The department will continue to coordinate and contribute to the implementation of the national action plan for combating racism, racial discrimination, xenophobia and related intolerances. This entails establishing an effective governance structure to lead and coordinate the implementation of the plan, developing a funding model, and establishing a rapid-response mechanism for incidents of racist and xenophobic offences or hate crimes. To carry out this work, R5.1 million over the medium term is allocated in the *State Legal Services* programme.

## Programme 2: Court Services

### Programme purpose

Facilitate the resolution of criminal and civil cases and family law disputes by providing accessible, efficient and quality administrative support to the lower courts and managing court facilities.

### Objectives

- Deliver modern, accessible and people-centric justice services for all by:
  - expediting the implementation of Femicide Watch, established as required by article 15 of the 2019 presidential summit declaration against gender-based violence and femicide, from phase 5 in 2022/23 to phase 8 in 2025/26
  - increasing the percentage of child justice preliminary inquiries finalised within 90 days from the date of first appearance from 90 per cent in 2022/23 to 93 per cent in 2025/26
  - increasing the percentage of maintenance matters finalised within 90 days from the date of proper service of process from 75 per cent in 2022/23 to 80 per cent in 2025/26
  - increasing the percentage of national register of sexual offences clearance certificates issued within 10 days from the date of receipt of the application from 65 per cent in 2022/23 to 66 per cent in 2025/26
  - increasing the percentage of family advocate dispute matters finalised within 6 months from the date of opening the matter from 80 per cent in 2022/23 to 90 per cent in 2025/26
  - increasing the percentage of family litigation matters finalised within 12 months from the date of opening the matter from 80 per cent in 2022/23 to 90 per cent in 2025/26
  - ensuring that 165 courts remain compliant with the strategy on universal access for people with disabilities by 2025/26.

### Subprogrammes

- *Lower Courts* funds the activities and operations of various regional and district courts. Regional courts adjudicate serious criminal and civil matters, whereas district courts adjudicate less serious cases. There are 2 147 district and regional courts in South Africa.
- *Family Advocate* funds family mediations in non-litigation matters with the goal of settling parental disputes out of court. In litigation matters, the family advocate files court reports, makes recommendations, and appears in court to promote and protect the best interests of children. This subprogramme also deals with international cases of children who were abducted or retained in foreign countries in terms of the Hague Convention on the Civil Aspects of International Child Abduction.
- *Magistrate's Commission* funds the Magistrate's Commission, which makes recommendations on the appointment and tenure of magistrates.
- *Facilities Management* funds the provision of accommodation for courts and justice service delivery points, including the construction of new and additional accommodation, and the leasing of privately owned premises for use by the department.
- *Administration of Lower Courts* funds the management of court administration and performance evaluation functions.

## Programme 3: State Legal Services

### Programme purpose

Provide legal and legislative services to government. Supervise the registration of trusts, and the administration of deceased and insolvent estates and estates undergoing liquidation. Manage the Guardian's Fund. Prepare and promote legislation. Facilitate constitutional development and undertake research in support of this.

## Objectives

- Ensure an improved master's service by:
  - increasing the percentage of liquidation and distribution accounts in deceased estates where letters of executorship have been examined and issued within 21 days of receipt of all required documents from 75 per cent in 2022/23 to 90 per cent in 2025/26
  - increasing the percentage of beneficiaries in receipt of services within 40 days from the receipt of all required documents (Guardian's Fund) from 80 per cent in 2022/23 to 90 per cent in 2025/26.
- Ensure the transformation of colonial and apartheid-era justice-related legislation by submitting 9 pieces of colonial or apartheid-era legislation to Cabinet for updating by 2025/26, as approved by the minister.
- Ensure a transformed state litigation service by:
  - increasing the percentage of legal opinions finalised within 30 days from the date of receipt of the instruction from 75 per cent in 2022/23 to 82 per cent in 2025/26
  - increasing the percentage of suggested bills, regulations and subordinate legislation finalised within 30 days from the date of receipt of the instruction from 75 per cent in 2022/23 to 82 per cent in 2025/26.
- Ensure a transformed legal profession by:
  - maintaining the percentage of value of briefs allocated to historically disadvantaged legal practitioners at 83 per cent by 2025/26
  - increasing the percentage of litigation cases finalised by 5 per cent per year over the medium term.
- Ensure advanced constitutionalism, human rights and the rule of law by:
  - maintaining the number of visible anti-xenophobia campaigns conducted in collaboration with other departments and role players at 6 per year over the medium term
  - increasing the number of interventions implemented to enhance the effectiveness of the established sexual orientation, gender identity, expression and sex characteristics provincial task teams from 12 in 2022/23 to 13 in 2025/26
  - increasing the percentage of valid requests for extradition and mutual legal assistance in criminal matters processed and submitted to the central authority within 20 days of receipt from 85 per cent in 2022/23 to 95 per cent in 2025/26.

## Subprogrammes

- *State Law Advisers* provides legal advice, representation and legislative drafting services to the executive, state departments, state-owned enterprises and other government bodies through the Office of the Chief State Law Adviser.
- *Litigation and Legal Services* provides attorney, conveyance and notarial services to the executive, state departments, state-owned enterprises and other government bodies through the offices of the state attorney, and provides legal support to the department and ministry.
- *Legislative Development and Law Reform* conducts research, and prepares and promotes new and amended legislation.
- *Master of the High Court* funds the master's offices, which supervise the administration of deceased and insolvent estates, trusts, curatorships and the Guardian's Fund.
- *Constitutional Development* conducts research; coordinates the implementation of constitutionally mandated legislation such as the Promotion of Equality and Prevention of Unfair Discrimination Act (2000) and the Promotion of Administrative Justice Act (2000); promotes the Constitution and its values; assists and protects independent institutions supporting constitutional democracy to ensure their independence and effectiveness; and coordinates, promotes and develops programmes in support of social justice and participatory democracy.

## Programme 4: National Prosecuting Authority

### Programme purpose

Provide a coordinated prosecuting service that ensures that justice is delivered to victims of crime through general and specialised prosecutions. Remove profit from crime. Protect certain witnesses.

### Objectives

- Ensure successful prosecution over the medium term by maintaining a conviction rate of 87 per cent in high courts, 74 per cent in regional courts and 88 per cent in district courts.
- Enhance victim-centric services by increasing the total number of operational Thuthuzela care centres from 60 in 2022/23 to 68 in 2025/26.
- Ensure access to justice for victims of sexual offences by maintaining a conviction rate of 70 per cent over the medium term.
- Contribute to the fight against corruption by increasing the number of prosecutions of state capture, fraud or corruption and related matters enrolled in the courts from 9 in 2022/23 to 18 in 2025/26.
- Contribute to the effectiveness of the criminal justice system on an ongoing basis by ensuring that no witnesses and related people in the witness protection programme are threatened, harmed or killed.

### Subprogrammes

- *National Prosecutions Service* is primarily responsible for general and specialised prosecutions and the appeals that might follow. This includes resolving criminal matters outside of the formal trial process through alternative dispute-resolution mechanisms, settling admissions of guilt for minor offences, and considering dockets brought by the police where people have not been charged. Specialised prosecutions comprise priority crime litigation, sexual offences, community affairs and specialised commercial crime.
- *Investigating Directorate* provides for the Investigating Directorate, established in the Office of the National Director of Public Prosecutions, to deal with offences or criminal or unlawful activities involving serious, high-profile and complex corruption, including allegations of corruption arising from commissions of inquiry.
- *Asset Forfeiture Unit* seizes assets acquired from the proceeds of crime or that have been part of an offence through criminal or civil processes.
- *Office for Witness Protection* provides for temporary protection, support and related services to vulnerable and intimidated witnesses and related people in judicial proceedings in terms of the Witness Protection Act (1998).
- *Strategy, Operations and Compliance* provides corporate support services to the National Prosecuting Authority in terms of finance, human resources, ICT, strategy support, integrity, security, communication and risk management.

## Programme 5: Auxiliary and Associated Services

### Programme purpose

Provide a variety of auxiliary services associated with the department's purpose. Fund the interdepartmental justice modernisation programme, the President's Fund, the Information Regulator, the Office of the Legal Services Ombud and transfer payments to public entities and constitutional institutions.

### Objective

- Increase the number of key performance indicators to be completed on the integrated justice system dashboard from 27 in 2022/23 to 28 in 2023/24.

## Subprogrammes

- *Legal Aid South Africa* funds Legal Aid South Africa, which provides legal aid to indigent people and legal representation at the state's expense, as set out in the Constitution.
- *Special Investigating Unit* funds the Special Investigating Unit, which provides professional forensic investigating and litigation services to all state institutions at the national, provincial and local levels to combat maladministration, corruption and fraud; and protects state assets and public funds.
- *Public Protector of South Africa* funds the Public Protector of South Africa, which investigates any alleged improper conduct in state affairs, public administration or any sphere of government, as well as any conduct that results in impropriety or prejudice.
- *South African Human Rights Commission* funds the South African Human Rights Commission, which promotes and monitors the observance of human rights in South Africa.
- *Justice Modernisation* implements IT infrastructure and networks, and funds the integrated justice system programme, which seeks to re-engineer, automate and integrate business processes across the criminal justice value chain.
- *Information Regulator* funds the Information Regulator, which is responsible for the promotion and protection of the right to privacy as it relates to the protection of personal information and the right of access to information, as enshrined in the Protection of Personal Information Act (2013) and Promotion of Access to Information Act (2000).
- *Office of the Legal Services Ombud* funds the Office of the Legal Services Ombud, which is responsible for protecting and promoting public interest in relation to the rendering of legal services; investigating complaints of alleged misconduct against legal practitioners; and promoting the independence of, and high standards of integrity in, the legal profession.

#### Entity overview

Legal Aid South Africa was established in terms of section 2 of the Legal Aid South Africa Act (2014) to provide state-funded legal aid and advice to eligible individuals to ensure access to justice and the realisation of

individuals' rights to legal representation in accordance with the Constitution. The entity focuses on providing legal assistance to children, women, detainees, and in divorce or domestic violence cases and land rights matters. The entity will continue to prioritise providing legal assistance to eligible people over the MTEF period at the state's expense.

Expenditure is expected to increase at an average annual rate of 2.6 per cent, from R2.2 billion in 2022/23 to R2.4 billion in 2025/26. Spending on compensation of employees accounts for an estimated 80.8 per cent (R7.4 billion) of total expenditure over this period.

The entity is set to derive 98.8 per cent (R9.1 billion) of its revenue over the medium term through transfers from the department. This includes an additional allocation of R240.4 million for the legal representation portion of the land rights management facility as part of a function transfer from the Department of Agriculture, Land Reform and Rural Development. This funding will be used to establish a land rights management unit in the *Legal Aid Services* programme to offer legal representation and assistance on land-related matters.

### Entity overview

The Public Protector of South Africa was established in terms of section 181 of the Constitution, which mandates it to strengthen constitutional democracy by investigating any conduct in state affairs, or in the public administration in any sphere of government, that is alleged or suspected to be improper or result in any impropriety or prejudice; report on that conduct; and take appropriate remedial action. Section 182 of the Constitution states that the public protector must be accessible to all persons and communities.

Over the next 3 years, the entity will focus on conducting investigations to root out improper conduct and maladministration in state affairs. In doing this, the public protector aims to finalise 80 per cent of early resolution cases within 6 months, service delivery cases within 12 months, and good governance and integrity cases within 24 months.

Expenditure is expected to increase at an average annual rate of 3 per cent, from R360.9 million in 2022/23 to R394.2 million in 2025/26. Compensation of employees is the institution's main cost driver, spending on which is set to increase at an average annual rate of 3.3 per cent, from R270.9 million in 2022/23 to R298.9 million in 2025/26. The entity expects to derive 99.1 per cent (R1.5 billion) of its revenue over the medium term through transfers from the department. These are set to increase at an average annual rate of 3 per cent.

**Entity overview**

The South African Human Rights Commission is an independent statutory body established in terms of chapter 9 of the Constitution with a mandate to enhance constitutional democracy by promoting, protecting and overseeing human rights. It promotes awareness of human rights, ensures compliance with socioeconomic rights outlined in the Constitution, offers education and training, and works to provide effective remedies when violations occur. The powers and functions of the commission are further detailed in the Human Rights Commission Act (1994). The commission is also tasked with overseeing the national preventive mechanism, which was created as part of South Africa's adherence to the United Nations Optional Protocol to the Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment; and managing the independent monitoring mechanism in line with the United Nations Convention on the Rights of Persons with Disabilities.

Over the next 3 years, the commission will advance human rights, and safeguard against and oversee the prevention of human rights violations by collaborating with relevant parties, advocating for human rights reforms and positions in policies and legislation, and fostering adherence to these rights, as outlined in the Bill of Rights. In line with its objective of ensuring compliance with socioeconomic rights, the commission plans to increase the number of complaints and enquiries finalised from 3 000 in 2022/23 to 5 000 in each year of the MTEF period. This will be done through focus group dialogues with communities.

Total expenditure is expected to increase at an average annual rate of 1.9 per cent, from R216.9 million in 2022/23 to R229.3 million in 2025/26. Compensation of employees accounts for 70 per cent (R612.6 million) of total spending, increasing at an average annual rate of 3.4 per cent, from R144.4 million in 2022/23 to R159.4 million in 2025/26. The commission expects to derive 98.6 per cent (R863.6 million) of its revenue over the medium term through transfers from the department, increasing at an average annual rate of 3.1 per cent.

### Entity overview

The Special Investigating Unit derives its mandate from the Special Investigating Unit and Special Tribunals Act (1996). Its primary function is to investigate serious malpractice, maladministration and corruption affecting the administration of state institutions, and take or assist in taking appropriate and effective legal action against wrongdoers.

A special tribunal was established in 2019/20 to act as a dedicated court for civil proceedings. The tribunal aims to provide timely litigation to recover wrongfully acquired funds and assets. Over the medium term, the entity will aim to initiate civil litigation in the tribunal to hear cases related to the recommendations of the state capture commission. As a result, the number of cases enrolled at the tribunal is expected to increase from 35 in 2022/23 to 65 in 2025/26. To enable this, the entity has been allocated an additional R50 million in 2023/24, R30 million in 2024/25 and R20 million in 2025/26.

The entity aims to develop the capabilities to investigate and root out maladministration and corruption at all levels of the state. To enable this, expenditure is expected to increase at an average annual rate of 20.3 per cent, from R871.5 million 2022/23 to R1.5 billion in 2025/26. This increase is mainly due to an increase in spending on compensation of employees, from R576.2 million in 2022/23 to R1.1 billion in 2025/26, at an average annual rate of 23.7 per cent. This is expected to enable the entity to increase its number of personnel from 650 in 2022/23 to 900 in 2025/26. As a result, the number of investigations closed per year is expected to increase from 1 450 in 2022/23 to 1 750 in 2025/26, and the number of investigative reports submitted to the Presidency is expected to increase from 20 to 33 in the same period.

The entity expects to derive 60 per cent (R2.2 billion) of its revenue over the next 3 years through charging client departments and state institutions for services rendered, and 40 per cent (R1.5 billion) through transfers from the department. Non-tax revenue is expected to increase at an average annual rate of 35.5 per cent, from R402.6 million in 2022/23 to R1 billion in 2025/26, largely due to the anticipated increase in the number of billable hours for investigations.

Executive authority: Minister of Defence and Military Veterans  
 Accounting officer: Director-General of Military Veterans  
 Website: [www.dmv.gov.za](http://www.dmv.gov.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Formulate policies and standards aimed at providing a comprehensive delivery system to military veterans and their dependants in recognition of their role in the democratisation of South Africa.

### Mandate

The Department of Military Veterans derives its mandate from the Military Veterans Act (2011), which requires it to provide national policy and standards on socioeconomic support to military veterans and their dependants, including benefits and entitlements to help realise a dignified, unified, empowered and self-sufficient community of military veterans.

### Selected performance indicators

Table 26.1 Performance indicators by programme and related priority

Indicator	Programme	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of military veterans provided with newly built houses per year	Socioeconomic Support	Priority 5: Spatial integration, human settlements and local government	477	192	71	355	480	480	480
Total number of military veterans and their dependants receiving pension benefits	Socioeconomic Support	Priority 6: Social cohesion and safer communities	– <sup>1</sup>	– <sup>1</sup>	– <sup>1</sup>	2 000	4 000	6 500	9 500
Total number of military veterans with access to health care services	Socioeconomic Support	Priority 3: Education, skills and health	18 390	18 500	19 100	19 700	20 200	20 700	21 200

Number of military veteran memorial sites facilitated per year	Empowerment and Stakeholder Management	Priority 6: Social cohesion and safer communities	0	0	0	3	3	3	3

1. No historical data available.

### Expenditure overview

Acknowledging military veterans' contribution to the creation of South Africa's democracy has the potential to deepen social cohesion and national unity while redressing the inequities of the past. As such, over the medium term, the department will focus on providing military veterans and their dependants with access to key benefits such as pensions, housing, health care and education, training and skills development programmes.

A projected 83.9 per cent (R3 billion) of the department's total budget over the medium term is allocated to the

*Socioeconomic Support and Empowerment and Stakeholder Management* programmes. The aim of these programmes is to improve quality of life for eligible military veterans and their dependants. Over the period ahead, the department plans to roll out pension benefits to 9 500 deserving military veterans and their dependants at an estimated cost of R1.2 billion. This is funded through a combination of an additional allocation of R839 million and the reprioritisation of R326 million over the medium term from education support benefit. The use of the additional allocation for this purpose is subject to tabling pension benefit regulations in Parliament and applying a strict means test to avoid double-dipping.

The department expects to deliver 1 440 houses to military veterans over the next 3 years. Provincial departments of human settlements will continue to construct these houses on behalf of the department, as per the terms of the department’s housing delivery model. Funding is provided through the *Socioeconomic Support* programme at a projected cost of R117 million.

Health care for eligible military veterans is fully subsidised by the department through the South African Military Health Service, which is funded through the *Health Care and Wellbeing Support* subprogramme in the *Socioeconomic Support* programme. Over the period ahead, the department plans to increase the number of military veterans who access health care from 19 700 in 2022/23 to 21 200 in 2025/26. To accommodate this expected increase, the department has reprioritised R6 million over the medium term from housing benefits. As such, spending in the *Health Care and Wellbeing Support* subprogramme is expected to increase at an average annual rate of 3 per cent, from R113.9 million in 2022/23 to R124.5 million in 2025/26.

The department plans to maintain the number of bursaries provided to military veterans and their dependants at 3 500 in each year of the medium term. If necessary, it will refer students previously funded by the department to the National Student Financial Aid Scheme as part of state-subsidised higher education. Allocations for this are within the *Socioeconomic Support* programme, which has a budget of R1.8 billion over the next 3 years.

The department will continue to reposition its empowerment and skills development programme by focusing on areas such as road maintenance, plumbing and farming, among others. The department will also ensure that military veterans and their dependants participate in government programmes that create jobs and business opportunities, and encourage entrepreneurship. As such, over the MTEF period, the department plans to provide 3 000 military veterans with access to relevant training and skills development. To carry out these activities, R687.6 million over the next 3 years is allocated in the *Empowerment and Stakeholder Management* programme.

Total expenditure is expected to increase at an average annual rate of 16.5 per cent, from R670 million in 2022/23 to R1.1 billion in 2025/26. This increase is mainly due to the allocation of additional funding amounting to R839 million for rolling out pension benefit to military veterans and their dependants, as well as R11.3 million over the same period to cover cost-of-living adjustments.

## Programme 2: Socioeconomic Support

### Programme purpose

Develop and monitor the implementation of legislation, policy frameworks and service delivery cooperation agreements on compensation for injury in military service, counselling, health care, public transport, pension and housing benefits for military veterans eligible for such support.

### Objectives

- Establish an enabling environment for the provision of socioeconomic support services to military veterans by:
  - maintaining the credibility and security of the national database of military veterans through consolidating data and updating software and the personal files of military veterans on an ongoing basis
  - facilitating access to benefits espoused in section 5 of the Military Veterans Act (2011) for eligible military veterans by March 2026.
- Advance the delivery of social services to military veterans and their dependants by developing strategic partnerships with other organs of the state and in broader society, where applicable, to ensure that by March 2026:
  - 1 440 military veterans are provided with newly built houses
  - 9 500 military veterans and their dependants are provided with pension benefits
  - 21 200 military veterans have access to health care services.
- Provide strategic leadership to the socioeconomic sector by conducting ongoing research on pertinent issues affecting military veterans; developing requisite policies; and implementing strategies, guidelines, frameworks, norms and standards by March 2026.

### Subprogrammes

- *Database and Benefits Management* establishes systems for the seamless transition of servicemen and servicewomen from active military service to civilian life. This subprogramme also consolidates and ensures the credibility and security of the national database of military veterans, and oversees governance obligations and resources allocated based on the provisions of the Military Veterans Act (2011).
- *Health Care and Wellbeing Support* facilitates the provision of health care services and wellbeing support to military veterans, including initiatives to prevent disease.
- *Socioeconomic Support Management* develops norms and standards for the provision of public transport, pension, housing and social relief of distress benefits for eligible military veterans. This subprogramme also establishes strategic partnerships to advance service delivery, tracks delivery by service providers on agreed targets, reports on service delivery and ensures continual improvement.

## Programme 3: Empowerment and Stakeholder Management

## Programme purpose

Manage and facilitate the implementation of military veteran empowerment and stakeholder management programmes.

## Objectives

- Ensure the empowerment of deserving military veterans by:
  - developing and implementing a special purpose vehicle to facilitate business opportunities by March 2026
  - forming partnerships with 12 companies in the private sector and other organs of state, and entering into service-level agreements and memorandums of understanding over the medium term
  - monitoring and evaluating the implementation of agreements and memorandums of understanding to ensure that support is provided annually
  - providing 3 000 military veterans with access to relevant training and skills development and concluding 12 formal agreements with institutions of higher education and training for the provision of skills development over the medium term
  - providing 3 500 eligible military veterans and their dependants with education support in each year over the medium term
  - facilitating the integration of the South African National Military Veterans Association of military veterans with the international community through the establishment of relevant exchange programmes by March 2026
  - facilitating the integration of military veterans into the national workforce on an ongoing basis.
- Honour and memorialise military veterans who played a meaningful role in the liberation of South Africa by ensuring that 3 memorial sites for military veterans are facilitated in each year over the medium term.

## Subprogrammes

- *Provincial Offices and Stakeholder Relations* facilitates and coordinates military veteran stakeholder institutions and provides administrative support to secure stakeholders from public and private institutions that are willing to contribute towards the wellbeing of military veterans.
- *Empowerment and Skills Development* provides skills programmes and related activities to ensure that military veterans contribute positively to mainstream economic activities.
- *Heritage, Memorials, Burials and Honours* provides services to honour the contributions made by military veterans in the struggle for democracy, and ensures that their memorials are adequately secured, articulated in a dignified manner, and captured in historical texts.

Executive authority: Minister of Justice and Correctional Services  
 Accounting officer: Secretary-General of the Office of the Chief Justice  
 Website: [www.judiciary.org.za](http://www.judiciary.org.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Strengthen judicial governance and independence by rendering effective support to the Chief Justice in executing administrative and judicial powers and duties as both head of the Judiciary and the Constitutional Court.

### Mandate

The Office of the Chief Justice renders support to the Chief Justice as the head of the judiciary, as provided for in section 165(6) of the Constitution, read together with the Superior Courts Act (2013). The Office of the Chief Justice is also required to: provide and coordinate legal and administrative support to the Chief Justice; provide communication and relationship management services and intergovernmental and internal coordination; develop courts administration policy, norms and standards; support the development of judicial policy, norms and standards; support the judicial function of the Constitutional Court; and support the Judicial Service Commission and South African Judicial Education Institute in the execution of their mandates.

### Selected performance indicators

Table 27.1 Performance indicators by programme and related priority

			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Percentage of default judgments finalised by registrars within 14 days from date of receipt of application per year	Superior Court Services	Priority 6: Social cohesion and safer communities	– <sup>1</sup>	79% (15 686/ 19 846)	86% (28 356/ 33 019)	74%	76%	78%	80%
Percentage of taxations of legal bills of costs finalised within 60 days from date of being set down per year	Superior Court Services		– <sup>1</sup>	99% (26 476/ 26 665)	99% (27 218/ 27 413)	80%	85%	90%	90%
Percentage of warrants of release delivered within 1 day of being issued per year	Superior Court Services		100% (98)	100% (63)	100% (60)	100%	100%	100%	100%
Number of judicial education courses conducted per year	Judicial Education and Support		115	123	168	110	115	120	125

1. No historical data available.

## Expenditure overview

Over the next 3 years, the Office of the Chief Justice will focus on improving access to justice and the services of the superior courts, and increasing access to judicial education courses.

The work of the *Superior Court Services* programme is intended to enable access to justice, primarily by ensuring that the judiciary is supported. The programme has a budget of R3.1 billion over the next three years, accounting for 39.9 per cent of the department's total allocation. To strengthen access to its services, the department aims to fill an estimated 33 critical positions for registrars, clerks and judges' secretaries at superior courts. Between 2022/23 and 2025/26, this is expected to result in an increase in: the finalisation of default judgments from 74 per cent to 80 per cent; the finalisation of taxations of legal bills of costs from 80 per cent to 90 per cent; and spending on compensation of employees from R1.96 billion to R1.97 billion. This nominal increase in spending on compensation of employees is due to an additional allocation for inflationary salary adjustments amounting to R218.1 million over the next 3 years coupled with an increase in personnel over the same period.

To increase efficiencies such as the turnaround time in dealing with cases, the Court Online system is expected to be rolled out in 2023/24 to 7 prioritised superior courts in Eastern Cape, Free State, Mpumalanga, Limpopo, Northern Cape, North West and Western Cape. The plan is to implement the system in all the courts over the MTEF period as determined by the judiciary based on their current infrastructure. Spending for this is within the *Corporate Services* subprogramme's allocation of R174.1 million in that year.

In its efforts to enhance the judicial skills of current and aspiring judicial officers, the department plans to increase the number of judicial education and training courses conducted from 110 in 2022/23 to 125 in 2025/26. This is expected to lead to expenditure of R92.7 million over the next 3 years in the *South African Judicial Education Institute* subprogramme in the *Judicial Education and Support* programme.

## Programme 2: Superior Court Services

### Programme purpose

Provide court administration services to the superior courts.

### Objectives

- Ensure the effective and efficient administration of the superior courts by:
  - increasing the percentage of default judgments finalised within 14 days from 76 per cent in 2023/24 to 80 per cent in 2025/26
  - increasing the percentage of taxations of legal costs finalised within 60 days from 85 per cent in 2023/24 to 90 per cent in 2025/26
  - delivering all warrants of release within 1 day of being issued over the MTEF period
  - monitoring the court order integrity project, which is guided by the court order integrity committee, and producing 4 reports per year over the MTEF period on the committee's work
  - monitoring the law reporting project and producing 4 monitoring reports per year over the MTEF period
  - monitoring the judicial case flow management project and producing 4 reports per year over the MTEF period.

### Subprogrammes

- *Administration of Superior Courts* provides administrative and technical support to the superior courts, monitors their overall performance and enhances judicial stakeholder relations.
- *Constitutional Court* funds the activities and operations of the Constitutional Court, which has jurisdiction over constitutional matters and any matter of public importance.
- *Supreme Court of Appeal* funds the activities and operations of the Supreme Court of Appeal, which adjudicates appeals in any matters arising from the high courts or courts of similar status.
- *High Courts* funds the activities and operations of the various high court divisions, which have jurisdiction over defined geographical areas.
- *Specialised Courts* funds the activities and operations of the Labour Court, the Labour Appeal Court, the Land Claims Court, the Competition Appeal Court and the Electoral Court. These courts adjudicate over various types of matters excluded from the jurisdiction of the various high court divisions and lower courts.

## Programme 3: Judicial Education and Support

### Programme purpose

Provide education programmes to judicial officers, support services to the Judicial Service Commission, and

policy development and research services to the department and the Judiciary for the optimal administration of justice.

## Objectives

- Enhance the judicial skills of serving and aspiring judicial officers to perform optimally by increasing the number of judicial education training courses from 115 in 2023/24 to 125 in 2025/26.
- Enhance the governance of the judiciary and the department by producing 2 research monographs for judicial education each year over the MTEF period.
- Ensure enhanced judicial performance by producing 5 litigation monitoring reports in each year over the MTEF period.
- Improve judicial performance by producing 3 reports on judicial appointments and complaints in each year over the MTEF period.
- Improve judicial performance by producing 2 reports on the status of disclosures for judges' registrable interests in each year over the MTEF period.

## Subprogrammes

- *South African Judicial Education Institute* funds the activities of the South African Judicial Education Institute, which provides continuing judicial education for judicial officers and training for aspirant judicial officers.
- *Judicial Policy, Research and Support* provides advisory opinions on policy development, conducts research and offers legal support services to enhance the functioning of the judiciary.
- *Judicial Service Commission* provides secretariat and administrative support services to the Judicial Service Commission so that it can effectively fulfil its constitutional and legislative mandates.

Website	www.saps.gov.za					

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Prevent, combat and investigate crime; maintain public order; protect and secure the inhabitants of South Africa and their property; and uphold and enforce the law.

### Mandate

The South African Police Service derives its powers and functions from section 205 of the Constitution and from the South African Police Service Act (1995). This legislation regulates the police service in terms of its core functions: to prevent, investigate and combat crime; maintain public order; protect and secure the inhabitants of South Africa and their property; and uphold and enforce the law.

Number of security breaches recorded during the in-transit protection of VIPs and identified VIP residences per year	Protection and Security Services		0	0	0	0	0	0	0

1. Positive symbol (+) represents an increase in the number of crimes reported.

## Expenditure overview

Over the medium term, the department's key focus will be on implementing the national policing strategy. Key among the interventions that this strategy proposes are: improving community safety; reducing gender-based violence and femicide; and combating serious and organised crimes.

Total expenditure is expected to increase at an average annual rate of 3.9 per cent, from R102.6 billion in 2022/23 to R114.9 billion in 2025/26, mainly due to the allocation of additional funding of R5.8 billion over the MTEF period for cost-of-living adjustments, and R7.8 billion for strengthening capacity at police stations. This will be done by appointing a targeted 5 000 police trainees per year over the next 3 years and absorbing them as constables upon their successful completion of training. This funding also provides for costs associated with training, operational equipment, and the payment of monthly stipends to trainees and their salaries once they are absorbed. As a result, the number of personnel in the department is set to increase from 178 708 in 2022/23 to 193 708 in 2025/26. Compensation of employees constitutes an estimated 78.7 per cent (R337.2 billion) of the department's total budget over the medium term.

### **Improving community safety**

To ensure a coordinated response to building safer communities, the national policing strategy was approved in 2022/23. In line with the strategy, over the period ahead, the department will focus on stabilising crime in the top 30 high-contact crime areas that collectively contribute about 50 per cent of reported contact crimes across the country. This includes combating the various contributors to crime, such as illegal firearms, liquor, drugs, illicit mining and undocumented foreign nationals. In support of this work, the department will ensure that the stations in the top 30 high-contact crime areas have optimal human resources and sufficient operational equipment. These activities are funded through the *Visible Policing* programme, which is allocated R168.1 billion over medium term.

The department also plans to develop and implement a detective service recovery plan over the medium term. The purpose of the plan is to improve the detection of contact crimes at police stations through better case docket management, which is in turn expected to improve communication between investigating officers and victims, and cooperation with the National Prosecuting Authority. This work will be carried out in the *Detective Services* programme, which has a total allocation of R66.3 billion over the period ahead.

### **Combating gender-based violence and femicide**

Over the medium term, the department's *Visible Policing* and *Detective Services* programmes will implement interventions in line with the national policing strategy that are aimed at combating gender-based violence and femicide, and improving support to victims. Interventions include: establishing gender-based violence desks in all police stations and providing in-service training to designated employees working at these desks; developing, implementing and monitoring action plans on gender-based violence and sexual offences at stations in the top

30 gender-based violence hotspots; and the continued implementation of measures to eradicate the DNA tracing and verification backlog linked to crime scenes, as this is critical as supporting evidence in investigations, as well as for updating the DNA database. The department will also ensure that every police station has a dedicated, victim-friendly room for victims of gender-based violence, including sexual assault. A total of R107.3 million is allocated in the *Administration* programme over the next 2 years for this work.

### ***Addressing serious and organised crimes***

In line with interventions identified in the national policing strategy to prevent and investigate crime that threatens the economy, activities in the *Detective Services* programme over the medium term are aimed at addressing the increase in crimes targeted at critical infrastructure, such as during local construction projects. To combat this problem, 20 economic infrastructure task teams have been established in identified hotspots. The multidisciplinary teams encompass visible policing, crime intelligence and detective services.

To ensure a coordinated approach to combating corruption in the public and private sectors over the period ahead, the Directorate for Priority Crime Investigation will continue to work closely with government stakeholders and agencies such as the anti-corruption task team, the national anti-corruption advisory council and the multidisciplinary fusion centre, which targets priority financial crimes. This includes implementing recommendations from the state capture commission.

The directorate, along with the detective services and crime intelligence units, has established a steering committee to coordinate all matters related to the investigation and combating of cybercrime. The committee has developed a strategy and standard operating procedures for investigation in the police, as required in terms of section 26 of the Cybercrime Act (2020). The committee will collaborate with other national and international law enforcement agencies over the medium term to enhance investigations through the establishment of cyber-investigation disciplines that include online, open source, social media, digital forensic, intrusion and unauthorised access investigations. These interventions are expected to ensure that the department is successfully able to close 72 per cent of registered serious organised crime-related project investigations per year over the next 3 years. To carry out this work, the Directorate for Priority Crime Investigation is allocated R7 billion over the MTEF period in the *Detective Services* programme.

### ***Preventing, combating and investigating money laundering and terror financing***

The directorate aims to intensify its focus on combating money laundering and terror financing, and on investigating serious corruption and other high-risk areas such as narcotics, tax evasion, fraud and corruption, and other matters referred by the Special Investigating Unit. These priorities are in line with the directorate's strategic and operational plans, and the findings outlined in the Financial Action Task Force's evaluation report of South Africa. These include the need for law enforcement agencies to: address risks, threats and vulnerabilities relating to money laundering and terror financing; implement proactive identification and investigation methods for money laundering networks and professional enablers; address internal capacity and skills gaps; and strengthen the use of financial intelligence in money laundering and terror financing investigations.

As such, over the medium term, the directorate will aim to increase the number of requests to the Financial Intelligence Centre on money laundering from 86 to 124, and on terror financing from 151 to 218. To implement the Financial Action Task Force standards and enhance the directorate's capacity in strategic competencies, an additional 2 647 posts are expected to be filled in 2023/24 and 2024/25. The directorate also plans to leverage existing capacity and financial intelligence by adopting a proactive approach of identifying and pursuing high-level, complex and serious cases of money laundering.

## Programme 2: Visible Policing

### Programme purpose

Enable police stations to institute and preserve safety and security, and provide for specialised interventions and the policing of South Africa's borders.

### Objectives

- Provide a proactive and responsive policing service to discourage and prevent violent crime by reducing the number of contact crimes reported by 9.21 per cent, the number of crimes reported against women by 9.4 per cent, and the number of crimes reported against children by 9.45 per cent per year over the next 3 years. This will be done through the implementation of priorities and interventions aligned with the integrated criminal justice strategy.
- Strengthen safety and security in urban and rural communities across South Africa by ensuring that at least 99.57 per cent of community policing forums are functional over the medium term.

### Subprogrammes

- *Crime Prevention* provides for basic crime prevention and visible policing services at police stations and community service centres.
- *Border Security* provides for the policing of South Africa's borders.
- *Specialised Interventions* provides for interventions in medium- to high-risk operations, including the air wing, the special task force and crime combating units; and the protection of valuable and dangerous cargo.

- *Facilities* provides for office accommodation budgets and related expenditure devolved to the department by the Department of Public Works and Infrastructure.

## Programme 3: Detective Services

### Programme purpose

Enable the investigative work of the South African Police Service, including providing support to investigators in terms of forensic evidence and criminal records.

### Objectives

- Contribute to the successful prosecution of offenders by:
  - increasing the detection rate for contact crimes from 46.36 per cent in 2021/22 to 51.75 per cent in 2025/26
  - increasing the detection rate for crimes against women from 69.97 per cent in 2021/22 to 71.35 per cent in 2025/26
  - increasing the detection rate for crimes against children from 61.84 per cent in 2021/22 to 65.35 per cent in 2025/26
  - generating 95 per cent of original previous conviction reports for formally charged individuals within 15 calendar days over the medium term.

### Subprogrammes

- *Crime Investigations* provides for detectives at police stations who investigate crimes, including crimes against women and children.
- *Criminal Record Centre* provides for effective and credible criminal record centres for crime scene management or processing, and provides criminal records and related information.
- *Forensic Science Laboratory* funds forensic science laboratories, which provide specialised, evidence-related technical analysis and support to investigators.
- *Specialised Investigations* provides for the prevention, combating and investigation of national priority offences, including the investigation of organised crime syndicates, serious and violent crime, commercial crime and corruption.

## Programme 4: Crime Intelligence

### Programme purpose

Manage crime intelligence and analyse crime information, and provide technical support for investigations and crime prevention operations.

### Objective

- Contribute to combating crime on an ongoing basis by ensuring that 66 per cent of network operations in 2023/24 and 67 per cent of network operations in 2024/25 and 2025/26 are successfully terminated in support of crime prevention, investigation and prosecution.

### Subprogrammes

- Crime Intelligence Operations* provides for intelligence-based criminal investigations.
- Intelligence and Information Management* provides for the analysis of crime intelligence patterns to facilitate crime detection in support of crime prevention and crime investigation.

### Expenditure trends and estimates

**Programme 5: Protection and Security Services**

**Programme purpose**

Provide protection and security services to all identified dignitaries and government interests.

**Objectives**

- Minimise security violations on an ongoing basis by:
  - protecting all identified local and foreign dignitaries while in transit, without any security breaches
  - protecting the locations in which dignitaries, including people related to the president and deputy president, are present, without security breaches.

**Subprogrammes**

- *VIP Protection Services* provides for the protection of the president, deputy president, former presidents, their spouses and other identified dignitaries while in transit.
- *Static Protection* provides for the protection of other local and foreign dignitaries and the places in which all dignitaries, including people related to the president and deputy president, are present.
- *Government Security Regulator* provides for security regulations and evaluations, the administration of national key points, and strategic installations.
- *Operational Support* provides administrative support to the programme, including personnel development.

#### Entity overview

The Private Security Industry Regulatory Authority was established in terms of section 2 of the Private Security Industry Regulation Act (2001), which replaced the Security Officers Act (1987). The authority is mandated to regulate the private security industry and exercise control over security service providers in the public and national interest, as well as in the interest of the private security industry itself.

Over the medium term, the authority will continue to focus on the implementation of its digital transformation strategy, which is allocated R85 million over the MTEF period. This entails rolling out an online registration and training system, and upgrading its financial system. The online registration system is being implemented, with full integration with the authority's other systems set to take place over the next 3 years. Given dependencies on external service providers and technical limitations with the rolling out and testing of systems related to the digital migration process, the authority has set performance outcomes moderately over the medium term. As such, the turnaround times for the processing of applications for security businesses and security officers over the period ahead are set to remain at 4 and 18, respectively.

Other initiatives planned over the MTEF period include professionalising the security industry by reviewing and upgrading training material, introducing a reaction unit to curb noncompliance with the Private Security Industry Regulation Act (2001) and related regulations by the security industry, and establishing a business intelligence

unit in the authority's forensic and ethics department to ensure correct data analysis during forensic investigations. The authority also plans to decentralise and restructure its services over the medium term to ensure greater financial stability.

Expenditure is expected to increase at an average annual rate of 9.5 per cent, from R409.5 million in 2022/23 to R538.3 million in 2025/26. Compensation of employees accounting for an estimated 49.2 per cent (R929.9 million) of the authority's expenditure over the MTEF period. The authority's number of personnel is expected to decrease from 413 in 2022/23 to 390 in 2025/26 as it redirects funding to key projects such as training and the establishment of a complaints unit. Only critical vacant posts, such as for business intelligence officials, are expected to be filled over the medium term.

More than 90 per cent (R1.7 billion) of the authority's revenue over the MTEF period is set to be generated through the collection of annual and registration fees from private security businesses and security officers, and the remainder from the sale of renewal certificates, the training of security officers, and accreditation fees collected from training providers. Revenue is expected to increase in line with expenditure, mainly due to the anticipated increase in the number of registrations of security officers from 144 000 in 2022/23 to 177 156 in 2025/26 owing to the implementation of the online system.

Executive authority: Minister of Agriculture, Land Reform and Rural Development  
 Accounting officer: Director-General of Agriculture, Land Reform and Rural Development  
 Website: [www.daff.gov.za](http://www.daff.gov.za)

*The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).*

### Vote purpose

*Provide equitable access to land, integrated rural development, sustainable agriculture and food security for all.*

### Mandate

The mandate of the Department of Agriculture, Land Reform and Rural Development includes developing agricultural value chains, providing agricultural inputs, monitoring production and consumption in the agriculture sector, and facilitating comprehensive rural development. The department executes its legislative mandate by implementing, managing and overseeing the following legislation:

- the Conservation of Agricultural Resources Act (1983), which makes provision for control over the use of the country's natural agricultural resources to conserve soil, water sources and vegetation
- the Agricultural Product Standards Act (1990), which provides for control over the sale and export of certain agricultural products and the sale of some imported agricultural products
- the Provision of Land and Assistance Act (1993), which makes provision for the designation of certain land, the regulation of the subdivision of such land and the settlement of people on it. The act also provides for the acquisition, maintenance, planning, development, improvement and disposal of property, and the provision of financial assistance for land reform
- the Restitution of Land Rights Act (1994), which makes provision for the restitution of rights to land to people or communities dispossessed of such rights after 19 June 1913 because of racially discriminatory laws or practices. To administer this task, the act established the Commission on the Restitution of Land Rights and the Land Claims Court
- the Spatial Planning and Land Use Management Act (2013), which seeks to enable the transformation of South Africa's settlement patterns by adopting an innovative approach to spatial planning and the management of land use.

## Expenditure overview

Over the medium term, the department will continue to focus on improving agricultural production and revitalising infrastructure, accelerating land reform and finalising land restitution claims, and increasing the department's research and development capacity to improve agricultural outputs.

Total expenditure is expected to increase at an average annual rate of 2.5 per cent, from R17.5 billion in 2022/23 to R19 billion in 2025/26. An estimated 51.8 per cent (R29.3 billion) of this spending over the period is allocated to transfers and subsidies, increasing at an average annual rate of 9 per cent, from R8 billion in 2022/23 to R10.2 billion in 2025/26. This includes transfers to provinces for conditional grants (the *comprehensive agricultural support programme grant*, the *land care programme grant* and the *Ilima/Letsema projects grant*), transfers to public entities, and land reform and restitution grants. Compensation of employees accounts for an estimated 22.6 per cent (R11.9 billion) of total expenditure over the MTEF period, decreasing from R4.3 billion in 2022/23 to R4.2 billion in 2025/26 at an average annual rate of 1.1 per cent. This low rate of increase is due to some functions and their attendant budgets being shifted to the Department of Home Affairs from 2023/24 for the Border Management Authority.

### **Improving agricultural production and revitalising infrastructure**

Over the medium term, the department will work on implementing the agro-processing master plan. The plan has buy-in from various constituents across the agricultural value chain, including the South African Grain Farmers Association, the Grain Farmer Development Association, the South African Sugar Association, the South African Pork Producers' Organisation, the South African Poultry Association, the National Emergent Red Meat Producers' Organisation, and the South African Mohair Growers' Association. This will see retailers and agro-processors commit a minimum of 3 per cent of their net profit after tax to programmes aimed at investing in black farmers and black-owned agri-businesses.

