# **Estimates of National Expenditure**

**2023**

**National Treasury  
Republic of South Africa**

# Foreword

The Estimates of National Expenditure is an integral part of the annual budgeting process as it sets out planned national government spending over the next 3 years. The publication provides a comprehensive account of the priorities, spending plans and service delivery commitments of the 41 national government votes and their public entities. This information is complemented by the Vulekamali online portal, which provides transparent, user-friendly supplementary data on the budgets detailed here. The information presented in this publication and on Vulekamali is intended to promote a culture of public engagement, budget literacy, citizen empowerment, accountability in state institutions and the appropriate spending of public funds to achieve the outcomes envisaged in the National Development Plan.

Government's commitment to strengthening service delivery in critical areas such as employment, education, health and social protection is reflected in the budget for the social wage, which constitutes 51 per cent of total consolidated expenditure over the period ahead. The learning and culture function accounts for the largest portion of this, largely driven by spending towards infrastructure, the national school nutrition programme and increases under the early childhood development subsidy.

Spending on debt-service costs constitutes the fastest-growing spending area in this budget, underscoring government's commitment to reduce debt in order to achieve fiscal stability. The 2023 Budget provides additional allocations to address some of the short-term policy priorities and for improving growth-enhancing investment. Government continues to reprioritise and review spending to meet policy priorities and improve efficiency. Details of how government plans to reallocate and reprioritise funds over the next 3 years within these constraints are included in the respective vote chapters.

Although vacant posts in non-critical areas will not be filled in most cases, government intends to recruit and retain personnel in key areas such as health care, education, and peace and security, mainly through the allocation of additional funding.

With support from National Treasury, departments are encouraged to review spending continually to improve efficiency. These reviews are particularly important in areas where there is persistent underspending, as well as for non-performing and large programmes within departments. Over the period ahead, departments will continue to implement findings from previous reviews.

The budgets unpacked in this publication reflect the outcomes of robust bilateral and functional group engagements led by a committee of senior officials in central government departments under the guidance of the Ministers' Committee on the Budget. There was also wide-ranging intergovernmental consultation on budgets at the provincial and local levels. Cabinet considered and ultimately approved the budgetary proposals emanating from these consultations.

I would like to extend special thanks to all contributors and government colleagues who assisted in making this publication possible, particularly the political leadership shown by the executive and the spirited efforts of the National Treasury team.

# Introduction

The Minister of Finance is required by section 27(1) of the Public Finance Management Act (PFMA, 1999) to table the national Budget in Parliament each year. The authorisation to spend funds allocated in the Budget is sought through the tabling of the Appropriation Bill, which sets out the proposed amounts to be appropriated from the National Revenue Fund for the first year of the 3-year medium-term expenditure framework (MTEF) period, also referred to in this publication as the medium term, the next 3 years or the period ahead. The 2023 Appropriation Bill contains allocations to national government votes by programme and main economic classification<sup>1</sup> for the first year (2023/24) of the MTEF period.

The Estimates of National Expenditure (ENE) is tabled in Parliament with the Appropriation Bill. Its purpose is to provide detailed and transparent information based on the allocations set out in the Appropriation Bill for the current financial year. Government's proposed spending plans for the full MTEF period (2023/24 to 2025/26) are also contained in the ENE. These outline government institutions' planned spending and resource allocations. The medium-term estimates are aimed at improving budget formulation by encouraging the development of spending plans based on existing resources and by promoting fiscal discipline. Explanations are provided for how institutions intend to use their budget allocations over the medium term to achieve their goals and priorities, which should be aligned with broader national development plans. Information on how government institutions have spent their budgets in the previous 3 financial years is also included.

The tables presented in this publication show non-financial performance indicators and targets, departmental receipts and detailed expenditure trends and estimates by programme, subprogramme and economic classification for all votes and public entities. Brief explanatory narratives set out the purposes of institutions and their programmes, as well as their mandates, programme-level objectives and descriptions of subprogrammes. A brief narrative overview of institutions' expected expenditure over the MTEF period is also included.

All data tables published in the ENE, as well as additional tables containing information on provincial and municipal conditional grants, public-private partnerships, infrastructure spending and information at the level of site service delivery, where applicable, are available on National Treasury's website and the Vulekamali online portal.

## Budgeting by function

Budget discussions take place within function groups, which comprise various institutions across the 3 spheres of government grouped according to the objectives or activities they are mandated to perform. Different programmes within the same department may be categorised across different functions depending on their assigned tasks. For example, the *Expanded Public Works Programme* and the *Property and Construction Industry Policy and Research* programmes in the Department of Public Works and Infrastructure are categorised under the economic development function, whereas the other programmes in this department are categorised under the general public services function. These function groups are strategically grouped to facilitate subject-specific discussions targeting service delivery requirements and policy priorities. They are: learning and culture, social development, community development, health, general public services, economic development, and peace and security. Section 7 of the MTEF technical guidelines<sup>2</sup>, which were issued to institutions at the start of the budget determination process, provides a composition of these function groups in terms of the technical groups, as well as key departments and institutions.

---

<sup>1</sup> Allocations are made by economic classification. The main categories of economic classification are: current payments (payments made for operational requirements such as compensation of employees, and goods and services); transfers and subsidies; payments for capital assets (assets that can be used for more than 1 year); and payments for financial assets (loans or equity investments in public corporations).

<sup>2</sup> The MTEF technical guidelines are available on National Treasury's website in the publications section.

## **Navigating economic recovery**

In the context of a challenging global and domestic economic environment with uneven growth, the 2023 Budget strives to allocate resources efficiently. It balances the national imperatives of stimulating the economy, maintaining fiscal sustainability and strengthening the welfare of vulnerable citizens through the protection of the social wage.

Public finances in this Budget are severely constrained, mainly because of the economy's weak performance, persistent high inflation and declining fiscal revenue after the positive commodity cycle of the last two years. All additional allocations have been funded through drawdowns from provisional allocations in the 2022 Medium-term Budget Policy Statement (MTBPS), resources provided by the fiscal framework and technical corrections, or the reprioritisation of existing budgets. Baseline reallocations are effected across departments from various economic classification items, including compensation of employees, goods and services, conditional grants to provinces and municipalities, and other transfers to institutions. These funding measures have been mainly prioritised towards spending on social wage and infrastructure projects, and to fund initiatives to strengthen the criminal justice system.

Budget proposals forwarded by institutions were examined within function groups, culminating in recommendations presented to the medium-term expenditure committee, which is constituted by the directors-general of central national government departments. The committee considered the trade-offs and priorities for government as a whole and forwarded its recommendations to the Ministers' Committee on the Budget for endorsement. The recommendations – which formed the basis for the fiscal framework, the division of revenue across the 3 spheres of government and the details of allocations tabled in the 2022 MTBPS and proposed for the 2023 Budget – were ultimately approved by Cabinet.

