-owned Companies Financial Assessment and Investment* analyses state-owned companies' capital plans, operational performance, execution of capital programmes and proposed restructuring proposals, and advises on appropriate action.
- *State-owned Companies Risk, Governance and Legal Assurance* provides external legal services and support, including transaction and contract management support, to sector teams and the commercial activities of energy state-owned companies. This subprogramme also develops, monitors and advises on legislative and corporate governance and shareholder management systems for the department and its state-owned energy companies, and develops and implements risk and compliance management guidelines and systems.

			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Percentage of energy availability per year	Generation	Outcome 5: Energy security and a just energy transition	62.02%	56.99%	60%	61%	63%	64%	65%
System average interruption duration index (hours per year)	Distribution		35.5	36.6	38.0	38.0	37.5	37	36.75
System average interruption frequency index (events per year)	Distribution		12.3	13.1	18.0	17.5	17	17	16.5
Number of electrification connections per year	Distribution		97 947	101 899	85 474	44 974	40 898	38 277	64 534
System reliability performance for system minutes lost (less than 1 minute), measured in minutes	Transmission		2.88	3.2	3.53	3.53	3.53	3.53	3.53

#### Entity overview

Eskom is a state-owned company as defined in the Companies Act (2008) and is listed as a schedule 2 public entity in terms of the Public Finance Management Act (1999). The company is mandated to generate, transmit and distribute electricity to industrial, mining, commercial, agricultural and residential customers and redistributors.

Over the medium term, Eskom will focus on executing its turnaround strategy by continuing to work on the legal separation of the transmission and distribution and generation businesses while aiming to improve these functions. Part of the turnaround strategy involves aligning the company's human resources with its plans to improve operational performance to increase the availability of energy to 65 per cent by 2027/28. To achieve this, the company will implement appropriate strategies to retain critical skills, improve employee morale and deal with underperformance effectively. As such, spending on compensation of employees is projected to increase at an average annual rate of 4.7 per cent, from R40.7 billion in 2024/25 to R46.8 billion in 2027/28.

Expenditure is projected to increase at an average annual rate of 6.8 per cent, from R343.8 billion in 2024/25 to R418.3 billion in 2027/28. Generation constitutes an estimated 60.3 per cent (R713.2 billion) of Eskom's total budget over the medium term. The evolution of the electricity supply industry and the connection of large-scale renewable and distributed energy will require the company's transmission and distribution infrastructure to be significantly strengthened and expanded. This is aligned with the requirements contained in the transmission and distribution network development plans. Expenditure in the transmission division accounts for 28.3 per cent (R351 billion) of total spending, increasing at an average annual rate of 16.5 per cent, from R87.5 billion in 2024/25 to R138.3 billion in 2027/28, due to the execution of the transmission development plan for grid expansion. Spending on distribution accounts for 10.7 per cent (R125.7 billion) of the company's budget over the period ahead.

The company generates income mainly through the sale of electricity. Revenue is expected to increase at an average annual rate of 11.8 per cent, from R337.1 billion in 2024/25 to R470.8 billion in 2027/28, as annual tariffs for customers supplied directly by Eskom increase.

### Entity overview

The National Energy Regulator of South Africa was established in terms of the National Energy Regulator Act (2004) and is listed as a schedule 3A public entity in terms of the Public Finance Management Act (1999). The entity is mandated to regulate the electricity industry in terms of the Electricity Regulation Act (2006), the

piped gas industry in terms of the Gas Act (2001) and the petroleum pipelines industry in terms of the Petroleum Pipelines Act (2003).

In line with its mandate, the regulator's focus over the medium term will continue to be on ensuring the security, accessibility and affordability of energy supply, and fair competition and regulatory certainty in the energy sector. It will do this by setting and approving energy tariffs within the stated timeframes, licensing and registering energy service providers within the stated timeframes, and monitoring and enforcing compliance with regulations.

To support these activities, expenditure is expected to increase at an average annual rate of 6.3 per cent, from R468.2 million in 2024/25 to R563 million in 2027/28, with compensation of employees accounting for an estimated 73.3 per cent (R1.2 billion) of the total expenditure over the medium term. The remaining budget is spent on goods and services (R426.3 million) and capital expenditure (R7 million), particularly ICT infrastructure.

The regulator derives its revenue mainly through licence fees and the levies it imposes on customers in the electricity, piped gas and petroleum pipelines sectors, as well as through interest on investments. Revenue is projected to increase at an average annual rate of 12.2 per cent, from R398.1 million in 2024/25 to R563 million in 2027/28, due to higher-than-expected collections from customers, particularly for piped gas. The budgeted deficit in 2025/26, which National Treasury has approved, is necessary to reduce previously accumulated surpluses.

### Programmes/Objectives/Activities

			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of inspections conducted at nuclear power plants per year	Nuclear power plants	Outcome 5: Energy security and a just energy transition	34	41	42	41	41	41	41
Percentage of implementing reviews and assessments undertaken on nuclear power plants per year	Nuclear power plants		117.9% (467/396)	113.3% (238/210)	120.4% (289/240)	100%	100%	100%	100%
Percentage implementation of reviews and assessment plans for nuclear installation site licence submissions per year	Nuclear power plants		— <sup>1</sup>	107.1% (15/14)	133% (8/6)	100%	100%	100%	100%
Number of inspections conducted on nuclear technology and naturally occurring radioactive material per year	Nuclear technology and naturally occurring radioactive material		170	209	216	226	226	226	226
Percentage implementation of reviews and assessments undertaken for nuclear technology and naturally occurring radioactive material per year	Nuclear technology and naturally occurring radioactive material		120% (564/470)	117% (970/829)	101.4% (2 744/2 704)	100%	100%	100%	100%

1. No historical data available.

### Entity overview

The National Nuclear Regulator is listed as a schedule 3A public entity in terms of the Public Finance Management Act (1999). It derives its mandate from the National Nuclear Regulator Act (1999), which requires it to regulate safety standards for nuclear activities in South Africa. This includes establishing safety standards and regulatory practices, ensuring that nuclear installations are safe by enforcing regulatory control, granting nuclear authorisations, conducting compliance inspections, and ensuring that provisions are in place for nuclear emergency planning.

Over the medium term, the regulator will continue with its compliance assurance and enforcement activities, as well as conduct reviews, assessments and general oversight of the Koeberg nuclear power station licence. In terms of regulating facilities that operate nuclear technologies, the regulator plans to conduct 123 inspections at nuclear power plants over the medium term, as well as safety reviews and assessments for all regulated facilities and issue nuclear authorisations. The regulator will also inspect facilities with naturally occurring radioactive materials in raw and processed form, such as gold mines, refineries and scrap metal yards. As such,

it plans to conduct 678 inspections on nuclear technology and naturally occurring radioactive material over the medium term. An estimated R1 billion is allocated to carry out these activities.

As the regulator relies on personnel with highly specialised skills, compensation of employees is expected to account for 61.4 per cent (R688.4 million) of its total budget over the medium term. Expenditure is expected to decrease at an average annual rate of 9 per cent, from R477.1 million in 2024/25 to R359.3 million in 2027/28, due to the retention of surplus funds in 2024/25, with the approval of National Treasury. The regulator derives most of its revenue through operator licence fees. Total revenue is projected to increase at an average annual rate of 2.6 per cent, from R332.3 million in 2024/25 to R359.3 million in 2027/28.

Number of inspection reports completed per year	Radwaste compliance management		– <sup>1</sup>	– <sup>1</sup>	2	2	2	2	2	2

1. No historical data available.

### Entity overview

The National Radioactive Waste Disposal Institute was established in terms of the National Radioactive Waste Disposal Institute Act (2008) to manage the disposal of radioactive waste at the national level and is listed as a schedule 3A public entity in terms of the Public Finance Management Act (1999). The institute is responsible for the long-term care and disposal of radioactive waste in a safe, technically sound, socially acceptable, environmentally responsible and economically feasible manner to ensure no undue burden is placed on future generations.

In addition to implementing its financial sustainability plan, over the medium term, the institute plans to: compile 6 compliance assurance audit reports; ensure that all disposal waste packages meet waste acceptance criteria; ensure the safety of Vaalputs employees by ensuring that their average radiation exposure is below 1 millisievert; develop project plans for the central interim storage facility so that a licensing strategy can be developed by the end of the MTEF period; and develop a project plan for waste emanating from the Koeberg nuclear power station.

Expenditure is expected to decrease at an average annual rate of 8.5 per cent, from R74.7 million 2024/25 to R57.2 million in 2027/28, due to the retention of surplus funds in 2024/25, with the approval of National Treasury. Compensation of employees constitutes an estimated 79.3 per cent (R141.5 million) of the institute's spending over the medium term, while goods and services constitutes 18.6 per cent (R18.5 million), mostly for the shift of the Vaalputs waste disposal facility from the South African Nuclear Energy Cooperation and the granting of the nuclear installation licence by the National Nuclear Regulator. This will allow the institute to generate its own revenue by providing waste disposal and related services to waste generators. The institute expects to derive 96 per cent (R157 million) of its revenue over the MTEF period through transfers from the department. Revenue is projected to increase at an average annual rate of 4.7 per cent, from R49.9 million in 2024/25 to R57.2 million in 2027/28.

## Programmes/Objectives/Activities

### Entity overview

The South African National Energy Development Institute was established in terms of the National Energy Act (2008) and is listed as a schedule 3A public entity in terms of the Public Finance Management Act (1999). It is mandated to direct, monitor and conduct applied energy research and development, and demonstrate and deploy specific measures to promote the uptake of green energy and energy efficiency in South Africa.

Over the medium term, the institute will focus on achieving universal access to clean energy that is affordable and of appropriate quality, and conducting research on energy efficiency. It will do this through initiatives and projects focused on rolling out smart meters to use energy more efficiently, smart and micro grids to improve grid reliability, and solar geysers. It will also support industrialisation and lead innovation in the sector by issuing 60 energy efficiency tax certificates, issuing 300 buildings with energy performance certificates on the national building energy performance register, and implementing projects with the Department of Science and Innovation on green hydrogen, carbon dioxide capture and use, renewable energy and energy storage.

Expenditure is expected to decrease at an average annual rate of 14.5 per cent, from R173.9 million in 2024/25 to R108.7 million in 2027/28, due to the retention of surplus funds in 2024/25, with the approval of National Treasury. Compensation of employees accounts for an estimated 54.7 per cent (R210.8 million) of total expenditure over the medium term, increasing at an average annual rate of 9 per cent as the institute increases its number of personnel from 65 in 2024/25 to 77 in 2027/28.

The institute is set to derive 80.7 per cent (R253.2 million) of its revenue over the medium term through transfers from the department and other sources such as donors and the Department of Science and Innovation for energy research. Revenue is expected to increase at an average annual rate of 6.2 per cent, from R90.8 million in 2024/25 to R108.7 million in 2027/28.

## South African Nuclear Energy Corporation

### Selected performance indicators

**Table 10.35 South African Nuclear Energy Corporation performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of peer-reviewed publications produced per year	Research and innovation	Outcome 8: Dynamic science, technology and innovation for growth	36	27	28	20	20	20	20
Number of product and process innovation disclosures conducted per year	Research and innovation		7	7	7	6	6	6	6
Maximum allowable radiation dose per year (microsieverts) in terms of licence conditions	Business continuity and efficiency		0.004276 µSv	0.00399 µSv	0.000365 µSv	0.05 µSv	0.05 µSv	0.05 µSv	0.05 µSv
Number of days per year that the SAFARI-1 reactor is operationally available	Business continuity and efficiency		294	288	289	287	287	287	287

### Entity overview

The South African Nuclear Energy Corporation derives its mandate from the Nuclear Energy Act (1999), the nuclear energy policy and directives conferred on it by the Minister of Electricity and Energy. It is listed as a schedule 2 public entity in terms of the Public Finance Management Act (1999). The corporation's subsidiaries include international fluorochemical producer Pelchem; radiopharmaceutical and radioisotope producer Nuclear Technologies Product Radioisotopes; and Pelindaba Enterprises, which specialises in manufacturing power-generation components. The corporation is also responsible for decommissioning and decontaminating old nuclear facilities and contributes to South Africa's obligations in terms of international nuclear treaties and agreements. Over the medium term, the corporation will focus on increasing medical radioisotope production and radiation applications used locally and internationally to diagnose and treat cancer, as well as produce fluorochemical products. Other priorities include research and technology development for new products, and nuclear and industrial manufacturing.

The corporation operates the SAFARI-1 nuclear reactor for research, technology development and the production of radioisotopes. Over the period ahead, it will ensure that SAFARI-1 operates for at least 287 days per year and complies with international safety requirements. The corporation will continue work over the medium term on the multipurpose reactor project to eventually replace SAFARI-1 as it is approaching the end of its useful life; and on expanding the front-end fuel cycle, which includes uranium enrichment and fuel fabrication. Additional technological installations, including small-angle neutron scattering and neutron radiography facilities, will enhance the corporation's research capabilities. The corporation will continue to decommission and decontaminate disused historical nuclear facilities over the MTEF period.

Expenditure is set to increase at an average annual rate of 5.2 per cent, from R3 billion in 2024/25 to R3.5 billion in 2027/28. Spending on commercial activities accounts for a projected 43.7 per cent (R4.2 billion) of total expenditure over medium term, mainly for producing medical radioisotopes. The sale of nuclear technology products, fluorochemical products and advanced manufacturing services is expected to contribute 62.6 per cent (R6.3 billion) of the corporation's revenue over the medium term, with the balance derived mostly through transfers from the department. Revenue is projected to increase at an average annual rate of 6.3 per cent, from R3.1 billion in 2024/25 to R3.7 billion in 2027/28.

### Vote purpose

Lead the modernisation of the public service, through a generally applicable framework of norms and standards, to improve service delivery.

### Mandate

The Department of Public Service and Administration draws its mandate from section 195(1) of the Constitution, which sets out basic values and principles to which the public service should adhere; and the Public Service Act (1994), which makes the Minister for Public Service and Administration responsible for establishing norms and standards relating to:

- the functions of the public service
- the establishment and organisational structures of departments and other organisational and governance arrangements in the public service
- labour relations, conditions of service and other employment practices for employees in the public service
- the health and wellness of employees in the public service
- information management and electronic government in the public service
- integrity, ethics, conduct and anti-corruption in the public service
- transformation, reform, innovation and any other matters to improve the effectiveness and efficiency of the public service and its delivery of services to the public.

			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Annual progress on the development of guidelines on conducting lifestyle audits to intensify the fight against corruption in the public service and monitoring reports compiled on the implementation of the guidelines	Negotiations, Labour Relations and Remuneration Management	Outcome 18: A capable and professional public service	Guidelines implemented	Support provided for implementing guidelines	Support provided to 12 departments for implementing guidelines	Monitoring report on the implementation of lifestyle audits submitted to the minister	Monitoring report on compliance by all departments with referrals for lifestyle investigations submitted to the minister for approval	Monitoring report on compliance by all departments with referrals for lifestyle investigations submitted to the minister for approval	Monitoring report on compliance by all departments with referrals for lifestyle investigations submitted to the minister for approval
Annual progress on the development, implementation and monitoring of the new discipline management strategy in the public service	Negotiations, Labour Relations and Remuneration Management		Discipline management strategy developed and submitted to the minister for approval	Strategy approved by the minister	Support for implementing the strategy provided to 12 national departments	Monitoring report on the progress made by the 12 departments submitted to the director-general	Progress report on the implementation of the reviewed disciplinary code as envisaged in the new discipline management strategy submitted to the director-general for noting	Monitoring report on the implementation of the reviewed disciplinary code submitted to the director-general for noting	Monitoring report on the implementation of the reviewed disciplinary code submitted to the director-general for noting
Annual progress on the development, implementation and monitoring of the directive on the public service data governance framework to improve business intelligence in the public service	e-Government Services and Information Management		Assessment conducted on data and information management maturity in the public service	Determination on and directive for the management of public service data and information submitted to the minister for approval	Implementation support on the directive provided to selected national and provincial departments	Report on the assessment of data management maturity in national and provincial departments submitted to the director-general for approval and circulation to departments	Directive on the data governance framework developed and issued to all provincial and national departments	Implementation support provided to selected national and provincial departments	Compliance monitoring report with the data governance framework compiled
Annual progress on the implementation of the second-generation review of the African Peer Review Mechanism national action plan	Government Service Access and Improvement		African Peer Review Mechanism review conducted	National action plan on the institutionalisation of the African Peer Review Mechanism approved	Support provided to 3 state institutions to implement the national action plan	Support provided to 3 state institutions to implement the national action plan	Biannual status reports on the implementation of the African Peer Review Mechanism national action plan by 4 state institutions submitted to the director-general for approval	Biannual status reports on the implementation of the African Peer Review Mechanism national action plan by 5 state institutions submitted to the director-general for approval	Biannual status reports on the implementation of the African Peer Review Mechanism national action plan by 6 state institutions submitted to the director-general for approval
Annual progress on the implementation of the revised Batho Pele programme	Government Service Access and Improvement		Development and approval of Batho Pele standards	Support provided to departments on the implementation of the revised Batho Pele programme through 10 sector-focused sessions	Support provided to 10 national departments for the implementation of the revised Batho Pele programme	Status report on departments' implementation of the revised Batho Pele programme submitted to the director-general	Status report on departments' implementation of the revised Batho Pele programme submitted to the director-general	Evaluation report on the impact of the implementation of the revised Batho Pele programme submitted to the director-general	Review the applicability and relevance of the Batho Pele programme
Annual monitoring of the implementation of the business process modernisation programme	Government Service Access and Improvement		Monitoring and evaluation of implementation conducted	Programme implemented in 4 partner departments	Support provided to 5 national departments to implement the programme	Report on the status of implementing the programme submitted to the director-general	Report on the status of implementing the programme submitted to the director-general	Evaluation report on the impact of the programme submitted to the director-general	Review of programme conducted in line with the 2026/27 evaluation report

1. Target achieved.

## Expenditure overview

The department provides an enabling environment to ensure that government departments have adequate capacity to carry out their mandates. To this end, over the medium term, the department will continue to focus on intensifying the fight against corruption in the public service, reducing government's wage bill, ensuring adherence to Batho Pele principles, and developing regulations and reviewing key legislation.

The department has a budget of R1.8 billion over the MTEF period, of which compensation of employees accounts for an estimated 54.4 per cent (R966.3 million) for an average of 366 employees per year. Spending on transfers and subsidies accounts for an estimated 10.2 per cent (R178.6 million) of the department's budget over the period ahead, of which R158 million is earmarked for the Centre for Public Service Innovation. Expenditure is set to increase at an average annual rate of 4.7 per cent, from R539.5 million in 2024/25 to R618.7 million in 2027/28.

### ***Intensifying the fight against corruption in the public service***

The department has introduced norms, standards and interventions aimed at tackling corruption in the public service. Key among these are regulations for doing business with the state, enforcing codes of conduct, providing protection for whistle-blowers, conducting lifestyle audits on state employees, and establishing partnerships with law enforcement agencies to promote and facilitate ethical conduct. Accordingly, over the medium term, the department will continue to guide and provide technical assistance to other government departments on conducting lifestyle audits on certain categories of employees, as well as on monitoring and reporting on lifestyle audit investigations in line with the implementation of the financial disclosure framework. A central register will be used to verify disciplinary processes and monitor progress made by other departments on the reduction of backlogged misconduct cases. To fund these activities, R82.8 million over the MTEF period is allocated in the *Public Administration Ethics, Integrity and Disciplinary Technical Assistance Unit* subprogramme in the *Negotiations, Labour Relations and Remuneration Management* programme.

### ***Reducing government's wage bill***

The department is tasked with reducing the public sector wage bill to a sustainable level. To this end, in 2024/25, it developed a draft remuneration policy based on the 2023/24 review of remuneration policies across government. The minister is expected to approve the draft policy by 31 March 2025. Once the policy is adopted, a revised remuneration strategy and framework for the public service is expected to be implemented over the next 5 years. Over the medium term, the department plans to monitor the implementation of the review's recommendations by the health, education and social development sectors, and the justice and protection services cluster. To carry out these activities, R52 million is set aside over the next 3 years in the *Remuneration, Employment Conditions and Human Resource Systems* subprogramme in the *Negotiations, Labour Relations and Remuneration Management* programme.

### ***Improving the implementation of Batho Pele principles***

The state is required to ensure that citizens are able to access affordable, high-quality and uninterrupted public services. Accordingly, over the period ahead, the department will monitor other departments' implementation of the revised Batho Pele programme, which is underpinned by the pillars of building capacity, developing context-specific standards, fostering compliance, ensuring continual implementation, and ensuring accountability through monitoring and evaluation. The department plans to submit a status report in 2025/26 on all departments' implementation of the programme and evaluate the impact and relevance of this implementation in the two outer years of the MTEF period. For this work, R54.1 million over the medium term is allocated in the *Service Delivery Improvement, Citizen Relations and Public Participation* subprogramme in the *Government Service Access and Improvement* programme.

### ***Developing regulations and reviewing key legislation***

Over the period ahead, the department will continue to focus on developing regulations to enable the full

implementation of the Public Administration Management Act (2014) and Public Service Act (1994). Amendment bills to these acts were adopted by the National Assembly in February 2024 and submitted to the National Council of Provinces the following month. These amendments are likely to come into effect over the medium term and will inform the formulation of additional regulations and other legislative provisions to enhance the basic values and principles governing public administration. To carry out these activities, R39 million over the medium term is allocated to the *Legal Services* subprogramme in the *Administration* programme.

## Programme 2: Human Resource Management and Development

### Programme purpose

Manage, oversee and facilitate human resource planning, management and development in the workplace. Facilitate compliance with minimum norms and standards set by the Minister for Public Service and Administration, in line with the Public Administration Management Act (2014) through the office of standards and compliance.

## Objectives

- Contribute to improving the stability and credibility of the public service over the medium term by:
  - monitoring and reporting on the implementation of the directive on the public service human capital strategy by national and provincial departments
  - monitoring and reporting on the implementation of the professionalisation framework for the public service by national and provincial departments.
- Ensure compliance with the department's legislation and policies by:
  - monitoring and reporting on the implementation of the skills audit methodology for the public service over the medium term
  - developing an early warning system for detecting the public service's noncompliance with public administration norms and standards, as issued by the minister, by March 2027.

## Subprogrammes

- *Management: Human Resource Management and Development* provides administrative support and management to the programme.
- *Office of Standards and Compliance* facilitates compliance with the minimum norms and standards set by the minister, in line with section 16 of the Public Administration Management Act (2014).
- *Human Resource Planning, Employment and Performance Management* manages, develops and monitors the implementation of policies and programmes related to human resource planning, employment practices and employee performance management.
- *Human Resource Development* manages, develops and monitors the implementation of policies and programmes on human resource development.
- *Transformation and Workplace Environment Management* manages, develops and monitors the implementation of policies and programmes on diversity, transformation and workplace environment management.

## Programme 3: Negotiations, Labour Relations and Remuneration Management

### Programme purpose

Manage, oversee and facilitate organisational development, job grading, macro organisation, remuneration, human resource information systems, conditions of service, labour relations and dispute management in the public service. Administrate the implementation of the Government Employees Housing Scheme and the macro organisation of the state, and ensure coordinated collective bargaining.

### Objectives

- Improve the stability of the public service over the medium term by developing and monitoring the implementation of a remuneration policy for the public service.
- Intensify the fight against corruption in the public service over the medium term by:
  - monitoring and reporting on progress made to reduce the number of backlogged disciplinary cases

- monitoring and evaluating the reviewed disciplinary code for the public service
- monitoring and reporting on the implementation of lifestyle audits in the public service.

## Subprogrammes

- *Management: Negotiations, Labour Relations and Remuneration Management* provides administrative support and management to the programme.
- *Negotiations, Labour Relations and Dispute Management* manages, develops and monitors the implementation of policies and programmes in labour relations and dispute management in the public service, and facilitates and manages collective bargaining in the Public Service Coordinating Bargaining Council and the General Public Service Sector Bargaining Council.
- *Remuneration, Employment Conditions and Human Resource Systems* manages, develops and monitors the implementation of policies and practices related to remuneration and employment conditions in the public service. This subprogramme also manages and coordinates data on governance and information systems specifically related to human resources.
- *Macro Benefits and Government Employees Housing Scheme* manages, develops and monitors the implementation of policies and programmes on macro benefits in the public service, administers the housing allowance scheme, provides stakeholder management, and facilitates employee access to affordable housing finance and housing supply (ownership and rental).
- *Organisational Development, Job Grading and Macro Organisation of the State* manages, develops and monitors the implementation of policies and programmes related to organisational design and job evaluation, grading and descriptions; and manages and coordinates processes related to the national macro organisation of the state.
- *Public Administration Ethics, Integrity and Disciplinary Technical Assistance Unit* manages, develops and monitors the implementation of policies, strategies and programmes related to ethics and integrity in the public service, and provides technical assistance and support when required.

## Programme 4: e-Government Services and Information Management

### Programme purpose

Manage, oversee and facilitate ICT governance, e-enablement, ICT infrastructure, information and knowledge management, and innovation in the public service. Coordinate and facilitate ICT stakeholder management.

## Objectives

- Contribute to improving the implementation of administrative policies by:
  - monitoring and reporting on the implementation of the department's ICT policies and management directives on an ongoing basis
  - reporting to the director-general on the digital maturity of public service departments on an ongoing basis
  - issuing a directive on the data governance framework by 2025/26 and thereafter monitoring compliance with the framework.

## Subprogrammes

- Management: e-Government Services and Information Management* provides administrative support and management to the programme.
- e-Enablement and ICT Service Infrastructure Management* manages, develops and monitors the implementation of policies and programmes for e-services and ICT infrastructure.
- Information and Stakeholder Management* manages, develops and monitors the implementation of policies and programmes for information management, data and information archiving, and coordinates and facilitates ICT stakeholder management.
- ICT Governance and Management* manages, develops and monitors the implementation of policies and programmes for ICT enterprise architecture, ICT risk, security standards, business continuity and service management.
- Knowledge Management and Innovation* manages, develops and monitors the implementation of policies and programmes for knowledge management and innovation.

## Programme 5: Government Service Access and Improvement

### Programme purpose

Manage, oversee and facilitate service access, operations management and service delivery improvement in the public service. Coordinate and facilitate citizen relations and public participation programmes.

### Objectives

- Contribute to improving the stability of the public service over the medium term by:
  - monitoring and reporting on the implementation of the business process modernisation programme
  - improving the implementation of the Batho Pele programme by monitoring national and provincial departments' implementation of the revised Batho Pele strategy.
- Promote good governance and improved trust in government and government services over the medium term by:
  - monitoring and reporting on the implementation of the African Peer Review Mechanism's national action plan
  - reviewing and updating the integrated service delivery improvement policy through engagements with stakeholders in the public service.

### Subprogrammes

- Management: Government Service Access and Improvement* provides administrative support and management to the programme.
- Operations Management* manages, develops and monitors the implementation of policies and programmes related to service delivery mechanisms and business process management.

- *Service Delivery Improvement, Citizen Relations and Public Participation* manages and facilitates the development and implementation of social compacts and the complaints management policy, and manages and coordinates citizen relations and public participation programmes.
- *Service Access* manages, develops and monitors the implementation of policies and programmes related to service planning, and manages and coordinates service centres and frontline service delivery programmes and interventions.
- *International Cooperation and Stakeholder Relations* establishes and manages the department's bilateral, multilateral and institutional relations and cooperation programmes with international organisations, including the African Peer Review Mechanism and the open government partnership project.
- *Centre for Public Service Innovation* facilitates transfer payments to the Centre for Public Service Innovation, which seeks to unlock innovation in the public sector and create an enabling environment for improved and innovative service delivery through activities targeted at capacity development.

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

## Department purpose

*Facilitate the unearthing, development and practical implementation of innovative solutions within and throughout the public service.*

## Mandate

In terms of section 3(1)(i) of the Public Service Act (1994), the responsibility for innovation in the public sector is vested in the Minister for Public Service and Administration. The Centre for Public Service Innovation is tasked by the minister to entrench a culture and practice of innovation in the public service.

## Selected performance indicators

Number of knowledge platforms sustained to nurture an enabling environment for innovation in the public sector per year	Public Sector Innovation		10	11	9	9	9	10	10

## Expenditure overview

Over the medium term, the department aims to use innovation to unearth, pilot, test, replicate and offer solutions to service delivery issues. The department's value chain of services requires activities and deliverables aligned with an innovation life cycle. As such, research activities and the subsequent development of creative solutions underpin the department's work as a development partner and demonstrator of innovation. As cutting-edge solutions have the most impact when scaled, the department also invests in providing institutional support and facilitating the replication of inventive solutions unearthed through its various platforms, partnerships and collaborations.

The process of developing innovative solutions involves investigating challenges and finding or creating a prototype, approach, model, service or product for further testing, piloting and replication. Accordingly, in 2025/26, the department plans to manage 6 research and development initiatives, including the development of apps and web-based solutions. These and other related activities will be carried out through an allocation of R22.7 million over the MTEF period in the *Research and Development* subprogramme in the *Public Sector Innovation* programme, which has a total budget of R75.7 million over the period ahead.

