**ISBN: 978-0-621-42406-5**

**RP: 01/2014**

The Estimates of National Expenditure 2014 e-publications are compiled with the latest available information from departmental and other sources. Some of this information is unaudited or subject to revision.

The Estimates of National Expenditure e-publications for individual votes are available on [www.treasury.gov.za](http://www.treasury.gov.za).

Compared to the abridged version of the Estimates of National Expenditure, which includes all national government budget votes, in respect of individual votes these e-publications contain more comprehensive coverage of goods and services, transfers and subsidies, and public entities. Additional tables are also included containing information on the main and adjusted appropriation, with revised spending estimates for the current financial year, on skills training, conditional grants to provinces and municipalities, public private partnerships and information on donor funding. Expenditure information at the level of service delivery is also included, where appropriate.

---

“We know it well that none of us acting alone can achieve success. We must therefore act together as a united people, for national reconciliation, for nation building, for the birth of a new world. Let there be justice for all. Let there be peace for all. Let there be work, bread, water and salt for all. Let each know that for each the body, the mind and the soul have been freed to fulfil themselves.”

# Foreword

The national development plan, Vision 2030 of the government of South Africa, states that ‘Alongside hard work and effort, capabilities and the opportunities that flow from development enable individuals to live the lives to which they aspire.’ The 2014 Budget has been prepared in the spirit of this statement.

While the medium term expenditure framework (MTEF) contained in the 2014 Budget ushers in the new administration after the May elections, the country faces a markedly different situation from that of 2009. In 2006/07 and 2007/08, South Africa achieved budget surpluses. In 2008, however, the worldwide economic crisis meant budget deficit forecasts were inevitable. It is now clear that the recovery in real economic growth has been less robust than initially anticipated. Despite this, the economy is growing and government revenue collection is broadly on target. The 2009 Budget announced a ‘haircut’ and reprioritisation within budget baselines. At that stage, the reassignment of R19 billion comprised 12 per cent of the total monetary value of amendments to budgets made, of R160.6 billion. By contrast, the reassignment of the R19.6 billion in the 2014 Budget comprises 51 per cent of the total of R38.8 billion in amendments to budgets. The quantum of amendments to the total budget that can be made has clearly decreased substantially over time.

Despite the fiscal environment becoming increasingly constrained, National Treasury has been able to sustain the intensity of the pursuit for budget efficiencies, with most of the fiscal space for improvements to service delivery being made through reprioritisation. This will be reinforced by procurement reform and expenditure review initiatives. While the current fiscal position no longer automatically creates room by making additional funding available, progress towards our country objectives of inclusive economic growth and employment creation must be made in the face of a tough fiscal environment. Therefore the main budget non-interest aggregate expenditure ceiling established in the 2013 Budget remains intact. New priorities and the expansion of existing programmes must be achieved through reprioritisation within the existing resource envelope.

The current fiscal context is necessitating hard trade-offs: difficult choices will need to be made in choosing between spending priorities and in deciding on the sequencing of programme implementation. Given the constraints brought to bear by the expenditure ceiling, all government institutions need to manage any cost pressures that may be related to changes in the inflation rate, exchange rate or any other factors affecting input prices with great efficiency. This means that not everything that we believe must be done, can be done at once. In the reprioritisation of existing funds, certain outputs will have to be delayed, or discontinued.

The issue is what goods and services tax-payers’ monies ‘buy’. In keeping with the ongoing endeavour to improve transparency and reinforce accountability, the focus of the sections on budget programme expenditure trends within each vote in the 2014 Estimates of National Expenditure (ENE) publications has shifted, to an explanation of the interrelationship between the significant changes in spending, performance outputs and outcomes, and in personnel.

National Treasury teams have worked closely with policy and budget teams of national and provincial departments, as well as with public entities and local government, ensuring the alignment of policy developments with the national development plan and scrutinising spending trends and cost drivers, ever mindful of service delivery. Without this cooperation and commitment across government, it would not be possible to submit the credible and comprehensive institutional budgets contained in this publication. The political guidance of the Minister of Finance, his Deputy and the members of the ministers’ committee on the budget, has been indispensable to the medium term expenditure committee of accounting officers of departments at the centre of government, in its task of providing the strategic direction in formulating the budget. I thank you all for your assistance.