## **Composition of changes to government spending by function**

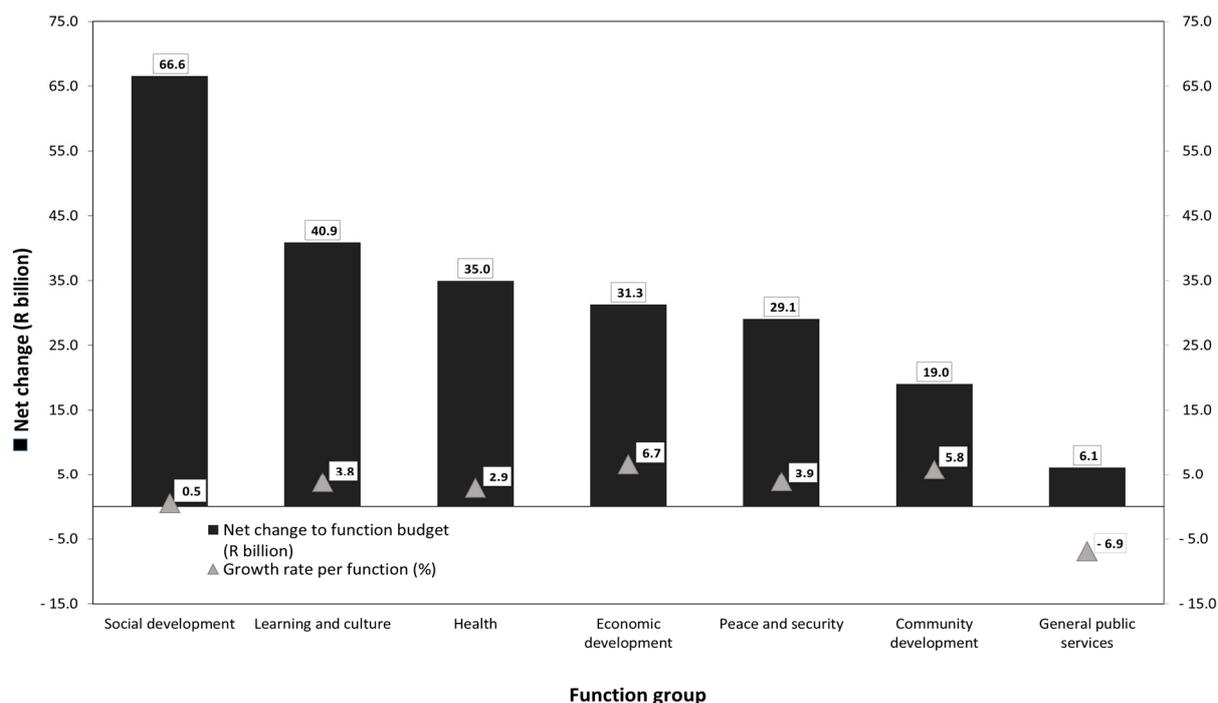

Consolidated expenditure<sup>3</sup> amounts to R2.2 trillion in 2023/24, R2.4 trillion in 2024/25 and R2.5 trillion in 2025/26, and is expected to decrease (from R2.2 trillion in 2022/23) at an average annual rate of 0.6 per cent in real terms over the MTEF period. Main budget expenditure increases in nominal terms from R2 trillion in 2023/24 to R2.3 trillion in 2025/26. This constitutes an average annual decrease (from R2 trillion in 2022/23) of 0.5 per cent in real terms over the MTEF period.

The effects on main budget spending per function group emanating from the 2023 Budget are shown in Figure 1.1 alongside spending growth rates.

---

<sup>3</sup> Consolidated expenditure comprises main budget expenditure and expenditure financed from revenue raised by government entities, provinces and social security funds. Consolidated government spending forms the basis for discussion in the Budget Review. Main budget-level expenditure refers to expenditure financed through revenue collected by national government, which is deposited into the National Revenue Fund. This forms the basis for discussion in the ENE.

Figure 1.1 Net changes and annual growth rates in allocations to function groups (2023/24 to 2025/26)

The changes are summarised below:

- Social development:** The R66.6 billion net increase is attributed to allocations for social assistance grants, including R35.7 billion for the *social relief of distress grant* in 2023/24 and R29.6 billion to increase the value of social assistance grants. The provincial equitable share increases by R833.2 million.
- Learning and culture:** The R40.9 billion net increase is mainly the result of an increase of R36 billion in the provincial equitable share, R1.8 billion for the *education infrastructure grant*, R1.6 billion for the *early childhood development grant* and R1.5 billion for the *national school nutrition programme grant*.
- Health:** The R35 billion net increase is mainly the result of an increase of R34.5 billion in the provincial equitable share. R1 billion is added towards buildings and other fixed structures. R512 million is transferred from the Department of Health to the Department of Home Affairs for the function transfer of the Border Management Authority.
- Economic development:** The R31.3 billion net increase is mainly the result of allocations of R10.8 billion to the *provincial roads maintenance grant*, R3 billion for phase 2 of the South Africa Connect broadband project, R2.8 billion to the provincial equitable share, R1.3 billion to the South African Radio Astronomy Observatory and R1.2 billion to the South African National Space Agency.
- Peace and security:** The R29.1 billion net increase is made up of increases of R12.6 billion for the improvement conditions of service in compensation of employees budgets, R4.2 billion for the establishment of the Border Management Authority and R3.1 billion to enhance border security (air, land and maritime) and territorial integrity.
- Community development:** The R19 billion net increase is mainly due to increases of R8.1 billion to the local government equitable share, R3.7 billion to various water boards for regional bulk infrastructure, R2.2 billion to the *urban settlements development grant*.
- General public services:** The R6.1 billion net increase, which excludes adjustments to debt-service costs, is mainly due to the allocation of R2 billion for the refurbishment and rebuilding of Parliament, R1.5 billion to the South African Revenue Service for machinery and equipment, and R1.1 billion to the provincial equitable share.

## Baseline adjustments by function and vote

Adjustments to main budget non-interest expenditure over the MTEF period are presented by function and for each vote within the function in the tables that follow. The estimated function split of the changes in the provincial equitable share<sup>4</sup>, where relevant, is also shown in the tables as provinces have key service delivery mandates aligned with the functions they share with national departments.

All changes are shown relative to the initial function-planning baseline allocations for the MTEF period, which originate from the previous year's baselines. All changes to baselines are shown in the tables to account comprehensively for budget reductions or increases and other allocation decisions taken throughout the 2023 Budget process. Most budget amendments have been effected through the addition to or realignment of baseline funds.

## Social development

The social development function facilitates access to social grants and welfare services to reduce poverty and inequality, protect children, and empower women, young people and people with disabilities. It is allocated R284.3 billion in 2023/24, R264.2 billion in 2024/25 and R281.1 billion in 2025/26. The function's baseline increases by a net amount of R66.6 billion (8.7 per cent) over the MTEF period, from R762.9 billion to R829.5 billion.

Goods and services	-9.9	-10.4	-10.9	-31.3
<b>Net change to function baseline</b>	<b>42 265.4</b>	<b>9 411.8</b>	<b>14 874.6</b>	<b>66 551.8</b>

i. The estimate of the provincial equitable share that is allocated to this function is included. This amount is determined by provincial budgetary and legislative processes and is subject to change.

ii. Modifications made to the 2025/26 function planning baseline throughout the 2023 Budget process are shown. The first estimates for 2025/26 are shown in italics. The fiscal framework shown in the Budget Review depicts the budget baseline as it stands at the end of the process.

iii. This table shows only the allocation of revenue from the National Revenue Fund for the function group. This differs from the presentation of the consolidated function group baseline shown in the Budget Review, which includes revenue generated through other sources.

## Learning and culture

The learning and culture function includes basic and post-school education and training, as well as sport, arts and culture. It is allocated R441.1 billion in 2023/24, R460 billion in 2024/25 and R480.6 billion in 2025/26. The function's baseline increases by a net amount of R40.9 billion (3 per cent) over the MTEF period, from R1.3 trillion to R1.4 trillion.