A significant portion of the department's budget is dedicated to unearthing existing innovation and maintaining knowledge-sharing platforms. To achieve this, over the next 3 years, the department plans to coordinate or nurture 29 innovation knowledge platforms that share creative approaches, solutions and models across all spheres of government. These activities are allocated R30.9 million over the medium term in the *Enabling Environment and Stakeholder Management* subprogramme in the *Public Sector Innovation* programme.

The department aims to replicate 4 innovative solutions per year over the period ahead to improve service delivery in targeted government sectors. These solutions are expected to be unearthed through the annual public sector innovation awards, among other sources. Institutional support and replication initiatives are carried out in the *Institutional Support and Replication* subprogramme, which is allocated R22 million over the period ahead.

The department's total budget is set to increase at an average annual rate of 4.7 per cent, from R47.9 million in 2024/25 to R55 million in 2027/28. Compensation of employees accounts for an estimated 61.9 per cent (R98.7 million) of the department's projected spending over the MTEF period, increasing at an average annual rate of 6.2 per cent.

## Programme 1: Administration

### Programme purpose

Provide strategic leadership, management and support services to the centre.

## Programme 2: Public Sector Innovation

### Programme purpose

Drive service delivery innovation in the public sector in line with government priorities.

### Objectives

- Contribute to improving the delivery of public services by:
  - developing innovative solutions to address service delivery challenges on an ongoing basis
  - investigating service delivery challenges to identify solutions for possible development, adaptation, piloting and/or replication, in partnership with relevant stakeholders, on an ongoing basis
  - hosting knowledge platforms to unearth, demonstrate, share, encourage and award innovation in the public sector annually.

### Subprogrammes

- Research and Development* establishes the evidence base in support of the programme to inform the selection, development, testing and piloting of potential innovative models and solutions.
- Institutional Support and Replication* facilitates institutional support for, and the demonstration, replication and mainstreaming of, innovative solutions for the public sector.
- Enabling Environment and Stakeholder Management* nurtures and sustains an enabling environment, entrenches a culture and practice of innovation in the public sector through creative platforms and products, and develops and maintains partnerships and stakeholder relations to enhance collaboration.

### Vote purpose

Promote constitutional values and the principles of public administration in the public service.

### Mandate

The Public Service Commission is an independent institution established in terms of chapter 10 of the Constitution. It derives its mandate from sections 195 and 196 of the Constitution, which set out the values and principles governing public administration. The commission is vested with custodial oversight responsibilities for the public service, and monitors, evaluates and investigates public administration practices. It has the power to issue directives on compliance with personnel procedures related to recruitment, transfers, promotions and dismissals.

1. No historical data available.

## Expenditure overview

Over the MTEF period, the Public Service Commission will focus on promoting constitutional values, investigating grievances and recommending appropriate actions, rooting out corruption and promoting professional ethics in the public service, professionalising public administration at the provincial level, and enhancing its oversight of the public service through the enactment of the Public Service Commission Bill. To achieve these objectives, the commission's expenditure is expected to increase at an average annual rate of 4.7 per cent, from R288.5 million in 2024/25 to R331.1 million in 2027/28. Compensation of employees accounts for an estimated 75.4 per cent (R717 million) of total projected spending over the period ahead.

### ***Adhering to constitutional values and principles***

The commission will aim to evaluate the performance of government departments in relation to constitutional values and principles. Evaluating this performance is expected to help improve service delivery and foster a culture of excellence in the public service. Accordingly, the commission plans to hold 30 promotional engagements on constitutional values and principles in each year over the medium term. With the department's support, key stakeholders will implement the national framework for the professionalisation of the public service to provide guidance and instil high standards. To carry out these activities, R70.2 million is allocated over the next 3 years to the *Monitoring and Evaluation* programme.

### ***Investigating grievances and recommending appropriate actions***

The commission will investigate labour or human resource grievances lodged by public servants in their respective departments over the medium term with the aim of settling 80 per cent of them within 150 days by recommending appropriate actions. This is budgeted for in the *Leadership and Management Practices* programme, which is allocated R87 million over the medium term.

### ***Rooting out corruption and promoting professional ethics in the public service***

Over the period ahead, the commission will continue to conduct investigations into complaints received through the national anti-corruption hotline, or through emails, formal writing or of its own accord. These complaints typically relate to, among other things, appointment and procurement irregularities, corruption and public service officials' conduct. The investigations aim to identify shortcomings or wrongdoing and provide redress to citizens through the effective and efficient delivery of public services. The department will, therefore, continue to manage the national anti-corruption hotline and conduct research and advocacy work to promote professional ethics in the public service. These activities will be funded through an allocation of R116.4 million over the MTEF period in the *Integrity and Anti-corruption* programme.

### ***Professionalising provinces***

The *Provincial Coordination* programme will oversee the operations of the commission at the provincial level and address public service-related grievances and complaints received at this level. It will also interact with and reflect on the state of public service and administration in provinces through various forms of assessment and interventions, including strategic engagements, advocacy and promotional initiatives. These activities will be carried out through the *Provincial Coordination* programme, which is allocated R216 million over the medium term.

## Programme 2: Leadership and Management Practices

### Programme purpose

Promote sound public service leadership, human resource management, labour relations and labour practices.

### Objectives

- Improve labour relations in the public service by investigating grievances lodged with the commission, drafting communication on emerging grievance management trends to guide the public service, and conducting awareness campaigns on an ongoing basis.
- Promote effective and efficient leadership and human resource management in the public service by conducting research in these areas on an ongoing basis.

### Subprogrammes

- *Labour Relations Improvement* promotes labour relations and practices through the timely investigation of properly referred grievances and the provision of best practices in the public service.
- *Leadership and Human Resource Reviews* identifies and promotes sound human resource management and leadership practices in the public administration.
- *Programme Management: Leadership and Management Practices* provides overall management services to the programme.

## Programme 3: Monitoring and Evaluation

### Programme purpose

Establish a high standard of service delivery, monitoring and good governance in the public service.

### Objective

- Improve the functionality of the public service by conducting evaluations on an ongoing basis to assess its performance and determine whether the values and principles of the public administration are being upheld.

### Subprogrammes

- Governance Monitoring* provides institutional assessments and programme evaluations that support policy and management decisions.
- Service Delivery and Compliance Evaluations* provides participative evaluations, including evaluations of service delivery models and processes to support policy and management decisions.
- Programme Management: Monitoring and Evaluation* provides overall management services to the programme.

## Programme 4: Integrity and Anti-corruption

### Programme purpose

Undertake public administration investigations, analyse and refer cases of alleged corruption to respective departments for investigation, and scrutinise the financial disclosure forms of senior managers to ensure an integrity-driven public service and administration.

### Objectives

- Improve public administration practices by investigating appointment and procurement irregularities to promote good governance in the public service on an ongoing basis.
- Promote professional ethical conduct over the medium term by scrutinising financial disclosure forms, monitoring the implementation of the commission's recommendations on cases of financial misconduct,

conducting workshops to promote and create awareness of the code of conduct, and managing the national anti-corruption hotline by referring cases to relevant departments for further investigation.

## Subprogrammes

- *Public Administration Investigations* investigates and improves public administration practices, makes recommendations to departments on the promotion of good governance and issues directives on compliance with the Public Service Act (1994).
- *Professional Ethics* promotes ethical conduct among public service officials through the management of the financial disclosure framework and the national anti-corruption hotline, and provides advice on professional and ethical conduct in the public service.
- *Programme Management: Integrity and Anti-corruption* provides overall management services to the programme.

## Programme 5: Provincial Coordination

### Programme purpose

Ensure the effective coordination of operations for the execution of the Public Service Commission's mandate at the provincial level.

### Objective

- Provide support to ensure effective leadership and sound human resources management, labour relations and labour practices in the public service by conducting provincial visits on an ongoing basis.

### Subprogrammes

- Provincial Operations* oversees the operations of the commission at the provincial level.

### Expenditure trends and estimates

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Provide policy formulation for, and coordination, regulation and oversight of, the public works sector in relation to the accommodation, housing, land and infrastructure needs of national departments. Enhance intergovernmental relations by coordinating concurrent public works functions. Lead and direct the implementation of the national expanded public works programme. Promote growth, job creation and transformation in the construction and property industries.

### Mandate

As set out in the Government Immovable Asset Management Act (2007), the Department of Public Works and Infrastructure is mandated to be the custodian and portfolio manager of government's immovable assets. Since the creation of the Property Management Trading Entity in 2015/16, the department's role includes policy formulation, coordination, regulation and oversight related to the provision of accommodation and expert built environment services to client departments at the national level; and, through the entity, the planning, acquisition, management and disposal of immovable assets in the department's custody. The department is further mandated to coordinate and provide strategic leadership in initiatives for the creation of jobs through the implementation of the expanded public works programme. The planning and implementation of public works is constitutionally designated as a concurrent function exercised at the national and provincial levels of government.

### Selected performance indicators

Number of planned state events supported with movable structures per year	Prestige Policy		6	5	5	8	8	8	8

1. No historical data available.

## Expenditure overview

Over the medium term, the department will continue to focus on creating work opportunities by leading and coordinating the expanded public works programme, providing policy and legislative oversight, building state capacity to facilitate skills development and strengthen the skills pipeline, and supporting the sponsors of priority public infrastructure projects.

Expenditure is expected to increase at an average annual rate of 3 per cent, from R7.6 billion in 2024/25 to R8.3 billion in 2027/28. An estimated 82.6 per cent (R19.7 billion) of the department's total budget over the next 3 years is allocated to transfers and subsidies for the operations of its entities, the payment of wages by non-profit organisations for people employed through the expanded public works programme, and for conditional grants to provinces and municipalities for implementing the programme. An estimated 17.2 per cent (R4.2 billion) of spending over the period ahead is allocated to compensation of employees (R2.1 billion) and goods and services (R2.1 billion).

### *Coordinating the expanded public works programme*

The department will continue to lead and coordinate the expanded public works programme, which aims to create labour-intensive work opportunities across the 3 spheres of government. An estimated R6 billion over the medium term is allocated for transfers and subsidies to public bodies (national and provincial departments, municipalities and public entities) to carry out activities as part of the programme. In its efforts to continually improve the programme, the department plans to produce annual monitoring and evaluation reports and impact studies on its implementation over the period ahead. It also plans to provide a targeted 200 public bodies with technical support in the infrastructure, social, environment and culture sectors.

Quantifying verified work opportunities in the expanded public works programme reporting system enhances coherent government initiatives and employability by promoting transparency and accountability, which builds trust among citizens. The system provides essential data for informed policy decisions and effective resource allocation, ensuring that job creation efforts address areas of need, and allows the department to evaluate the programme's overall impact. The system also supports skills development and training by linking work opportunities with broader governmental programmes, creating a holistic approach to providing employment. To improve the employability of the workforce, the department is expected to report on 1 022 631 work opportunities in 2025/26 and up to 1 050 903 work opportunities by 2027/28, and provide feedback on the effectiveness of employment policies.

The *Expanded Public Works Programme* programme is allocated an estimated R7.2 billion over the medium term for all activities related to the expanded public works programme. Of this amount, an estimated R689.1 million is earmarked for compensation of employees for the administration of the expanded public works programme, and an estimated R532.3 million for goods and services, particularly for data capturing and verification, monitoring and evaluation. Upon reviews conducted by National Treasury and the department in 2024/25, the *expanded public works programme integrated grant for provinces* and the *social sector expanded public works programme incentive grant for provinces* were consolidated to form a new grant, the *expanded public works programme integrated grant for provinces*. The purpose of this was to reduce grant fragmentation and enhance administrative and output efficiencies. An estimated R2 billion is allocated to the new grant over the next 3 years.

### Providing policy and legislative oversight

The Intergovernmental Relations Framework Act (2005) and the district development model guide the implementation of public works programmes at all levels of government. The department plays an oversight role in relation to these and other associated legislative and policy directives by managing performance and compliance. It does so by supporting joint programmes across all 3 spheres of government through its provision of coordination and intervention services aimed at improving the coherence and impact of government's service delivery. The department's work in this regard involves regular meetings with committee and executive council members within the sector's governance structures. For the department to carry out its oversight role, R84.4 million is allocated over the period ahead in the *Intergovernmental Relations and Coordination* subprogramme in the *Intergovernmental Coordination* programme.

### Building state capacity to strengthen the skills pipeline

To improve infrastructure delivery in the public works sector, the department plans to increase the productive capacity of built environment graduates over the next 3 years through the department's skills pipeline strategy. This provides technical bursary schemes; opportunities for internships, learnerships, property management training and artisan development; and structured workplace training to expedite professional development and registration. Accordingly, over the medium term, the department plans to support 3 800 beneficiaries participating in skills pipeline intervention programmes. For this purpose, R91.3 million is allocated over the period ahead in the *Professional Services* subprogramme in the *Intergovernmental Coordination* programme.

### Providing support to public infrastructure projects

To expedite investor-friendly infrastructure projects, the department's Infrastructure South Africa division allocates project preparation services to sponsors of priority public projects. The department will continue to support sponsors over the medium term with business planning packaging, pre-feasibility and feasibility studies, technical designs, and legal and regulatory approvals in line with the Infrastructure Development Act (2014), as amended. To prepare these projects, R589.4 million is allocated over the MTEF period in the *Infrastructure Development Coordination* subprogramme in the *Property and Construction Industry Policy and Research* programme.

## Programme 2: Intergovernmental coordination

### Programme purpose

Promote sound sectoral and intergovernmental relations and strategic partnerships. Coordinate with provinces on immovable asset registers, construction and property management, and the reporting of performance information within the public works sector.

## Objectives

- Coordinate the updating of immovable asset registers, the construction and management of state infrastructure, the implementation of the Government Immovable Asset Management Act (2007) and performance reporting on the public works sector's compliance with the act by holding regular meetings and engagements with provinces over the medium term.
- Ensure coordination in the public works sector through the development, implementation and monitoring of the approved sector plan by holding regular meetings over the medium term.
- Coordinate and manage the supply of built environment skills to support state infrastructure delivery by ensuring that 3 800 built environment graduates participate in the department's skills pipeline strategy over the medium term.

## Subprogrammes

- *Monitoring, Evaluation and Reporting* promotes good governance by supporting provinces in strengthening their governance and coordination capabilities.
- *Intergovernmental Relations and Coordination* improves the coordination and alignment of public works sector policies and programmes by providing oversight, intervention and support services to provinces.
- *Professional Services* contributes to the development of competent, skilled and motivated built environment professionals through supported learning interventions and focused experiential learning.

## Programme 3: Expanded Public Works Programme

### Programme purpose

Coordinate the implementation of the expanded public works programme, which aims to create work opportunities and provide training for unskilled, marginalised and unemployed people.

### Objective

- Monitor and evaluate the implementation of public employment programmes over the medium term by reporting on the 3 109 123 work opportunities set to be created by public bodies implementing the expanded public works programme.

### Subprogrammes

- Expanded Public Works Programme: Monitoring and Evaluation* reports and monitors the outputs of the expanded public works programme and evaluates the effect of work opportunities and training for unskilled, marginalised and unemployed people.
- Expanded Public Works Programme: Infrastructure* aims to ensure that publicly funded construction and maintenance infrastructure projects use labour-intensive methods to create work opportunities.
- Expanded Public Works Programme: Operations* facilitates the creation of work opportunities in the environmental, culture, non-state and social sectors.
- Expanded Public Works Programme: Partnership Support* coordinates and supports the national, provincial and municipal programmes of the expanded public works programme, and provides an enabling environment for training, enterprise development and communication across the 4 sectors of the expanded public works programme.
- Expanded Public Works Programme: Public Employment Coordinating Commission* consolidates progress reports on the implementation of public employment programmes such as the expanded public works programme and produces strategic reports for the interministerial committee on public employment programmes.

## Expenditure trends and estimates

## Programme 5: Prestige Policy

### Programme purpose

Provide norms and standards for the prestige accommodation portfolio and meet the protocol responsibilities for state functions.

### Objectives

- Oversee the efficient delivery of identified services to prestige clients over the medium term by:
  - supporting 24 planned state events with movable structures
  - providing movable assets to prestige clients within 120 working days.

### Subprogrammes

- Prestige Accommodation and State Functions* funds activities for the residence of parliamentarians, ministers, deputy ministers, the deputy president and the president.
- Parliamentary Villages Management Board* provides for the transportation and related costs of parliamentarians and officials living in parliamentary villages.

## Entities

### Agrément South Africa

#### Selected performance indicators

**Table 13.16 Agrément South Africa performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Percentage of certification projects managed and finalised within the set timeframe per year	Technical services	Outcome 15: Social cohesion and nation building	59.3% (16/27)	58.8% (10/17)	58.3% (7/12)	95%	97%	97%	97%
Percentage of quality and compliance inspections conducted for certificates in use per year	Technical services		62.7% (178/284)	85.3% (187/219)	56% (116/207)	95%	80%	97%	97%
Number of certificates issued per year	Technical services		15	10	12	14	15	15	15
Number of eco-labels issued per year	Technical services		— <sup>1</sup>	— <sup>1</sup>	0 <sup>2</sup>	10	15	15	15
Percentage of validity reviews (renewals) conducted for valid certificates issued per year	Technical services		— <sup>1</sup>	— <sup>1</sup>	— <sup>1</sup>	92%	70%	90%	95%

1.No historical data available.

2.No achievement due to delays in the appointment of a conformity assessment body to assist in assessing, testing and recommending eco-labels for approval.

## Entity overview

Agrément South Africa was established by the Agrément South Africa Act (2015). Its functions include evaluating the fitness for purpose of non-standardised products or systems used in the construction industry for which a national standard does not exist. As the implementation of the entity's mandate depends on synchronising its work plan with government's national priorities and other national plans, the entity has indirect links with strategic national planning documents. The entity's functioning and operations are guided by the department and legislation and mandates governing the built environment.

Over the medium term, the entity will focus on implementing programmes that promote social cohesion and safer communities. To do this, over the medium term, it plans to issue 45 eco-labelling schemes, conduct annual quality and compliance inspections for certificates in use, certify 45 products and systems through collaborations with various entities, and perform annual market usage analyses to understand the use and reach of the certified products and systems. To achieve these targets, R48 million is allocated over the MTEF period in the regulation and certification services programme and R11.4 million is allocated in the proactive and relevant built environment interventions programme. Combined, these allocations account for an estimated 48.6 per cent of the entity's total budget.

Total expenditure is expected to increase at an average annual rate of 5.4 per cent, from R35.9 million in 2024/25 to R42 million in 2027/28, with compensation of employees accounting for an estimated 69 per cent (R28.9 million) of the entity's budget over the MTEF period. The entity expects to receive 87.4 per cent (R104.2 million) of its revenue over the period ahead through transfers from the department and the remainder through application and annual fees from certificate holders. Revenue is expected to increase in line with spending.

### Entity overview

The Construction Industry Development Board is a schedule 3A public entity established in terms of the Construction Industry Development Board Act (2000). It is mandated to provide strategic leadership to stakeholders in the construction industry to stimulate sustainable growth; oversee the transformation of the construction sector by encouraging and facilitating the participation of historically disadvantaged groups; and establish and promote best practices among public and private sector role players in the construction delivery process. It also aims to ensure the uniform application of policy across all spheres of government; set and uphold ethical standards across the industry; ensure improved procurement and delivery management and equitable procurement practices; and develop systematic methods for monitoring and regulating the performance of the industry and its stakeholders, including the registration of projects and contractors.

Over the medium term, the board will continue to ensure compliance with its prescripts. It plans to provide a contractor register that acts as a procurement tool for targeted enterprises and enables client departments to provide expanded work opportunities to black-owned and black-managed contractors; offer development support to contractors and clients; monitor and evaluate the industry's performance to ensure that it contributes to development; provide knowledge support to its clients; continue fighting fraud and corruption in the construction industry; and strengthen regulatory compliance in the construction sector.

The board implements the best practice project assessment scheme, which is focused on improving capacity and developing small and emerging contractors in the sector. The scheme is expected to generate an estimated R240 million in revenue over the period ahead. These funds will be used to enable the board to implement its developmental strategies, including providing developmental finance. Provincial capacity-building programmes in the infrastructure delivery management system are planned to reach 420 clients at a cost of R120.1 million over the medium term. These programmes seek to provide workplace learning opportunities on construction projects for artisans, technicians and built environment candidates. Over the next 3 years, the board plans to develop at least 6 guidelines and instruction notes to strengthen regulatory compliance in the sector. This work will be carried out in the procurement and development programme, which is allocated R34.9 million over the MTEF period.

Expenditure is expected to increase at an average annual rate of 4.1 per cent, from R307.7 million in 2024/25 to R347 million in 2027/28, with spending on compensation of employees accounting for an estimated 46.7 per cent (R464.6 million) of the entity's budget over the medium term. Transfers from the department account for an estimated 24.6 per cent (R245.5 million) of the board's revenue over the period ahead. The remainder is set to be generated through fees charged for registration and the best practice project assessment scheme, and interest on investments. Revenue is expected to increase in line with spending.

### Entity overview

The Council for the Built Environment is a statutory entity established in terms of the Council for the Built Environment Act (2000). The act mandates the council to promote and protect the interests of the public regarding built environment issues; promote and maintain a sustainable built and natural environment; promote the ongoing development of human resources in the built environment; promote the sound governance of built environment professions; and facilitate participation by built environment professionals in integrated development in the context of national goals. The council also aims to ensure the uniform application of norms and guidelines set by professional councils throughout the built environment; promote appropriate standards of health, safety and environmental protection within the built environment; promote cooperation with government on training issues that affect the sector and the standards of such training; and serve as a forum where built environment professionals can discuss relevant issues. It is an overarching body that coordinates the 6 councils for built environment professions: architecture, engineering, landscape architecture, project and construction management, property valuation and quantity surveying.

One of the council's key interventions is to transform and build partnerships and collaborations, with an emphasis on including women and young graduates in the pipeline. To this end, the board plans to create an educational and professional development pathway that guides individuals from their initial interest in built environment fields through a lifetime of learning and growth, ensuring high standards of knowledge, skill and innovation in the industry. Accordingly, over the medium term, the council plans to continue focusing on coordinating and enabling the built environment skills pipeline. These activities are expected to be carried out in the professional skills and capacity development programme, which is allocated R2.9 million over the medium term. The council plans to support 9 districts per year over the MTEF period by monitoring the implementation of the built environment structured candidacy programme. It intends to focus on districts that are ready and committed to the process of built environment professionalisation.

Expenditure is expected to increase at an average annual rate of 5.7 per cent, from R57.5 million in 2024/25 to R67.9 million in 2027/28. The council is set to derive 86.4 per cent (R167.1 million) of its projected revenue over the next 3 years through transfers from the department and the remainder through levies collected from built environment councils. Revenue is expected to increase in line with expenditure.

## Independent Development Trust

### Selected performance indicators

**Table 13.28 Independent Development Trust performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Value of programme spend	Programme management	Outcome 4: Increased infrastructure investment and job creation	R2.12bn	R2.3bn	R4.8bn	R4.8bn	R6.3bn	R7.5bn	R8.6bn
Number of construction work opportunities created per year through the trust's portfolio	Programme management		3 950	3 187	3 100	4 367	4 752	1 824	2 061
Number of expanded public works opportunities (non-state sector) created per year	Programme management		100 212	109 871	64 000	64 000	43 000	43 000	43 000

### Entity overview

The Independent Development Trust was established in 1990 as a grant-making institution for the development of disadvantaged communities in South Africa, particularly in rural areas, and is listed as a schedule 2 public entity in terms of the Public Finance Management Act (1999). The trust is a state development agency that implements projects commissioned by national and provincial government that involve social infrastructure programmes as the basis for accessing communities and developing assets within them.

Over the medium term, the trust will focus on empowering poor communities by providing project management services for delivering and refurbishing social infrastructure such as schools, clinics and community centres, mainly in rural areas. In doing so, it expects to create 43 000 work opportunities in each year over the period

ahead, mainly through the expanded public works programme, and a total of 8 637 work opportunities through other programme portfolios. These activities will be carried out in the programme management programme, which is allocated R681.6 million over the medium term.

Expenditure is expected to increase at an average annual rate of 7.4 per cent, from R529.2 million in 2024/25 to R655.3 million in 2027/28, with compensation of employees accounting for an estimated 48.8 per cent (R935.3 million) of total spending over period ahead. The bulk of the trust's revenue, amounting to R2 billion over the medium term, is generated through management fees charged to the Department of Public Works and Infrastructure and other client departments. Revenue is expected to increase at an average annual rate of 12 per cent, from R520.2 million in 2024/25 to R731.5 million in 2027/28.

## Entity overview

The Property Management Trading Entity was established following a decision in 2006 to devolve accommodation costs from the Department of Public Works and Infrastructure to client departments. The entity performs immovable asset management functions on behalf of the department, including the provision of residential and office accommodation for user departments at the national government level; and acquires, manages, operates, maintains and disposes of immovable assets in the department's custody. The entity was established to apply professional business approaches in managing and optimising the state's immovable asset portfolio for maximum return. On a cost recovery basis, the entity finances the purchase, construction, refurbishment and maintenance of nationally owned government properties; and manages the leases of privately owned properties accommodating national departments.

Over the medium term, the entity will continue to focus on developing precincts to support efficient and integrated government planning by grouping departments that provide similar services and refurbishing and maintaining government buildings in its portfolio. An estimated R54.1 billion is allocated for this purpose over the medium term, which includes R3.9 billion for ad hoc building maintenance. The entity plans to carry out refurbishment, repair and capital projects for 24 departments, including correctional centres, police stations, courts and office buildings, at a projected cost of R11 billion over the medium term.

Expenditure is expected to increase at an average annual rate of 8.1 per cent, from R13 billion in 2024/25 to R16.4 billion in 2027/28. Spending on goods and services accounts for an estimated 71.8 per cent (R33.4 billion) of the entity's budget over the medium term, with the bulk of this allocated to operating leases. Transfers from the department account for a projected 24.2 per cent (R12.7 billion) of the entity's revenue over the period ahead. Revenue is expected to increase at an average annual rate of 6.6 per cent, from R15.7 billion in 2024/25 to R19.1 billion in 2027/28. The entity's baseline is reduced by an estimated R937.7 million over the medium term to provide for the Department of Forestry, Fisheries and the Environment's facilitation of border fencing installations and capital requirements for the Border Management Authority.

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

## Vote purpose

Lead and partner in the production of statistics, in line with internationally recognised principles and standards, to inform users about socioeconomic dynamics for evidence-based decisions.

## Mandate

Statistics South Africa is a national department accountable to the Minister in the Presidency. The department's activities are regulated by the Statistics Act (1999), which mandates it to advance the production, dissemination, use and coordination of official and other statistics to help organs of state, businesses, other organisations and the public in planning, monitoring, policy development and decision-making. The act also requires that the department coordinates statistical production among organs of state in line with the purpose of official statistics and statistical principles.

## Selected performance indicators

**Table 14.1 Performance indicators by programme and related outcome**

Indicator	Programme	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of GDP estimate releases per year	Economic Statistics	Outcome 18: A capable and professional public service	4	4	4	4	4	4	4
Number of releases on industry and trade statistics per year	Economic Statistics		150	150	150	150	150	150	150
Number of releases on financial statistics per year	Economic Statistics		18	16	16	16	16	16	16
Number of price index releases per year	Economic Statistics		48	48	48	48	60	60	60
Number of releases on labour market dynamics per year	Population and Social Statistics		8	8	8	8	8	8	8
Number of releases on living circumstances, service delivery and poverty per year	Population and Social Statistics		4	4	4	4	4	4	4
Number of releases on the changing profile of the population per year	Population and Social Statistics		16	15	16	16	16	16	16

## Expenditure overview

Over the medium term, the department will focus on protecting and sustaining the quality of statistical information, implementing the continuous population survey, modernising its business operating model and strengthening statistical reform. To fund an average of 2 504 departmental posts over the next 3 years, spending on compensation of employees is estimated to constitute 65.7 per cent (R5.7 billion) of its total budget of R8.7 billion. Total expenditure is set to increase at an average annual rate of 4.7 per cent, from R2.6 billion in 2024/25 to R3 billion in 2027/28, mainly due to inflationary adjustments.

### ***Protecting the quality of statistical information***

The department publishes official statistics as a reliable evidence base for policy and decision-making in line with the National Development Plan, the medium-term development plan and other policy frameworks. To this end, it plans to release at least 250 publications per year over the period ahead related to socioeconomic statistics, including those on GDP, price indexes and labour markets. Costs related to this work are spread across the *Economic Statistics* and *Population and Social Statistics* programmes, which receive a combined R1.9 billion over the medium term.