# Introduction

## The Estimates of National Expenditure publications

The Estimates of National Expenditure (ENE) publications are important accountability documents, which set out the details of planned expenditure and planned performance at the time the Budget is tabled. The 2014 ENE publications largely retain the same layout of information as presented in previous years' publications. This allows information to be easily compared across publications and financial years. As in the past, information is presented for a seven-year period and contains details of all national departmental programmes and subprogrammes. Information is presented in a similar way for the national public entities related to each department. For the first time in the ENE publications, in 2014, information on changes in finances, personnel and performance is brought together with the focus on the significant interrelationships between these changes. This discussion, in the expenditure trends sections of the budget programmes in each chapter, allows the reader to assess the effectiveness of past, as well as of planned, spending.

When compared to the abridged version of the ENE, which includes all national government votes, the ENE e-publications provide more detailed expenditure information for individual votes on goods and services as well as transfers and subsidies. While the abridged version of the ENE contains one additional table at the end of each vote which has information on infrastructure spending, the ENE e-publications' additional tables also contain summaries of: the budgeted expenditure and revised estimate for 2013/14, and the audited outcome for 2012/13, by programme and economic classification; expenditure on training; conditional grants to provinces and municipalities; departmental public private partnerships; and donor funding. In selected cases more detailed information at the level of the site of service delivery is included. Budget information is also provided for the public entities that are simply listed in the abridged publication.

A separate ENE Overview e-publication is also available, which contains a description at the main budget non-interest level, summarising the Estimates of National Expenditure publication information across votes. The Overview contains this narrative explanation and summary tables; and also has a write-up on interpreting the information that is contained in each section of the publications.

*The Estimates of National Expenditure e-publications for individual votes are available on [www.treasury.gov.za](http://www.treasury.gov.za). These publications provide more comprehensive coverage of vote specific information, particularly about goods and services, transfers and subsidies, public entities, donor funding, public private partnerships, conditional grants to provinces and municipalities, expenditure on skills training, a revised spending estimate for the current financial year, and expenditure information at the level of service delivery, where appropriate.*

### Aim

*Transform the delivery of sport and recreation by ensuring equitable access, development and excellence at all levels of participation, thereby improving social cohesion, nation building and the quality of life of all South Africans.*

### Mandate

The department is established in terms of the Public Service Act (1994). Its legal mandate is derived from the National Sport and Recreation Act (1998), which requires it to oversee the development and management of sport and recreation in South Africa. The act also provides the framework for relationships between the department and its external clients. This includes the department's partnership with the South African Sports Confederation and Olympic Committee, which is key to improving South Africa's international ranking in selected sports. The act also ensures that South Africa contributes to sport, physical education and social cohesion by legislating on sports participation as well as on sports infrastructure.

### Strategic goals

The department's strategic goals over the medium term are to:

- increase citizens' access to sport and recreation activities
- oversee the transformation of the sport and recreation sector
- ensure that more athletes achieve international success
- develop enabling mechanisms to support sport and recreation
- ensure that sport and recreation are used as tools to support social cohesion and nation building.

### Programme purposes

#### Programme 1: Administration

**Purpose:** Manage the department and provide overall strategic and administrative support services.

## Programme 2: Active Nation

**Purpose:** Support the provision of mass participation opportunities in sport and recreation.

## Programme 3: Winning Nation

**Purpose:** Support the development of elite athletes.

## Programme 4: Sport Support

**Purpose:** Develop and maintain an integrated support system to enhance the delivery of sport and recreation.

## Programme 5: Infrastructure Support

**Purpose:** Regulate and manage the provision of sport and recreation facilities.

## Selected performance indicators

**Table 20.1 Sport and Recreation South Africa**

Indicator	Programme	Outcome	Past			Current	Projections		
			2010/11	2011/12	2012/13	2013/14	2014/15	2015/16	2016/17
Number of national school sport championships supported per year <sup>1</sup>	Active Nation	Outcome 12: An efficient, effective and development orientated public service and an empowered, fair and inclusive citizenship	1	1	1	1	1	1	1
Number of major international events receiving intra-governmental support per year	Winning Nation		9	19	12	5	4	4	4
Number of sport and recreation bodies receiving financial support per year	Sport Support		61	54	68	60	60	60	60