<sup>4</sup> An aggregate monetary amount is allocated from the National Revenue Fund for the provincial equitable share. These funds are then allocated to specific function areas through separate provincial budgetary processes and legislative approval. The details of the allocation of funds by each of the provinces per function are not known with certainty at the time of tabling the national Budget.

## Health

The health function supports the provision of equitable access to health care services. It is allocated R245.9 billion in 2023/24, R257.9 billion in 2024/25 and R269.4 billion in 2025/26. The function's baseline increases by a net amount of R35 billion (4.7 per cent) over the MTEF period, from R738.2 billion to R773.2 billion.

i. The estimate of the provincial equitable share that is allocated to this function is included. This amount is determined by provincial budgetary and legislative processes and is subject to change.

ii. Modifications made to the 2025/26 function planning baseline throughout the 2023 Budget process are shown. The first estimates for 2025/26 are shown in italics. The fiscal framework shown in the Budget Review depicts the budget baseline as it stands at the end of the process.

iii. This table shows only the allocation of revenue from the National Revenue Fund for the function group. This differs from the presentation of the consolidated function group baseline shown in the Budget Review, which includes revenue generated from other sources.

## Economic development

The economic development function promotes faster and sustained inclusive economic growth to address unemployment, poverty and inequality. It is allocated R174.5 billion in 2023/24, R184.7 billion in 2024/25 and R195.1 billion in 2025/26. The function's baseline increases by a net amount of R31.3 billion (6 per cent) over the MTEF period, from R523.1 billion to R554.4 billion.

i. The estimate of the provincial equitable share that is allocated to this function is included. This amount is determined by provincial budgetary and legislative processes and is subject to change.

ii. Modifications made to the 2025/26 function planning baseline throughout the 2023 Budget process are shown. The first estimates for 2025/26 are shown in italics. The fiscal framework shown in the Budget Review depicts the budget baseline as it stands at the end of the process.

iii. This table shows only the allocation of revenue from the National Revenue Fund for the function group. This differs from the presentation of the consolidated function group baseline shown in the Budget Review, which includes revenue generated from other sources.

## Peace and security

The peace and security function receives funding over the medium term for safety and security, and the criminal justice system. It is allocated R225.8 billion in 2023/24, R235 billion in 2024/25 and R246.3 billion in 2025/26. The function's baseline increases by a net amount of R29.1 billion (4.3 per cent) over the MTEF period, from R678 billion to R707 billion.

## Community development

The community development function supports access to housing and basic services, affordable public transport, and spatial transformation and urban development. The function is allocated R247.7 billion in 2023/24, R260.5 billion in 2024/25 and R272.4 billion in 2025/26. The function's baseline is increased by a net amount of R19 billion (2.5 per cent) over the MTEF period, from R761.5 billion to R780.5 billion.

i. The estimate of the provincial equitable share that is allocated to this function is included. This amount is determined by provincial budgetary and legislative processes and is subject to change.

ii. Modifications made to the 2025/26 function planning baseline throughout the 2023 Budget process are shown. The first estimates for 2025/26 are shown in italics. The fiscal framework shown in the Budget Review depicts the budget baseline as it stands at the end of the process.

iii. This table shows only the allocation of revenue from the National Revenue Fund for the function group. This differs from the presentation of the consolidated function group baseline shown in the Budget Review, which includes revenue generated from other sources.

## General public services

The general public services function helps to build a state that is capable of playing a developmental and transformative role, as envisioned in the National Development Plan. It is allocated R68.4 billion in 2023/24, R68.2 billion in 2024/25 and R71.2 billion in 2025/26. The function's baseline increases by a net amount of R6.1 billion (3 per cent) over the MTEF period, from R201.6 billion to R207.8 billion.

i. The estimate of the provincial equitable share that is allocated to this function is included. This amount is determined by provincial budgetary and legislative processes and is subject to change.

ii. Modifications made to the 2025/26 function planning baseline throughout the 2023 Budget process are shown. The first estimates for 2025/26 are shown in italics. The fiscal framework shown in the Budget Review depicts the budget baseline as it stands at the end of the process.

iii. This table shows only the allocation of revenue from the National Revenue Fund for the function group. This differs from the presentation of the consolidated function group baseline shown in the Budget Review, which includes revenue generated from other sources.

## Provisional allocations

A total net amount of R89.6 billion (including the unallocated reserve) is provisionally allocated and will be confirmed for spending once certain requirements have been met. The specific details of these provisional allocations will be finalised either during the 2023/24 Adjustments Budget or the 2024 Budget, and thereafter allocated to specific votes.

**Table 1.9 Provisional allocations**

R million	2023/24	2024/25	2025/26	Total
Provisional allocation not assigned to votes	1 505	1 858	1 839	5 202
Unallocated reserve	–	35 693	44 533	80 226
Infrastructure Fund not assigned to votes	–	2 043	2 138	4 181
<b>Total</b>	<b>1 505</b>	<b>39 594</b>	<b>48 510</b>	<b>89 609</b>

An additional R5 billion in each year over the MTEF period is set aside as a contingency reserve but not allocated in advance. This is to accommodate changes in the economic environment and meet unforeseeable spending pressures.

## Overview of expenditure for the MTEF period

The table below shows medium-term expenditure projections in 3 classification categories: consolidated government expenditure, main budget non-interest expenditure and the expenditure ceiling.

**Table 1.10 Expenditure for the MTEF period**

R million	2023/24	2024/25	2025/26	Total	Average real growth (%)
<b>Consolidated government expenditure</b>	<b>2 242 589</b>	<b>2 359 749</b>	<b>2 477 398</b>	<b>7 079 736</b>	<b>-0.2%</b>

1. A positive number reflects an increase and a negative number reflects a decrease.

2. As this is only the executive's proposal for Parliament's budget, the economic classification disaggregation of the vote is not appropriated in the 2023 Appropriation Bill.

<b>Total Infrastructure</b>	<b>133 052.8</b>	<b>112 907.6</b>	<b>128 553.9</b>	<b>146 950.9</b>	<b>157 691.2</b>	<b>170 502.0</b>	<b>179 350.4</b>
<i>Current infrastructure<sup>2</sup></i>	1 697.0	1 348.3	1 945.3	1 845.5	1 451.1	1 510.2	1 373.4
<i>Capital infrastructure<sup>3</sup></i>	131 355.8	111 559.3	126 608.6	145 105.4	156 240.1	168 991.8	177 977.1

1. Amounts include: mega infrastructure projects and programmes for which the total cost is at least R1 billion over the project life-cycle; large projects and programmes for which the total cost is at least R250 million but less than R1 billion over the project life-cycle; and small projects and programmes for which the total cost is less than R250 million over the project life-cycle. Amounts also include infrastructure transfers to other spheres, agencies and entities, and maintenance and repair projects.

2. Current infrastructure refers to the maintenance and repairs of existing infrastructure assets and is aimed at maintaining the capacity and effectiveness of an asset at the designed level.

3. Capital infrastructure refers to the construction, replacement, upgrading, rehabilitation, renovation and refurbishment of infrastructure resulting in a new asset or an increase in the capacity, effectiveness and value of an existing asset.

1. Includes the departmental receipts of all departments within a vote.

2. These are receipts for which a department serves as a conduit to deposit funds into the National Revenue Fund. As such, they are included as other receipts for consolidation purposes. These receipts are, however, accordingly excluded from both departmental and entity financial statements.