### ***Implementing the continuous population survey***

The continuous population survey was reconceptualised and redesigned in 2024/25 to integrate existing household surveys within the department's survey programme, including the general household survey, the income and expenditure survey and the living conditions survey. The aim of this is to create a single, continuous data collection vehicle to produce frequent lower-level data. Whereas the existing surveys publish statistical information periodically at the provincial, not district level, the continuous population survey uses a modular approach that allows new topics to enter the survey at different intervals, thereby better positioning the department to respond to emerging needs. The department will disseminate different types of statistics that emerge through the survey as and when data becomes available. Updating the frame and piloting methodologies for data collection are scheduled for 2025/26 and 2026/27, and data collection is planned for 2027/28. To fund activities related to the continuous population survey, R577.8 million over the medium term is allocated in the *Poverty and Inequality Statistics* subprogramme in the *Population and Social Statistics* programme.

### ***Modernising the business operating model***

The department is in the process of modernising its business operating model by integrating and automating the department's systems in the areas of statistical production and governance. The department began its modernisation drive by introducing digital data collection in household surveys, including the population census. Over the medium term, it plans to expand this functionality to economic surveys, the continuous population survey and the business register. In response to the increasing demand for data and statistics, the department is also in the process of establishing an interconnected statistical system that facilitates data acquisition, processing, integration, analysis and visualisation. This project will extend beyond the medium term. An estimated R198.9 million is allocated over the MTEF period to the *Business Modernisation* subprogramme in the *Statistical Support and Informatics* programme to carry out these activities.

### ***Strengthening statistical reform***

To drive statistical reform, amendments to the Statistics Act (1999) were approved by the President in 2024 and will be implemented over the medium term. Among other things, the amendments make provision for developing and implementing a national statistics system and strategy for the development of statistics and enhancing coordination and collaboration among producers of statistics. In preparation for implementing these stipulations and to create awareness among organs of state on its implications, the department's communication and advocacy strategy is expected to be completed in 2025/26. These and other activities concerning statistical reform are funded through the *South African National Statistics System* programme, which is allocated R152.3 million over the medium term.

## Programme 2: Economic Statistics

### Programme purpose

Produce economic statistics to inform evidence-based economic development.

### Objectives

- Produce economic indicators to inform evidence-based planning, monitoring, evaluation and decision-making for use by the public and private sectors by:
  - publishing monthly, quarterly, annual and periodic statistical releases on various industries in the private and public sectors
  - publishing monthly statistical releases on a range of price indexes
  - publishing quarterly and annual estimates of GDP
  - improving the measurement of economic indicators through the application of internationally recognised standards and practices on an ongoing basis.

### Subprogrammes

- Programme Management for Economic Statistics* provides strategic direction and leadership to the programme.
- Business Cycle Indicators* provides information on turnover and volumes in various industries through the publication of monthly, quarterly and annual releases.
- Structural Industry Statistics* publishes periodic statistical information on the income and expenditure structure of industries, as well as non-financial variables.
- Price Statistics* provides information on inflation by compiling the consumer price index and various producer price indexes.
- Private Sector Finance Statistics* tracks the financial performance of the private sector.
- Government Finance Statistics* tracks public sector spending.
- National Accounts* produces GDP data and other integrative statistical products.

### Expenditure trends and estimates

## Programme 3: Population and Social Statistics

### Programme purpose

Produce population and social statistics to inform evidence-based socioeconomic development.

### Objectives

- Sustain national population and social indicators to inform evidence-based planning, monitoring and decision-making for use by the public and private sectors by:
  - publishing quarterly and annual statistical information on the labour market, and on employment and earnings in the formal and informal sectors
  - publishing monthly and annual statistical information on vital registrations based on administrative sources

- publishing annual and periodic statistical information on poverty levels, living conditions, service delivery, population dynamics and demographic trends
- improving the measurement of social indicators through the application of internationally recognised standards and practices on an ongoing basis.

## Subprogrammes

- *Programme Management for Population and Social Statistics* provides strategic direction and leadership to the programme.
- *Demographic and Population Statistics* publishes population statistics, demographic trends and mid-year population estimates collected through population censuses, surveys and other administrative sources.
- *Health and Vital Statistics* publishes statistics on births, deaths, marriages, divorces, tourism and migration based on administrative records.
- *Social Statistics* provides information on living conditions, domestic tourism and crime collected through household surveys.
- *Labour Statistics* provides information on employment levels in the formal non-agricultural sector and labour market trends in South Africa.
- *Poverty and Inequality Statistics* provides information on poverty levels and income and expenditure trends in South Africa.

## Expenditure trends and estimates

## Programme 4: Methodology and Statistical Infrastructure

### Programme purpose

Develop standards, statistical frames and methodologies, and conduct statistical research.

### Objectives

- Improve the quality and methodological soundness of statistical information by researching, developing, applying and reviewing statistical methods, standards, classifications and procedures in the statistical value chain annually.
- Monitor and evaluate methodological compliance of statistical operations by conducting independent evaluations on statistical practices annually.
- Ensure complete and accurate sampling frames to enhance the quality of economic and social statistics by maintaining and updating the business and geographic information frames annually.

### Subprogrammes

- *Programme Management for Methodology and Statistical Infrastructure* provides strategic direction and leadership to the programme.
- *Statistical Methods* provides technical expertise and advice on statistical methodologies and practices for producing official statistics.
- *Statistical Standards* develops standards, classifications and definitions for surveys undertaken by the department.
- *Business Register* maintains and improves the sampling frame for economic statistics.
- *Geography* maintains and improves the geographic information frame for household surveys and censuses.
- *Survey Monitoring and Evaluation* monitors the quality of statistical operations for surveys and censuses and conducts independent evaluations.
- *Innovation and Research* conducts statistical research and innovates statistical methods, practices and processes for improved efficiency and agility.

## Programme 5: Statistical Support and Informatics

### Programme purpose

Enable statistical production through technology and promote the use of statistics.

### Objectives

- Modernise business processes by building an enterprise architecture and applying emerging technologies for data collection, processing and the dissemination of statistical information over the medium term.
- Enable the department's production of official statistics by providing a technology infrastructure that is reliable, sustainable and cost effective over the medium term.
- Increase awareness and the use of official statistics by government and the public on an ongoing basis by:
  - reaching out to stakeholders and responding to user enquiries
  - educating users
  - improving the accessibility and ease of use of statistical information.
- Manage external and internal communications on statistical matters by issuing daily, weekly and monthly information updates through the media on an ongoing basis.

### Subprogrammes

- *Programme Management for Statistical Support and Informatics* provides strategic direction and leadership to the programme.
- *Advocacy and Dissemination* manages internal and external communication and increases the use of official statistics through stakeholder engagement and the dissemination of official statistics through various platforms.
- *Business Modernisation* improves data and information management across the department by modernising the way business is conducted and supported by technology.
- *Publication Services* provides editing, publishing and distribution services to survey areas.
- *Information, Communication and Technology* provides technology infrastructure to the department and supports data management across statistical series.
- *Analytical Studies* provides integrated statistical advice and support to policy planners and development practitioners and participates in research and innovation on key development themes.

## Programme 6: Statistical Operations and Provincial Coordination

### Programme purpose

Collect and process data, and interact with stakeholders and users at the provincial and local levels.

### Objectives

- Provide integrated data collection services and disseminate quality statistics to provincial and local stakeholders and the public by ensuring an average annual response rate of 85 per cent.
- Expand the statistical information base for use by government, the private sector and the public by conducting a population census every 10 years and large-scale population surveys between censuses.

- Ensure the efficiency and effectiveness of survey operations conducted by the department by coordinating household survey operations, with an average annual response rate of 85 per cent.
- Improve the quality and timeliness of the editing and processing of statistical data by administering a common data processing platform for censuses, household surveys, administrative records and ad hoc survey data over the medium term.

## Subprogrammes

- *Programme Management for Statistical Operations and Provincial Coordination* provides strategic direction and leadership to the programme.
- *Provincial and District Offices* provides integrated data collection and dissemination services and promotes the use and coordination of official statistics to provincial and local stakeholders.
- *Data Operations* manages the editing and processing of census, survey and administrative data.
- *Household Survey and Censuses* conducts periodic population censuses or large-scale population surveys and coordinates and integrates collection activities across household surveys.

## Programme 7: South African National Statistics System

### Programme purpose

Develop and coordinate the national statistics system in South Africa.

### Objectives

- Ensure national statistics are produced based on common statistical standards and principles by providing statistical support and advice and certifying statistics as official annually.
- Ensure the sharing of statistical information by establishing and providing mechanisms, platforms and criteria for the sharing of data annually.
- Drive statistical reporting on behalf of the country by coordinating the compilation of statistical reports annually in line with the integrated indicator framework.

### Subprogrammes

- *Programme Management for the South African National Statistics System* provides strategic direction and leadership to the programme.
- *Economic Subsystem* coordinates and facilitates the production of economic and environmental statistics in the national statistical system and provides statistical support and advice to producers of official statistics.

- *Social Subsystem* coordinates and facilitates the production of population and social statistics in the national statistical system and provides statistical support and advice to producers of official statistics.
- *Independent Quality Assessment* conducts independent statistical reviews to assess the quality of statistical information in line with the South African statistical quality assessment framework to certify statistics as official.
- *Statistical Reporting* coordinates the reporting of statistics to fulfil the country's statistical reporting obligations.
- *Data and Information Management* coordinates and manages the transfer and sharing of data among organisations in the national statistics system.

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

## Vote purpose

Coordinate traditional affairs across government through the development of appropriate policies, norms, standards, systems and regulatory frameworks; and promote culture, heritage and social cohesion.

## Mandate

The Department of Traditional Affairs is mandated to support the maintenance of stable and cohesive traditional communities and to oversee matters related to traditional leadership. The 2003 White Paper on Traditional Leadership and Governance sets out the national framework, norms and standards that define the role of traditional leadership institutions in South Africa. The department seeks to support and restore the integrity and legitimacy of traditional leadership in line with African indigenous laws and customs, subject to constitutional law.

The department's mandate is also informed by the:

- Commission for the Promotion and Protection of the Rights of Culture, Religious and Linguistic Communities Act (2002)
- Traditional and Khoi-San Leadership Act (2019)
- Customary Initiation Act (2021).

## Selected performance indicators

## Expenditure overview

Over the medium term, the department will focus on transforming traditional leadership institutions, and promoting economic development in traditional communities and providing adequate resources to them.

The department's total expenditure is expected to increase at an average annual rate of 4.6 per cent, from R187.3 million in 2024/25 to R214.2 million in 2027/28. Spending on compensation of employees accounts for an estimated 54.2 per cent (R333.7 million) of total expenditure, increasing at an average annual rate of 4.7 per cent, from R101.2 million in 2024/25 to R116.2 million in 2027/28. An estimated 24.5 per cent (R149.8 million) of total spending is earmarked for transfers and subsidies, mainly for the operations of the Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities.

### *Transforming institutions of traditional leadership*

In line with the Traditional and Khoi-San Leadership Act (2019), the department plans to document customary laws of succession and genealogies for kingships or queenships over the period ahead to guard against traditional leadership disputes and claims. As such, it plans to ensure that all 13 kingships or queenships and principal traditional leaders' royal families have documented and updated customary laws of succession and genealogies by 2027/28.

The department recognises its pivotal role in curbing fatalities associated with the practice of customary initiation and creating a safe and regulated environment for initiates. As such, the department plans to monitor 8 provincial initiation coordinating committees per year over the next 3 years through regular inspections or visits to customary initiation schools to ensure compliance with the Customary Initiation Act (2021).

These activities are carried out through the *Research, Policy and Legislation* programme, which is allocated R97.5 million over the next 3 years, constituting 15.9 per cent of the department's total budget.

### *Facilitating economic development and providing adequate resources*

To expand socioeconomic opportunities and activities in traditional communities, the department plans to monitor 10 traditional mining communities per year over the MTEF period that will participate in the creation of economically self-sustainable traditional communities. Similarly, through the eastern seaboard development initiative, the department aims to coordinate the participation over the next 3 years of 4 local houses of traditional and Khoi-San leaders in developmental opportunities across 4 regions in KwaZulu-Natal and Eastern Cape (OR Tambo, Alfred Nzo, Ugu and Harry Gwala). The overarching goal of the initiative is to enhance the provinces' economies, improve infrastructure and contribute to social development. As the department is responsible for providing adequate resources to traditional leadership institutions for them to carry out their day-to-day operations effectively, it will provide 8 houses of traditional and Khoi-San leaders per year with tools of trade – such as computers, data and cellphones – over the medium term.

These activities will be carried out through the *Institutional Support and Coordination* programme, which is allocated R298.3 million over the period ahead. The programme's budget is expected to increase at an average annual rate of 4.2 per cent, from R92 million in 2024/25 to R104 million in 2027/28.

## Programme 2: Research, Policy and Legislation

### Programme purpose

Develop, review, coordinate and monitor the implementation of traditional affairs policies, norms and standards, and support traditional affairs entities to restore the integrity and dignity of traditional leadership.

### Objectives

- Support the transformation of institutions of traditional leadership by implementing and monitoring relevant policies and legislation on an ongoing basis.
- Implement national initiatives to promote the culture and heritage of traditional leadership and communities by conducting social cohesion programmes on an ongoing basis.
- Enhance information management for faith structures, traditional leadership institutions and communities through research, and develop and maintain a traditional leadership database on an ongoing basis.
- Create capacity for institutions of traditional leadership by monitoring policies and regulations governing the sector on an ongoing basis to ensure compliance with the Traditional and Khoi-San Leadership Act (2019).

### Subprogrammes

- *Management* provides strategic oversight for the programme.
- *Policy and Legislation* develops national policies and legislation for the traditional affairs sector while monitoring, supporting and facilitating their implementation. This subprogramme also provides secretariat, administrative and financial support to the national initiation oversight committee.
- *Research and Information Management* conducts research on policy and customary law to inform policies and legislation on national traditional affairs; administers applications and disputes for the recognition of traditional and Khoi-San leadership; and manages information on traditional and Khoi-San leaders, institutions and communities.
- *Commission on Khoi-San Matters* ensures the receipt, research and investigation of applications for the recognition of Khoi-San communities, branches, senior Khoi-San leaders and branch heads, and makes recommendations to the minister for decisions.

## Programme 3: Institutional Support and Coordination

### Programme purpose

Provide comprehensive support to the institutions of traditional leadership, including Khoi-San leadership structures, to coordinate traditional affairs across all three spheres of government.

### Objectives

- Facilitate partnerships and collaborative relations by increasing the number of functional structures of traditional leadership by March 2026.
- Implement the Traditional and Khoi-San Leadership Act (2019) and associated regulations aimed at transforming the sector on an ongoing basis.
- Promote social cohesion by training local houses of traditional leadership on the implementation of socioeconomic development programmes by March 2026.
- Promote socioeconomic development within traditional communities by participating in municipal integrated development planning processes on an ongoing basis.

### Subprogrammes

- *Management* provides strategic oversight for the programme.

- *Institutional Development and Capacity Building* ensures that traditional communities are empowered by reviewing and developing national support programmes for these communities and their governance structures.
- *Intergovernmental Relations and Partnership* promotes and integrates the role of traditional leaders and their institutions in the South African governance system by establishing relationships with other structures across the 3 spheres of government.
- *National House of Traditional Leaders* enhances cooperation between government and traditional leadership institutions, and advises government on programmes, policies and legislation that affect traditional communities.
- *Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities* makes transfers to the Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Rights of Communities.

Number of public awareness campaigns, capacity-building workshops, roadshows and exhibitions on cultural, religious and linguistic rights of communities conducted per year	Public education and information		25	30	30	35	60	60	60

#### Entity overview

The Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities was established in terms of section 181(1)(c) of the Constitution to promote and protect the rights of cultural, religious and linguistic communities, and to strengthen constitutional democracy. The commission's core functions include research, conflict resolution and public education on the rights of cultural, religious and linguistic communities.

The commission will continue to focus on community engagements by hosting at least 180 events over the period ahead to create awareness about the rights of cultural, religious and linguistic communities. These include seminars, educational awareness campaigns, dialogues, conferences, roadshows, workshops and colloquiums. These engagements will enhance its presence at the local level to improve access to its services. The commission also aims to produce 12 research reports on the diminished heritage of communities and continue investigations into cases of infringement on the cultural, religious and linguistic rights of communities. In addition, the commission plans to handle 80 per cent of all complaints and requests received over the MTEF period to facilitate conflict resolution among communities in disputes arising from cultural, religious or linguistic differences.

Expenditure is projected to increase at an average annual rate of 4.9 per cent, from R46.6 million in 2024/25 to R53.8 million in 2027/28. Compensation of employees accounts for 66.9 per cent (R101.5 million) of this spending over the period ahead. The commission expects to receive 97.1 per cent (R149.8 million) of its revenue over the next 3 years through transfers from the department. Revenue is expected to increase in line with expenditure.

## Vote purpose

*Provide quality basic education for all, and lead the establishment and development of a South African schooling system for the 21st century.*

## Mandate

The mandate of the Department of Basic Education is to monitor the standards of the provision, delivery and performance of education across South Africa annually or at other specified intervals, with the objective of assessing compliance with the provisions of the Constitution and national education policy.

The department derives its mandate from the:

- National Education Policy Act (1996), which inscribes into law the policies and legislative and monitoring responsibilities of the Minister of Basic Education, and formal relations between national and provincial authorities
- South African Schools Act (1996), which promotes access to education, supports quality and democratic governance in the schooling system, and makes schooling compulsory for children aged 7 to 15 to ensure that all learners have access to quality education without discrimination
- Employment of Educators Act (1998), which regulates the professional, moral and ethical responsibilities of educators, and the competency requirements for teachers.

## Selected performance indicators

**Table 16.1 Performance indicators by programme and related outcome**

Indicator	Programme	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Percentage of public schools provided with home language workbooks for learners in grades 1 to 6 per year, after having placed an order	Curriculum Policy, Support and Monitoring	Outcome 13: Improved education outcomes and skills	100% (17 185)	100% (16 821)	100% (16 691)	100%	100%	100%	100%
Percentage of public schools provided with mathematics workbooks for learners in grades 1 to 9 per year, after having placed an order	Curriculum Policy, Support and Monitoring		100% (22 858)	100% (22 631)	100% (22 582)	100%	100%	100%	100%

1. The school infrastructure backlogs grant will be incorporated into the education infrastructure grant after 2025/26.

2. No historical data available.

## Expenditure overview

Over the medium term, the department will focus on: accelerating the delivery of and improving school infrastructure; enhancing teaching and learning by expanding mother tongue-based bilingual education and providing quality learning materials; equipping new and serving teachers to provide learners with skills and competencies for a changing world; improving the quality and reach of early childhood development (ECD) services; providing nutritious meals for learners through the national school nutrition programme; and supporting the public employment programme in basic education.

Expenditure is set to increase at an average annual rate of 4 per cent, from R32.6 billion in 2024/25 to R36.7 billion in 2027/28. Cabinet has approved additional funds for cost-of-living salary adjustments amounting to R51.8 million over the MTEF period (R16.3 million in 2025/26, R17.3 million in 2026/27 and R18.2 million in 2027/28), as well as R410 million in 2025/26 to train participants in the teacher assistants programme and oversight costs related to it. Transfers and subsidies account for 87.7 per cent (R95.8 billion) of the department's budget. These transfers are projected to increase at an average annual rate of 5.8 per cent, from R28 billion in 2024/25 to R33.1 billion in 2027/28.

An amount of R20 million is set aside for G20 meetings in 2025/26 as part of South Africa's presidency of the group, which runs until 30 November 2025. This funding will cover the ministerial meeting and technical preparatory meetings on the group's education priorities: quality foundational learning, mutual recognition of qualifications in a global context and professional development for education in a changing world.

### Improving school infrastructure

The department provides adequate and appropriate physical infrastructure at public schools through the *school infrastructure backlogs grant* and the *education infrastructure grant*. These grants are funded through the *Planning, Information and Assessment* programme and combined, account for 47.2 per cent (R51 billion) of the department's total budget over the MTEF period.

The *education infrastructure grant* is allocated R48.9 billion over the MTEF period as co-funding for provincial

education infrastructure programmes. This includes the construction, maintenance and upgrading of new and existing infrastructure. An additional R2.3 billion is allocated to the grant (R1 billion in 2025/26 and R1.3 billion in 2026/27) for the rapid schools build programme in Western Cape, funded through the budget facility for infrastructure.

Funds from the *school infrastructure backlogs grant* are intended to eradicate and replace inappropriate school infrastructure, provide additional classrooms to alleviate overcrowding and provide basic services such as water and sanitation. To this end, R2.1 billion is allocated to the grant over the MTEF period to build 30 additional classrooms and provide safe sanitation to 50 schools. These projects are expected to be completed in 2025/26, after which the *school infrastructure backlogs grant* will be incorporated into the *education infrastructure grant*. This is intended to allow provinces to address remaining backlogs and for the department to focus on the planning, oversight and support of infrastructure delivery by provinces.

### ***Enhancing teaching and learning***

To improve teaching and learning, the department will introduce and incrementally expand a mother tongue-based bilingual education strategy, starting with grade 4 from 2026. Part of the strategy entails training teachers in bilingual and mother tongue teaching and assessment methods and providing support materials to allow learners to access mathematics, science and technology instruction in their home languages alongside English. To roll out the strategy, R57 million is allocated over the medium term in the *Curriculum Policy, Support and Monitoring* programme. Teaching and learning are also supported through printing and delivering mathematics and literacy workbooks for grades R to 9 to a targeted 9 million learners in public schools each year. To achieve this, R4 billion is allocated over the MTEF period in the *Curriculum Policy, Support and Monitoring* programme.

### ***Providing skills and competencies for a changing world***

The Funza Lushaka bursary programme provides bursaries to prospective teachers to address critical educator shortages in priority subject areas such as inclusive education, mathematics, coding, robotics, science and technology. Funding of R4 billion over the medium term in the *Teachers, Education Human Resources and Institutional Development* programme to provide a targeted 29 831 bursaries. The National Student Financial Aid Scheme manages the bursary scheme.

### ***Improving ECD services***

The *early childhood development grant* is allocated R6.3 billion over the medium term to supplement ongoing ECD initiatives in provinces, such as providing subsidies for children accessing ECD services. An additional R210 million is allocated to the grant over the same period for infrastructure support, including the construction of low-cost ECD centres, to ECD providers.

### ***Providing nutritious meals for learners***

The department contributes to eliminating poverty and supporting food security through providing nutritious meals to learners. With funds from the *national school nutrition programme grant*, the department plans to provide meals to more than 9 million learners in 19 800 schools in each year over the next 3 years. To this end, the *national school nutrition programme grant* is allocated R32.4 billion over the MTEF period in the *Educational Enrichment Services* programme.

### ***Supporting the public employment programme in basic education***

An additional R10 million is allocated for the management and oversight of the teacher assistants programme in basic education, and R400 million for the various training initiatives for the education and general assistants employed in the programme in 2025/26. The funds for the stipends for the assistants are made available through the provincial equitable share and the Industrial Development Corporation.

## Programme 2: Curriculum Policy, Support and Monitoring

### Programme purpose

Develop curriculum and assessment policies, and monitor and support their implementation.

### Objectives

- Increase the number of learners who complete grade 12 by rolling out the Second Chance programme for learners who failed to meet the national senior certificate and amended senior certificate requirements annually.
- Improve the learning and teaching of critical foundational skills by developing, printing and distributing 2 volumes of workbooks for grade R; grades 1 to 6 literacy/languages; grades 1 to 3 life skills (quintile 1 to quintile 3); grades 1 to 9 numeracy/mathematics; and grades 1 to 6 English first additional language to all learners in public schools annually.
- Improve the reading proficiency levels of learners in the foundation phase in all underperforming rural and township schools by using the early grade reading assessment toolkit to assess reading levels by 2025/26.

This includes learners' phonic knowledge, word recognition, and fluency and comprehension skills in the early grades.

- Fast-track the rollout and implementation of ICT in schools by providing teacher training, ICT devices, digital content, software, connectivity, IT support to schools, and online learner and teacher support materials annually.
- Increase learner participation and success rates in mathematics, science and technology by providing ICT equipment, machinery, subject-specific resources and teacher development to schools each year over the medium term by:
  - supplying 1 256 laboratories with apparatus and consumables, including coding and robotics kits, for mathematics, science and technology subjects in accordance with minimum specifications
  - providing subject-specific computer hardware and related software in accordance with the minimum specifications prescribed by the curriculum assessment policy statements to 485 schools, including coding and robotics pilot schools
  - providing workshop tools, machinery, equipment and consumables for technology subjects to 232 schools offering technical subjects (including pilot schools for the vocationally oriented curriculum) and schools offering agricultural subjects
  - registering 50 000 learners for participation in mathematics, science and technology Olympiads, fairs or expos
  - providing structured training and orientation for 1 500 teachers and subject advisers in content and teaching methodologies on curriculum assessment policy statements for electrical, civil and mechanical technology, technical mathematics and technical sciences
  - providing targeted and structured training for 1 000 teachers and subject advisers in teaching methodologies and subject content for mathematics; physical, life, natural or agricultural sciences; technology; computer applications technology; IT; agricultural management; and technology subjects.

## Subprogrammes

- *Programme Management: Curriculum Policy, Support and Monitoring* manages delegated administrative and financial responsibilities and coordinates all monitoring and evaluation functions in the programme.
- *Curriculum Implementation and Monitoring* supports and monitors the implementation of the national strategy for learner attainment to monitor the quality of teaching and improve the quality of mathematics, science, technology and languages in all grades in public schools.
- *Curriculum and Quality Enhancement Programmes* supports programmes that enhance curriculum outcomes in the basic education system, and increases participation and success in mathematics, science and technology through structured programmes.
- *Early Childhood Development* ensures the universal availability and adequate quality of, and equitable access to, inclusive learning opportunities for children from birth to schoolgoing age through curriculum development, and the delivery, funding, regulation, registration, quality monitoring, improvement and evaluation of ECD programmes.

## Programme 3: Teachers, Education Human Resources and Institutional Development

### Programme purpose

Promote quality teaching and institutional performance through the effective supply, development and use of human resources.

### Objectives

- Ensure an adequate supply of qualified teachers by securing 1 000 posts for Funza Lushaka bursary holders, by June of the year after qualifying, in each year over the medium term.
- Improve the quality of teaching and learning through ensuring an adequate supply of young and qualified teachers by awarding 29 831 Funza Lushaka bursaries to prospective teachers over the medium term.
- Improve the quality of teaching and learning by monitoring and supporting the implementation of the policy on educator post provisioning in all provincial education departments annually.
- Strengthen accountability by monitoring and supporting the implementation of educator performance management systems and school evaluations annually.

### Subprogrammes

- *Programme Management: Teachers, Education Human Resources and Institutional Development* manages administrative and financial responsibilities and coordinates all monitoring and evaluation functions in the programme.
- *Education Human Resources Management* plans, monitors and provides for education human resources; and oversees and strengthens educator performance management systems, school evaluations, education labour relations and conditions of service.
- *Education Human Resources Development* oversees and translates the integrated strategic planning framework for teacher education and development into a range of teacher training programmes, collaborative professional development activities and agreements with partners and relevant service providers. This subprogramme also coordinates activities with the National Institute for Curriculum and Professional Development to promote best practice in classroom teaching and teacher development.
- *Curriculum and Professional Development Unit* manages and develops an innovative and effective system for teacher development and curriculum implementation. This entails the creation of teacher development platforms, and the evaluation and impact assessment of testing tools for determining teacher needs in content and pedagogical knowledge.

## Programme 4: Planning, Information and Assessment

### Programme purpose

Promote quality and effective service delivery in the basic education system through planning, implementation and assessment.

### Objectives

- Improve the delivery of school infrastructure over the medium term by providing oversight and support to provinces through quarterly reporting on schools' furniture needs, the delivery of furniture to schools, the national education infrastructure management system, and the *education infrastructure grant*.
- Contribute to enhanced teaching and learning by improving and upgrading infrastructure through the *school infrastructure backlogs grant* over the MTEF period by providing:
  - sanitation facilities to 50 schools
  - 30 classrooms, including upgrading existing classrooms.
- Track improvements in the quality of teaching and learning by providing standardised national assessments for grades 3, 6 and 9 learners, and administering credible public examinations for grade 12 learners each year over the medium term.
- Strengthen the capacity of district offices on an ongoing basis to support schools through quarterly provincial visits that monitor, evaluate and make recommendations on curriculum oversight, institutional management, the provision of governance support, and human resources management operations.

### Subprogrammes

- *Programme Management: Planning, Information and Assessment* delegates administrative and financial responsibilities, and coordinates all monitoring and evaluation functions in the programme.
- *Financial Planning, Information and Management Systems* develops systems and procedures to support and maintain integrated education management systems based on learner record information to monitor and report on the implementation of education information policy in the basic education sector. Work in this subprogramme focuses on resource planning, financial support, and the development and monitoring of national funding norms and standards with provincial education departments; and monitors, supports and evaluates the implementation of conditional grants and donor funding.
- *School Infrastructure* uses funding from the *school infrastructure backlogs grant* to eradicate infrastructure backlogs. This includes replacing school buildings constructed with inappropriate materials such as mud, and providing water, sanitation and additional classrooms to schools that do not have these facilities. The

*education infrastructure grant* provides co-funding for the ongoing infrastructure programme in provinces to allow for the provision of infrastructure requirements. This includes the maintenance of existing infrastructure and the construction of new infrastructure, where required, to meet the minimum norms and standards for school infrastructure.