1. The department has revised their programme budget structure to align it to the national sport and recreation plan; the broad strategic document for the sports sector in South Africa. The new indicators have been included to ensure alignment with this plan.

## The national development plan

The national development plan recognises that sport plays an important role in promoting nation building, social cohesion and a healthy lifestyle. The department will therefore continue to provide opportunities for participation indirectly, through financial support to national sports federations, and directly by offering opportunities for participation in sports promotion projects. These include the national youth camp, the national indigenous games festival, the annual Big Walk and the Golden Games. The department plans to provide more focused support to 60 specifically identified and recognised sport and recreation bodies over the medium term, for maximum impact.

The plan specifically encourages school sport, which is viewed as an integral part of the holistic development of the learner. In partnership with the Department of Basic Education, the department will continue to coordinate a schools league programme, in which schools will participate in the league's 5 competition levels, culminating in the South African national school sport championship each year.

## Expenditure trends

The spending focus over the medium term will be on increasing participation in school sport, and developing sport clubs and sporting hubs within communities. The main areas of expenditure will therefore be the *Active Nation* programme, which consists mainly of transfers of the mass participation and development grant to provinces, and the *Sport Support* programme, from which transfers to sport federations are made. This expenditure accounts for the dominance of transfers and subsidies in departmental expenditure. The need to provide the necessary oversight in relation to the actual use of these transferred funds accounts for the growth in expenditure on travel and subsistence over the MTEF period.

Overall expenditure decreased between 2010/11 and 2013/14, following the completion of the 2010 FIFA World Cup projects, and is expected to decrease further between 2013/14 and 2014/15, from R1.1 billion to R970.4 million, due to the once-off allocation of R158.5 million in 2013/14 for the 2014 African Nations Championship.

There were 42 vacant posts in November 2013, mainly between levels 7 and 10, and the department plans to fill these over the medium term. This explains the projected increase in expenditure on compensation of employees over the MTEF period. Spending on operating leases is also projected to grow, due to the department's planned move to new premises in 2013/14 to accommodate the bigger staff complement.

Expenditure on contractors up to 2015/16 is mainly for payments to tertiary institutions on behalf of athletes receiving scientific support. After 2015/16, spending on contractors will mainly go towards the programme to train coaches, which accounts for the decline in spending on this item over the MTEF period.

Cabinet approved the following adjustments to the department's budget: additional allocations of R3.6 million in 2014/15, R4.2 million in 2015/16, and R5.5 million in 2016/17 to assist the South African Institute for Drug-Free Sport in ensuring that South Africa complies with the World Anti-Doping Agency code; and reductions of R3.4 million over the medium term through implementing efficiency measures, the details of which are discussed in the relevant programme sections.

1. Data has been provided by the department and may not necessarily reconcile with official government personnel data.

2. Rand million.

## Expenditure trends

The spending focus over the medium term will be on providing corporate and other support services to the department, which accounts for the dominance of the *Corporate Services* subprogramme, and providing for the department's accommodation needs. Thus, the most significant items of expenditure in the programme are compensation of employees, travel and subsistence, and operating leases.

There were 180 funded posts in this programme, of which 109 were filled at the end of November 2013. The department plans to fill the vacant posts over the medium term. The expected growth in expenditure on compensation of employees over the MTEF period is due to the planned filling of key positions, like the chief director in *Corporate Services* and senior finance and budgeting positions in the office of the chief financial officer. Expenditure on travel and subsistence is mainly to provide for trips to and from Parliament and

international travel to meetings, sport events and conventions of the United Nations Educational, Scientific and Cultural Organisation and the African Union Sports Council meetings. The spikes in travel and subsistence expenditure in 2011/12 and 2012/13 were due to travel to the Rugby World Cup in New Zealand, the Zone VI Games in Mozambique in 2011/12 and the Olympic Games in 2012/13.