As part of the master plan, the department plans to intensify the implementation of the agri-parks model – which includes creating farmer production support units, agri-hubs, irrigation schemes and other socioeconomic infrastructure – as part of its drive to revitalise agricultural infrastructure. This model is primarily intended to improve rural employment, support industrialisation efforts by smallholder farmers, support rural economic development, and create capacity in agro-processing and industrialisation value chains for broad-based job creation and market access opportunities. Implementing the model also entails determining the viability of and allocation of state land (including communal land) for agricultural production. The department plans to implement 77 infrastructure projects over the MTEF period as part of the agri-parks model.

Activities aimed at improving agricultural production are funded through the *comprehensive agricultural support programme grant*, which is allocated R5.1 billion over the medium term in the *Food Security and Agrarian Reform* and *National Extension Support Services and Sector Capacity Development* subprogrammes in the *Food Security, Land Reform and Restitution* programme. An additional R3 billion over the period ahead is allocated to support the department's efforts to revitalise enabling agricultural infrastructure. This allocation is in the *Rural Infrastructure Development* subprogramme in the *Rural Development* programme.

### ***Accelerating land reform and finalising land restitution claims***

Government's land reform programme is fundamental to responding to South Africa's triple challenge of inequality, poverty and unemployment. The department plays a central role in coordinating this response by purchasing land, settling people on it and providing assisting post-settlement, and aims to acquire 115 467 hectares over the MTEF period at an estimated cost of R2.9 billion in the *Food Security, Land Reform and Restitution* programme. A further R676 million over the period ahead is allocated in the same programme to acquire 17 965 hectares specifically to provide security of tenure to farm dwellers and labour tenants.

The department is crucial in government's response in settling land restitution claims to ensure that land is returned to its rightful owners before they were dispossessed through the colonial or apartheid regimes, and to ensure that claimants are able to use it for both settlement and productive purposes. The department aims to settle 1 263 land restitution claims over the MTEF period at a projected cost of R12.5 billion in the *Food Security, Land Reform and Restitution* programme.

### ***Increasing research and development capacity to improve agricultural outputs***

Over the period ahead, the department plans to enhance capacity in research and development to improve logistics, the safety and quality of agricultural products, and market access. As part of its efforts to strengthen biosecurity and sanitary and phytosanitary standards for agricultural products to protect existing international markets and open new ones, R4.1 billion is allocated over the medium term in the *Agricultural Production, Biosecurity and Natural Resources Management* programme. This includes an allocation of R14.3 million to, among other things, commission studies to inform biosecurity decision-making, particularly on the management and control of pests and diseases. A further R100 million over the MTEF period is allocated for streamlining the policy and legislative framework related to quarantine and regulated plant pest surveillances, which is expected to improve market access.

## Programme 2: Agricultural Production, Biosecurity and Natural Resources Management

### Programme purpose

Oversee livestock production, game farming, animal and plant health, natural resources, and disaster management.

### Objectives

- Manage biosecurity and related sector risks over the medium term by:
  - conducting 9 countrywide surveys of plant pests and diseases, in particular the exotic fruit fly, citrus greening disease and banana bunchy top virus, to manage their spread and/or incursion and eradicate them

- conducting 9 planned animal risk surveillance exercises on foot-and-mouth disease, ovine rinderpest and Newcastle disease.
- Ensure access to primary animal health care services through the implementation of compulsory community service by deploying 320 veterinary graduates to rural areas by 2024/25.
- Enforce an animal disease regulatory framework to reduce the level of disease outbreaks and reduce interception at export channels in production areas to a minimum level by conducting 3 planned animal risk surveillance exercises on foot-and-mouth disease and goat plague in each year over the medium term.
- Implement regulatory compliance and monitoring interventions to prevent plant and animal pest and disease outbreaks through quarantine inspections, surveillance, and the testing and registration of products used in agriculture by 2024/25.

### Subprogrammes

- *Inspection and Quarantine Services* enforces and ensures compliance with agricultural production, biosecurity, biosafety and South African food safety laws.
- *Plant Production and Health* develops policies, norms and standards, and regulates and promotes plant production and health.
- *Animal Production and Health* provides policies, norms and standards to regulate and promote livestock production, animal production and game farming while ensuring biosecurity and the health and safety of products.
- *Natural Resources and Disaster Management* facilitates the development of infrastructure and the sustainable use of natural resources; and integrates, coordinates and implements disaster management policies and frameworks with special emphasis on the mitigation of disasters in rural and agricultural areas.
- *Biosecurity* provides measures for the effective and efficient management of biosecurity threats to the agricultural sector.
- *Agricultural Research Council* manages transfers to the Agricultural Research Council.
- *Onderstepoort Biological Products* prevents and controls animal diseases that affect food security, human health and livelihoods through the continued development and efficient manufacturing of innovative animal-related pharmaceuticals (including vaccines) and related products. This subprogramme is an entity that does not receive funding from government.
- *Perishable Products Export Board* ensures the orderly export of perishables and monitors the proper maintenance of a continuous cold chain for exports. This subprogramme is an entity that does not receive funding from government.

## Programme 3: Food Security, Land Reform and Restitution

### Programme purpose

Acquire and redistribute land, and promote food security and agrarian reform programmes.

### Objectives

- Redress equitable access to land by conducting research and finalising land claims on an ongoing basis.
- Coordinate the implementation of the national policy on food and nutrition security by providing production inputs such as seeds and fertilisers, and cultivating hectares of underused communal land over the medium term.
- Improve delivery capacity in support of sustainable growth in the sector by:
  - implementing policies such as the national policy on extension and advisory services on an ongoing basis
  - facilitating collaboration with commodity organisations to build the capacity of extension practitioners by March 2024
  - providing strategic leadership and support, such as research, training and extension services, to targeted subsistence and smallholder producers in the sector by transforming all agricultural colleges into agricultural training institutions by March 2024.
- Coordinate comprehensive support systems and programmes provided to producers by:
  - supporting subsistence and smallholder producers over the medium term
  - supporting the commercialisation of smallholder producers each year over the medium term through the blended finance model
  - placing unemployed agricultural graduates in farms and supporting access to resources to facilitate the development of agribusinesses over the medium term.

### Subprogrammes

- *Food Security and Agrarian Reform* provides national frameworks to promote sustainable household food security.
- *Land Redistribution and Tenure Reform* develops and coordinates policies and programmes in support of the implementation of land redistribution and tenure reform.
- *National Extension Support Services and Sector Capacity Development* provides national extension support services.
- *Land Development and Post-settlement Support* develops and provides strategic support to farmers and cooperatives.
- *Commission on the Restitution of Land Rights* investigates and negotiates land restitution claims and recommends settlements in terms of the Restitution of Land Rights Act (1994).
- *Restitution* settles land restitution claims under the Restitution of Land Rights Act (1994).

- *Agricultural Land Holding Account* is responsible for land acquisition, recapitalisation and development in terms of the Provisions of Land and Assistance Act (1993).
- *Ingonyama Trust Board* provides quarterly transfers for administering land owned by the KwaZulu-Natal Ingonyama Trust.
- *Office of the Valuer-General* is responsible for providing valuations on land earmarked for reform and restitution.

## Programme 4: Rural Development

### Programme purpose

Facilitate rural development strategies for socioeconomic growth.

### Objective

- Promote an integrated and inclusive rural economy through the coordination and implementation of rural development strategies over the medium term.

### Subprogrammes

- National Rural Youth Service Corps* provides social organisation, youth development and economic upliftment.
- Rural Infrastructure Development* facilitates infrastructure development in rural areas.
- Technology Research and Development* develops and adapts innovative and appropriate technologies in rural areas.

### Expenditure trends and estimates

**Programme 5: Economic Development, Trade and Marketing**

**Programme purpose**

Promote economic development, trade and market access for agriculture products, and foster international relations for the sector.

**Objectives**

- Upskill agro-processing entrepreneurs by training 600 of them on food manufacturing norms and standards by 2024/25.
- Increase market access and maintain existing markets by certifying and accrediting producers of fresh produce for export through good agricultural practice certification and an accreditation programme by 2024/25.

- Build national skills capabilities in international market research by providing for the transfer of marketing skills to small and medium agro-processing entrepreneurs by 2025.
- Provide technical sector leadership in trade negotiations and implement trade agreements to improve market access by linking producers to high-value markets by March 2025.
- Ensure shared growth by developing the agricultural value chain and improving market access by 2023.

### Subprogrammes

- *International Relations and Trade* promotes, coordinates and supports international relations and trade through the development and implementation of appropriate policies and programmes.
- *Cooperatives Development* facilitates and supports the implementation of programmes and initiatives to promote the participation of cooperatives in economic development.
- *Agro-Processing, Marketing and Rural Industrial Development* ensures the transformation of primary product commodities into value-added products and ensures domestic and international market access.
- *National Agricultural Marketing Council* manages transfers to the National Agricultural Marketing Council.

## Programme 6: Land Administration

### Programme purpose

Provide and maintain an inclusive, effective and comprehensive system of planning, geospatial information and cadastral surveys; legally secure land tenure; and conduct land administration that promotes social, economic and environmental sustainability.

### Objectives

- Ensure spatial transformation and efficient land administration over the medium term by:
  - rolling out and implementing the electronic deeds registration system
  - reducing the time taken to process general plans, sectional plans and diagrams to 14 working days.

### Subprogrammes

- *National Geomatics Management Services* is responsible for examining and approving all surveys of land and real rights intended to be registered in the deeds office; maintaining records; compiling, maintaining and revising maps of property boundaries; providing cadastral advisory services to other government institutions; promoting and controlling all matters related to geodetic and topographical surveying; establishing and maintaining a network of national georeferencing stations; facilitating state surveys related to land reform; and providing cadastral and geospatial information services, including infrastructure for South African spatial data.
- *Spatial Planning and Land Use* provides for national land use management and spatial planning systems; develops the national spatial development framework and rural development plans, guidelines, norms and standards; and ensures compliance with the Spatial Planning and Land Use Management Act (2013). This subprogramme also provides support to the South African Council for Planners and technical assistance to other spheres of government by providing spatial development frameworks and land use schemes, and establishing functional municipal land use tribunals.
- *Deeds Registration* provides a deeds registration system in which secure titles are registered and accurate information is provided.
- *South African Council for Planners* makes annual transfers to the South African Council for Planners, a non-profit organisation dealing with the registration and other activities of the planning profession.
- *South African Geomatics Council* regulates and promotes the transformation of the geomatics profession.
- *Integrated Land Administration* provides an overarching, coordinated and streamlined land administration system that underpins sustainable economic, social, institutional and environmental development.

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of hectares of strategically located land acquired per year	Redress and equitable access to land	Priority 5: Spatial integration, human settlements and local government	92 643	23 973	55 235	35 182	36 628	38 459	40 380
Number of farms supported through the land development support programme per year	Improved productivity of land reform projects		162	116	35	83	66	41	33

#### Entity overview

The agricultural land holding account was established in 2009 in terms of the Provision of Land and Assistance Act (1993). The act authorises the Minister of Agriculture, Land Reform and Rural Development to purchase land to enable the department to accelerate the land redistribution process, acquire land in nodal areas and other areas of high agricultural potential, improve the process of identifying and selecting beneficiaries and the planning of land on which people could be settled, and ensure that acquired land is used productively.

The entity will focus on promoting equitable land redistribution and agricultural development over the medium term by acquiring a targeted 115 467 hectares of strategically located land, of which 50 per cent is set to be allocated to women, 40 per cent to young people and 10 per cent to people with disabilities.

Expenditure is set to increase at an average annual rate of 4.4 per cent, from R717.9 million in 2022/23 to R817 million in 2025/26. Total expenditure over the MTEF period is set to amount to R3 billion.

Transfers from the department are expected to account for 84.5 per cent (R3 billion) of total revenue over the period ahead, increasing at an average annual rate of 21.7 per cent, mainly due to the low baseline as a result of the reprioritisation of funding to the *Agricultural Production, Biosecurity and Natural Resources Management* programme in 2022/23 to combat foot-and-mouth disease. Rental income, interest income and the recovery of grant funding from beneficiaries who failed to uphold their contractual obligations account for the remaining revenue.

#### Programmes/Objectives/Activities

### Entity overview

The Agricultural Research Council is the main agricultural research institution in South Africa. It was established by the Agricultural Research Act (1990) and is mandated to conduct research and development and effect the transfer of technology to promote agriculture and industry; contribute to better quality of life; and facilitate and ensure the conservation of natural resources.

Over the medium term, the council will focus on: generating knowledge and technologies that will enhance the efficiencies of crop production, animal production and health; managing natural resources; developing a foot-and-mouth vaccine production facility at Onderstepoort to reduce reliance on imports; maintaining national assets; and providing diagnostic and analytical services on behalf of the department. The council was allocated R400 million between 2019/20 and 2021/22 to develop the foot-and-mouth facility. A service provider was appointed in 2021 to design and manage the project. Construction is expected to begin in 2022/23.

Expenditure is expected to increase at an average annual rate of 2.1 per cent, from R1.6 billion in 2022/23 to R1.7 billion in 2025/26. Compensation of employees accounts for an estimated 43.9 per cent (R2.2 billion) of total spending, increasing at an average annual rate of 2.6 per cent, from R699.2 million in 2022/23 to R756.3 million in 2025/26; and goods and services accounts for 50.1 per cent.

Transfers from the department account for an estimated 70.8 per cent (R2.5 billion) of the council's total revenue over the medium term. The remainder is set to be generated through analytical services, research services, the sale of farm products and the rental of premises.

Number of relationship agreements signed by relevant stakeholders per year	Administration		– <sup>1</sup>	10	10	10	10	10	10

1. No historical data available.

### Entity overview

The KwaZulu-Natal Ingonyama Trust Act (1994) makes provision for an estimated 2.8 million hectares of land spread across KwaZulu-Natal to be held in trust by the Ingonyama Trust on behalf of communities. The KwaZulu-Natal Ingonyama Trust Board, which was established in terms of the act, administers the trust.

Over the medium term, the board will focus on improving its administration of land tenure and engaging in spatial planning to ensure integrated development.

Expenditure is expected to decrease at an average annual rate of 16.9 per cent, from R43.9 million in 2022/23 to R25.2 million in 2025/26, in line with the board's revised organisational structure. The board derives its revenue through transfers from the department, which are set to amount to R74.5 million over the MTEF period.

### Entity overview

The National Agricultural Marketing Council is a statutory organisation of the department. It derives its mandate from the Marketing of Agricultural Products Act (1996), which provides for the authorisation, establishment and enforcement of regulatory measures to intervene in the marketing of agricultural products, including the introduction of statutory measures. Over the medium term, the council will continue to coordinate the work of agricultural industry trusts; undertake thorough research aimed at advising the minister and affected groups on marketing matters; and work directly with farmers to address their marketing needs.

Expenditure is expected to increase at an average annual rate of 3.2 per cent, from R52.2 million in 2022/23 to R57.4 million in 2025/26. As the council primarily conducts research and development, it relies on highly skilled personnel such as agricultural economists, scientists and researchers to fulfil its mandate. Accordingly, compensation of employees accounts for an estimated 69.4 per cent (R114 million) of total expenditure over the medium term.

The council derives all its revenue through transfers from the department, which amount to R156.1 million over the period ahead. Revenue increases at an average annual rate of 3.8 per cent, from R48.5 million in 2022/23 to R54.3 million in 2025/26.

## Entity overview

The Property Valuations Act (2014) prescribes that the Office of the Valuer-General must be impartial, exercise its powers and perform its functions, and be accountable to the Minister of Agriculture, Land Reform and Rural Development. The act states that the office must value all land to be acquired for land reform purposes in accordance with a prescribed set of criteria based on section 25(3) of the Constitution. Over the medium term, the office will continue to focus on valuing all land for land reform purposes and complete 100 per cent of requested valuations.

Expenditure is expected to increase at an average annual rate of 16.7 per cent, from R107.2 million in 2022/23 to R170.4 million in 2025/26. Compensation of employees accounts for an estimated 43 per cent (R190.8 million) of total expenditure over the MTEF period, increasing at an average annual rate of 4.3 per cent, from R58.6 million in 2022/23 to R66.5 million in 2025/26. The entity derives all of its revenue, amounting to R487 million over the medium term, through transfers from the department.

### Entity overview

Onderstepoort Biological Products was established in terms of the Onderstepoort Biological Products Incorporation Act (1999), with government as the sole shareholder. It is mandated to prevent and control animal diseases that affect food security, human health and livelihoods by developing, manufacturing and commercialising animal vaccines, and ensuring food security through the promotion of animal health.

Over the medium term, the entity will focus on the development and manufacturing of vaccines and related products to prevent and control animal diseases that threaten food security and animal health. It will also seek to maintain a reserve stock of vaccines for government to be used in the event of an outbreak of animal diseases.

Expenditure is expected to increase at an average annual rate of 5.3 per cent, from R203 million in 2022/23 to R236.9 million in 2025/26. Compensation of employees accounts for an estimated 48.9 per cent (R329 million) of this spending, increasing at an average annual rate of 5 per cent, from R99.4 million in 2022/23 to R115.1 million in 2025/26. The entity generates most of its revenue through the sale and supply of livestock vaccines. Revenue is projected to increase at an average annual rate of 6.5 per cent, from R200.8 million in 2022/23 to R242.2 million in 2025/26.

## Entity overview

The Perishable Products Export Control Board is an independent provider of quality assurance, food safety and cold chain management services for producers and exporters of perishable food products. The board is mandated by government in terms of the Perishable Products Export Control Act (1983), which broadly requires it to ensure the orderly export of perishables and monitor the proper maintenance of a continuous cold chain for exports; and the Agricultural Products Standards Act (1990), which broadly requires the board to monitor the minimum quality standards of perishable exports as required by government and bilateral agreements with importing countries.

Over the medium term, the board will focus on ensuring sustainable, socially responsible service delivery without compromising the quality of products. This includes performing technical research and development, providing training and assistance to historically disadvantaged individuals and smallholder farmers, and ensuring its personnel are professional and well trained so that they add value to the perishable export industry.

Expenditure is expected to increase at an average annual rate of 6.8 per cent, from R588.3 million in 2022/23 to R717.2 million in 2025/26, with compensation of employees accounting for 67.1 per cent (R1.4 billion) of total spending over the MTEF period. The board expects to derive all of its revenue, amounting to R2.1 billion over the medium term, through levies and tariffs charged on the export of perishable products, inspection services, laboratory services and export certification services.

**Entity overview**

The Deeds Registries Act (1937) makes provision for the administration of the land registration system and the registration of rights in land. The act requires that deeds and documents be prepared and lodged in the deeds registry by a conveyancer or public notary, and scrutinised for accuracy and compliance with common law, case law and statutory law. The entity's main goal is to contribute to effective land planning, administration and property registration.

Over the medium term, the entity will implement an electronic deeds registration system that is expected to result in a secure, more accessible, integrated, innovative, scalable, cost effective and sustainable deeds registration system that provides accurate and reliable land administration and information. The system is expected to accommodate the registration or recording of other insecure land tenure rights and lead to enhanced confidence in the country's land registration process, as stipulated in the Electronic Deeds Registration Act (2019).

Expenditure and revenue are expected to increase at an average annual rate of 2.4 per cent, from R1 billion in 2022/23 to R1.1 billion in 2025/26, with compensation of employees accounting for 68.6 per cent (R2.2 billion) of spending over this period. The entity generates revenue from selling deeds information and registering properties.

### Vote purpose

*Create an enabling environment for inclusive growth in the ICT sector by developing policies and legislation that promote infrastructure investment and socioeconomic development.*

### Mandate

The Department of Communications and Digital Technologies is mandated to enable South Africa's digital transformation in an effort to achieve digital inclusion and economic growth by creating an enabling policy and regulatory environment. This is done through the implementation of the 2016 National Integrated ICT Policy White Paper, which provides for the participation of multiple stakeholders for inclusive digital transformation; interventions to reinforce competition and facilitate innovation across the value chain; measures to address issues raised by ICT and convergence; and the establishment of a new national postal policy framework. It also provides for policies to address the digital divide and affordable access, supply-side issues and infrastructure rollout, and demand-side issues to facilitate inclusivity. The department derives its mandate from several acts and policies. Key among these are:

- the Film and Publications Act (1996), as amended, which provides for the classification of certain films and publications, and establishes the Film and Publication Board and appeals tribunal
- the Postal Services Act (1998), as amended, which makes provision for the regulation of postal services
- the Broadcasting Act (1999), as amended, which establishes broadcasting policy in South Africa
- the Independent Communications Authority of South Africa Act (2000), which establishes the regulator in the sector
- the Electronic Communications Act (2005), as amended, which provides the legal framework for convergence in the broadcasting signal distribution, and telecommunications sectors. It also allows for the granting of new licences and social obligations; the control of the radio frequency spectrum; and the regulation of electronic communication network services, electronic communication services, and broadcasting services.

## Selected performance indicators

**Table 30.1 Performance indicators by programme and related priority**

Indicator	Programme	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of approved country position papers to support the digital economy per year	International Relations and Affairs	Departmental mandate	1	3	2	3	3	4	3
Number of quarterly state-owned entity performance reports analysed per year	ICT Enterprise Development and Public Entities Oversight		40	40	40	36	36	36	36
Number of identified government connected institutions maintained as part of the national broadband plan (phase 1) per year	ICT Infrastructure Development and Support	Priority 2: Economic transformation and job creation	570	970	970	970	970	970	970
Number of households connected as part of the national broadband plan (phase 2) per year	ICT Infrastructure Development and Support		-1	-1	-1	-1	1 943 403	3 886 305	0

1. No historical data available.

## Expenditure overview

Over the medium term, the department will focus on coordinating the rollout of broadband into underserved areas through the South Africa Connect project, and enabling digital transformation and inclusion through legislative and regulatory interventions.

An estimated 52.7 per cent (R5.1 billion) of the department's budget of R10.5 billion over the MTEF period is allocated to transfers to entities for their operations, and for project-specific funding. Of this amount, R1.6 billion is allocated to the South African Post Office for its universal service obligations to provide postal services in underserved areas, and R720.8 million to the South African Broadcasting Corporation for various activities, including R35 million for the coverage of the national and provincial elections in 2023/24. Total expenditure is expected to decrease at an average annual rate of 3.9 per cent, from R2.9 billion in 2022/23 to R2.6 billion in 2025/26, as additional allocations to the Independent Communications Authority of South Africa for regulatory activities and the Universal Service and Access Fund for broadcasting digital migration come to an end.

Compensation of employees is the department's second-largest cost driver, accounting for 9.4 per cent of total spending and increasing at an average annual rate of 1.6 per cent, from R313.5 million in 2022/23 to R329.1 million in 2025/26.

### ***Rolling out broadband in underserved areas***

The department, supported by relevant state-owned entities such as Broadband Infraco, Sentech, and the State Information Technology Agency, will continue to provide broadband connectivity to 970 government facilities over the MTEF period through phase 1 of the South Africa Connect project. An additional R3 billion in 2023/24 and 2024/25 is allocated to the department to implement phase 2 of the project for capital equipment and new fibre infrastructure, or to lease existing fibre, to expand ICT networks into underserved areas. Phase 2 also involves the State Information Technology Agency upgrading and connecting government sites from existing budgets, and the Independent Communications Authority of South Africa imposing universal service obligations on mobile network operators to connect 18 036 schools, 3 873 health facilities and 8 241 tribal authority sites. Phases 1 and 2 are allocated R3.8 billion over the next 3 years in the *Broadband* subprogramme in the *ICT Infrastructure Development and Support* programme.

### ***Enabling digital transformation and inclusion***

The department will continue to provide a supporting and enabling legislative environment through the development of relevant policies, strategies and legislation. Over the MTEF period, this will include finalising the Audio-Visual Bill, introducing the South African Broadcasting Corporation Bill to Parliament, submitting the

digital economy framework and strategy for approval to Cabinet, finalising the national cloud computing policy and developing the Postal Services Amendment Bill. As a result, expenditure in the *ICT Policy Development and Research* programme is set to increase at an average annual rate of 1.4 per cent, from R45.3 million in 2022/23 to R47.2 million in 2025/26.

## Programme 2: ICT International Relations and Affairs

### Programme purpose

Ensure alignment between South Africa's foreign policy and international activities in the field of ICT.

### Objectives

- Advance South Africa's ICT interests in regional and international forums to secure partnerships for economic growth and development by March 2024 by:
  - developing 3 position papers to support national ICT priorities. These papers will focus on the Brazil-Russia-India-China-South Africa (BRICS) group of countries agenda, and representation in the Universal Postal Union and the 2023 World Radiocommunication Conference
  - coordinating the implementation of identified international programmes to support digital economy initiatives
  - developing the outcomes report for South Africa for the 2023 World Radiocommunication Conference.

### Subprogrammes

- *Programme Management for International Relations and Affairs* provides for the overall management of the programme.
- *International Affairs* coordinates the functions and responsibilities of the department to meet South Africa's international ICT obligations. This subprogramme leads South Africa's ICT interests and advances strategic programmes in African bilateral forums and the BRICS forum.
- *ICT Trade/Partnership* develops and advances South Africa's interests in international and multilateral trade forums by participating in the World Trade Organisation's ICT-related initiatives and other international trade agreements. This subprogramme also makes payments for membership fees to international bodies.

## Programme 3: ICT Policy Development and Research

### Programme purpose

Develop ICT policies and legislation that support the development of an ICT sector that creates favourable conditions for accelerated and shared economic growth. Develop strategies that increase the adoption and use of ICT by the majority of South Africans to bridge the digital divide.

## Objectives

- Enable digital transformation and inclusion by:
  - developing the Audio-Visual Bill by March 2025
  - developing the Online Safety and Media Regulation Bill by March 2024
  - introducing the South African Broadcasting Corporation Bill to Parliament by March 2024
  - developing the business case on the household levy for public broadcasting by March 2024
  - submitting the Electronic Communications Bill regarding the Universal Service and Access Fund for Cabinet approval by March 2024
  - submitting the Electronic Communications Bill regarding competition matters for Cabinet approval by March 2024
  - submitting the digital economy framework and strategy for Cabinet approval by March 2024
  - monitoring the implementation of the South African Post Office Act (2011) on an ongoing basis
  - finalising the national cloud computing policy by March 2024
  - finalising the draft national data and cloud policy by March 2024
  - developing the Postal Services Amendment Bill by March 2024
  - developing the e-commerce strategy for the digital environment by March 2024
  - coordinating the implementation plan for the Presidential Commission on the Fourth Industrial Revolution over the medium term.

## Subprogrammes

- *Programme Management for ICT Policy Development and Research* provides for the overall management of the programme.
- *ICT Policy Development* drafts legislation, regulations, policy and guidelines that govern the telecommunications, postal and IT sectors to ensure broad-based economic development.
- *Economic and Market Analysis* conducts economic analyses of the telecommunications, postal and IT sectors to determine trends and make projections. This subprogramme also conducts market research to explore areas that require policy intervention, and is responsible for reducing the cost of communication.
- *Research* is responsible for understanding the ICT landscape and delivering a national ICT strategy.
- *Small, Medium and Micro Enterprise* facilitates the growth and development of small, medium and micro enterprises in the ICT sector.
- *Broadcasting Policy* drafts legislation, regulations, policy, strategies and guidelines that govern audio-visual media sectors.
- *Presidential Commission on 4IR* coordinates, monitors and evaluates multisectoral initiatives to position South Africa as a globally competitive player in the fourth industrial revolution.

## Programme 4: ICT Enterprise and Public Entity Oversight

### Programme purpose

Oversee and manage government's shareholding interest in the ICT public entities and state-owned companies. Facilitate the growth and development of small, medium and micro enterprises in the ICT sector.

### Objectives

- Improve the performance of the department's state-owned entities through proactive oversight by monitoring and evaluating their service delivery performance and compliance against strategic plans and relevant prescriptions on an ongoing basis.
- Improve the impact of service delivery by public entities and their market responsiveness by:
  - facilitating the implementation of the performance management system for councillors from the Independent Communications Authority of South Africa on an ongoing basis
  - monitoring the post-acquisition integration of Broadband Infracore into Sentech by March 2024
  - monitoring the implementation of the South African Post Office repositioning strategy on an ongoing basis

- monitoring the implementation of the Postbank strategy towards the formation of a state bank by March 2025
- monitoring the implementation of the South African Broadcasting Corporation turnaround plan by March 2025
- monitoring the repurposing of the State Information Technology Agency by March 2026
- monitoring the implementation of the Universal Service and Access Agency of South Africa disestablishment plan by March 2025.

## Subprogrammes

- *Programme Management for ICT Enterprise and Public Entity Oversight* provides for the overall management of the programme.
- *Regulatory Institutions* monitors and evaluates the implementation of policies, and provides guidance on and oversight of the governance matters of regulatory institutions. This subprogramme makes transfers to the Independent Communications Authority of South Africa and the Film and Publication Board.
- *Universal Service and Access* makes transfers to the South African Broadcasting Corporation, the Universal Service and Access Agency of South Africa, the Universal Service and Access Fund, and the South African Post Office to provide subsidies for the fulfilment of their universal service and access mandates.
- *ICT Skills Development* makes transfers to and provides oversight of the National Electronic Media Institute of South Africa for the provision of skills development programmes.
- *State-owned Enterprise Governance and Support* strengthens the capacity of the department and that of its state-owned entities to deliver on their mandates effectively.

## Programme 5: ICT Infrastructure Development and Support

### Programme purpose

Promote investment in robust, reliable, secure and affordable ICT infrastructure that supports the provision of a multiplicity of applications and services.

## Objectives

- Increase access to secure digital infrastructure and services by:
  - coordinating the implementation of phase 2 of the South Africa Connect project towards the provision of internet access on an ongoing basis
  - monitoring the implementation of relevant interventions within the national cybersecurity strategy on an ongoing basis
  - monitoring and maintaining the provision of broadband services to 970 connected sites over the medium term.

## Subprogrammes

- *Programme Management for ICT Infrastructure Development and Support* provides for the overall management of the programme.
- *Broadband* develops and facilitates the implementation of the broadband policy, strategy and rollout plan for South Africa Connect, and ensures that the programme achieves its broadband goals.
- *ICT Support* is responsible for projects related to authentication, digital object architecture and internet governance.
- *Broadcasting Digital Migration* manages broadcasting digital migration with the aim of migrating from analogue to digital broadcasting. This subprogramme provides transfers to the Universal Service and Access Fund and Sentech for the implementation of broadcasting digital migration.

## Programme 6: ICT Information Society and Capacity Development

### Programme purpose

Develop and implement strategies to build capabilities to bridge the digital divide.

### Objectives

- Contribute towards building a digitally transformed economy and society by:
  - implementing the recommendations from the study on the cost to communicate to reduce the cost of data over the medium term
  - monitoring the automation of e-government services on the government e-portal on an ongoing basis
  - developing the white paper on digital government by March 2024
  - coordinating digital and future skills training programmes through local and international public and private partnerships on an ongoing basis

- supporting the South African Reserve Bank’s financial technology programme and fintech regulatory sandbox to enable digital transformation by March 2024
- facilitating government’s adoption of digital technology products and services on an ongoing basis.

## Subprogrammes

- Programme Management for ICT Information Society and Capacity Development provides for the overall management of the programme.
- *Information Society Development* supports the promotion of a digital society by facilitating the adoption and use of digital technologies.
- *Capacity Development* facilitates capacity building interventions to develop digital and future skills towards the creation of a digital society.

## Entities

### Broadband Infraco

#### Selected performance indicators

**Table 30.18 Broadband Infraco performance indicators by programme/objective/activity and related priority**

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Network performance rebates paid as a percentage of gross revenue per year	Network operations		0.15%	≤0.3%	≤0.3%	≤0.3%	≤0.3%	≤0.2%	≤0.2%
Actual time taken to restore core network faults per year in hours	Network operations		5.7	7.5	7.5	7.5	7.25	7	7
Number of government sites connected to Broadband Infraco network and maintained for phase 1 of the South Africa Connect broadband policy per year	Network operations	Entity mandate	400	713	713	713	713	713	713

#### Entity overview

Broadband Infraco's legislative mandate, as set out in the Broadband Infraco Act (2007), is to provide ICT infrastructure and broadband capacity in South Africa. Its main objectives are to expand the availability and affordability of access to electronic communications, including in underdeveloped and underserved areas; ensure that bandwidth requirements for specific projects of national interests are met; and enable the state to provide affordable access to electronic communications networks and services.

Over the medium term, the entity will focus on implementing phase 2 of the South Africa Connect project, and maintaining broadband connectivity to 713 government sites and the time taken to restore faults on the core network at 7 hours.

Expenditure is expected to increase at an average annual rate of 9.4 per cent, from R770.2 million in 2022/23 to R1 billion in 2025/26. This is mainly due to an increase in spending on goods and services, which accounts for an estimated 60.3 per cent (R1.7 billion) of the company's total expenditure over the MTEF period; and depreciation, which accounts for an estimated 19.2 per cent (R564.2 million), mostly as a result of an increase in expenditure on capital investments for phase 2 of the South Africa Connect project and other investments in infrastructure.

The entity is set to derive R3 billion of its revenue over the MTEF period through rendering connectivity services. Revenue is expected to increase at an average annual rate of 24.8 per cent, from R579 million in 2022/23 to R1.1 billion in 2025/26, mostly as a result of an increase in sales due to higher demand for connectivity services.

### Programmes/Objectives/Activities

### Entity overview

The Film and Publication Board was established in terms of the Films and Publications Act (1996), as amended. Its mandate is to regulate the creation, production, possession and distribution of certain publications and films by classifying them; imposing age restrictions on content; and rendering the exploitative use of children in pornographic publications, films or online material punishable. The board is also mandated to issue, renew and revoke licences; impose fines and make recommendations for criminal prosecution to the National Director of Public Prosecutions; search and inspect premises; and take down illegal online activities.

Expenditure is expected to increase at an average annual rate of 5.3 per cent, from R125.1 million in 2022/23 to R146.1 million in 2025/26. The board plans to update its regulatory frameworks and procedures to ensure the efficient management of its regulatory environment, and provide training opportunities to its personnel to ensure they are adequately skilled. Due to the labour-intensive nature of the board's work, compensation of employees is its main cost driver, accounting for an estimated 55.5 per cent (R234.7 million) of expenditure over the MTEF period. Expenditure on compensation of employees is set to increase at an average annual rate of 7.8 per cent in line with the expected increase in the number of personnel from 115 in 2022/23 to 129 in 2025/26 as the board implements its revised mandate.

The board expects to derive 79.2 per cent (R325.8 million) of its revenue over the period ahead through transfers from the department and the remainder through fees for classification and registration. Revenue is expected to increase in line with expenditure.

### Entity overview

The Independent Communications Authority of South Africa was established by the Independent Communications Authority of South Africa Act (2000) to regulate the South African communications, broadcasting and postal services sectors. The authority is listed as a schedule 1 public entity in terms of the Public Finance Management Act (1999) and is a chapter 9 institution in terms of the Constitution. It derives its mandate from the Electronic Communications Act (2005) to license and regulate electronic communications and broadcasting services, and the Postal Services Act (1998) to license and regulate the postal services sector. The authority is empowered to monitor licensee compliance with licence terms and conditions, develop regulations, plan and manage the radio frequency spectrum, and protect consumers in relation to these services.

Over the medium term, the authority will impose universal service obligations on mobile network operators as part of licensing the high-demand spectrum. As part of its ongoing regulatory activities, it plans to issue 42 community television licences over the medium term and monitor 255 broadcasting licences. In its efforts to protect consumers against unfair practices by service providers over the period ahead, the authority plans to develop 6 tariff analysis reports and resolve an average of 89 per cent of consumer complaints.

Expenditure is expected to decrease at an average annual rate of 12 per cent, from R786.2 million in 2022/23 to R536.5 million in 2025/26, due to one-off funding of R300 million in 2022/23 for strengthening regulatory capacity and licensing spectrum for mobile telecommunications, specifically wireless broadband services. As the authority requires specialised personnel to conduct its work, compensation of employees accounts for an estimated 65.2 per cent (R1.1 billion) of expenditure over the MTEF period. The moratorium on the filling of vacant posts is expected to be maintained over the period ahead to remain within the expenditure ceiling for compensation of employees. These measures are aimed at ensuring that the authority continues to operate as a going concern. The authority expects to receive 96.8 per cent (R1.5 billion) of its revenue over the medium term through transfers from the department. Revenue is expected to decrease in line with expenditure.

**Entity overview**

The National Electronic Media Institute of South Africa was established as a non-profit institution for education. Its programmes were initially structured to enhance the market readiness of students in broadcasting, but its mandate has been expanded to include the development of e-skills capacity in South Africa and the implementation of e-skills programmes in collaboration with its partners.

Over the medium term, the institute will focus on providing digital skills in collaboration with government, education, business and civil society. The institute aims to train 9 900 citizens in digital technologies, 650 citizens in ICT skills-based programmes and 440 000 citizens in digital literacy over the MTEF period.

Expenditure is expected to increase at an average annual rate of 9 per cent, from R102.7 million in 2022/23 to R133.2 million in 2025/26. Goods and services – mainly rental costs for office space and in-house training – account for an estimated 34.8 per cent (R124.3 million) of expenditure over the medium term, while transfers

and subsidies to higher education institutions to fund e-skills projects account for an estimated 28.2 per cent (R105.9 million).

The institute is set to derive 89.7 per cent (R323.4 million) of its revenue over the medium term through transfers from the department and the balance through fees for training and development. Revenue is expected to increase in line with expenditure.

## Entity overview

Sentech was established in terms of the Sentech Act (1996), is listed as a schedule 3B public entity in the Public Finance Management Act (1999) and derives its mandate from the Electronic Communications Act (2005). It is responsible for providing broadcasting signal distribution services to licensed television and radio broadcasters. In 2002, following the deregulation of the telecommunications sector, Sentech was licensed to provide international voice-based telecommunications and multimedia services.

Over the MTEF period, the entity will focus on achieving the objectives of its public service mandate while ensuring its financial sustainability. It will continue to operate an estimated 330 terrestrial distribution sites and satellite platforms to provide customers with content, multimedia and connectivity services. However, these operations will cease as all analogue transmitters are shut down in the migration to digital terrestrial television, which is expected to be completed in 2023/24. The entity plans to ensure that it provides digital television coverage to 99 per cent of households each year over the medium term.

To ensure a high-quality, stable network and replace obsolete equipment, the entity plans to spend R923.6 million on the acquisition of property, plant and equipment over the MTEF period. As such, spending on goods and services accounts for an estimated 34.3 per cent (R1.6 billion) of expenditure over the period ahead, mostly for service expenses such as satellite costs, which have increased in recent years due to exchange rate fluctuations. This trend is expected to persist. Compensation of employees accounts for an estimated 29.4 per cent (R1.4 billion) of the entity's budget, spending on which is expected to increase at an average annual rate of 4.2 per cent, from R433.6 million in 2022/23 to R490.9 million in 2025/26.

The entity expects to derive 95.7 per cent (R4.8 billion) of its revenue over the MTEF period through fees for television, radio and streaming services, and the remainder through other sources such as rental income. Revenue is expected to increase at an average annual rate of 3.2 per cent, from R1.6 billion in 2022/23 to R1.7 billion in 2025/26.

### Entity overview

The South African Broadcasting Corporation derives its mandate from the Broadcasting Act (1999) and is listed as a schedule 2 public entity in the Public Finance Management Act (1999). The corporation is mandated to provide broadcasting and information services through a wide range of programming that displays South African talent in educational and entertainment programmes; offer diverse views through a variety of news, information and analyses; advance national and public interests in general; and include national sports programming.

Over the MTEF period, the corporation will focus on implementing the growth phase of its turnaround plan, which involves initiatives to improve performance by offering new content on multiple platforms and optimising operations in an effort to generate revenue and ensure financial recovery. Initiatives include a new streaming platform, which will include a variety of local and international content; revising content acquisition models for video entertainment, which is expected to improve turnaround times for commissioning and broadcasting; increasing its share of the industry radio advertising revenue; and rolling out radio brand campaigns to improve the corporation's image.

As the corporation relies heavily on human capital to fulfil its mandate, compensation of employees accounts for an estimated 37.5 per cent (R8 billion) of projected spending over the medium term. Goods and services accounts for 36.6 per cent (R7.7 billion) of total expenditure over the period, mostly for signal and broadcast costs, and programme, film and sports rights. Total expenditure is expected to increase at an average annual rate of 4.5 per cent, from R6.4 billion in 2022/23 to R7.3 billion in 2025/26.

The corporation estimates that 81.7 per cent (R18.5 billion) of its revenue over the MTEF period will be generated through advertising and other commercial activities. Transfers from the department account for an estimated 3.2 per cent (R720.8 million) of revenue over the medium term, while proceeds from television licence fees account for an estimated 15 per cent (R3.4 billion). Total revenue is expected to increase at an average annual rate of 6.9 per cent, from R6.4 billion in 2022/23 to R7.9 billion in 2025/26, in line with the implementation of revenue-generation initiatives.

Percentage of regulated mail delivery standards achieved per year	Post office operations		86% (675 990/ 789 804)	42% (90 723/ 214 036)	72% (203 504/ 284 363)	57% (40 192/ 69 920)	92%	92%	92%

### Entity overview

The South African Post Office is a government business enterprise established to provide postal and related services to the public. It is a schedule 2 public entity in terms of the Public Finance Management Act (1999) and derives its mandate from the Postal Services Act (1998) and the South African Post Office SOC Ltd Act (2011). The Postal Services Act (1998) makes provision for the regulation of postal services and the operational functions of the post office, including universal service obligations, and grants it an exclusive mandate to conduct postal services in the reserved sector for items such as letters, postcards and parcels weighing less than 1 kilogram.

Over the medium term, the post office will focus on providing universal access to postal and related services, and implementing the Post Office of Tomorrow strategy to improve its financial position. The strategy deals with improving the company's logistics business through partnering with various service and technology providers; modernising postal services through digital postal services and new payment channels; relaunching the post office trust centre; providing government authentication services such as secure digital certificates, secure digital signature apps, and a digital commissioner of oaths; establishing digital business hubs; and modernising the post office through new equipment, processes and capabilities. These interventions are expected to increase revenue while reducing costs due to improved efficiencies.

An amount of R1.6 billion is allocated over the MTEF period for the company to maintain 1 919 points of presence, including post offices and retail postal agencies, and provide postal services in areas that have been historically neglected. The main cost drivers are compensation of employees, accounting for an estimated 54.1 per cent (R8 billion) of total spending. Expenditure is expected to decrease at an average annual rate of 14.4 per cent, from R6.8 billion in 2022/23 to R4.3 billion in 2025/26, driven mainly by reduced spending on compensation of employees and goods and services as a result of the staff optimisation project and other restructuring. This is expected to result in a decrease in the number of personnel from 14 155 in 2022/23 to a projected 8 383 in 2025/26.

The company generates revenue through postal and courier services, and fees for financial transactions. The post office has projected a net loss of R2.1 billion in 2023/24, improving to a profit of R206.7 million in 2025/26 due to the implementation of the Post Office of Tomorrow strategy. Accordingly, revenue is expected to decrease at an average annual rate of 6.2 per cent over the medium term. The company will continue to pursue potential revenue-generating opportunities in the government, courier and financial services sectors over the period ahead as it seeks to improve its financial position.

### Entity overview

The State Information Technology Agency was established through the State Information Technology Agency Act (1998). The agency is mandated to provide IT, information systems and related services to and on behalf of government departments and organs of state. This includes the provision and maintenance of transversal information and data processing systems and their associated services, the maintenance of secure information systems, and the execution of its functions according to approved policies and standards.

Over the medium term, the agency will focus on strategic projects such as South Africa Connect, cloud infrastructure investments and the Gauteng broadband network; and the implementation of its financial sustainability plan to ensure its viability. This will entail, among other things, negotiating partnerships with industry and local research institutions, and reviewing and modernising costing and recovery models. These interventions are expected to enable the agency to fund its infrastructure requirements more efficiently to better serve its customers.

