25 February 2015

ISBN: 978-0-621-43285-5

RP: 08/2015

The 2015 Estimates of National Expenditure e-publications are compiled with the latest available information from departmental and other sources. Some of this information is unaudited or subject to revision.

The Estimates of National Expenditure e-publications for individual votes are available on www.treasury.gov.za.

Compared to the abridged version of the 2015 ENE, the 2015 ENE e-publications provide more detailed information, including on goods and services, transfers and subsidies, as well as on programme specific personnel expenditure. The abridged version of the ENE contains one additional table at the end of a chapter that shows expenditure on infrastructure, whereas the vote ENE e-publications' additional tables also contain summaries of expenditure on conditional allocations to provinces and municipalities; departmental public private partnerships; and donor funding. Budget information is also provided for the public entities that are not shown in detail in the abridged publication. In some e-publications more detailed information at the level of site service delivery is included.

Foreword

Some of the tough economic conditions occasioned by the 2008 to 2009 global financial crisis continue to plague most parts of the world: Economic growth remains sluggish, unemployment and inequality levels are elevated, while financial markets tend to reposition themselves substantially at the slightest sign of unsettling news. As an open economy, South Africa is highly susceptible to global economic developments, often disproportionately so. In the face of all of this, the 2015 Medium Term Expenditure Framework (MTEF) response provides for positive real growth in expenditure averaging 2.1 per cent per year. The annual budget reaches R1.6 trillion by 2017/18.

True to the commitment government made in the Medium Term Budget Policy Statement (MTBPS) in October 2014, the budget framework sets out departmental programmes and plans that fit within the broad expenditure envelope published last year. To keep our fiscal accounts firmly on a sustainable path, the MTBPS proposed a fiscal policy package that has trimmed overall spending by R25 billion, which is the combined amount for 2015/16 and 2016/17. Government spending does continue to surpass inflation after these adjustments in both years, but growth is marginally slower. In addition, for 2017/18, R45 billion is placed in an unallocated reserve to cushion our plans against unforeseeable eventualities. Further, to achieve our fiscal objectives, government has had to institute carefully selected tax measures too. These are implemented within the framework of a progressive tax system and have been informed by the work of the Davies Tax Committee. The tax proposals are set out in detail in chapter 4 of the Budget Review.

The process of realigning expenditure in response to the closing of the fiscal space is being actively managed, in the context of government's 2014-2019 medium term strategic framework. Some of our aspirations might take longer to realise. Within government's institutions, more urgent and essential existing programmes are being prioritised above other programmes that are reduced. The implementation of some newly proposed programmes will either be phased in over a longer period or, in some cases, possibly even delayed. Social sector spending and key infrastructure spending, as well as other key areas of spending, continue to grow in real terms.

In addition to the reprioritisation of government programmes, the policy frameworks and implementation methodology of programmes are being re-evaluated, with a focus on service delivery of programmes. In line with the 2013/14 National Treasury instruction on cost containment measures, financing programmes must entail a greater share of goods and services budgets being devoted towards core areas of service delivery. The focus of government programmes is being sharpened, both in terms of spatial distribution, and in terms of their nature and emphasis. Effectiveness and efficiency of expenditure is our guiding mantra.

The spending plans contained in the 2015 Budget do respond to our short term needs for economic growth. However, to achieve our ambition of faster growth, which we unquestionably need for pushing back the frontiers of unemployment, poverty and inequality, we must continue to strive towards shifting the composition of expenditure more towards investment, away from consumption. Institutional spending, as always, is being closely monitored, and the ongoing process of realignment continues. The details of the spending of national government departments and its entities are encompassed in the chapters of this publication.

All the expenditure and service delivery information contained in the chapters of this publication result from a wide ranging intergovernmental consultative process, leading to executive approval of reprioritised and realigned spending allocations. Many people have contributed to making this publication possible, particularly my colleagues in national departments and agencies. Their collaboration and understanding during the budget allocation and document drafting processes has been invaluable. Appreciation is also due to the dedicated team at National Treasury for the publication of this highly valuable resource.