The lease for office accommodation constitutes 7 per cent of the budget between 2010/11 and 2013/14, and is expected to increase over the medium term after the department's expected move to new premises at the end of 2013/14.

Spending on consultants is equivalent to 1.7 per cent of expenditure on compensation of employees in 2012/13. Consultants mainly provide legal and audio visual services, and conduct external auditing investigations.

R1.3 million over the medium term has been reprioritised from the external audit function to expand the internal audit function to support federations, public entities and provinces on the management of the mass participation and sport development conditional grant.

## Programme 2: Active Nation

### Objectives

- Contribute to improving the overall wellbeing of the nation by stimulating lifelong participation in active recreation through facilitating the delivery of at least 3 programmes (the Big Walk, youth camps and the Golden Games) in 2014/15.
- Contribute to social cohesion by offering innovative opportunities for communities to participate in sport through the delivery of at least 3 programmes (the indigenous games, modified sport and rural sport) in 2014/15.
- Foster lifelong learner participation in sport by developing school sport through the hosting of the South African national school sport championship in 2014/15.
- Facilitate sport and recreation participation and empowerment in partnership with provincial departments through the effective management of the 2014/15 mass participation and sport development conditional grant by:
  - ensuring that provincial grant business plans are aligned with the grant framework
  - monitoring the delivery of outputs to ensure that these are being done in line with the approved business plans.

### Subprogrammes

- *Programme Management: Active Nation* manages delegated administrative and financial responsibilities, and coordinates all monitoring and evaluation functions. This subprogramme had a staff complement of 2 in 2013/14.
- *Active Recreation* delivers programmes to improve the health and wellbeing of the nation by providing mass participation opportunities in various formats to cater for a spectrum of participants. In 2013/14, the department hosted the Big Walk and 9 national youth camps at a total cost of R1.6 million, and supported the Department of Social Development in hosting the Golden Games. Campaigns, such as Move for your Health, were also supported and the ministerial advisory committee on recreation was set up. This subprogramme had a staff complement of 5 in 2013/14.
- *Community Sport* delivers sports promotion programmes by focusing on increasing the number of participants in sport and recreation, with an emphasis on disadvantaged communities. The subprogramme also manages the transfer to the loveLife programme, which aims to promote sport and recreation to build an HIV and AIDS free future. In 2013/14, the national indigenous games festival was hosted in Pretoria at an estimated cost of R10 million, and the Nelson Mandela Sport and Culture Day was hosted in Johannesburg in partnership with the Department of Arts and Culture. Rural sport improvement programmes, including ministerial outreach programmes, were implemented and a range of physical activities were offered through the sport and recreation hubs, at a cost of R3.4 million. This subprogramme had a staff complement of 7 in 2013/14.

- *School Sport* supports the delivery of sport programmes to learners in conjunction with the Department of Basic Education. The subprogramme supports the school sport league programme by providing equipment and attire, and coordinates the training of educators in code specific coaching, technical officiating, team management and sports administration with the focus on integrating 16 priority sport codes (including soccer, cricket, rugby, netball and athletics) and indigenous games (morabaraba and jukskei) into the school sport system. The subprogramme is also responsible for hosting the annual national school sport championship and plays an oversight role regarding the support offered to schools by provinces funded from the mass participation and sport development conditional grant. In 2013/14, 11 sports federations were supported in delivering capacity building programmes to educators and a national school sport championship attended by approximately 7 000 learners was hosted in Mangaung at a cost of R48 million. This subprogramme had a staff complement of 8 in 2013/14.
- *Provincial Sport Support and Coordination* transfers the mass participation and sport development conditional grant to provinces.