Spending on goods and services accounts for an estimated 58.3 per cent (R11.3 billion) of expenditure over the medium term, mainly for the provision of IT services, and spending on compensation of employees accounts for an estimated 36.6 per cent (R7.1 billion). As the implementation of strategic projects requires substantial capital investment, an estimated R1.5 billion is allocated for the acquisition of assets over the MTEF period, with depreciation set to amount to R986.8 million as a result. Total expenditure is expected to increase at an average annual rate of 4.5 per cent, from R5.9 billion in 2022/23 to R6.7 billion in 2025/26.

The agency generates revenue by providing ICT infrastructure and services to government departments and organs of state. Revenue is expected to increase at an average annual rate of 4.5 per cent, from R5.9 billion in 2022/23 to R6.8 billion in 2025/26.

## Universal Service and Access Agency of South Africa

### Entity overview

The Universal Service and Access Agency of South Africa was established in terms of section 80 of the Electronic Communications Act (2005). Its sole mandate is to promote universal service and access to electronic communications and broadcasting services. The agency is set to be disestablished by the end of 2023/24 as part of recommendations emanating from the 2016 National Integrated ICT Policy White Paper. The disestablishment is intended to streamline roles and responsibilities of different entities and increase efficiency to support universal service and access. The legislative process to complete this is expected to conclude by 2025/26.

The agency will, however, continue to manage the Universal Service and Access Fund until it is disestablished to ensure that disbursed funds reach the intended deserving beneficiaries. Expenditure is expected to decrease at a rate of 77.4 per cent, from R385.3 million in 2022/23 to R86.9 million in 2023/24. This is due to one-off funding in previous years for the broadcasting digital migration project earmarked for the South African Post Office to cover distribution costs. Over the medium term, expenditure is expected to decrease to R94.8 million in 2025/26. The agency is set to derive its total budget through transfers from the department.

1. No targets due to the fund's dissolution in 2023/24.

**Entity overview**

The Universal Service and Access Fund was established in terms of section 89(1) of the Electronic Communications Act (2005). The fund's sole mandate is to subsidise ICT equipment and services, and electronic communications and broadcasting networks for needy people in underserved areas. The fund is managed by the Universal Service and Access Agency of South Africa, which is expected to be disestablished through an amendment of the act by 2025/26.

By the end of 2023/24, the fund expects to conclude the broadcasting digital migration project, which will enable analogue broadcasting to be switched off in the remaining districts to release much-needed spectrum, and provide aftermarket support to all qualifying beneficiaries who may encounter problems with their installed digital set-top boxes.

Expenditure is set to decrease at a rate of 97.7 per cent, from R2.9 billion in 2022/23 to R67.4 million in 2023/24. This is due to the retention of funds from previous financial years, with the approval of National Treasury in terms of section 53(3) of the Public Finance Management Act (1999), which were mostly used for activities related to broadcasting digital migration in 2022/23. The fund derives all its revenue through transfers from the department.

### Vote purpose

*Play a significant role in reducing unemployment, poverty and inequality by pursuing the objectives of decent work for all through: employment creation and enterprise development; the setting of standards and the protection of rights at work, including the facilitation of equal opportunities and social dialogue; and the provision of social protection.*

### Mandate

The Department of Employment and Labour derives its mandate from the Constitution. This mandate is given effect through several acts that regulate labour matters in South Africa: the Occupational Health and Safety Act (1993), the Labour Relations Act (1995), the Basic Conditions of Employment Act (1997), the Employment Equity Act (1998) and the Employment Services Act (2014).

The mandate of the department is to regulate the labour market through policies and programmes developed in consultation with social partners. These aim to:

- improve economic efficiency and productivity
- facilitate the creation of decent employment
- promote labour standards and fundamental rights at work
- provide adequate social safety nets to protect vulnerable workers
- promote and enforce sound labour relations
- promote equity in the workplace
- eliminate inequality and unfair discrimination in the workplace
- enhance an awareness of and compliance with occupational health and safety in the workplace
- give value to social dialogue in the formulation of sound and responsive legislation and policies to attain labour market flexibility for the competitiveness of enterprises, balanced with the promotion of decent employment.

## Expenditure overview

In working towards the vision of eliminating poverty and reducing inequality over the medium term, the department will focus on increasing safety and fairness in the workplace, providing support to work seekers, regulating the workplace, and engaging in multinational platforms, such as the Brazil-Russia-India-China-South Africa (BRICS) group of countries, to shape the future of work and protect workers' rights. The department has a budget of R12.1 billion over the period ahead after increases of R96.9 million for cost-of-living adjustments; R140 million for regional office accommodation; R90 million for capital works at supported employment enterprise factories; and R67.5 million for the National Economic Development and Labour Council for the operations of the Presidential Climate Commission, which it temporarily houses.

### *Increasing safety and fairness in the workplace*

Through its advocacy programmes, which include 12 seminars and 6 conferences over the medium term, the department plans to increase its national footprint by ensuring compliance with employment law. This is expected to improve fairness in the workplace, especially for young people, people with disabilities and women, and transition workers from the informal to the formal economy. To ensure compliance with the law and occupational health and safety standards, the department plans to conduct 894 312 employer inspections over the period ahead.

The implementation of the case management system in 2022/23 is expected to ensure that the department's business processes are fully modernised, which will lead to, among other things, more focused inspections. Over the medium term, the department plans to improve and strengthen its enforcement function. This entails ensuring that 65 per cent of employers who fail to comply with served notices are issued with fines and/or penalties and are referred for prosecution within 30 calendar days, and that 95 per cent of noncompliant

employers are served with legal notices within 14 calendar days.

Spending for these activities is within the *Inspection and Enforcement Services* programme, which is allocated 16.4 per cent (R2 billion) of the department's budget over the medium term. Spending in the programme increases at an average annual rate of 4.9 per cent, from R614.9 million in 2022/23 to R709.2 million in 2025/26.

### ***Providing support to work seekers***

Facilitating access to decent employment is central to the department's work and is primarily funded through the *Public Employment Services* programme. Over the medium term, it plans to register 2.9 million work seekers, provide counselling to 780 000 work seekers and place 195 000 work seekers in registered employment opportunities.

In 2022/23, the department drafted the South African national employment policy in partnership with the International Labour Organisation. The purpose of the policy is to determine a sustainable approach to employment growth. In line with the policy, the department plans to establish an employment war room over the medium term. The purpose of this intervention is to bring together government departments, business experts, and labour and community organisations. The department will also focus on implementing an accessible framework for active labour market policies that supports work seekers by, among other things, digitising applications for vacancies and providing employment counselling through the Employment Services of South Africa system. This is expected to be done in collaboration with private employment agencies with the aim of facilitating viable pathways to employment.

The Employment Services of South Africa online app has been developed and will go live on 1 April 2023. Limited data and internet access are still hindrances to work seekers. In addition, all youth employment centres that were built in 2022/23 will have free Wi-Fi. Internet connectivity will also enable work seekers to access other tools that assist youth to better understand their career aspirations and build capacity.

In 2022/23, the department drafted the new national migration policy and proposed amendments to the Employment Services Act (2014). A strong focus over the MTEF period will be on the rapid implementation of these amendments, which is expected to provide more employment opportunities for young South Africans, particularly in the hospitality, tourism and agriculture sectors.

The department will receive R372.2 million in 2023/24 to continue the pathway management network, which is a presidential employment initiative. The network is expected to create opportunities for employment, support increased access to relevant education and training interventions, assist young people in making choices about learning and/or earning, and identify barriers to entry in the labour market. More than 1 million young people are expected to be actively involved in the network over the next 2 years, with the aim of creating 255 000 job opportunities by 2024/25. Different components of the network will be scaled up over the medium term, such as the Innovation Fund, with the introduction of new partners.

Spending for these activities is within the *Public Employment Services* programme, which is allocated 21.3 per cent (R2.4 billion) of the department's budget over the medium term. Spending in the programme is set to decrease at an average annual rate of 10.6 per cent, from R1 billion in 2022/23 to R725.6 million in 2025/26, as a result of allocations for the presidential employment initiative not continuing over the MTEF period.

### ***Regulating the workplace***

The department plans to conduct an annual review of the national minimum wage over the medium term. This will include the development of monitoring mechanisms to measure its impact on the economy, collective bargaining, the reduction of income differentials, and proposed adjustments. The Commission for Conciliation, Mediation and Arbitration spearheads the department's efforts in this regard and is set to receive an estimated 77.6 per cent (R3.3 billion) of the *Labour Policy and Industrial Relations* programme's allocation over the medium term.

### ***Shaping the future of work and protecting workers' rights***

Over the period ahead, South Africa's key engagement in multinational platforms includes assuming the presidency of the BRICS group of countries for 2023. The department hopes to use this platform, as well as the

ministerial meeting on labour and employment in September 2023, to shape the future of work and protect the rights of workers in new forms of employment. The following priorities are expected to be deliberated on in the BRICS forum: building sustainable enterprises, including new forms of employment; increasing productivity; promoting labour rights and decreasing decent work deficits in the context of economic recovery after the COVID-19 pandemic; ensuring universal social protection and minimum basic income; and promoting decent work by closing skills gaps in the informal economy. For this purpose, the department has budgeted R15 million in the *Labour Policy and Industrial Relations* programme.

## Programme 2: Inspection and Enforcement Services

### Programme purpose

Realise decent work by regulating non-employment and employment conditions through inspection and enforcement to achieve compliance with all labour market policies.

### Objectives

Protect vulnerable workers through the inspection and enforcement of labour legislation by ensuring that employers adhere to decent work principles by the end of 2023/24 by:

- conducting 298 104 compliance inspections
- serving 95 per cent of noncompliant employers inspected with a notice in terms of relevant employment law within 14 calendar days of inspection
- referring for prosecution 65 per cent of employers who fail to comply with a served notice within 30 working days
- increasing awareness of employment law through formal advocacy sessions at 4 seminars and 2 conferences.

### Subprogrammes

- *Management and Support Services: Inspection and Enforcement Services* manages the delegated administrative and financial responsibilities of the office of the deputy director-general and provides corporate support to line-function subprogrammes in the programme.
- *Occupational Health and Safety* promotes health and safety in the workplace by conducting inspections on compliance with the Occupational Health and Safety Act (1993), and regulating dangerous activities and the use of plant and machinery.
- *Registration: Inspection and Enforcement Services* registers incidents relating to employment law, as reported by members of the public, and communicates these to relevant structures within the *Compliance, Monitoring and Enforcement Services* subprogramme for investigation.
- *Compliance, Monitoring and Enforcement Services* ensures that employers and employees comply with labour legislation by conducting regular inspections and following up on reported incidents.
- *Training of Staff: Inspection and Enforcement Services* defrays all expenditure relating to staff training in the programme.
- *Statutory and Advocacy Services* gives effect to the legislative enforcement requirement and educates stakeholders on labour legislation.

## Programme 3: Public Employment Services

### Programme purpose

Assist companies and workers to adjust to changing labour market conditions.

### Objectives

- Provide public employment services by March 2024 by:
  - registering 900 000 work seekers on the Employment Services of South Africa database
  - providing employment counselling to 250 000 work seekers
  - filling 60 000 registered employment opportunities
  - registering 110 000 work opportunities on the Employment Services of South Africa database.
- Increase employment opportunities for people with disabilities by providing quarterly funding and monitoring and evaluating funded organisations for people with disabilities on an ongoing basis.

### Subprogrammes

- *Management and Support Services: Public Employment Services* manages delegated administrative and financial responsibilities; coordinates all planning, monitoring and evaluation functions; and provides corporate support to line-function subprogrammes in the programme.
- *Employer Services* registers work opportunities; facilitates the employment of foreign nationals where such skills do not exist in South Africa; oversees placements; responds to companies in distress; provides a social plan; and regulates private employment agencies.
- *Work Seeker Services* registers work seekers; retrenched workers; and work, learning, training and income-generating opportunities for the unemployed and underemployed.
- *Designated Groups Special Services* facilitates the transfer of subsidies to national councils and workshops to promote the employment of people with disabilities.
- *Supported Employment Enterprises* promotes work and employment opportunities for people with disabilities by improving the administration, production and financial management of supported employment enterprises.
- *Productivity South Africa* transfers funds to Productivity South Africa, which promotes workplace productivity, competitiveness and social plan interventions.
- *Unemployment Insurance Fund* provides for the possible future funding of the Unemployment Insurance Fund.
- *Compensation Fund* provides for costs incurred through claims from civil servants for injuries sustained on duty or occupation-related illnesses and diseases, and for the funding of claims from the Compensation Fund.
- *Training of Staff: Public Employment Services* defrays all expenditure relating to staff training in the programme to easily identify this expenditure for reporting purposes.

## Programme 4: Labour Policy and Industrial Relations

### Programme purpose

Facilitate the establishment of an equitable and sound labour relations environment. Support institutions of social dialogue and promote South Africa's interests in international labour matters. Conduct research and analysis and evaluate labour policy. Provide statistical data on the labour market.

### Objectives

- Improve the implementation of employment equity and compliance monitoring mechanisms in the labour market by:
  - publishing the 2022/23 employment equity annual report and public register by 30 June 2023
  - developing the 2023/24 employment equity annual report and public register by 31 March 2024.
- Extend protection to vulnerable workers by publishing national minimum wages for all sectors by 31 March 2024.
- Promote sound labour relations and centralised collective bargaining by extending all collective agreements and registering all qualifying labour organisations by 31 March 2024.
- Monitor and evaluate the impact of labour legislation to promote an evidence-based labour policy framework by producing 2 research and 2 labour market trend reports by 31 March 2024.

### Subprogrammes

- *Management and Support Services: Labour Policy and Industrial Relations* manages delegated administrative and financial responsibilities; coordinates all planning, monitoring and evaluation functions; and provides corporate support to line-function subprogrammes in the programme.
- *Strengthen Civil Society* transfers funds to various civil society organisations that protect vulnerable workers by providing resources, support and expertise to improve the independence and self-reliance of workers so that they are able to contribute to a stable and well-functioning labour market.
- *Collective Bargaining* manages the implementation of the Labour Relations Act (1995) through policies and practices that promote sound labour relations by registering labour organisations and deregistering those that are not compliant; publishing and extending collective agreements; supporting and advancing participation in collective bargaining structures; and participating in relevant National Economic Development and Labour Council activities.
- *Employment Equity* promotes equity in the labour market by developing and promoting employment equity policy instruments – as mandated by the amended Employment Equity Act (1998) – to eliminate discrimination and promote equitable representation in the workplace.
- *Employment Standards* protects vulnerable workers in the labour market by administering the Basic Conditions of Employment Act (1997) and publishing national minimum wages for all sectors, as mandated by the National Minimum Wage Act (2018).
- *Commission for Conciliation, Mediation and Arbitration* transfers funds to the Commission for Conciliation, Mediation and Arbitration, which promotes social justice and fairness in the workplace by providing dispute-prevention and resolution services.
- *Research, Policy and Planning* monitors and evaluates the impact of labour legislation and policies on the South African labour market.
- *Labour Market Information and Statistics* collects, collates, analyses and disseminates internal and external labour market statistics on changes in the South African labour market as a result of the implementation of labour legislation.
- *International Labour Matters* contributes to national and global policy formulation and facilitates compliance with international obligations through multilateral and bilateral relations.
- *National Economic Development and Labour Council* transfers funds to the National Economic Development and Labour Council, which promotes economic growth, participation in economic decision-making and social equity through social dialogue; and for the operations of the Presidential Climate Commission.

			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Percentage of conciliable cases heard within 30 days of receipt of referral per year	Dispute resolution and enforcement services	Priority 2: Economic transformation and job creation	98.8%	99.4%	99.8%	98%	98%	98%	98%
			(145 611/ 147 455)	(91 296/ 91 810)	(101 014/ 101 253)				
Percentage of arbitration awards rendered sent to parties within 14 days of the conclusion of the arbitration proceedings per year (excluding extensions granted and heads of arguments filed)	Dispute resolution and enforcement services		99.8%	99.9%	99.9%	98%	98%	98%	98%
			(21 963/ 22 016)	(13 236/ 13 245)	(15 938/ 15 946)				
Percentage of disputes of interests resolved per year	Dispute resolution and enforcement services		– <sup>1</sup>	52.6%	58.2%	52%	58%	58%	58%
				(1 628/ 3 097)	(2 384/ 4 093)				
Percentage of jobs saved compared to employees likely to be retrenched per year (as per cases referred to the commission)	Dispute resolution and enforcement services		42%	42%	39.9%	38%	40%	40%	40%
			(21 846/ 51 995)	(58 165/ 138 816)	(18 715/ 46 953)				

1. No historical data available.

#### Entity overview

The Commission for Conciliation, Mediation and Arbitration derives its legislative mandate primarily from the Labour Relations Act (1995), as amended. The provisions of the act mandate the commission to advance and foster, among other things, economic development, social justice, labour peace and the democratisation of the workplace.

Over the medium term, the commission will focus on implementing its 5-year strategy, which prioritises, among other things, an improved dispute resolution and enforcement model complemented by the implementation of a dispute prevention and management strategy in response to an anticipated increase in cases, and an ICT modernisation programme to support its priority areas.

The commission anticipates an increase in its caseload from 185 929 in 2022/23 to 213 513 in 2025/26, mostly as a result of slow economic growth. To accommodate this projected increase, it has allocated an estimated 72.7 per cent (R2.4 billion) of its budget over the MTEF period to dispute prevention, resolution and enforcement; and mediation to support collective bargaining and capacity building processes to ensure fairness in the workplace.

An estimated 9.1 per cent (R303.8 million) of total expenditure is allocated to ICT initiatives such as enhancing the case management system, upgrading hardware and consolidating systems to provide business intelligence and improve ICT connectivity and compliance with legislative imperatives.

Expenditure is expected to increase at an average annual rate of 3 per cent, from R1.1 billion in 2022/23 to R1.2 billion in 2025/26. Spending on compensation of employees accounts for an estimated 57.4 per cent (R1.9 billion) of the commission's budget over the MTEF period, increasing at an average annual rate of 2.9 per cent, from R608.9 million in 2022/23 to R664.2 million in 2025/26. Revenue is almost entirely derived from transfers from the department. The commission is set to derive 98.8 per cent (R3.3 billion) of its revenue over the period ahead through transfers from the department.

### Entity overview

The mandate of the Compensation Fund is to administer the Compensation for Occupational Injuries and Diseases Act (1993), which makes provision for the compensation of employees who are disabled because of occupational injuries and diseases sustained or contracted at work, and the compensation of the nominated beneficiaries of employees who die from such injuries or diseases.

Over the medium term, the fund will focus on improving the services it provides to its beneficiaries and other stakeholders. It plans to achieve this through its new CompEasy system, which, over the medium term, is expected to improve turnaround times for adjudicating and processing all accepted and approved claims from 85 per cent within 10 working days in 2022/23 to 95 per cent within the same period in 2025/26.

Expenditure is expected to increase at an average annual rate of 4.1 per cent, from R9.4 billion in 2022/23 to R10.7 billion in 2025/26, mainly driven by the payment of claims and pension benefits, which comprise an estimated 70.9 per cent (R21.8 billion) of total projected spending over the period ahead. The fund derives 62.1 per cent (R33.2 billion) of its revenue over the MTEF period through assessment levies on active registered employers. Total revenue is expected to decrease at an average annual rate of 4.7 per cent, from R20.2 billion in 2022/23 to R17.5 billion in 2025/26, due to accounting for fair value adjustments in 2022/23.

## Entity overview

The National Economic Development and Labour Council is a statutory body established by the National Economic Development and Labour Council Act (1994). It is mandated to promote economic growth, participation in economic decision-making and social equity, and seeks to create impact by enabling its social partners to contribute meaningfully to these processes by seeking consensus and concluding agreements on matters pertaining to social and economic policy.

Over the medium term, the council will focus on addressing the high cost of living, particularly the prices of fuel and food; engaging in social dialogue on key socioeconomic issues; providing input on labour legislation and policy, including as they pertain to migration; resolving disputes; extending labour protection to non-standard forms of work; improving public procurement, including engaging on regulations to support the proposed new Public Procurement Bill; providing support to the Presidential Climate Commission; and implementing a revised constitution and protocols to contribute to making the council more effective, efficient and representative.

Following Cabinet's decision in 2022, the Presidential Climate Commission and its budget were shifted from the Department of Forestry, Fisheries and the Environment to the Department of Employment and Labour to be temporarily housed at the council. As a result, the council is set to receive an estimated R252.9 million over the medium term, of which R67.5 million is earmarked for the operations of the climate commission. This arrangement will cease once the Climate Change Bill is passed and the commission is established as a standalone public entity.

Expenditure is expected to increase at an average annual rate of 10.9 per cent, from R72.3 million in 2022/23 to R98.8 million in 2025/26, mainly driven by the shift of the Presidential Climate Commission to the council. The council expects to derive 98.8 per cent (R276.8 million) of its revenue over the MTEF period through transfers from the department.

1. No historical data available.

### Entity overview

Productivity South Africa was established in terms of section 31 of the Employment Services Act (2014) as a juristic person and entity of the Department of Employment and Labour. In terms of the act, it is mandated to promote employment growth and productivity, and thereby contribute to South Africa's socioeconomic development and competitiveness. Over the medium term, the entity will support the improvement of South Africa's competitiveness and the sustainability of its enterprises – specifically small, medium and micro enterprises – through its competitiveness improvement services, and business turnaround and recovery programme.

Expenditure is expected to decrease at an average annual rate of 2.5 per cent, from R173.4 million in 2022/23 to R160.7 million in 2025/26. This is due to the medium-term funding for the business turnaround and recovery programme being aligned with the previous 3 years' actual performance. Costs for the turnaround programme are covered by the Unemployment Insurance Fund. Over the past 3 years, the actual costs have been much less than what was agreed on due to Productivity South Africa not meeting some of the requirements, and because of capacity constraints. As a result, the agreed funding has been reduced to what the fund has actually paid in the past. However, these funds do not affect Productivity South Africa's performance as the turnaround programme is run on behalf of the Unemployment Insurance Fund.

The entity expects to derive 86.9 per cent (R396.9 million) of its revenue over the period ahead through transfers from the Department of Employment and Labour; the Department of Trade, Industry and Competition; and the Unemployment Insurance Fund. The balance of revenue is expected to be generated mainly through services rendered to companies in economic distress. Revenue is expected to decrease in line with expenditure.

**Entity overview**

The Unemployment Insurance Fund is mandated to alleviate poverty by providing effective short-term unemployment insurance to all workers who qualify for unemployment and related benefits, as legislated in the Unemployment Insurance Act (2001). Over the medium term, the fund will focus on providing social insurance benefits and improving coverage to vulnerable groups and contributors.

Through its flagship labour activation programme, the fund assists the department to realise its expanded mandate of coordinating job creation. It intends to enhance the employability of 240 000 programme participants by placing them in training and/or job opportunities, with 75 000 of these planned to be recruited in 2023/24. Funding agreements have also been concluded with 48 institutions to provide training, ranging from

specialised short-term skills programmes to 3-year artisan training programmes, to a targeted 36 198 learners. The fund will review the training interventions offered by these partners over the MTEF period to ensure that their exit strategies result in gainful employment for beneficiaries who can then become contributors to the fund. The fund has budgeted R10.6 billion over the medium term to carry out these activities.

In ensuring that contributors remain employed, the fund, through its temporary employer/employee relief scheme, provides support to distressed businesses seeking to retain their employees. The Commission for Conciliation, Mediation and Arbitration administers this scheme on behalf of the fund and considers applications. Under the scheme, 75 per cent of an employee's basic salary is funded up to a maximum amount of R17 119.44 per month for a maximum of 12 months. The fund has budgeted R4.3 billion over the next 3 years for this programme.

The department's 126 labour centres have traditionally been a key channel through which the fund's clients access its services. To respond to the widespread use of digital platforms and technologies, the fund plans to build on its existing technological capabilities to enhance functionality and alleviate queues at labour centres. The fund has budgeted R18 million over the medium term for this purpose. To augment the capability of labour centres, the fund plans to deploy kiosks in strategic places and deploy mobile buses in each province for outreach initiatives in remote and densely populated areas. The fund has budgeted R94 million for the deployment of 21 buses, 11 in 2023/24 and 10 in 2024/25.

Total expenditure over the medium term is expected to amount to R102.4 billion, increasing at an average annual rate of 4.4 per cent, from R31.2 billion in 2022/23 to R35.5 billion in 2025/26. The fund expects to derive 67.4 per cent (R74.6 billion) of its revenue over the period ahead through contributions from employees and employers, as legislated by the Unemployment Contributions Act (2002). Remaining income is received through interest earned on investments. Total revenue is expected to increase at an average annual rate of 3.4 per cent, from R34.3 billion in 2021/22 to R37.9 billion in 2024/25.

Executive authority Minister of Forestry, Fisheries and the Environment  
 Accounting officer Director-General of Forestry, Fisheries and the Environment  
 Website [www.environment.gov.za](http://www.environment.gov.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Lead South Africa's environmental, forestry and fisheries sectors to achieve sustainable development towards a better quality of life for all.

### Mandate

The Department of Forestry, Fisheries and the Environment is mandated to give effect to the right of citizens to an environment that is not harmful to their health or wellbeing, and that is protected for the benefit of current and future generations. To this end, the department provides leadership on sustainability in environmental management, conservation and protection for the benefit of South Africans and the global community. The department's mandate is derived from the following legislation:

- the Marine Living Resources Act (1998), which deals with the sustainable long-term use of marine living resources
- the National Environmental Management Act (1998), which provides for specific legislation on biodiversity and heritage resources, oceans and coasts, climate change and air quality management, and waste and chemicals management
- the National Forests Act (1998), which promotes the sustainable management and development of forests for the benefit of all, and creates the conditions necessary to restructure forestry in state forests for protection and sustainable use
- the National Veld and Forest Fire Act (1998), which provides for the prevention and combating of veld, forest and mountain fires across South Africa
- the National Environmental Management: Air Quality Act (2004), which reforms the law regulating air quality to protect the environment by providing reasonable measures for preventing pollution and ecological degradation, and securing ecologically sustainable development; and provides for national norms and standards that regulate the monitoring of air quality
- the National Environmental Management Amendment Act (2004), which streamlines the regulation and administration of environmental impact assessment processes

- the National Environmental Management: Biodiversity Act (2004), which significantly reforms the laws regulating biodiversity
- the National Environmental Management: Integrated Coastal Management Act (2008), which promotes the conservation of the coastal environment, and ensures that development practices and the use of natural resources are sustainable
- the National Environmental Management: Waste Act (2008), which reforms the law regulating waste management to protect health and the environment by providing reasonable measures to prevent pollution
- the National Environmental Management: Protected Areas Amendment Act (2009), which provides for the assignment of national parks, special parks and heritage sites in terms of the World Heritage Convention Act (1999).

## Selected performance indicators

**Table 32.1 Performance indicators by programme and related priority**

Indicator	Programme	MTSF priority	Audited performance			Estimated performance	MTEF targets

## Expenditure overview

Over the medium term, the department will continue to focus on supporting an equitable transition to a low-carbon economy and a climate-resilient society; creating jobs and work opportunities through the expanded public works programme; and creating an enabling environment for South Africa's transition to a circular economy.

Expenditure is set to increase at an average annual rate of 2.8 per cent, from R9 billion in 2022/23 to R9.8 billion in 2025/26. An estimated 49.2 per cent (R14.3 billion) of the department's allocation over the MTEF period is earmarked for spending on goods and services, mostly to provide funding for projects in the expanded public works programme that are aimed at creating jobs and work opportunities. The second-largest cost driver is transfers and subsidies to the department's entities, which accounts for an estimated 24 per cent (R7.1 billion) of expenditure over the period ahead.

Over the medium term, the responsibility for enforcement at ports of entry will shift to the Border Management Authority. Accordingly, amounts of R14 million in 2023/24, R14.7 million in 2024/25 and R15 million in 2025/26 are shifted to the Department of Home Affairs.

### **Supporting an equitable transition to environmental stability**

The department plays a pivotal role in ensuring that South Africa is equipped to manage and mitigate the effects of climate change. Over the MTEF period, the department will promote the enactment of the National Climate Change Bill, which is intended to serve as the overarching legislative framework for adapting to and mitigating the effects of climate change. The act will be supported by the implementation of the low-emission development and growth, and national climate change adaptation strategies.

As jobs in the coal, agriculture, tourism, petrol-based transport and metals sectors are likely to be affected by climate change, the department plans to spearhead the development of climate resilience plans such as the national climate change response policy in these sectors over the MTEF period. The department will also support provinces and municipalities in developing and implementing plans to adapt to climate change. Activities related to climate legislation, resilience and adaptation will be carried out in the *Climate Change and Air Quality* programme, which is allocated R2 billion over the MTEF period.

### **Creating work opportunities and jobs**

Over the medium term, the department aims to create 226 207 work opportunities and 113 975 full-time equivalent jobs through the expanded public works programme. These opportunities and jobs will be created through projects and initiatives that involve: restoring and rehabilitating degraded ecosystems (environmental protection and infrastructure programme); increasing the percentage of land under conservation and managing land use sustainably (Working for Ecosystems); protecting, restoring and rehabilitating wetlands (Working for

Wetlands); protecting water resources (Working for Water); addressing the challenges faced by the fisheries sector (Working for Fisheries); and sustaining production, growth and transformation in the forestry sector (Working for Forests). To fund these projects and initiatives, the department has set aside R10.2 billion over the medium term in the *Environmental Programmes* programme.

### Transitioning to a circular economy

Over the medium term, the department will focus on creating an enabling environment to support South Africa’s transition to a circular economy, which entails shifting away from the current wasteful economy to an economy that is more regenerative, inclusive and equitable. Accordingly, over the MTEF period, the department plans to review and strengthen the extended producer responsibility policy framework and regulations. The aim of this is to ensure that priority waste streams – such as plastics, paper and packaging, lighting, and electrical and electronics – are minimised, and that a culture of reusing and recycling is widely adopted by industry. It will also implement the national waste management strategy, which is aimed at minimising waste and diverting 40 per cent of waste from landfills over the medium term to be recycled, repurposed and reintroduced into the economy.

An example of the department’s facilitation of this shift is in the tyre industry, for which the department is finalising the implementation of a waste management plan that will be carried out over the medium term. The plan is being developed in partnership with the Council for Scientific and Industrial Research and the Department of Trade, Industry and Competition, and includes the establishment of sustainable markets for recycled tyre products and the development of processing capacity to support the sustainable recycling of old tyres. By providing training to municipal councillors and officials on waste management over the medium term, the department will seek to strengthen capacity and improve waste management in municipalities. This involves supporting the development of the integrated waste management plan, collection and diversion from landfills, and the implementation of clean-up campaigns and public awareness programmes such as War on Waste.

Activities related to transitioning to a circular economy are expected to result in expenditure of R2 billion over the MTEF period in the *Chemicals and Waste Management* programme, allocations to which increase at an average annual rate of 3 per cent, from R620.4 million in 2022/23 to R678.8 million in 2025/26.

## Programme 2: Regulatory Compliance and Monitoring

### Programme purpose

Promote the development of an enabling legal regime and licensing authorisation system that will promote enforcement and compliance, and ensure the coordination of sector performance.

### Objectives

- Prevent or mitigate the potential negative impact of significant developmental activities on the natural environment through the implementation of an environmental impact management authorisation system by processing and finalising or issuing all decisions for environmental authorisation applications within the prescribed timeframe annually.
- Improve the level of compliance with environmental legislation by increasing the number of environmental authorisation inspections from 170 in 2022/23 to 175 in 2025/26.

### Subprogrammes

- *Regulatory Compliance and Monitoring Management* provides for the administration and functioning of the programme by carrying out its planning and performance management functions.

- *Corporate Legal Support and Litigations* provides support for litigation, alternative dispute resolution, and departmental debts and losses.
- *Law Reform and Policy Coordination* ensures the provision of effective and efficient support to the department's law reform programme so that appeals are effectively dealt with.
- *Integrated Environmental Authorisations* implements integrated environmental authorisation systems and administers appeals processes.
- *Compliance* promotes compliance with environmental legislation by undertaking inspections on all authorisations issued by the department.
- *Enforcement* coordinates the national environment programme and provides strategic support to the environmental management inspectorate.
- *Appeals and Strategic Environmental Instruments* provides for environmental sector performance and facilitates the development and implementation of strategic and operational plans for the sector.
- *Sector Knowledge and Information Management* provides for the provision of information and advocacy for sustainable development through the development, implementation and management of knowledge and information management systems.

## Programme 3: Oceans and Coasts

### Programme purpose

Promote, manage and provide strategic leadership on oceans and coastal conservation.

### Objectives

- Strengthen knowledge, science and policy for the management of oceans and coastlines by conducting 4 research programmes on key areas of oceans management annually.
- Conserve ocean and coastal ecosystems, and ensure their sustainable use by March 2026 by:
  - amending, applying and monitoring the implementation of the national estuarine management plans in 4 national estuaries
  - increasing South Africa's exclusive economic zones that are declared marine protected areas to 53 594.15 square kilometres (5 per cent of exclusive economic zones), in line with the priorities of Operation Phakisa.
- Enhance sector monitoring and evaluation over the medium term by developing and implementing the national oceans and coasts water quality monitoring programme.

### Subprogrammes

- *Oceans and Coasts Management* provides for the administration and coordination of activities in the programme.
- *Integrated Coastal Management and Coastal Conservation* provides national strategic direction, leadership, management and support within applicable legislation and policy on integrated coastal management.
- *Oceans and Coastal Research* provides national strategic direction, leadership, management and support to ocean and coastal research.
- *Oceans Economy and Project Management* manages, coordinates, facilitates, analyses and reports on the implementation of initiatives within the oceans economy.
- *Specialist Monitoring Services* provides specialist oceans and coastal monitoring, reporting and evaluation.

## Programme 4: Climate Change and Air Quality

## Programme purpose

Lead, promote, facilitate, inform, monitor and review the mainstreaming of environmental sustainability, low carbon emissions, climate resilience and air quality in South Africa's transition to sustainable development.

## Objectives

- Manage threats to environmental quality and integrity over the medium term by:
  - leading, supporting and coordinating effective monitoring and reporting on national, provincial and local government responses to climate change (based on the national climate change response policy and the 2012 National Climate Change Response White Paper)
  - preparing, negotiating and informing the implementation of mini-lateral, bilateral and multilateral climate change agreements and reporting
  - ensuring that legislative and other measures are developed, implemented and maintained to protect and defend the right of all to air that is of sufficient atmospheric quality and is not harmful to health and wellbeing
  - managing, facilitating and coordinating the department’s international relations and cooperation engagements and agreements
  - developing, implementing and managing an efficient knowledge management system to ensure high-level advocacy for sustainable consumption and production
  - providing strategic environmental advisory and implementation support services in line with the department’s national and international environmental and sustainable development mandates.

## Subprogrammes

- *Climate Change and Air Quality Management* provides for the management and administration of activities in the programme.
- *Climate Change Mitigation and Specialist Monitoring Services* leads, coordinates, supports and informs responses to the mitigation of climate change and the monitoring and evaluation of national responses to climate change to ensure informed decision-making.
- *Climate Change Adaptation* leads and/or supports, informs, monitors and reports efficient and effective national, provincial and local adaptive responses to climate change.
- *Air Quality Management* ensures that reasonable legislative and other measures are developed, implemented and maintained to protect and defend the right of all to air that is of sufficient atmospheric quality and is not harmful to health and wellbeing.
- *International Climate Change Relations and Reporting* prepares for, negotiates and informs the implementation of mini-lateral, bilateral and multilateral climate change agreements and reporting.
- *International Governance and Resource Mobilisation* oversees, facilitates and coordinates the department’s international relations, engagements and cooperation agreements.
- *South African Weather Service* transfers funds to the South African Weather Service for the management of meteorological services.

## Programme 5: Biodiversity and Conservation

### Programme purpose

Ensure the regulation and management of biodiversity, heritage and conservation matters in a manner that facilitates sustainable economic growth and development.

### Objectives

- Ensure the conservation of ecosystems and minimise threats to ecological sustainability by increasing the percentage of land under conservation from 17.14 per cent (20 907 029 hectares of 121 991 200 hectares) in 2022/23 to 18.63 per cent (22 739 051 hectares of 121 991 200 hectares) in 2025/26.
- Improve access to, and the fair and equitable sharing of, natural resources by:
  - training 1 200 biodiversity entrepreneurs over the medium term
  - finalising a minimum of 15 benefit-sharing agreements arising from the use of biological resources by March 2026.

### Subprogrammes

- *Biodiversity and Conservation Management* provides for the management and administration of activities in the programme.
- *Biodiversity Management and Permitting* plans, manages, protects and conserves South Africa's biological resources and ecosystems for human wellbeing and sustainable development.
- *Protected Areas Systems Management* oversees the establishment, management and maintenance of ecologically representative national and cross-border systems of protected areas to advance the heritage of humankind, and contributes to the objectives of the convention on biological diversity and the sustainable development goals.
- *Biodiversity Monitoring Specialist Services* provides support services for intergovernmental and legislative biodiversity and science policy; and monitors, evaluates, analyses, negotiates and advises on national and international biodiversity conservation statuses and trends. This subprogramme also catalyses national and international negotiations through the provision of the best available scientific and policy information.
- *Biodiversity Economy and Sustainable Use* transforms the biodiversity economy through inclusive economic growth, and fair and equitable access to resources.
- *iSimangaliso Wetland Park Authority* transfers funds to the iSimangaliso Wetland Park Authority to cover its personnel and operational expenditure.
- *South African National Parks* transfers funds to South African National Parks to cover its personnel and operational expenditure.
- *South African National Biodiversity Institute* transfers funds to the South African National Biodiversity Institute to cover its personnel and operational expenditure.

## Programme 6: Environmental Programmes

### Programme purpose

Implement the expanded public works programme and green economy projects in the environmental sector.

### Objectives

- Promote the empowerment of designated communities by creating 226 207 work opportunities and 113 975 full-time equivalent jobs in environmental projects by March 2026 through the implementation of projects related to the expanded public works programme.
- Restore and maintain the structure and function of vegetation to contribute to ecosystem services by clearing or treating 1 998 766 invasive alien plants over the medium term.
- Facilitate the transition to an economy that is low in carbon emissions and uses natural resources efficiently by facilitating the implementation of green initiatives and projects over the medium term.

### Subprogrammes

- *Environmental Programmes Management* provides strategic leadership and management services to the programme.

- *Environmental Programme Region 1* manages the planning and implementation of the environmental protection and infrastructure programmes of the expanded public works programme (War on Waste, Working for the Coast, Working for Wetlands, People and Parks, and open space management) using labour-intensive methods that target the unemployed, women, young people, people with disabilities, and small, medium and micro enterprises. Region 1 comprises Limpopo, Mpumalanga and North West.
- *Environmental Programme Region 2* provides management, operational oversight and supervision for the optimal functioning and development of the natural resources management programmes of the expanded public works programme (Working for Water, Working for Land, Working for Energy: Biomass, Working on Fire, Working for Forests, value-added industries, and partnerships for eradicating invasive alien non-plant species and protecting wetlands). Region 2 comprises Eastern Cape, KwaZulu-Natal and Western Cape.
- *Environmental Programme Region 3* provides management, operational oversight and supervision for the optimal functioning and development of the natural resources management programmes of the expanded public works programme (Working for Water, Working for Land, Working for Energy: Biomass, Working on Fire, Working for Forests, value-added industries, and partnerships for eradicating invasive alien non-plant species and protecting wetlands). Region 3 comprises Free State, Gauteng and Northern Cape.
- *Sector Coordination and Quality Management* ensures effective knowledge and information management support services for branch activities and manages the coordination of socioeconomic interventions for the sector.

## Programme 7: Chemicals and Waste Management

### Programme purpose

Manage and ensure that chemicals and waste management policies and legislation are implemented and enforced in compliance with chemicals and waste management authorisations, directives and agreements.

### Objectives

- Oversee, monitor and evaluate waste sector performance, ensuring that less waste is generated, and existing waste is better managed by:
  - developing and implementing national waste management policies and strategies over the medium term
  - increasing the percentage of waste tyres diverted from landfill sites from 16 per cent (27 243 tonnes of 170 266 tonnes) in 2022/23 to 18 per cent (32 349 tonnes of 170 266 tonnes) in 2025/26
  - sustaining the percentage of paper and packaging waste diverted from landfill sites at 60 per cent (2 326 tonnes of 3 877 tonnes) over the medium term
  - increasing the percentage of e-waste diverted from landfill sites from 10 per cent (36 000 tonnes of 360 000 tonnes) in 2022/23 to 22 per cent (79 000 tonnes of 360 000 tonnes) in 2025/26
  - increasing the percentage of lighting waste diverted from landfill sites from 4 per cent (9 847 tonnes of 271 810 tonnes) in 2022/23 to 8 per cent (20 515 tonnes of 271 810 tonnes) in 2025/26.
- Contribute to managing and reducing the impact of chemicals on the environment by developing and implementing legislative instruments, and providing specialist advisory services on chemicals and pollution management as and when requested.

### Subprogrammes

- *Chemicals and Waste Management* provides strategic leadership and management services to the programme.
- *Hazardous Waste Management and Licensing* develops and implements processes and systems for the efficient and effective administration of the department's authorisation of waste management activities. This subprogramme also ensures that less hazardous waste streams are released into the environment and that contaminated land is rehabilitated.
- *Integrated Waste Management* ensures the development of national policies, strategies, legislation, norms and standards; builds capacity in government, industry and civil society to respond to the challenges of pollution resulting from poor general waste management; and contributes to the provision of basic waste services to all citizens of South Africa.
- *Chemicals and Waste Management Policy and Specialist Monitoring Services* ensures the development of national policies, strategies, legislation, norms and standards; and monitors and evaluates the impact of chemicals and waste management policies.

- *Chemicals and Waste Economy Programme Coordination* ensures the improved public perception of, and support and enhanced capacity for, the chemicals and waste economy to unlock the economic value of waste.
- *Chemicals Management* manages, facilitates, plans and coordinates the department and South Africa's engagement and cooperation in multilateral chemicals and waste agreements, and related international cooperation and national programmes.
- *Waste Bureau* promotes and facilitates the minimisation, reuse, recycling and recovery of waste by providing specialist advice and support for the development of integrated waste management plans for industry and municipalities.

## Programme 8: Forestry Management

### Programme purpose

Develop and facilitate the implementation of policies and targeted programmes to ensure the management of forests, the sustainable use and protection of land and water, and the management of agricultural risks and disasters.

### Objectives

- Ensure sustainable production, growth and transformation in the forestry sector over the medium term by:
  - handing 24 plantations over to communities
  - placing 6 300 hectares under silvicultural practice (this includes weeding, pruning, coppice reduction and thinning).
- Ensure the conservation, protection, rehabilitation and recovery of depleted and degraded natural resources by restoring and rehabilitating 600 hectares of state indigenous forests and woodlands over the medium term.
- Ensure that threats to environmental quality and human health are mitigated by planting 360 000 trees by March 2026.

### Subprogrammes

- *Forestry Management* provides strategic leadership and management services to the programme.
- *Forest Land Management and Post-settlement Support* ensures the sustainable management of forestry operations.
- *Forestry Development* ensures the effective development of policies for forestry regulation and oversight.
- *Forestry Policy Management* ensures the effective management of policies for forestry regulation and oversight.

## Programme 9: Fisheries Management

### Programme purpose

Ensure the sustainable use of and orderly access to marine living resources through improved management and regulation.

### Objectives

- Lead and coordinate access to and the sustainable use of marine and freshwater living resources over the medium term by:
  - implementing a national freshwater (inland) wild capture fisheries implementation plan
  - updating the small-scale fishing rights register.
- Ensure the conservation, protection, rehabilitation and compliance of depleted and degraded natural resources by:
  - conducting 870 verifications of right holders and verifications documents
  - conducting 16 500 compliance and enforcement measures in the 6 prioritised fishery sectors (abalone, rock lobster, line fish, hake, squid and pelagic fish) over the medium term.