- *National Assessments and Public Examinations* provides standardised national assessments for grades 3, 6 and 9 learners; oversees the implementation of a learning approach assessment in all grades; and administers credible public examinations in grade 12.
- *National Education Evaluation and Development Unit* facilitates school improvement through systematic evaluation, and evaluates how district offices, provincial departments and the national department monitor and support schools, school governing bodies and teachers.
- *Planning and Delivery Oversight Unit* monitors the planning and delivery of selected priorities, helps provinces to ensure that provincial initiatives are aligned with national priorities, and provides institutional support for their effective delivery.

## Programme 5: Educational Enrichment Services

### Programme purpose

Monitor and support provinces to implement care and support programmes for learning and teaching.

## Objectives

- Ensure the holistic development of learners, enhance their learning experience and maximise their school performance by implementing sport, safety and social cohesion programmes to reduce barriers to learning in each year over the medium term.
- Improve learner health and wellness by implementing school health programmes, including the provision of nutritious meals, to all learners in quintile 1 to quintile 3 primary, secondary and identified special schools annually.
- Mitigate the impact of HIV and TB by providing a caring, supportive and enabling environment for learners and educators annually.

## Subprogrammes

- *Programme Management: Educational Enrichment Services* manages delegated administrative and financial responsibilities and coordinates all monitoring and evaluation functions in the programme.
- *Partnerships in Education* partners with stakeholders to make education a societal issue; and manages policy, programmes and systems aimed at creating a safe and cohesive learning environment. Activities carried out through this subprogramme are focused on promoting holistic learner development through facilitating sports and enrichment programmes in schools; and promoting social cohesion, an understanding of human rights, gender equity, non-racism, non-sexism, and democratic and constitutional values in education in public schools and school communities.
- *Care and Support in Schools* manages policies, the provision of meals and the promotion of learner access to public services. This includes interventions aimed at encouraging healthy habits and alleviating poverty.

1. No historical data available.

### Entity overview

The South African Council for Educators is mandated by the South African Council for Educators Act (2000) to enhance the status of the teaching profession. It sets out to do this by providing for the professional registration of all educators, promoting the continuing professional development of educators and maintaining ethical and professional standards in the teaching profession.

Over the medium term, the council will continue to focus on implementing the professional development management system. It plans to do this by approving providers and endorsing quality professional development programmes, as well as ensuring that endorsed programmes meet professional needs. The council will also encourage student teachers to register in their first year of study to ensure that they are already registered when they begin practicing, while advocating and promoting professional teaching standards and the professionalisation of the ECD sector.

Expenditure is expected to decrease by 2.5 per cent, from R138.6 million in 2024/25 to R128.7 million in 2027/28, mainly because the council will use its reserves in 2025/26 to clear a backlog of educator misconduct cases. The high number of cases exceeded the council's capacity to conclude them within a year. The council expects to generate 80.3 per cent (R305.1 million) of its revenue over the MTEF period through membership and registration fees and the remainder through interest on investments, the sale of reprints of certificates and transfers from the department for continuing professional teacher development programmes. Transfers from the department account for the bulk of the remaining revenue and are expected to increase at an average annual rate of 4.5 per cent, from R16.4 million in 2024/25 to R18.8 million in 2027/28. Revenue is expected to decrease at an average annual rate of 0.4 per cent, from R130.3 million in 2024/25 to R128.7 million in 2027/28. This is mainly because of a projected decrease in interest payments in line with the expected decrease in interest rates over this period, and because of a decrease in membership fees owing to fewer foreign national educators being registered, as only those who meet scarce skills requirements can now be employed.

## Entity overview

The Umalusi Council for Quality Assurance in General and Further Education and Training derives its mandate from the General and Further Education and Training Quality Assurance Act (2001) and the National Qualifications Framework Act (2008). As an external and independent quality assurance body, the council is mandated to set and maintain standards in general and further education and training by developing and managing the general and further education and training qualifications sub-framework.

To fulfil this mandate, the council's expenditure is expected to increase at an average annual rate of 5.7 per cent, from R208.2 million in 2024/25 to R245.7 million in 2027/28. The council is set to derive 79.2 per cent (R547.4 million) of its revenue over the MTEF period through departmental transfers. Departmental transfers are projected to increase at an average annual rate of 4.5 per cent, from R166.9 million in 2024/25 to R190.6 million in 2027/28.

## Vote purpose

*Develop and support a quality higher and vocational education sector. Promote access to higher education, vocational education and skills development training opportunities.*

## Mandate

The mandate of the Department of Higher Education is to develop a skilled and capable workforce while broadening the skills base of the country to support an inclusive growth path. The department derives its mandate from the:

- Higher Education Act (1997), which provides for a unified national system of higher education
- Skills Development Act (1998), which enables the creation of the National Skills Authority; sector education and training authorities (SETAs); the establishment of the Quality Council for Trades and Occupations; and the regulation of apprenticeships, learnerships and other matters relating to skills development
- National Student Financial Aid Scheme Act (1999), which provides for the granting of loans and bursaries to eligible students attending public higher education and training institutions, and the subsequent administration of such loans and bursaries
- Skills Development Levies Act (1999), which provides for the imposition of skills development levies
- Continuing Education and Training Act (2006), which provides for the regulation of continuing education and training, the establishment of governance structures for and the funding of public technical and vocational education and training (TVET) colleges and community education and training (CET) colleges, the registration of private colleges, and the promotion of quality in continuing education and training
- National Qualifications Framework Act (2008), which provides for the national qualifications framework, the South African Qualifications Authority, and quality councils for the issuing and quality assurance of qualifications required by the sub-frameworks of the national qualifications framework.

1. Data has been provided by the department and may not necessarily reconcile with the data published in the National Student Financial Aid Scheme's 2024/25 annual performance plan.

## Expenditure overview

The department's focus remains on expanding access to higher education and training opportunities, and improving the quality of provisioning and the responsiveness and efficiency of the post-school education and training system. To achieve these objectives over the medium term, the department will focus on upgrading infrastructure at higher education institutions, providing bursaries and loans to students from poor and working class backgrounds, and subsidising higher education institutions.

Expenditure is expected to increase at an average annual rate of 4.8 per cent, from R137.3 billion in 2024/25 to R158.1 billion in 2027/28. The department's spending is mainly driven by transfers and subsidies to its agencies and accounts, and higher education institutions. Combined, these are estimated to constitute 90.5 per cent (R407.3 billion) of the department's budget over the next 3 years. Spending on compensation of employees, mainly for TVET and CET college lecturers and support staff, is projected to amount to R39.8 billion over the MTEF period, accounting for 8.8 per cent of the department's budget.

Cabinet has approved increases to the department's baseline amounting to R407.8 million over the medium term (R127.1 million in 2025/26, R137.1 million in 2026/27 and R143.6 million in 2027/28) to accommodate cost-of-living adjustments. Funding has also been approved via the budget facility for infrastructure to expand student housing (R306 million in 2026/27 and R951 million in 2027/28).

### ***Upgrading ailing infrastructure at higher education institutions***

Funds from the *university infrastructure and efficiency grant* and the *TVET infrastructure and efficiency grant* are used to alleviate overcrowding and upgrade ailing infrastructure at higher education institutions. Over the next 3 years, the *university infrastructure and efficiency grant* is allocated R4 billion, which includes allocations of R87.8 million in 2026/27 and R272.8 million in 2027/28 made through the budget facility for infrastructure. These funds are intended to be used for the student housing infrastructure programme. However, due to Cabinet-approved reductions on departmental transfers to this grant, which was announced in the 2024 Budget, allocations to it are set to decrease at an average annual rate of 7.3 per cent, from R2 billion in 2024/25 to R1.6 billion in 2027/28. Despite the decrease, these allocations are still expected to enable infrastructure repairs and maintenance in priority areas such as bulk services, sanitation, teaching and learning facilities, and student accommodation.

The *TVET infrastructure and efficiency grant* is allocated R1.3 billion over the MTEF period. This includes allocations of R218.2 million in 2026/27 and R678.2 million in 2027/28 made through the budget facility for

infrastructure for the student housing infrastructure programme. Due to the additional allocations, transfers to the *TVET infrastructure and efficiency grant* are expected to increase at an average annual rate of 47 per cent, from R245.9 million in 2024/25 to R780.3 million in 2027/28.

The *CET infrastructure grant*, which is centred on providing funds for infrastructure-related projects at CET colleges, is allocated an estimated R846.5 million over the medium term. These funds will be used to construct basic skills centres, teaching and learning facilities, workshops and ICT laboratories at CET colleges in all provinces.

### ***Providing bursaries and loans to students from poor and working class backgrounds***

The department will provide bursaries and loans to students from poor and working class backgrounds in line with available funds. The National Student Financial Aid Scheme manages the bursary scheme which covers tuition, accommodation, transport and living expenses to students from families earning less than R350 000 per year. Transfers to the scheme are projected to provide 2.1 million students with loans and bursaries over the MTEF period. These transfers are expected to increase at an average annual rate of 4.4 per cent, from R46.6 billion in 2024/25 to R53.1 billion in 2027/28. The Scheme is also implementing the Missing Middle pilot loan scheme, which supports students from households with an annual income between R350 000 and R600 000. This will be funded by the National Skills Fund at a cost of R3 billion over the medium term (R1 billion per year).

### ***Subsidising higher education institutions***

Subsidies to higher education institutions, specifically universities and TVET colleges, typically take the form of grants. Funds from these grants are intended to help institutions cover their operating costs and make higher education more accessible and affordable for students. In total, subsidies account for 39.6 per cent (R161.8 billion) of the department's expenditure over the medium term. Allocations to them are projected to increase at an average annual rate of 4.8 per cent, from R48.9 billion in 2024/25 to R56.3 billion in 2027/28. University subsidies, which include block and earmarked grants, account for the largest share of the department's budget for transfers and subsidies, amounting to R142.3 billion (34.8 per cent) over the MTEF period. Allocations to these subsidies are expected to increase at an average annual rate of 4.9 per cent, from R42.9 billion in 2024/25 to R49.5 billion in 2027/28. Subsidies to TVET colleges, including for the operationalisation of new campuses, account for 3.6 per cent (R14.5 billion) and are projected to increase at an average annual rate of 4.5 per cent, from R4.4 billion in 2024/25 to R5.1 billion in 2027/28.

2. Rand million.

**Programme 2: Planning, Policy and Strategy****Programme purpose**

Provide strategic direction in the development, implementation and monitoring of departmental policies and in the human resource development strategy for South Africa.

## Objectives

- Expand access to post-school education and training opportunities to include those outside the schooling system by developing, gazetted and implementing 11 policies related to the national qualifications framework, career development services and open and e-learning over the medium term.
- Monitor social inclusion and equity in the post-school education and training system by producing annual monitoring reports for approval by the director-general on the implementation of social inclusion (including gender equality and the gender-based violence and femicide programme) in the post-school education and training system.
- Improve the quality of post-school education and training provisioning by implementing the Transforming MENTalities initiative and national civic education and health skills programme over the medium term.
- Provide strategic direction in the development and implementation of departmental policies by monitoring and evaluating the department's policy outputs and coordinating research in the fields of higher education and training over the medium term.
- Promote international relations by undertaking 30 engagements over the medium term to support the priorities of the post-school education and training system.
- Improve the responsiveness of the post-school education and training system by producing 6 research reports over the medium term aimed at supporting decision-making for enrolment planning, funding and policymaking on critical skills, the country-wide master skills plan, occupations in high demand, priority skills, and skills supply and demand.
- Support the implementation of the just energy transition investment plan by establishing the just energy transition skills desk and advisory forum over the medium term.
- Improve infrastructure delivery at post-school education and training institutions over the medium term by managing the implementation of the integrated infrastructure development support programme through providing oversight of the planning, expenditure, monitoring and evaluation of infrastructure delivery.
- Build and manage relations with post-school education and training sector formations (Universities South Africa, the South African College Principals Organisation, the South African Union of Students, and the South African Vocational Education and Training Student Association) and intergovernmental relations each year over the medium term by holding ongoing engagements.
- Facilitate the coordination of economic development, address social challenges in a sustainable manner, and manage and facilitate constructive intergovernmental relations by implementing government's district development model over the medium term.

## Subprogrammes

- *Programme Management: Planning, Policy and Strategy* manages delegated administrative and financial responsibilities, and coordinates all monitoring and evaluation functions in the programme.
- *Human Resource Development Council of South Africa* provides strategic, technical and administrative support to the Human Resource Development Council of South Africa by developing the council's strategy and plans and ensuring that they are implemented efficiently.
- *Policy, Planning, Monitoring and Evaluation* monitors and evaluates the policy outputs of the department; coordinates research in the fields of higher education and training; and ensures that education policies, plans and legislation are developed into systems.
- *International Relations* develops and promotes international engagements on higher education and training to support the strategic priorities of the post-school education and training system. This includes participating in, influencing and strengthening mutually beneficial relations with key bilateral and multilateral partners in Africa and the rest of the world.
- *Legal and Legislative Services* manages the legal and legislative services of the department, universities, and TVET and CET colleges, SETAs and the National Skills Fund.
- *Social Inclusion and Quality* promotes access to open and e-learning opportunities, coordinates career development services across all spheres of government, provides career development services, promotes and monitors social inclusion and equity in the post-school education and training system, and advances the implementation of the national qualifications framework.

## Programme 3: University Education

### Programme purpose

Develop and coordinate policy and regulatory frameworks for an effective and efficient university education system. Provide financial and other support to universities, the National Student Financial Aid Scheme and national institutes for higher education.

### Objectives

- Ensure the implementation of the fee increase regulatory framework, updated guidelines for the implementation of the department's bursary scheme and the student funding model by March 2026.
- Ensure the success of students from poor and working class backgrounds by providing financial support to 426 296 students in public universities through the National Student Financial Aid Scheme by March 2026.
- Improve student success and efficiency within the public university system by implementing the university capacity development programme and providing management information and statistical reports for monitoring and evaluation in each year over the medium term.
- Improve staff demographic profiles at universities by allocating 85 new permanent academics to universities by March 2026 through the implementation of the new generation of academics programme.
- Improve the responsiveness of the post-school education and training system and ensure entrepreneurial development in higher education and international scholarship programmes by revising public university academic planning guidelines to ensure a diverse mix of programmes and qualifications by March 2026.

### Subprogrammes

- *Programme Management: University Education* manages delegated administrative and financial responsibilities and coordinates all monitoring and evaluation functions for the programme.
- *University Planning and Institutional Funding* manages planning and funding for the public higher education sector.
- *Institutional Governance and Management Support* monitors and supports institutional governance management and provides sector liaison services.
- *Higher Education Policy Development and Research* develops higher education policy, supports research and regulates the private higher education sector.
- *Teaching, Learning and Research Development* promotes, develops, monitors and evaluates the implementation of qualifications policies, programmes and systems for the development of high-quality teaching across all education sectors, including pre-schooling, schooling and post-schooling; and supports effective teaching, learning and research development in university education, including through international scholarship opportunities.

- *University Subsidies* makes transfers to universities to help institutions cover their operating costs and make higher education more accessible and affordable for students.

## Programme 4: Technical and Vocational Education and Training

### Programme purpose

Plan, develop, implement, monitor, maintain and evaluate national policy, programme assessment practices and systems for technical and vocational education and training. Provide financial and other support to technical and vocational education and training colleges and regional offices.

### Objectives

- Ensure the relevance and efficiency of the TVET system programme offerings through the development and implementation of 1 funding strategy, 1 enhanced planning framework, 2 system efficiency interventions and 3 updated and relevant TVET curriculum interventions by March 2026.
- Improve the success and efficiency of students in the post-school education and training system over the medium term by:
  - improving the teaching and learning environment at TVET colleges through the effective use of the *TVET infrastructure and efficiency grant*
  - operationalising the new examination system, which is aimed at transforming the conduct of national examinations across the value chain, from the setting of question papers to the certification of successful candidates
  - steering TVET colleges towards greater responsiveness in the provision of skills for employment
  - enrolling students in prevocational learning programmes to improve pass and throughput rates
  - improving the competency of TVET college lecturers through dedicated online curriculum training and placement in industry for workplace exposure

- reviewing TVET college programmes and qualifications to make them more responsive to and aligned with government priorities
- improving the governance capacity of TVET colleges and intensifying the oversight function of college councils
- increasing the number of TVET college lecturers with professional qualifications through formal university-based programmes
- improving the competence of TVET college lecturers through various short programmes, such as project-based teaching methodologies and digital skills.
- Improve service delivery for students by mainstreaming occupational programme offerings through the centres of specialisation programme to expand the TVET curriculum and align it more directly with industry requirements, and by establishing 2 additional disability support units at TVET colleges over the medium term.
- Improve opportunities for work placement by developing entrepreneurial and digital skills through 3 additional, new or reviewed TVET programmes with integrated digital skills training approved by the director-general by March 2026.

## Subprogrammes

- *Programme Management: Technical and Vocational Education and Training* manages delegated administrative and financial responsibilities and coordinates all monitoring and evaluation functions.
- *Technical and Vocational Education and Training System Planning and Institutional Support* provides support to management and councils, ensures that colleges have fully constituted and functional councils, provides guidance and support to TVET colleges' planning processes, monitors and evaluates the performance of the TVET system against set indicators, develops regulatory frameworks for the system such as the maturity model (a framework and system for measuring and improving quality), maps out the institutional landscape for the rollout of the TVET college system, and coordinates the collection and management of TVET data for reporting.
- *Programmes and Qualifications* manages and coordinates curriculum development processes; ensures the development of quality learning and teaching materials; monitors and supports the implementation of curriculum statements and assessment regulations, the development of lecturers, and the development and implementation of student support programmes; and provides strategic leadership for TVET colleges to diversify their programmes, qualifications and curriculums.
- *National Examinations and Assessment* administers and manages the conduct of national assessments in TVET and CET colleges.
- *Technical and Vocational Education and Training Financial Planning* develops and maintains financial management reporting systems for TVET colleges, develops and monitors the implementation of national norms and standards for funding TVET colleges, manages and determines the fair distribution of funding to TVET colleges in accordance with national norms and standards, monitors the compliance of TVET colleges with the conditions for infrastructure funding, and ensures the timely submission of TVET colleges' audited annual financial statements and quarterly financial reports.
- *Regional Offices* manages, supports, coordinates and monitors the implementation of the department's programmes in regional offices.

## Programme 5: Skills Development

### Programme purpose

Promote and monitor the national skills development strategy. Develop skills development policies and regulatory frameworks for an effective skills development system.

### Objectives

- Ensure that SETAs implement skills development interventions in line with the national skills development plan to support an inclusive growth path by March 2026 by:
  - producing and certifying 28 000 artisans towards meeting the National Development Plan's target of producing 30 000 artisans per year by 2030
  - prioritising 200 300 workplace-based learning programmes for learnerships, internships and work-integrated learning
  - producing 1 consolidated report on sectoral occupations in high demand and 21 sector skills plans aligned with an updated sector skills plan framework.
- Contribute towards a skilled and capable workforce to support an inclusive growth path by March 2026 by ensuring that:
  - 40 052 learners complete learnerships
  - 39 645 learners complete skills programmes
  - SETAs meet a good governance standard of 95 per cent
  - all SETAs pay allocated mandatory grants to qualifying employers on time
  - trade tests for qualifying applicants are conducted within 40 days.

### Subprogrammes

- Programme Management: Skills Development* manages delegated administrative and financial responsibilities and coordinates all monitoring and evaluation functions.
- Sector Education and Training Authority Coordination* supports, monitors and reports on the implementation of the national skills development strategy at the sectoral level by establishing and managing the performance of service-level agreements with SETAs and conducting trade tests at the Institute for the National Development of Learnerships, Employment Skills and Labour Assessments.
- National Skills Authority Secretariat* manages projects identified in the national skills development strategy and advises the minister on the national skills development policy and strategy.

- *Quality Development and Promotion* transfers funds to the Quality Council for Trades and Occupations as a contribution to its operations.
- *National Artisan Development* manages and monitors the development of artisans.

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Percentage accreditation of new programmes submitted to the council each year	Quality assurance	Outcome 13: Improved education outcomes and skills	97% (113/ 116)	97% (546/ 565)	96% (346/ 361)	85%	90%	95%	95%
Number of qualification standards fully developed or reviewed per year	Management of the higher education qualifications sub-framework		3	3	3	3	3	4	5
Number of reports of completed institutional audits finalised and approved per year	Quality assurance		8	8	10	10	10	10	10
Number of research reports produced per year	Research, monitoring and advice		3	3	3	3	3	4	4
Number of policies developed and/or reviewed and revised per year	Management of the higher education qualifications sub-framework		1	1	1	1	1	1	1

#### Entity overview

The Council on Higher Education is a statutory body established in terms of the Higher Education Act (1997), as amended. It is mandated to advise the minister responsible for higher education on all matters pertaining to higher education, develop and manage the higher education qualifications framework and sub-framework, and develop and implement a suite of policies and criteria to facilitate the implementation of the framework and sub-framework and protect their integrity.

The council's ongoing focus is to be a recognised centre for information and policy analysis on higher education. As such, over the medium term, it will continue to focus on conducting sector research and monitoring all higher education matters to advise the minister. As this work relies on personnel, expenditure on compensation of employees accounts for an estimated 46.7 per cent (R141.6 million) of the council's budget over the MTEF period. This spending is set to increase at an average annual rate of 2.5 per cent, from R45.9 million in 2024/25 to R49.3 million in 2027/28.

Transfers from the department account for a projected 91.3 per cent (R278 million) of revenue over the MTEF period. The remainder is set to be generated through interest on investments and fees charged for accreditation services provided to private higher education institutions. Total revenue is expected to increase at an average annual rate of 3.2 per cent, from R96.7 million in 2024/25 to R106.1 million in 2027/28.

Number of constituency-based entities that benefited through National Skills Fund funding per year	Skills development funding		2	25	5	2	2	2	2

### Entity overview

The National Skills Fund was established in terms of the Skills Development Act (1998). It funds projects

identified as national priorities in the national skills development plan, other projects as determined by the director-general, and any activity undertaken by the minister to achieve a national standard of good practice in skills development.

Over the medium term, the fund aims to: contribute to the development of skills by funding 3 750 learners to encourage and support worker-initiated training and funding 16 500 bursary students for qualifications in occupations in high demand; facilitate the acquisition of various skills for 870 participants through constituency-based skills development initiatives; and fund education and training programmes in innovation and digital technology, and provide workplace experience, for 189 500 learners, including those from rural areas. The fund also plans to undertake priority projects such as the development of infrastructure at TVET and CET colleges, and research and innovation aimed at expanding, integrating and improving the effectiveness of the post-school education and training system. To this end, R19.7 billion over the medium term is allocated to fund these skills development and infrastructure projects. The fund has allocated R3 billion over the next 3 years (R1 billion in each year) to the National Student Financial Aid Scheme for implementing the Missing Middle pilot loan scheme, which supports students from households with an annual income of between R350 000 and R600 000 to access higher education.

Expenditure is expected to increase at an average annual rate of 6.4 per cent, from R6.1 billion in 2024/25 to R7.4 billion in 2027/28. Spending is mainly on transfers and subsidies, which amount to R19.8 billion, or 95.3 per cent of the fund's budget over the MTEF period.

The fund is set to derive 80.2 per cent (R16.7 billion) of its revenue over the medium term through the skills development levy and the remainder (R4.1 billion) through interest on investments held by the Public Investment Corporation. The skills development levy is collected by the South African Revenue Service from employers and transferred to the fund as a direct charge against the National Revenue Fund. This transfer is projected to increase at an average annual rate of 6.7 per cent, from R4.9 billion in 2024/25 to R6 billion in 2027/28. Overall, revenue is expected to increase in line with spending.

			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Amount recovered from debtors per year	Student-centred model	Outcome 13: Improved education outcomes and skills	R341.7m	R155.8m	R144.7m	R200m	R250m	R300m	R350m
Number of university students obtaining financial aid per year	Student-centred model		555 950	572 089	439 659	417 938	426 296	434 823	443 519
Number of TVET students obtaining financial aid per year	Student-centred model		270 134	238 287	337 224	183 145	269 314	281 514	294 266

### Entity overview

The National Student Financial Aid Scheme was established in terms of the National Student Financial Aid Scheme Act (1999). The scheme is responsible for providing bursaries and loans to students, developing criteria and conditions for granting loans and bursaries to eligible students in consultation with the minister; raising funds; recovering loans from debtors; maintaining and analysing a database of funded students; undertaking research on how to use financial resources more effectively; advising the minister on matters relating to student financial aid; and undertaking other functions assigned to it by the act or the minister.

Over the medium term, an estimated 1.3 million university students and 845 094 TVET students from poor and working class backgrounds at 76 public higher education institutions are expected to be awarded bursaries through the scheme. The projected cost to carry this out is R176.7 billion over the medium term. Funding to implement the Missing Middle pilot loan scheme, which supports students from households with an annual income between R350 000 and R600 000, will come from the National Skills Fund at a cost of R3 billion over the medium term (R1 billion per year).

Expenditure is projected to increase at an average annual rate of 4.6 per cent, from R54.5 billion in 2024/25 to R62.4 billion in 2027/28. Transfers from the department constitute an estimated 86 per cent (R154.3 billion) of the scheme's total revenue over the medium term. These transfers are set to increase at an average annual rate of 4.6 per cent, from R46.9 billion in 2024/25 to R54.3 billion in 2027/28. Revenue is expected to increase in line with spending.

### Entity overview

The Quality Council for Trades and Occupations was established in terms of the Skills Development Act (1998). It is mandated to oversee the development and maintenance of the occupational qualifications sub-framework in the national qualifications framework and advise the minister on all policy matters concerning occupational standards and qualifications.

Over the medium term, the council plans to establish systems for monitoring and improving the quality of provisioning of education and training that promotes the efficiency and success of the post-school education and training system and assure the quality of a dynamic and responsive occupational qualifications sub-framework that supports sustainability and employability. The council will also play a central role in developing programmes that respond to the just energy transition and sustainable development goals through its interactions with industry through SETAs and other stakeholders. The council has set aside R265.8 million over

the medium term to carry out these activities.

Expenditure is expected to increase at an average annual rate of 3.2 per cent, from R167.5 million in 2024/25 to R184.1 million in 2027/28. The council is set to derive 77.8 per cent (R411 million) of its revenue over the period ahead through SETA grant funding and 18.6 per cent (R98.3 million) through transfers from the department, which are set to increase at an average annual rate of 4.6 per cent, from R30 million in 2024/25 to R34.3 million in 2027/28. Remaining revenue is expected to be generated by charging verification, accreditation and certification fees.

### Entity overview

The Skills Development Act (1998) mandates SETAs to fund skills development; implement national, sector and workplace strategies to develop and improve skills in the South African workforce; and provide learnerships that lead to recognised occupational qualifications.

Over the medium term, the department will facilitate and ensure partnerships among higher education institutions and industry using SETAs' workplace skills plans. These will help scale up the placement of graduates, work-integrated learning, research, and the facilitation of industry exposure for TVET college lecturers in line with industry needs. To respond to these skills requirements, SETAs will continue to offer key learning programmes including artisan development; apprenticeships, learnerships, internships and bursaries; and the development of small, medium and micro enterprises to provide opportunities for work experience. SETAs plan to spend R65.6 billion over the medium term on these programmes. Expenditure is set to increase marginally, at an average annual rate of 0.1 per cent, from R26.8 billion in 2024/25 to R26.9 billion in 2027/28.

SETAs are set to derive 83.6 per cent (R64.5 billion) of their revenue over the MTEF period through the skills development levy, which is collected by the South African Revenue Service from employers and transferred as a direct charge against the National Revenue Fund. Remaining revenue is derived from interest on investments. Total revenue is expected to increase at an average annual rate of 1.8 per cent, from R25.1 billion in 2024/25 to R26.4 billion in 2027/28.

## Entity overview

The South African Qualifications Authority is a statutory body established in terms of the South African Qualifications Authority Act (1995) and exists in terms of the National Qualifications Framework Act (2008), as amended. The authority is mandated to advise the minister on matters related to the national qualifications framework; oversee, liaise and consult with quality councils on the implementation of the national qualifications framework; develop policies and criteria for the registration of qualifications; maintain a national learner records database; and conduct or commission research into matters related to the national qualifications framework.

The authority will continue to focus on streamlining and automating its operational processes to become more efficient over the medium term. This will be done by improving its IT infrastructure to enable verification on the national learner records database and for foreign qualifications to be automated. The budget for these activities is estimated to be R13.3 million over the medium term.