## Expenditure trends

The spending focus over the medium term will be on promoting mass participation in sport and recreation through the mass participation and sport development conditional grant, which supports school sport, club development, sporting hubs, sport academies and sport councils and accounts for the dominance of expenditure on transfers to provinces in the programme. An average of 85 per cent of the programme's total allocation over the medium term will be spent on the grant in the *Provincial Sport Support and Coordination* subprogramme. The management and oversight exercised by the department in respect of the grant partially accounts for the increased expenditure on travel and subsistence, which falls under the *Community Sport* and *School Sport* subprogrammes.

School sport remains a priority for the department as it is the bedrock for sport development in the country, as reflected in the growth in expenditure in the *School Sport* subprogramme over the MTEF period. The main activity in this subprogramme is the South African national school sport championship. Staged annually, the event explains the relative significance of expenditure on travel and subsistence and venues and facilities within expenditure on goods and services. The decrease in expenditure in this subprogramme in 2013/14 was due to the once-off shifting of funds to the *Community Sport* subprogramme for the Nelson Mandela Sport and Culture Day.

The programme had a funded establishment of 23, with 1 vacancy, at the end of November 2013. This vacancy is expected to be filled in 2014/15. In addition, contract positions set to be created in 2014/15 to assist provinces

in implementing their respective school sport programmes account for the growth in expenditure on compensation of employees over the medium term.

## **Programme 3: Winning Nation**

### **Objectives**

- Contribute to nation building by financially supporting, monitoring and evaluating the services delivered by the South African Sports Confederation and Olympic Committee in preparing and delivering South African teams for participation at selected international multi-sport code events on an ongoing basis.
- Promote drug free sport by providing financial support annually to the South African Institute for Drug Free Sport to ensure that South Africa complies with the World Anti-Doping Agency code.
- Encourage the staging of major sport events in South Africa by providing support to sport federations for event bidding and hosting and supporting services for 4 events in 2014/15 in accordance with the approved events calendar.
- Promote sport tourism in South Africa by hosting Ekhaya, the hospitality centre showcasing South Africa, at the 2014/15 Commonwealth Games in Glasgow.
- Support international participation of South African sports people by facilitating all their requests for assistance in acquiring visas and passports in 2014/15 and over the medium term.
- Promote national pride by acknowledging sporting achievements, both contemporary and past performances, through the delivery of recognition systems including: hosting the 2014 Sports Awards, bestowing the green jacket accolade on deserving sports stars, and rewarding exceptional performances achieved throughout 2014/15 with a financial incentive.

### **Subprogrammes**

- *Programme Management: Winning Nation* manages delegated administrative and financial responsibilities, and coordinates all monitoring and evaluation functions. This subprogramme had a staff complement of 2 in 2013/14.
- *Scientific Support* supports the South African Sports Confederation and Olympic Committee, by means of a transfer payment, to implement measures to prepare Team South Africa for international performances. The subprogramme is also responsible for supporting the South African Institute for Drug-Free Sport, through a transfer payment, to ensure compliance with the World Anti-Doping Agency code. In 2013/14, 41 athletes and coaches were assisted through scientific support programmes at a cost of R15.3 million.
- *Major Events Support* coordinates and manages government's support services for hosting identified major events in South Africa. In 2013/14, the African Nations Championship, Soweto Tennis Open, World Transplant Games, World Gym for Life Challenge, Union Cycliste Internationale Mountain Bike and Trials World Championships, and the World Anti-Doping Agency conference on doping in sport were supported. This subprogramme had a staff complement of 2 in 2013/14.
- *Recognition Systems* provides opportunities for the public acknowledgement of contemporary sports successes as well as those achieved in the past by sporting legends. Events include the annual South African Sports Awards and the Andrew Mlangeni Green Jacket Awards for sporting legends. Financial incentives are also provided for outstanding performances by South African athletes. The annual South African Sports Awards were held at a cost of R17.5 million in 2013/14.

2. Rand million.

## Expenditure trends

The spending focus over the medium term will be on providing scientific support to athletes as reflected in the *Scientific Support* subprogramme. In this period, the subprogramme will receive an additional allocation of R13.3 million for the transfer to the South African Institute for Drug-Free Sport. The additional funds are to assist the institute in ensuring that South Africa complies with the World Anti-Doping Agency code.