# Information contained in each vote

The ENE describes in detail the planned spending in all national government votes over the MTEF period, which is government's 3-year expenditure planning window. The ENE is tabled in Parliament by the Minister of Finance alongside the main Budget and serves as the explanatory memorandum to the Appropriation Bill. Through the bill and the publication, the executive seeks Parliament's approval and adoption of its spending plans for the first year of the MTEF period. Once the Appropriation Act has been assented to by the president and published in the Government Gazette, funds allocated for the first year of the MTEF period are appropriated from the National Revenue Fund. As Parliament authorises expenditure annually, spending estimates for the 2 outer years of the MTEF period are not included in the Appropriation Bill. These forward estimates or indicative allocations do, however, form the basis of planning for the following year's budget and the next MTEF period.

The main budget expenditure, determined by the fiscal stance adopted by government, includes direct charges, such as debt-service costs, against the National Revenue Fund. As direct charges constitute spending in terms of a statute, they do not require parliamentary approval. Such spending is, therefore, not contained in the Appropriation Bill, nor is it budgeted for in any particular programme within a vote. Main budget expenditure also includes a contingency reserve and any provisional allocations not assigned to votes for expenditure related to unforeseen circumstances and emerging government policy priorities. Similarly, this expenditure is not contained in the Appropriation Bill.

Information in the Appropriation Bill is presented by vote. A vote specifies the total amount appropriated to a department. Each chapter in the ENE publication relates to a vote.

Each vote contained in the ENE follows the following format:

## Budget summary

This table shows the budgeted expenditure for the vote for the 3-year MTEF period.

R million	2023/24				Total	2024/25	2025/26
	Current payments	Transfers and subsidies	Payments for capital assets	Payments for financial asset		Total	Total
<b>MTEF allocation</b>							
Programme name							
<b>Subtotal</b>							
<b>Direct charge against the National Revenue Fund</b>							
Item							
<b>Total expenditure estimates</b>							
Executive authority	Minister						
Accounting officer	Director-General/Chief Operating Officer						
Website	<a href="http://www.domain.gov.za">www.domain.gov.za</a>						

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

The **2023/24 total** shows the total allocation per programme and the total allocation for the vote for 2023/24, and corresponds with the information in the 2023 Appropriation Bill.

The total vote allocation to be appropriated by Parliament is categorised by economic classification, into **current payments, transfers and subsidies, payments for capital assets and payments for financial assets**.

**Current payments** are payments made by an institution for its operational requirements.

**Transfers and subsidies** are payments made by an institution for which the institution does not directly receive anything in return.

**Payments for capital assets** are payments made by an institution for an asset that can be used for more than 1 year, and from which future economic benefits or service potential are expected to flow.

**Payments for financial assets** are mainly payments made by institutions as loans to public corporations or as equity investments in public corporations. Payments are reflected as expenditure rather than financing because the purpose of the transaction is not profit oriented. This column is shown only in votes where such payments have been budgeted for. Payments for theft and losses are included in this category. However, it is not possible to budget for these in advance and, if applicable, payments will appear only in the historical information once they are known.

For **2024/25** and **2025/26**, the estimates of expenditure in the vote are shown for the 2 outer years of the MTEF period.

**MTEF allocation** shows the expenditure allocation for the upcoming financial year and the expenditure estimates for the 2 outer years of the MTEF period for each programme.

**Direct charge against the National Revenue Fund** is an amount spent in terms of a statute and is not budgeted for in any programme in a particular vote. It is shown as a separate item and is not contained in the Appropriation Bill.

**Total expenditure estimates** is the sum of expenditure on programmes plus direct charges against the National Revenue Fund.

The last 3 rows of the table provide accountability information: the vote's executive authority, accounting officer and website.

## Vote purpose

*The purpose of the vote captures a department's mandate, objectives or administrative functions, as stated in the Appropriation Bill.*

## Mandate

The institution's mandate, as contained in the relevant act(s) or policy document(s) that govern(s) the institution's establishment and operations, is described.

## Selected performance indicators

This table highlights a vote's performance in terms of key indicators for the past 3 years, the current year, and the projections for the MTEF period.

Indicator	Programme	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26

The table presents only a selected set of a department or entity's performance indicators and is not intended to provide a comprehensive view of the institution's performance. The table, however, contains key indicators

linked to strategic and annual performance plans, as informed by government's medium-term strategic framework and ministerial delivery agreements. Managing, monitoring and measuring performance are integral to improving service delivery.

Footnotes are used in this table where there is no historical data available, where an indicator has been discontinued or a new one introduced, or where no projections are available. Reasons for revisions to targets from what was published in the 2022 ENE are contained in departments' and entities' annual performance plans. These include budget reductions, new focus areas or indicators, and changes requested by the executive authority and/or Parliament.

An **Indicator** is a measure that tracks a department's or entity's progress towards meeting the target it has set. An indicator may measure inputs, activities, outputs and outcomes, or, in certain instances, explanatory information relating to the internal or external environment.

The **Programme** links the indicator to the programme associated with it.

The **MTSF priority** links the indicator to 1 or more of the 7 priorities targeted by government, aimed at addressing poverty, inequality and unemployment.

The **Audited performance** column shows what level of performance the institution achieved in the past 3 financial years.

The **Estimated performance** column shows what the institution projects it will have achieved in the current financial year.

The **MTEF targets** column shows what the institution expects to achieve over the MTEF period. Targets can be qualitative or quantitative. All quantitative indicators must have targets that are absolute values/numbers.

In the **selected performance indicators** table, a dash (–) means that information is not available, generally because the indicator was introduced only in subsequent years. However, in all **expenditure and revenue** tables, a dash (–) indicates that information is either unavailable or equal to zero. Due to rounding off, the line item figures in tables may not necessarily add up to the total of the figures in the table.

## Expenditure overview

This is a narrative discussion that provides an outline of what the institution aims to achieve over the medium term and how it plans to spend its budget in support of this. The discussion centres on the institution's primary focus areas, including its policy and spending focus (significant spending items and key service deliverables) over the period ahead, as contained in its planning documents. A summary is provided of how the institution's objectives and spending items are aligned with the objectives of the National Development Plan, as set out in the priorities/targets of government's medium-term strategic framework.

Significant increases or decreases in expenditure, including in the past, are explained in terms of the institution's performance targets, service delivery methods, policies, personnel profiles or any other applicable factors. The average annual estimated growth rates are presented in the tables in nominal, not real, terms.

1. Tables with expenditure trends, annual budget, adjusted appropriation and audited outcome are available at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

This table shows audited expenditure for the past 3 years, the adjusted appropriation for the current financial year and expenditure estimates over the MTEF period by programme and economic classification.

Expenditure is set out first by **Programme** and then by **Economic classification**. Expenditure is classified as current payments, transfers and subsidies, payments for capital assets and payments for financial assets. Where programme structures have been changed in recent years, expenditure and budgets have, to the extent possible, been reallocated to the new approved programme structure for all the years shown, for comparability.

**Direct charge against the National Revenue Fund** is an amount spent in terms of a statute and is not budgeted for in any programme in a particular vote. It is shown as a separate item and is not contained in the Appropriation Bill.

**Audited outcomes** are presented as they appear in the institution's annual financial statements. However, reallocations are made for any subsequent approved budget changes to the programme structure.