Compensation of employees accounts for a projected 62.2 per cent (R300.9 million) of the authority's budget, which increases at an average annual rate of 7.3 per cent, from R86.5 million in 2024/25 to R106.7 million in 2027/28. Transfers from the department account for an estimated 64.1 per cent (R305.5 million) of revenue, increasing at an average annual rate of 4.5 per cent, from 93.2 million in 2024/25 to R106.4 million in 2027/28. The remaining revenue is generated through operations. Total revenue is expected to increase at an average annual rate of 4.2 per cent, from R147.8 million in 2024/25 to R167 million in 2027/28.

## Vote purpose

*Lead and coordinate health services to promote the health of all people in South Africa through an accessible, caring and high-quality health system based on the primary health care approach.*

## Mandate

The Department of Health derives its mandate from the National Health Act (2003), which requires that it provides a framework for a structured and uniform health system for South Africa and sets out the responsibilities of the 3 levels of government in the provision of health services. Its mission is to improve health by preventing illness and disease and promoting healthy lifestyles. It aims to consistently improve the health care delivery system by focusing on access, equity, efficiency, quality and sustainability.

## Selected performance indicators

## Expenditure overview

Over the medium term, the department will focus on strengthening primary health care, improving tertiary services and strengthening health systems. Work in these focus areas aims to ensure improvement in the public health sector in preparation for national health insurance. Given that health is a concurrent function, where most services are delivered at the provincial level, an estimated 90 per cent (R181.4 billion) of the department's budget of R201.9 billion over the MTEF period comprises transfers to provincial departments of health through conditional grants. Total spending is projected to increase at an average annual rate of 4.1 per cent, from R62.2 billion in 2024/25 to R70.2 billion in 2027/28.

Reprioritisations within the department's baseline, mainly from goods and services in the *Administration* programme, are effected to support emerging key policy areas. These include building capacity in the National Institute for Communicable Diseases to strengthen surveillance as part of overall pandemic preparedness efforts (R26 million over the MTEF period); improving the operations of the central chronic medicines dispensing and distribution programme by appointing staff previously funded by donors (R21 million over the MTEF period); supporting the establishment of the interim Traditional Health Practitioner Council towards it becoming self-financing (R21 million over the MTEF period); providing additional capacity to the Mines and Works Compensation Fund, a recently deemed schedule 3A public entity in terms of the Public Finance Management Act (1999) (R13.2 million over the MTEF period); and funding Mpox-related research to be commissioned by the South African Medical Research Council (R10 million in 2025/26).

To fund cost-of-living adjustments for personnel, additions of: R5.8 million in 2025/26, R6.9 million in 2026/27 and R7.9 million in 2027/28 are allocated to the department's compensation of employees budget; and R246.3 million in 2025/26, R264.3 million in 2026/27 and R276.7 million in 2027/28 are allocated to conditional grants to provinces. Further additional allocations are provisionally made to the provincial equitable share under National Treasury (and therefore not included in this chapter) to address shortfalls in compensation of employees and goods and services, as well as to assist in absorbing unemployed doctors who have completed their community service.

### **Strengthening primary health care**

The *district health programmes grant's* allocation of R89 billion over the medium term (R78.3 billion for the comprehensive HIV and AIDS component and R10.7 billion for the district health services component) accounts for 47.5 per cent of the department's projected spending over the period ahead. Although allocations to the grant's comprehensive HIV and AIDS component are set to increase at an average annual rate of 3.3 per cent, this is expected to be sufficient to cater for an increase in the number of clients on antiretroviral treatment from a targeted 5.7 million in 2024/25 to 6.5 million in 2027/28. This is due to lower prices for antiretroviral drugs because of successful price negotiations with suppliers. As at November 2024, an estimated 5.6 million clients were receiving antiretroviral treatment against an annual target of 5.7 million. To meet this target by the end of 2024/25, the department plans to enhance outreach efforts through community health workers and adopting innovative models of dispensing medicine.

Funding for outreach services is provided mainly through the grant's district health services component, in which expenditure is projected to increase at an average annual rate of 4.8 per cent, from R3.2 billion in 2024/25 to R3.7 billion in 2027/28. This is expected to support the retention of an adequate number of community health

workers, who play a critical role in linking patients to health care for communicable and non-communicable diseases. The district health component also funds human papillomavirus vaccinations and various interventions for malaria.

Allocations to the central chronic medication dispensing and distribution programme are set to increase by 4.8 per cent per year, from R400.2 million in 2024/25 to R460.3 million in 2027/28, funded through the *national health insurance indirect grant*. It enhances access to chronic medications by allowing patients to collect their prescriptions from alternative pick-up points such as private pharmacies. An estimated 40 per cent of the department's clients on antiretroviral treatment use this service.

### ***Improving tertiary health care services***

Tertiary services are highly specialised medical referrals available at central and tertiary hospitals. However, these are not evenly distributed across the country as only 35 hospitals, mainly in urban areas, offer them. As such, patients are frequently referred between provinces. This requires effective national coordination and financial support through the *national tertiary services grant*, which compensates provinces for delivering tertiary care to patients, including those from other provinces. The grant is allocated R50.2 billion over the MTEF period in the *Hospital Systems* programme, with expenditure set to increase at an average annual rate of 4.7 per cent. To enhance equity and minimise the need for interprovincial referrals, part of the grant is designated for developing the capacity of tertiary services in provinces with insufficient resources by enabling them to buy equipment and recruit medical specialists.

### ***Strengthening health systems***

National health insurance will fundamentally affect the funding and organisation of health care in South Africa. Preparatory efforts for this reform are primarily funded through the *national health insurance indirect grant*, which has an allocation of R8.5 billion over the medium term. The grant comprises health systems and health facility revitalisation components. The health systems component funds interventions such as developing patient information systems; addressing findings from the Office of Health Standards and Compliance in an effort to improve the quality of care in the public health sector; providing active support to facilities in the implementation of the ideal clinic initiative, including systems to track progress; enhancing the dispensing of medicines through the central chronic medication dispensing and distribution programme; and piloting contracting units for primary health care.

The health facility revitalisation component is allocated R6 billion over the medium term to fund strategic infrastructure projects. Of this allocation, an estimated R3 billion is sourced from the budget facility for infrastructure and earmarked for the construction of the Limpopo Academic Hospital and Siloam District Hospital. The allocation for the Siloam hospital will be used for the next phase of constructing a 224-bed hospital and facilities for allied health services such as audiology, physiotherapy and occupational therapy. Additionally, parts of the existing hospital, including the psychiatric ward and mortuary, will be repurposed and refurbished. A further R23 billion over the MTEF period is expected to be transferred to provinces through the direct *health facility revitalisation grant*. This will help accelerate maintenance, renovations, upgrades, additions and the construction of infrastructure including the replacement and commissioning of health technology in existing facilities.

## Programme 2: National Health Insurance

### Programme purpose

Achieve universal health coverage by improving the quality and coverage of health services through the development and implementation of policies and health financing reforms.

### Objectives

- Expand access to chronic medication by ensuring that 4.1 million stable patients actively receive medication through the central chronic medicine dispensing and distribution programme by March 2028.
- Determine a benefits package for primary health care multidisciplinary teams (nurses and doctors) by March 2027.
- Facilitate the implementation of national health insurance by establishing ministerial advisory committees in preparation for the National Health Insurance Fund by March 2027.

### Subprogrammes

- *Programme Management* provides leadership to improve access to high-quality health care services by developing and implementing universal health coverage policies and health financing reform.
- *Affordable Medicine* is responsible for developing systems to ensure the sustained availability of and equitable access to pharmaceutical commodities. This is achieved through the development of governance frameworks to support the selection and use of essential medicines, the development of standard treatment guidelines, the administration and management of pharmaceutical tenders, the development of provincial pharmaceutical budget forecasts, the reformation of the medicine supply chain, and the licensing of people and premises that deliver pharmaceutical services.
- *Health Financing and National Health Insurance* designs and tests policies, legislation and frameworks to achieve universal health coverage and inform proposals for national health insurance. It develops health financing reforms, including policies affecting the medical schemes environment; provides technical oversight of the Council for Medical Schemes; manages the direct *national health insurance grant* and the *national health insurance indirect grant*; and implements the single exit price regulations, including policy development and implementation initiatives in terms of dispensing and logistical fees. Activities in this subprogramme will focus increasingly on evolving health financing functions such as user and provider management, health care benefits, provider payments, digital health information, risk identification and fraud management.

## Programme 3: Communicable and Non-communicable Diseases

### Programme purpose

Develop and support the implementation of national policies, guidelines, norms and standards, and the achievement of targets set to decrease morbidity and mortality associated with communicable and non-communicable diseases. Develop strategies and implement programmes that reduce maternal and child mortality.

### Objectives

- Reduce the risk of women developing cervical cancer by vaccinating 90 per cent of eligible girls aged 9 to 14 against human papillomavirus and expanding screening to 38 districts by March 2028.
- Support the effective implementation of the national strategic plan on malaria elimination over the medium term by:
  - ensuring indoor residual insecticide spray coverage of at least 95 per cent of households in municipalities where malaria is endemic
  - conducting information and communication campaigns on malaria prevention
  - investigating and classifying confirmed cases within 72 hours.
- Increase the total number of HIV-positive people accessing antiretroviral treatment from 5.7 million in March 2025 to 6.5 million in March 2028 by:
  - implementing the universal test-and-treat policy
  - expanding the number of public health care facilities with youth zones from 2 200 in March 2025 to 2 500 by March 2028.
- Make progress towards ending TB by 2035 by improving treatment adherence to achieve a drug-susceptible TB treatment success rate of 83 per cent and multidrug-resistant TB treatment success rate of 70 per cent by March 2028.
- Reduce premature mortality from non-communicable diseases by screening 35 million clients for elevated blood glucose and 36 million clients for elevated blood pressure by March 2028.
- Facilitate the integration of mental health into primary health care by ensuring that 50 per cent of community health centres have at least 1 mental health care provider by March 2028.

### Subprogrammes

- *Programme Management* ensures that efforts by all stakeholders are harnessed to support the overall purpose of the programme, and that the efforts and resources of provincial departments of health, development partners, donors, academic and research organisations, and non-governmental and civil society organisations all contribute in a coherent and integrated way.
- *HIV, AIDS and STIs* formulates policy services related to HIV and sexually transmitted infections, and monitors and evaluates these services; and manages and oversees the comprehensive HIV and AIDS component of the *district health programmes grant* implemented by provinces and the coordination and direction of donor funding for HIV and AIDS.
- *Tuberculosis Management* develops national policies and guidelines for TB services; sets norms and standards and monitors their implementation in line with the vision of eliminating infections, mortality, stigma and discrimination; coordinates and manages the national response to the TB epidemic; and incorporates strategies needed to prevent, diagnose and treat drug-sensitive TB and drug-resistant TB.
- *Women's Maternal and Reproductive Health* develops and monitors policies and guidelines for maternal and women's health services; sets norms and standards, and monitors and evaluates the implementation of these services; and supports the implementation of key initiatives as indicated in the maternal and child health strategic plan and the reports of the ministerial committees on maternal, perinatal and child mortality.

- *Child, Youth and School Health* formulates policy and coordinates, monitors and evaluates child, youth and school health services; manages and oversees the human papillomavirus vaccination programme; coordinates stakeholders outside of the health sector to play key roles in promoting improved health and nutrition for children and young people; supports provincial units responsible for the implementation of policies and guidelines; and focuses on recommendations made by the ministerial committee on morbidity and mortality in children. These are aimed at reducing mortality in children younger than 5, increasing the number of HIV-positive children on treatment, strengthening the expanded programme on immunisation, and ensuring that health services are friendly to children and young people.
- *Communicable Diseases* develops policies and supports provinces in ensuring the control of infectious diseases with the support of the National Institute for Communicable Diseases, a division of the National Health Laboratory Service; improves surveillance for disease detection; strengthens preparedness and core response capacity for public health emergencies in line with international health regulations; and facilitates the implementation of influenza prevention and control programmes, tropical disease prevention and control programmes, and malaria elimination.
- *Non-communicable Diseases* establishes policy, legislation and guidelines, and helps provinces in implementing and monitoring services for chronic non-communicable diseases. This includes disability and rehabilitation (including for older people), eye health, palliative care, mental health and substance abuse, and forensic mental health.
- *Health Promotion and Nutrition* formulates and monitors policies, guidelines, norms and standards for health promotion and nutrition, focusing on TB, HIV and AIDS; maternal and child mortality; non-communicable diseases; and violence. This subprogramme aims to promote health by reducing risk factors for disease and promoting an integrated approach to working towards optimal nutrition for all South Africans.

## Programme 4: Primary Health Care

### Programme purpose

Develop and oversee the implementation of legislation, policies, systems, and norms and standards for a uniform, well-functioning district health system, including for emergency, environmental and port health services.

### Objectives

- Improve the quality of care at primary health care facilities by ensuring that 2 800 of these qualify as ideal clinics by March 2026.
- Ensure continuity of care by ensuring that community health workers conduct 20 million household visits per year by March 2028.
- Strengthen environmental health services by assessing 18 metropolitan and district municipalities for compliance with national environmental health norms and standards per year by 2027.
- Improve the quality and safety of care by assessing all provinces for compliance with regulations for emergency medical services each year over the medium term.

### Subprogrammes

- *Programme Management* supports and provides leadership for the development and implementation of legislation, policies, systems, norms and standards for a uniform district health system, and emergency, environmental and port health systems.
- *District Health Services* promotes, coordinates and institutionalises the district health system; integrates programme implementation using the primary health care approach by improving the quality of care; coordinates the traditional medicine programme; and manages the district health component of the *district health programmes grant*.
- *Environmental and Port Health Services* coordinates the delivery of environmental health services, including the monitoring and delivery of municipal health services; ensures compliance with international health regulations by coordinating port health services at all of South Africa's points of entry; and provides oversight and support through policy development, support and implementation monitoring for district and metropolitan municipalities to deliver municipal health services.
- *Emergency Medical Services and Trauma* improves the governance, management and functioning of emergency medical services in South Africa by formulating policies, guidelines, norms and standards; strengthens the capacity and skills of emergency medical services personnel; identifies needs and service gaps; and provides oversight to emergency medical services in provinces.

## Programme 5: Hospital Systems

### Programme purpose

Develop national policies and plans for all levels of hospital services to strengthen the referral system and facilitate the improvement of hospitals. Ensure that the planning, coordination, delivery and oversight of health infrastructure meet the country's health needs.

### Objectives

- Enable improvements in the quality and safety of care in hospitals through the implementation of the national clinical governance policy by March 2028.
- Improve the financing and delivery of health care infrastructure by March 2028 by constructing or revitalising 50 primary health care facilities and 60 hospitals, and maintaining, repairing or refurbishing up to 550 public health facilities per year.

### Subprogrammes

- *Programme Management* supports and provides leadership for the development of national policy on hospital services, including the management of health facility infrastructure and hospital systems.
- *Health Facilities Infrastructure Management* coordinates and funds health care infrastructure to enable provinces to plan, manage, modernise, rationalise and transform infrastructure, health technology and hospital management, and improve the quality of care. This subprogramme also disburses funds to the direct *health facility revitalisation grant* and the health facility revitalisation component of the *national health insurance indirect grant*.
- *Hospital Systems* focuses on the modernised and reconfigured provision of tertiary hospital services, identifies tertiary and regional hospitals to serve as centres of excellence for disseminating best practices as they pertain to quality improvements, and manages the *national tertiary services grant*.

## Programme 6: Health System Governance and Human Resources

### Programme purpose

Develop policies and systems for the planning, managing and training of health sector human resources, and for planning, monitoring, evaluation and research in the sector. Provide oversight to all public entities in the sector and statutory health professional councils in South Africa.

## Objectives

- Ensure functional governance structures in public entities and statutory health councils through the appointment of 2 boards and 4 councils by 2027.
- Monitor the compliance of public entities and statutory health councils with applicable legislation, policies and guidelines by producing biannual governance reports over the medium term.
- Facilitate the equitable distribution of health professionals to health facilities by introducing a framework for multidisciplinary teams of health professionals to be implemented in 64 district hospitals by March 2027.

## Subprogrammes

- *Programme Management* supports and provides leadership for health workforce programmes and key governance functions such as planning and monitoring, public entity oversight and forensic chemistry laboratories.
- *Policy and Planning* provides advisory and strategic technical assistance on policy and planning, coordinates the planning system of the health sector, and supports policy analysis and implementation.
- *Public Entities Management and Laboratories* supports the executive authority's oversight function and provides guidance to health entities and statutory councils that fall within the mandate of health legislation with regards to planning and budget procedures, performance and financial reporting, remuneration, governance and accountability.
- *Nursing Services* develops and monitors the implementation of a policy framework for the development of required nursing skills and capacity to deliver effective nursing services.
- *Health Information, Monitoring and Evaluation* develops and maintains an integrated national health information system, commissions and coordinates research, and monitors and evaluates departmental performance and strategic health programmes.
- *Human Resources for Health* is responsible for the medium- to long-term development and management of the public health sector workforce. This entails facilitating the implementation of the national human resources for health strategy, developing capacity in the health workforce for sustainable service delivery, coordinating transversal human resources management policies, providing in-service training for health workers, and disbursing funds to the *human resources and training grant*.

			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Percentage of broker and broker organisation applications accredited within 30 working days per quarter on receipt of complete information per year	Regulation	Outcome 12: Improved access to affordable and quality health care	92.6% (5 487/ 5 928)	86.5% (4 585/ 5 301)	88.4% (4 761/ 5 386)	80%	80%	80%	80%
Percentage of interim rule amendments processed within 14 working days of receipt of all information per year	Regulation		97.5% (117/ 120)	82.2% (46/ 56)	70.4% (38/ 54)	80%	80%	80%	80%
Percentage of annual rule amendments processed before 31 December per year	Regulation		100% (92)	97.1% (67/ 69)	100% (69)	90%	90%	90%	90%
Percentage of governance interventions implemented during the period per year	Regulation		100% (31)	100% (18)	97.4% 37/ 38)	70%	70%	70%	70%
Number of research projects and support projects published in support of the national health policy	Policy, research and monitoring		12	17	17	17	17	17	17

#### Entity overview

The Council for Medical Schemes is a regulatory authority designated in terms of the Medical Schemes Act (1998) to oversee the medical schemes industry. The act sets out the functions of the council, which include protecting the interests of beneficiaries, controlling and coordinating the functions of medical schemes, collecting and distributing information about private health care, and advising the Minister of Health on matters concerning medical schemes.

Over the medium term, the council will enhance its regulation of medical schemes by developing policies, reducing costs, preventing fraud and improving operational effectiveness. This will be done through strengthened control measures, improved policies, and processes both in administration and core business units. Additionally, the council plays a key role in industry initiatives, including the fraud, waste and abuse advisory committee, which has produced an industry charter, a code of good practice, and tribunal proposals. The council has also developed standard operating procedures for fraud detection and prevention.

Total expenditure is expected to increase at an average annual rate of 2.6 per cent, from R240.2 million in 2024/25 to R259.8 million in 2027/28. The council expects to generate an estimated 90.9 per cent

(R709.4 million) of its revenue over the medium term by collecting levies from medical schemes and derive 2.6 per cent (R19.8 million) through transfers from the department.

1. No historical data available.

### Entity overview

The Mines and Works Compensation Fund was established in terms of the Occupational Diseases in Mines and Works Act (1973). The act empowers the entity to collect levies from regulated mines and works, ensuring that compensation is provided to workers, former workers and dependants of deceased workers who have developed occupational diseases that affect their cardiorespiratory health. The entity is also responsible for reimbursing workers for any loss of income while receiving treatment for TB.

Over the medium term, the entity will focus on improving access to services for current and former mineworkers, including by increasing the number of claims processed and streamlining the claims management process to provide timely assistance. To support these initiatives, expenditure is anticipated to increase at an average annual rate of 6.6 per cent, from R361.5 million in 2024/25 to R438.3 million in 2027/28. The funding for these claims is sourced from levies collected from controlled mines and works on behalf of their employees.

The entity expects to generate 80.5 per cent (R1.4 billion) of its revenue over the medium term from interest and investments, and 19.4 per cent (R351.5 million) through the levies it receives from controlled mines and works. It expects to receive R6 million through transfers from the department.

### Entity overview

The National Health Laboratory Service was established in 2001 in terms of the National Health Laboratory Service Act (2000). The entity focuses on disease surveillance, specialised diagnostic services, outbreak response, research and workforce training for efficient disease monitoring. Its mandate is to provide cost-effective and efficient health laboratory services to all public sector health care providers, including national and provincial health departments, local government and other authorised institutions. Its specialised institutes include the National Institute for Communicable Diseases, which incorporates the National Cancer Registry; the National Institute for Occupational Health; Forensic Chemistry Laboratories; and the National Health Laboratory Service's South African Vaccine Producers.

Over the medium term, the entity will continue to focus on providing a range of laboratory testing services to health care providers, mainly in the public sector, and responding to increased demand for its services in priority programmes such as HIV and TB care. To enhance the detection of cervical cancer, the entity will also continue to test for human papillomavirus and provide cervical smear testing over the MTEF period. Funding for these activities is mainly through the laboratory tests programme, which is allocated R34.3 billion over the medium term, constituting 77.3 per cent of total projected expenditure.

The National Institute for Communicable Diseases is internationally renowned for its role in the surveillance and monitoring of communicable diseases. It provides disease surveillance expertise to Southern African countries and technical support for managing public health threats and outbreaks such as Ebola, listeriosis and, more recently, COVID-19 and Mpox. For this work to continue over the MTEF period, R36 million is added to the institute's baseline to improve its capacity and support its work.

Total expenditure is expected to increase at an average annual rate of 2.8 per cent, from R13.9 billion in 2024/25 to R15.1 billion in 2027/28. The entity expects to derive 89.7 per cent (R40 billion) of its revenue over the MTEF period through the fees it charges for laboratory tests and 4.4 per cent (R2 billion) through transfers from the department.

## Programmes/Objectives/Activities

### Entity overview

The Office of Health Standards Compliance is an independent health regulator that oversees the quality and safety of health care services in South Africa. The entity was established in terms of the National Health Amendment Act (2013) to protect and promote the health and safety of users of health services by ensuring that private and public health facilities comply with prescribed norms and standards. It does this through conducting routine and additional inspections and investigating complaints and adverse events reported by health care users or professionals. It will continue to perform these functions over the MTEF period.

The entity will focus on increasing the number of inspections conducted from 734 in 2024/25 to 761 in 2027/28, supported by an expected increase in expenditure in the compliance inspectorate at an average annual rate of 6.4 per cent, from R61.8 million in 2024/25 to R74.5 million in 2027/28. Total expenditure is expected to increase at an average annual rate of 4.8 per cent, from R181.6 million in 2024/25 to R209.1 million in 2027/28. The entity derives its revenue, which is expected to amount to R600.9 million over the medium term, entirely through transfers from the department. Revenue is projected to increase in line with spending.

### Entity overview

The South African Health Products Regulatory Authority was established in terms of the Medicines and Related Substances Act (1965). It is responsible for regulating medicines intended for human and animal use; licensing manufacturers, wholesalers and distributors of medicines, medical devices, radiation-emitting devices and radioactive nuclides; and conducting trials. Since 2019, the authority has re-engineered its processes through adopting reliance and priority review methods in certain evaluation processes. In 2023, it launched a

modernisation project to digitise regulatory and other processes through implementing the regulatory information management system. The first modules, including for processing new medicine applications, are expected to go live in 2025/26, with further module development planned over the MTEF period. This project is expected to enhance the quality of evaluations and lead to an increase in the registration of health products from new chemical entities from 120 in 2025/26 to 150 in 2027/28, and an increase in generic products from 480 in 2025/26 to 510 in 2027/28.

The evaluation of the safety, quality and therapeutic efficacy of medicines, as well as their registration, is expected to account for 30 per cent (R461.4 million) of the authority's total spending over the medium term. As this work requires skilled personnel, compensation of employees accounts for an estimated 65.7 per cent (R1 billion) of the authority's budget over the period ahead, increasing at an average annual rate of 9.8 per cent, in line with its drive to strengthen capacity by filling critical posts. The authority plans to fund this increase through the projected increase in its revenue. Total expenditure is expected to increase at an average annual rate of 9.1 per cent, from R417.6 million in 2024/25 to R542.4 million in 2027/28.

The authority expects to derive 61.5 per cent (R946.3 million) of its revenue over the MTEF period through the fees it charges for the evaluation and registration of medicines and medical devices; and 31.7 per cent (R468.8 million) through transfers from the department. Revenue generated from fees is expected to increase from R248.5 million in 2024/25 to R344.5 million in 2027/28, at an average annual rate of 11.5 per cent because of the recently gazetted fee schedule containing upward adjustments in various categories.

## South African Medical Research Council

### Selected performance indicators

**Table 18.37 South African Medical Research Council performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of accepted and/or published conference proceedings, abstracts, journal articles, book chapters and books by council-affiliated and funded authors per year	Core research	Outcome 12: Improved access to affordable and quality health care	1 169	1 455	1 294	600	1 000	900	1 025
Number of accepted and/or published conference proceedings, abstracts, journal articles, book chapters and books by council grant-holders with acknowledgement of council support per year	Core research		265	445	373	170	220	220	300
Number of accepted and/or published conference proceedings, abstracts, journal articles, book chapters and books where the first and/or last author is affiliated to the council per year	Core research		637	775	646	255	650	500	500
Number of research grants funded by the council per year	Core research		152	174	221	170	210	210	210
Number of innovation disclosures made by council employees and students per year	Innovation and technology		3	1	1	1	1	1	1
Number of council career and capacity development awards to masters and PhD candidates, postdoctoral fellows, and early- and mid-career scientists per year (all recipients)	Capacity development		167	171	184	110	110	130	140
Number of council career and capacity development awards to masters and PhD candidates, postdoctoral fellows, and early- and mid-career scientists per year (women recipients)	Capacity development		122	120	122	108	80	90	100
Number of council career and capacity development awards to masters and PhD candidates, postdoctoral fellows and early- and mid-career scientists per year (black South African citizens and permanent resident recipients)	Capacity development		108	118	121	90	90	100	105
Number of council career and capacity development awards to masters and PhD candidates, postdoctoral fellows and early- and mid-career scientists per year (recipients from historically disadvantaged institutions)	Capacity development		52	60	68	83	35	45	45
Number of masters and PhD students graduating or completing their studies per year	Capacity development		81	93	120	50	50	50	50

### Entity overview

In terms of the South African Medical Research Council Act (1991), the council is mandated to promote the

improvement of the health and quality of life of South Africa's population through research, development and technology transfer. In line with this, over the medium term, the council will focus on funding and conducting core health research, developing innovations and technology, and building research capacity. It will pay particular attention to risk factors associated with TB, HIV and AIDS, cardiovascular diseases, non-communicable diseases, and alcohol and other drug abuse. The core research function is expected to account for 59.6 per cent (R3.8 billion) of the council's expenditure over the medium term. This will support the publication of more than 5 000 journal articles, book chapters or books with relevant publishers and journals.

Total expenditure is expected to increase at an average annual rate of 6.7 per cent, from R1.8 billion in 2024/25 to R2.2 billion in 2027/28, driven mainly by an increase in grant funding at an average annual rate of 8.9 per cent over the period ahead. The increase in grant funding will also allow the council to appoint contract personnel. As a result, spending on compensation of employees is set to increase at an average annual rate of 6 per cent, from R636.6 million in 2024/25 to R758.1 million in 2027/28.

Transfers from the department are expected to account for an estimated 45.2 per cent (R2.8 billion) of total revenue over the MTEF period, while income received from grants accounts for an estimated 51.4 per cent (R3.3 billion). Overall, revenue is projected to increase in line with expenditure.

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

*Ensure protection against vulnerability by creating an enabling environment for the provision of a comprehensive, integrated and sustainable social development service.*

### Mandate

The social development sector provides social protection services and leads government efforts to forge partnerships through which vulnerable individuals, groups and communities become capable and self-reliant participants in their own development. Several pieces of legislation determine the department's mandate. These include the:

- Non-profit Organisations Act (1997), which establishes an administrative and regulatory framework within which non-profit organisations can conduct their affairs, and provides for their registration by the department
- 1997 White Paper for Social Welfare, which sets out the principles, guidelines, policies and programmes for developmental social welfare in South Africa. A draft white paper for social development is under review
- 1998 White Paper on Population Policy for South Africa, which is aimed at promoting the sustainable development of all South Africans by integrating population issues with development planning in all spheres of government and all sectors of society
- Social Assistance Act (2004), as amended, which provides a legislative framework for the provision of social assistance. The act and its regulations set out the different types of social grants payable, including those for social relief of distress, and their qualifying criteria
- South African Social Security Agency Act (2004), which establishes the South African Social Security Agency as an entity responsible for the administration and payment of social grants
- Children's Act (2005), as amended, which gives effect to certain rights of children, as contained in the Constitution, and sets out principles and processes related to their care and protection
- Older Persons Act (2006), which is aimed at maintaining and promoting the rights, status, wellbeing, safety and security of older people. It provides for older people to enjoy quality services while staying with their families and in their communities for as long as possible, and to live in residential care facilities
- Prevention of and Treatment for Substance Abuse Act (2008) and associated regulations, which provide a legal framework for the establishment, registration and monitoring of in-patient treatment centres and halfway houses.