Expenditure on contractors in the *Scientific Support* subprogramme grew significantly from 2010/11 to 2013/14, due to the department intensifying support for elite athletes through high performance centres in preparation for major events over this period, including the 2012 Olympic Games. The fluctuations in the transfers to non-profit institutions are due to once-off allocations of R84 million in 2012/13 to host the 2013 Africa Cup of Nations, and R36 million in 2013/14 for the 2014 African Nations Championship. As a result, spending in the *Major Events* subprogramme fluctuates between 2010/11 and 2013/14.

The *Recognition Systems* subprogramme was introduced in 2011/12. Expenditure has fluctuated in this subprogramme from inception, mainly due to financial incentives paid to athletes for their achievements at international events in 2011/12 and 2013/14. These payments were made through transfers to the South African Sports Confederation and Olympic Committee and are reflected under transfers to non-profit institutions. As part of Cabinet approved budget reductions, the *Recognition Systems* subprogramme expenditure will be reduced by R3.4 million over the medium term. The impact of this reduction on service delivery will be minimised as private sector donors are brought in to augment funding for the recognition of performances.

The number of personnel in this programme is expected to increase from 17 in 2013/14 to 23 in 2016/17. This accounts for the increase in expenditure on compensation of employees over the medium term as vacant posts are filled to provide the capacity required to support the implementation of the newly endorsed national sport and recreation plan. The department delayed filling these posts to ensure that the new organisational structure would be aligned with this plan.

## Programme 4: Sport Support

### Objectives

- Contribute towards uniting the country by supporting 60 national sports federations and other non-governmental organisations that offer sport and recreation opportunities to all South Africans, in 2014/15.
- Support South Africa's sport developmental goals by activating and managing bilateral relations with countries in the rest of Africa and abroad through actively participating and influencing decision-making in identified multilateral organisations such as the African Union Sports Council, the United Nations, the Commonwealth and the World Anti-Doping Agency, among others, in 2014/15.

### Subprogrammes

- *Programme Management: Sport Support* manages delegated administrative and financial responsibilities, and coordinates all monitoring and evaluation functions. This subprogramme had a staff complement of 1 in 2013/14.
- *International Liaison* coordinates and strengthens bilateral and multilateral sport and recreation relations with international partners to support sport and recreation development in South Africa. Key bilateral agreements reached in 2013/14 include those with Lesotho, New Zealand, Burundi and Australia. This subprogramme had a staff complement of 2 in 2013/14.
- *Sport and Recreation Service Providers* transfers funds to sport and recreation organisations, predominantly national federations; monitors the use of these funds in line with service level agreements signed between the national federations and the department; administers the transfers made to Boxing South Africa and to non-governmental organisations; monitors governance and sport development; and oversees the implementation of transformation programmes in line with the transformation charter and scorecard. 68 recognised sport and recreation bodies were supported in 2013/14 at a cost of R138.6 million. This subprogramme had a staff complement of 3 in 2013/14.

2. Rand million.

**Expenditure trends**

The spending focus over the medium term will be on supporting recognised sport federations through transfers to non-profit institutions in the *Sport and Recreation Service Providers* subprogramme. These transfers constitute 83.6 per cent of the programme's allocation over the medium term and will ensure that 60 sport federations are supported in each year of the MTEF period.

The *International Liaison* subprogramme is projected to have a negative average annual growth over the medium term due to the implementation of efficiency measures in international travel, which include smaller delegations being sent to international events.

The number of personnel in this programme is expected to increase from 6 posts in 2013/14 to 9 funded posts in 2016/17. This accounts for the growth in expenditure on compensation of employees over the MTEF period as the department fills vacant posts that will provide the capacity required to support the implementation of the newly endorsed national sport and recreation plan. The department delayed filling these posts to ensure that the new organisational structure would be aligned with this plan.