## Subprogrammes

- *Fisheries Management* provides strategic leadership and management services to the programme.
- *Aquaculture Development and Fresh Water Fisheries* ensures the sustainable use of, and equitable and orderly access to, marine living resources through improved management and regulation.
- *Monitoring, Control and Surveillance* ensures the protection and promotion of the sustainable use of marine living resources by intensifying enforcement and compliance with relevant legislation and regulations.
- *Marine Resources Management* ensures the sustainable use of, and equitable and orderly access to, marine living resources through improved management and regulation.
- *Fisheries Research and Development* ensures the promotion of the sustainable development of fisheries resources and ecosystems by conducting and supporting appropriate research.
- *Marine Living Resources Fund* transfers funds to the Marine Living Resources Fund to cover its personnel and operational expenditure.

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Total hectares of invasive alien plants treated per year	Biodiversity conservation	Priority 5: Spatial integration, human settlements and local government	50 000	106 596	64 843	75 000	75 000	75 000	75 000
Number of cubic metres of earthworks rehabilitated in wetlands per year	Biodiversity conservation		3 000	3 345	3 506	2 000	3 000	3 000	3 000
Number of people participating in small, medium and micro enterprises and skills development programmes per year	Socioeconomic development		215	285	215	200	200	200	200
Number of full-time equivalent jobs per year	Socioeconomic development		550	550	550	550	550	550	550
Revenue raised per year	Tourism and business development		R25m	R11.3m	R6.2m	R56.3m	R25.1m	R49.2m	R62.6m
Number of paid visitors to the park per year	Tourism and business development		265 000	161 876	66 250	180 000	180 000	180 000	200 000

#### Entity overview

The iSimangaliso Wetland Park Authority was established in 2000 in terms of the World Heritage Convention Act (1999). It is mandated to ensure that active and effective measures are taken to protect and conserve the park; promote the empowerment of historically disadvantaged communities living adjacent to the park; promote, manage, oversee, market and facilitate optimal tourism and related development in the park; and encourage sustained investment and job creation. The authority's ongoing aim is to support and maintain biodiversity conservation and uphold the park's status as a world heritage site.

Over the medium term, the entity will focus on: conserving the environment in the park to mitigate the impact of deforestation and illegal developments on flora and animal habitats, especially those of critically endangered and threatened species; monitoring compliance with governing legislation such as the World Heritage Properties Conservation Act (1983); removing invasive alien plants from 90 000 hectares of protected wetland areas; and ensuring that at least 9 000 cubic metres of earthworks in wetlands are rehabilitated. To carry out these activities, expenditure is expected to increase at an average annual rate of 0.7 per cent, from R287 million in 2022/23 to R293.3 million in 2025/26.

Transfers from the department amount to R748.6 million over the period ahead, constituting 85.6 per cent of the total revenue. These transfers decrease at an average annual rate of 9.1 per cent, from R357.1 million in 2022/23 to R267.8 million in 2025/26, due to a one-off allocation from the department in 2022/23 for the implementation of infrastructure investment projects through the expanded public works programme.

**Entity overview**

The Marine Living Resources Fund was established in terms of the Marine Living Resources Act (1998). The fund's mandate and core business are to manage the development and sustainable use of South Africa's marine resources, and protect the integrity and quality of the marine ecosystem. The fund also ensures fair and equitable access to South Africa's marine resources for the benefit of all citizens.

Over the medium term, the entity plans to conduct 16 500 enforcement and compliance operations in prioritised fisheries sectors, enabling the effective protection of South Africa's marine resources, creating 4 500 jobs in coastal and rural communities, and broadening the scope of the aquaculture sector by increasing the number of locations and species farmed.

Goods and services accounts for all of the entity's spending over the next 3 years. Expenditure is set to increase from R453.7 million in 2022/23 to R518.3 million in 2025/26 at an average annual rate of 4.5 per cent. Transfers from the department constitute an estimated 66.4 per cent (R1 billion) of the entity's revenue over the period ahead. The remainder is set to be generated through levies charged on fish caught and fish products; application, licence, permit and harbour fees; and fines and confiscations.

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of maintenance, development and capital infrastructure projects per year	National botanical and zoological gardens	Priority 5: Spatial integration, human settlements and local government	45	45	45	50	50	50	50
Number of indigenous species added to the living collections of the Millennium Seed Bank partnership per year	National botanical and zoological gardens		216	164	311	100	100	100	150
Number of biodiversity collection records digitised and added to databases per year	Biodiversity science and policy advice		56 000	56 256	56 808	56 000	56 000	56 000	56 000
Number of black biodiversity professionals supported through structured internships and postgraduate studentships per year	Human capital development and transformation		140	228	197	228	169	169	175

### Entity overview

The South African National Biodiversity Institute was established in terms of the National Environmental Management: Biodiversity Act (2004). Its mandate is to monitor and report on the status of South Africa's biodiversity; all listed threatened or protected species, ecosystems and invasive species; and the impact of any genetically modified organisms released into the environment.

Over the medium term, the institute will focus on restoring and rehabilitating ecosystems across South Africa by maintaining and improving existing national botanical and zoological gardens; conducting research and supporting policies on biodiversity; and refurbishing existing infrastructure in the newly designated and developed national botanical gardens in Kwelera (Eastern Cape) and Thohoyandou (Limpopo).

Expenditure is expected to decrease at an average annual rate of 8.1 per cent, from R990.7 million in 2022/23 to R770 million in 2025/26, due to a one-off allocation in 2022/23 to address salary disparities following the transfer of national zoological gardens employees from the National Research Foundation to the institute as a result of a function shift. Departmental transfers account for 73.9 per cent (R1.7 billion) of the institute's revenue over the medium term, with the remainder set to be generated through entry fees charged at botanical and zoological gardens.

**Programmes/Objectives/Activities****Table 32.32 South African National Biodiversity Institute expenditure trends and estimates by programme/objective/activity**

R million	Audited outcome			Revised estimate	Average growth rate (%)		Medium-term expenditure estimate			Average growth rate (%)

## South African National Parks

### Selected performance indicators

**Table 32.35 South African National Parks performance indicators by programme/objective/activity and related priority**

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22		2022/23	2023/24	2024/25
Number of visitors to national parks per year	Administration	Priority 5: Spatial integration, human settlements and local government	6 643 000	1 996 667	3 482 514	3 178 584	4 638 229	5 148 434	5 714 762
Gross operating tourism revenue (value of revenue raised from commercial activities) per year	Administration		R1.6bn	R618.7m	R1.2bn	R1.2bn	R1.4bn	R1.7bn	R2bn
Number of free-access entrants to parks per year	Administration	Priority 2: Economic transformation and job creation	75 000	39 841	28 018	20 000	50 000	100 000	100 000
Number of hectares of land brought into the national parks system per year	Administration		136 300	6 424	9 524	4 000	8 752	10 000	12 000
Percentage accommodation occupancy in national parks per year	Administration		69.4% (546 931/ 788 086)	29.4% (231 697/ 788 086)	57.6% (453 138/ 786 606)	67.6%	68.2%	68.8%	69.4%

### Entity overview

South African National Parks was established in terms of the National Environmental Management: Protected Areas Act (2003). Its mandate is to conserve, protect, control and manage national parks and other defined protected areas and their biodiversity. As the presence of an efficiently managed system of national parks is a key component of the national tourism economy, the entity plays a significant role in the economy and acts as

a catalyst for local economic development. Through the implementation of the expanded public works programme, the entity provides significant support to small, medium and micro enterprises, particularly in rural areas.

Over the medium term, the entity will focus on fighting poaching, particularly rhino poaching in the Kruger National Park and abalone poaching in the Western Cape; acquiring 30 752 hectares of land as part of its land inclusion plan; developing and upgrading infrastructure within national parks; and managing more than 4 million hectares of terrestrial and 369 657 hectares of marine protected biodiversity through a system of 21 national parks and 10 marine protected areas.

In carrying out these activities, expenditure is expected to increase at an average annual rate of 8.1 per cent, from R2.8 billion in 2022/23 to R3.5 billion in 2025/26. The entity expects to generate 63.6 per cent (R5.9 billion) of its revenue over the period ahead through visitor fees and the remainder through transfers from the department.

### Programmes/Objectives/Activities

**Table 32.36 South African National Parks expenditure trends and estimates by programme/objective/activity**

R million	Audited outcome			Revised estimate	Average growth rate (%)	Average: Expenditure/ Total (%)	Medium-term expenditure estimate			Average growth rate (%)	Average: Expenditure/ Total (%)

### Entity overview

The South African Weather Service was established in terms of the South African Weather Service Act (2001). Its core mandate is to provide 2 distinct services: the public good service, funded by government; and commercial services, where the user-pay principle applies. Key activities include maintaining, extending and improving the quality of meteorological services; providing risk-management information; collecting meteorological data over South Africa and the surrounding southern oceans; and fulfilling government's international obligations under the conventions of the World Meteorological Organisation and the International Civil Aviation Organisation.

Over the medium term, the weather service will focus on: developing and improving early warning infrastructure for severe weather, including climate response initiatives for inclement weather conditions; providing innovative meteorological and related products and services through the development and implementation of community weather-smart products and services; and increasing its provision of aviation meteorological services.

Expenditure is expected to increase at an average annual rate of 5.2 per cent, from R577.4 million in 2022/23 to R671.7 million in 2025/26. The weather service expects to derive 72.2 per cent (R1.6 billion) of its revenue over the medium term through transfers from the department and the remainder through commercial activities and services rendered.

### Programmes/Objectives/Activities

### Vote purpose

Facilitate the creation of sustainable human settlements and the improvement to household quality of life.

### Mandate

The Department of Human Settlements is mandated, in terms section 3 of the Housing Act (1997), to establish and facilitate a sustainable national housing development process in collaboration with provinces and municipalities. In fulfilling its mandate, the department determines national policy and norms and standards for the development of housing and human settlements, prescribes national housing delivery goals, and oversees provincial and municipal performance outcomes against national targets. To ensure an effective housing development process, the department funds, capacitates and supports provinces and municipalities in the implementation of human settlements projects.

1. No historical data available.

2. Target set to be achieved by 2023/24.

## **Expenditure overview**

Over the medium term, the department will continue to focus on developing integrated human settlements; upgrading informal settlements; and creating an enabling environment for affordable housing by continually reviewing policy and implementation programmes, and strengthening support to provinces and municipalities to implement human settlements programmes.

Expenditure is expected to increase from R33.5 billion in 2022/23 to R38.1 billion in 2025/26 at an average annual rate of 4.4 per cent. Transfers to provinces, municipalities and public entities that implement human settlements programmes constitute an estimated 96.1 per cent (R104.7 billion) of the department's budget. These comprise allocations such as the *human settlements development grant*, the *urban settlements development grant*, the *informal settlements upgrading partnership grant* and transfers to public entities, and are expected to increase at an average annual rate of 3.9 per cent, from R32.5 billion in 2022/23 to R36.5 billion in 2025/26.

### ***Developing integrated human settlements***

One of the department's objectives is to create inclusive communities within an improved spatial landscape. As such, over the MTEF period, the department plans to finalise 11 integrated plans in priority development areas that are intended to advance spatial transformation and deliver integrated human settlements projects. The medium-term target is to deliver 180 000 fully subsidised houses and issue 388 104 title deeds to beneficiaries from low-income households. Spending for these activities is within the *Integrated Human Settlements Planning and Development* programme's allocation of R73.5 billion. The programme's budget increases at an average annual rate of 5.1 per cent, from R22.1 billion in 2022/23 to R25.6 billion in 2025/26.

An additional R2.2 billion is allocated through the *urban settlements development grant* for: the Lufhereng integrated urban development project in Johannesburg, a mixed-use residential housing development that aims to promote spatial integration and provide affordable rental housing units; and the Avoca Node project, which aims to create an enabling environment for private sector-led housing developments in the in eThekweni municipality. These were the only projects approved to access the budget facility in the human settlements sector. Transfers to the grant are made in the *Integrated Human Settlements Planning and Development* programme.

From 2023/24 the department will be taking over the implementation of the emergency housing programme. As a result, the *provincial emergency housing grant* and the *municipal emergency housing grant* ends. This adjustment will increase expenditure on payments for capital assets from R15.3 million in 2022/23 to R575.9 million in 2025/26.

### ***Upgrading informal settlements***

The department assists provinces and municipalities with comprehensive planning for the upgrading of informal settlements. This involves providing secure tenure, safe and reliable water and sanitation and adequate access to social services. Related work is completed in phases, with phases 1 to 3 comprising the provision of secure tenure and basic services such as water, sanitation, lighting and refuse removal. Community participation in the upgrading process is a key pillar in the programme as beneficiaries are encouraged to find adequate upgrading solutions that are specific to their communities. To upgrade a targeted 900 informal settlements to phase 3 across the country, provincial and municipal spending through the *informal settlements upgrading partnership grant* is expected to amount to R27.2 billion over the medium term. A further R120 million over the period ahead is expected to ensure that provinces and municipalities deliver 60 000 serviced sites per year through the national upgrading support programme.

The department intends to hire consultants to augment capacity for the upgrading of informal settlements and the provision of affordable rental housing. Spending for this is within the department's budget for consultants, which is expected to increase at an average annual rate of 7.3 per cent, from R188.8 million in 2022/23 to R233.5 million in 2025/26.

### ***Facilitating affordable housing***

Affordable housing broadly constitutes the provision of rental and social housing programmes, and instruments to provide housing finance to traditionally unserved segments of the population. These are critical components

in the creation of a functional residential property market. To this end, the department aims to increase the supply of rental and social housing stock, and assist low-income and middle-income households that earn above the qualifying threshold to receive state-subsidised housing but below the threshold to secure a home loan. Accordingly, the department plans to build 10 800 rental housing units and disburse 12 000 finance-linked individual subsidies over the next 3 years. As a result, over the period ahead, spending in the *Rental and Social Housing* programme is expected to be R3.1 billion and spending in the *Affordable Housing* programme is expected to be R1.9 billion.

## Programme 2: Integrated Human Settlements Planning and Development

## Programme purpose

Manage the development of policy, planning and research in the creation of sustainable and integrated human settlements, oversee the delivery of the integrated residential development programme, and coordinate intergovernmental partnerships with stakeholders.

## Objectives

- Accelerate the development and delivery of spatially integrated housing and human settlements by:
  - transferring and monitoring the disbursement of the *human settlements development grant* to provinces and the *urban settlements development grant* to metropolitan municipalities in terms of the annual Division of Revenue Act
  - undertaking research and developing housing and human settlements policies and programmes as and when required.
- Promote the coordination of planning and strengthen intergovernmental cooperation across and within the different spheres of government by:
  - providing support to provinces and municipalities in the development of integrated implementation plans on an ongoing basis
  - facilitating intergovernmental forums and stakeholder partnerships on an ongoing basis.

## Subprogrammes

- *Management for Integrated Human Settlements Planning and Development* provides strategic leadership to the programme.
- *Macro Sector Planning* manages the development and evaluation of macro strategy and planning frameworks for human settlements.
- *Macro Policy and Research* undertakes research and develops policy that promotes spatial transformation and integration.
- *Monitoring and Evaluation* monitors and reports on housing and human settlements programmes and projects in terms of the national housing code.
- *Public Entity Oversight* provides regulatory, strategic and governance oversight of various public entities. This subprogramme also oversees compliance with and performance against legislated mandates and responsibilities.
- *Grant Management* manages and transfers conditional grants to provinces and municipalities for the implementation of housing and human settlements programmes.
- *Capacity Building and Sector Support* improves intergovernmental coordination and provides sector-specific technical capacity to provinces and municipalities.

## Programme 3: Informal Settlements

### Programme purpose

Provide policy, planning and capacity support for the upgrading of informal settlements, and oversee the implementation of the informal settlements upgrading programme.

### Objectives

- Accelerate the provision of security of tenure, basic services and related infrastructure by:
  - managing the transfer of the *informal settlements upgrading partnership grant* to municipalities and provinces in terms of the annual Division of Revenue Act
  - undertaking evidence-based research and developing responsive policies on an ongoing basis
  - providing capacity support to provinces and municipalities through the national upgrading support programme on an ongoing basis
  - monitoring and evaluating the monthly and quarterly financial and non-financial performance of provincial and municipal informal settlement upgrading programmes and projects.
- Strengthen cooperation and collaboration between the 3 spheres of government, government and civil society organisations, and government and communities by facilitating intergovernmental forums and stakeholder partnerships on an ongoing basis.

### Subprogrammes

- *Management for Informal Settlements* provides strategic leadership to the programme.
- *Grant Management* provides grant funding for the upgrading of informal settlements and monitors the expenditure and performance of these grants.
- *Capacity Building and Sector Support* improves coordination and provides sector-specific technical capacity to provinces and municipalities for the upgrading of informal settlements.

## Programme 4: Rental and Social Housing

### Programme purpose

Promote the provision of affordable rental housing, monitor the performance of the Social Housing Regulatory Authority, and develop capabilities in the rental housing sector through intergovernmental collaboration and evidence-based research.

### Objectives

- Promote the delivery of affordable rental housing by conducting research and developing policies and programmes as and when required.
- Accelerate the provision of affordable rental housing by:
  - providing capital and operational funding to the Social Housing Regulatory Authority to support the social housing sector on an ongoing basis
  - monitoring and evaluating the financial and non-financial performance of affordable rental housing programmes and projects on a monthly and quarterly basis.
- Strengthen cooperation and collaboration by facilitating intergovernmental forums and stakeholder partnerships on an ongoing basis.

### Subprogrammes

- *Management for Rental and Social Housing* provides strategic leadership to the programme.
- *Public Entity Oversight* provides regulatory, strategic and governance oversight of the Social Housing Regulatory Authority and oversees compliance with and performance against the entity's mandate and related legislation.

- *Capacity Building and Sector Support* manages capacity-development programmes, improves coordination and provides technical support in the affordable rental housing sector.

## Programme 5: Affordable Housing

### Programme purpose

Facilitate the provision of affordable housing finance, monitor market trends, and develop research and policy that respond to demand. Oversee housing finance entities reporting to the minister.

### Objectives

- Accelerate the provision of finance for affordable housing by:
  - providing capital and operational funding to the National Housing Finance Corporation for the administration of the finance-linked individual subsidy programme on an ongoing basis
  - researching and developing policies and programmes that promote the provision of finance for affordable housing as and when required
  - monitoring and evaluating the financial and non-financial performance of affordable housing programmes and projects on a monthly and quarterly basis.
- Strengthen cooperation and collaboration by facilitating intergovernmental forums and stakeholder partnerships on an ongoing basis.

### Subprogrammes

- Management for Affordable Housing* provides strategic leadership to the programme.
- Public Entity Oversight* provides regulatory, strategic and governance oversight to the National Housing Finance Corporation, oversees compliance with and performance against the corporation's mandate and related legislation, and provides operational and capital transfers to the corporation.
- Capacity Building and Sector Support* improves coordination in the sector and provides sector-specific technical support.

#### Entity overview

The Community Schemes Ombud Service was established in terms of the Community Schemes Ombud Service Act (2011) to provide dispute resolution services for community schemes; monitor and control the quality of all governance documentation for sectional title schemes; and take custody of, preserve and provide public access to scheme governance documentation.

The ombud will focus on ensuring that 80 per cent of scheme governance documents are registered and compliant with the legislative framework by 2025/26. To this end, spending on regulation is expected to increase at an average annual rate of 5.6 per cent, from R117.5 million in 2022/23 to R138.6 million in 2025/26. Total expenditure is expected to increase from R431.9 million in 2022/23 to R467.2 million in 2025/26 at an average annual rate of 2.7 per cent. The ombud will incur an operating deficit in 2022/23 as its expenditure plans include spending the surplus funds it generated in 2021/22, for which National Treasury approval has been granted.

The ombud derives its revenue through levies paid by community schemes. Revenue is expected to increase in line with expenditure.

1. No historical data available.

**Entity overview**

Established in terms of the Housing Development Agency Act (2008), the Housing Development Agency is mandated to identify, hold, develop and release land for integrated human settlements development. The agency also provides project-level technical assistance and project management services to provinces and municipalities.

Over the medium term, the agency will continue to focus on assisting provinces and municipalities with the implementation of human settlements programmes and projects. The agency is expected to provide upgrading support to provinces and municipalities for 850 informal settlements. To this end, spending on built environment projects constitutes the largest spending item in the budget at 56.4 per cent. Expenditure is expected to increase at an average annual rate of 4 per cent, from R503.7 million in 2022/23 to R566.7 million in 2025/26. The agency derives revenue from programme management fees and transfers from the department. Revenue is expected to increase in line with expenditure.

### Entity overview

The National Home Builders Registration Council is established in terms of the Housing Consumer Protection Measures Act (1998) to protect the interests of housing consumers and regulate the home building industry. The council provides warranty protection against poor workmanship in newly built homes and ensures that home builders adhere to prescribed technical standards in the building process.

The council will continue to focus on improving compliance with building standards by inspecting a targeted 448 749 homes over the MTEF period. Total expenditure is expected to increase from R862.8 million in 2022/23 to R949.3 million in 2025/26 at an average annual rate of 3.2 per cent.

The council generates its revenue through fees for the enrolment of newly constructed homes, the registration and renewal of membership for home builders, and the provision of technical services. Revenue is expected to increase at an average annual rate of 4.4 per cent, from R1.3 billion in 2022/23 to R1.5 billion in 2025/26 as 45 280 home builder memberships are renewed, and 155 420 houses in the subsidy sector and 137 703 houses in the non-subsidy sector are enrolled to protect consumers against poor workmanship.

#### Entity overview

The National Housing Finance Corporation was established as a development finance institution in 1996. The corporation is responsible for expanding access to housing finance for low-income and middle-income households through financial intermediaries.

The corporation will focus on increasing affordable housing finance to intermediaries over the medium term. As such, its loan book is expected to increase from R4.5 billion in 2022/23 to R5.9 billion in 2025/26. To fund this growth, the corporation plans to seek the Minister of Finance's approval to borrow in terms of section 66(5) of the Public Finance Management Act (1999). The corporation is also mandated to administer the finance-linked subsidy programme, which is set to disburse 10 405 subsidies over the medium term to first-time home buyers at a projected cost of R1.6 billion over the MTEF period. As a result, total expenditure is expected to increase at an average annual rate of 4.7 per cent, from R942.6 million in 2022/23 to R1.1 billion in 2025/26.

The corporation derives its revenue from interest on loans, income from controlled entities and revenue from rental properties and management fees. Total revenue is expected to increase at an average annual rate of 3.2 per cent, from R1.2 billion in 2022/23 to R1.3 billion in 2025/26.

## Property Practitioners Fidelity Fund

### Entity overview

The Property Practitioners Fidelity Fund is managed by the Property Practitioners Regulatory Authority. The fund protects the interest of the public from negligence on the part of property practitioners in dealing with real estate transactions.

Expenditure in the fund is expected to decrease at an average annual rate of 7 per cent, from R91.8 million in 2022/23 to R73.8 million in 2025/26, as improved compliance reduces the number of claims against the fund. It generates revenue through administrative fees, interest earned on trust accounts and recovered claims.

### Programmes/Objectives/Activities

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance 2022/23	MTEF targets		
			2019/20	2020/21	2021/22		2023/24	2024/25	2025/26
Number of complaints received per year	Compliance	Priority 5: Spatial integration, human settlements and local government	4 982	2 685	2 863	4 716	4 952	5 299	5 299
Number of complaints resolved per year	Compliance		3 690	2 366	2 453	4 287	4 457	4 769	4 769
Number of Estate Agents Fidelity Fund certificates renewed per year	Compliance		47 356	51 063	59 755	64 036	67 238	71 945	71 945
Number of estate agencies inspected per year	Compliance		144	166	201	230	280	320	320
Value of claims recoveries per year	Compliance		R3.9m	R8.2m	R5.7m	R4.6m	R4.9m	R5.2m	R5.2m
Number of non-principal agents enrolled for the national qualifications framework level 4 professional designation examination per year	Education and training		1 593	777	1 624	2 080	2 184	2 337	2 337
Number of principal agents enrolled for the national qualifications framework level 5 professional designation examination per year	Education and training		217	139	272	183	192	205	205
Number of candidates enrolled in the continuous professional development programme per year	Education and training	19 995	17 013	16 027	20 127	211 33	22 612	22 612	

### Entity overview

The Property Practitioners Regulatory Authority was established in terms of the Property Practitioners Act (2019) to regulate property practitioners in the marketing, promotion, management, sale, letting, financing and purchase of immovable property. The authority also regulates the conduct of property practitioners in dealing with consumers and manages the Property Practitioners Fidelity Fund.

Over the medium term, the authority will focus on improving compliance within the sector by inspecting a targeted 920 estate agencies and renewing 211 128 fidelity fund certificates. Spending on compliance constitutes a projected 25.8 per cent (R157.5 million) of total expenditure, increasing from R49.2 million in 2022/23 to R56.6 million in 2025/26 at an average annual rate of 4.8 per cent.

Total expenditure is expected to decrease at an average annual rate of 3.8 per cent, from R230.3 million in 2022/23 to R204.8 million in 2025/26, as the authority repositions from the old Estate Agency Affairs Board to become a streamlined regulator in the sector. The authority derives its revenue from fees and levies from property practitioners and fees from managing the Property Practitioners Fidelity Fund.

### Programmes/Objectives/Activities

### Entity overview

The Social Housing Regulatory Authority was established in terms of the Social Housing Act (2008) to regulate and invest in the social housing sector. The authority regulates social housing institutions and the units they manage, provides capital subsidies to accredited social housing institutions and builds the capacity of the sector.

Over the medium term, the authority will focus on increasing the number of social housing units for rental, with the aim of delivering 8 000 units per year. To this end, expenditure on project development for social housing is set to constitute 89.4 per cent (R2.6 billion) of total expenditure over the medium term. Expenditure is expected to increase at an average annual rate of 4.3 per cent, from R887.4 million in 2022/23 to R1 billion in 2025/26. The entity derives all its revenue through transfers from the department. Revenue is expected to increase in line with expenditure.

Executive authority: Minister of Mineral Resources and Energy  
 Accounting officer: Director-General of Mineral Resources and Energy  
 Website: [www.dmre.gov.za](http://www.dmre.gov.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Regulate the minerals and mining sector for transformation, growth and development. Formulate energy policies, regulatory frameworks and legislation to ensure energy security, environmentally friendly carriers, and access to affordable and reliable energy.

### Mandate

The Department of Mineral Resources and Energy is mandated to ensure the transparent and efficient regulation of South Africa's mineral resources and minerals industry, and the secure and sustainable provision of energy in support of socioeconomic development. Several acts regulate the mining, minerals and energy sectors. Key among these are:

- the Petroleum Products Act (1977), which regulates the petroleum industry at the manufacturing, wholesale and retail levels
- the Mine Health and Safety Act (1996), which governs mine health and safety
- the Mineral and Petroleum Resources Development Act (2002), which provides the regulatory framework for equitable access to and the sustainable development of mineral resources and related matters
- the Electricity Regulation Act (2006), which establishes a national regulatory framework for the electricity supply industry, including registration and licensing
- the National Energy Act (2008), which empowers the minister to plan for and ensure security of supply for the energy sector.

The 1998 White Paper on Energy Policy, alongside the 2003 White Paper on Renewable Energy, sets out government's overarching position on the supply and consumption of energy. Other applicable policies include the National Development Plan, the integrated energy plan, integrated resource plans, the electricity pricing policy, the Paris Agreement on Climate Change, the National Environmental Management: Air Quality Act (2004) and the National Energy Act (2008).

1. No historical data available.

## Expenditure overview

Over the medium term, the department will continue to focus on regulating the petroleum sector; ensuring mine health, safety and equity; rehabilitating mines and the environment; extending access to electricity; enhancing energy efficiency; and managing nuclear energy in accordance with international commitments. This is intended to ensure that South Africa has an adequate supply of electricity and liquid fuels to maintain economic activity and prevent disruptions, and to give effect to a mining sector that prioritises the welfare of its human resources and the environment.

Transfers and subsidies to public entities and municipalities account for an estimated 79.3 per cent (R27 billion) of the department's planned spending over the MTEF period. Most of this is allocated for the integrated national electrification programme, which receives R19.9 billion through allocations in the subprogramme of the same name. Total expenditure is expected to increase at an average annual rate of 4 per cent, from R10.4 billion in

2022/23 to R11.7 billion in 2025/26.

The department's regulatory and oversight work requires inspections to ensure that mining companies and petroleum licence holders comply with legislative requirements and that electricity connections are verified through the integrated national electrification programme. As such, expenditure on compensation of employees accounts for an estimated 10 per cent (R3.3 billion) of the department's budget over the medium term.

### ***Regulating the petroleum sector***

The department will continue to enforce compliance with regulatory standards and transformation objectives in the petroleum sector. It plans to inspect 4 500 petroleum retail sites and issue mining rights or permits to 600 historically disadvantaged South Africans over the period ahead. In improving the quality and security of petroleum fuels, the department plans to sample fuel and test petroleum products at 3 240 petroleum retail sites over the MTEF period to ensure that fuel meets quality standards. Expenditure for these activities is within allocations of R1.6 billion over the medium term to the *Minerals and Petroleum Regulation* programme.

This programme's budget includes transfer payments amounting to R288.8 million over the medium term to Petroleum Agency South Africa, which regulates exploration and production activities, and acts as the custodian of the national petroleum exploration and production database.

### ***Ensuring mine health, safety and equity***

The *Mine Health and Safety Inspectorate* programme promotes mine health and safety, and aims to contribute to skills development and transformation. The inspectorate engages with mine management and executives, and analyses the outcomes of inspection and audits. Through the programme, the department expects to conduct 24 000 mine inspections over the medium term. An amount of R733.2 million, 2.2 per cent of the department's budget, is set aside over the MTEF period to carry out these inspections.

To accelerate transformation in the mining sector, the department aims to monitor and enforce compliance with the mining charter by conducting 636 social and labour plan verification inspections and 1 500 mine economic verification inspections over the MTEF period. These activities are funded through the *Minerals and Petroleum Regulation* programme, which is allocated R1.6 billion over the medium term.

Small-scale mining projects facilitate and develop the artisanal and small-scale mining sector, and provide an opportunity for previously disadvantaged communities to enter and participate in mining. To help realise the potential of this sector, the department aims to provide financial and non-financial support to 12 new artisanal and small-scale mining companies over the medium term at a projected cost of R27 million per year. These funds are made available through the *Mineral and Energy Resources Programmes and Projects* programme.

### ***Rehabilitating mines and the environment***

To promote the health and safety of mine employees and surrounding communities, the department will intensify its efforts to rehabilitate dangerous, derelict and ownerless mining sites. With the Council for Mineral Technology and Research (Mintek) as the implementing agent, the department aims to rehabilitate 9 mines and seal 360 shafts or holings over the medium term. The projected cost of these activities is R387 million within the *Mineral and Energy Resources Programmes and Projects* programme.

### ***Extending access to electricity***

Government's policy to extend access to electricity to all South Africans is carried out primarily through the integrated national electrification programme, through which an additional 660 000 households are expected to be connected to the electricity grid over the medium term. This will require 6 new substations to be built and 9 substations to be upgraded over the next 3 years. For this purpose, transfers to Eskom are expected to increase at an average annual rate of 5.2 per cent, from R3.6 billion in 2022/23 to R4.2 billion in 2025/26, while transfers to municipalities are expected to increase at an average annual rate of 4.4 per cent, from R2.1 billion in 2022/23 to R2.4 billion in 2025/26.

A further 15 000 households in each year over the MTEF period are expected to be provided with non-grid electricity connections. Expenditure for this is projected to increase at an average annual rate of 5.2 per cent, from R233.5 million in 2022/23 to R271.9 million in 2025/26. The bulk of these connections are in sparsely populated rural areas (mostly in Eastern Cape, KwaZulu-Natal and Limpopo) and high-density informal

settlements. This expenditure is within the *Integrated National Electrification Programme* subprogramme in the *Mineral and Energy Resources Programmes and Projects* programme.

### Enhancing energy efficiency

To realise a target of 1.5 terawatt-hours of energy savings over the medium term, allocations to the *energy efficiency and demand-side management grant* are expected to increase at an average annual rate of 4.3 per cent, from R223.2 million in 2022/23 to R253.4 million in 2025/26. This will enable municipalities to undertake initiatives to upgrade municipal infrastructure that is not energy efficient, such as replacing old street and traffic lights with greener technology.

### Managing nuclear energy

The *Nuclear Energy Regulation and Management* programme accounts for an estimated 10.9 per cent (R3.6 billion) of the department's budget over the medium term, mainly comprising transfers to entities. The South African Nuclear Energy Corporation is allocated R3.1 billion, of which R2.4 billion is for its operational costs and R664.7 million is for the decontamination and decommissioning of old nuclear facilities. An additional R20 million is earmarked in 2023/24 for preparatory work to procure a multipurpose reactor to replace the 58-year-old SAFARI-1 research reactor, which is approaching the end of its useful life. The reactor is used for research and development, and to manufacture medical isotopes.

2. Rand million.

## Programme 2: Minerals and Petroleum Regulation

### Programme purpose

Regulate the mining, minerals and petroleum sectors to promote economic growth, employment, transformation and sustainable development.

### Objectives

- Improve the participation of historically disadvantaged South Africans in the mining sector and contribute to its transformation by:
  - issuing mining rights and permits to 600 historically disadvantaged South Africans over the medium term
  - monitoring and enforcing compliance with procurement requirements that relate to historically disadvantaged South Africans, as prescribed by the mining charter, on an ongoing basis.
- Monitor and enforce compliance with the statutory obligations of the Mineral and Petroleum Resources Development Act (2002) and the mining charter by conducting 636 social and labour plan verification inspections, 1 500 mine economic verification audits and 4 122 environmental verification inspections over the medium term.
- Ensure the development and transformation of the liquid fuels industry, and the security of supply of petroleum and petroleum products, by monitoring and enforcing technical and economic compliance with legislation, specifications, standards and licence conditions annually.
- Facilitate the orderly operation of the petroleum sector by analysing fuel supply and efficiently adjudicating licences for manufacturing, wholesaling and retailing activities on an ongoing basis.
- Strengthen the regulatory framework in the liquid fuels petroleum industry by implementing an accounting system to introduce a transparent fuel pricing mechanism that will provide appropriate returns to investors in the liquid fuels sector across the value chain on an ongoing basis.

### Subprogrammes

- *Minerals and Petroleum Management* provides overall management to the programme.
- *Mineral Regulation and Administration* administers and evaluates prospecting and mining rights and licensing. This subprogramme also makes transfers to the South African Diamond and Precious Metals Regulator, which implements and enforces the provisions of the Precious Metals Act (2005); and to Petroleum Agency South Africa, which regulates onshore and offshore oil and gas exploration and production activities.
- *Environmental Enforcement and Compliance* ensures that mining activities comply with the prescripts of the National Environmental Management Act (1998).
- *Petroleum Compliance Monitoring, Enforcement and Fuel Pricing* ensures technical, economic and legal compliance by the petroleum industry with the prescripts of the Petroleum Products Act (1977) and its regulations through monitoring and enforcement.

- *Petroleum Licensing and Fuel Supply* manages petroleum licensing, regulates import and export permits for petroleum products, monitors fuel stock levels, and ensures the security of fuel supply.

## Programme 3: Mining, Minerals and Energy Policy Development

### Programme purpose

Formulate, maintain and implement integrated minerals and energy policies to promote and encourage investment in the mining and energy industry.

### Objectives

- Promote investment in the mining, minerals and upstream petroleum sectors over the medium term by:
  - hosting 24 promotional and awareness activities or events for local and foreign investors
  - participating in local and international mining and petroleum conferences and events, engaging with stakeholders in various forums, and leading the implementation of key government priorities
  - ensuring the full implementation of plans for developing the oceans economy for oil and gas exploration through Operation Phakisa
  - ensuring the full implementation of the shale gas action plan through consultations, advocacy, research and promotional activities for shale gas exploration
  - publishing various mining and energy reports and publications on an ongoing basis.
- Manage diplomatic imperatives and relations with foreign countries to benefit South Africa by establishing and implementing bilateral and multilateral partnerships for mining and upstream petroleum development on an ongoing basis.
- Improve energy security over the medium term by amending the Electricity Regulation Amendment Act (2007) and its regulations, the National Radioactive Waste Disposal Institute Act (2008) and its regulations, and the Gas Amendment Act (2021).
- Enable transformed, competitive and sustainable minerals and petroleum sectors by:
  - amending the Petroleum Products Act (2006) by 2024/25
  - amending the Mine Health and Safety Act (1996), the Mineral and Petroleum Resources Development Act (2002) and the Diamonds Amendment Act (2005) over the MTEF period.
- Transform and grow the mining and energy sectors by enabling the revision of the integrated resources plan by 2023/24.
- Contribute to a reduction in greenhouse gas emissions by approving and registering 12 carbon offset projects over the medium term.

### Subprogrammes

- Mining, Minerals and Energy Policy Development Management* provides overall management to the programme.
- Minerals and Petroleum Policy* develops and reviews policy and legislative frameworks for the mining, minerals and petroleum sectors; conducts research; and monitors the impact of policy implementation.
- Nuclear, Electricity and Gas Policy* develops and reviews policy and legislative frameworks for the nuclear,

electricity and gas sectors; conducts research; and monitors the impact of policy implementation.

- *Economic Analysis and Statistics* conducts research, compiles and collates data, and advises the department on local and international economic trends in the mineral and energy sectors.
- *Economic Growth, Promotion and Global Relations* promotes economic growth and investment in the mineral and energy sectors. This subprogramme also makes transfers to the Council for Geoscience and Mintek.
- *Mineral and Energy Planning* ensures the secure supply of mineral and energy resources through evidence-based planning, manages the development of minerals and energy plans, and undertakes research and analysis of market trends that inform and influence the minerals and energy economy.

**Programme 4: Mine Health and Safety Inspectorate**

**Programme purpose**

Ensure the health and safety of employees in the mining sector.

**Objectives**

- Promote health and safety by:
  - reducing occupational fatalities by 10 per cent, occupational injuries by 5 per cent and occupational diseases by 10 per cent over the medium term
  - implementing the occupational and health and safety improvement strategy, and enforcing guidelines on an ongoing basis
  - conducting investigations, inspections and audits on an ongoing basis
  - 80 per cent adherence to prescribed timeframes for resolving medical appeals
  - 100 per cent adherence to timelines for appeals to the chief inspector of mines
  - 80 per cent adherence to timelines for applications in terms of the Mineral and Petroleum Resources Development Act (2002).
- Contribute to skills development in the mining sector by implementing, monitoring and evaluating the certificate of competency model on an ongoing basis.

**Subprogrammes**

- Mine Health and Safety Management* provides overall management to the programme.
- Mine Health and Safety Regions* develops strategies to reduce occupational diseases and injuries in the mining sector, and conducts audits and inspections.
- Occupational Health* makes transfers to the Mine Health and Safety Council, which is tasked with promoting a culture of health and safety in the mining sector.

## Programme 5: Mineral and Energy Resources Programmes and Projects

### Programme purpose

Manage, coordinate and monitor programmes and projects focused on access to mineral and energy resources.

### Objectives

- Increase access to electricity by managing the funding and monitoring of the implementation of the integrated national electrification programme on an ongoing basis.
- Increase public awareness on energy issues while empowering disadvantaged and vulnerable groups by identifying, implementing, managing and coordinating upliftment programmes and projects on an ongoing basis.

- Ensure the efficient management of electricity supply on an ongoing basis by:
  - enhancing the application of business principles for project management to assist programme and project managers
  - coordinating, monitoring and reporting on the implementation of programmes and projects focused on the development, improvement and transformation of the energy generation, refinement, transmission and distribution industry and its infrastructure.
- Promote the sustainable use and management of mineral and energy resources over the medium term by:
  - rehabilitating 9 derelict and ownerless mines
  - providing marginal mines with subsidies for water management solutions
  - managing the funding and monitoring of the *energy efficiency and demand-side management grant* to municipalities
  - promoting and facilitating access for and the development of artisanal and small-scale mining activities within the industry.

### Subprogrammes

- *Programmes and Projects Management* provides overall management to the programme.
- *Integrated National Electrification Programme* oversees and manages financing and implementation processes for the electrification programme, and makes transfers to Eskom, municipalities and private providers.
- *Regional Programmes and Projects Management Office* provides specialised assistance to management to apply management principles, coordinate project information and report on projects. This subprogramme has been discontinued as its functions have been absorbed by the *Integrated National Electrification Programme* subprogramme.
- *Electricity Infrastructure and Industry Transformation* oversees programmes and projects focused on the development, improvement and transformation of the electricity generation, transmission and distribution sector, and independent power producers.
- *Energy Efficiency Projects* advances energy efficiency in South Africa through planning and coordinating initiatives and interventions focused on the energy efficiency market. This subprogramme also makes transfers to municipal energy efficiency programmes.
- *Renewable Energy Projects* ensures the integration of renewable energy into South Africa's mainstream energy supply through planning and coordinating initiatives and interventions focused on the renewable energy market. This subprogramme also makes transfers to the South African National Energy Development Institute.
- *Environmental Management Projects* provides strategic guidance on environmental management and climate change. This subprogramme also assists mines to prevent the uncontrolled movement of water into and out of underground mine openings and holings.

## Programme 6: Nuclear Energy Regulation and Management

### Programme purpose

Manage the South African nuclear energy industry and control nuclear materials in terms of international obligations, nuclear legislation and policies to ensure the peaceful use of nuclear energy.

### Objectives

- Ensure compliance with international nuclear obligations by applying relevant statutory frameworks and following the best practice guidelines of the International Atomic Energy Agency on an ongoing basis.
- Regulate the security of nuclear material, related equipment and facilities by developing and publishing appropriate regulations on an ongoing basis.
- Create public awareness and increase the understanding of nuclear technology through the implementation of the nuclear communications strategy on an ongoing basis.

### Subprogrammes

- *Nuclear Energy Management* provides overall management to the programme.
- *Nuclear Safety and Technology* manages and implements all matters related to nuclear safety and technology as required by legislation and international agreements; implements nuclear energy policy in line with the requirements of the integrated resource plan; and administers all matters related to nuclear technology, safety, liability and emergency management with the aim of improving the governance of the nuclear sector. This subprogramme also makes transfers to the South African Nuclear Energy Corporation, the National Nuclear Regulator and the National Radioactive Waste Disposal Institute, and is responsible for paying membership fees to international organisations.
- *Nuclear Non-proliferation and Radiation Security* manages and implements all matters related to nuclear non-proliferation and radiation security, as required by legislation and international agreements. This subprogramme also administers the use of nuclear material, related equipment and facilities, including nuclear technology, to ensure compliance with legislation and international agreements.

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of crude oil barrels maintained as per ministerial directive per year	Strategic stock and oil pollution control	Entity mandate	0	0	10.3 million	10.3 million	10.3 million	10.3 million	10.3 million
Number of megatons (Mt) of coal produced/sold at Vlakfontein by the African Exploration Mining and Finance Corporation per year	Mining, coal		1.74 Mt	2.5 Mt	2.54 Mt	4.35 Mt	4.35 Mt	4.35 Mt	4.35 Mt
Number of reportable environmental incidents at the African Exploration Mining and Finance Corporation per year	Mining, coal		2	2	2	2	2	2	2

#### Entity overview

The Central Energy Fund is listed in schedule 2 of the Public Finance Management Act (1999), and is governed by the Central Energy Fund Act (1977) and the Companies Act (2008). Its mandate is to research, finance, develop and exploit appropriate energy solutions to contribute to South Africa's security of energy supply. Through its subsidiaries, the fund is also mandated to finance and promote the acquisition of coal; exploit coal deposits; manufacture liquid fuel, oil and other products from coal; market these products; and acquire, generate, manufacture, market, distribute or research any other form of energy. The fund's subsidiaries are the Petroleum Oil and Gas Corporation of South Africa (PetroSA), the South African Gas Development Company (iGas), Petroleum Agency South Africa, Oil Pollution Control South Africa, the Strategic Fuel Fund, the African Exploration Mining and Finance Corporation, ETA Energy Solutions and CCE Solutions.