## Selected performance indicators

Percentage of qualifying applications received within 2 months that are registered in compliance with section 13(2) of the Non-profit Organisations Act (1997) per year	Social Policy and Integrated Service Delivery	Outcome 10: Reduced poverty and improved livelihoods	98% (27 089/ 27 552)	98.6% (27 898/ 28 306)	100% (17 245)	100%	100%	100%	100%
Percentage of appeals adjudicated per year within 90 days of receipt	Social Security Policy and Administration		98% (1 588/ 1 621)	57.3% (2 763/ 4 819)	66.5% (1 272/ 1 913)	90%	90%	90%	95%

## Expenditure overview

The department is constitutionally mandated to provide national leadership in the social development sector. As such, it serves as the central coordinating body for the sector and develops and implements programmes for the eradication of poverty, social protection, social welfare and social development among poor and vulnerable people. As the department gives effect to this mandate over the medium term, it will focus on providing comprehensive social security, welfare services, developing communities and building partnerships.

The department has a budget of R851.0 billion over the MTEF period, of which transfers and subsidies account for an estimated 99.7 per cent (R848.0 billion), with R822.4 billion of this amount allocated to transfers for social grants and the remainder to transfers for entities. An estimated 45 per cent of the South African population relies on social grants or social relief of distress as a major source of income, including 13.2 million recipients of the *child support grant* and 4.3 million recipients of the *old age grant*.

### Providing comprehensive social security

Social grants are disbursed through the *Social Assistance* programme, allocations to which are set to increase at an average annual rate of 0.7 per cent, from R269.4 billion in 2024/25 to R274.7 billion in 2027/28. The budget for social grants is substantially augmented by R8.2 billion over the MTEF period to offset the effects of a higher cost of living. Accordingly, from April 2025, the value of the *old age grant* is set to increase by R130 (5.9 per cent) per month. A further R34.9 billion is added to the *Social Assistance* programme in 2025/26 for the continuation of social relief of distress related to the COVID-19 pandemic until March 2026.

Although disbursements will be adjusted over the MTEF period, they are set to decrease in 2026/27 as part of reform and efficiency measures to ensure that spending remains sustainable. Specifically, conditions have been placed on transfers to the South African Social Security Agency's operational budget to manage these cost reductions, for example, through improved biometric and income verification. The budget for social grants decreases to R262.9 billion in 2026/27, due to the discontinuation of social relief of distress for the COVID-19 pandemic and a downward adjustment to fund other government priorities. The termination of pandemic-related relief funding is expected to see a reduction in the total number of social assistance beneficiaries from an estimated 27.7 million in 2024/25 to 19.3 million in 2027/28. To enable the South African Social Security Agency to administer grants efficiently, R24.7 billion is allocated over the MTEF period in the *Social Security*

### *Policy and Administration programme.*

The department aims to complete an extensive review of social security policy over the MTEF period. To enhance beneficiaries' understanding of their rights and promote appeals for declined applications, the agency will strengthen stakeholder engagement on the effectiveness of social security policies. Government will also develop policy options on the replacement of pandemic-related social relief of distress, which is set to end in March 2026. This will partly be done through reviewing work, skills and sustainable livelihood programmes aimed at enhancing their efficiency and reducing reliance on these funds. To support these activities, the *Social Security Policy Development* subprogramme in the *Social Security Policy and Administration* programme is allocated R226.8 million over the period ahead.

It is critical to address the debilitating effects of fraud on social grants as a further mechanism to ensure that the social assistance system remains sustainable. Recognising this, over the medium term, the department intends to continue to support the South African Social Security Agency with its fraud prevention initiatives. For example, the department will help the agency investigate cases where people have been approved for a grant in the absence of valid identity documents because of delays in them being issued; as well as to resolve fraud cases that are currently under prosecution. To this end, R235.7 million is allocated over the medium term in the *Social Grants Fraud Investigations* subprogramme in the *Social Security Policy and Administration* programme. A portion of this budget will be directed to fund the establishment of the Inspectorate for Social Assistance, which is mandated to, among other things, conduct investigations to maintain the integrity of the social assistance framework and systems.

To enhance its responsiveness in addressing social assistance appeals through the Independent Tribunal for Social Assistance Appeals, which was established to consider appeals lodged by social assistance applicants dissatisfied with decisions made by the South African Social Security Agency, the department will seek to develop an electronic system to help with case flow and record management. Accordingly, the department aims to increase the percentage of appeals addressed within 90 days, from 90 per cent in 2024/25 to 95 per cent in 2027/28, at an estimated cost of R120.4 million in the *Appeals Adjudication* subprogramme, also in the *Social Security Policy and Administration* programme.

### ***Coordinating welfare services***

The department coordinates the delivery of developmental social welfare services by provincial departments of social development and non-profit organisations by formulating policies, norms, standards and best practices for various services. These include care and support for the elderly; child services, including the provision of places of safety, safe adoption, foster care services, and child and youth care centres; support services for people with disabilities; social behaviour change programmes; and psychosocial services, such as support for victims of gender-based violence and femicide.

Over the medium term, the department will continue its efforts to build capacity in the sector through workshops and sessions on matters pertaining to the Children's Act (2005), specifically in terms of amendments, systems, policies, regulations, and norms and standards, among others. It also intends to implement prevention, care and support programmes to mitigate the impact of HIV and AIDS in communities; reduce the effects of social crime by children and young people in communities by implementing prevention and early intervention measures on higher education campuses; and improve the protection and promotion of the rights of the elderly by finalising amendments to the Older Persons Act (2006) in collaboration with relevant stakeholders. These activities will be carried out using funds from the *Welfare Services Policy Development and Implementation Support* programme, which is allocated R1 billion over the next 3 years.

### ***Promoting community development and building partnerships***

Non-profit organisations play a vital role in society and provide public benefit in diverse ways. However, they need the public's trust and confidence as many raise funds from the public to help fund their work. Through effective, proportionate regulation, the department can help increase the public's trust and confidence in these organisations. Recognising this, over the MTEF period, the department will aim to tailor its regulatory interventions for them to be effective. Broadly, this entails increasing the rate of compliance by, among other things, extending periods for non-profit organisations to comply based on good cause. This is in line with the

inclusion of the Non-profit Organisations Act (1997) in the General Laws (Anti-Money Laundering and Combating Terrorism Financing) Amendment Act (2022), which seeks to strengthen South Africa's measures to combat money laundering and the financing of terrorism. For this purpose, R137.8 million over the period ahead is allocated in the *Registration and Monitoring of Non-profit Organisations* subprogramme in the *Social Policy and Integrated Service Delivery* programme.

By helping to reduce poverty, inequality and social ills through facilitating the development of sustainable livelihoods, the department aims to achieve its long-term goal of improved quality of life for the poor and vulnerable. To this end, activities funded through the *Community Development* subprogramme are focused on working with families, households and communities to restore resilience and develop sustainable strategies to meet their needs. Over the medium term, the department aims to finalise and implement a policy on linking social protection beneficiaries with sustainable livelihood opportunities. For this purpose, R96 million is allocated to the subprogramme over the period ahead.

As part of the department's commitment to providing pathways to employment and income for individuals and communities to eradicate poverty, it plans to transfer R679 million over the MTEF period, also through the *Social Policy and Integrated Service Delivery* programme, to the National Development Agency.

## Programme 2: Social Assistance

### Programme purpose

Provide social assistance to eligible individuals whose income and assets fall below set thresholds.

### Objective

- Provide social assistance by 2027/28 to eligible beneficiaries whose income and assets fall below set thresholds by providing income support to 4.5 million elderly people, 1.1 million people with disabilities, 13.3 million children, 194 610 children with disabilities who require care and support services, and 167 627 foster children.

### Subprogrammes

- *Old Age* provides income support to people aged 60 and older earning less than R107 880 (single) or R215 760 (married) a year, whose assets do not exceed R1 524 600 (single) or R3 049 200 (married).
- *War Veterans* provides income support to people who fought in World War II or the Korean War earning less than R107 880 (single) or R215 760 (married) a year, whose assets do not exceed R1 524 600 (single) or R3 049 200 (married).
- *Disability* provides income support to people with permanent or temporary disabilities earning less than R107 880 (single) or R215 760 (married) a year, whose assets do not exceed R1 524 600 (single) or R3 049 200 (married).
- *Foster Care* provides grants for children in foster care.
- *Care Dependency* provides income support to caregivers earning less than R277 200 (single) or R554 400 (married) a year to help care for children who are mentally or physically disabled.
- *Child Support* provides income support to parents and caregivers of children younger than 18 earning less than R67 200 (single) or R134 400 (married) a year.
- *Grant-in-Aid* provides additional benefits to recipients of the *old age grant*, *disability grant* or *war veterans grant* who require regular care.
- *Social Relief of Distress* provides temporary income support, food parcels and other forms of relief to people experiencing undue hardship.

## Programme 3: Social Security Policy and Administration

### Programme purpose

Provide for social security policy development and the fair administration of social assistance.

### Objectives

- Enable the fair administration of social assistance by:
  - conducting oversight visits to all South African Social Security Agency provincial offices to monitor the implementation of social assistance regulations by March 2026
  - increasing the percentage of appeals adjudicated within 90 days of receipt from 90 per cent in 2024/25 to 95 per cent in 2027/28
  - submitting the draft policy on basic income support to Cabinet for approval by March 2026
  - producing an audit report on social assistance grants by March 2026
  - developing a draft social security bill and submitting it to Cabinet for approval by March 2026.

### Subprogrammes

- *Social Security Policy Development* develops and reviews policies and legislation on social assistance, and contributory income support aimed at protecting households against life cycle contingencies such as the unemployment, illness, retirement, disability or death of a breadwinner.
- *Appeals Adjudication* seeks to provide a fair and just adjudication service for social assistance appeals.
- *Social Grants Administration* provides for the South African Social Security Agency's operational costs for administering social grants.
- *Social Grants Fraud Investigations* funds fraud investigations through the South African Social Security Agency's special investigations unit.
- *Programme Management* provides for the expenses of management related to social security policy initiatives.

## Programme 4: Welfare Services Policy Development and Implementation Support

### Programme purpose

Create an enabling environment for the delivery of equitable developmental welfare services through the formulation of policies, norms, standards and best practices; and the provision of support to implementing agencies.

### Objectives

- Enable the delivery of quality social welfare services by:
  - conducting awareness campaigns on elder abuse and the registry of adoptable children and prospective adoptive parents in all provinces by March 2026
  - monitoring the implementation of regulations on requirements and conditions for the registration of social service professions by March 2026
  - monitoring the implementation of the universal treatment curriculum in 12 public substance abuse treatment centres and evaluating its effectiveness by March 2026
  - protecting the rights of people with disabilities by developing a costing and funding mechanism for respite care services and presenting it to heads of social development services for approval by March 2026
  - submitting the policy on social development services to people with disabilities to Cabinet for final approval by March 2026
  - building capacity and monitoring the implementation of the Children's Act (2005), the 2021 White Paper on Families in South Africa, and social behaviour change programmes, including those on gender-based violence and femicide, substance abuse, teenage pregnancy, and HIV and AIDS services by March 2026
  - implementing pillar 4 (response, care, support and healing) of the national strategic plan on gender-based violence and femicide by monitoring the implementation of the psychosocial services policy in 15 identified hotspot districts by March 2026
  - monitoring the implementation of the intersectoral protocol on the prevention and management of violence against children, and child abuse, neglect and exploitation in all provinces over the MTEF period
  - ensuring that 60 per cent of victim empowerment programme centres collect data on the victim empowerment programme information management system by March 2026
  - ensuring that the national plan of action for children is approved by Cabinet by March 2026.

### Subprogrammes

- *Service Standards* ensures the transformation and standardisation of social welfare services through the development and coordination of overarching policies and legislation that promote integrated, quality-driven, professional and accountable service delivery.
- *Substance Abuse* develops, supports and monitors the implementation of policies, legislation, norms and standards for combating substance abuse.
- *Older Persons* develops, supports and monitors the implementation of policies, legislation, norms and standards for the provision of social welfare services to older people.
- *People with Disabilities* promotes the empowerment and rights of people with disabilities through the accelerated mainstreaming of disability considerations and the strengthening of disability-specific services.
- *Children* develops, supports and monitors the implementation of policies, legislation, norms and standards for the provision of social welfare services to children.
- *Families* develops, supports and monitors the implementation of policies, legislation and programmes for services aimed at strengthening families.

- *Social Crime Prevention and Victim Empowerment* develops, supports and monitors the implementation of policies, legislation and programmes aimed at protecting, empowering and supporting victims of crime and violence, including gender-based violence and femicide.
- *Youth* develops and facilitates the implementation of policies, legislation and programmes aimed at mobilising, protecting and developing skills among vulnerable young people.
- *HIV and AIDS* develops, supports and monitors the implementation of policies, programmes and guidelines aimed at preventing and mitigating the impact of HIV and AIDS, in line with the 2023-2028 national strategic plan for HIV and AIDS, TB and sexually transmitted infections.
- *Programme Management* provides for the expenses of the deputy director-general related to the coordination and management of social welfare services.

## Programme 5: Social Policy and Integrated Service Delivery

### Programme purpose

Support community development and promote evidence-based policy-making in the department and the social development sector.

### Objectives

- Produce a report on the implementation of the 2025 Declaration of the World Summit on Social Development and its programme of action by March 2026
- Create an enabling environment for non-profit organisations and increase public trust and confidence in them through effective and fair regulation by March 2026 by:
  - monitoring their compliance with the Non-profit Organisations Act (1997)
  - ensuring that 90 per cent of registration applications are processed within 2 months of receipt
  - registering all compliant applications within 2 months
  - processing 80 per cent of non-profit organisations' annual reports within 2 months.
- Capacitate 11 districts on the community mobilisation and empowerment framework by March 2026.
- Submit the progress review and recommendations report on the implementation of the 1998 White Paper on Population Policy for South Africa to Cabinet by June 2025 and disseminate the report and its recommendations to provinces by March 2026.
- Support the provision of nutritious food to the poor and vulnerable by coordinating interventions such as centre-based feeding programmes and partnerships with civil society organisations, social partners and other agencies by March 2026.
- Create 280 964 work opportunities through social sector expanded public works programme programmes by March 2026.

### Subprogrammes

- *Social Policy Research and Development* provides strategic guidance in terms of evidence-based social policy development, coordination and evaluation.
- *Special Projects and Innovation* provides for the coordination, incubation and innovation of departmental and social cluster initiatives such as the expanded public works programme.
- *Population Policy Promotion* supports, monitors and evaluates the implementation of the 1998 White Paper on Population Policy for South Africa by conducting research on the country's population trends and dynamics; raising awareness on population and development concerns; and supporting and building the

technical capacity of national, provincial and local government and other stakeholders to implement population policy strategies.

- *Registration and Monitoring of Non-profit Organisations* registers and monitors non-profit organisations in terms of the Non-profit Organisations Act (1997).
- *Substance Abuse Advisory Services and Oversight* monitors the implementation of policies, legislation, norms and standards aimed at combating substance abuse.
- *Community Development* develops and facilitates the implementation of policies, guidelines, frameworks, norms and standards for ensuring the empowerment of local communities, strengthening the capacity of people as active citizens through their community groups, organisations and networks; and strengthening the capacity of institutions and agencies (public, private and non-governmental) to work with citizens to shape and determine change in their communities.
- *National Development Agency* provides for transfers to the National Development Agency to support civil society organisations in poverty alleviation programmes.
- *Programme Management* provides for the expenses of management related to the coordination and management of community development programmes and initiatives.

## Entity overview

The National Development Agency is a schedule 3A public entity established in terms of the National Development Agency Act (1998). Its primary mandate is to contribute to eradicating poverty and its causes by funding civil society organisations to implement projects and programmes that address the development needs of poor communities and strengthen the institutional capacity of other civil society organisations. The agency is also mandated to promote consultation, dialogue and the exchange of development experiences between civil society organisations and the state, and to undertake research and publish findings that inform development policy.

Historically, the agency has relied on transfers from the department for 94 per cent of its revenue. However, these funds have been insufficient to meet the demands of poor communities and civil society organisations, hindering the agency's ability to fulfil its mandate effectively. Over the MTEF period, the agency will continue to implement its turnaround strategy, which aims to position it as a primary development coordinator by leveraging existing resources from both government and the private sector to reduce the agency's dependency on the fiscus. This approach is designed to empower impoverished communities by supporting the establishment and funding of sustainable commercial enterprises that provide reliable employment to members of communities who rely on social security.

This work will include supporting communities to establish commercial enterprises, providing grants to the newly established enterprises and building their capacity to ensure commercial success. The agency plans to mobilise resources from other government departments and donors amounting to R130 million over the MTEF period. These funds will be disbursed as grant funding to community-owned commercial enterprises, supplemented by R24 million through its allocation from the department. A further R4.7 million is earmarked to mobilise communities and support them to establish and formalise viable commercial enterprises.

The agency will continue to build the capacity of a targeted 8 500 members of existing and newly formed community-owned commercial enterprises over the next 3 years by providing training in technical and soft skills to enable them to run their businesses effectively. This will be funded through a combination of R10.4 million over the MTEF period from the agency and partnerships with sector education and training authorities. Discussions to formalise these partnerships are at an advanced stage.

The conducting of research and production of publications will be aimed at influencing development policy. Through partnerships with research and academic institutions, the agency aims to produce 9 research publications and host 18 development policy dialogues over the MTEF period to engage with relevant stakeholders. These reports will identify policy barriers to the eradication of poverty and guide the development of policies on job creation, economic development and training and development. Spending on these activities is projected to amount to R31.9 million over the next 3 years.

Expenditure is expected to increase at an average annual rate of 11 per cent, from R217.2 million in 2024/25 to R297.2 million in 2027/28. This growth is supported by the planned increase in grant funding through initiatives to mobilise resources from other sources. The agency anticipates spending on compensation of employees to account for 61.1 per cent (R484.6 million) of its budget over the medium term.

Transfers from the department are expected to amount to R679 million over the MTEF period, constituting an estimated 97.9 per cent of total revenue, with the remaining revenue expected to be generated through partnerships. Revenue is projected to increase from R217.2 million in 2024/25 to R297.2 million in 2027/28, at an average annual rate of 11 per cent, driven by resources mobilised from partnerships.

### Entity overview

The South African Social Security Agency was established in terms of the South African Social Security Agency Act (2004) to ensure the effective and efficient administration, management and payment of social assistance to qualifying beneficiaries. The agency provides social assistance to eligible individuals who are unable to support themselves and their dependants, as well as temporary assistance to individuals and households in crisis situations such as disasters and in cases of the loss of a breadwinner.

The number of grants, including grant-in-aid and excluding COVID-19 social relief of distress, administered by the South African Social Security Agency is expected to increase from 19.5 million in 2024/25 to 20.1 million by 2027/28. This growth is largely driven by the growth in the *old age grant*, which accounts for 20 per cent of all grants, whereas the *child support grant* accounts for over 60 per cent. The average cost to administer each grant is set to increase from R33 in 2024/25 to R35 in 2027/28.

As the payment of social grants depends on the banking network, bank charges contribute a significant portion of the agency's non-personnel allocation. The agency pays bank charges to the South African Reserve Bank for the use of the national payment system; BankservAfrica for interbank switching, clearing and the settlement of

payments; and Postbank for beneficiaries who use ATM and point-of-sale infrastructure to access grants. The agency expects to pay R1.7 billion over the period ahead on bank charges related to the payment of social grants.

Over the MTEF period, the agency will focus on replicating lessons learnt from COVID-19 *social relief of distress* to other social grants, especially in terms of digital functionality. This entails promoting the use of the digital applications system, which is designed to enable quicker response and grant approval times, and alleviate overcrowding at local offices. To reduce call centre demand and improve client communication, the agency plans to introduce digital self-help channels in 2025/26 as an alternative to calls. These channels include Facebook and WhatsApp chatbots. The agency will also introduce bank income checks on applicants and recipients of various grants and cross-check the databases of other government departments and agencies upon registration and routinely. The agency will continue to improve local offices, including sourcing alternative power supply, to enhance service delivery to beneficiaries. This will be done at 72 offices in 2025/26, 81 offices in 2026/27 and 90 offices in 2027/28.

Another focus area over the period ahead is rolling out and upgrading a biometric solution aimed at reducing fraud. This will be done by strengthening beneficiary verification and authentication mechanisms at a cost of R105 million over the MTEF period. The upgrades will include facial recognition as an additional biometric identifier, and high-performance search and matching capabilities to scan beneficiary fingerprints efficiently. The solution is set to be implemented at the application stage in 2025/26 to ensure that all new clients are biometrically identified when applying, as well as when social grant reviews are conducted.

Expenditure is expected to increase marginally, at an average annual rate of 1.9 per cent, from R8 billion in 2024/25 to R8.5 billion in 2027/28. The agency's total budget is projected to amount to R24.7 billion over the medium term. It expects to derive almost all its revenue over the next 3 years through transfers from the department. Total revenue is expected to increase at an average annual rate of 3.1 per cent, from R7.8 billion in 2024/25 to R8.5 billion in 2027/28.

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

*Lead, coordinate and oversee the transformation agenda for the socioeconomic empowerment, rights and equal treatment of women, youth and persons with disabilities.*

### Mandate

The mandate of the Department of Women, Youth and Persons with Disabilities is to lead socioeconomic transformation for the empowerment and participation of women, young people and those with disabilities through mainstreaming, advocacy, monitoring and evaluation.

### Selected performance indicators

**Table 20.1 Performance indicators by programme and related outcome**

Indicator	Programme	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28

Number of stakeholder engagements on the empowerment of women, youth and persons with disabilities conducted per year	Monitoring, Evaluation, Research and Coordination		12	12	12	12	12	12	12
Number of community mobilisation initiatives on the rights of women, youth and persons with disabilities coordinated per year	Monitoring, Evaluation, Research and Coordination		4	4	4	4	4	4	4
Number of reports on the compliance of government commitments on international and regional instruments produced per year	Monitoring, Evaluation, Research and Coordination		2	2	2	2	2	2	2
Number of research reports on the inclusion of persons with disabilities produced per year	Rights of Persons with Disabilities		1	1	1	1	1	1	1

## Expenditure overview

Over the MTEF period, the department will continue focusing on enhancing the coordination of the national response to gender-based violence; advancing responsive planning, budgeting, monitoring and evaluation within government; protecting the rights of people with disabilities; and encouraging the participation of women, young people and people with disabilities in the economy.

Total expenditure is expected to decrease at an average annual rate of 4.8 per cent, from R1 billion in 2024/25 to R882 million in 2027/28. This is mainly due to the discontinuation of funding from the presidential youth employment initiative to the National Youth Development Agency for implementing the national youth service programme after 2025/26. An estimated 76.6 per cent (R2.3 billion) of the department's budget over the medium term is earmarked for transfers and subsidies to the National Youth Development Agency and the Commission for Gender Equality. As part of South Africa's presidency of the G20, which runs until 30 November 2025, R5.3 million is set aside for the G20 women empowerment working group meetings in 2025/26.

Cabinet has approved additional allocations to the department's baseline amounting to R66.4 million over the medium term (R21.2 million in 2025/26, R22.1 million in 2026/27 and R23.1 million in 2027/28). These funds are intended to support the department's operations, including public wage increases.

### ***Addressing gender-based violence and supporting empowerment***

The president assented to the National Council on Gender-based Violence and Femicide Act (2024) in May 2024, which led to the establishment of the national council on gender-based violence and femicide to address gender-based violence. Until the council is fully set up, the interim gender-based violence and femicide secretariat will continue to coordinate and oversee the implementation of the national strategic plan on gender-based violence and femicide across the 3 spheres of government. Related work is carried out through the *Social Empowerment of Women* subprogramme, which is allocated R67.6 million over the medium term in the *Advocacy and Mainstreaming for the Rights of Women* programme.

The department will continue to advocate for the empowerment of women, young people and people with disabilities over the medium term by ensuring that government departments, civil society organisations and the private sector prioritise including these constituents. To this end, the department plans to host 4 symposiums and conferences in each year over the MTEF period to support the economic empowerment, participation and ownership of its constituents in sectors such as agriculture, trade and the green economy. To support these interventions, R34.4 million is allocated in the *Economic Empowerment of Women* subprogramme in the *Advocacy and Mainstreaming for the Rights of Women* programme over the medium term.

### ***Promoting gender-responsive planning, budgeting, monitoring and evaluation***

In collaboration with National Treasury and the Department of Planning, Monitoring and Evaluation, the department will continue to pilot gender-responsive planning, budgeting, monitoring and evaluation across selected departments and provide capacity-building plans on gender-responsive budgeting for these departments. The department will also continue to assess the strategic and annual performance plans of other departments to ensure that they align with policy priorities related to women, young people and people with disabilities, and promote compliance with international commitments supporting these constituents. To carry out these activities, R30.5 million is allocated over the medium term in the *Research and Knowledge Management* subprogramme in the *Monitoring, Evaluation, Research and Coordination* programme.

The department intends to undertake 36 public participation initiatives and 12 community mobilisation events over the MTEF period to raise awareness and advocate on issues, such as restrictive patriarchal cultural practices, that persistently impede equity. Funding for these initiatives forms part of an allocation of R74.5 million over the medium term to the *International Relations, Stakeholder Management and Capacity Building* subprogramme in the *Monitoring, Evaluation, Research and Coordination* programme.

### ***Promoting the rights of people with disabilities***

The department will continue to advocate for and support policy reviews and frameworks to guide government

in mainstreaming the inclusion of people with disabilities. This will strengthen the direct involvement of the disability sector and enhance its services and awareness programmes. These initiatives are funded through the *Rights of Persons with Disabilities* programme, which is allocated R55.5 million over the MTEF period.

### Supporting the empowerment of young people

To advance the socioeconomic empowerment of young people, the department will continue to develop and review policies, legislation and frameworks – such as the national youth policy and the South African Youth Development Bill – to guide government and other stakeholders. To carry out this work, R35.2 million is allocated over the medium term in the *Advocacy and Mainstreaming for the Rights of Youth* subprogramme in the *Rights of Youth* programme.

## Programme 2: Advocacy and Mainstreaming for the Rights of Women

### Programme purpose

Promote good governance regarding the rights and transformation of the social and economic empowerment of women.

### Objectives

- Advance the socioeconomic empowerment of women on an ongoing basis by:
  - proposing and developing interventions, and coordinating programmes, to support the participation of women in the economy and the realisation of economic justice
  - developing interventions to advance gender equality and establish a just and safe society
  - mainstreaming and promoting good governance on the rights and empowerment of women, transformation, and social and economic justice
  - promoting gender equality.

## Subprogrammes

- *Management: Advocacy and Mainstreaming for the Rights of Women* provides strategic leadership and management to the programme.
- *Social Empowerment of Women* promotes good governance to advance transformation, social justice and the empowerment of women.
- *Economic Empowerment of Women* mainstreams and promotes practices to advance transformation, economic justice and the empowerment of women.
- *Commission for Gender Equality* facilitates transfer payments to the Commission for Gender Equality, which promotes gender equality and respect for women's rights.

## Programme 3: Monitoring, Evaluation, Research and Coordination

### Programme purpose

Provide research, knowledge management, international relations, stakeholder management, monitoring and evaluation for women, youth and persons with disabilities.

### Objectives

- Inform decision-making, policy development and implementation on the socioeconomic empowerment of women, young people and people with disabilities in South Africa in line with national, regional, continental and global development goals by generating, accessing and analysing available data, knowledge, research and information on the implementation of policy and international commitments annually.
- Improve gender-sensitive planning, monitoring and evaluation by analysing other departments' plans and performance against priority indicators and targets for gender development, facilitating the evaluation of key gender policies and programmes, and making recommendations for improvement on an ongoing basis.
- Enable effective participation in and the fulfilment of commitments to international multilateral forums on the empowerment of women, young people and people with disabilities towards an inclusive, transformed and gender-equal society by instituting timely reporting and convening consultative workshops with relevant stakeholders annually.
- Build, maintain and strengthen stakeholder relations towards the socioeconomic empowerment of women, young people and people with disabilities on an ongoing basis.

### Subprogrammes

- *Management: Monitoring, Evaluation, Research and Coordination* provides strategic leadership and management to the programme.
- *Research and Knowledge Management* provides research and knowledge management services on the rights of women, young people and people with disabilities.
- *International Relations, Stakeholder Management and Capacity Building* manages and coordinates international relations, stakeholder participation and capacity building for women, young people and people with disabilities.
- *Monitoring and Evaluation: Women, Youth and Persons with Disabilities* ensures effective government-wide monitoring and evaluation of policy priorities that encourage transformation and the empowerment of women, young people and people with disabilities.