**Adjusted appropriation** shows the adjusted total amount that is voted in a financial year. Most changes are typically made mid-year at the time of the adjustments budget, but could include any other money bills tabled during the course of the financial year. These adjustments can be made only in terms of the circumstances listed in section 30 of the Public Finance Management Act (1999). These adjustments are thus included in an adjustments appropriation bill(s), which Parliament approves before expenditure can take place. Details of the adjustments are tabled in acts of Parliament and the accompanying Adjusted Estimates of National Expenditure, and other publications.

The **Average growth rate (%)** is the growth rate per year, averaged over the 3-year period, expressed as a percentage.

The **Average: Expenditure/Total (%)** shows the proportion of total institutional expenditure that an expenditure item comprises, averaged over the 3-year period, expressed as a percentage.

The **Medium-term expenditure estimate** shows expenditure estimates for 2023/24, 2024/25 and 2025/26. The estimates for 2023/24 are the appropriations proposed in the 2023 Appropriation Bill considered by Parliament. The estimates for 2024/25 and 2025/26 are indicative allocations, and will form the basis for planning the 2024 Budget and the next MTEF period.

Significant amounts and trends are discussed in the expenditure overview, particularly in relation to performance and spending.

### Transfers and subsidies expenditure trends and estimates.

This table shows the transfers and subsidies expenditure trends for the past 3 years, the revised expenditure estimate for the current financial year and expenditure estimates over the MTEF period by transfer item.

	Audited outcome			Adjusted appropriation 2022/23	Average growth rate (%)		Medium-term expenditure estimates			Average growth rate (%) 2022/23 - 2025/26	Average: Expenditure/Total (%)

Transfers and subsidies recipient name											
<b>Total</b>											

The **Audited outcome** is presented as it appears in the institution’s annual financial statements.

**Adjusted appropriation** shows the adjusted total amount that is voted in a financial year. Most changes are typically made mid-year at the time of the adjustments budget, but could include any other money bills tabled during the course of the financial year. These adjustments can be made only in terms of the circumstances listed in section 30 of the Public Finance Management Act (1999).

The **Average growth rate (%)** is the growth rate per year, averaged over the 3-year period, expressed as a percentage.

The **Average: Expenditure/Total (%)** shows the proportion of total institutional expenditure that an expenditure item comprises, averaged over the 3-year period, expressed as a percentage.

The **Medium-term expenditure estimate** shows expenditure estimates for 2023/24, 2024/25 and 2025/26.

Significant amounts and trends are discussed in the expenditure analysis section, particularly in relation to performance and spending.

### Personnel information

Personnel information relating to salary level bands is set out for a 5-year period. The number of posts, the cost to the institution, and the average unit cost of a post are shown as estimated by the department.

**Vote personnel numbers and cost by salary level and programme level<sup>1</sup>**

1. Data has been provided by the department and may not necessarily reconcile with official government personnel data.
2. Rand million.

Details of total personnel numbers by **Salary level** and **Programme** are provided.

**Number of funded posts** refers to the number of posts in an institution’s establishment for which provision is made in its budget.

**Number of posts additional to the establishment** refers to posts that do not form part of the institution’s approved establishment but which have been budgeted for.

Information is provided on the **Number** and **Cost** of posts filled or planned to be filled in the total establishment by salary level.

The **Unit cost** is calculated by dividing the cost by the number of posts.

The **Average growth rate of personnel posts (%)** for the 3-year period is shown, expressed as a percentage.

The **Average: Salary level/Total (%)** shows the proportion of total posts per salary level band, on average over the period, expressed as a percentage.

Personnel information is discussed in the expenditure overview, particularly in relation to performance and spending.

**Departmental receipts**

This table provides details of the revenue collected on the vote over a 7-year period.

R thousand	Audited outcome			Adjusted estimate	Revised estimate	Average growth rate (%)	Average: Receipt item/ Total (%)	Medium-term receipts estimate			Average growth rate (%)	Average: Receipt item/ Total (%)
	2019/20	2020/21	2021/22					2022/23	2023/24	2024/25		
<b>Departmental receipts</b>												
<b>Economic classification Item</b>												
Lower level classification Item												
<b>Economic classification Item</b>												
Lower level classification Item												
Lower level classification Item												
<b>Total</b>												

Departmental receipts are set out by **Economic classification item**.

The **Audited outcome** is presented as it appears in the institution's annual financial statements.

The **Adjusted estimate** for 2022/23 shows the estimate of the institution's receipts published in the 2022 Adjusted Estimates of National Expenditure.

The **Revised estimate** shows the current estimate of institutional receipts for 2022/23.

The **Average growth rate (%)** shows the growth in revenue as a percentage, averaged over a 3-year period.

The **Average: Receipt item/Total (%)** shows the proportion of total departmental revenue receipts in a particular economic classification item, averaged over a 3-year period, expressed as a percentage.

## Information on each programme

### Programme purpose

The purpose of each programme is stated as it is set out in the 2023 Appropriation Bill. The programme purpose outlines the functions and activities of the particular programme, as per the approved budget programme structure. Programme 1 is usually the *Administration* programme, comprising the administrative functions and activities required to keep the department operating. It includes the ministry and deputy ministry, the director-general's office and central corporate services.

### Objectives

Objectives are stated for each programme, with the exception in most cases of the *Administration* programme. A programme objective includes an explanation of its strategic intent, as well as of the specific interventions and progress measures for that objective. Objectives are broadly aligned with institutional strategic plans and annual performance plans, as informed by ministerial service delivery agreements and the National Development Plan, and articulated in government's medium-term strategic framework.

### Subprogrammes (per programme)

The key activities carried out by each subprogramme are described, generally with the exception of the *Administration* programme as it is typically standardised across all departments. Explanatory notes are provided on transfers to entities or partner organisations, and on subsidies, incentives or financial assistance programmes, where applicable.

### Expenditure trends and estimates (per programme)

The table for each programme sets out expenditure by subprogramme and economic classification item over a 7-year period.

Subprogramme	Audited outcome			Adjusted appropriation	Average growth rate (%)	Average: Expenditure/Total (%)	Medium-term expenditure estimates			Average growth rate (%)	Average: Expenditure/Total (%)
	2019/20	2020/21	2021/22				2022/23	2023/24	2024/25		
R thousand											
Subprogramme name											
<b>Total</b>											
Change to 2022											
Budget estimate											
<b>Economic classification</b>											
<b>Current payments</b>											
Compensation of employees											
Goods and services											
Economic classification item											
<b>Transfers and subsidies</b>											
Economic classification item											
<b>Payments for capital assets</b>											
Economic classification item											
<b>Payments for financial assets</b>											
<b>Total</b>											
<b>Proportion of total programme expenditure to vote expenditure</b>											

Expenditure over the 7-year period is set out, first by **Subprogramme** then by **Economic classification**, as current payments, transfers and subsidies, payments for capital assets, and payments for financial assets.

**Audited outcome** is presented as it appears in the institution's annual financial statements, with amounts reallocated for any subsequent approved changes to the budget programme structure.

**Adjusted appropriation** shows the adjusted total amount that is voted in a financial year. Most changes are typically made mid-year at the time of the adjustments budget, but could include any other money bills tabled during the course of the financial year. These adjustments can be made only in terms of the circumstances listed in section 30 of the Public Finance Management Act (1999). These adjustments are included in an adjustments appropriation bill/s, which Parliament approves before expenditure can take place. Particulars are tabled in acts of Parliament and the accompanying Adjusted Estimates of National Expenditure, and other publications.