Over the medium term, the entity will continue its efforts to stabilise PetroSA financially and strategically through implementing the corporation's turnaround plan. It will also support and implement the consolidation of PetroSA, the Strategic Fuel Fund and iGas into a national oil company. The proposal for this has been approved by Cabinet and the consolidation process is under way. During this process, the entity will consider ways to increase organisational efficiency and productivity across the group by optimising business processes through interventions such as the development of automated and digital solutions.

Total expenditure is expected to increase at an average annual rate of 6.5 per cent, from R29.3 billion in 2022/23 to R35.4 billion in 2025/26. The *oil and gas (national oil company)* programme, which among other things involves exploration, production, refining and trading, accounts for 92.1 per cent (R92.1 billion) of the entity's expenditure over the medium term, as most of its activities are in these sectors. Spending on compensation of employees accounts for an estimated 5.7 per cent (R5.6 billion) of total expenditure, increasing at an average

annual rate of 6.8 per cent over the medium term. As the entity will need to obtain external funding for its capital investments, interest payments during the period ahead are expected to amount to R1.1 billion.

The fund expects to generate 95.7 per cent (R97.1 billion) of its revenue over the period ahead through commercial activities and the balance through other sources such as dividends and interest. Total revenue is expected to increase at an average annual rate of 8.2 per cent, from R29 billion in 2022/23 to R36.7 billion in 2025/26, mostly driven by PetroSA's anticipated recovery as a result of the implementation of the turnaround plan; and dividends from the investment in the Republic of Mozambique Pipeline Company.

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of papers published in conference proceedings per year	Statutory projects	Entity mandate	47	66	32	70	40	55	40
Number of peer-reviewed articles published per year	Statutory projects		41	33	30	32	34	40	40
Number of applied geoscience products for infrastructure, land use, health, groundwater and the environment per year	Statutory projects		0	10	7	6	11	13	14
Percentage of onshore geoscience map coverage per year	Statutory projects		0	9% (173 / 1 916)	10.7% (205 / 1 916)	12%	16%	19%	21%
Percentage of offshore geoscience map coverage per year	Statutory projects		0	0.05% (1/1 828)	0.05% (1/1 828)	0.2%	0.3%	0.5%	0.6%
Number of Council for Geoscience publications per year	Statutory projects		12	10	8	8	10	12	12

### Entity overview

The Council for Geoscience was established in terms of the Geoscience Act (1993) to promote the search for and exploitation of minerals in South Africa. Its mandate is to generate, compile, curate and publish world-class geoscience knowledge products, provide geoscience-related services to the South African public and industry, and render advisory services related to geohazards and geo-environmental pollution. The data generated by the council enables key activities such as the assessment of environmental impacts from mining, geohazards and shale gas development.

Total expenditure over the medium term is expected to amount to R2.4 billion, increasing at an average annual rate of 14 per cent, mostly as a result of additional funding of R200 million in 2023/24 and R300 million in 2024/25 for onshore and offshore mapping. Compensation of employees accounts for an estimated 53.3 per cent (R1.2 billion) of this amount because the entity requires highly specialised skills to fulfil its mandate. Spending on compensation of employees is expected to increase at an average annual rate of 8.5 per cent, from R342.1 million in 2022/23 to R436.6 million in 2025/26, to cater for the expected increase in the council's provision of geoscientific mapping and research services. Spending on goods and services, mostly for project costs, accounts for a projected 43.3 per cent (R1.1 billion) of expenditure over the MTEF period.

The council derives 80.6 per cent (R1.9 billion) of its revenue over the medium term through transfers from the department and the balance through fees charged for the provision of geoscientific mapping and research services.

**Entity overview**

The Mine Health and Safety Council was established in terms of the Mine Health and Safety Act (1996). It is mandated to advise the Minister of Mineral Resources and Energy on occupational health and safety at mines, develop legislation, conduct research and liaise with other statutory bodies. The council operates through a partnership between organised labour, employers and the Department of Mineral Resources and Energy.

The council will continue to focus on conducting research to provide solutions to occupational health and safety challenges. This entails developing technology to reduce noise in machines, and developing drone technology with a focus on wireless communication systems, surveying, mapping and navigation, health, safety and security, and integration for smart mining.

Expenditure is set to increase at an average annual rate of 4.4 per cent, from R120.6 million in 2022/23 to

R137.4 million in 2025/26. Spending on compensation of employees accounts for 53.9 per cent (R212.1 million) of total expenditure, while spending on goods and services, mostly for research, accounts for 38.3 per cent (R150.2 million). The council derives 95.7 per cent (R377.6 million) of its revenue over the period ahead through levies from mining companies. Transfers from the department account for an estimated 3.8 per cent (R14.9 million) of revenue over the medium term.

### Entity overview

Mintek's mandate, as set out in the Mineral Technology Act (1989), is to maximise the value derived from South Africa's mineral resources through, among other things, research and development, technology transfer, and the creation of an enabling environment for the establishment and expansion of mineral industries. To this end, Mintek develops appropriate, innovative technology for transfer to the industry, and provides test work, consultancy, analytical and mineralogical services to clients around the world.

Skilled personnel are key to the execution of meaningful research. As a result, an estimated 52.3 per cent (R926.5 million) of the entity's budget over the medium term is allocated for compensation of employees. Mintek will also continue with programmes to increase the academic qualifications of researchers and provide the necessary platforms to increase experience levels. Spending on goods and services is expected to amount to R693.5 million (39.4 per cent of total expenditure) over the MTEF period, which includes specialised service fees to produce research. An amount of R387 million over the period is allocated for the rehabilitation of ownerless and derelict asbestos mines and holings. Expenditure is expected to increase at an average annual rate of 0.6 per cent, from R587.7 million in 2022/23 to R599.1 million in 2025/26.

The entity derives 48.7 per cent (R869.2 million) of its revenue over the medium term through transfers from the department and 48.3 per cent (R856.3 million) through commercial activities. Revenue is set to increase at an average annual rate of 0.8 per cent, from R590.2 million in 2022/23 to R640.3 in 2025/26. To address low growth, Mintek has established a division for technology transfer, which will facilitate the movement of research projects to commercialise and provide these solutions to industry.

### Entity overview

The National Energy Regulator of South Africa was established in terms of the National Energy Regulator Act (2004) and is listed as a schedule 3A public entity in terms of the Public Finance Management Act (1999). The entity is mandated to regulate the electricity industry in terms of the Electricity Regulation Act (2006), the piped gas industry in terms of the Gas Act (2001), and the petroleum pipelines industry in terms of the Petroleum Pipelines Act (2003).

The regulator's focus over the medium term will continue to be on ensuring: the security, accessibility and affordability of energy supply; and fair competition and regulatory certainty in the energy sector. It plans to do this by setting and approving energy tariffs, licensing and registering energy service providers, and monitoring and enforcing compliance with regulations. To support these activities, expenditure is expected to increase at an average annual rate of 7.3 per cent, from R396.8 million in 2022/23 to R490.6 million in 2025/26.

The regulator derives its revenue mainly through licence fees and levies on the electricity, piped gas and petroleum pipeline sectors, and through interest earned on investments. Total revenue is expected to increase at an average annual rate of 13.3 per cent, from R337 million in 2022/23 to R490.6 million in 2025/26.

### Entity overview

The National Nuclear Regulator derives its mandate from the National Nuclear Regulator Act (1999), which requires it to regulate safety standards for nuclear activities in South Africa. This includes establishing safety standards and regulatory practices, ensuring nuclear installations are safe by enforcing regulatory control, granting nuclear authorisations, conducting compliance inspections, and ensuring that provisions are in place for nuclear emergency planning.

As the regulator relies on personnel with highly specialised skills to fulfil its mandate, compensation of employees is expected to account for 63.5 per cent (R700 million) of total spending over the medium term. Total expenditure is expected to increase at an average annual rate of 5 per cent, from R330.9 million in 2022/23 to R383 million in 2025/26.

The regulator expects to generate 68.2 per cent (R753.3 million) of its revenue over the MTEF period through operator licence fees and 13.6 per cent (R147.3 million) through transfers from the department. To supplement its revenue, the regulator will explore models for charging for the services it provides through its Centre for Nuclear Safety and Security, such as education, training and research.

### Entity overview

The National Radioactive Waste Disposal Institute was established in terms of the National Radioactive Waste Disposal Institute Act (2008) to manage the disposal of radioactive waste at the national level. The institute is responsible for the long-term care and disposal of radioactive waste in a safe, technically sound, socially acceptable, environmentally responsible and economically feasible manner.

Over the medium term, the institute will focus on finalising the Vaalputs functional shift, in particular the nuclear installation licence, so that it can begin operating and managing the facility, and generate revenue by providing waste disposal and related services to waste generators. The institute will seek to establish an above-ground centralised interim storage facility to address the national inventory of radioactive intermediate-level waste, high-level waste, long-lived waste, spent or used nuclear fuel and disused sealed radioactive sources.

Expenditure is set to increase at an average annual rate of 2.9 per cent, from R51.9 million in 2022/23 to R56.5 million in 2025/26. An estimated 81.4 per cent (R131.8 million) of the institute's spending over the medium term is on compensation of employees, while goods and services constitutes 16.3 per cent (R27.2 million) of its budget. Revenue, which is derived almost entirely from departmental transfers, is expected to increase in line with spending.

1. No historical data available.

**Entity overview**

The South African Diamond and Precious Metals Regulator was established in terms of section 3 of the Diamonds Act (1986), with a mandate to implement and enforce the provisions of that act, the Precious Metals Act (2005), the Diamond Export Levy (Administration) Act (2007) and the Diamond Export Levy Act (2007). The regulator's core functions include facilitating the buying, selling, exporting and importing of diamonds through its Diamond Exchange and Export Centre; and regulating the acquisition, possession, smelting, refining, beneficiation, use and disposal of precious metals.

Expenditure is expected to increase at an average annual rate of 3.3 per cent, from R113.9 million in 2022/23 to R125.6 million in 2025/26. As a regulatory authority, the entity relies on its personnel to perform compliance inspections and audits in the diamond and precious metals industry. Accordingly, compensation of employees constitutes an estimated 73.3 per cent (R266.9 million) of expenditure over the medium term.

Transfers from the department are expected to account for 53.8 per cent (R198 million) of revenue over the medium term, while fees – mostly for licences and permits – are expected to generate 44.2 per cent

(R165.5 million). Revenue is expected to increase at an average annual rate of 4.1 per cent, from R114.5 million in 2022/23 to R129 million in 2025/26.

Number of commercially viable cleantech solutions progressed to active business incubation and/or deployment per year	Cleaner mobility		1	1	1	1	1	1	1

1. No historical data available.

### Entity overview

The South African National Energy Development Institute was established in terms of the National Energy Act (2008). It is mandated to direct, monitor and conduct applied energy research and development, and demonstrate and deploy specific measures to promote the uptake of green energy and energy efficiency in South Africa.

Expenditure is expected to amount to R278.7 million over the medium term. It is expected to decrease at an average annual rate of 8.5 per cent, from R125.2 million in 2022/23 to R96 million in 2025/26, due to donor funding for completed projects not carrying over into the medium term.

The institute derives 93.2 per cent (R258.1 million) of its medium-term revenue through transfers from the department and other sources such as donor funding and funding from the Department of Science and Innovation for energy research. Revenue is expected to decrease at an average annual rate of 8.5 per cent, from R125.2 million in 2022/23 to R96 million in 2025/26, due to the receipt of one-off allocations for European Union-funded projects. These include achieving net-zero energy in wastewater treatment plants in South Africa and improving the energy performance of government buildings.

Number of product and process innovations per year	Business continuity and efficiency		8	8	6	6	6	6	6

### Entity overview

The South African Nuclear Energy Corporation derives its mandate from the Nuclear Energy Act (1999), the nuclear energy policy and directives conferred on it by the Minister of Mineral Resources and Energy. It is listed as a schedule 2 public entity in terms of the Public Finance Management Act (1999). The corporation's subsidiaries include international fluorochemical producer Pelchem; radiopharmaceutical and radioisotope producer Nuclear Technologies Product Radioisotopes; and Pelindaba Enterprises, which specialises in the manufacturing of power-generation components. The corporation operates the SAFARI-1 nuclear reactor for research, technology development and the production of radioisotopes; is responsible for the decommissioning and decontamination of old nuclear facilities; and contributes to South Africa's obligations in terms of international nuclear treaties and agreements.

Over the medium term, the corporation will focus on the production of nuclear medicine and industrial isotopes and fluorochemical products; nuclear and industrial manufacturing; radiation applications; research and development for new products; and the provision of support for nuclear power generation. While doing this, it will seek to rationalise the group to leverage synergies and remove unnecessary duplications. The corporation will continue to provide support for the decommissioning and decontamination of disused nuclear facilities, and work on a replacement for the SAFARI-1 nuclear reactor, which is expected to reach the end of its useful life in 2030. In the meantime, the reactor is expected to be operational for 287 days per year to allow the corporation to comply with international safety requirements and maintain radiation doses within acceptable levels.

Expenditure is set to increase at an average annual rate of 6 per cent, from R2.4 billion in 2022/23 to R2.9 billion in 2025/26. The corporation relies on highly skilled personnel to carry out these activities. Accordingly, compensation of employees accounts for an estimated 47.3 per cent (R3.9 billion) of total expenditure. Spending on goods and services accounts for an estimated 48 per cent (R4 billion), mainly for the production of medical radioisotopes.

The corporation expects to derive 68.7 per cent (R6 billion) of its revenue over the medium term through the sale of nuclear technology products, chemical products and nuclear engineering services, and the balance mostly through departmental transfers. These transfers fund operational requirements and specific activities such as the decommissioning of strategic plants, waste management at all disused nuclear facilities, the production and use of low-enriched uranium fuel, and nuclear safety. Revenue is projected to increase from R2.4 billion in 2022/23 to R3.1 billion in 2025/26, at an average annual rate of 8.3 per cent.

**Entity overview**

The State Diamond Trader’s mandate, as defined in the Diamonds Amendment Act (2005), is to promote equitable access to and local beneficiation for the country’s diamonds. The trader is mandated to conduct research, develop a client base, contribute to the growth of the local diamond beneficiation industry, and

develop efficient ways to market diamonds not suitable for local beneficiation.

Expenditure is set to increase at an average annual rate of 2.1 per cent, from R824.7 million in 2022/23 to R877.9 million in 2025/26. Goods and services account for 97.8 per cent (R2.5 billion) of total expenditure, mostly for the procurement of rough diamonds as the trader will contribute to the growth of the local diamond beneficiation industry and increase the sale of rough diamonds to historically disadvantaged South Africans.

Travel costs are expected to increase over the period ahead due to inspections and participation in local and international diamond trade shows. Revenue is generated entirely from sales, increasing at an average annual rate of 2 per cent, from R829.1 million in 2022/23 to R880 million in 2025/26.

### Vote purpose

Realise the full potential of science and technology in social and economic development by developing human resources, research and innovation.

### Mandate

The Department of Science and Innovation derives its mandate from the 1996 White Paper on Science and Technology, which introduced the concept of the national system of innovation – a set of interacting organisations and policies through which South Africa creates, acquires, diffuses and puts into practice new knowledge to help achieve individual and collective goals. A coordinated and efficient national system of innovation will help the country achieve its national development priorities by promoting change through innovation, and enable all South Africans to enjoy the economic, sociopolitical and intellectual benefits of science, technology and innovation.

## Expenditure overview

Over the medium term, the department plans to focus on providing funding for research infrastructure to strengthen South Africa's research and innovation capabilities, including implementing the national space strategy; developing human capital; and advancing innovation to improve South Africa's competitiveness in the global market through measures such as supporting emerging farmers.

The department's expenditure is expected to increase at an average annual rate of 3.4 per cent, from R9.1 billion in 2022/23 to R10.1 billion in 2025/26. Transfers and subsidies account for an estimated 94 per cent (R29.7 billion) of total expenditure over the MTEF period. The second-largest cost driver is compensation of employees, spending on which increases from R357.7 million in 2022/23 to R403.8 million in 2025/26 at an average annual rate of 4.1 per cent.

### **Strengthening research infrastructure and innovation capabilities**

In recognising that the availability of adequate research infrastructure is vital for the development of a robust and competitive national system of innovation, the department will continue to fund projects that are in line with the South African research infrastructure roadmap. These include constructing large national infrastructure platforms and facilities; acquiring scientific equipment; and developing pilot plants, technology demonstrators and specialised facilities such as drug development and aerospace platforms. In support of this, the department is allocated R3.9 billion over the period ahead in the *Basic Science and Infrastructure* subprogramme in the *Research Development and Support* programme.

The department's work is also geared towards strengthening research capabilities. Key among these are the South African National Space Agency's space infrastructure hub project, a multiyear infrastructure development project that involves the development of space infrastructure such as satellite imagery to map geographical information, satellite-based augmentation systems and earth observation satellites; and the Square Kilometre

Array, which is a global endeavour to construct the world's largest and most sensitive wavelength radio telescope. These initiatives are supported by additional allocations over the MTEF period of R1.2 billion to the South African National Space Agency for the space infrastructure hub project and R1.3 billion to the South African Radio Astronomy Observatory for the expansion of the Square Kilometre Array in the *Space Science* subprogramme in the *Technology Innovation* programme.

### **Developing human capital**

Human capital is key to the development of a national system of innovation that is globally competitive and responsive to South Africa's developmental needs. In recognition of this, the department provides support through granting postgraduate bursaries and scholarships; sponsoring internships; and funding emerging and established researchers, including for strategic instruments such as the South African research chairs initiative and centres of excellence projects. To date, the department has awarded 257 research chairs, 240 of which are operational. Centres of excellence serve as hubs that draw a range of universities and science councils together to tackle challenges in areas such as health, food security, human development, energy and biodiversity. In support of these efforts, R8.7 billion is allocated over the MTEF period to the *Human Capital and Science Promotions* subprogramme in the *Research, Development and Support* programme.

### **Advancing innovation to improve South Africa's competitiveness in the global market**

Over the medium term, the department plans to advance innovation and address key competitiveness challenges, including market sustainability and facilitating access to new export markets. To achieve this, it intends to support 15 commercial outputs in designated areas such as health care and 85 technology demonstrations, prototypes, products and services each year over the period ahead. These include locally developed fermentation-based skin care products and cotton baling machines for small-scale farmers. The department also plans to financially support black emerging farmers; train artisans in the space, energy and bioeconomy sectors; train graduates through experiential learning opportunities in the energy sector; and support learnership initiatives in publicly financed research and development institutions. Spending for these initiatives is expected to amount to R6.8 billion over the MTEF period in the *Technology Innovation* programme.

## Programme 2: Technology Innovation

### Programme purpose

Enable research and development in space science and technology, energy security and the bioeconomy, and in the emerging and converging areas of nanotechnology, robotics, photonics and indigenous knowledge systems, to promote the realisation of commercial products, processes and services. Promote the protection and use of intellectual property, technology transfer and technology commercialisation through the implementation of enabling policies and interventions along the entire innovation value chain.

### Objectives

- Facilitate and make strategic investments in space science and technology, energy, the bioeconomy, nanotechnology, robotics, photonics, indigenous knowledge systems, intellectual property management, technology transfer and technology commercialisation over the medium term by:
  - funding and/or maintaining 60 instruments to support the use of knowledge
  - generating 366 knowledge products (including published peer-reviewed scientific articles and the filing of applications for, or the registration or granting of, intellectual property rights)
  - developing and approving 14 science, technology and innovation strategic policy directives to enhance understanding and analyses that support the implementation of relevant interventions
  - developing and/or maintaining 12 decision support interventions to improve the delivery of government services or functions.

## Subprogrammes

- *Space Science* supports the creation of an environment conducive to the implementation of the national space strategy and the South African Earth observation strategy, and one that addresses the development of innovative applications and human capital to respond to national priorities and support socioeconomic development.
- *Hydrogen and Energy* supports a reduction in greenhouse gas emissions and air pollution while contributing to a more diverse and sustainable energy mix by enabling the widespread commercialisation of battery, fuel cell, renewable and net-zero carbon technologies. The implementation of the energy research development and innovation strategies also supports the penetration of clean and alternative energy technologies through research, development and validation efforts to be competitive with current technologies in terms of cost and performance. It also encourages the fostering of strategic partnerships between the public and private sectors to reduce institutional and market barriers to the commercialisation of these technologies.
- *Bio-innovation* leads the implementation of the national bioeconomy strategy approved by Cabinet in 2013. This aids projects, programmes and initiatives in support of bio-innovation in agriculture, health, industry, the environment and indigenous knowledge systems with the goal of growing the South African bioeconomy.
- *Innovation Priorities and Instruments* supports and strengthens the innovation policy package aimed at creating and sustaining an enabling environment for innovation, technology and development, and the commercialisation of publicly funded research and development initiatives.
- *National Intellectual Property Management Office* provides for the effective use of intellectual property that emanates from publicly financed research and development.
- *Office of the Deputy Director-General: Technology Innovation* provides management and administrative support to the programme and the office of the deputy director-general.

## Programme 3: International Cooperation and Resources

### Programme purpose

Strategically develop, promote and manage international partnerships that strengthen the national system of innovation. Enable an exchange of knowledge, capacity and resources between South Africa and its international partners, with a focus on building capacity to support science, technology and innovation in Africa. Support South African foreign policy through science diplomacy.

### Objectives

- Maximise South Africa's strategic interests in science, technology and innovation through international cooperation and promote a transformed, inclusive, responsive and coherent national system of innovation by leveraging resources through 129 projects with donor funders by March 2025.
- Develop human capabilities and skills for the economy by securing opportunities for 1 270 South African students to participate in international programmes over the medium term.
- Use knowledge for economic development in revitalising existing industries and stimulating research and development-led industrials by supporting 51 initiatives targeting the objectives of Agenda 63 and 51 initiatives focused on the Southern African Development Community's regional indicative strategic development plan by March 2025.
- Support innovation within a capable state by engaging with 36 science, technology and innovation leaders in multilateral forums by March 2025.

### Subprogrammes

- *Multilateral Cooperation and Africa* advances and facilitates South Africa's participation in bilateral science, technology and innovation cooperation initiatives with other African partners; in African multilateral programmes, especially those of the Southern African Development Community and the African Union; and in broader multilateral science, technology and innovation partnerships, with a strategic focus on South-South cooperation.
- *International Resources* works to increase the flow of international funding into South African science, technology and innovation initiatives, as well as African regional and continental programmes, to promote foreign investment and the fostering of strategic partnerships with partners such as the European Union, philanthropic foundations and organisations, and the multinational private sector.
- *Overseas Bilateral Cooperation* promotes and facilitates South Africa's bilateral cooperation on science, technology and innovation cooperation with partners in Europe, the Americas, Asia and Australasia, especially for human capital development and collaborative research and innovation; and secures support for cooperation with other African partners.
- *Office of the Deputy Director-General: International Cooperation and Resources* provides management and administrative support to the programme and the office of the deputy director-general.

## Programme 4: Research Development and Support

### Programme purpose

Provide an enabling environment for research and knowledge production that promotes the strategic development of basic sciences and priority science areas through the promotion of science human capital development, and the provision of research infrastructure and relevant research support, in pursuit of South Africa's transition to a knowledge economy.

### Objectives

- Contribute to the development of representative, high-level human capital that can pursue locally relevant, globally competitive research and innovation activities over the medium term by:
  - awarding 9 600 bursaries to doctoral students
  - awarding 12 000 bursaries to pipeline postgraduate (BTech, honours and masters) students.
  - placing 2 250 graduates and students in department-funded work preparation programmes in science, engineering and technology institutions.
- Contribute to a transformed, inclusive, responsive and coherent national system of innovation by:
  - maintaining the number of research infrastructure grants at 30 over the medium term
  - increasing the total available broadband capacity provided by the South African National Research Network from 6 500 Gbps in 2023/24 to 7 100 Gbps in 2025/26.
- Increase knowledge generation and innovation output by:
  - maintaining the total number of researchers awarded grants through programmes managed by the National Research Foundation at more than 10 500 over the medium term
  - maintaining the number of research articles published by researchers funded by the National Research Foundation and cited in the Web of Science database at more than 23 400 over the medium term
  - completing the production of the L-band receivers for the additional MeerKAT antennae by 2023/24 and installing the receivers by 2024/25
  - installing 4 MeerKAT extension antennae by 2023/24 and 9 MeerKAT extension antennae by 2024/25, and fully commissioning and integrating 13 MeerKAT antennae with the 64-dish MeerKAT telescope by 2025/26
  - conducting 45 initiatives promoting public awareness of and engagement with science over the medium term
  - publishing the South African public relationship with science survey report by 2023/24 and conducting a country comparison study by 2025/26.

## Subprogrammes

- *Human Capital and Science Promotions* formulates and implements policies and strategies that address the availability of human capital for science, technology and innovation; provides fundamental support for research activities; and contributes to the development of a society that is scientifically literate and knowledgeable about science.
- *Science Missions* promotes the development of research, the production of scientific knowledge and human capital in science areas in which South Africa enjoys a geographic advantage.
- *Basic Science and Infrastructure* facilitates the strategic implementation of research and innovation equipment and facilities to promote knowledge production in areas of national priority and sustain innovation led by research and development.
- *Astronomy* supports the development of astronomical sciences around a new multi-wavelength astronomy strategy and provides strategic guidance and support to relevant astronomy institutions for the implementation of strategic astronomy programmes.
- *Office of the Deputy Director-General: Research, Development and Support* provides management and administrative support to the programme and the office of the deputy director-general.

## Programme 5: Socioeconomic Innovation Partnerships

### Programme purpose

Enhance government's growth and development priority areas through targeted science and technology-based innovation interventions, and the development of strategic partnerships with other government departments, industry, research institutions and communities.

### Objectives

- Inform and influence how science and technology can be used to achieve inclusive development through knowledge, evidence and learning over the medium term by:
  - publishing 30 knowledge products on innovation for inclusive development
  - maintaining and improving 14 decision support systems
  - generating 46 learning interventions.
- Identify, grow and sustain niche, high-potential science, technology and innovation capabilities for sustainable development and the greening of society and the economy by fully funding and co-funding 384 honours, masters and doctoral students, and adding 30 knowledge and innovation products to the intellectual property portfolio over the medium term.
- Identify, grow and sustain niche, high-potential science, technology and innovation capabilities that improve the competitiveness of existing industries with growth potential in aerospace, advanced manufacturing, chemicals, advanced metals, mining, ICT and sector innovation funds; and facilitate the development of new targeted industries led by research and development over the medium term by:
  - fully funding or co-funding 1 465 masters and doctoral students, and 600 interns
  - adding 145 knowledge and innovation products to South Africa's intellectual property portfolio
  - funding 15 instruments in support of increased localisation, competitiveness and industrial development led by research and development.
- Introduce and manage interventions and incentive programmes that increase the level of private-sector investment in scientific or technological research and development by providing pre-approval decisions within 90 days of the date of receipt of applications for the research and development tax incentive on an ongoing basis.

### Subprogrammes

- *Sector Innovation and Green Economy* provides policy, strategy and direction for growth in strategic sectors of the economy led by research and development, and supports the transition to a green economy.
- *Innovation for Inclusive Development* supports the development of science and technology-based innovations for tackling poverty, including the creation of sustainable jobs and human settlements and the enhanced delivery of basic services.
- *Science and Technology Investment* leads and supports the development of indicators and instruments for monitoring investments in science and technology, the performance of the national system of innovation, and ways of strengthening policy in relation to the national system of innovation.
- *Technology Localisation, Beneficiation and Advanced Manufacturing* funds development programmes for technology and innovation to advance strategic and sustainable economic growth, sector development priorities and service delivery over the medium and long terms.
- *Office of the Deputy Director-General: Socioeconomic Innovation Partnership* provides management and administrative support to the programme and the office of the deputy director-general.

#### Entity overview

The Academy of Science of South Africa was established in terms of the Academy of Science of South Africa Act (2001), as amended, to promote outstanding achievements in all fields of scientific inquiry, recognise excellence, and provide evidence-based scientific advice to government and other stakeholders.

Over the medium term, the academy aims to enhance South Africa's capacity to produce and publish research, provide evidence-based policy advice to government, and increase the quality and visibility of South African research publications. This entails undertaking various consensus studies in the categories of health, education, climate change, energy, the science-policy nexus, biosafety and biosecurity, poverty reduction, gender-responsive issues, young people and people with disabilities. To complement this work, the academy aims to host 15 lectures on scientific topics, form 12 strategic partnerships with players in the science community and publish 6 journal titles on the Scientific Electronic Library Online open-access platform over the MTEF period.

Expenditure is expected to increase at an average annual rate of 3 per cent, from R35.5 million in 2022/23 to R38.8 million in 2025/26. Transfers from the department account for an estimated 95.4 per cent (R106.6 million) of total revenue over the period ahead, increasing from R33.8 million in 2022/23 to R37.1 million in 2025/26 at an average annual rate of 3.1 per cent.

### Entity overview

The Council for Scientific and Industrial Research was established in 1945 and is governed in terms of the Scientific Research Council Act (1988). The council fosters industrial and scientific development in the national interest through multidisciplinary research and technological innovation to improve the ability of the state to efficiently deliver basic services in fields such as health, education, social security, energy and shelter to all South Africans, and, in doing so, reduce inequality.

Over the medium term, the council will focus on conducting high-quality and relevant research, pursuing technological innovation to foster industrial and scientific development, and building on industrial development opportunities in fields such as pharmaceutical innovation and agro-processing. To achieve this, the council aims to support 56 registered patents and publish 960 journal articles over the medium term. The council also plans to implement a range of research, development and innovation programmes in areas such as health, energy, defence and security. Spending on these activities amounts to an estimated R8.4 billion over the MTEF period.

As the council's work requires highly specialised skills and is labour intensive, spending on compensation of employees accounts for 55.6 per cent (R5.6 billion) of planned expenditure over the medium term, increasing at an average annual rate of 9.1 per cent, from R1.7 billion in 2022/23 to R2.1 billion in 2025/26.

Transfers from the department account for an estimated 22.2 per cent (R2.3 billion) of the council's total revenue over the period ahead. The remainder is set to be generated from services rendered, such as contract research and development, income from intellectual property, proceeds from technology transfers, and royalties. Total revenue over the period ahead is projected to be R10.8 billion.

Number of curated datasets downloaded for secondary use per year	Administration		608	556	574	574	603	605	608
Number of historically disadvantaged institutions with which the council has actively collaborated per year	Administration	Priority 3: Education, skills and health	- <sup>1</sup>	6	6	6	7	7	7
Percentage of researchers (excluding trainees) with PhDs per year	Administration		- <sup>1</sup>	78% (327/420)	78% (327/420)	78%	78%	78%	78%
Number of PhD trainees per year	Administration		47	31	27	28	30	32	35
Number of peer-reviewed journal articles published per Human Sciences Research Council researcher per year	Research, development and innovation	Priority 1: A capable, ethical and developmental state	0.78	1.17	1.17	1.1	1.1	1.1	1.1
Number of scholarly book chapters published by council researchers per year	Research, development and innovation		86	118	40	48	49	50	50
Number of policy briefs and/or evidence reviews completed and published per year	Research, development and innovation		12	12	18	12	12	13	13
Number of community innovations supported or enabled by Human Sciences Research Council research per year	Research, development and innovation		- <sup>1</sup>	1	1	1	1	1	1
Number of incoming international exchange visits or fellowships active per year	Research, development and innovation	Priority 7: A better Africa and world	7	4	7	6	8	8	8

1. No historical data available.

### Entity overview

The Human Sciences Research Council was established in 1968 to undertake, promote and coordinate research in the human and social sciences. The council is mandated to initiate, undertake and foster strategic, basic and applied research in human sciences; and address developmental challenges by gathering, analysing and publishing relevant data, especially through projects linked to collaborative programmes geared towards the public sector. The council's research outputs are widely disseminated to support policy development at all levels of government. Over the medium term, the council will continue to focus on producing research that serves the public; contributing to good governance and public service delivery; helping to address the challenges of poverty, inequality and unemployment; and building the capacity of scholars and researchers.

Human capital is essential for the council to produce research outputs, for fundraising and to implement contract research projects. As such, spending on compensation of employees accounts for an estimated 47.3 per cent (R932.9 million) of the council's total expenditure over the medium term, increasing at an average annual rate of 4.6 per cent, from R283.6 million in 2022/23 to R324.7 million in 2025/26.

The council is set to receive 50.4 per cent (R1 billion) of its revenue through transfers from the department, increasing at an average annual rate of 8 per cent, from R279.2 million in 2022/23 to R351.5 million in 2025/26. It plans to generate the remainder of its projected revenue through research contracts and grants from national and international agencies, government departments and private-sector foundations.

### Entity overview

The National Research Foundation was established in terms of the National Research Foundation Act (1998), as amended. In terms of this legislation, the foundation is mandated to fund research, develop human resources and provide research facilities to enable knowledge creation, innovation and development in all fields of science and technology. It is also mandated to promote indigenous knowledge.

Over the MTEF period, the foundation will focus on implementing its 10-year strategy, Vision 2030. This involves interventions to catalyse transformation in the science and technology system through measures such as creating grant funding instruments that focus on women and black researchers; scaling up the development of a research and innovation workforce for renewing, regenerating and replenishing the cohort of South African researchers; establishing a transformed knowledge workforce with a greater diversity of people and ideas to lead the knowledge enterprise; and advancing the international competitiveness of the scientific workforce.

An estimated R5.4 billion over the MTEF period is allocated for capital expenditure. Included in this amount is R1.3 billion in new funding for major infrastructure investments for the Square Kilometre Array, which includes the science processing and regional centres, the science operations centre building, the engineering operations centre building, and fencing for the MeerKAT national park. Expenditure is expected to increase at an average annual rate of 5.3 per cent, from R4.3 billion in 2022/23 to R5 billion in 2025/26.

The foundation receives funding primarily through transfers from the department, which accounts for an estimated 88.6 per cent (R14.4 billion) of projected revenue over the MTEF period. These are expected to increase at an average annual rate of 1.5 per cent, from R4.3 billion in 2022/23 to R4.5 billion in 2025/26, due to the additional funding for infrastructure investments in the Square Kilometre Array. The remainder of the foundation's revenue is set to be derived through contract funding from other government departments and entities for specific projects and programmes, and income from sales and interest.

### Entity overview

The South African National Space Agency was established in terms of the South African National Space Agency Act (2008). The agency became operational in 2010 and is broadly required to promote the peaceful use of space, foster international cooperation in space-related activities, and facilitate the creation of an environment conducive to space technology and industrial development.

Space services provide an indispensable tool for the formulation of government decisions and policies by helping to provide knowledge on and address challenges in industries such as agriculture, water, energy, health, safety and security. Over the medium term, the agency will continue to focus on activities that ensure that these services are integrated into service delivery. Key among these is the space infrastructure hub project, where the agency plans to develop spacecraft and ground segment infrastructure to support deep space operations, earth observation and space science operations. The build phase to develop satellites is expected to begin in 2023/24 and operations in 2024/25. The agency is allocated an additional R775 million in 2023/24 and R434 million 2024/25 for this purpose.

The agency's expenditure is expected to decrease at an average annual rate of 16.5 per cent, from R563.4 million in 2022/23 to R327.5 million in 2025/26, due to one-off allocations of R774 million in 2023/24 and R434 million in 2024/25 for the space infrastructure hub project. As the agency relies on highly skilled professionals to fulfil its mandate, compensation of employees comprises an estimated 34.6 per cent (R651.4 million) of total spending over the period ahead.

Transfers from the department account for an estimated 75.2 per cent (R1.9 billion) of the agency's revenue over the period ahead, decreasing at an average annual rate of 11.9 per cent, from R343.8 million in 2022/23 to R235.4 million in 2025/26, as a result of the additional allocation for the space infrastructure hub project.

**Entity overview**

The Technology Innovation Agency draws its mandate from the Technology Innovation Agency Act (2008), as amended. The agency serves as the key institutional intervention to bridge the innovation gap between research and development outcomes from higher education institutions, science councils, public entities and private companies to maximise the potential of technological innovation for stimulating the economy.

Over the medium term, the agency will continue to focus on bridging the innovation gap between research and development; supporting technologies within the national system of innovation; scaling up all strategic programmes by increasing the pace at which applications and internal processes occur; creating a conducive environment for engaging with innovators, stakeholders and suppliers; adopting measures to support small, medium and micro enterprises in the sector; and increasing the participation of marginalised segments of society. To give effect to this focus, over the next 3 years, the agency aims to license 70 technological innovations, launch 101 products into the market and ensure that 24 technology innovations are operational and functional.

Transfers, mainly for supporting small, medium and micro enterprises with the commercialisation of innovative technologies, account for an estimated 72.7 per cent (R1.4 billion) of the agency's planned expenditure over the period ahead. Expenditure is set to increase at an average annual rate of 0.2 per cent, from R649.8 million in 2022/23 to R653.4 million in 2025/26. As human resources are central to the agency's operations, spending on compensation of employees accounts for an estimated 19.2 per cent (R367.5 million) of expenditure, increasing from R120.2 million in 2022/23 to R126.1 million in 2025/26 at an average annual rate of 1.6 per cent.

The agency receives most of its revenue through transfers from the department. These are set to increase at an average annual rate of 0.1 per cent, from R634.8 million in 2022/23 to R632.5 million in 2025/26.

 Website: [www.dsbd.gov.za](http://www.dsbd.gov.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Lead and coordinate an integrated approach to the promotion and development of entrepreneurship among small, medium and micro enterprises and cooperatives, and ensure an enabling legislative and policy environment to support their growth and sustainability.

### Mandate

The Department of Small Business Development is tasked with leading and coordinating an integrated approach to the promotion and development of entrepreneurship, small businesses and cooperatives; and ensuring an enabling legislative and policy environment to support their growth and sustainability. The realisation of this mandate is expected to lead to a transformed and inclusive economy driven by sustainable and innovative small, medium and micro enterprises (SMMEs) and cooperatives. The department's mandate is guided by a legislative framework that includes:

- section 3(d) of the Industrial Development Corporation Act (1940)
- the National Small Enterprise Act (1996)
- the National Small Business Amendment Act (2004)
- the Cooperatives Act (2005), as amended
- the Cooperatives Amendment Act (2013)
- the cooperatives development policy.

1. No historical data available.

## Expenditure overview

Over the medium term, the department will focus on providing support to SMMEs and cooperatives. This includes providing greater access to financial and non-financial support for SMMEs, cooperatives, start-ups and township and rural enterprises; establishing infrastructure to expose SMMEs and cooperatives to global market opportunities; and establishing an adjudicator's office to regulate licensing and business practices in the sector. Transfers to entities to carry out this work account for an estimated 86.8 per cent (R6.9 billion) of the department's budget over the medium term. Total expenditure is set to increase at an average annual rate of 3.5 per cent, from R2.5 billion in 2022/23 to R2.8 billion in 2025/26.

The department supports SMMEs primarily through the Small Enterprise Development Agency, which is allocated R2.7 billion over the medium term. To enable a new generation of job creators to contribute to economic transformation, the department aims to support 30 000 young entrepreneurs by providing opportunities for self-employment through the young entrepreneurs programme at a projected cost of R94.2 million over the medium term. Additional support amounting to R280 million over the period ahead will be provided to SMMEs through internally administered incentives such as the craft customised sector programme in the *Development Finance* programme and the product markets programme in the *Sector and Market Development* programme.

The department aims to link 750 SMMEs and cooperatives to international market opportunities over the MTEF period, with particular emphasis on enterprises run by women, young people and people with disabilities. R94.5 million over the medium term is allocated for this purpose in the *Sector and Market Development* programme.

In an effort to establish a small enterprise ombud service, R47.1 million has been set aside over the medium term to regulate and license businesses owned by foreign nationals, regulate unfair business practices, and review the definition of SMMEs to arrive at an inclusive understanding. The department will also provide informal and micro enterprises with equipment. The department has allocated R60 million over the MTEF period for these activities in the *Development Finance* programme.

## Programme 2: Sector and Market Development

### Programme purpose

Facilitate and increase access to markets for small, medium and micro enterprises through business information, product development support and value chain integration.

### Objectives

- Direct thought leadership in the sector by providing evidence-based business information to relevant stakeholders on an ongoing basis.
- Contribute to greater economic activity on an ongoing basis by reducing the administrative and regulatory burden of doing business for SMMEs.
- Facilitate the growth of SMMEs on an ongoing basis by providing domestic and international market support services to SMMEs.
- Stimulate economic growth by supporting the entry and growth of SMMEs in prioritised and designated sectors of the economy on an ongoing basis.

### Subprogrammes

- *Sector and Market Development Management* provides leadership to the programme, and supports the entry into and growth of SMMEs in prioritised and designated sectors of the economy.
- *Business Intelligence and Knowledge Management* provides evidence-based business information to direct thought leadership in the sector.
- *Ease of Doing Business* reduces the administrative and regulatory burden of doing business for SMMEs.
- *Access to Market Support* provides domestic and international market support services to SMMEs.

## Programme 3: Development Finance

### Programme purpose

Expand access to finance for small, medium and micro enterprises and cooperatives through innovative service offerings.

## Objectives

- Improve the financial viability and sustainability of SMMEs and their capacity to contribute to economic growth and job creation on an ongoing basis by:
  - managing the creation of enabling financial support structures for SMMEs and the coordination of SMME funding across government
  - managing the design of blended financial support initiatives for SMMEs
  - managing the provision of business assurance strategies for SMMEs.

## Subprogrammes

- *Development Finance Management* provides leadership to the programme, and supports the entry into and growth of SMMEs in prioritised and designated sectors of the economy.
- *Model Funding Collaboration* creates enabling financial support structures for SMMEs.
- *Blended Finance* designs blended financial support initiatives for SMMEs.
- *Business Viability* provides business assurance strategies for SMMEs.

## Programme 4: Enterprise Development

### Programme purpose

Oversee the promotion of an ecosystem that enhances entrepreneurship and the establishment, growth and sustainability of small businesses, and coordinate business development support interventions across various spheres of government.

## Objectives

- Drive the transformation of the economy on an ongoing basis by creating a conducive business environment for township, village and rural economies, and informal businesses.
- Advance the competitiveness of SMMEs on an ongoing basis by adopting an integrated approach to the implementation of the district development model.
- Drive the transformation of the economy on an ongoing basis by formulating policy instruments and conducting advocacy work aimed at including SMMEs in the mainstream economy.

## Subprogrammes

- *Enterprise Development Management* provides leadership to the programme, oversees the execution of enterprise development programmes, and coordinates the provision of infrastructure to encourage and support the development of entrepreneurs.
- *Enterprise and Supplier Development* drives the transformation of the economy through the formulation of policy instruments and advocacy work aimed at including SMMEs in the mainstream economy.
- *SMME Competitiveness* works with municipalities through their integrated development plans to develop, enhance and implement enterprise development programmes that are geared towards improved local economic development.

### Entity overview

The Small Enterprise Development Agency was established in 2004 in terms of the National Small Business Amendment Act (2004). It is mandated to implement the government's small business strategy, design and implement a standard and common national delivery network for the development of small enterprises, and integrate government-funded small enterprise support agencies across all spheres of government.

Over the medium term, the agency will continue to promote business competitiveness, viability and localisation, with a particular focus on the development of township, rural and informal businesses and start-ups by facilitating the establishment of a targeted 250 business incubators over the period ahead. This will be funded by allocations amounting to R503.3 million over the medium term and complemented by private-sector funding.