## Programme 4: Rights of Persons with Disabilities

### Programme purpose

Advocate mainstreaming of the rights of persons with disabilities.

### Objectives

- Promote the development and empowerment of people with disabilities to advance their rights by:
  - compiling and submitting reports annually to Cabinet on South Africa's compliance with national, regional and international instruments on the rights and protection of people with disabilities
  - supporting, monitoring and coordinating government's implementation of the 2015 White Paper on the Rights of Persons with Disabilities over the MTEF period.

### Subprogrammes

- Management: Advocacy and Mainstreaming for the Rights of Persons with Disabilities* provides strategic leadership and management to the programme.
- Advocacy and Mainstreaming for the Rights of Persons with Disabilities* advocates for the mainstreaming and social and economic empowerment of people with disabilities.

### Expenditure trends and estimates

## Programme 5: Rights of Youth

### Programme purpose

Advocate mainstreaming of the rights of youth.

### Objective

- Promote the development and empowerment of young people by reviewing legislative frameworks to advance their rights over the medium term.

### Subprogrammes

- Management: Advocacy and Mainstreaming for the Rights of Youth* provides strategic leadership and management to the programme.
- Advocacy and Mainstreaming for the Rights of Youth* advocates for transformation to ensure the empowerment of young people.
- National Youth Development Agency* makes transfer payments to the National Youth Development Agency.

#### Entity overview

The Commission for Gender Equality is an independent statutory body established in terms of section 181 of the Constitution. Its mandate is derived from section 187 of the Constitution and further defined in the amended Commission for Gender Equality Act (1996). The commission's role is to promote respect for gender equality and facilitate its development, protection and attainment.

The commission will prioritise promoting and achieving gender equality over the medium term through activities that are focused on advancing legislation, policies, investigations, monitoring and advocacy. This will be achieved by conducting rigorous research to influence legislative and policy development through providing written submissions to Parliament and relevant stakeholders; monitoring and evaluating the implementation of the recommendations from these submissions; investigating complaints; and implementing appropriate remedies for issues that hinder the realisation of gender equality and the empowerment of women. In its efforts to foster a society free from unlawful discrimination and harassment, the commission will continue to raise awareness about gender equality by advocating for and conducting educational initiatives through stakeholder engagements and outreach programmes.

Human resources are essential to the commission's operations. Accordingly, expenditure on compensation of employees constitutes an estimated 79.7 per cent (R243.7 million) of its budget over the period ahead. This spending is set to increase at an average annual rate of 4.5 per cent, from R74.3 million in 2024/25 to R84.8 million in 2027/28. The commission derives all its revenue through transfers from the department, which are projected to amount to R305.5 million over the MTEF period.

## Entity overview

The National Youth Development Agency was established through the National Youth Development Agency Act (2008), which was amended and signed into law in August 2024 to enhance the agency's governance framework and streamline its functions. The agency is mandated to initiate, facilitate and monitor youth development interventions that promote the empowerment of young people and their participation in economic activities. Accordingly, over the MTEF period, the agency will maintain its focus on implementing interventions designed to support skills development, foster entrepreneurship and create employment opportunities for young people. These interventions will encompass both financial and non-financial enterprise support while facilitating job placements for young people. Financial assistance will be provided in the form of micro-grants to township and rural enterprises, while non-financial support will include business development services, market access and relevant skills training to equip young people to apply entrepreneurial strategies effectively across economic value chains.

Over the MTEF period, the agency plans to provide financial support to a targeted 11 300 enterprises owned by young people, business development interventions to 76 000 young people and job opportunities to a planned 31 500 young entrepreneurs. For this purpose, R1.1 billion is allocated in the economic development through youth entrepreneurship programme, accounting for an estimated 47.2 per cent of the agency's total projected expenditure over the period ahead. To provide a targeted 90 000 young people with skills to enter the job market, R221 million over the medium term is allocated in the decent and sustainable employment through jobs programme.

The agency expects to derive 98.8 per cent (R2.3 billion) of its revenue over the medium term through transfers from the department and the remainder through funds sourced from other public and private sector organisations. Revenue is expected to decrease at an average annual rate of 18 per cent, from R1.1 billion in 2024/25 to R618 million in 2027/28, due to allocations from the presidential youth employment initiative coming to an end in 2025/26.

Executive authority Minister of Police  
Accounting officer Secretary for the Police Service  
Website [www.policesecretariat.gov.za](http://www.policesecretariat.gov.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

## Vote purpose

Provide strategic advice and support to the Minister of Police. Exercise civilian oversight of the South African Police Service to ensure a transformed and accountable police service that reflects the democratic values and principles of the Constitution of the Republic of South Africa.

## Mandate

The Civilian Secretariat for the Police Service was established in terms of the Civilian Secretariat for Police Service Act (2011) and section 208 of the Constitution, which provides for the establishment of a civilian secretariat for the police service to function under the direction of the Minister of Police. In terms of the act, the secretariat's mandate is to conduct civilian oversight of the police service and provide policy and strategic support to the minister, including administrative support for international obligations. The act also makes the secretariat responsible for monitoring the South African Police Service's implementation of the Domestic Violence Act (1998).

## Selected performance indicators

**Table 21.1 Performance indicators by programme and related outcome**

Indicator	Programme	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of capacity-building workshops held with municipalities and stakeholders on crime prevention policies per year	Intersectoral Coordination and Strategic Partnerships	Outcome 20: Safer communities and increased business confidence	25	13	9	9	3	4	5
Number of progress reports on the facilitation of the integrated crime and violence prevention strategy submitted to the secretary for approval per year	Legislation and Policy Development		–1	–1	–1	1	2	2	2
Number of bills submitted to the minister for approval per year	Legislation and Policy Development		5	2	1	1	1	1	3
Number of police oversight initiatives undertaken per year	Civilian Oversight, Monitoring and Evaluations		4	3	2	2	2	2	2
Number of assessments of the implementation of and compliance with the Domestic Violence Act (1998) by the South African Police Service conducted per year	Civilian Oversight, Monitoring and Evaluations		2	2	2	2	2	2	2

1. No historical data available as this is a new indicator.

## Expenditure overview

Over the medium term, the department will focus on developing policies and legislation for the police sector; organising events such as imbizos and public participation programmes to enhance community involvement in the fight against crime; and monitoring and evaluating the performance of the police service to ensure its alignment with constitutional obligations, including compliance with legal frameworks such as the Domestic Violence Act (1998). This will further contribute to fostering safer communities, enhancing business confidence, and building a capable, ethical and developmental state.

The department's total expenditure is projected to increase at an average annual rate of 6.8 per cent, from R156 million in 2024/25 to R189.8 million in 2027/28. Given the labour-intensive nature of the department's work, compensation of employees constitutes an estimated 78.7 per cent (R549.9 million) of its budget over the MTEF period. Spending on compensation of employees is set to increase at an average annual rate of 6.6 per cent, from R122.6 million in 2024/25 to R148.5 million in 2027/28, as a result of Cabinet's approval of an additional R30.8 million over the medium term intended to strengthen the department's capacity and provide cost-of-living adjustments.

### ***Developing policies and legislation for the police sector***

The department's finalisation of the integrated crime and violence prevention strategy, which entails a whole-of-society approach towards preventing violence and crime, is intended to enhance uniformity, consistency, efficiency and effectiveness within the law enforcement value chain over the period ahead. The strategy, which will be rolled out over the medium term, aims to, among other things, standardise practices arising from the fragmented nature of policing at the national, provincial and local levels.

The implementation of the national policing policy – a collaborative endeavour that invites input from the South African Police Service's management, provincial executives and ministerial structures within the justice, crime prevention and security cluster – will also be prioritised over the period ahead. The successful adoption and execution of this policy is expected to enhance the professionalism and quality of policing services nationwide. Among the policy's objectives is the establishment of a police service rooted in community-centred and rights-based approaches, supported by an effective institutional and oversight framework to ensure accountability.

The department expects 5 bills to be finalised over the period ahead: the South African Police Service Amendment Bill, the Stock Theft Amendment Bill, the Firearms Control Amendment Bill, the Second-hand Goods Amendment Bill, and the Civilian Secretariat for Police Service Amendment Bill.

Work for these initiatives is funded through the *Legislation and Policy Development* programme's allocation of R85.9 million over the next 3 years.

### ***Fostering community involvement in fighting crime***

In addition to conducting 3 targeted anti-crime campaigns per year over the next 3 years and a campaign to improve the department's visibility and promote its work, the department plans to facilitate 24 imbizos and public participation programmes in municipalities to raise community awareness of crime prevention strategies. These initiatives will focus on promoting community policing and local government safety forums, and evaluating the functionality of community policing forums. The department also intends to host 12 capacity-building workshops with stakeholders over the period ahead to strengthen collaboration and effectiveness in crime prevention. These activities will be carried out in the *Intersectoral Coordination and Strategic Partnerships* programme, which has a budget of R95.6 million over the medium term.

### ***Monitoring and evaluating the police service's performance***

In its commitment to improving the management of gender-based violence cases, the department plans to compile 2 reports per year over the medium term to evaluate the South African Police Service's compliance with the Domestic Violence Act (1998). To further promote transformation, accountability and professionalism within the police service, the department aims to produce 3 reports per year over the MTEF period. The reports will focus on the police service's handling of complaints, its implementation of the Independent Police Investigative

Directorate's recommendations and an assessment of police integrity. These initiatives are funded through the *Civilian Oversight, Monitoring and Evaluations* programme, which is allocated R119.4 million over the period ahead.

## Programme 2: Intersectoral Coordination and Strategic Partnerships

### Programme purpose

Manage and encourage national dialogue on community safety and crime prevention.

### Objectives

- Contribute to creating a safe and secure environment for society over the medium term through fostering ongoing partnerships with stakeholders such as community safety forums and community policing forums by:
  - facilitating 12 capacity-building workshops with municipalities and stakeholders to heighten community awareness of crime prevention policies and strategies
  - conducting 3 anti-crime campaigns per year.

### Subprogrammes

- Intergovernmental, Civil Society and Public-Private Partnerships* manages and facilitates intergovernmental, civil society and public-private partnerships.
- Community Outreach* promotes, encourages and facilitates community participation in safety programmes.

## Programme 3: Legislation and Policy Development

### Programme purpose

Develop policy and legislation for the police sector and conduct research on policing and crime.

### Objectives

- Provide for constitutionally compliant legislation, research and evidence-led policies for policing and public safety over the medium term by:
  - submitting 6 progress reports to the secretary for approval on facilitating the implementation of the integrated crime and violence prevention strategy
  - submitting 4 bills to the Minister of Police for Cabinet's approval and to solicit public comment.

### Subprogrammes

- *Policy Development and Research* develops policies and undertakes research in various areas of policing and crime.
- *Legislation* produces legislation for effective policing and provides legal advice and legislative support to the Minister of Police and the Secretary for the Police Service.

## Programme 4: Civilian Oversight, Monitoring and Evaluations

### Programme purpose

Oversee, monitor and report on the performance of the South African Police Service. Provide for the functions of the Office of the Judge for the Directorate for Priority Crime Investigation, and the National Forensic Oversight and Ethics Board.

### Objectives

- Provide effective oversight, monitoring and evaluation that contributes to an accountable and transformed police service by:
  - conducting regular oversight visits at selected police stations over the medium term and compiling 6 reports on the outcomes of these visits for approval by the secretary

- compiling 2 reports on compliance with the Domestic Violence Act (1998) by the South African Police Service each year over the medium term.

## Subprogrammes

- *Police Performance, Conduct and Compliance* monitors the performance, conduct and transformation of the South African Police Service and its compliance with policing legislation and regulations.
- *Policy and Programme Evaluations* evaluates the effectiveness of all crime prevention and other programmes implemented by the South African Police Service.
- *Office of the Directorate for Priority Crime Investigation Judge* funds the operations of the Office of the Judge for the Directorate for Priority Crime Investigation, which investigates complaints by any member of the public and/or the Directorate for Priority Crime Investigation in terms of the South African Police Service Amendment Act (2012).
- *National Forensic Oversight and Ethics Board* funds the operations of the National Forensic Oversight and Ethics Board, which oversees processes related to the collection, retention, storage, destruction and disposal of DNA samples.

## Vote purpose

Contribute to a just, peaceful and safer South Africa through the effective and humane incarceration of inmates and the rehabilitation and social reintegration of offenders.

## Mandate

The mandate of the Department of Correctional Services is derived from the Correctional Services Act (1998), as amended; the Criminal Procedure Act (1977); the 2005 White Paper on Corrections; and the 2014 White Paper on Remand Detention Management in South Africa. The legislation requires the department to contribute to maintaining and promoting a just, peaceful and safe society by correcting offending behaviour in a safe, secure and humane environment, and in doing so, facilitate optimal rehabilitation and reduce repeat offending.

## Selected performance indicators

**Table 22.1 Performance indicators by programme and related outcome**

1. Indicator wording amended in line with the department's 2025-2030 strategic plan.

## Expenditure overview

Over the medium term, the department will continue to focus on its core responsibilities: detaining inmates in safe, secure and humane conditions in correctional centres and remand detention facilities, providing sentenced offenders with needs-based rehabilitation programmes and interventions, ensuring that offenders' health needs are met during incarceration, and reintegrating offenders into communities as law-abiding citizens by effectively managing non-custodial sentences and parole.

### ***Ensuring safe, secure and humane detention***

Effective rehabilitation relies on a combination of physical security, which remains a priority for ensuring the safety of officials, inmates and the public; advanced technology; and efficient operations. The department will implement strategies over the medium term to prevent escapes, assaults and fatalities across correctional facilities, and in doing so, ensure humane conditions for inmates. A national security committee has also been established to address urgent security issues such as escapes and injury in correctional facilities, reinforcing the department's commitment to maintaining a safe, rehabilitative environment. To address urgent security issues, the department plans to enhance security operations by providing advanced security equipment such as body armour, metal detectors and mobile parcel scanners.

These activities are carried out through the *Security Operations, Facilities, Remand Detention* and the *Offender Management* subprogrammes, all in the *Incarceration* programme. Spending in the programme accounts for an estimated 61.0 per cent (R56.2 billion) of the department's budget over the MTEF period, mainly on compensation of employees. Additionally, the department has been allocated R228.97 million to cater for the cost of living adjustment over the MTEF period.

### ***Providing needs-based rehabilitation***

The department's needs-based rehabilitation programme focuses on addressing the underlying factors that contribute to criminal behaviour, aiming to reduce recidivism and facilitate successful reintegration into society. This approach is characterised by tailored programmes that meet the specific needs of offenders, including psychological, social and spiritual support. These are aimed at enhancing life skills and providing essential literacy, education and vocational training. The *Rehabilitation* programme is allocated R7 billion over the medium term, of which R5.4 billion is designated for compensation of employees.

### ***Offenders' health care***

Part of the department's prioritisation of inmates' welfare entails providing continuous access to primary health care, mental health services and nutritional and hygiene services. To ensure that health and nutrition services are not compromised, in accordance with applicable legislation, the *Care* programme is allocated R8.1 billion over the MTEF period, representing 8.9 per cent of the department's total budget. Of this amount, R3.5 billion is designated for compensation of employees, including nurses, psychologists, social workers and doctors.

### ***Reintegrating offenders***

Over the period ahead, the department will focus on enhancing social reintegration programmes for offenders. This involves, among other things, engaging victims in dialogue and restorative justice initiatives that are intended to foster healing and reconciliation. This initiative is part of a broader strategy aimed at reducing recidivism and promoting community safety. To implement this, the *Social Reintegration* programme is allocated R3.9 billion over the next 3 years.

## Programme 2: Incarceration

### Programme purpose

Provide for safe and secure conditions of detention consistent with maintaining the human dignity of inmates. Administer, profile and consider offenders for release or placement into the system of community corrections.

### Objectives

- Enhance safety and security in correctional centres and remand detention facilities over the medium term by:
  - reducing the percentage of escapes by 0.001 per cent per year
  - reducing the percentage of inmates injured because of reported assaults by 0.05 per cent per year
  - maintaining the percentage of confirmed unnatural deaths in correctional facilities at 0.032 per cent.
- Provide facilities that contribute to humane incarceration by ensuring that:
  - overcrowding remains at or below 50 per cent over the MTEF period
  - 9 infrastructure projects are completed by 2025/26, 11 are completed in 2026/27 and 4 are completed in 2027/28.
- Provide an effective and efficient remand detention system over the MTEF period, while ensuring the protection of human rights and a safe and secure environment, by ensuring that:
  - 90 per cent of remand detainees are subjected to continuous risk assessment each year
  - all court referrals of remand detainees who qualify for bail are reviewed in terms of the Criminal Procedure Act (1977)
  - all court referrals of remand detainees are submitted in terms of section 49G of the Correctional Services Act (1998).
- Increase the target for offender profiles approved for placement by the correctional supervision parole board from 69 per cent in 20225/26 to 73 per cent in 2027/28.

### Subprogrammes

- *Security Operations* funds activities aimed at providing safe and secure conditions for inmates, consistent with human dignity.
- *Facilities* provides physical infrastructure that supports safe custody, humane conditions and the provision of correctional and development programmes, care and general administration.
- *Remand Detention* ensures an effective and efficient remand detention system consistent with human rights in a safe and secure environment.
- *Offender Management* funds administrative activities and operations for correctional services that create an environment that supports the rehabilitation and safety of offenders. This subprogramme also funds the activities of correctional supervision and parole boards and ensures that eligible offenders are considered for parole through cases submitted by case management committees.
- *Judicial Inspectorate for Correctional Services* transfers funds to the Judicial Inspectorate for Correctional Services, an oversight body established to ensure the protection of inmates' rights and monitor conditions within correctional facilities in terms of the Correctional Services Act (1998).

## Programme 3: Rehabilitation

### Programme purpose

Provide offenders with needs-based programmes and interventions to facilitate their rehabilitation and enable their social reintegration.

### Objectives

- Improve access to rehabilitation and developmental interventions over the medium term by ensuring that:
  - 84 per cent of sentenced offenders with correctional sentence plans complete correctional programmes
  - 90 per cent of offenders meet the qualifying criteria for registration in long and short occupational skills programmes
  - the percentage of offenders participating in further education and training increases by 1 per cent in 2025/26 to 92 per cent in 2027/28
  - 91 per cent of offenders participate in general education and training programmes in 2025/26, increasing by 1 per cent to 93 per cent in 2027/28
  - the pass rate of offenders who write the grade 12 national senior certificate examinations increases from 78 per cent in 2025/26 to 79 per cent in 2027/28.
- Enhance self-sufficiency and sustainability over the medium term by ensuring that:
  - 72 per cent of offenders participate in agricultural activities
  - 70 per cent of offenders participate in production workshops.
- Enhance the social functioning and reintegration of offenders into communities over the medium term by increasing the percentage of:
  - offenders, parolees and probationers receiving social work services from 78 per cent in 2025/26 to 82 per cent in 2027/28
  - inmates receiving spiritual care services from 30 per cent in 2024/25 to 34 per cent in 2027/28
- Maintaining the percentage of inmates receiving psychological care services at 24 per cent over the medium term.

### Subprogrammes

- Correctional Programmes* provides needs-based correctional programmes that target offending behaviour based on the correctional sentence plans of offenders. The aim of this subprogramme is to raise awareness, provide information and develop life skills.
- Offender Development* provides offenders with needs-based programmes and interventions to facilitate their rehabilitation and personal development.

2. Rand million.

## Programme 4: Care

### Programme purpose

Provide needs-based care services for the personal wellbeing of all inmates in the department's custody.

### Objectives

- Maintain the health and personal wellbeing of inmates over the medium term by ensuring that:
  - the viral load suppression rate of HIV-positive offenders on antiretroviral therapy is increased from 96 per cent in 2025/26 to 97 per cent in 2027/28
  - the pulmonary cure rate of TB-positive offenders is increased from 96 per cent in 2025/26 to 97 per cent in 2027/28
  - 90 per cent of inmates are screened for diabetes and hypertension
  - the target of 100 per cent of inmates 18 years and older who are newly diagnosed and placed on treatment for hypertension and diabetes is maintained
  - all inmates with special dietary needs are catered for through therapeutic diets
  - hypertension and diabetes are diagnosed and treated early among all inmates to reduce related morbidity and mortality.

### Subprogrammes

- *Nutritional Services* provides inmates with appropriate nutritional services during their incarceration.
- *Health and Hygiene Services* ensures that inmates are provided with appropriate access to health care and hygiene services.

## Programme 5: Social Reintegration

### Programme purpose

Provide effective supervision for offenders placed under the system of community corrections and facilitate their social reintegration into communities.

### Objectives

- Improve the effectiveness of the parole system over the medium term by:
  - ensuring that 97 per cent of parolees and probationers comply with their conditions and that their status is not revoked
  - increasing the number of victims participating in restorative justice programmes from 5 900 in 2025/26 to 7 100 in 2027/28
  - increasing the number of offenders, parolees and probationers participating in restorative justice programmes from 4 500 in 2025/26 to 5 500 in 2027/28
  - increasing the number of economic opportunities facilitated for offenders, parolees and probationers from 60 in 2025/26 to 72 by 2027/28
  - increasing the number of victims who benefit from facilitated socioeconomic support from 60 in 2025/26 to 72 by 2027/28
  - increasing the number of parolees and probationers participating in community initiatives from 7 000 in 2024/25 to 7 400 in 2027/28.

## Subprogrammes

- *Supervision* provides effective supervision for offenders placed under correctional and parole supervision to enhance public safety.
- *Community Reintegration* provides and facilitates support systems for the reintegration of offenders into society.
- *Office Accommodation: Community Corrections* funds the provision of 225 community corrections offices (including satellite offices and service points) to enhance community reintegration.

## Department purpose

*Inspect, monitor and report on the treatment of inmates and the conditions of correctional centres.*

## Mandate

The Judicial Inspectorate for Correctional Services is an oversight body established to ensure the protection of inmates' rights and monitor conditions within correctional facilities. The inspectorate's mandate is derived from the Correctional Services Act (1998), which empowers it to conduct inspections, monitor treatment and report on the conditions of detention in correctional centres; and to ensure compliance with national and international standards, safeguard human rights, and report on the state of correctional facilities to Parliament and the Minister of Correctional Services to promote accountability and transparency in the correctional system. The inspectorate was designated as a national government component from 1 April 2024.

1. No historical data available.

## Expenditure overview

The inspectorate plays a crucial role in overseeing correctional facilities and ensuring that the rights of inmates are upheld. In its efforts to ensure that correctional facilities comply with human rights standards, the inspectorate will focus on improving its oversight functions and enhancing its capacity over the next 3 years. This entails developing the skills and expertise of staff and fostering effective monitoring and adherence to

human rights standards.

To give effect to this, over the period ahead, the inspectorate will aim to increase the number of correctional facilities inspected on the conditions for and treatment of inmates from 136 in 2024/25 to 160 in 2027/28, and ensure that 80 per cent of investigations are mandated within 7 days of notification. These activities are funded through the *Inspections and Compliance Monitoring* programme's allocation of R59.2 million over the MTEF period, accounting for 15.1 per cent of the inspectorate's total budget.

As the inspectorate's work is labour intensive, an estimated 66.0 per cent (R258.5 million) of its total budget over the medium term is allocated to compensation of employees. Spending on goods and services accounts for an estimated 33.6 per cent (R126.5 million) of total projected costs, mainly for travel and subsistence, supplies associated with on-site inspections, and the investigations and legal support that are vital for addressing prisoner complaints and managing legal proceedings.

Expenditure is projected to increase at an average annual rate of 5.8 per cent, from R114.6 million in 2024/25 to R135.9 million in 2027/28. The inspectorate has an estimated budget of R387.1 million over the period ahead. The inspectorate is also allocated additional funding of R2.6 million to provide for cost-of-living adjustments over the medium term.

## Programme 2: Inspections and Compliance Monitoring

### Programme purpose

Manage and administer complaints and mandatory reports and ensure that inspections and investigations are conducted timeously.

### Objectives

- Improve independent oversight of correctional facilities by:
  - improving the treatment of inmates by increasing the number of inspections at correctional facilities from 136 in 2024/25 to 160 in 2027/28
  - ensuring that all targeted inspections are carried out over the MTEF period
  - ensuring effective oversight by conducting investigations on the treatment of inmates and conditions in correctional facilities
  - ensuring that 70 per cent of complaints are analysed, reported and provided with feedback within 60 days
  - ensuring that all unnatural deaths are reported over the MTEF period.

### Subprogramme

- *Legal and Special Operations* protects the dignity of inmates by managing and overseeing complaints, inspections, investigations, reports and recommendations made on conditions in correctional and remand detention centres.

### Expenditure trends and estimates

## Programme 3: Regional Coordination and Oversight

### Programme purpose

Manage and coordinate regional functions and activities to ensure effective oversight.

### Objectives

- Improve independent oversight of correctional facilities over the medium term by ensuring:
  - the effective management, supervision and control of independent correctional centre visitors
  - that 148 visitors committee meetings are conducted.

### Subprogramme

- Operations* enhances the management, control and supervision of independent correctional centre visitors through the effective and efficient management of regional operational, human resource and financial matters; provides operational support to independent correctional centre visitors; monitors compliance with section 94 of the Correctional Services Act (1998), as amended, through visitors committee meetings; and promotes public interest and involvement in corrections.

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

## Vote purpose

*Defend and protect the Republic of South Africa, its territorial integrity and its people, in accordance with the Constitution and the principles of international law regulating the use of force.*

## Mandate

The Department of Defence derives its mandate from section 200 of the Constitution; the Defence Act (2002), as amended by the Defence Amendment Act (2010); the 1996 White Paper on Defence; and the 2015 South African Defence Review. The department is required to provide, manage, prepare and employ defence capabilities in line with South Africa's needs.

## Selected performance indicators

Number of hours at sea per year	Maritime Defence		7 614	2 770	2 641	8 000	8 000	8 000	8 000

## Expenditure overview

The department will continue to focus on protecting the country's people and territorial integrity over the medium term through internal and external operations. This includes safeguarding South Africa's borders and participating in regional peace support operations.

Expenditure is set to increase at an average annual rate of 3 per cent, from R55.5 billion in 2024/25 to R60.7 billion in 2027/28. As the department's work is labour intensive, an estimated 65.1 per cent (R115.1 billion) of its budget of R175.1 billion over the medium term is allocated to compensation of employees. However, the budget for compensation of employees remains constrained. To lessen the impact of this over the next 3 years, the department will continue to manage commuted overtime within the South African Military Health Service by ensuring that it does not exceed 30 per cent of each employee's total annual salary package and allow natural attrition to ensure that personnel numbers do not exceed 73 000. To further manage personnel costs over the next 2 years, the department will facilitate the participation of a targeted 4 000 eligible members of the South African National Defence Force in the government-wide early retirement programme, which allows retirement without penalties on pension benefits.

Over the next 3 years, R66.5 million is allocated to cover costs related to the 13 staff members overseeing Denel, which shifts from the abolished Department of Public Enterprises to the Department of Defence as part of the national macro organisation of government. A further R34.7 million is allocated to the department over the medium term to cover expenses associated with the appointment of an additional deputy minister of defence and military veterans.

### ***Safeguarding South Africa's borders, territorial integrity and supporting the police***

Border security remains a priority for the South African National Defence Force. Accordingly, over the MTEF period, the department plans to continue to deploy 15 landward sub-units to patrol 4 471km of South Africa's land borders with Botswana, eSwatini, Lesotho, Mozambique, Namibia and Zimbabwe.

The department will continue to prioritise the acquisition of vehicles and advanced technologies that serve as a force multiplier to enhance border protection and prevent illegal activities. It will also continue to support the South African Police Service to tackle internal security threats as they arise. These activities are carried out in the *Support to the People* subprogramme in the *Force Employment* programme, which has a budget of R4.1 billion over the period ahead. An additional R150 million is allocated in 2026/27 in the same subprogramme for the deployment of South African National Defence Force members to support the South African Police Service during the 2026 local government elections.

### ***Participating in regional peace support operations***

An additional allocation of R5 billion over the period ahead is expected to cover expenses related to South Africa's regional peacekeeping commitments in the Democratic Republic of the Congo through Operation Thiba. This spending is in the *Regional Security* subprogramme in the *Force Employment* programme.

## Programme 2: Force Employment

### Programme purpose

Provide and employ defence capabilities, including an operational capability, to successfully conduct all operations as well as joint, interdepartmental, interagency and multinational military exercises.

### Objectives

- Ensure successful joint force employment by:
  - providing and employing a special operations capability in accordance with national requirements by March 2028

- ensuring full participation in the number of peace missions instructed by the president by March 2028
- conducting 9 joint interdepartmental, interagency and multinational military force preparation exercises, excluding Special Forces exercises, by March 2028
- conducting internal operations in the interest of protecting the territorial integrity and sovereignty of South Africa on an ongoing basis
- supporting other government departments and complying with international obligations on an ongoing basis
- providing a special operation capability on an ongoing basis
- providing external deployments on an ongoing basis.