The **Average growth rate (%)** is the growth rate per year averaged over a 3-year period, shown as a percentage.

The **Average: Expenditure/Total (%)** shows the proportion of total programme expenditure that a subprogramme or an expenditure item comprises, averaged over a 3-year period, expressed as a percentage.

The **Medium-term expenditure estimate** shows programme expenditure estimates for the MTEF period. The estimates for 2023/24 are the appropriations proposed in the 2023 Appropriation Bill. The estimates for 2024/25 and 2025/26 are indicative allocations and will form the basis for planning the 2024 Budget and the next MTEF period.

Significant amounts and trends are discussed in the departmental expenditure overview, particularly in relation to performance and spending.

### Personnel information (per programme)

Personnel information relating to salary level bands is set out for a 5-year period. The number of posts, the cost to the institution and the average unit cost of a post are shown as estimated by the department.

**Programme personnel numbers and cost by salary level<sup>1</sup>**

Number of posts estimated for 31 March 2023		Number and cost <sup>2</sup> of personnel posts filled/planned for on funded establishment										Average growth rate of personnel posts (%)	Average: Salary level/Total (%)			
Number of funded posts	Number of posts additional to the establishment	Actual		Revised estimate		Medium-term expenditure estimates										
		2021/22		2022/23		2023/24		2024/25		2025/26		2022/23 – 2025/26				
Department		Number	Cost	Unit cost	Number	Cost	Unit cost	Number	Cost	Unit cost	Number	Cost	Unit cost	Number	Cost	Unit cost
Salary level																
1 – 6																
7 – 10																
11 – 12																
13 – 16																
Other																

1. Data has been provided by the department and may not necessarily reconcile with official government personnel data.

2. Rand million.

Details of total personnel numbers by **Salary level** are provided.

**Number of funded posts** refers to the number of posts in an institution's programme establishment for which provision is made in its budget.

**Number of posts additional to the establishment** refers to posts that do not form part of the institution's approved establishment but which have been budgeted for.

Information is provided on the **Number** and **Cost** of posts filled or planned to be filled in the total programme establishment by salary level.

The **Unit cost** is calculated by dividing the cost by the number of posts.

The **Average growth rate of personnel posts (%)** for the 3-year period is shown, expressed as a percentage.

The **Average: Salary level/Total (%)** shows the proportion of the total programme posts per salary level band, on average over the period, expressed as a percentage.

Programme personnel information is discussed in the expenditure overview, particularly in relation to performance and spending.

## Entities

The information provided on entities is similar to what is reported on for a department. However, as the basis of accounting used by entities is different to that used by departments, entities' statements of financial performance and financial position are provided.

Entity accounts are prepared using the accrual basis of accounting, whereas departmental accounts are prepared using a modified cash basis of accounting.

In the accrual basis of accounting, a transaction is recorded whenever there is an economic event, regardless of when a cash transaction takes place. This basis of accounting also includes items that do not involve any flow of cash at all, such as adjustments made to account for depreciation.

In the modified cash basis of accounting, a transaction is recorded only if cash has been exchanged and at the time that this exchange takes place.

Information on each of the entities generally consists of:

- selected performance indicators relating to the entity's mandate
- an entity overview narrative that provides an outline of the entity's mandate, what it aims to achieve over the medium term and its planned spending in support of this
- expenditure trends and estimates by programme/objective/activity
- statements of financial performance, cash flow and financial position
- personnel numbers and cost by salary level.

1. No historical data available.

## Expenditure overview

Over the medium term, the department will continue to provide support to the president and deputy president in the execution of their responsibilities, as outlined in chapter 5 of the Constitution. Accordingly, over the MTEF period, the department will focus on enhancing leadership and partnerships through stakeholder engagements to promote the country's social transformation agenda, facilitating economic growth and job creation, and operationalising the e-Cabinet system.

Expenditure is expected to increase at an average annual rate of 2.9 per cent, from R626 million in 2022/23 to R681.4 million in 2025/26, with compensation of employees accounting for an estimated 62.5 per cent (R1.2 billion) of this spending. To provide technical and administrative support to the president, deputy president and management, the *Administration* programme receives 86.9 per cent of the department's total allocation.

### **Enhancing leadership and partnerships**

The district development model is a department initiative aimed at improving coherence and integrated planning in South Africa's 44 districts and 8 metros to improve service delivery. To enhance coordination between spheres of government, over the medium term, the department will continue to provide leadership and play a coordinating role through its oversight of the model and, through the presidential imbizo, oversee its implementation. The department plans to produce 1 report per year over the MTEF period on oversight visits.

Over the medium term, the department will continue to strengthen partnerships among government departments, civil society and the private sector through a number of engagements. For example, the office of the deputy president, working with the South African National AIDS Council and other stakeholders, will continue to support the goals of the national strategic plan for HIV, TB and sexually transmitted infections by ensuring that meetings take place with stakeholders and that responses to these epidemics are well coordinated.

The department intends to have 12 engagements with partners and stakeholders each year over the medium term to promote the country's social transformation agenda. This includes continuing to work with provincial governments to expedite the profiling of military veterans to recognise their contribution to South Africa's democracy, and ensure that they are provided with support and benefits – such as education, housing and pensions – to lead their lives with dignity, as required in terms of the Military Veterans Act (2011).

Allocations of R291.7 million in the *Support Services to the President* subprogramme and R187.7 million in the *Support Services to the Deputy President* subprogramme, both in the *Administration* programme, are intended to support these activities.

### **Facilitating economic growth and job creation initiatives**

Government recognises that employment creation and job retention are paramount to rebuilding and enhancing South Africa's economy. In this regard, the department leads South Africa's economic recovery and reconstruction plan by facilitating and coordinating the Operation Vulindlela economic reform programme and the presidential employment initiative, which are aimed at accelerating and facilitating investment, trade promotion, economic growth and job creation. This entails providing young people with business skills and access to market and network opportunities, and driving progress on the recovery agenda.

To advance government's efforts, additional funding amounting to R9 million over the MTEF period is allocated to the project management office in the *Support Services to the President* subprogramme in the *Administration* programme. These funds will be used to employ 3 additional personnel to support the president in leading South Africa's economic recovery and reconstruction plan. As such, spending in the subprogramme is expected to increase at an average annual rate of 9.6 per cent, from R77.1 million in 2022/23 to R101.4 million in 2025/26.

### **Operationalising the e-Cabinet system**

The e-Cabinet system is a tool for streamlining Cabinet's decision-making processes and ensuring that it adopts an integrated approach to governance. The system provides a collaborative platform for members of the executive, heads of department and executive support staff to share, manage and store information securely. Over the medium term, the department will continue to provide training to all users, including executives and limited support staff who communicate, manage, capture and distribute classified information for the overall optimal functioning of Cabinet and its committees. For activities involving the procurement of software licensing, training, security and maintenance of the system, R83.9 million over the MTEF period is allocated in the *Cabinet Services* subprogramme in the *Executive Support* programme. Expenditure in the subprogramme is set to increase at an average annual rate of 1.6 per cent, from R53.6 million in 2022/23 to R56.2 million in 2025/26.

## Programme 1: Administration

### Programme purpose

Provide strategic leadership, management and support services to the department.