Over the MTEF period, the agency plans to help 9 000 SMMEs and cooperatives become competitive in local markets, and create 15 000 jobs within the SMME ecosystem. To achieve these targets, expenditure is expected to decrease at an average annual rate of 2.2 per cent, from R1 billion in 2022/23 to R943.7 million in 2025/26, mainly as a result of the high baseline in 2022/23 due to the receipt of relief funding for the floods in KwaZulu-Natal.

The agency expects to derive 97.3 per cent (R2.7 billion) of its revenue over the medium term through transfers from the department. Revenue is expected to decrease in line with expenditure.

*The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).*

### Vote purpose

*Provide an enabling environment for the sport, arts, and culture sector by developing, transforming, preserving, protecting and promoting sport, arts and culture at all levels of participation to foster an active, winning, creative and socially cohesive nation.*

### Mandate

The Department of Sport, Arts and Culture is mandated to: provide leadership to the sport, arts and culture sectors to accelerate their transformation; oversee the development and management of sport, arts and culture in South Africa; legislate on sports participation, sports infrastructure and safety; improve South Africa's international ranking in selected sports in partnership with the South African Sports Confederation and Olympic Committee; preserve, develop, protect and promote the cultural, heritage and linguistic diversity and legacy of South Africa; lead nation building and social cohesion through social transformation; enhance archives and records management structures and systems; and promote access to information. The department derives its mandate from the following legislation:

- the Heraldry Act (1962)
- the Culture Promotion Act (1983)
- the National Archives and Records Service of South Africa Act (1996)
- the Legal Deposit Act (1997)
- the National Film and Video Foundation Act (1997)
- the National Sport and Recreation Act (1998)
- the Cultural Institutions Act (1998)
- the South African Geographical Names Council Act (1998)
- the National Heritage Resources Act (1999)
- the Cultural Laws Second Amendment Act (2001)
- the National Council for Library and Information Services Act (2001)
- the Safety at Sports and Recreational Events Act (2010)
- the Use of Official Languages Act (2012).

## Selected performance indicators

Indicator	Programme	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of people actively participating in organised sport and active recreation events per year	Recreation Development and Sport Promotion	Priority 6: Social cohesion and safer communities	462 592	58 439	332 053	315 000	295 000	296 561	300 000
Number of schools, hubs and clubs provided with equipment and/or attire per year as per established norms and standards	Recreation Development and Sport Promotion		3 762	3 936	4 732	2 500	2 500	2 500	2 500
Number of athletes supported by sports academies per year	Recreation Development and Sport Promotion		4 174	2 249	8 859	3 700	3 700	3 700	3 700
Number of athletes supported through the scientific support programme per year	Recreation Development and Sport Promotion		175	40	342	80	80	80	80
Number of community conversations or dialogues implemented to foster social interaction per year	Arts and Culture Promotion and Development		9	10	20	20	20	20	20
Number of artists placed in schools per year	Arts and Culture Promotion and Development		382	0	325	300	340	340	340
Number of bursaries awarded for the development of qualified language practitioners per year	Arts and Culture Promotion and Development		458	486	301	250	250	250	250
Number of projects in the creative industry supported through the Mzansi golden economy programme per year	Arts and Culture Promotion and Development		71	13	68	67	90	90	90
Number of libraries financially supported per year	Heritage Promotion and Preservation		36	33	34	29	32	35	38
Number of students awarded with heritage bursaries per year	Heritage Promotion and Preservation		66	70	61	45	45	45	45

## Expenditure overview

Over the medium term, the department will continue developing, transforming, preserving, protecting and promoting sport, arts, and culture at all levels of participation to foster an active, winning, creative and socially cohesive nation. In support of this, over the period ahead, the department will focus on creating job opportunities to contribute to economic growth, promoting social cohesion and facilitating nation building, developing and promoting sport and recreation, transforming and building capacity in the arts and culture sector, and building and maintaining heritage assets.

Expenditure is expected to increase at an average annual rate of 0.7 per cent, from R6.3 billion in 2022/23 to R6.4 billion in 2025/26. Transfers and subsidies account for 80.4 per cent (R15.2 billion) of spending over the MTEF period. The department's total budget amounts to R18.9 billion over the next 3 years, which includes a baseline increase of R26.4 million for cost-of-living adjustments.

### ***Creating job opportunities in the cultural and creative industries***

In addition to their role in instilling social and cultural values and fostering a national identity among South Africans, the cultural and creative industries have the potential to contribute to economic growth, employment

and international trade. The Mzansi golden economy programme seeks to unlock this potential by facilitating the creation of job opportunities in the arts, culture and heritage sector by supporting interventions designed to develop audiences, stimulate demand, increase market access and develop skills. R1.4 billion over the medium term is allocated to the Mzansi golden economy programme through the *Arts and Culture Promotion and Development* programme. These funds will mainly be used to create 36 000 job opportunities in the cultural and creative industry. The Mzansi golden economy funds community arts development programmes, incubators, other skills development initiatives, national and provincial flagships, and 270 projects in the creative sector. R60 million of this allocation is earmarked for placing 1 020 artists in schools over the next 3 years with the aim of developing and improving art practitioners' pedagogical capabilities and skills to collaborate with educators in schools and other learning centres, and communicate and interact more effectively with learners.

The presidential employment initiative was launched in October 2020 to mitigate the economic impact of the COVID-19 pandemic across all sectors. The initiative's reach into the creative industry is realised through the creative industries stimulus, which is allocated R462 million in 2023/24 to create a targeted 40 000 jobs.

### ***Promoting social cohesion and facilitating nation building***

The *Social Cohesion and Nation Building* subprogramme implements the national social cohesion strategy; brings into the mainstream targeted groups in arts, culture and heritage, including arts and culture in schools; and is responsible for the coordination of the department's commitment to priority 6 (social cohesion and safer communities) of government's 2019-2024 medium-term strategic framework. The department plays a crucial role in executing this commitment through various projects, which over the medium term include promoting South African national symbols, especially the national flag, through public awareness activations around the #IAmTheFlag campaign and the national anthem. These projects will be complemented by a planned 20 community dialogue platforms in 2023/24 at a projected cost of R8 million to encourage active citizen participation. The department also plans to implement 20 annual advocacy platforms on social cohesion at an estimated cost of R45 million over the MTEF period in the *Social Cohesion and Nation Building* subprogramme in the *Arts and Culture Promotion and Development* programme.

### ***Developing and promoting sport and recreation***

Sport has the potential to bring together diverse groups and create a socially cohesive society with a common national identity. In recognition of this, the department has allocated R4.6 billion over the MTEF period to the *Recreation Development and Sport Promotion* programme. Of this amount, R1.9 billion over the medium term will be channelled to the *mass participation and sport development grant* for programmes such as Move for Health, the national indigenous games festival, the Big Walk, National Recreation Day, national youth camps and various outreach programmes. To encourage the development of young people through sport and enable them to showcase their skills at events such as the national school sport championship, an estimated 50.5 per cent (R2.3 billion) of the programme's budget is allocated to the *Active Nation* subprogramme over the next 3 years.

About R9 million of the allocation to the *mass participation and sport development grant* in 2023/24 in the *Active Nation* subprogramme is earmarked for supporting South Africa's hosting of the 2023 Netball World Cup and to mobilise more than 6 000 people to participate in public viewing programmes to support the South African team. The department invested R136.3 million between 2018/19 and 2023/24 to enable the hosting of the tournament.

### ***Transforming and building capacity in the arts and culture sector***

In support of priority 3 (education, skills and health) of government's 2019-2024 medium-term strategic framework, the department is committed to upskilling and transforming the arts and culture sector. This mainly involves building capacity through bursaries, placements and incubator programmes, including the design focus programme, the national craft incubator, the emerging creatives programme, the Eersterust visual arts incubator, the women writers' programme, the creative and technology hub, and incubator programmes at each of the department's performing arts institutions. R198.9 million over the medium term is allocated in the *Cultural and Creative Industries Development* subprogramme in the *Arts and Culture Promotion and Development* programme to provide financial support to 66 capacity building projects in the cultural and creative sector, and R20.7 million is allocated in the *National Language Services* subprogramme to award language bursaries to 750 qualifying students.

## Maintaining heritage assets

The maintenance of heritage assets such as libraries and heritage sites is vital for the ongoing imperative of promoting, sustaining and enriching a national identity. An estimated 43.6 per cent (R8.4 billion) of the department's budget over the medium term is allocated to the *Heritage Promotion and Preservation* programme, of which R5 billion is earmarked for the *Public Library Services* subprogramme, mainly for the *community library services grant*; and R2 billion for the *Heritage Institutions* subprogramme, to be transferred to museums for their operations. To expand access to knowledge and information, the department plans to build 105 libraries and upgrade 150 community libraries over the MTEF period with funds from the *community library services grant*.

Monuments, memorials and museums serve as important heritage assets that preserve legacies and pay homage to people and events that have shaped South African society and form part of the nation building and social cohesion agenda. R1.4 billion is allocated over the medium term in the *Infrastructure Support* subprogramme in the *Recreation Development and Sport Promotion* programme for projects such as finalising the Sarah Baartman Centre of Remembrance and the OR Tambo Garden of Remembrance, and maintaining the Samora Machel Memorial Museum and Iziko Museums.

## Programme 2: Recreation Development and Sport Promotion

### Programme purpose

Support the provision of mass participation opportunities, the development of elite athletes, and the regulation and maintenance of facilities.

### Objectives

- Improve the delivery of sport and recreation over the medium term by providing financial and non-financial support to 60 sport and recreation bodies.
- Inspire a winning nation by creating an enabling environment that supports high-performance athletes to excel at an international level on an ongoing basis.
- Contribute towards a winning nation by coordinating scientific support services for 80 emerging high-performance athletes per year over the medium term.
- Foster transformation within the sport and recreation sector by helping sport federations reach their transformation targets by March 2024.
- Monitor the implementation of the eminent persons group findings and recommendations on the assessed sport federations and ensure that these are implemented by March 2024.
- Develop an ethical sporting sector by financially supporting the South African Institute for Drug-Free Sport and ensuring that commitments to the World Anti-Doping Agency and the Regional Anti-doping Agency are upheld annually.
- Advance an effectively and efficiently regulated boxing sector by providing ongoing support to Boxing South Africa, as a public entity of the department.
- Showcase South African sports stars by hosting 4 events annually (the South African Sports Awards, the Ministerial Outstanding Sports Performance Accolades, the Andrew Mlangeni Green Jacket Awards and the G-Sport Awards that honour women in sport) that acknowledge achievements in the sport and recreation sector.
- Encourage an active nation and contribute to improving the overall wellbeing of South Africans through lifelong participation in active recreation by facilitating the delivery of at least 5 active recreation programmes to reach at least 45 000 participants by March 2024.
- Inspire lifelong physical activity by providing mass sport participation opportunities to at least 5 000 community members in 3 sport promotion events by March 2024.
- Increase access to sports at school by supporting 75 000 learners to participate in the district school sport championships and 5 000 learners in the national school sport championship, and providing equipment and attire to 2 500 schools, hubs and clubs by March 2024.
- Increase opportunities for mass participation in sport and recreation in all provinces by providing management and financial support through the *mass participation and sport development grant* on an ongoing basis.
- Provide accessible infrastructure to communities by constructing 10 community gyms and play parks, and 10 multipurpose sports courts by March 2024.
- Help 50 municipalities over the medium term to comply with facility norms and standards by providing technical and/or management support during the construction phase of sport and recreation facilities.
- Preserve and promote South African heritage and a national memory, and promote an informed, reading nation by:
  - constructing, upgrading, maintaining, repairing and renovating the department’s buildings, and providing quarterly progress reports
  - developing and/or maintaining 3 heritage legacy facilities (the Isibhubhu Cultural Arena, the Sarah Baartman Centre of Remembrance and the Dr John L Dube Amphitheatre) over the medium term
  - providing financial support for the infrastructure upgrades of 18 public entities by March 2024.

## Subprogrammes

- *Winning Nation* supports the development of elite athletes.
- *Active Nation* supports the provision of mass participation opportunities in sport and recreation.
- *Infrastructure Support* regulates and manages the provision of sport, recreation, arts and culture facilities. This subprogramme also provides technical support during the construction, repair and renovation of buildings belonging to public entities and other institutions in the sport, arts and culture sector.

## Programme 3: Arts and Culture Promotion and Development

### Programme purpose

Promote and develop arts, culture and languages, and implement the national social cohesion strategy.

### Objectives

- Develop and promote official languages by supporting 6 multiyear language technology projects by March 2024.
- Build capacity in human resources and promote excellence in the arts, culture and heritage sector by:
  - providing 250 bursaries per year over the medium term towards the development of qualified language practitioners
  - supporting 22 capacity building programmes by March 2024
  - implementing school-based arts education programmes in partnership with the Department of Basic Education by March 2024
  - placing 340 experienced artists and/or arts practitioners per year over the medium term in schools to assist and support art teachers.
- Build relations and partnerships locally and internationally by supporting 15 market access platforms by March 2024.
- Transform the arts and culture sector by supporting 4 arts and social development programmes and 4 youth-focused arts development programmes by March 2024.

- Lead, coordinate and implement arts programmes by providing financial support to 9 provincial community arts development programmes by March 2024.
- Drive integrated, outcomes-based research, planning, monitoring and evaluation across the sport, arts, culture and heritage sectors by producing 16 reports by March 2024 through the South African Cultural Observatory.
- Build international relations and partnerships by coordinating 20 international engagements by March 2024.
- Empower the sport, arts and culture sector by managing and strengthening strategic bilateral and multilateral relations through actively participating and influencing decision-making in identified multilateral organisations such as the United Nations, the African Union and the Commonwealth over the medium term.
- Lead, coordinate and implement social cohesion and nation building programmes annually by:
  - commemorating 6 national days
  - hosting 20 community conversations
  - hosting 20 social cohesion advocacy platforms.
- Develop, protect and promote the arts and culture sector by supporting 90 cultural and creative sector projects through the programmes of the Mzansi golden economy strategy by March 2024.
- Contribute towards economic transformation by March 2024 by creating 12 000 job opportunities across the workstreams and cultural development programmes of the Mzansi golden economy strategy and 40 000 job opportunities through the presidential employment initiative.

### Subprogrammes

- *National Language Services* promotes the use and equal status of all official languages. This entails the development of terminologies and language technology, translation and editing services in all official languages, and the awarding of bursaries.
- *Pan South African Language Board* transfers funds to the Pan South African Language Board, which creates an environment conducive to developing, using and promoting all official languages, as well as the Khoi, Nama and San languages, and South African Sign Language.
- *Cultural and Creative Industries Development* supports cultural and creative industries by developing strategies, implementing sector development programmes, supporting the programmes of sector organisations, and providing training support to arts and culture practitioners.
- *International Cooperation* assists in building continental and international relations for the promotion and development of South African sport, arts, culture and heritage by actively participating in and influencing decision-making in identified multilateral organisations and bilateral forums.
- *Social Cohesion and Nation Building* implements the national social cohesion strategy and brings into the mainstream under-represented groups (such as women, people with disabilities and people in rural areas) in arts, culture and heritage, including arts and culture in schools. This subprogramme is also responsible for the coordination of priority 6 (social cohesion and safer communities) of government's 2019-2024 medium-term strategic framework.
- *Mzansi Golden Economy* seeks to create economic and job opportunities in the arts, culture and heritage sector by supporting programmes designed to develop audiences, stimulate demand, increase market access and develop skills.
- *Performing Arts Institutions* transfers funds to performing arts institutions, which provide a platform for the artistic and cultural expression of artists and those interested in performing arts.
- *National Film and Video Foundation* transfers funds to the National Film and Video Foundation to support the development of skills, and local content and marketing in South Africa's film, audio-visual and digital media industry.
- *National Arts Council* transfers funds to the National Arts Council, which develops and supports various disciplines of arts and culture financially, in accordance with the National Arts Council Act (1997).

## Programme 4: Heritage Promotion and Preservation

### Programme purpose

Preserve and promote South African heritage, including archival and heraldic heritage. Oversee and transfer funds to libraries.

### Objectives

- Create capacity in the heritage sector by awarding 45 heritage bursaries and placing 15 bursary graduates in internships by March 2024.
- Promote national identity by hosting 10 workshops, providing 100 flags to schools and implementing 20 public awareness activations on the #IAmTheFlag campaign in each year over the medium term.
- Create a coherent policy and legislative environment by developing a national policy framework on heritage legacy projects by March 2024.
- Provide access to information and promote a culture of reading in society by financing the construction of 32 newly built and/or modular community libraries by March 2024.
- Develop, preserve, protect and promote heritage by:
  - publishing 3 gazette notices on the standardisation of geographical names annually
  - publishing 5 books documenting living human treasures by March 2024
  - implementing 2 heritage legacy projects by March 2024.

### Subprogrammes

- *Heritage Promotion* supports a range of heritage initiatives and projects. This includes the transformation of the heritage landscape through the conceptualisation, equipping and operationalisation of legacy projects, the resistance and liberation heritage route and the relocation of statues; and, through the Bureau of Heraldry, registering and popularising national symbols through public awareness campaigns, promoting the national flag, coordinating the National Orders awards ceremony, and developing and reviewing heritage policies and legislation for the preservation, conservation and management of South African heritage.
- *National Archive Services* acquires, preserves, manages and makes accessible records with enduring value.
- *Heritage Institutions* funds and determines policy for declared cultural institutions and heritage bodies by ensuring that funds to these institutions are used to preserve, research, protect and promote heritage.
- *National Library Services* funds libraries and institutions such as the National Library of South Africa, the South African Library for the Blind, and Blind South Africa; and develops related policy.
- *Public Library Services* transfers funds to provincial departments for conditional allocations to community library services for constructing and upgrading libraries, hiring personnel and purchasing library materials.
- *South African Heritage Resources Agency* transfers funds to the South African Heritage Resources Agency, the key strategic objectives of which are to develop and implement norms and standards for managing heritage resources.
- *South African Geographical Names Council* transfers funds to the South African Geographical Names Council, an advisory body that facilitates name changes by consulting with communities to advise the Minister of Sport, Arts and Culture.
- *National Heritage Council* transfers funds to the National Heritage Council, the mandate of which involves enhancing knowledge production on heritage and ensuring the promotion and awareness of heritage.

#### Entity overview

Boxing South Africa was established in terms of the Boxing Act (2001), which mandates the entity to: administer professional boxing; recognise amateur boxing; create and ensure synergy between professional and amateur boxing; and promote engagement and interaction between associations of boxers, managers, promoters and trainers. Over the medium term, the entity will continue to focus on contributing to nation building, healthy lifestyles and social cohesion by promoting participation in boxing, especially among young people and women; strengthening the boxing regulatory environment; and ensuring the effective administration of the sport.

Expenditure is expected to increase at an average annual rate of 3.6 per cent, from R22.4 million in 2022/23 to R24.9 million in 2025/26. Spending on goods and services accounts for a projected 58.2 per cent (R41.5 million) of the entity's total expenditure over the period ahead. It is set to derive 87.5 per cent (R62.4 million) of its revenue through transfers from the department and the remainder through fees for the sanctioning of boxing tournaments.

**Entity overview**

The following heritage institutions were established in terms of the Cultural Institutions Act (1998) and derive their mandates from this act and the 1996 White Paper on Arts, Culture and Heritage: the Amazwi South African Museum of Literature, Die Afrikaanse Taalmuseum en -monument, Ditsong Museums of South Africa, Iziko Museums of South Africa, Freedom Park, the KwaZulu-Natal Museum, the Luthuli Museum, the National Museum, the Nelson Mandela Museum, the Robben Island Museum, the War Museum of the Boer Republics, the William Humphreys Art Gallery, and the uMsunduzi Museum.

Heritage institutions will, over the medium term, focus on collecting, preserving, providing and promoting access to and awareness of South Africa's national heritage through hosting exhibitions as a means of encouraging education and celebrating the country's diverse cultural and natural heritage. To achieve these objectives, an estimated 29.6 per cent (R872.5 million) of the institutions' budget over the next 3 years will go towards business development, which is expected to enable them to host 479 exhibitions, create awareness of museum services through 191 013 educational programmes, and produce 480 new publications or articles.

Expenditure is expected to increase at an average annual rate of 13.7 per cent, from R776.4 million in 2022/23 to R1.1 billion in 2025/26, mainly driven by allocations for capital works projects. The institutions are set to receive 80.1 per cent (R2.3 billion) of their revenue through transfers from the department and the remainder through entrance fees, donor assistance and sponsorships. The department has reprioritised an additional R44.8 million over the medium term to 7 museums, including Ditsong Museums of South Africa, to address operational funding shortfalls arising from the devolution of municipal charges; and R8 million in 2023/24 to Freedom Park for the operationalisation of the Liliesleaf Farm Museum. These funds are reprioritised from the devolution of the municipal services function from the department to entities.

### Entity overview

The National Library of South Africa was established in terms of the National Library of South Africa Act (1998), and contributes to socioeconomic, cultural, educational, scientific and innovation development by collecting, recording, preserving and making available the national documentary heritage, and promoting an awareness and appreciation for it, by fostering information literacy and facilitating access to information resources. The South African Library for the Blind was established in terms of the South African Library for the Blind Act (1998) and is mandated to provide a national library and information service to blind and visually impaired readers in South Africa.

The National Library of South Africa provides services to community libraries in partnership with provincial library services. These services include ICT support, training in preservation and resource development, the promotion of legal deposit by book publishers in terms of the Legal Deposit Act (1997), and marketing and exhibition services. This work is funded through the *community library services grant* through an allocation of R69.2 million over the medium term. The library also plans to digitise 157 000 heritage items and preserve and conserve 55 376 documentary heritage items over the period ahead, funded through allocations amounting to R85.7 million. The library is set to receive an additional R22.5 million to address operational funding shortfalls. This amount is reprioritised from the devolution of the municipal services function from the department to entities.

The South African Library for the Blind is funded through operational transfers from the department amounting to R82 million over the medium term. This is expected to enable it to produce 720 Braille book titles and 90 books for visually impaired people in alternative formats, including audio. These items will also be circulated for lending to the public.

The libraries' total expenditure over the medium term is set to increase at an average annual rate of 4.9 per cent, from R167.1 million in 2022/23 to R192.8 million in 2025/26, due to the additional allocations to the National Library of South Africa. Revenue is expected to increase at an average annual rate of 4.9 per cent, from R167.1 million in 2022/23 to R192.8 million in 2025/26.

### Entity overview

The National Arts Council derives its mandate from the National Arts Council Act (1997), which requires it to provide and encourage the provision of opportunities for people to practise the arts, foster the expression of a national identity and consciousness through the arts, provide historically disadvantaged artists with additional help and resources to give them greater access to the arts, address historical imbalances in the provision of infrastructure for the promotion of the arts, develop and promote the arts, and encourage artistic excellence.

Redressing past imbalances is pivotal to the council's work. As such, over the MTEF period, it will continue to prioritise applications from historically disadvantaged provinces, marginalised groups and art practitioners in rural and peri-urban areas. In support of this over the period ahead, the council plans to set up helpdesks in provinces in an effort to assist art practitioners who have limited means to access the council's services. The council has identified organisations or structures in each province to collaborate on hosting the helpdesks at a projected cost of R1 million over the MTEF period. To enhance transparency, the board will host annual summits over the period ahead where internal and external stakeholders are encouraged to dissect and review the council's work with the aim of identifying key challenges and providing recommendations.

Expenditure and revenue are expected to decrease at an average annual rate of 23.5 per cent, from R304.8 million in 2022/23 to R136.6 million in 2025/26, mainly due to the high baseline in 2022/23 as a result of the one-off allocation for the presidential employment initiative. The council is set to receive 98.8 per cent (R395.7 million) of its revenue over the medium term through transfers from the department.

### Entity overview

The National Film and Video Foundation is governed by the National Film and Video Foundation Act (1997), as amended by the Cultural Laws Amendment (2001). It is mandated to develop and promote the film and video industry in South Africa through the programmes it funds and carry out other enabling activities such as providing training to industry players, supporting and developing historically disadvantaged people in the audio-visual industry in line with South Africa's transformation agenda, increasing the number of people trained in scarce skills, and creating job opportunities in the film and video industry.

Providing funding for content development in the film industry is at the core of the foundation's work. As such, funding applications for feature films, documentaries, short films and television format concepts are all considered. The foundation plans to fund 105 South African content development projects and 65 South African productions at a cost of R211 million over the MTEF period.

Expenditure is set to increase at an average annual rate of 2.9 per cent, from R153 million in 2022/23 to R166.5 million in 2025/26. The foundation expects to receive 97.6 per cent (R476.8 million) of its revenue over the MTEF period through transfers from the department. Revenue is set to increase in line with expenditure.

**Entity overview**

The National Heritage Council is a schedule 3A public entity established in terms of the National Heritage Council Act (1999) to preserve South African heritage as a priority for nation building and national identity.

Over the medium term, the council plans to focus on increasing awareness about heritage; and developing, promoting and protecting South Africa's national heritage for current and future generations. A key initiative in this regard is developing the resistance and liberation heritage route and supporting the evaluation process of the United Nations Educational, Scientific and Cultural Organisation (UNESCO) to include the route as a world heritage site. The resistance and liberation heritage route project will place greater emphasis on the unsung heroes and heroines of the liberation struggle. Work on the route is expected to lead to expenditure of R30 million over the medium term.

The council will continue to contribute to preserving South Africa's living heritage and creating awareness on tangible and intangible cultural heritage and practices by funding community heritage projects. R27 million is set aside over the next 3 years to fund 90 heritage projects after public calls for proposals. The annual funding application process is adjudicated by an independent panel. The council also plans to establish a national inventory office for endangered living heritage in 2023/24 at a projected cost of R5 million.

Expenditure is set to decrease at an average annual rate of 2.2 per cent, from R86.4 million in 2022/23 to R80.8 million in 2025/26, due to a high baseline in 2022/23 as a result of one-off funding of R65 million for the presidential employment initiative. Revenue is set to decrease in line with spending and is derived entirely through departmental transfers.

### Entity overview

The Pan South African Language Board was established in terms of the Pan South African Language Board Act (1995) to develop 11 official languages, as well as the Khoi, Nama and San languages and South African sign language; and promote multilingualism in South Africa and investigate complaints about language rights and violations from any individual, organisation or institution.

Over the medium term, the board plans to conduct language research, address language complaints, promote language awareness, authenticate all terminology submitted, develop and produce 20 printed and recorded lexicographical materials, and improve its financial management.

Expenditure is set to increase at an average annual rate of 3.1 per cent, from R123.1 million in 2022/23 to R134.9 million in 2025/26, with compensation of employees accounting for an estimated 56.1 per cent (R220.2 million) of this spending. Revenue, derived entirely through departmental transfers, is set to increase in line with spending.

### Entity overview

The South African Heritage Resources Agency is a schedule 3A public entity established in terms of the National Heritage Resources Act (1999). It is mandated to formulate national principles, standards and policy for the identification, recording and management of the national estate in terms of which heritage resource authorities and other relevant bodies must function.

Over the MTEF period, the agency will focus on promoting and preserving the national estate, and will monitor and inspect specifically declared objects and collections. It will also continue to assess and approve permits for the development of heritage sites, and review heritage impact assessment reports submitted by property developers. In this regard, the agency plans to rehabilitate and erect 12 memorial sites and declare 12 heritage resources at a projected cost of R12 million over the MTEF period.

Expenditure is set to decrease at an average annual rate of 17.2 per cent, from R124.7 million in 2022/23 to R70.8 million in 2025/26, due to a high baseline in 2022/23 as a result of one-off funding for the presidential employment initiative. Revenue, which is set to decrease in line with spending, is derived almost entirely through departmental transfers over the period ahead.

**Entity overview**

The South African Institute for Drug-Free Sport was established in terms of the South African Institute for Drug-Free Sport Act (1997). The institute is mandated to promote participation in sport free from the use of prohibited substances or methods intended to artificially enhance performance. It is the custodian of anti-doping and ethics in South African sport, and actively collaborates with colleagues in the rest of Africa to keep sport clean.

Over the period ahead, the institute will focus on ensuring compliance in global sport on matters of anti-doping, anti-corruption, governance reforms, institutional independence, child safeguarding and data protection. This includes implementing projects to ensure compliance with the world anti-doping code and the UNESCO International Convention against Doping in Sport. Accordingly, the institute plans to conduct 4 800 drug and 750 blood tests on athletes to meet national sports federations' demands for testing services.

Expenditure is set to increase at an average annual rate of 2.3 per cent, from R32.8 million in 2022/23 to R35.2 million in 2025/26, with goods and services accounting for an estimated 67.4 per cent (R67.6 million) of this spending over the period ahead. The institute expects to receive 92.3 per cent (R93.4 million) of its revenue through transfers from the department and the balance through services rendered. Revenue increases in line with spending.

### Vote purpose

Promote and support the growth and development of an equitable, competitive and sustainable tourism sector, enhancing its contribution to national priorities.

### Mandate

The mandate of the Department of Tourism, as outlined in the Tourism Act (2014), is to promote the growth and development of the tourism sector; promote quality tourism products and services; provide for the effective domestic and international marketing of South Africa as a tourist destination; enhance cooperation and coordination between all spheres of government in developing and managing tourism; and promote responsible tourism for the benefit of South Africa and for the enjoyment of all its residents and foreign visitors.

In recognition of tourism as a national priority with the potential to contribute significantly to economic development, the 1996 White Paper on the Development and Promotion of Tourism in South Africa provides for the promotion of domestic and international tourism. The national tourism sector strategy provides a blueprint for the sector to meet the growth targets contained in the National Development Plan.

### Selected performance indicators

Number of capacity-building programmes implemented per year	Tourism Sector Support Services		9	4	10	4	5	5	5

## Expenditure overview

Over the medium term, the department will continue its efforts to protect and reignite the demand for tourism to ensure that the sector lives up to its potential to contribute to South Africa's economic growth. To do this, it intends to focus on: enhancing growth and development in the sector, thereby contributing to broader economic growth; enhancing and maintaining core tourism assets and infrastructure while creating work opportunities; and supporting historically disadvantaged tourism enterprise.

The department has a total budget of R7.9 billion over the medium term, increasing at an average annual rate of 3.3 per cent, with transfers to South African Tourism accounting for an estimated 53.3 per cent (R4.2 billion) of this amount. Most of the department's activities are carried out through the expanded public works programme, which, in the tourism sector, is aimed at enhancing and developing tourism infrastructure through labour-intensive methods targeted at young people, women, unemployed people, people with disabilities and small, medium and micro enterprises (SMMEs). The expanded public works programme is allocated R944.8 million over the MTEF period in the *Destination Development* programme.

The tourism incentive programme is geared at enhancing growth and development, and includes the green tourism incentive, the market access support programme and the tourism grading support programme. The green tourism incentive provides financial support to privately owned tourism enterprises and promotes responsible practices by offering solutions for the sustainable management of resources. The market access support programme provides financial support to qualifying enterprises for inclusion in selected marketing platforms such as exhibitions. The tourism grading support programme offers a measured structure for diversified inclusivity, which entails reducing the cost of quality grading for small enterprises. The programme is allocated R715 million over the medium term in the *Tourism Sector Support Services* programme. To provide developmental support to enterprises while establishing a channel of emerging operators within the tourism sector, R82.7 million over the MTEF period is allocated to fund operational expenditure within the *Enterprise Development and Transformation* subprogramme in the *Tourism Sector Support Services* programme.

The department aims to implement spatial planning and infrastructure projects over the MTEF period to build capacity in township and rural economies, and is working to maintain infrastructure on properties managed by South African National Parks. These initiatives garner support for community-based projects and ultimately contribute to tourism development and work opportunities in rural areas. These projects are primarily funded through the Working for Tourism programme, which forms part of the expanded public works programme, to enable the creation of a targeted 12 399 work opportunities over the medium term.

## **Programme 2: Tourism Research, Policy and International Relations**

### **Programme purpose**

Enhance the strategic policy environment, monitor the tourism sector's performance and enable stakeholder relations.

### **Objectives**

- Monitor and evaluate tourism projects and initiatives over the medium term by:
  - conducting an impact evaluation study of the local government project
  - monitoring capacity building programmes such as the hospitality youth programme, the national youth chefs training programme, the tourism monitors programme and the food safety quality assurers programme
  - finalising and publishing the 3 state of tourism reports
  - producing 4 tourism sector recovery plan implementation reports
  - assessing the state of key public attractions in South Africa.
- Create an enabling policy and regulatory environment for the growth and development of the tourism sector by submitting the white paper on the development and promotion of tourism in South Africa for approval over the medium term.
- Provide oversight by developing 4 reports on the governance and performance of South African Tourism over the medium term.
- Provide a digital market where tourism businesses can source skilled human resources while linking work seekers with employment opportunities by implementing, maintaining and enhancing the tourism skills and employment portal; and implementing and maintaining the tourism data analytics system over the medium term.
- Encourage regional integration by implementing 6 outreach programmes within the diplomatic community by 2025/26.
- Advance Africa's tourism interests at the regional, continental and global levels through engagements in multilateral forums and hosting a workshop on sharing best practices targeted at African countries with whom South Africa signed tourism agreements and strategic formations over the medium term.

### **Subprogrammes**

- *Tourism Research, Policy and International Relations Management* provides strategic direction, comprehensive administration and operational support services, research, and information and knowledge management services. This subprogramme also manages policy development and evaluation and promotes sector transformation and responsible tourism.
- *Research and Knowledge Management* oversees tourism research, knowledge management and impact evaluation in the sector.
- *Policy Planning and Strategy* oversees and guides policy and strategy development for the tourism sector, and ensures the efficient and effective management of stakeholder relations.
- *South African Tourism* stimulates sustainable international and domestic demand for South African tourism experiences, and regulates the standard of tourism facilities and services.
- *International Relations and Cooperation* drives South Africa's interests through international relations and cooperation.

## Programme 3: Destination Development

### Programme purpose

Facilitate and coordinate tourism destination development.

### Objectives

- Implement 5 destination enhancement and route development projects over the medium term to diversify tourism offerings and enhance visitor experience in identified priority areas by:
  - facilitating the implementation of developed tourism concepts in eThekweni metro, and the OR Tambo, Pixley Ka Seme and Namakwa districts
  - implementing the budget resort network and brand concept
  - managing a pipeline of nationally prioritised greenfield and brownfield tourism investment opportunities
  - facilitating 4 investment promotion platforms.
- Support destination enhancement initiatives over the medium term by:
  - implementing infrastructure maintenance programmes in 18 national parks
  - implementing infrastructure maintenance and beautification programmes in 4 provincial state-owned attractions
  - supporting the implementation of 30 community-based tourism projects.
- Create 12 399 work opportunities through Working for Tourism projects over the medium term.

### Subprogrammes

- *Destination Development Management* provides strategic leadership and administrative support to the programme.
- *Tourism Enhancement* increases the competitiveness of South Africa's tourism industry.
- *Destination Planning and Investment Coordination* ensures that tourism infrastructure supports the growth of the sector.
- *Working for Tourism* facilitates the development of tourism infrastructure projects under the expanded public works programme through labour-intensive methods targeted at young people, women, unemployed people, people with disabilities and SMMEs.

## Programme 4: Tourism Sector Support Services

### Programme purpose

Enhance transformation, increase skill levels and support the development of the sector to ensure that South Africa is a competitive tourism destination.

### Objectives

- Accelerate transformation in the tourism sector by implementing the Tourism Equity Fund and the green tourism incentive programme over the medium term.
- Stimulate growth in domestic tourism by implementing 4 domestic tourism awareness programmes over the medium term.

- Encourage inclusive economic growth in the tourism sector by increasing the participation of SMMEs through incubation programmes to provide business support and development in areas such as technology, tour operations and food services over the medium term.
- Implement initiatives in each year of the medium term to increase the participation of women in the tourism sector by facilitating the United Nations Women in Tourism pilot programme in Limpopo's Vhembe and Mopani districts.
- Enhance visitor service and experience over the medium term by implementing the service excellence standard, focusing on identified improvement initiatives and structured support.
- Facilitate skills development by implementing 5 capacity-building programmes across the sector over the medium term.

## Subprogrammes

- *Tourism Sector Support Services Management* provides administrative support to the programme's activities.
- *Tourism Human Resource Development* facilitates the efficient management and implementation of human resource development initiatives for the tourism sector.
- *Enterprise Development and Transformation* facilitates inclusive participation and sustainability in the tourism sector.
- *Tourism Visitor Services* ensures the integrity of information and facilitates accurate tourism information.
- *Tourism Incentive Programme* manages the establishment of capital and non-capital tourism incentives to promote and encourage the development and growth of the tourism sector.

1. No historical data available.

### Entity overview

The Tourism Act (2014) mandates South African Tourism to market South Africa internationally and domestically as a preferred tourism and business events destination while monitoring and evaluating the performance of the tourism sector. In support of this, over the MTEF period, the entity will continue to prioritise support to domestic, regional and international tourism.

Over the period ahead, South African Tourism will focus on efforts to bid to host events such as business meetings, conferences and exhibitions in rural areas and (small) towns to boost the tourism industry in 6 focal sectors: mining and minerals, manufacturing, travel and tourism, agriculture, finance, and wholesale and retail trade. For this work, R303 million is allocated for research and R278 million for analytics. The entity also plans to support bids to host 380 international and regional business events over the period ahead through an additional allocation of R303 million.

Ensuring that visitors enjoy their experience is a key component of the entity's work, and part of South African Tourism's revitalisation plan entails assuring that tourism establishments are of a high standard. As such, the number of graded establishments is expected to increase from 5 355 in 2022/23 to 5 805 in 2025/26 at a projected cost of R168.5 million over the medium term.

The entity is set to derive 94.9 per cent (R4.4 billion) of its revenue over the period ahead through transfers from the department and the remainder through voluntary levies collected from the private sector, income from grading fees, exhibitions and interest from investments.

### Programmes/Objectives/Activities

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

*Lead economic development policy formulation and planning. Facilitate access to sustainable economic activity and employment for all South Africans through an understanding of the economy, knowledge of economic opportunities and potential, and anticipation of future economic trends. Catalyse economic transformation and development, and provide a predictable, competitive, equitable and socially responsible environment for investment, enterprise and trade for economic citizens. Contribute to achieving government's vision of an adaptive and restructured economy characterised by accelerated economic growth, employment creation and greater equity.*

### Mandate

The mandate of the Department of Trade, Industry and Competition is derived from a broad legislative framework, which includes:

- the Industrial Development Act (1940)
- the Manufacturing Development Act (1993)
- the Competition Act (1998), as amended
- the International Trade Administration Act (2002)
- the Broad-based Black Economic Empowerment Act (2003)
- the Companies Act (2008)
- the Consumer Protection Act (2008)
- the Special Economic Zones Act (2014).

## Expenditure overview

The Department of Trade, Industry and Competition will continue to develop and implement various sectoral master plans over the MTEF period. These are key components of the reimagined industrial strategy, which presents a multipronged approach to industrial development, with an emphasis on building partnerships with the private sector to secure investment that creates jobs. Over the period ahead, this entails focusing on supporting the implementation of key interventions of South Africa's economic reconstruction and recovery plan, particularly by providing industrial finance, developing industrial infrastructure, and enhancing competitiveness and localisation.

The department's total expenditure is expected to increase at an average annual rate of 0.5 per cent, from R10.9 billion in 2022/23 to R11.1 billion in 2025/26. Spending in the *Incentives* programme, mainly to disburse funds for industrial financial assistance, is expected to increase at an average annual rate of 3.2 per cent, from R5.3 billion in 2022/23 to R5.8 billion in 2025/26. Allocations to the programme account for an estimated 51.1 per cent (R16.9 billion) of the department's expenditure over the MTEF period. The *Transformation and Competition* programme's baseline is expected to decrease at an annual average rate of 17.3 per cent due to the Social Employment Fund for the presidential employment initiative not being extended beyond 2023/24.

### Providing industrial finance

In support of the economic reconstruction and recovery plan, initiatives in the *Incentives* programme are aimed at growing sustainable and competitive enterprises through providing direct or indirect industrial financing. Over the next 3 years, the department will continue to provide financial support to the automotive incentive scheme, the black industrialist programme, the agro-processing support scheme, the strategic partnership programme,

and the aquaculture development and enhancement programme. Allocations to the *Manufacturing Incentives* subprogramme account for an estimated 51 per cent (R8.8 billion) of the *Incentives* programme's budget over the medium term. The department will also provide financial assistance or support to 300 clothing and textile firms through the clothing and textiles competitiveness programme, which has a budget of R1.8 billion over the period ahead in the *Sectors* programme. Through these incentive programmes, the department expects to leverage R83 billion in private sector investment. A further R728.8 million over the medium term is reprioritised, mainly from the department's operational budget, as it implements the new energy vehicle roadmap. The roadmap is intended to enhance the transitioning of the automotive industry in South Africa from internal combustion engines to electric motors, in line with global trends.

### Developing industrial infrastructure

A critical part of the economic reconstruction and recovery plan includes interventions to catalyse investment through infrastructure development. This includes subsidising bulk infrastructure and top structures (factories) in special economic zones, and rolling out infrastructure to revitalise a targeted 16 industrial parks over the medium term. These subsidies are provided mainly through the *Infrastructure Investment Support* subprogramme in the *Incentives* programme, with R4.5 billion over the MTEF period allocated for special economic zones, R443.4 million for industrial parks and R372.7 million for critical bulk infrastructure such as water, electricity and sewerage connections.

### Enhancing industrial competitiveness and localisation

The department aims to enhance industrial competitiveness at firm and sector level through conditions on financial incentives and local procurement policies that encourage industry to use local products. This entails disbursing funds to technical institutions such as the Proudly South African campaign to support sectoral work on master plans and projects that aim to improve industrialisation and competitiveness, and increase localisation. Through collaboration between government, business and labour, these policy interventions are aimed at building local industrial capacity for the domestic and export markets. Expenditure for this work is within allocations amounting to R2.5 billion over the medium term in the *Industrial Competitiveness* subprogramme in the *Sectors* programme. A further R30 million over the period ahead is allocated to the South African Bureau of Standards for local content verifications.

## Programme 2: Trade

### Programme purpose

Build an equitable global trading system that facilitates development by strengthening trade and investment links with key economies and fostering African development, including regional and continental integration and development cooperation, in line with the African Union Agenda 2063.

### Objectives

- Promote African economic integration and development at the regional and continental level over the medium term by:
  - advancing development integration in the Southern African Customs Union and the Southern African Development Community (SADC) Free Trade Area through the implementation of the Africa regional development programme
  - finalising negotiations on the tripartite free-trade area involving the SADC, the East African Community, and the Common Market for Eastern and Southern Africa
  - working to conclude negotiations on and implementing the African Continental Free Trade Agreement
  - advancing South Africa's trade, industrial policy and economic development objectives through cooperation with key economies to address tariff and non-tariff barriers that impede South Africa's value-added exports
  - implementing South Africa's policy on the non-proliferation of weapons of mass destruction to ensure effective export and import regimes to control trade in strategic goods and technologies.

### Subprogrammes

- *International Trade Development* facilitates bilateral and multilateral trade relations and agreements.
- *African Multilateral Economic Development* facilitates multilateral African trade relations aimed at deepening regional integration.

## Programme 3: Investment and Spatial Industrial Development

### Programme purpose

Support foreign direct investment flows and promote domestic investment by providing a one-stop shop for investment promotion, investor facilitation and aftercare support for investors, and increase participation in industrialisation.