Lungisa Fuzile
Director-General: National Treasury

Introduction

The Estimates of National Expenditure publications

The Estimates of national Expenditure (ENE) publications provide comprehensive information on how budget resources are generated, how institutions have spent their budgets in previous years, and how institutions plan to spend the resources allocated to them over the MTEF period. Key performance indicators are included for each national government vote and entity showing what the institutions aim to achieve by spending their budget allocations in a particular manner. This information provides Parliament and the public with the necessary tools to hold government accountable against the 14 outcomes set out in the 2014-2019 medium term strategic framework.

The 2015 ENE publications largely retain the scope of information presented in previous years' publications. For ease of comprehension, however, in the 2015 publications information is presented in a more succinct and concise manner in data tables and their accompanying explanatory narratives. The reader can thus more readily understand what each institution is planning to spend its budget on and what it aims to achieve. Each chapter in the abridged 2015 ENE publication relates to a specific budget vote. A separate, more detailed, e-publication is also available for each vote.

Compared to the abridged version of the 2015 ENE, the 2015 ENE e-publications provide more detailed information, including on goods and services, transfers and subsidies, as well as on programme specific personnel expenditure. The abridged version of the ENE contains one additional table at the end of a chapter that shows expenditure on infrastructure, whereas the vote ENE e-publications' additional tables also contain summaries of expenditure on conditional allocations to provinces and municipalities; departmental public private partnerships; and donor funding. Budget information is also provided for the public entities that are not shown in detail in the abridged publication. In some e-publications more detailed information at the level of site service delivery is included.

A separate 2015 ENE Overview e-publication is also available, which contains a description at the main budget non-interest spending level, summarising the ENE publication information across votes. The 2015 ENE Overview contains this narrative explanation and summary tables; a description of the budgeting approach; and also has a write-up on how to interpret the information that is contained in each section of the publications.

The Estimates of National Expenditure e-publications for individual votes are available on www.treasury.gov.za. These publications provide more comprehensive coverage of vote specific information, particularly about goods and services, transfers and subsidies, personnel, public entities, donor funding, public private partnerships, conditional allocations to provinces and municipalities and expenditure information at the level of service delivery, where appropriate.

Vote purpose

Promote the development of small businesses and cooperatives that contribute to inclusive growth and job creation.

Mandate

The Department of Small Business Development was established as a national department in accordance with the reorganisation of some national departments announced by the President in May 2014. The department is tasked with the responsibility to lead an integrated approach to the promotion and development of small businesses and cooperatives through a focus on the economic and legislative drivers that stimulate entrepreneurship to contribute to radical economic transformation. The realisation of this mandate will lead to increased employment, poverty reduction and reduced inequality.

The department's mandate is guided by a legislative framework that includes:

- the National Small Business Act (1996) as amended
- the Cooperatives Act (2005)
- the Cooperatives Amendment Act (2013).

Selected performance indicators

Table 31.1 Performance indicators by programme and related outcome

Indicator	Programme	Outcome	Past			Current	Projections

1. New indicators in line with the establishment of the new department, hence no historical data.

Expenditure analysis

The national development plan articulates the important role of small businesses and cooperatives in achieving inclusive economic growth, and that these small enterprises are key to achieving the plan's job creation target for 2030. The plan further identifies that regulatory compliance costs need to be reduced in order to transform the economy, for small businesses in particular. Against this background, a designated department to advance the interests and role of small businesses and cooperatives was established in 2014. The department's work will contribute to outcome 4 of government's medium term strategic framework: decent employment through inclusive economic growth, particularly sub-outcome 3, which deals with the elimination of unnecessary regulatory burdens and lower price increases for key inputs and wage goods.

The department will advocate for a conducive regulatory environment for small businesses and cooperatives to access finance, investment and markets, in an equitable and sustainable manner. The department provides various customised intervention programmes, designed to increase the sustainability of cooperatives so that they can contribute to the economy, particularly in the manufacturing, agro-processing, mining and services sector. By encouraging government procurement with small businesses and cooperatives, the department will facilitate their development and growth. It will facilitate partnerships with all spheres of government as well as the private sector to ensure mutual cooperation that will benefit small businesses and cooperatives.