## Subprogrammes

- *Strategic Direction* formulates and controls strategies, policies and plans for the employment of forces to promote peace, stability and security in the region and on the continent.
- *Operational Direction* provides operational direction to joint and multinational task forces and joint tactical headquarters through an operational-level headquarters.
- *Special Operations* provides and employs a special operations capability within the approved Special Forces mandate for the South African National Defence Force.
- *Regional Security* provides for the external deployment of forces to support South Africa's commitment to regional, continental and global security.
- *Support to the People* provides for the internal deployment of forces to support the South African Police Service and other government departments. This includes safeguarding borders, helping during disasters, and conducting search and rescue missions.

## Programme 3: Landward Defence

### Programme purpose

Provide prepared and supported landward defence capabilities for the defence and protection of South Africa.

## Objectives

- Defend and protect South Africa and its territory by:
  - providing 1 infantry capability for external deployment and for internal safety and security, including border safeguarding, per year
  - exercising 1 tank and armoured car capability and providing 1 squadron for internal deployment per year
  - exercising 1 composite artillery capability and providing 1 battery for internal deployment per year
  - exercising 1 air defence artillery capability and providing 1 battery for internal deployment per year
  - providing 1 sustained composite engineer capability for external deployment and for internal safety and security, and exercising 1 field engineer capability per year
  - providing 1 signal capability for external deployment and for internal signal support and exercising 1 composite signal capability per year
  - providing combat ready operational intelligence capabilities per year
  - providing combat ready tactical command and control capabilities per year
  - providing 2 infantry companies and 1 battalion headquarters for internal deployments per year.

## Subprogrammes

- *Strategic Direction* directs, orchestrates and controls the South African Army in achieving its mission to prepare and provide landward capabilities for the defence and protection of South Africa.
- *Infantry Capability* provides combat-ready infantry capabilities through training, preparing, exercising and supporting mechanised, motorised, specialised and airborne infantry units.
- *Armour Capability* provides combat-ready armour capabilities through training, preparing, exercising and supporting tank and armoured car units.
- *Artillery Capability* provides combat-ready artillery capabilities through training, preparing, exercising and supporting composite and light artillery units.
- *Air Defence Artillery Capability* provides combat-ready air defence artillery capabilities through training, preparing, exercising and supporting air defence artillery units.
- *Engineering Capability* provides combat-ready engineering capabilities to ensure mobility and establish infrastructure during exercises and deployments through training, preparing, exercising and supporting field and construction engineer units.
- *Operational Intelligence* provides combat-ready operational intelligence capabilities to enable the successful planning and execution of operations through training, preparing, exercising and supporting intelligence units.
- *Command and Control Capability* provides combat-ready tactical command and control capabilities for integrated forces during force preparation and employment.
- *Support Capability* provides first-line, second-line and third-line support to units and bases, and ensures support to deployed combat units through training, preparing, exercising and supporting first-line and second-line maintenance units and workshops.
- *General Training Capability* provides general training capabilities through basic military training, junior leader training, common landward training, and command and management training at the training depot and decentralised units, the South African Army Gymnasium, the combat training centre and the South African Army College.
- *Signal Capability* provides combat-ready signal capabilities to ensure command, control and communications during exercises and deployments through training, preparing, exercising and supporting signal units.

## Programme 4: Air Defence

### Programme purpose

Provide prepared and supported air defence capabilities for the defence and protection of South Africa.

### Objectives

- Defend and protect South Africa and its airspace by providing:
  - 4 helicopter squadrons and 1 combat support helicopter squadron per year
  - 3 medium transport squadrons (1 VIP squadron, 1 maritime transport squadron, 1 light transport squadron and 1 liaison squadron) and 9 reserve squadrons per year
  - 1 air combat squadron per year
  - ongoing 24-hour air command and control capabilities.

### Subprogrammes

- Strategic Direction* provides strategic direction to the programme by formulating and controlling strategies, policies and plans through the air force office to prepare and provide the capabilities required by the Chief of the South African National Defence Force.
- Operational Direction* provides operational direction to the programme by means of an air command.
- Helicopter Capability* provides and sustains light utility helicopters, medium transport helicopters and combat support helicopters crewed by appropriately qualified personnel.
- Transport and Maritime Capability* provides and sustains transport and maritime aircraft crewed by appropriately qualified personnel.
- Air Combat Capability* provides and sustains fighter aircraft crewed by appropriately qualified personnel.
- Operational Support and Intelligence Capability* prepares, develops, provides and supports protection, intelligence systems and counterintelligence support to the South African Air Force through protection squadrons, intelligence subsystems and intelligence training.
- Command and Control Capability* supplies and maintains command and control elements in support of air battle space operations.
- Base Support Capability* provides air base infrastructure facilities to squadrons and resident units on bases, including the maintenance of all relevant systems and personnel, to support flying operations.
- Command Post* renders command and control over all missions flown.
- Training Capability* provides for the general education, training and development of air force personnel.

- *Technical Support Services* establishes, maintains and prepares optimised technical and tactical logistics support capabilities to provide support to multiple defence systems and manage air service units.

## Programme 5: Maritime Defence

### Programme purpose

Provide prepared and supported maritime defence capabilities for the defence and protection of South Africa.

### Objectives

- Defend and protect South Africa and its maritime zones by providing:
  - a surface combat and patrol capability of 3 frigates, 1 combat support vessel, 2 offshore patrol vessels and 3 inshore patrol vessels per year
  - a subsurface combat capability of 2 submarines per year
  - a mine warfare capability of 2 vessels in each annual operational cycle to ensure safe access to South Africa's harbours and mine clearance, where required
  - a maritime reaction squadron capability, comprising an operational boat division, an operational diving division and a naval reaction division per year
  - an ongoing hydrographic survey capability to ensure safe navigation by charting areas and to meet international obligations.

### Subprogrammes

- Maritime Direction* provides strategic direction to the programme by formulating and controlling strategies, policies, plans and advice to prepare and provide maritime defence capabilities.
- Maritime Combat Capability* provides mission-ready and supported maritime combat capabilities in accordance with the department's approved force design.
- Maritime Logistics Support Capability* sustains the availability of the force structure elements in the naval force design to ensure compliance with ordered operational commitments.
- Maritime Human Resources and Training Capability* ensures that maritime combat and support capability requirements are met in terms of qualified personnel.
- Base Support Capability* provides a general base support capability to ships, submarines, shore units and other identified clients to ensure that the fleet complies with specified operational readiness levels.

## Programme 6: Military Health Support

### Programme purpose

Provide prepared and supported health capabilities and services for the defence and protection of South Africa.

### Objectives

- Ensure prepared and supported health capabilities and services by providing:
  - a health support capability of 5 medical battalion groups and 1 specialist medical battalion group for deployed and contingency forces over the medium term
  - a comprehensive, multidisciplinary military health service to a projected patient population of 302 000 principal members and their beneficiaries per year.

### Subprogrammes

- Strategic Direction* formulates strategy, policies and plans, and provides advice from the Surgeon-General's office to prepare and provide the capabilities required by the Chief of the South African National Defence Force.
- Mobile Military Health Support* provides health-support elements for deployed and contingency forces, and health services to provincial hospitals and the Department of Health as and when ordered.
- Area Military Health Service* provides a comprehensive, self-supporting, multidisciplinary geographic military health service through formation headquarters and commanding and controlling military health units to ensure a healthy military community.
- Specialist/Tertiary Health Service* provides a specialist health service to develop and maintain tertiary military health capabilities within the parameters of relevant legislation, as contained in the South African military health service strategy.
- Military Health Product Support Capability* provides for: the warehousing of pharmaceuticals, sundries, military health mobilisation equipment and unique stock; the procurement of military health products, materials and services; an asset management service; military health product systems; and cooperative common military health logistics.
- Military Health Maintenance Capability* provides general base support services to identified military health service units to sustain and maintain the approved force design and structure.
- Military Health Training Capability* provides a military health training service to develop and maintain military health training capabilities within the parameters of relevant legislation and policies.

## Programme 7: Defence Intelligence

### Programme purpose

Provide defence intelligence and counterintelligence capabilities, and defence diplomacy administrative support to the department.

### Objective

- Provide intelligence and counterintelligence capabilities, a defence intelligence service and defence diplomacy administrative support to the department on an ongoing basis.

### Subprogrammes

- *Operations* provides timely defence prediction, intelligence and counterintelligence capabilities and services.
- *Defence Intelligence Support Services* provides defence diplomacy capabilities.

## Programme 8: General Support

### Programme purpose

Provide general support capabilities and services to the department.

### Objectives

- Provide ongoing logistics services to the department in terms of warehousing for ammunition, main equipment and stores; and provide the defence works capability, the capital works programme and the defence facility refurbishment programme by ensuring that the department has:
  - appropriate, ready and sustained centralised common matériel management

- appropriate, ready and sustained centralised facilities management
- appropriate, ready and sustained centralised common logistics services and movement management
- sound strategic direction on logistics.
- Provide command and management information systems and related services to the department over the medium term by providing:
  - strategic direction and staff support services to the general support division
  - integrated department ICT solutions and enablers
  - an information warfare strategic direction capability
  - maintenance and support for information systems.
- Provide a military policing capability to the department over the medium term by:
  - investigating new and backlogged criminal cases
  - conducting planned crime prevention operations
  - sustaining 4 regional headquarters, 22 area offices and 22 detachments for crime prevention and the investigation of criminal cases
  - investigating reported corruption and fraud cases
  - sustaining a provost company for operational deployments
  - sustaining 2 military correctional facilities for detention and rehabilitation.

## Subprogrammes

- *Joint Logistics Services* provides logistics services to the department in terms of warehousing for ammunition, main equipment and stores; and provides the defence works capability, the capital works programme and the defence facility refurbishment programme.
- *Command and Management Information Systems* provides command and management information systems-related services to the department.
- *Military Police* provides a military policing capability to the department.
- *Technology Development* provides for establishing and sustaining selected science and technology capabilities in the defence industry.
- *Departmental Support* provides for the payment of corporate departmental obligations such as transfer payments to public entities, legal fees, external audits and bank charges.

#### Entity overview

The Armaments Corporation of South Africa, which is guided by the Armaments Corporation of South Africa, Limited Act (2003), ensures that the South African National Defence Force is equipped with high-quality, reliable and technologically advanced defence matériel. By fulfilling its mission, the corporation contributes to the overall effectiveness and readiness of the defence force while actively enabling the development of the local defence industry by supporting local manufacturers and fostering research and development initiatives.

The corporation's primary focus over the MTEF period will be on meeting the department's requirements in terms of defence matériel acquisition, research, development analysis, tests and evaluation. To achieve this, over the period ahead, the corporation will continue its efforts to improve its systems and processes, provide support to the local defence industry and improve its capacity to generate revenue.

Accordingly, the corporation aims to ensure that it maintains the technological requirements to meet 95 per cent of its contractual milestones over the medium term. For this purpose, an estimated R1.8 billion over the period ahead is set aside for managing strategic research facilities. The corporation plans to continue ensuring that the procurement of capital assets for the defence force over the next 3 years is cost efficient and meets its operational needs. To this end, the corporation aims to convert 95 per cent of the department's capital requirements into placed orders, which entails acquiring defence matériel, each year over the medium term. R808.6 million over the period ahead is allocated for this purpose.

Providing support to the South African defence industry involves facilitating its participation in international defence exhibitions and events, and managing requests from the private sector to use South African National Defence Force's equipment, personnel and facilities for marketing purposes. R56 million over the next 3 years is allocated to carry out these activities.

Expenditure is expected to increase at an average annual rate of 3.8 per cent, from R2.8 billion in 2024/25 to R3.2 billion in 2027/28, with goods and services accounting for an estimated 52.4 per cent (R4.7 billion) of the corporation's total budget over the medium term. The corporation expects to derive 50.9 per cent (R4.6 billion) of its revenue over the period ahead through transfers from the department and the remainder through commercial revenue and interest on investments. Revenue is set to increase at an average annual rate of 4.9 per cent, from R2.7 billion in 2024/25 to R3.2 billion in 2027/28.

## Castle Control Board

### Selected performance indicators

**Table 23.26 Castle Control Board performance indicators by programme/objective/activity and related outcome**

Indicator	Programme/Objective/Activity	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Gross revenue generated per year	Increased public profile and positive perception across all sectors of the community	Outcome 15: Social cohesion and nation building	R8.7m	R10.8m	R10.9m	R10.8m	R10.2m	R10m	R11.2m
Number of visitors to the Castle of Good Hope per year	Maximising the tourist potential of the Castle of Good Hope		33 452	73 765	102 326	130 000	170 000	180 000	190 000
Number of interns hosted at the Castle of Good Hope per year	Increased public profile and positive perception across all sectors of the community	Outcome 1: Increased employment and work opportunities	7	10	13	12	14	14	14

### Entity overview

The Castle Control Board derives its primary authority from the Castle Management Act (1993), which mandates the preservation and protection of the military and cultural heritage of the Castle of Good Hope. Aspects of the board's mandate are also derived from the Defence Endowment Property and Account Act (1922) and the National Heritage Resources Act (1999). The board aims to implement its revenue optimisation strategy over the medium term to remain viable as a self-sustaining entity. This will mainly entail efforts to optimise the heritage tourism potential of the Castle of Good Hope and increase its accessibility to the broader public.

Accordingly, key activities over the medium term include delivering a comprehensive range of visitor services. These include an improved script for tour guides, better curated museums and exhibitions, an upgraded information centre and website, better and clearer signage to allow for effective self-guided tours and directions to the site, and an improved security system in and around the precinct to ensure the safety and wellbeing of all visitors. As a result, the number of visitors to the Castle of Good Hope is expected to increase from 130 000 in 2024/25 to 190 000 in 2027/28. An estimated R928 000 over the next 3 years is allocated for these activities. As a result, revenue from operating activities is expected to increase at an average annual rate of 11.4 per cent, from R4.7 million in 2024/25 to R6.5 million in 2027/28.

Spending over the medium term is expected to decrease at an average annual rate of 0.7 per cent, from R10.7 million in 2024/25 to R10.5 million in 2027/28, in line with cost-cutting measures implemented by the board such as conducting in-house recruitment.

### Programmes/Objectives/Activities

**Table 23.27 Castle Control Board expenditure trends and estimates by programme/objective/activity**

## Company overview

Denel was incorporated as a private company in 1992 in terms of the Companies Act (1973), with the South African government as its sole shareholder. It operates in the military aerospace and landward defence environment and provides strategic defence equipment. As part of the national macro organisation of government, Denel will migrate from the abolished Department of Public Enterprises to the Department of Defence.

The company's broad focus over the medium term will be on implementing its turnaround plan, which entails rolling out its new operating model, restructuring, and optimising its cost structure. The plan has a funding requirement of R5.2 billion, of which the company committed to raise R1.8 billion by disposing of non-core assets. The remaining R3.4 billion was allocated to Denel through the Special Appropriation Act (2022). The cash injection was intended to implement the turnaround plan, settle legacy obligations and address the company's liquidity requirements to support operations and execute its order pipeline. However, the company's financial challenges remain, prompting an independent review to be conducted over the next 3 years. The review will, among other things, focus on the company's strategy; operations; funding model; and balance sheet optimisation, including capital structure and assets.

Expenditure is expected to increase at an average annual rate of 10.3 per cent, from R2.6 billion in 2024/25 to R3.5 billion in 2027/28, because of the expected improvement in business activity and the intensified implementation of the turnaround plan. Spending on goods and services accounts for 51.1 per cent (R5.1 billion) of the total budget. Revenue is projected to increase at an average annual rate of 14.5 per cent, from R2.6 billion in 2024/25 to R3.8 billion in 2027/28, also due to the implementation of the turnaround strategy. The company expects to derive 96.3 per cent (R10.8 billion) of its revenue over the period ahead through the sale of defence and security equipment and the services that it provides.

Website	www.ipid.gov.za					

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

## Vote purpose

*Ensure independent oversight of the South African Police Service and the Municipal Police Services. Conduct independent and impartial investigations of identified criminal offences allegedly committed by members of the South African Police Service and the Municipal Police Services and make appropriate recommendations.*

## Mandate

The Independent Police Investigative Directorate exercises its functions in accordance with the Independent Police Investigative Directorate Amendment Act (2024). The act gives effect to the provisions of section 206(6) of the Constitution, which provides for the establishment of an independent police complaints body that must investigate any alleged misconduct of, or offence committed by, a member of the police service. The directorate's work centres on investigating serious and priority crimes allegedly committed by members of the South African Police Service and Municipal Police Services.

The act grants the directorate an extended mandate and changes the focus of the directorate's work from a complaints-driven organisation to one that prioritises investigations. It also places stringent obligations on the South African Police Service and Municipal Police Services to report matters that must be investigated by the directorate and ensures that the directorate's disciplinary recommendations are implemented.

## Selected performance indicators

**Table 24.1 Performance indicators by programme and related outcome**

Indicator	Programme	MTDP outcome	Audited performance			Estimated performance	MTEF targets		
			2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28
Number of investigations of death in police custody that are decision-ready within 90 days of registration per year	Investigations and Provincial Coordination	Outcome 20: Safer communities and increased business confidence	– <sup>1</sup>	– <sup>1</sup>	– <sup>1</sup>	50	60	60	60
Number of investigations of death as a result of police action that are decision-ready within 210 days of registration per year	Investigations and Provincial Coordination		– <sup>1</sup>	– <sup>1</sup>	– <sup>1</sup>	30	60	60	60
Number of investigations of attempted murder that are decision-ready within 210 days of registration per year	Investigations and Provincial Coordination		– <sup>1</sup>	– <sup>1</sup>	– <sup>1</sup>	– <sup>1</sup>	130	130	130

## Expenditure overview

Over the medium term, the directorate will focus on combatting gender-based violence and femicide; fostering broader engagement, particularly among rural communities; enhancing investigative capacity; and streamlining investigation processes to more effectively combat corruption and address its backlog of investigations.

Owing to the labour-intensive nature of the directorate's work, an estimated 68.8 per cent (R1.2 billion) of its total budget over the MTEF period is allocated for spending on compensation of employees, which is projected to increase at an average annual rate of 7.8 per cent, from R256.3 million in 2024/25 to R321.4 million in 2027/28. This relatively high increase is, in part, driven by Cabinet's approval of an additional allocation of R126.3 million over the next 3 years, which is set to drive up the number of personnel from 387 in 2024/25 to 421 in 2027/28. This is expected to increase the directorate's investigative capacity. Total spending is expected to increase at an average annual rate of 8 per cent, from R370.6 million in 2024/25 to R466.9 million in 2027/28.

### Rooting out gender-based violence and femicide

The directorate plans to strengthen the implementation of its gender-based violence and femicide strategy, in line with the goals outlined in the national strategic plan on gender-based violence and femicide. The department's strategy primarily focuses on expanding access to justice for victims and survivors, shifting social norms and behaviours through targeted awareness and prevention campaigns, strengthening accountability mechanisms, and creating potential economic opportunities for vulnerable women. In 2024/25, the directorate began developing a new case management system that, among other things, will be integrated into other case management systems in the justice cluster, such as the integrated justice system programme's integrated case docket management system. To be rolled out over the period ahead, the new case management system is expected to auto-generate data on gender-based violence and femicide to simplify planning and reporting.

In line with the department's pursuit of the strategy's vision, the number of investigations of rape by a police officer that are decision-ready within 210 days of registration per year is set to increase from 30 in 2024/25 to 35 in 2025/26. These initiatives are funded through the *Investigations and Provincial Coordination* programme, which is allocated R844.5 million over the next 3 years, accounting for an estimated 63.3 per cent of the department's total projected spending.

### Fostering engagement and accessibility through the access and awareness rural strategy

The department plans to facilitate the implementation of its access and awareness rural strategy over the period ahead. The strategy aims to establish and strengthen relationships with rural communities, raise awareness about the directorate's legislative mandate, promote active participation by various community safety

structures in planning, and implement initiatives that enhance accessibility to its services. To give effect to this, the department plans to hold 36 community outreach events over the medium term. These initiatives are funded through allocations amounting to R203.1 million over the medium term in the *Corporate Services* subprogramme in the *Administration* programme.

### ***Strengthening investigative and forensic capacity to combat corruption***

In its efforts to root out corruption in the police service, the directorate aims to ensure that 45 cases of corruption over the medium term are decision-ready within 24 months of registration. To achieve this target, 6 new posts, mainly investigators, are expected to be filled over the MTEF period at a cost of approximately R9.7 million in the *Forensic Investigation Services* subprogramme in the *Investigations and Provincial Coordination* programme.

A further 10 new posts, also investigators, will be filled over the same period in the *Legal Compliance Monitoring and Quality Assurance* subprogramme in the *Legal Compliance, Information and Stakeholder Management* programme. This is expected to increase spending on compensation of employees in the programme at an average annual rate of 9.5 per cent, from R17.3 million in 2024/25 to R22.6 million in 2027/28.

The directorate will continue with the implementation of its backlog strategy, with 10 500 backlog cases planned to be investigated over the medium term. To support this, 13 investigators, including new appointments, will be assigned to focus on reducing the backlog cases. This is expected to result in a 6.5 per cent average annual increase in spending on compensation of employees in the *Investigations and Provincial Coordination* programme, from R175.9 million in 2024/25 to R212.5 million in 2027/28.

## Programme 2: Investigations and Provincial Coordination

### Programme purpose

Coordinate and facilitate the directorate's investigation processes through the development of policy and strategic frameworks that guide and report on investigations.

### Objectives

- Strengthen the directorate's oversight of the police service by:
  - conducting investigations, as per the Independent Police Investigative Directorate Amendment Act (2024), on an ongoing basis
  - making appropriate recommendations on investigations in the various categories, as outlined in section 28 of the Independent Police Investigative Directorate Amendment Act (2024), within 30 days of finalising investigations
  - submitting feedback to complainants within 30 days of the closure of an investigation.

## Subprogrammes

- *Investigation Management* develops and maintains investigation systems, procedures, norms, standards and policies in line with the Independent Police Investigative Directorate Amendment Act (2024) and other relevant prescripts; maintains the case flow management system and database; and analyses and compiles statistical information.
- *Investigation Services* manages and conducts investigations in line with the Independent Police Investigative Directorate Amendment Act (2024) and manages the directorate's call centre.
- *Forensic Investigation Services* provides specialised forensic investigation services in line with the provisions of the Independent Police Investigative Directorate Amendment Act (2024).

2. Rand million.

## Programme 3: Legal Compliance, Information and Stakeholder Management

### Programme purpose

Manage and facilitate the provision of investigation advisory services. Provide legal, civil and labour litigation services.

### Objectives

- Strengthen the quality of investigations by providing quality assurance during the investigation on an ongoing basis.
- Ensure that legal investigative advice and support is provided after investigations to strengthen the quality of dockets towards improving the prosecution rate on an ongoing basis.
- Ensure that an in-depth trend analysis of the collected data on alleged police misconduct is conducted to inform the policy review recommendations to the South African Police Service and Municipal Police Services on an ongoing basis.
- Conduct research to identify further interventions for the professionalisation of the police service over the medium term.
- Strengthen relations with the department's key stakeholders through planned and formal engagements on an ongoing basis.

### Subprogrammes

- *Legal Compliance Monitoring and Quality Assurance* provides legal investigative advisory and support services, and monitors and evaluates the quality of recommendations made to and responses received from the South African Police Service, Municipal Police Services and the National Prosecuting Authority in compliance with the reporting obligations in terms of the Independent Police Investigative Directorate Amendment Act (2024).
- *Stakeholder Management* manages relations and liaises with the directorate's key stakeholders – such as the South African Police Service, Municipal Police Services, Civilian Secretariat for the Police Service, the National Prosecuting Authority, the Special Investigating Unit, the Public Protector of South Africa, the State Security Agency and civil society organisations – in line with the requirements of the Independent Police Investigative Directorate Amendment Act (2024).
- *Policy, Research and Information Management* is responsible for conducting proactive research and policy coordination for the benefit of the directorate, coordinates the synergy between the case management system and standard operating procedures, and analyses and compiles statistical information.

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

## Vote purpose

*Uphold and protect the Constitution and the rule of law, and render accessible, fair, speedy and cost-effective administration of justice in the interests of a safer and more secure South Africa.*

## Mandate

The Department of Justice and Constitutional Development derives its mandate from the Constitution and several acts that assign functions to it. These include:

- establishing magistrate's courts and appointing magistrates and other judicial officers
- establishing of the National Prosecuting Authority and ensuring its functioning
- conducting criminal proceedings
- prosecuting organised crime and corruption, and enforcing the forfeiture of assets obtained through illicit means
- providing witness protection to vulnerable and intimidated witnesses and their relatives admitted in the programme for reasons related to judicial proceedings
- establishing bodies responsible for legal aid, law reform and rule-making and ensuring their functioning, and appointing masters of the high courts
- managing third-party funds
- administering the Guardian's Fund and deceased and insolvent estates
- managing state litigation
- regulating and providing legal advisory services to government departments
- promoting, protecting and enforcing human rights
- protecting vulnerable groups
- providing support to chapter 9 institutions.

## Selected performance indicators

**Table 25.1 Performance indicators by programme and related outcome**

## Expenditure overview

As part of its commitment to prioritising initiatives that enhance service delivery and bolster the safety and security of all South Africans, the department's focus over the medium term will be on rolling out its digitisation and modernisation strategy; strengthening its response to gender-based violence and femicide; implementing the recommendations of the Financial Action Task Force and bolstering the National Prosecuting Authority.

Total expenditure is expected to increase at an average annual rate of 4.7 per cent, from R24.1 billion in 2024/25 to R27.7 billion in 2027/28, with compensation of employees accounting for an estimated 61.5 per cent (R49.3 billion) of this spending. Although the budget for compensation of employees is set to increase at an average annual rate of 5.8 per cent, from R14.5 billion in 2024/25 to R17.2 billion in 2027/28, the department is expected to reprioritise R328 million from it over the medium term to facilitate the Information Regulator's transition into a standalone public entity from 1 April 2025. Other spending areas to be affected by this reprioritisation include goods and services and payments for capital assets, bringing the total reprioritisation to R424.1 million over the period ahead.

### *Rolling out the digitisation and modernisation strategy*

As part of the department's focus on digitisation and modernisation, it will aim to upgrade its local and wide area networks over the medium term to enhance reliability, scalability and performance to meet current and future demands. Plans are also in place to upgrade devices such as laptops, desktops and scanners in 2025/26 to enhance service delivery and user performance and replace systems by 2027/28 to improve stability and integration at the department's various service points. The department will also aim to maintain updated

cybersecurity applications over the period ahead to ensure improved protection.

For activities related to rolling out the department's digitisation and modernisation strategy, R2.3 billion is allocated to the *Administration* programme over the medium term. To ensure adequate capacity for rolling out the strategy, the department plans to fill 10 critical posts in its ICT unit.

### ***Strengthening the response to gender-based violence and femicide***

The department seeks to provide victims of gender-based violence, sex crimes and the relatives of femicide victims with a range of support services aimed at ensuring that their court experience is free from any form of secondary victimisation, as required by article 13 of the declaration of the presidential summit against gender-based violence and femicide. The department plans to establish 54 sexual offences courts over the MTEF period, particularly in rural communities, to ensure an even national distribution of these courts in areas with the highest incidence of sexual violence. In doing so, it expects to increase access to justice services as stipulated by regulations related to sexual offences courts. This project is allocated R15 million over the next 3 years in the *Lower Court Services* programme.

### ***Implementing Financial Action Task Force recommendations and bolstering the National Prosecuting Authority***

The department aims to facilitate South Africa's exit from the Financial Action Task Force's grey list for weaknesses in its framework for combating money laundering and the financing of terrorism by pursuing activities in 2025/26 aligned with the high-level action plan. These include the recording and monitoring of timelines for mutual legal assistance or extradition, the recording of beneficial ownership of trust information, and the establishment and operationalisation of a register to record the number of enquiries to law enforcement agencies. In the same year, the department expects to make 90 prosecutions related to money laundering. These activities will be carried out through an allocation of R209.2 million in 2025/26 in the *Lower Court Services*, *State Legal Services*, and *National Prosecuting Authority* programmes.

Efforts are also being made to enhance capacity across various units in the National Prosecuting Authority through the appointment of a targeted 250 critical personnel, the procurement of specialist prosecution services for complex financial crimes, and the engagement of contracted forensic auditors and accountants for priority asset forfeiture cases at a projected cost of R463 million over the medium term.

By leveraging additional funds allocated in previous years, amounting to R935.2 million over the MTEF period, the National Prosecuting Authority will seek to expedite the establishment of a digital forensic data centre, enhance security through integrated systems and protection services, and address operational costs associated with witness protection. As a result, the anticipated number of prosecutions related to state capture, fraud, corruption and related matters is expected to increase from 6 in 2024/25 to 10 in 2027/28 in the *National Prosecuting Authority* programme.