### Objectives

- Increase the quality and quantity of South Africa's fixed investments over the medium term by:
  - marketing and promoting the country to ensure investment opportunities through dedicated investment promotion, facilitation and aftercare support
  - coordinating and leading the establishment of one-stop shops on behalf of government to facilitate investment
  - coordinating and leading the reform of the investment climate with the World Bank on the ease of doing

business

- developing a pipeline of potential projects and contributing to South Africa being a preferred destination for investment
- undertaking aftercare forums with investors to retain and expand investment.
- Provide a dedicated service to all investors over the medium term by:
  - facilitating the entire investment value chain
  - developing an investment pipeline of possible projects through lead creation, marketing, project development, facilitation and aftercare.
- Provide specialist advisory services and policy advocacy to improve the investment climate by fast-tracking and unblocking investor issues to reduce bureaucratic red tape over the medium term.
- Facilitate the transformation of the economy to promote industrial development, investment, competitiveness and employment creation by implementing a strategy for special economic zones and the revitalisation of 16 industrial parks by March 2026.

### Subprogrammes

- *Investment Promotion* facilitates an increase in the quality and quantity of foreign direct investment, and domestic and outward investment, by providing investment attraction, targeted lead generation and recruitment support.
- *Investment and Interdepartmental Clearing House* promotes and facilitates investment and provides support services to the investment and interdepartmental clearing house. This subprogramme also provides specialist advisory services, fast-tracks and unblocks processes, and reduces bureaucratic red tape for investors.
- *Investor Support and Aftercare* provides specialist advisory services through research, information marketing, aftercare and policy advocacy to facilitate new investment and retain and expand existing investment.
- *Spatial Industrial Development* promotes regional industrial development in targeted areas such as special economic zones, industrial parks and townships.

## Programme 4: Sectors

### Programme purpose

Design and implement policies, strategies and programmes to strengthen the ability of manufacturing and other sectors of the economy to create decent jobs and increase value addition and competitiveness in both domestic and export markets.

### Objectives

- Support the growth and diversification of South Africa's manufacturing sector on an ongoing basis by:
  - facilitating diversification beyond the reliance on traditional commodities and non-tradable services through the promotion of increased value addition
  - promoting the long-term intensification of South Africa's industrialisation and movement towards a knowledge economy
  - promoting a labour-absorbing industrialisation path with an emphasis on tradable labour-absorbing goods and services and economic linkages that catalyse employment creation
  - promoting a broad-based industrialisation path characterised by the increased participation of historically disadvantaged people and marginalised regions in the mainstream industrial economy
  - contributing to industrial development in Africa with an emphasis on building the continent's productive capacity.

## Subprogrammes

- *Industrial Competitiveness* develops policies, strategies and programmes to strengthen the ability of manufacturing and other value-added sectors to create decent jobs and increase value-addition and competitiveness in domestic and export markets.
- *Customised Sector Programmes* develops and implements high-impact sector strategies focused on manufacturing and other value-added sectors to create decent jobs and increase value-addition and competitiveness in domestic and export markets, as set out in the reimagined industrial strategy.

## Programme 5: Regulation

### Programme purpose

Develop and implement coherent, predictable and transparent regulatory solutions that facilitate easy access to redress and efficient regulation for economic citizens.

### Objectives

- Increase access to economic opportunities for small businesses and historically disadvantaged citizens on an ongoing basis by:
  - developing and reviewing policies, bills and regulations
  - conducting impact assessments of policies, bills and regulations on businesses and economic citizens.
- Develop efficient regulation to reduce the regulatory burden on businesses and increase confidence and certainty in South African business regulation on an ongoing basis by:
  - developing and reviewing policies, bills and regulations
  - conducting impact assessments of policies, bills and regulations on businesses and economic citizens.
- Create a business regulatory environment that promotes competitive, fair and efficient markets on an ongoing basis by:
  - developing and reviewing policies, bills and regulations

- conducting impact assessments of policies, bills and regulations on businesses and economic citizens.
- Provide access to redress for economic citizens to increase market confidence on an ongoing basis by:
  - conducting research on the impact of legislation on economic citizens
  - developing and reviewing related policies, bills and regulations
  - conducting impact assessments of policies, bills and regulations on businesses and economic citizens.
- Promote an awareness of rights, duties and responsibilities to increase activism and public participation by conducting capacity building sessions, workshops, and education and awareness campaigns on an ongoing basis.
- Share and exchange regulatory experience with partners and stakeholders nationally and internationally to promote simple, appropriate and effective regulatory solutions by holding consultations, seminars and conferences on policy issues on an ongoing basis.

### Subprogrammes

- *Policy and Legislative Development* develops policies, laws and regulatory frameworks, and drafts legislation.
- *Enforcement and Compliance* analyses trends and conducts socioeconomic impact assessments for policies, legislation and market surveys; implements legislation on matters pertaining to liquor; monitors and evaluates the effectiveness of regulation; and oversees the performance of the department’s regulatory entities (the Companies and Intellectual Property Commission, the Companies Tribunal, the National Consumer Commission, the National Consumer Tribunal, the National Credit Regulator, the National Gambling Board and the National Lotteries Commission).
- *Regulatory Services* oversees the development of policies, laws and regulatory frameworks; oversees the implementation of the division’s mandate; and provides strategic support to the programme’s business units in line with legislation and applicable governance systems.

## Programme 6: Incentives

### Programme purpose

Stimulate and facilitate the development of sustainable and competitive enterprises, through the efficient provision of effective and accessible incentive measures, that support national priorities.

### Objectives

- Support industrial development that enhances productivity and bolsters competitiveness on an ongoing basis by:
  - designing, administering, monitoring and evaluating incentive programmes based on industrial policies and sector strategies
  - providing financial support in labour-intensive sectors.
- Develop world-class economic infrastructure by supporting industrial parks, special economic zones and other infrastructure that contribute to accelerated growth for manufacturing and internationally traded services on an ongoing basis.

## Subprogrammes

- *Broadening Participation and Industrial Incentives* provides incentive programmes that promote broader participation in the mainstream economy by businesses owned by individuals from historically disadvantaged communities and marginalised regions. This subprogramme comprises the black industrialist programme, the support programme for industrial innovation, and the technology and human resource industry programme.
- *Manufacturing Incentives* provides incentives to promote additional investment in the manufacturing sector. The manufacturing investment cluster comprises the manufacturing competitiveness enhancement programme, the projects feasibility programme, the automotive investment scheme, the export marketing and investment assistance scheme, the sector-specific assistance scheme and the section 12i tax incentive scheme.
- *Services Investment Incentives* provides incentive programmes that promote increased investment and job creation in the services sector. These include the global business services programme, and the film and television production incentive programme for South African and foreign productions.
- *Infrastructure Investment Support* provides grants for 2 industrial infrastructure initiatives (special economic zones and the critical infrastructure programme) aimed at enhancing infrastructure and industrial development, increasing investment, and increasing the export of value-added commodities.
- *Product and Systems Development* reviews, monitors and develops incentive programmes to support the reimagined industrial strategy and develops sector strategies to address market failures.
- *Strategic Partnership and Customer Care* facilitates access to targeted enterprises by reviewing the success of incentive schemes and improving them where possible.

## Programme 7: Export

### Programme purpose

Increase export capacity and support direct investment flows through targeted strategies and an effectively managed network of foreign trade offices.

## Objectives

- Unlock the opportunities presented by the implementation of the African Continental Free Trade Area by promoting exports to other African countries through the implementation of targeted marketing programmes and working closely with the Export Credit Insurance Corporation, the Industrial Development Corporation and the National Empowerment Fund on an ongoing basis.
- Promote growth in export jobs through improving the provision of institutional support to exporters – focusing on the African Continental Free Trade Area, the United States African Growth and Opportunity Act (2000), Asia, Europe, the Middle East and Latin America – on an ongoing basis by:
  - developing dedicated export plans and networks to create a framework for companies to succeed in complex markets
  - making it easier for companies to access export finance, marketing avenues and a flexible basket of advice and support suited to their needs
  - hosting business forums in support of presidential state visits
  - offering cross-cutting market support through the department’s network of foreign economic representatives.
- Promote the diversification of participants in export activities by expanding export promotion and capacity development support to enterprises owned by black people, women and young people on an ongoing basis.
- Diversify the spatial composition of exporters by undertaking targeted export promotion and capacity building activities in undersupported districts on an ongoing basis.

## Subprogrammes

- *African Bilateral Economic Relations* facilitates deeper and broader bilateral trade and investment relations with African economies and supports the deepening of regional integration through an outward investment-led trade approach.
- *Export Promotion and Marketing* promotes the export of South African value-added goods and services to increase market share in targeted high-growth markets and sustain market share in traditional markets.
- *Trade and Investment Foreign Services Management Unit* promotes trade and investment, and administers and provides corporate services to the department’s network of foreign economic representatives to enable South African businesses to access global markets.
- *Export Development and Support* manages the national exporter development programme, which is designed to contribute to positioning South Africa as a reliable trade partner and improve and expand the country’s exporter base.

## Programme 8: Transformation and Competition

### Programme purpose

Develop and roll out policy interventions that promote transformation and competition through effective economic planning, aligned investment and development policy tools.

### Objectives

- Promote competition, trade and other economic regulation by ensuring the effective management of competition authorities over the medium term.

- Advance public interest on an ongoing basis, as defined in the Competition Act (1998), by assessing all merger and acquisition notifications and supporting the minister to intervene where necessary.
- Maximise the impact of recommendations of mergers and acquisitions and of market inquiries by monitoring the implementation of agreements and merger conditions, and coordinating and monitoring the implementation of recommendations from market inquiries on an ongoing basis.
- Facilitate broad-based economic participation through the implementation of the Broad-based Black Economic Empowerment Amendment Act (2013) by implementing the black industrialist programme and monitoring the activities of the Broad-based Black Economic Empowerment Commission on an ongoing basis.

## Subprogrammes

- *Economic Planning and Advisory* promotes integrated economic planning, the analysis of economic plans and the advancement of competition priorities.
- *Implementation Coordination and Competition Oversight* promotes the implementation of economic development plans that are aligned with competition decisions, orders and recommendations, and provides support to the minister to carry out responsibilities required in terms of competition legislation.
- *Investment and Development* promotes public and private investment for development.
- *Equity and Empowerment* promotes broad-based black economic empowerment and the growth of the industrial base through the black industrialist programme.

## Programme 9: Research

### Programme purpose

Undertake economic research, contribute to the development of trade and industrial policies, and guide policy, legislative and strategy processes to facilitate inclusive growth.

### Objectives

- Coordinate job drivers, sector or spatial projects, and the implementation of the new growth path for job creation, inclusive growth, industrialisation and social inclusion by conducting regular reviews of systemic obstacles over the medium term.
- Increase employment at the sectoral and workplace levels by facilitating social dialogue and implementing social accords over the medium term.

- Support productivity, innovation and entrepreneurship by engaging in public policy forums over the medium term.
- Promote the development of evidence-based economic policy, industrial strategies and intervention measures by conducting in-depth research on an ongoing basis.

## Subprogrammes

- *Economic Research and Policy Coordination* undertakes economic research, contributes to the development of policy options, and guides policy through consultation with stakeholders.
- *Macroeconomic and Microeconomic Policy* evaluates and develops macroeconomic and microeconomic policy options to achieve inclusive growth and promote decent work outcomes, productivity, entrepreneurship and innovation.
- *Growth Path and Decent Work* develops and coordinates master plans and constituency-based interventions on behalf of business, labour and communities to support the creation of decent work, entrepreneurship and innovation.

#### Entity overview

The Companies and Intellectual Property Commission was established in terms of section 185 of the Companies Act (2008) to register companies, close corporations, cooperatives, trademarks, patents, designs and copyright, and enforce rules and regulations.

Over the medium term, the commission aims to provide its services globally – 24 hours a day, 7 days a week – and modernise its ICT systems to strengthen and expand the use of virtual channels such as the BizPortal website and mobile app. An estimated R240 million over the medium term is earmarked for ICT modernisation, of which R192 million is to provide for maintaining secure, accurate and accessible registration services for companies and intellectual property. R9.8 million of this amount is for training and mentoring personnel to use the system more effectively to handle queries and develop their capabilities in intellectual property services.

The number of education and awareness workshops on company and intellectual property law is set to increase from 30 in 2022/23 to 40 in 2025/26. These activities are expected to drive an increase in projected spending on goods and services from R245.6 million in 2022/23 to R263 million in 2025/26 at an average annual rate of 2.3 per cent. Expenditure on compensation of employees is expected to increase at an average annual rate of 4.4 per cent, from R424.2 million in 2022/23 to R483.2 million in 2025/26, in line with inflationary adjustments.

Compensation of employees constitutes an estimated 62 per cent (R1.4 billion) of total expenditure over the period ahead. The commission expects to derive an estimated 96.4 per cent (R2.3 billion) of its revenue over the medium term through fees charged for the registration of companies, cooperatives, trademarks, patents and copyrights. Interest income from accumulated funds invested with the Reserve Bank is expected to amount to R86 million over the MTEF period. Total revenue is projected to increase at an average annual rate of 5.9 per cent, from R698.3 million in 2022/23 to R829.7 million in 2025/26.

### Entity overview

The Companies Tribunal was established in 2011 as a juristic person in terms of the Companies Act (2008) and became operational in 2012. It is mandated to mediate and adjudicate disputes between companies and make orders in a manner that is simple, ethical, efficient, equitable, transparent, accountable and impartial, without fear, favour or prejudice.

Over the medium term, the tribunal will continue to facilitate the resolution of company disputes through mediation, conciliation and arbitration, thereby contributing to the creation of a just, fair and ethical regulatory business environment. Through its work, the tribunal aims to support sustainable enterprise development and create a business environment that attracts investment. To enable better interaction between tribunal members and clients while allowing for cases to be managed more efficiently, the tribunal will aim to increase applicants' uptake of the case management system from 60 in 2022/23 to 70 in 2025/26.

Total expenditure is expected to increase at an average annual rate of 8.6 per cent, from R24.8 million in 2022/23 to R31.8 million in 2025/26, driven by an increase in transfers from the department to build capacity to reverse the trend of the decreasing caseload, improve marketing and communications to improve the public's awareness of the tribunal, and improve hearing facilities.

The tribunal expects to derive more than 98.1 per cent (R88.4 million) of its revenue over the MTEF period through transfers from the department. Revenue is expected to increase at an average annual rate of 7.8 per cent, from R24.5 million in 2022/23 to R30.7 million in 2025/26.

### Entity overview

The Competition Commission is a statutory body constituted in terms of the Competition Act (1998), as amended. It is empowered to investigate, control and evaluate restrictive business practices, including the abuse of dominant positions and mergers, and to promote the advocacy of competition issues to achieve equity and efficiency in the South African economy.

Over the medium term, the commission will continue to focus on strengthening its internal capacity to enable the execution of its expanded mandate, which includes the prosecution and criminalisation of certain offences, such as the abuse of dominance, in terms of the Competition Amendment Act (2018). This has led the commission to review its organisational structure, which is expected to result in an increase in the number of personnel from 261 in 2022/23 to 279 in 2025/26.

Expenditure on compensation of employees is projected to increase at an average annual rate of 3.2 per cent, from R315 million in 2022/23 to R346.5 million in 2025/26. This low rate of increase is the result of a high baseline in 2022/23 due to the receipt of additional allocations to build capacity. Compensation of employees accounts for an estimated 60.9 per cent (R996.6 million) of spending over the medium term. Total expenditure is expected to increase at an average annual rate of 2.2 per cent, from R529 million in 2022/23 to R564.7 million

in 2025/26. The commission expects to derive 85 per cent (R1.5 billion) of its revenue over the medium term through transfers from the department and the remainder through fees paid by external parties, mainly for transactions for filing for mergers and acquisitions. Revenue is anticipated to increase in line with expenditure.

### Programmes/Objectives/Activities

### Entity overview

The Competition Tribunal was established in terms of the Competition Act (1998) to promote and maintain competition in South Africa by adjudicating matters pertaining to restrictive practices, the abuse of dominant positions, and mergers. The tribunal's work supports national and departmental priorities aligned with economic transformation, job creation and the facilitation of a capable, ethical and developmental state.

Over the medium term, the tribunal will focus on adjudicating cases in a timeous, responsive and reliable manner. Expenditure on this core function is expected to comprise 47.1 per cent (R99.3 million) of total spending over the medium term. As the tribunal relies on its personnel to carry out its work, spending on compensation of employees is expected to account for 61.5 per cent (R130.8 million) of total spending, increasing at an average annual rate of 5.8 per cent, from R39 million in 2022/23 to R46.2 million in 2025/26.

The tribunal expects to derive 67.8 per cent (R133.9 million) of its revenue over the medium term through transfers from the department and the remainder through fees for merger applications. Revenue is expected to increase at an average annual rate of 5.8 per cent, from R59.7 million in 2022/23 to R70.8 million in 2025/26.

### Entity overview

The Export Credit Insurance Corporation was established in terms of the Export Credit and Foreign Investments Insurance Act (1957), as amended, to provide political and commercial risk insurance on behalf of government for the facilitation of export trade and cross-border investments. By providing comprehensive export credit and investment insurance solutions to South African exporters doing business in risky sectors or countries, the corporation contributes to the expansion of exports, economic growth and the creation of jobs.

Over the medium term, the corporation will focus on attracting business from new and existing customers to facilitate more exports and cross-border investments. It expects to do this by absorbing political and commercial risks, and protecting financial institutions and exporters through its insurance products. Accordingly, over the period ahead, the corporation plans to approve 12 projects worth a total of US\$1.7 billion, and a targeted 21 export companies are set to benefit from the Export Passport training programme. The entity has earmarked R88.6 million over the medium term for its contribution to trade facilitation programmes.

Total expenditure is expected to decrease at an average annual rate of 29.8 per cent, from R1.6 billion in 2022/23 to R564.4 million in 2025/26, mainly due to the significant increase in the revised spending estimate in 2022/23 attributable to a claim of R753.8 million for a project in distress. Payments for the interest make-up scheme, which is winding down, are expected to amount to R398.5 million over the medium term. As a result, spending on liability is expected to decrease from R537.9 million in 2022/23 to R194.4 million in 2025/26.

Revenue is expected to increase at an average annual rate of 13.1 per cent, from R1.1 billion in 2022/23 to R1.6 billion in 2025/26. This is mainly driven by the transition in accounting standards from international financial reporting standard 4 to 17, which increases the value of the premium in the suspense account. The increase is further attributed to the anticipated increase in projects underwritten over the medium term, and income earned on invested insurance premiums.

### Entity overview

The Industrial Development Corporation is a development finance institution established in terms of the Industrial Development Act (1940) to lead the development of industrial capacity by investing in individual business enterprises, and by acting as a catalyst for the creation or revitalisation of industries.

The corporation plans to facilitate investment of more than R160 billion over the medium term to contribute to the creation of employment and an inclusive economy. Of this amount, R22.4 billion will be provided to black industrialists and R36.6 billion will be earmarked for companies owned by historically disadvantaged groups,

including women and young entrepreneurs. This funding is aimed at supporting businesses operating in targeted industries such as manufacturing, agriculture and agro-processing, mining and minerals beneficiation, and special economic zones that promote localisation.

The corporation expects to bring in a strategic equity partner to take over some of the equity in its major subsidiaries, resulting in a significant decrease in expenditure and revenue as the operational activities of subsidiaries shift to the partner. Accordingly, expenditure is expected to decrease at an average annual rate of 22.2 per cent, from R20.9 billion in 2022/23 to R9.8 billion in 2025/26. Similarly, revenue is expected to decrease at an average annual rate of 12.2 per cent, from R23.6 billion in 2022/23 to R16 billion in 2025/26. The corporation expects to generate 87.6 per cent (R50.6 billion) of its revenue over the medium term through interest income from loans and other revenue streams, such as dividends from equity investments. The sale of goods and services by the corporation's subsidiaries accounts for the remaining 12.4 per cent (R2 billion).

Number of investigations on enforcement of permit conditions per year	Import and export control		26	7	6	12	12	12	12

### Entity overview

The International Trade Administration Commission was established in terms of section 7 of the International Trade Administration Act (2002). It is mandated to foster economic growth and development, raise income levels, and promote investment and employment in South Africa and the common customs area by establishing an efficient and effective administration system for international trade.

The commission's core functions are to conduct customs tariff investigations, institute trade remedies, and provide import and export controls. Its ongoing strategic focus is contributing to the growth and development of local industries, and providing continued support to the department and government. Over the medium term, it plans to achieve this by regulating the movement of specific goods across the borders of South Africa; conducting trade remedy investigations in accordance with policy and domestic and international law; and setting tariffs in an effort to promote domestic manufacturing activity, employment retention and creation, and international competitiveness. In carrying out its duties over the medium term, the commission plans to issue 16 000 import and 12 000 export permits, conduct 120 scheduled container inspections and 1 800 unscheduled container inspections, and initiate investigations on 80 per cent of new anti-dumping cases.

The commission will focus on strengthening its internal capacity over the medium term to enable the execution of its expanded mandate, which includes the development, establishment and management of the metal trade licence regime. This includes implementing the scrap metal trade strategy to curb damage to critical economic infrastructure as a result of the higher demand for scrap metal locally and internationally.

Compensation of employees is the commission's main cost driver, constituting an estimated 82.5 per cent (R304.8 million) of total spending over the period ahead. Total expenditure is expected to increase at an average annual rate of 4.7 per cent, from R110 million in 2022/23 to R126.1 million in 2025/26. Transfers from the department account for an estimated 98.6 per cent (R363.6 million) of the commission's revenue over the period ahead. Revenue is set to increase in line with expenditure.

**Entity overview**

The National Consumer Commission was established in terms of section 85 of the Consumer Protection Act (2008), with jurisdiction across South Africa. The commission conducts investigations against suppliers allegedly engaging in prohibited conduct; promotes the resolution of disputes between consumers and suppliers; and promotes compliance with the act through advocacy, education and awareness.

Over the medium term, the commission will continue to focus on conducting investigations into suspected suppliers and enforcing their compliance with the act, conducting education and awareness campaigns to ensure greater compliance, and reforming legislation or practices that are inconsistent with the act. In doing this, it seeks to facilitate the resolution of disputes between consumers and suppliers in a speedy, cost-effective, fair and transparent manner by finalising 80 per cent of investigations and finalising 90 per cent of investigations in which further enforcement action was taken within prescribed timelines.

As this work is labour intensive, compensation of employees accounts for an estimated 68.4 per cent (R152.7 million) of the commission's projected spending over the medium term. Total expenditure is expected to increase at an average annual rate of 9.8 per cent, from R61.6 million in 2022/23 to R81.5 million in 2025/26, mainly driven by an additional allocation of R9 million over the medium term to implement cost-of-living adjustments. The commission expects to derive 97.9 per cent (R221.6 million) of its revenue over the medium term through transfers from the department and the remainder through interest on investments.

**Entity overview**

The National Consumer Tribunal was established in terms of the National Credit Act (2005) as an independent adjudicative entity. It is mandated to review decisions made by the National Credit Regulator and the National Consumer Commission, and adjudicates on applications and referrals in terms of the National Credit Act (2005) and the Consumer Protection Act (2008). Various parties bring cases before the tribunal, including the National Credit Regulator, the National Consumer Commission, consumers, credit providers, debt counsellors and credit bureaus. The tribunal may impose remedies and/or administrative penalties, as provided for in the acts.

The tribunal will continue to focus on the adjudication of cases and manage the expected increase in its caseload from 26 000 in 2022/23 to 27 000 in 2025/26 owing to the implementation of regulations pertaining to the National Credit Amendment Act (2014). Despite this increase, the tribunal intends to reduce the average number of days to issue orders to filing parties from 60 in 2022/23 to 50 in 2025/26.

Due to the nature of the tribunal's work, compensation of employees accounts for an estimated 67.4 per cent (R152.9 million) of total spending, increasing at an average annual rate of 5.8 per cent, from R45.3 million in 2022/23 to R53.6 million in 2025/26. Total expenditure is expected to increase at an average annual rate of 3.4 per cent, from R70.6 million in 2022/23 to R78.2 million in 2025/26. The tribunal expects to derive 77.7 per cent (R173.5 million) of its revenue over the medium term through transfers from the department. Revenue is set to increase in line with expenditure.

**Entity overview**

The National Credit Regulator was established in terms of the National Credit Act (2005) and is responsible for the regulation of the South African credit industry. The regulator is mandated to promote the development of an accessible credit market, particularly to address the needs of historically disadvantaged people, low-income individuals, and remote, isolated or low-density communities.

Over the medium term, the regulator will focus on carrying out education, research and policy development, registering industry participants, investigating complaints and enforcing the National Credit Act (2005). To achieve this, the regulator plans to: conduct 1 440 investigations into the cost of credit and take enforcement action in 86 per cent of cases where noncompliance is detected; conduct 1 260 investigations into reckless lending and/or collection of prescribed debt and take enforcement action in 85 per cent of cases where noncompliance is detected; and conduct 15 investigations on the removal of debt records and take enforcement action in 86 per cent of cases where noncompliance is detected. It also seeks to evaluate all annual compliance reports submitted by credit bureaus and certified by an independent auditor, and take enforcement action in 86 per cent of cases where noncompliance is detected. The regulator also plans to conduct 534 consumer education and awareness activities over the period ahead, with 60 of these focusing on responsible credit borrowing, 24 on financial literacy and 450 on credit marketing practices.

To enable the regulator to meet these targets, total expenditure is expected to increase at an average annual rate of 4.2 per cent, from R138.8 million in 2022/23 to R157.1 million in 2025/26. Spending on compensation of employees accounts for an estimated 60 per cent (R270.3 million) of total expenditure, increasing at an average annual rate of 4.1 per cent. Spending on goods and services is expected to increase at an average annual rate of 7.4 per cent, from R47.1 million in 2022/23 to R58.5 million in 2025/26, mainly as a result of quarterly workshops to encourage the unregistered credit lenders to register in terms of the National Credit Act (2005). This is expected to lead to an increase in registration fee revenue at an average annual rate of 5.6 per cent, from R49.8 million in 2022/23 to R58.7 million in 2025/26. The regulator expects to derive 59.3 per cent (R263.7 million) of its revenue over the MTEF period through transfers from the department and the remainder through registration fees.

### Programmes/Objectives/Activities

Number of job opportunities supported per year	Fund management		1 378	1 428	3 456	4 154	4 235	5 294	5 575

1. Indicator discontinued and reintroduced the following year.

### Entity overview

The National Empowerment Fund was established in terms of the National Empowerment Fund Act (1998) to promote and facilitate black economic empowerment and economic transformation. In providing financial and nonfinancial support to black businesses and structuring accessible retail savings products for black people, the fund is mandated to implement the codes of good practice for black economic empowerment. Funding is disbursed to beneficiaries through 5 core divisions: small, medium and micro enterprises (SMMEs), rural development, venture capital, corporate finance and women empowerment.

Funding approvals are projected to increase from R1 billion in 2022/23 to R2 billion in 2025/26, driven by high demand for funding mainly from the uMnotho Fund, the iMbewu Fund, the Rural and Community Development Fund, the Strategic Projects Fund and the Women Empowerment Fund as most businesses recover from the impact of the COVID-19 pandemic. By supporting businesses in priority sectors such as manufacturing, agro-processing, minerals beneficiation, infrastructure and tourism, these funds are expected to sustain and create 15 854 job opportunities over the period ahead.

Expenditure is expected to increase at an average annual rate of 11.1 per cent, from R351.2 million in 2022/23 to R481.8 million in 2025/26, mainly due to an increase in spending on goods and services driven by the increase in demand for funding. Spending on compensation of employees constitutes an estimated 58 per cent (R779.4 billion) of total expenditure. The entity derives its revenue mainly through interest and dividends. Revenue is expected to increase at an average annual rate of 10.1 per cent, from R360.9 million in 2022/23 to R482 million in 2025/26, also driven by the expected increase in lending activities.

### Programmes/Objectives/Activities

## National Gambling Board

### Selected performance indicators

**Table 39.68 National Gambling Board performance indicators by programme/objective/activity and related priority**

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of broad-based public educational interventions conducted about the risks and socioeconomic impact of gambling per year	Corporate services and research	Priority 1: A capable, ethical and developmental state	13	10	10	10	10	30	30
Number of reports on gambling sector performance submitted to the accounting authority per year	Gaming control and compliance		5	5	4	5	5	5	5
Number of economic analysis and research reports on the impact of gambling submitted to the accounting authority per year	Gaming control and compliance		4	4	3	4	1	1	1
Number of reports on advice provided in terms of section 65 of the National Gambling Act (2004) submitted to the accounting authority per year	Gaming control and compliance		4	5	5	5	1	1	1
Percentage uptime on functional national registers per year	Gaming control and compliance		100% (8 784 hours)	100% (8 760 hours)	100% (8 760 hours)	95%	95%	95%	95%

### Entity overview

The National Gambling Board was established in terms of the National Gambling Act (2004). It is mandated to maintain a legal, safe and crime-free gambling environment, and protect gamblers from exploitation. The board's ongoing focus is on monitoring the socioeconomic patterns of gambling activities; conducting research on the impact of addictive and compulsive gambling; maintaining a national central electronic monitoring system, a national registry of gambling machines and devices, and other prescribed national registers; and conducting public education and awareness campaigns about the dangers of gambling.

Over the medium term, the board will focus on establishing uniform norms and standards for the gambling industry by coordinating activities such as the development of policy and regulations between the national and provincial spheres of government. To promote responsible gambling, the board plans to conduct 30 broad-based public educational interventions about the risks and socioeconomic impact of gambling across the country over the period ahead.

Expenditure is expected to increase at an average annual rate of 2.6 per cent, from R259.7 million in 2022/23 to R280.1 million in 2025/26. Goods and services accounts for 80.1 per cent (R647.9 million) of expenditure, mainly driven by management fees for the national central electronic monitoring system. The board expects to generate 84.6 per cent (R696.5 million) of its revenue over the medium term from the national central electronic monitoring system and the remainder through transfers from the department. Revenue is expected to increase at an average annual rate of 2.7 per cent, from R259.7 million in 2022/23 to R281.3 million in 2025/26.

**Entity overview**

The National Lotteries Commission has a dual mandate: to regulate and prohibit lotteries and sports pools, and

to provide for matters connected with them; and to ensure that funds are distributed equitably and expeditiously to advance the socioeconomic wellbeing of communities in need. Over the MTEF period, the commission will continue to ensure that the national lottery maintains its integrity, that players are protected through the regulation of lotteries and sports pools, and that charitable disbursements have positive effects on communities. The commission plans to disburse R4.5 billion to beneficiaries over the medium term.

Total expenditure is expected to decrease at an average annual rate of 0.6 per cent, from R643.8 million in 2022/23 to R632.2 million in 2025/26. Compensation of employees accounts for an estimated 53.4 per cent (R953.8 million) of total spending, decreasing at an average annual rate of 2.4 per cent, from R358.9 million in 2022/23 to R333.6 million in 2025/26. Revenue is expected to decrease in line with expenditure, mainly due to the expiration of the national lottery operator's licence, which results in operations being temporarily halted. The commission expects to derive 99.2 per cent (R1.8 billion) of its revenue over the medium term from the national lottery operator.

### National Metrology Institute of South Africa

#### Selected performance indicators

**Table 39.76 National Metrology Institute of South Africa performance indicators by programme/objective/activity and related priority**

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance 2022/23	MTEF targets		
			2019/20	2020/21	2021/22		2023/24	2024/25	2025/26
Number of new and improved national measurement standards, reference materials and reference methods developed per year	Keep, maintain and disseminate national measurements	Priority 7: A better Africa and world	21	25	28	17	19	24	26
Number of courses provided, including for SMMEs, per year	Keep, maintain and disseminate national measurements	Priority 3: Education, skills and health	18	10	20	24	20	23	24
Number of accredited laboratories and new laboratory accreditations per year	Keep, maintain and disseminate national measurements	Priority 7: A better Africa and world	23	24	23	26	26	26	26
Number of metrologists trained per year	Keep, maintain and disseminate national measurements	Priority 3: Education, skills and health	120	- <sup>1</sup>	155	133	139	137	137
Number of base units of the International Systems of Units realised per year	Keep, maintain and disseminate national measurements	Priority 7: A better Africa and world	6	6	6	6	6	6	6

1. Indicator discontinued and reintroduced the following year.

#### Entity overview

The National Metrology Institute of South Africa is mandated by the Measurement Units and Measurement Standards Act (2006) to ensure that South Africa has a scientifically valid and internationally comparable and accepted measurement system, and that the international system of units is correctly applied. Without this

measurement infrastructure, it is difficult to manufacture to international specifications and tolerances, and ensure the integrity of export and import commodities. This makes the institute's work vital for trade, health, safety and law enforcement.

Over the medium term, the institute will continue to invest in the development of new and improved national measurement standards, reference materials and reference methods in line with industrial requirements. To this end, the institution plans to develop 69 new and improved national measurement standards and reference materials and methods over the medium term. These are intended to ensure accurate measurements for the country and the region, and promote the integrity of measurements at various stages of the value chains of different commodities and manufactured products.

Expenditure is expected to increase at an average annual rate of 1.5 per cent, from R221.1 million in 2022/23 to R231 million in 2025/26, with compensation of employees accounting for an estimated 61.2 per cent (R406.8 million) of total spending over the medium term. The institute expects to derive 81.8 per cent (R532.5 million) of its revenue over the medium term through transfers from the department and the remainder from services rendered and interest income. Revenue is expected to increase at an average annual rate of 0.3 per cent, from R228.7 million in 2022/23 to R231 million in 2025/26.

### Programmes/Objectives/Activities

### Entity overview

The National Regulator for Compulsory Specifications was established in terms of the National Regulator for Compulsory Specifications Act (2008), as amended, to administer compulsory specifications, otherwise known as technical regulations.

The regulator aims to protect public health, safety and the environment and promote fair trade by ensuring that businesses produce, import or sell products or provide services that comply with minimum safety and environmental requirements. Accordingly, it plans to perform 67 290 inspections over the medium term and remove or destroy noncompliant products. The regulator is in an advanced stage of implementing enterprise resource planning software. Full implementation of the software, which will take place over the MTEF period, is expected to improve operational efficiency by improving turnaround times, data quality and reporting that informs decision-making.

Expenditure is expected to increase at an average annual rate of 4.6 per cent, from R571.1 million in 2022/23 to R653.2 million in 2025/26. Spending on compensation of employees constitutes an estimated 76.9 per cent (R1.4 billion) of total spending over the medium term. The regulator expects to derive 71.8 per cent (R1.3 billion)

of its revenue over the medium term through levies charged to manufacturers and the remainder through transfers from the department. Revenue is expected to increase at an average annual rate of 4.6 per cent, from R571.1 million in 2022/23 to R653.6 million in 2025/26.

### Entity overview

The Small Enterprise Finance Agency was established in 2012 and is a wholly owned subsidiary of the Industrial Development Corporation that derives its mandate from the Industrial Development Act (1940), particularly the objectives related to the development of SMMEs. The agency contributes to the sustainability and development of SMMEs and cooperatives in both the formal and informal sectors by providing access to finance through innovative solutions.

Over the medium term, the agency will focus on implementing economic recovery programmes and offering loans to promote financial inclusion, focusing particularly on enterprises owned by young people, women, people with disabilities and people based in townships. The agency expects to disburse R5.3 billion in finance for SMMEs and cooperatives over the period ahead.

To improve operational efficiency in this regard, the agency plans to digitise systems for core lending processes such as originating loans, conducting due diligence, and processing approvals and disbursements; and back office business processes such as finance and procurement, human capital and facilities, governance, risk and compliance. The digitisation drive is expected to cost R48 million over the MTEF period.

Expenditure is expected to increase at an average annual rate of 4.1 per cent, from R1.1 billion in 2022/23 to R1.2 billion in 2025/26. To meet the agency's medium-term objectives, spending on goods and services is expected to account for an estimated 71.8 per cent (R2.6 billion) of total expenditure. Revenue is expected to increase at an average annual rate of 11.4 per cent, from R826 million in 2022/23 to R1.1 billion in 2025/26, due to the realisation of deferred grants income as part of the implementation of the economic recovery programmes. Transfers from the department are estimated to account for 56.8 per cent (R1.8 billion) of the agency's revenue over the medium term. The rest of its revenue is generated by interest on loans and advances to clients, fees on loans, and rental income.

**Entity overview**

The South African Bureau of Standards was established as a statutory body in terms of the Standards Act (2008) and is part of South Africa's standardisation, quality assurance, accreditation and metrology technical infrastructure institutions. The bureau is mandated to develop, promote and maintain South African national standards; render conformity assessment services; and promote the quality of commodities, products and services in an effort to protect the integrity of the South African market, protect consumers, create a competitive advantage, and facilitate access for South Africans to local and international markets.

Over the medium term, the bureau will continue to revitalise testing operations and facilities in targeted sectors such as cement, radiation protection services and the automotive industry. The bureau also intends to improve its standard development processes to enable industrialisation and faster turnaround times. It expects to do this by enhancing digital collaborative tools to effectively engage with stakeholders that participate in its technical committees.

Expenditure is expected to increase at an average annual rate of 3.1 per cent, from R851.6 million in 2022/23 to R934.1 million in 2025/26. Spending on compensation of employees accounts for an estimated

52.3 per cent (R1.4 billion) of total medium-term spending. The bureau expects to generate 63.6 per cent (R1.7 billion) of its revenue over the MTEF period from fees for certification, testing, the sale of publications, and consulting and training services, and the remainder through transfers from the department. Revenue is expected to increase at an average annual rate of 3.6 per cent, from R843.9 million in 2022/23 to R939.1 million in 2025/26.

### South African National Accreditation System

#### Selected performance indicators

**Table 39.92 South African National Accreditation System performance indicators by programme/objective/activity and related priority**

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of accredited organisations per year	Provision of accreditation services	Priority 1: A capable, ethical and developmental state	1 782	1 858	1 960	2 059	2 157	2 265	2 351
Number of registered black assessors per year	Provision of accreditation services		296	304	314	324	371	400	430

#### Entity overview

The South African National Accreditation System was established in terms of the Accreditation for Conformity Assessment, Calibration and Good Laboratory Practice Act (2006). It is mandated to accredit or monitor for good laboratory practice and compliance; promote accreditation as a means of facilitating international trade to enhance South Africa's economic performance and transformation; and promote the competence and equivalence of accredited bodies, and good laboratory practice facilities compliant with the act.

Over the medium term, the entity will focus on strengthening the effectiveness of accreditation to support local manufacturing and improve access to export markets for South African firms. This involves regulating and monitoring compliance with conformity requirements so that South African products are not rejected, and encouraging and promoting the accreditation of calibration, testing and verification laboratories, certification and inspection bodies, rating agencies, and any other type of body that may be added to its scope of activities.

Expenditure is set to increase at an average annual rate of 4.5 per cent, from R133.9 million in 2022/23 to R152.6 million in 2025/26. Spending on compensation of employees constitutes an estimated 51.7 per cent (R226 million) of total expenditure over the period ahead. The entity expects to generate 75.2 per cent (R328.2 million) of its own revenue over the medium term through fees collected from accredited facilities, new applications, commercial training and interest income; and the remainder through transfers from the department. Revenue is expected to increase in line with expenditure.

### Programmes/Objectives/Activities

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Lead the provision of an integrated, sustainable, reliable and safe transport system through planning, developing, coordinating, promoting and implementing transport policies, regulations and strategies.

### Mandate

The Constitution identifies the legislative responsibilities of different levels of government with regards to all modes of transport and associated infrastructure. The Department of Transport is responsible for the legislation and policies for rail, pipelines, roads, airports and harbours, and the intermodal operations of public transport and freight. Consequently, it conducts sector research, formulates legislation and policy to set the strategic directions of subsectors, assigns responsibilities to public entities, regulates through setting norms and standards, and monitors implementation.

### Selected performance indicators

## Expenditure overview

Over the medium term, the department aims to streamline efforts towards improving mobility and access to social and economic activities. It expects to achieve this by cultivating an enabling environment for the maintenance of national and provincial road networks, facilitating integrated road-based public transport services and revitalising passenger services. Transfers and subsidies account for an estimated 91.4 per cent (R255.2 billion) of the department's expenditure over the next 3 years, increasing at an average annual rate of 9.7 per cent. Of this, R155 billion is directed towards transport public entities and agencies to carry out their mandated functions, and R98.5 billion is transferred to other spheres of government through the *provincial roads maintenance grant*, the *public transport operations grant*, the *public transport network grant* and the *rural roads asset management systems grant*.

Other notable spending over the period ahead is on goods and services, with an allocation of R3.5 billion, and compensation of employees, with an allocation of R1.7 billion. The goods and services budget will mainly be used to fund the expansion of the central roads data repository, operational costs associated with the administration of the recapitalisation of taxis, and unitary payments towards building a tugboat for monitoring South Africa's coastlines under the department's maritime pollution prevention function. The number of personnel is expected to increase from 825 in 2022/23 to 844 in 2025/26 as the department fills critical vacancies.

### ***Cultivating an enabling environment for maintaining road networks***

The *Road Transport* programme facilitates activities related to maintaining the country's national and provincial road networks. Investments in road networks are targeted at ensuring that passengers and freight carriers, which haul almost 80 per cent of South Africa's freight load, have adequate access to safe roads.

The department has allocated R142.9 billion over the next 3 years to the *Road Transport* programme to fund efforts to construct, upgrade and maintain the national and provincial road networks. Allocations to the South African National Roads Agency are made through the programme's *Road Oversight* subprogramme, which is responsible for transferring an estimated R89 billion to the agency over the MTEF period. The agency plans to use R56.5 billion of its departmental transfer to strengthen and upgrade the national non-toll network, R3.9 billion for the N2 Wild Coast project, R2.9 billion for the R573 (Moloto Road) development corridor and R2.2 billion for the Gauteng freeway improvement project. The agency received a special allocation of R23.7 billion in 2022/23 as a partial solution to the Gauteng freeway improvement project not generating enough toll revenue to service the debt raised for its construction. This allocation is expected to provide the agency with sufficient funds to service several large debt redemptions and related maintenance in 2023/24. As

a result of this one-off allocation in 2022/23, spending in *Road Transport* programme is expected to decrease at an average annual rate of 4.1 per cent, from R60 billion in 2022/23 to R52.9 billion in 2025/26.

The road maintenance component of the *provincial roads maintenance grant* provides for the maintenance and rehabilitation of the provincial road network to prolong its lifespan. R52.3 billion is allocated to the grant over the medium term, of which R10.6 billion is specifically earmarked for road refurbishment, disaster relief and the construction of 96 bridges in rural areas. Provinces are expected to use funds from the grant to rehabilitate 9 893 lane kilometres, reseal 13 122 lane kilometres, regravell 19 355 kilometres and blacktop-patch 6.5 million square kilometres.

### **Facilitating integrated road-based public transport services**

The department plans to achieve a seamless integration of all modes of public transport to deliver an efficient, safe and reliable public transport system. R60 million is set aside over the medium term to pilot the integration of all road-based public transport ticketing systems. The *public transport network grant* funds the infrastructure and indirect costs of bus rapid transit services in 10 cities, including Cape Town, Ekurhuleni, George, Johannesburg, Nelson Mandela Bay and Tshwane. Funding from the grant is expected to lead to a combined increase in the number of weekday passenger trips on bus rapid transit services in these cities from 250 555 in 2022/23 to 363 490 in 2025/26. Transfers to the grant, through the *Public Transport* programme, are set to increase from R6 billion in 2022/23 to R8.4 billion in 2025/26. Transfers to the *public transport operations grant*, which subsidises bus services in provinces, are expected to increase from R7.1 billion in 2022/23 to R8.1 billion in 2025/26. Together, these grants account for an estimated R46.1 billion of the department's planned spending over the MTEF period.

### **Revitalising passenger rail services**

To address the deterioration of passenger rail services, transfers to the Passenger Rail Agency of South Africa through the *Rail Transport* programme are focused on the recovery of the rail network. These amount to an estimated R64.1 billion over the period ahead, 23.6 per cent of the department's total budget, and will mainly be used for the agency's shift in focus towards implementing its strategic corridor recovery programme and continuing with its drive to renew rolling stock. The transfers include funding for capital expenditure, which increase at an average annual rate of 3.8 per cent, from R12.6 billion in 2022/23 to R14.1 billion in 2025/26. The portion of the transfers to the agency for operational expenditure is set to increase at an average annual rate of 4.3 per cent, from R7.2 billion in 2022/23 to R8.2 billion in 2025/26, as more commuter lines come online.