## Programme 5: Infrastructure Support

### Objectives

- Improve levels of participation in sport and recreation by facilitating the provision of adequate and well maintained facilities by:
  - conducting an audit of existing sport facilities in 2014/15
  - compiling a national facilities plan to be completed in 2015/16
  - lobbying municipalities to maximise the use of the portion of the municipal infrastructure grant earmarked for building sport facilities each year
  - providing technical assistance to local authorities and other relevant stakeholders for constructing and managing sport facilities to ensure compliance with national standards each year.

### Subprogrammes

- *Programme Management: Infrastructure Support* manages delegated administrative and financial responsibilities, and coordinates all monitoring and evaluation functions. This subprogramme had a staff complement of 1 in 2013/14.
- *Sport and Recreation Facility Management* provides technical assistance to local authorities and other relevant stakeholders for constructing and managing sport facilities to ensure compliance with national standards. The subprogramme also assists municipalities in ensuring that the FIFA World Cup 2010 stadia are well maintained and optimally used. In 2013/14, all 16 requests received for technical assistance from local authorities and other relevant stakeholders for constructing and managing sport facilities were granted. This subprogramme had a staff complement of 2 in 2013/14.
- *Sport and Recreation Facility Planning* lobbies for, facilitates and coordinates the provision of sport and recreation facilities by municipalities and other relevant institutions. In 2013/14, the department worked closely with the Department of Cooperative Governance and Traditional Affairs, the South African Local Government Association and municipalities to lobby for the building of 72 facilities. Work also began on the national facilities audit, which will be completed by 2015/16 at an estimated cost of R6 million. This subprogramme had a staff complement of 2 in 2013/14.

2. Rand million.

## Expenditure trends

The spending focus over the medium term will be on providing 18 outdoor gyms to rural areas that have no sport facilities; completing the national facilities audit; and compiling a national facilities plan. This planned expenditure is reflected in the *Sport and Recreation Facility Management* subprogramme, which constitutes 49.5 per cent of total programme expenditure over the medium term. The provision of outdoor gyms to rural areas also explains the expenditure on contractors across the seven-year period. Expenditure in this subprogramme is expected to increase over the medium term, following the lower than expected spending in 2013/14, which was the result of unexpected delays in the delivery of the outdoor facilities and delays in conducting the facilities audit.

The number of personnel in this programme is expected to increase from 5 posts in 2013/14 to 9 posts in 2016/17. This accounts for the growth in compensation of employees over the medium term as the department fills vacant posts that will provide the capacity required to support the implementation of the newly endorsed national sport and recreation plan. The department delayed filling these posts to ensure that the new organisational structure would be aligned with this plan.

## Public entities and agencies

### Boxing South Africa

#### Mandate and goals

Boxing South Africa is established in terms of the Boxing Act (2001), which requires the entity to administer professional boxing, recognise amateur boxing, create and ensure synergy between professional and amateur boxing, and promote engagement between associations of boxers, managers, promoters and trainers.

The organisation's strategic goals over the medium term are to:

- ensure the effective and efficient administration of boxing in South Africa
- promote and support the participation of youth, women, the disabled and all racial groups in boxing
- facilitate and support the participation of South African boxers at international competitions
- create an enabling environment to enhance the status of boxing
- provide leadership and good governance in boxing
- promote the effective and efficient use and management of limited resources
- improve revenue generation of the organisation
- improve the administrative capacity of the organisation.

## Expenditure trends

Boxing South Africa's main source of revenue is from transfers received from the department. The decrease in non-tax revenue received by Boxing South Africa between 2010/11 and 2013/14 is due to the decline in sanctioning fees received as a result of the lack of broadcasting income received by promoters, while the increase in transfers received over the same period is due to additional funds received from the department to assist the entity in settling outstanding debt.

Boxing South Africa's spending focus over the medium term is on ensuring that key divisions like the finance and fund raising divisions are adequately capacitated to ensure continued improvements in governance and financial management, which have been taking place since 2011/12. The fluctuating, but overall, increase in expenditure between 2010/11 and 2013/14 was mainly due to the settling of outstanding debt. The entity has an approved establishment of 20 posts, all of which are funded. Expenditure increases over the medium term are due to the planned filling of key financial management and marketing posts in 2013/14 and over the medium term, which also accounts for the rise in expenditure on compensation of employees over this period.