### Objectives

- Lead government programmes through leadership and coordination on an ongoing basis by:
  - providing strategic, executive and personal support to the deputy president in the execution of his delegated responsibilities towards the attainment of the electoral mandate and the department’s mission
  - mobilising society, promoting social cohesion and accelerating social transformation
  - strengthening executive and parliamentary accountability
  - overseeing the implementation of the Operation Vulindlela economic reform programme
  - facilitating interventions in selected hotspot municipalities with governance challenges and service delivery failures as part of intergovernmental coordination and collaboration
  - overseeing the implementation of an action plan to end load shedding and achieve energy security
  - providing leadership and technical assistance in efforts to resolve all challenges to the reliable provision of water and sanitation services.
  - providing political oversight to implement Cabinet decisions on land and agrarian reform and related anti-poverty interventions
  - mobilising society towards attaining a low-carbon, green economy and pathways towards a just transition
  - accelerating the implementation of key economic and social infrastructure projects as part of economic recovery plans
  - playing an oversight role in the fight against gender-based violence and femicide through the implementation of the national strategic plan on gender-based violence and femicide
  - advancing South Africa’s global and continental relations through effective leadership and coordination.

### Subprogrammes

- *Management* provides leadership, strategic management and administrative support within the department.
- *Support Services to the President* provides strategic, executive and personal support services to the president in the execution of his constitutional responsibilities and in leading the work of government.
- *Support Services to the Deputy President* provides support to the deputy president in the execution of his delegated responsibilities towards the attainment of the electoral mandate and the department’s mission.

## Programme 2: Executive Support

### Programme purpose

Provide strategic and administrative support to enable Cabinet to foster accountability and policy coherence through integrated planning, policy coordination, and the implementation of the strategic agenda of government.

### Objectives

- Strengthen support in the department on an ongoing basis by:
  - providing technical and strategic support to the president, deputy president and secretary to Cabinet on matters related to the functioning of Cabinet and Cabinet committees in relation to the implementation of the strategic agenda of government

- providing technical and strategic support to the head of the public administration on matters related to the functioning of the forum of South African directors-general in relation to the implementation of the strategic agenda of government
- strengthening and aligning government legislative programmes and monitoring their implementation
- strengthening the executive decision-making system of government.

### Subprogramme

- *Cabinet Services* provides strategic and administrative support to enable Cabinet and the forum of South African directors-general to foster accountability and policy coherence through integrated planning, policy coordination and the implementation of the strategic agenda of government.

## Programme 3: Policy and Research Services

### Programme purpose

Provide policy and research support to the president and deputy president in exercising their constitutional mandates within the context of government priorities.

### Objectives

- Enhance governance, state capacity and service delivery over the medium term by:
  - formulating policy proposals independently from line departments, or offering alternative policy recommendations
  - contributing to the setting of strategic agendas for Cabinet and the forum of South African directors-general
  - providing proactive advice to ensure that policy priorities remain focal amid the day-to-day demands of ministries and departments
  - facilitating interdepartmental coordination in the formulation and implementation of policy
  - providing intellectual leadership through the periodic publication of journal articles, book chapters, newspaper articles, public engagements, seminars and roundtable discussions.

### Subprogrammes

- *Economy, Trade and Investment* promotes coherence between economic, trade and investment policies and programmes, and oversees the work of the Infrastructure Fund, which is intended to pool government's infrastructure budget and leverage it to raise additional funds and attract skills from other public and private sources for infrastructure development.
- *Socioeconomic Impact Assessment System* provides support on policy initiatives, legislation and regulations. This subprogramme conducts socioeconomic impact assessments and facilitates the strengthening of the socioeconomic impact assessment system.

Executive authority: Speaker of the National Assembly and Chairperson of the National Council of Provinces  
Accounting officer: Secretary to Parliament  
Website: [www.parliament.gov.za](http://www.parliament.gov.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

*Provide the support services required by Parliament to fulfil its constitutional functions, assist political parties represented in Parliament to secure administrative support and service constituents, and provide members of Parliament with the necessary facilities.*

### Mandate

Parliament's mandate is based on the provisions of chapter 4 of the Constitution, which establishes Parliament and sets out its functions. Parliament is elected to represent the people, ensure government by the people under the Constitution, and represent the interests of provinces in the national sphere of government. Members of Parliament elect the president, provide a national forum for the public consideration of issues, pass legislation, and scrutinise and oversee executive action.

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

*Improve cooperative governance across the three spheres of government, in partnership with provinces, municipalities, civil society and communities, to enable accelerated service delivery.*

### Mandate

The Department of Cooperative Governance is mandated to develop and monitor the implementation of national policy and legislation to enable government to fulfil its developmental role; develop, promote and monitor mechanisms, systems and structures to enable integrated service delivery and implementation within government; and promote sustainable development by providing support and exercising oversight of provincial, local government and its entities. This mandate is derived from the following legislation:

- the Municipal Structure Act (1998)
- the Municipal Systems Act (2000)
- the Disaster Management Act (2002)
- the Municipal Property Rates Act (2004)
- the Intergovernmental Relations Framework Act (2005).

## Expenditure overview

Over the medium term, the department will continue to focus on: increasing access to basic services, mitigating against the risk of disasters, and creating income security in areas of high unemployment.

Total expenditure is expected to increase at an average annual rate of 5.9 per cent, from R115 billion in 2022/23 to R136.5 billion in 2025/26. Transfers to provinces and municipalities account for an estimated 95.4 per cent (R370.3 billion) of the department's total budget over the MTEF period for the *local government equitable share* and the *municipal infrastructure grant*. Expenditure on compensation of employees is expected to increase at an average annual rate of 1 per cent, from R366.2 million in 2022/23 to R377.7 million in 2025/26. This low increase reflects the anticipated decrease in the number of personnel from 585 in 2022/23 to 511 in 2025/26 due to natural attrition.

### Increasing access to basic services

The local government equitable share is an unconditional transfer that supplements the revenue raised by municipalities to perform their functions. It funds the operations and maintenance of free basic services, and subsidises the cost of administration for municipalities with the least potential to cover these costs from their own revenue. The local government equitable share comprises an estimated 81.8 per cent (R306.9 billion) of the department's spending over the medium term. These funds are made available in the *Intergovernmental Policy and Governance* programme, allocations to which are expected to increase at an average annual rate of 7.8 per cent, from R87.7 billion in 2022/23 to R109.8 billion in 2025/26. To compensate municipalities for the increased cost of bulk electricity and water, an additional R8.1 billion over the MTEF period is allocated to the local government equitable share.

The *municipal infrastructure grant* and the *integrated urban development grant* supplement municipalities' capital budgets. The *municipal infrastructure grant* is aimed at reducing municipal infrastructure backlogs in poor communities by providing access to basic services such as water, sanitation, solid waste removal, roads and community lighting. The *integrated urban development grant* is aimed at supporting investments in public infrastructure in an effort to create functioning urban spaces. To ensure that funds from these grants are spent for their intended purposes, 52 municipalities per year over the period ahead are expected to implement the district development model, which seeks to leverage integrated and collaborative planning among the 3 spheres of government to facilitate better service delivery. These grants are funded through the *Intergovernmental Support* programme and account for a combined 15.9 per cent (R58.7 billion) of the department's total spending over the MTEF period.

### Mitigating against the risk of disasters

Over the medium term, the department plans to continue to mitigate against the risk of disasters and build resilience by supporting 30 priority district municipalities that are considered most vulnerable to implement disaster management plans. These activities are funded through the *Disaster Risk Reduction and Capacity Development* subprogramme, which is allocated R149.5 million over the medium term. Overall expenditure in the *National Disaster Management Centre* programme is expected to decrease at an average annual rate of 46.4 per cent, from R4.3 billion in 2022/23 to R659.6 million in 2025/26.