## Programme 2: Integrated Transport Planning

Integrate and harmonise macro-transport sector policies, strategies and legislation. Coordinate and develop sector-related policies, research activities, and regional and intersphere relations. Facilitate sector transformation and provide sector economic modelling and analysis.

### Objectives

- Reduce greenhouse gas emissions from transport by:
  - developing green procurement guidelines for land transport by March 2024
  - developing a draft framework for electric vehicle regulation and autonomous vehicle technology by March 2024
  - monitoring the implementation of the green transport strategy on an ongoing basis.
- Improve competition and access in the transport sector by:
  - establishing an economic regulator for the transport sector by March 2025
  - finalising the regional integration strategy by March 2024
  - developing a freight migration plan (road to rail) by March 2024.

### Subprogrammes

- *Macro Sector Planning* examines land use and transport planning in all spheres of government from a multimodal perspective, and manages and facilitates the implementation of the planning provisions contained in the National Land Transport Act (2009).
- *Freight Logistics* develops and coordinates the implementation of freight logistics strategies aimed at unblocking bottlenecks in the freight logistics system and related supply chains, with emphasis on integrating elements of the system across all modes.
- *Modelling and Economic Analysis* undertakes economic studies, provides innovative and enabling funding options for transport infrastructure that respond to the socioeconomic needs of the national agenda, and applies economic analysis tools for the development of policy in the transport sector.
- *Regional Integration* manages, coordinates and facilitates the development of strategies for engagements in the Southern African Development Community region and the rest of Africa.
- *Research and Innovation* ensures research, innovation and monitoring of the transport sector for sustainability.
- *Integrated Transport Planning Administration Support* provides strategic leadership and administrative support to the programme.

## Programme 3: Rail Transport

### Programme purpose

Facilitate and coordinate the development of sustainable rail transport policies, rail economic and safety regulation, and infrastructure development strategies that reduce system costs and improve customer service. Oversee rail public entities and the implementation of integrated rail services.

## Objectives

- Improve rail safety and security by developing regulations for the Railway Safety Bill by March 2024.
- Improve access to commuter rail services by monitoring and reviewing the performance of the Passenger Rail Agency of South Africa on an ongoing basis.
- Improve competition in the rail sector by finalising the private sector participation framework by March 2024 for implementation by March 2025.

## Subprogrammes

- *Rail Regulation* is responsible for the development of rail policies, and safety and economic regulations.
- *Rail Infrastructure and Industry Development* coordinates the development and maintenance of, and investment in, rail infrastructure.
- *Rail Operations* coordinates the implementation of integrated rail services, and monitors and analyses service delivery challenges facing the rail industry.
- *Rail Oversight* manages and tracks the performance of the Passenger Rail Agency of South Africa and the Railway Safety Regulator, and manages transfer payments to these entities.
- *Rail Administration Support* provides strategic leadership and administrative support to the programme.

## Programme 4: Road Transport

### Programme purpose

Develop and manage an integrated road infrastructure network, regulate road transport and ensure safer roads. Oversee road public entities.

### Objectives

- Improve transport safety and security by:
  - monitoring the implementation of the national road safety strategy on an ongoing basis
  - finalising the National Road Traffic Amendment Bill by March 2024 and developing the associated regulations by March 2025

- finalising due diligence for the rationalisation of road public entities by March 2024.
- Increase access to affordable and reliable transport systems by:
  - drafting the road infrastructure funding policy and submitting it to Cabinet by March 2024
  - monitoring and reviewing the performance of the *provincial roads maintenance grant* in terms of the annual Division of Revenue Act.

### Subprogrammes

- *Road Regulation* synchronises road safety and traffic management legislation, and oversees the inspectorate for driving licences and vehicle testing stations.
- *Road Infrastructure and Industry Development* facilitates and coordinates the planning, development and implementation of a sustainable and reliable integrated road infrastructure network, and the enhancement of capacity in the industry.
- *Road Oversight* reviews and analyses the performance of road transport public entities and monitors their compliance with regulations and legislation. This subprogramme also transfers funds to the South African National Roads Agency, the Road Traffic Management Corporation, the Road Traffic Infringement Agency and the *provincial roads maintenance grant*.
- *Road Administration Support* provides strategic leadership and administrative support to the programme.
- *Road Engineering Standards* develops and implements road engineering standards and coordinates the development of an asset management system for safe and resilient road infrastructure.

## Programme 5: Civil Aviation

### Programme purpose

Facilitate the development of an economically viable air transport industry that is safe, secure, efficient, environmentally friendly and compliant with international standards through regulation and investigations. Oversee aviation entities.

### Objectives

- Improve air transport safety and security by:
  - submitting the draft South African Maritime and Aeronautical Search and Rescue Bill to Cabinet by March 2024
  - establishing and operationalising an independent aircraft and incident investigation body by March 2025
  - developing, promulgating and implementing the Civil Aviation Amendment Bill and relevant regulations by March 2024
  - drafting an analysis report on the state of aviation accidents and incidents by March 2024.

### Subprogrammes

- *Aviation Policy and Regulations* develops and maintains the civil aviation regulatory regime to respond to national imperatives and international norms, standards and protocols.
- *Aviation Economic Analysis and Industry Development* provides aviation economic analysis, and develops relevant frameworks for industry development and airfreight logistics activities.
- *Aviation Safety, Security, Environment, and Search and Rescue* develops and monitors South Africa’s aviation safety, security, environment, and search and rescue regime; and manages investigations into aviation accidents and serious incidents to identify deficiencies and make safety recommendations on mechanisms to address them.
- *Aviation Oversight* monitors the performance of Airports Company South Africa, the Air Traffic and Navigation Services Company and the South African Civil Aviation Authority, in line with the legislative framework.
- *Aviation Administration Support* provides strategic leadership and administrative support to the programme.

## Programme 6: Maritime Transport

### Programme purpose

Promote a safe, reliable and economically viable maritime transport sector through the development and implementation of policies and strategies. Oversee maritime public entities.

### Objectives

- Increase access to affordable and reliable maritime transport by:
  - finalising the Maritime Development Fund Bill by March 2024
  - monitoring and reviewing the implementation of the Operation Phakisa Oceans Economy 3-foot plan to encourage growth in the sector on an ongoing basis
  - finalising the status report on the corporatisation of the Transnet National Ports Authority by March 2024.
- Improve the competitiveness and accessibility of the maritime sector by drafting the bunkering infrastructure and services framework for submission to Cabinet by March 2025.
- Reduce greenhouse gas emissions and pollution by submitting the Marine Pollution (Prevention of Pollution from Ships) Amendment Bill to Parliament by March 2024.
- Improve the regulatory environment and market access by submitting the Merchant Shipping Bill to Parliament by March 2025.

### Subprogrammes

- *Maritime Policy Development* develops and maintains a maritime regulatory regime that is responsive to national imperatives and international norms, standards and protocols. This subprogramme is also responsible for the development and maintenance of maritime policies and strategies.
- *Maritime Infrastructure and Industry Development* facilitates the development of integrated maritime infrastructure and an integrated maritime industry.
- *Implementation, Monitoring and Evaluation* ensures that legislation, policies and strategies pertaining to maritime safety, security and environmental protection are implemented.
- *Maritime Oversight* makes transfers to public entities in the maritime field, the South African Maritime Safety Authority and the Ports Regulator of South Africa, and oversees these entities' compliance with relevant regulations and legislation.
- *Maritime Administration Support* provides strategic leadership and administrative support to the programme.

## Programme 7: Public Transport

### Programme purpose

Provide and regulate safe, secure, reliable, cost-effective and sustainable public transport services in South Africa through legislation, policies and strategies.

## Objectives

- Improve public transport planning by assisting 2 district municipalities per year over the medium term to develop integrated public transport network plans.
- Promote sustainable public transport and improve access and reliability by:
  - finalising the public transport subsidisation strategy and developing a public transport funding model by March 2024
  - developing the operationalisation business case for the national public transport regulator
  - implementing the recommendations of the review of the taxi recapitalisation programme by March 2025
  - piloting and monitoring the single ticketing system for all government-subsidised public transport operators by March 2024
  - monitoring the implementation of an integrated public transport network in 10 municipalities on an ongoing basis.
- Enhance the regulation of public transport by supporting the parliamentary process of the Transport Appeal Tribunal Amendment Bill for approval by March 2024.

## Subprogrammes

- *Public Transport Regulation* manages the development and maintenance of policy, legislation and regulation; and coordinates and facilitates implementation. This subprogramme is responsible for managing public transport information on public transport systems developed in terms of the National Land Transport Act (2009).
- *Rural and Scholar Transport* develops and reviews rural, scholar and non-motorised transport strategies, and coordinates and evaluates their implementation.
- *Public Transport Industry Development* oversees and facilitates the implementation of public transport policy, legislation and strategy, develops public transport empowerment schemes, manages the taxi recapitalisation programme, and facilitates stakeholder relations and conflict resolution in the industry.
- *Public Transport Oversight* oversees the use of public transport subsidies and grants, and monitors compliance with the annual Division of Revenue Act in terms of the transferring of funds, reporting, allocations and adjustments.
- *Public Transport Administration Support* provides strategic leadership and administrative support to the programme.
- *Public Transport Network Development* develops norms and standards for integrated public transport systems to assist in providing accessible, reliable, affordable and integrated public transport network services in municipalities.

#### Entity overview

The Air Traffic and Navigation Services Company is mandated to provide safe, orderly and efficient air traffic navigational and associated services to the air traffic management community in terms of the Air Traffic and Navigation Services Act (1993). All its services are in accordance with the International Civil Aviation Organisation standards and the civil aviation regulations issued in terms of the Civil Aviation Act (2009).

The Air Traffic and Navigation Services Company maintains its focus on providing safe, efficient and cost-effective air traffic management solutions and related services, with an estimated 78 per cent (R4.4 billion) of the entity's budget over the MTEF period expected to be used on communication, surveillance and simulator systems. Compensation of employees comprises 58.3 per cent (R3.3 billion) of total expenditure over the period ahead, while goods and services accounts for 26.6 per cent. R823.9 million over the MTEF period is earmarked for capital expenditure. Total expenditure is expected to increase at an average annual rate of 10.6 per cent, from R1.5 billion in 2022/23 to R2 billion in 2025/26.

The company generates its own revenue through the provision of aeronautical services to the aviation industry such as en-route and approach fees, aerodrome and area fees, and terminal manoeuvring area fees. Total revenue is expected to increase at an average annual rate of 18.2 per cent, from R1.3 billion in 2022/23 to R2.1 billion in 2025/26, as the company returns to normal operations after the lifting of COVID-19 restrictions.

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of departing passengers accommodated at national airports per year	Airport management	Entity mandate	20.9 million	4.6 million	10.6 million	13.6 million	16.8 million	17.9 million	18.5 million
Number of arrival aircraft accommodated at all airports per year	Airport management		248 519	99 880	172 980	193 247	202 938	213 580	223 148
Aeronautical revenue per departing passenger per year	Airport management		R178.09	R177.34	R169.55	R182.81	R184.07	R191.91	R191.91
Non-aeronautical revenue per departing passenger per year	Airport management		R161.90	R293.56	R198.08	R186.30	R153.15	R149.84	R149.84

### Entity overview

Airports Company South Africa was established in terms of the Airports Company Act (1993). The company owns and operates the 9 principal airports in South Africa, including the 3 main international gateways – OR Tambo International Airport, Cape Town International Airport and King Shaka International Airport.

Over the medium term, the company will focus on building and replacing infrastructure, and plans to invest approximately R1 billion in each year over the medium term on capital expenditure projects. This focus was deferred during the COVID-19 pandemic, which saw a significant decrease in commercial air travel, resulting in financial instability.

Total expenditure is expected to increase at an average annual rate of 1.1 per cent, from R5.2 billion in 2022/23 to R5.4 billion in 2025/26, with goods and services accounting for 45.3 per cent (R7.2 billion) of this spending. Revenue is expected to increase at an average annual rate of 8.5 per cent, from R5 billion in 2022/23 to R6.4 billion in 2025/26, driven by the expected increase in passenger numbers as the air travel industry continues its recovery from the pandemic.

### Programmes/Objectives/Activities

**Entity overview**

The Cross-Border Road Transport Agency is mandated to regulate the cross-border road freight and passenger industry in terms of the Cross-Border Transport Act (1998). Over the next 3 years, the agency will continue to facilitate an unimpeded flow of freight and passenger road transport across the region. To this end, the agency plans to conduct an average of 245 843 inspections to enforce cross-border road traffic law over this period.

Expenditure is expected to increase at an average annual rate of 4.4 per cent, from R274.2 million in 2022/23 to R312.5 million in 2025/26, mainly driven by spending on administration, law enforcement, and research and regulatory services. The agency expects to derive 84.2 per cent (R757.4 million) of its revenue over the MTEF period from administrative fees. Revenue is set to increase in line with spending.

1. No historical data available.

**Entity overview**

The driving licence card account was established in terms of the Public Finance Management Act (1999) to manufacture driving licence cards based on orders from testing centres across South Africa.

Over the MTEF period, the entity will focus on improving data collection, and design and introduce a new format

for driving licence cards. It will also invest in new machinery to ensure optimal manufacturing productivity. As a result, spending on production and infrastructure is expected to account for 63.2 per cent (R357.3 million) of the entity's budget over the medium term.

Total expenditure is expected to decrease at an average annual rate of 2.4 per cent, from R208.7 million in 2022/23 to R194 million in 2025/26, due to the accelerated depreciation of the current card production machine, which is nearing the end of its usable lifespan. The entity generates revenue through the sale of licence cards, increasing at an average annual rate of 3.2 per cent, from R225.7 million in 2022/23 to R248.1 million in 2025/26.

### Entity overview

The Passenger Rail Agency of South Africa was established in terms of the Legal Succession to the South African Transport Services Amendment Act (2008). Its primary mandate is to provide rail commuter services within, to and from South Africa in the public interest. The agency also provides long-haul passenger rail and bus services within, to and from South Africa.

Over the medium term, the agency will focus on ensuring the recovery of commuter rail services by implementing its strategic corridor recovery programme and modernising its core infrastructure, which includes the replacement of old rolling stock and investment in signalling infrastructure. As part of its strategic corridor recovery programme, the agency aims to restore services on Cape Town's central line and Tshwane's Mabopane line. To support this, capital expenditure is expected to increase at an average annual rate of 21.8 per cent, from R12.5 billion in 2022/23 to R22.6 billion in 2025/26. The agency also expects to acquire 176 new train sets towards its rolling stock fleet renewal programme.

Total expenditure is expected to increase at an average annual rate of 5.1 per cent, from R14.6 billion in 2022/23 to R17 billion in 2025/26, with 66.8 per cent (R32.5 billion) of this spending earmarked in the Metrorail and mainline passenger service programmes. Compensation of employees accounts for an estimated 38.8 per cent (R18.8 billion) of total spending over the period ahead.

Departmental transfers account for an estimated 89.2 per cent (R64.1 billion) of the agency's revenue over the next 3 years. Other sources of income include the sale of train and bus tickets, rental income from leasing properties, on-board sales and interest. Total revenue is expected to increase at an average annual rate of 4 per cent, from R22.2 billion in 2022/23 to R25 billion in 2025/26, driven mainly by a projected recovery in ticket sales as more commuter lines come back online.

The agency expects to run surpluses over the medium term. However, trade and other payables is expected to increase from R8.9 billion in 2022/23 to R25.4 billion in 2025/26, which suggests that the agency could face challenges in paying service providers and meeting targets over the period ahead.

## Ports Regulator of South Africa

### Selected performance indicators

Table 40.40 Ports Regulator of South Africa performance indicators by programme/objective/activity and related priority

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of global port pricing comparator studies conducted per year	Economic regulation	Priority 2: Economic transformation and job creation	1	1	1	1	1	1	1
Number of National Ports Authority tariff assessments conducted per year	Economic regulation		1	1	1	1	1	1	1
Number of port capacity and usage reviews conducted per year	Industry development		1	1	1	1	1	1	1

### Entity overview

The Ports Regulator of South Africa was established in terms of the National Ports Act (2005) to regulate South Africa's ports infrastructure system. The regulator sets port tariffs for the National Ports Authority and oversees complaints and appeals to preserve fairness, transparency and competitive practices for ports infrastructure.

The regulator will continue to focus on strengthening the economic regulation of ports infrastructure and compliance with the ports regulatory framework over the medium term. In doing so, its expenditure is expected to increase at an average annual rate of 2.9 per cent, from R44.5 million in 2022/23 to R48.5 million in 2025/26. The regulator derives its revenue from departmental transfers, which are set to increase at an average annual rate of 2.7 per cent, from R43 million in 2022/23 to R46.6 million in 2025/26. Total revenue is set to increase in line with expenditure.

## Railway Safety Regulator

### Selected performance indicators

**Table 40.44 Railway Safety Regulator performance indicators by programme/objective/activity and related priority**

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of safety initiatives conducted per year	Administration	Entity mandate	22	20	30	42	48	48	48
Number of safety performance agreements signed for high-risk operators per year	Operations		20	25	30	35	35	35	35
Number of industry safety risk profiles developed per year	Operations		1	1	1	1	1	1	1
Number of interface agreements aligned with operational risks per year	Operations		1	1	1	1	1	1	1
Number of common safety methods developed and implemented per year	Operations		1	1	1	1	1	1	1

### Entity overview

The Railway Safety Regulator was established in terms of the National Railway Safety Regulator Act (2002). The regulator is mandated to oversee railway operations, monitor operators and enforce a safe operating environment. This includes rail operators from neighbouring countries with operations that enter South Africa.

Over the medium term, the regulator will focus on its primary business of issuing safety permits to railway operators. It also plans to conduct 48 safety initiatives in 2023/24. These include education and awareness campaigns, community involvement programmes and training for safety ambassadors.

Expenditure is expected to increase at an average annual rate of 3.6 per cent, from R263.2 million in 2022/23 to R292.5 million in 2025/26. This mainly covers operational expenses such as compensation of employees, office rental, professional fees and capital expenditure. The regulator expects to generate 70 per cent (R591.1 million) of its revenue over the period ahead from administrative fees and the remainder through transfers from the department. Revenue is expected to increase in line with spending.

## Entity overview

In terms of the Road Accident Fund Act (1996), the Road Accident Fund is mandated to compensate South African road users for losses or damages caused by motor vehicle accidents within the borders of South Africa.

Over the medium term, a change in the settlement policy of loss-of-income claims from lump sum to annuity will see a moderation in the payment of claims to match the fund's pay-as-you-go principle. Accordingly, the total value of claims paid out over the MTEF period is expected to decrease from R43.3 billion in 2022/23 to R35.9 billion in 2025/26 at an average annual rate of 6.1 per cent.

The entity derives revenue from the road accident fund levy in terms of the Customs and Excise Act (1964). Transfers received through the levy are expected to increase at an average annual rate of 0.5 per cent, from R48.1 billion in 2022/23 to R48.9 billion by 2025/26, in line with an expected increase in fuel sales.

**Entity overview**

The Road Traffic Infringement Agency derives its mandate from the Administrative Adjudication of Road Traffic Offences (AARTO) Act (1998). The agency was established to administer procedures to discourage the contravention of road traffic laws, adjudicate infringements, enforce penalties for the contravention of road traffic laws, provide specialised prosecution support services, and carry out community education and awareness programmes in road safety-related matters. The agency’s activities over the medium term are focused on administration, adjudication and support, and the rollout programme.

Expenditure is expected to increase at an average annual rate of 4.5 per cent, from R487 million in 2023/24 to R555.6 million in 2025/26, with goods and services accounting for an estimated 60.8 per cent (R969.8 million) of this spending. The agency derives its revenue mainly through administrative fees and transfers from the department. Revenue is set to increase in line with expenditure.

### Entity overview

The Road Traffic Management Corporation was established through the Road Traffic Management Corporation Act (1999). It is mandated to provide national road traffic strategic planning and law enforcement, and pool public sector resources for the provision of road traffic management.

Over the medium term, the corporation plans to promote road traffic safety through education and awareness campaigns, manage road traffic data and information through the automation of processes in driving licence testing centres, maintain the electronic national traffic information system, and improve the coordination of road traffic law enforcement. Accordingly, spending on operations, the training of traffic personnel, strategic services and law enforcement is expected to account for 91.1 per cent (R5.4 billion) of the corporation's total spending over the period ahead.

Expenditure is expected to increase at an average annual rate of 8.3 per cent, from R1.6 billion in 2022/23 to R2 billion in 2025/26, mainly driven by spending on compensation of employees. The corporation derives revenue mainly through transaction fees, which account for 65.6 per cent (R3.7 billion) of total projected revenue over the period ahead. Revenue is set to increase in line with spending.

Number of aviation security inspections conducted or certificates issued per year	Civil aviation safety		1 232	877	877	877	877	877	877

### Entity overview

The South African Civil Aviation Authority was established in terms of the Civil Aviation Act (2009). The authority is mandated to oversee the safety and security of the civil aviation industry and ensure compliance with and adherence to the standards and recommended practices of the International Civil Aviation Organisation.

Over the medium term, the authority will focus on implementing safety and security programmes in line with the standards and recommended practices issued by the organisation and civil aviation regulations in South Africa. Accordingly, it plans to conduct 229 air safety infrastructure investigations and 1 374 air safety operation inspections per year over the MTEF period. The projected increase in capital expenditure from R10 million in 2022/23 to R225.6 million in 2025/26 is driven by the replacement of the inspection aircraft and calibration equipment.

Expenditure is expected to increase at an average annual rate of 6.9 per cent, from R862.3 million in 2022/23 to R1.1 billion in 2025/26. Revenue, which is set to increase in line with spending, is mainly generated through passenger safety charges, user fees and the aviation fuel levy.

### Entity overview

The South African Maritime Safety Authority was established in terms of the South African Maritime Safety Authority Act (1998). The authority is mandated to ensure the safety of life and property at sea, and prevent and combat marine pollution.

Over the next 3 years, the authority will continue to focus on ensuring safety and preventing pollution at sea. Spending on these activities accounts for an estimated 71.9 per cent (R1.1 billion) of expenditure over the period ahead. Total expenditure is expected to increase at an average annual rate of 4 per cent, from R487.1 million in

2022/23 to R548.4 million in 2025/26. The authority generates revenue through levies, fees and user charges. Revenue is expected to increase at an average annual rate of 3.9 per cent, from R490.8 million in 2022/23 to R550.9 million in 2025/26, in line with inflationary adjustments to levies.

## South African National Roads Agency

### Selected performance indicators

**Table 40.68 South African National Roads Agency performance indicators by programme/objective/activity and related priority**

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Smooth travel exposure: Percentage of travel undertaken per year on national roads with roughness less than 4.2m/km	Roads asset infrastructure management	Priority 2: Economic transformation and job creation	95.9%	95.3%	95%	95%	95%	95%	95%
Low rut exposure: Percentage of travel undertaken per year on national roads with rut depth less than 20mm	Roads asset infrastructure management		98.8%	98.6%	95%	95%	95%	95%	95%
High texture exposure: Percentage of travel undertaken per year on national roads with macro-texture higher than 0.4mm	Roads asset infrastructure management		98.8%	98.6%	95%	95%	95%	95%	95%
Bridge condition exposure index: Percentage of travel per year over or under bridges on national roads with overall condition index higher than 70	Roads asset infrastructure management		93.5%	93.4%	90%	90%	90%	90%	90%
Length of national road network with active routine road maintenance contracts (km) per year	Roads asset infrastructure management		22 207	22 253	22 262	22 262	22 262	22 262	22 262
Length of national road network with active resurfacing contracts (km) per year	Roads asset infrastructure management		192	125	1 000	1 200	1 800	2 400	2 400
Length of national road network with active strengthening, improvement or construction contracts (km) per year	Roads asset infrastructure management		152	78	600	300	450	600	600

### Entity overview

The South African National Roads Agency was established in terms of the South African National Roads Agency Limited and National Roads Act (1998). It is responsible for the planning, design, construction, operation, management, control, maintenance and rehabilitation of the South African national road network, including the financing of these functions, for both toll and non-toll roads.

Over the medium term, the agency's focus remains on the construction, maintenance and preservation of the national road network. It plans to increase the length of the network in active strengthening and resurfacing contracts from 1 500 kilometres in 2022/23 to 3 000 kilometres in 2025/26. As a result, planned capital expenditure is expected to increase from R15.8 billion in 2022/23 to R38 billion in 2025/26 at an average annual rate of 34 per cent. Although the agency's number of personnel is expected to remain unchanged at 695 over the MTEF period, spending on compensation of employees is expected to increase at an average annual rate of 5.5 per cent, from R748.4 million in 2022/23 to R878.9 million in 2025/26. This is driven by an expected change in the composition of personnel, with more professionals and specialists, specifically project managers and procurement specialists, set to join the establishment to improve procurement processes and reduce the road

maintenance backlog. The special allocation of R23.7 billion in 2022/23 is expected to provide the agency with sufficient funds to service several large debt redemptions and related maintenance in 2023/24.

Expenditure is expected to decrease at an average annual rate of 2.2 per cent, from R27.5 billion in 2022/23 to R25.8 billion in 2025/26. This is due to moderation in spending from R35.4 billion in 2024/25 as the agency accelerates road maintenance projects to deal with the backlog in the first 2 years of the MTEF period.

The agency is set to receive 72.3 per cent (R75.7 billion) of its revenue over the MTEF period through transfers from the department and 17.5 per cent (R17.6 billion) through toll fees, concession income and rental income from investment properties. Revenue is expected to increase at an average annual rate of 9.6 per cent, from R29 billion in 2022/23 to R38.1 billion in 2025/26.

Executive authority: Minister of Water and Sanitation  
 Accounting officer: Director-General of Water and Sanitation  
 Website: [www.dwa.gov.za](http://www.dwa.gov.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Ensure the availability of water resources to facilitate equitable and sustainable socioeconomic development, and ensure universal access to water and sanitation services.

### Mandate

The mandate of the Department of Water and Sanitation is set out in the National Water Act (1998) and the Water Services Act (1997). The department's legislative mandate is to ensure that the country's water resources are protected, managed, used, developed, conserved and controlled by regulating and supporting the delivery of effective water supply and sanitation. This is done in accordance with the requirements of water-related policies and legislation that are critical in delivering on people's rights to have enough food and water, growing the economy and eradicating poverty.

### Selected performance indicators

Table 41.1 Performance indicators by programme and related priority

Indicator	Programme	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26

Number of small regional bulk infrastructure project phases completed per year	Water Services Management		7	15	10	8	9	3	2
Number of water services authorities assessed for compliance with the requirements of the no drop regulatory programme per year	Water Services Management		-1	-1	-1	144	1	144	1
Number of small water services infrastructure grant projects completed per year	Water Services Management		117	112	72	115	86	65	57
Number of district municipalities per year with developed 5-year water and sanitation reliability plans	Water Services Management		-1	-1	-1	10	22	12	44

1. No historical data available.

## Expenditure overview

Over the medium term, the department will continue to focus on: improving the regulation of water quality; implementing the integrated water resource management approach aimed at the protection, use, development, conservation, management and control of water resources while supporting government's developmental priorities; and facilitating the improved management of municipal water services.

Expenditure is expected to increase at an average annual rate of 11.7 per cent, from R18.6 billion in 2022/23 to R25.9 billion in 2025/26, mainly as a result of an additional R12.4 billion over the MTEF period intended for water resource and bulk water infrastructure projects. An estimated 63 per cent (R46.6 billion) of the department's budget over the MTEF period is for transfers and subsidies to municipalities, public corporations and departmental agencies. Spending on the compensation of the department's 3 873 employees is expected to increase at an average annual rate of 2 per cent, from R1.8 billion in 2022/23 to R2 billion in 2025/26.

### **Water quality regulation and access**

The department enforces regulatory measures that ensure the provision of safe water and the effective management of wastewater. To this end, it implements the green and blue drop certification programmes, which are incentive-based regulatory tools that measure the capacity and environmental, financial, technical and quality compliance of water service institutions. The department plans to assess 1 004 wastewater systems in 2023/24 for compliance with the green drop regulatory requirements and 1 035 water supply systems in 2024/25 for compliance with blue drop regulations. To improve equitable access to water resources, the department plans to finalise 80 per cent of water use authorisation applications within 90 days of application. Expenditure for these activities is within the *Water Resources Regulation* subprogramme in the *Water Resources Management* programme. The subprogramme has a total budget of R694.1 million over the next 3 years.

### **Integrated water resource management**

In its efforts to ensure water security, the department will continue to adopt an integrated approach to maintaining existing water resource infrastructure, supplying bulk water to strategic users such as large industrial companies through the Water Trading Entity, and supporting the long-term sustainability of water resources. As such, the department will consider the impact of climate change, the role of ecosystems, rainwater runoff and storage, the use of other water resources such groundwater and aquifer systems, water conservation and water demand management plans. The department also plans to implement and monitor the river eco-status monitoring programme in 221 rivers and implement 5 catchment plans for mine water and wastewater management. These activities are carried out in the *Integrated Water Resources Planning*, *Water Resources Infrastructure Management* and *Water Ecosystems Management* subprogrammes in the *Water Resources Management* programme. Allocations to these subprogrammes amount to R15.2 billion over the MTEF period.

## Improving water services

To improve water services, over the medium term, the department plans to ensure reliable water and sanitation services by overseeing 25 large regional bulk infrastructure project phases and 14 small regional infrastructure project phases. To achieve this, the *Water Services Management* programme is allocated R48 billion over the next 3 years.

## Programme 1: Administration

### Programme purpose

Provide strategic leadership, management and support services to the department. Develop and promote international relations on water resources with neighbouring countries.

### Objective

- Facilitate cooperation by implementing and evaluating the approved African and global/international relations plan annually, in support of the national water and sanitation agenda.

### Subprogrammes

- Ministry* provides administrative support to the minister, the deputy minister and their support staff, and makes provision for their salaries.
- Departmental Management* provides policy and strategic direction for water and sanitation management. This includes enterprise-wide support services comprising administrative support to the director-general, corporate planning, monitoring, evaluation, and the provision of salaries and operation budgets for the department's regional office heads.
- Corporate Services* provides enterprise-wide support comprising human resources, legal services, communications, the learning and development academy, and transformation policy and coordination.
- Financial Management* ensures the efficient management of daily financial operations, processes and systems.
- Office Accommodation* makes payments for rental charges on all leased office space occupied by the department, and for municipal services such as electricity, water, and sewage and waste removal.
- Provincial and International Coordination* provides for the coordination of international relations on water and sanitation with neighbouring countries, and the provision of salaries and operational budgets for the department's regional office heads.

## Programme 2: Water Resources Management

### Programme purpose

Ensure that South Africa's water resources are protected, used, developed, conserved, managed, controlled and planned in an integrated and sustainable manner.

### Objectives

- Effectively manage water demand and supply on an ongoing basis by:
  - maintaining 6 water information systems
  - updating climate change risk and vulnerability assessments.
- Ensure the effective and sustainable management of water resources by distributing and monitoring funds transferred to the Water Trading Entity for the design, construction, commissioning and rehabilitation of bulk raw water infrastructure, including dam safety rehabilitation, on an ongoing basis.
- Improve the efficiency and effectiveness of the management of water resources by establishing 6 catchment management agencies by March 2025.
- Ensure the equitable allocation of water resources for social and economic development by processing 80 per cent of applications to authorise water use within 90 days on an ongoing basis.
- Protect and restore ecological infrastructure by:
  - implementing monitoring programmes for the quality of drinking water, wastewater and mine water on an ongoing basis
  - implementing the waste discharge charge system by March 2025.
- Ensure the protection of water resources by coordinating and monitoring compliance with standards, licence conditions and regulations across all sectors on an ongoing basis.
- Ensure the effective enforcement of compliance with water legislation by monitoring water use, conducting investigations and providing legal support in cases of unlawful water use on an ongoing basis.

### Subprogrammes

- *Water Resources Management Support* provides strategic leadership, management and support services to the programme and makes provisions for associated salaries.
- *Integrated Water Resources Planning* develops comprehensive plans for the availability of adequate water resources to guide infrastructure development, systems and services management in the water sector.
- *Water Ecosystems Management* develops and implements measures to protect water resources. This entails determining measures to manage water resources, and developing guidelines and protocols for pollution control and rehabilitation.
- *Water Resources Information and Management* ensures the development and maintenance of data and information management systems to enable informed decisions in the water sector.
- *Water Resources Infrastructure Management* develops, rehabilitates and refurbishes bulk raw water resources infrastructure to meet South Africa's socioeconomic and environmental needs.
- *Water Resources Policy and Strategy* develops, monitors and reviews water resources management policies and procedures.
- *Water Resources Regulation* develops, implements, monitors and reviews regulations on water resources, particularly the regulation of raw water pricing, the authorisation of water use, compliance monitoring and enforcement, dam safety, resource protection and waste.
- *Water Resources Institutional Oversight* is responsible for the institutional governance and oversight of all water resources institutions, and facilitates their establishment and development.

## Programme 3: Water Services Management

### Programme purpose

Develop, rehabilitate and refurbish water services infrastructure to meet the socioeconomic and environmental needs of South Africa.

### Objectives

- Enhance the efficiency of water use and the management of water quality by assessing 8 large water systems for water losses annually.
- Ensure adequate water availability through the development and management of infrastructure for water resources, and enhance the provision of sustainable and reliable water supply and sanitation by:
  - implementing 25 large bulk infrastructure projects over the medium term
  - supporting 44 district municipalities with developing water and sanitation reliability plans over the medium term
  - assessing annual municipal strategic self-assessments across all water services authorities on an ongoing basis
  - transferring funds and monitoring the performance of municipalities that receive funds through the *regional bulk infrastructure grant* and *water services infrastructure grant* in terms of the annual Division of Revenue Act.

### Subprogrammes

- *Water Services Management Support* provides strategic leadership, management and support services to the programme, and makes provision for associated salaries.
- *Water Services and Local Management* develops comprehensive plans that guide water and sanitation services and management across the value chain.
- *Regional Bulk Infrastructure Grant* provides for the development of new infrastructure, the refurbishment, upgrading and replacement of ageing infrastructure, and the servicing of extensive areas across municipal boundaries.
- *Water Services Regulation* develops, implements, monitors and reviews water resource regulations, particularly the compliance of water services authorities with water supply regulations.
- *Water Services Policy and Strategy* develops and reviews water services policies, procedures, norms and standards, and monitors their implementation.
- *Water Services Infrastructure Grant* provides for the construction of new water and sanitation infrastructure and the rehabilitation of existing infrastructure through the grant transfer of water services schemes to water services institutions.

- *Water Services Institutional Oversight* is responsible for the institutional governance and oversight of all water services institutions, and facilitates their establishment and development.

**Entities**

**Breede-Gouritz Catchment Management Agency**

**Selected performance indicator**

**Table 41.12 Breede-Gouritz Catchment Management Agency performance indicators by programme/objective/activity and related priority**

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Percentage of water registrations finalised per year	Water projects	Priority 2: Economic transformation and job creation	85% (528/800)	85% (351/419)	85% (528/800)	85%	85%	85%	85%

**Entity overview**

The Breede-Gouritz Catchment Management Agency was established in terms of the National Water Act (1998). The agency’s mandate is to protect, use and conserve water resources within the Breede-Gouritz water management area. Over the medium term, the agency plans to continue engaging with users within its area of operation as part of its public participation programme. It plans to do this while monitoring and authorising their water usage and finalising 85 per cent of user registrations.

Total expenditure is expected to increase at an average annual rate of 5.1 per cent, from R82 million in 2022/23 to R95.3 million in 2025/26. The agency is set to receive 52 per cent (R146.1 million) of its revenue over the medium term from water resource management charges and transfers from the department. Revenue is set to increase in line with expenditure.

1. Measured in megalitres.

2. Sedibeng water board was dissolved in July 2022 in terms of section 28 of the Water Services Act (1997).

**Entity overview**

The water boards are mandated, in terms of the Water Services Act (1997), to provide bulk industrial water services to industries and bulk potable water services to municipalities within their areas of operation. The water boards vary in size, activities, customer mix, revenue base and capacity. The 2 largest water boards are Rand Water and Umgeni Water, whose combined bulk sales accounted for an estimated 85.6 per cent of total sales in 2022/23.

Consolidated expenditure is expected to increase at an average annual rate of 7.9 per cent, from R26.1 billion in 2022/23 to R32.7 billion in 2025/26, with goods and services constituting an estimated 71.6 per cent (R64.8 billion) of this spending over the period ahead. Consolidated revenue, mostly derived from the sale of water, is set to increase at an average annual rate of 8.9 per cent, from R30.8 billion in 2022/23 to R39.7 billion in 2025/26.

Number of hydrology reports produced to update the water resources information management system database per year	Protection and use of water resources		24	24	24	24	24	24	24
Percentage of approved water use authorisations registered on the water use authorisation and registration management system per year	Protection and use of water resources		-1	-1	-1	-1	≤90%	≤90%	≤90%
Percentage of planned inspections and audits for resource pollution incidents per year	Protection and use of water resources		-1	-1	-1	-1	≤90%	≤90%	≤90%

1. No historical data available.

### Entity overview

The Inkomati-Usuthu Catchment Management Agency was established in terms of the National Water Act (1998). The agency is mandated to protect the use of water resources in the Inkomati-Usuthu water management area in Mpumalanga. Its functions include resource allocation, protection, use, conservation, monitoring, planning development and operations.

Over the medium term, the agency will continue to focus on implementing effective river operations within the water management area to manage floods, droughts, and surface and groundwater resources. Additional activities include assessing water use licences and general authorisations as delegated by the department, and performing more than 90 per cent of inspections and audits on reported incidents of resource pollution in each year over the MTEF period. To carry out these activities, the agency's protection and use of water resources programme is set to receive R301.2 million over the medium term, accounting for 50.8 per cent of the total budget.

Expenditure is expected to increase at an average annual rate of 10.9 per cent, from R147.9 million in 2022/23 to R201.6 million in 2025/26, with compensation of employees constituting 63.8 per cent (R365.8 million) of this spending. The agency derives its revenue mainly through transfers from the department, which increase at an average annual rate of 15.4 per cent, from R89.4 million in 2022/23 to R137.2 million in 2025/26. Total revenue is set to increase in line with expenditure.

### Entity overview

Rand Water was established in terms of the Water Services Act (1997). The entity serves an estimated 11 million people, providing bulk potable water in Gauteng, parts of Mpumalanga, Free State and North West. Rand Water stores, treats and delivers water to municipalities, mines and industries in its area of service.

Over the medium term, the entity will continue to focus on meeting projected demand by selling an estimated 5 million megalitres of water, refurbishing infrastructure and maintaining the average loss of non-revenue water at 4.6 per cent. As part of its non-revenue water reduction programme, the entity will also continue to implement a holistic and integrated approach in water demand and conservation initiatives by conducting a demand analysis, and setting and monitoring optimal targets for customers. Additional projects over the medium term include installing pressure-reducing valves and reviewing bulk service-level agreements from being demand-driven to allowing Rand Water to limit supply based on the efficiency of water use. Given the projected increase in water demand from 400 megalitres per day in 2022 to 5 500 megalitres per day in 2030, Rand Water will focus on refurbishing and augmenting its infrastructure through projects such as pipeline renewals and the construction of reservoirs at an estimated cost of R19.7 billion over the medium term.

Expenditure is expected to increase at an average annual rate of 9.1 per cent, from R15.5 billion in 2022/23 to R20.1 billion in 2025/26. Bulk water sales constitute 96.8 per cent (R66.3 billion) of total revenue over the medium term, increasing at an average annual rate of 9.9 per cent, from R18.4 billion in 2022/23 to R24.4 billion in 2025/26.

2. Project complete.

**Entity overview**

The Trans-Caledon Tunnel Authority is a specialised liability management entity that derives its mandate from the National Water Act (1998). It is responsible for financing and implementing the development of bulk raw water infrastructure and providing treasury management services to the Department of Water and Sanitation. The entity is expected to merge with the Water Trading Entity by 2024/25 to form the National Water Resources

## Infrastructure Agency.

Over the medium term, the authority will continue to implement the Berg River-Voëlvelei augmentation scheme, phase 2 of Mokolo-Crocodile water augmentation project, and phase 1 of the Umkhomazi water project on behalf of the department. Expenditure is expected to increase at an average annual rate of 7.5 per cent, from R8.8 billion in 2022/23 to R11 billion in 2025/26. The authority generates revenue through fees for financing and managing projects for the department. Revenue is expected to increase at an average annual rate of 3.4 per cent, from R10.4 billion in 2022/23 to R11.5 billion in 2025/26, mainly driven by revenue generated from the construction of water infrastructure.

### Entity overview

Umgeni Water was established in terms of the Water Services Act (1997) to provide water and sanitation services in its service area, which comprises mostly rural areas in KwaZulu-Natal and the eThekweni metropolitan area. The entity supplies water to an estimated 6 million consumers.

Over the medium term, the water board will continue to deliver services of the required quality and quantity within acceptable levels of reliability, using appropriate technologies in a manner that makes it affordable to all its consumers. Over the period ahead, it will aim to finalise the construction of phase 1 of the Greater Mpofana regional scheme, phase 3 of the Maphumulo bulk water supply scheme and the implementation of the raw water component in the Lower Umkhomazi bulk water supply scheme project.

Expenditure is expected to increase at an average annual rate of 4.5 per cent, from R4.4 billion in 2022/23 to R5.1 billion in 2025/26. Revenue is expected to increase at an average annual rate of 8.1 per cent, from R5.4 billion in 2022/23 to R6.8 billion in 2025/26, mainly driven by an increase in bulk water sales.

**Entity overview**

The legislative mandate of the Water Research Commission is set out in the Water Research Act (1971). Its primary functions include promoting coordination, cooperation and communication in water research and development; establishing water research needs and priorities; enhancing knowledge and capacity building within the water sector; and stimulating and funding priority-based water research.

Over the next 3 years, the commission plans to support government programmes in the water and sanitation sector. This includes the implementation of the national water resource strategy. To ensure that water is supplied efficiently and predictably while ensuring transparency, the commission aims to conduct 240 sector-related research projects over the period ahead.

Expenditure is expected to increase at an average annual rate of 0.6 per cent, from R414.1 million in 2022/23 to R421.6 million in 2025/26. The commission derives its revenue from water research levies. Revenue over the MTEF period is set to increase in line with expenditure.

### Entity overview

The Water Trading Entity was established in 1983 to manage water infrastructure and resources, and the sale of raw water. It was converted into a trading entity in 2008 in terms of the Public Finance Management Act (1999). Over the MTEF period, the entity will continue to focus on maintaining existing water resource infrastructure, supporting the long-term sustainability of water resources, and supplying bulk water to strategic users such as large industrial companies to stimulate and support economic development. The entity is expected to merge with the Trans-Caledon Tunnel Authority to form the National Water Resources Infrastructure Agency by 2024/25. The merger is aimed at leveraging the assets of the entity to finance water resource infrastructure in a more equitable and efficient manner.

The entity plans to roll out 22 dam safety rehabilitation projects over the medium term. An additional R4.4 billion is expected to be transferred from the department over the period ahead to implement the raw water component of the Umkhomazi water project.

Expenditure is expected to increase at an average annual rate of 11.1 per cent, from R16.4 billion in 2022/23 to R22.5 billion in 2025/26. The entity is expected to generate 78.1 per cent (R53.3 billion) of its revenue over the period ahead from the sale of raw water. Revenue is expected to increase at an average annual rate of 9.8 per cent, from R19.5 billion in 2022/23 to R25.9 billion in 2025/26.