The department's total budget is R3.5 billion over the MTEF period, including a Cabinet approved additional allocation of R139.3 million to support the establishment of the department. Expenditure on compensation of employees is expected to grow by 13.3 per cent over the medium term as the department expands its personnel to 171 in 2017/18. 64.3 per cent of personnel will be in the *Enterprise Development and Entrepreneurship* programme to provide customised interventions to support small businesses and cooperatives. This is also where the bulk of the department's spending over the medium term is, at R3.2 billion over the period. The *Cooperative Support and Development* programme funds the implementation of a new support model for cooperatives, including implementing the Cooperatives Amendment Act (2013). The programme's budget over the medium term is R48 million.

Regulatory and institutional support for cooperatives

Over the medium term, the department will finalise regulations for cooperatives to ensure that the Cooperatives Amendment Act (2013) will be properly implemented. The act aims to improve the failure rate of cooperatives and address past problems in cooperative governance, structures, compliance and sustainability. It will also improve coordination between national, provincial and local government to strengthen their support for cooperatives. The department will conclude transversal agreements with other government departments to enhance the implementation of the act in support of the growth of cooperatives. These activities are funded in the *Cooperatives Support and Development* programme.

Non-financial and financial support for small businesses and cooperatives

Transfers and subsidies account for 85.5 per cent of the department's expenditure over the medium term. R2 billion, the bulk of this funding, is earmarked for the Small Enterprise Development Agency, which provides non-financial support services to small businesses and cooperatives, including business and technology incubation services in specific sectors, focusing on start-ups and enterprises that need rehabilitation. The department will also provide R686 million in incentives to small enterprises in the mining, manufacturing, agro-processing and services sectors through transfers to the black business supplier development programme, as well as R229 million to cooperatives through transfers to the cooperatives incentive scheme. Both these incentive initiatives are also funded in the *Enterprise Development and Entrepreneurship* programme. Over 3 000 small businesses and cooperatives are expected to be supported over the medium term by these incentives.

Women, youth and people with disabilities

The department supports the South African Women Entrepreneurs Network and the Isivande Women's Fund through transfers in the *Enterprise Development and Entrepreneurship* programme. Over the medium term, these transfers total R83.6 million. The department's Bavumile skills enhancement programme aims to enhance women's existing skills to produce quality, commercially viable products for major local and international markets. Over the medium term, the programme prioritises the creative industries and women in rural areas and townships, and aims to train 1 500 women entrepreneurs, a significant increase from the 65 women that were trained in 2014/15. Women with craft skills such as sewing and beading are provided with specialist skills

training and assistance in establishing their own enterprises and cooperatives. Funding is in the *Enterprise Development and Entrepreneurship* programme's *Gender, Youth and People with Disabilities Economic Empowerment* subprogramme, which is allocated R154.9 million over the medium term. The department will facilitate the implementation of the Youth Black Business Supplier Development Programme which is intended to benefit 1 100 youth enterprises by 2017/18.

Programme 2: Cooperatives Support and Development

Programme purpose

Implement a new support model for cooperatives, including the implementation of the Cooperatives Amendment Act (2013).

Objectives

- Increase the number of cooperatives accessing the various customised intervention programmes to ensure their sustainability and economic contribution by implementing sector catalytic projects through:
 - growing and facilitating the entry of cooperative enterprises in the mining, manufacturing, agro-processing and services sectors, over the medium term
 - providing supplier development programmes for cooperatives through the Cooperatives Development Agency, over the medium term.

Subprogrammes

- *Cooperatives Development* promotes the development of cooperatives and the participation of youth in the economy, contributing towards increased employment, economic growth and poverty reduction.

Programme 3: Enterprise Development and Entrepreneurship

Programme purpose

Provide customised interventions to support small, medium and micro enterprises (SMMEs) and cooperatives.