Expenditure fluctuated between 2010/11 to 2013/14 in the absence of a stable executive management team to ensure effective planning and expenditure. A new board and chief executive were appointed in 2011/12, and a chief financial officer was appointed in 2013/14. More effective planning, budgeting and expenditure can therefore be expected over the medium term.

There was 1 vacant post at the end of November 2013 as the entity struggled to find a suitable candidate to fill a key marketing position, which it now plans to fill in 2014/15. Boxing South Africa uses 2 consultants to assist with financial and human resource management and R614 000 was spent on consultants in 2012/13. This amount will be reduced over the medium term because of the appointment of a chief financial officer, who will take responsibility for financial management at the entity.

Savings of R820 000 over the medium term have been identified in goods and services. Other efficiency measures implemented to effect savings include capping telephone allowances and limiting travel.

## South African Institute for Drug-Free Sport

### Mandate and goals

The South African Institute for Drug Free Sport was established in terms of the South African Institute for Drug Free Sport Act (1997). All South African sports organisations and federations are obliged to recognise its authority and comply with its directives following South Africa's endorsement of the World Anti-Doping Code and the United Nations Educational, Scientific and Cultural Organisation's International Convention against Doping.

The institute's strategic goals over the medium term are to:

- promote participation in sport without the use of prohibited performance enhancing substances and methods

- educate sportspeople about the harmful effects of doping
- facilitate the implementation of a national strategy on combating doping in sport
- oversee the establishment of a central tribunal to ensure consistent hearings and sanctioning processes across all sports.

## Selected performance indicators

Table 20.19 South African Institute for Drug-Free Sport

Indicator	Programme/Activity/Objective	Outcome	Past			Current	Projections		
			2010/11	2011/12	2012/13	2013/14	2014/15	2015/16	2016/17
Number of drug tests conducted per year in South African sport	Doping Control	Outcome 12: An efficient, effective and development oriented public service and an empowered, fair and inclusive citizenship	2 200	2 300 <sup>1</sup>	2 300	2 500	3 500	3 500	3 500
Number of blood tests in the athlete biological passport programme per year	Doping Control		40	59	80	120	150	200	200
Number of drug anti-doping outreach campaigns held per year	Education		3	20	8	11	12	12	12

1. This figure differs from the one in the 2013 ENE because the indicator now refers to South African athletes and not South African sport.

## Expenditure trends

Revenue for the South African Institute for Drug-Free Sport is driven mainly by transfers received from the department. There was a once-off allocation of R14.7 million from the National Lottery in 2013/14, which accounts for the fluctuating trend in this item.

The spending focus over the medium term continues to be on conducting drug tests to ensure participation in sport without the use of prohibited performance enhancing substances and methods. Additional activities, such as the increase in the number of drug tests conducted, undertaken by the institute to comply with legislation and international commitments account for the increased expenditure on compensation of employees as well as goods and services from 2010/11 to 2013/14. This has seen the entity fill all 10 establishment posts, while outsourcing the financial management and legal functions as the entity cannot afford to appoint employees with the requisite skills in these areas on a full time basis. Expenditure on contractors in goods and services will increase over the medium term to allow for more blood tests in the athlete biological passport programme and additional drug tests on athletes from 2013/14 to 2016/17.

The institute promotes participation in sport without the use of prohibited performance enhancing substances and methods, and educates sports people on fair play and the harmful effects of doping. Approximately 46 per cent of the institute's budget is spent on activities related to doping control, including blood and urine tests and education outreach programmes. In 2012/13, 2 734 athletes across 30 sporting disciplines from South Africa, and those from abroad who were training in South Africa, were tested for prohibited substances.

Over the medium term, the institute expects to realise savings of R450 000 in goods and services by using electronic media to reduce printing costs and, as a result, its carbon footprint. The savings have been reprioritised within the entity to allow the institute to perform more tests and strengthen its education outreach programmes.