Objectives

- Increase contribution to GDP, sustainable livelihoods and the creation of job opportunities by implementing the youth black business supplier development programme to provide financial support to 900 businesses over the medium term.
- Increase the participation of SMMEs and cooperatives in the mainstream economy by implementing the global exporter passport programme to ensure an accelerated development of export ready SMMEs by 2017/18.
- Promote broader participation of small businesses and cooperatives in the mainstream economy by providing financial incentives through the black business supplier development programme and cooperatives incentive scheme, over the medium term.
- Contribute to women's development by providing training to 1 500 women entrepreneurs through the Bavumile skills development programme, by 2017/18.

Subprogrammes

- *Enterprise and Supplier Development* focuses on tools and mechanisms to assist and support previously disadvantaged SMMEs.
- *Gender, Youth and People with Disabilities Economic Empowerment* provides economic support to women, youth and people with disabilities.
- *SMMEs Local Economic Development* provides business development services for SMMEs.
- *Incentives, Grants and Soft Loans* manages incentives, grants and soft loans to provide targeted funding for SMMEs and cooperatives.
- *Entrepreneurship, Intellectual Property and Indigenous Knowledge Systems* promotes, develops and supports entrepreneurship and innovation, and indigenous knowledge systems.

Small Enterprise Development Agency

Mandate

The Small Enterprise Development Agency was established in 2004 in terms of the National Small Business Amendment Act (2004). It is mandated to implement government's small business strategy; design and implement a standard and common national delivery network for small enterprise development; and integrate government funded small enterprise support agencies across all tiers of government.

Selected performance indicators

Table 34.11 Small Enterprise Development Agency performance indicators by programme/objective/activity and related outcome

Indicator	Programme/Objective/Activity	Outcome	Past			Current	Projections		
			2011/12	2012/13	2013/14	2014/15	2015/16	2016/17	2017/18

1. No historical data is available, as these are new indicators in line with the annual performance plan.

Expenditure analysis

The national development plan and outcome 4 of government's 2014-19 medium term strategic framework (decent employment through inclusive economic growth) identify small businesses as a key element in achieving the nation's job creation targets by 2030. In support of these objectives, the Small Enterprise Development Agency strives to ensure that the small enterprise sector grows and increases its contribution to sustainable and equitable social and economic development, employment and wealth creation. The agency does this through providing business advice, consultancy, training and mentoring, and by assisting SMMEs with technology through the technology programme. It also provides for the incubation of businesses through technology demonstration centres, technology incubators, and hybrid centres as part of the technology programme, as well as for the development of rural enterprises and cooperatives through the cooperatives and community private partnerships programme.

In line with the medium term strategic framework's objectives, the agency's focus over the medium term will be on continuing to develop, support and promote small enterprises to ensure their growth and sustainability by providing them with non-financial services. Thus, goods and services will remain a key cost driver, accounting for 55.8 per cent of the agency's total expenditure over the medium term. The agency intends to increase its support of clients through the incubation programme from 1 710 in 2014/15 to 1 980 in 2017/18, and increase its assistance of clients through technology transfer incentives from 63 in 2014/15 to 72 in 2017/18.

Expenditure on compensation of employees will continue to drive the expenditure in the agency, accounting for an estimated 41.8 per cent of total expenditure over the medium term. This expenditure is expected to increase to R315.1 million by 2017/18 to account for inflationary increases due to the delivery network being national. The agency's network comprises 1 national office, 9 provincial offices and 46 branches nationwide, with a projected 32 520 clients over the medium term.

An average of 94.6 per cent of the agency's revenue is expected to be derived from transfers from the Department of Small Business Development over the medium term. Other sources of revenue include funding from provincial and local governments, and specific projects from signed memorandums of agreement. Revenue is expected to decrease by R123.2 million over the medium term as a result of Cabinet approved budget reductions of R49.3 million in 2015/16 and R73.9 million in 2016/17 being effected on the agency's allocation due to its accumulated level of reserves.