### Creating income security in areas of high unemployment

To support government's employment initiatives, over the period ahead, the department aims to maintain 250 000 participants in the community work programme, especially in areas of high unemployment. Expenditure for these activities is within the *Community Work Programme* programme's allocation of R13.5 billion over the medium term.

## Programme 2: Intergovernmental Support

### Programme purpose

Facilitate and coordinate improvements in the functionality of provinces and municipalities. Strengthen coordination across the different spheres of government and support improvements in the delivery of services to households and communities.

### Objectives

- Improve reporting and accountability at provincial and local government level by providing legislative and policy oversight on an ongoing basis.
- Coordinate and facilitate the development of municipal infrastructure by transferring the *municipal infrastructure grant* and the *integrated urban development grant* to extend services to unserved communities in terms of the annual Division of Revenue Act on an ongoing basis.
- Support the development and maintenance of municipal infrastructure through partnerships with the Municipal Infrastructure Support Agent, sector departments and other entities on an ongoing basis.
- Target and facilitate the restructuring of the municipal spatial economy through integrated development planning by March 2025.
- Ensure improved service delivery at 140 municipalities by providing support and monitoring integrated plans and capacity building programmes by March 2025.

### Subprogrammes

- *Management: Intergovernmental Support* provides strategic leadership to the programme to ensure compliance with the departmental mandate and the achievement of targets in line with the district development model.
- *Municipal and Provincial Governance Support and Capacity Building* ensures improved service delivery through the development, implementation and monitoring of integrated plans and capacity building programmes.
- *Municipal Infrastructure Delivery Support* ensures alignment between One Plans for each identified district and metro that sets out the service delivery challenges and opportunities for growth and development in each area; infrastructure development plans; and annual performance plans. This is to support the development, implementation and monitoring of municipal infrastructure projects by informing and supporting municipal, district and metro funding mechanisms, and grants.
- *Municipal Infrastructure Grant* makes transfers to supplement the capital budgets of municipalities to address the infrastructure investment priorities of poor households.
- *Integrated Urban Development Grant* makes transfers to intermediate city municipalities to supplement their capital budgets for the implementation of the objectives of the integrated urban development framework.

- *Municipal Infrastructure Support Agent* makes transfers to help municipalities build in-house capacity and provide technical support for the sustained development of municipal infrastructure.

## Programme 3: Intergovernmental Policy and Governance

### Programme purpose

Facilitate efficient municipal administrative systems. Coordinate policy. Conduct research, monitoring and evaluation to build institutional resilience in provinces and municipalities.

### Objectives

- Strengthen accountability through the implementation of the local government anti-corruption strategy in 140 municipalities by March 2025.
- Support municipalities in improving financial sustainability and revenue management by developing simplified revenue plans, property and consumer databases, record management systems, and organograms aligned with municipal functions on an ongoing basis.
- Strengthen municipal finances by monitoring the implementation of the Municipal Property Rates Act (2004) by municipalities on an ongoing basis.
- Strengthen the functionality of municipalities by developing and implementing human resources and administrative systems, in line with the Municipal Systems Act (2000), by March 2025.
- Strengthen municipal governance by monitoring the functionality of council committees on an ongoing basis.
- Support the effective management of cooperative governance systems by:
  - strengthening intergovernmental reporting and communication, and revising a framework for local government powers and functions by March 2025
  - tabling the Intergovernmental Monitoring, Support and Intervention Bill by March 2024.

### Subprogrammes

- *Management: Intergovernmental Policy and Governance* provides strategic leadership to the programme to ensure compliance and the achievement of departmental targets.
- *Municipal Administration and Capacity* determines remuneration for senior managers in municipalities, and monitors and enforces compliance with appointment, performance and disciplinary regulations. This subprogramme also rolls out competency assessments for senior managers, and training and workshops on the implementation of municipal staff regulations.
- *Municipal Funding and Revenue Support* provides support to municipalities, monitors municipalities' implementation of free basic services policies, and ensures legislative adherence to the annual Division of Revenue Act. This subprogramme also administers the management information system for the *municipal infrastructure grant* to assist processes and procedures, and oversees the regulation of the valuation and rating of properties in terms of the Municipal Property Rates Act (2004).

- *Development Planning* coordinates the implementation of the national framework for local economic development to ensure the institutionalisation of long-term infrastructure planning and asset management practices.
- *Municipal Demarcation Board* makes transfers to fund operational activities such as capacity assessments, ward delimitation and boundary redeterminations. This subprogramme transfers its budget to the Municipal Demarcation Board in full.
- *South African Cities Network* makes transfers to the South African Cities Network to fund operational activities, including enabling cooperation between South African cities. This subprogramme transfers its budget to the network in full.
- *Municipal Governance* ensures the appropriate division of powers and functions between local and district municipalities. This subprogramme also promotes ethics and implements strategies to combat corruption.
- *Research and Knowledge Management* researches, collates and benchmarks best practices in local and international government management to enhance policy development and implementation.
- *South African Local Government Association* makes transfers to the South African Local Government Association to fund operational activities, including its participation in intergovernmental structures and legislatures.
- *United Cities and Local Governments of Africa* makes transfers to United Cities and Local Governments of Africa to fund operational activities, enhance cooperation and knowledge sharing among local governments in Africa, and improve the delivery of services to communities across the continent.
- *Local Government Equitable Share* is the share of nationally raised revenue payable to local government in terms of section 214 of the Constitution. This transfer supplements municipal revenue for the provision of free basic services to poor households and the creation of greater institutional capacity in weaker municipalities.
- *Municipal Systems Improvement Grant* provides technical assistance and support to municipalities to build in-house capacity to perform their functions, and to stabilise institutional and governmental systems, as required by the Municipal Systems Act (2000), the Municipal Property Rates Act (2004) and related legislation.

## Programme 4: National Disaster Management Centre

### Programme purpose

Promote an integrated and coordinated system of disaster management with special emphasis on prevention and mitigation by all role players and stakeholders.

### Objectives

- Reduce disaster risk by facilitating:
  - the development, assessment and implementation of multisector disaster management plans across local government on an ongoing basis
  - education, training, public awareness and research for all relevant role players and within communities on an ongoing basis.
- Oversee institutional disaster management systems and improve legislative compliance by reviewing and amending regulatory and policy frameworks for disaster management on an ongoing basis.
- Improve and strengthen disaster management systems for all common disasters such as drought, floods, fire and disease in all provinces by raising public awareness about the effects and management of disasters on an ongoing basis.
- Coordinate effective, integrated disaster management and fire services by developing, strengthening and managing regulatory and institutional frameworks on an ongoing basis.
- Promote a culture of risk avoidance among stakeholders and role players by providing capacity for them through integrated education, training and public awareness programmes informed by scientific research on an ongoing basis.

### Subprogrammes

- *Management: Head Disaster Management Centre* provides strategic leadership to the programme.
- *Disaster Policy, Institutional Development and Compliance* facilitates the establishment of the requirements for effective institutional arrangements in the national sphere of government to ensure the integrated and coordinated implementation of disaster risk management policy and legislation, and the application of the principles of cooperative governance.
- *Disaster Risk Reduction and Capacity Development* facilitates the development, assessment and implementation of multisectoral frameworks and plans to reduce and manage disaster risk. This subprogramme also promotes education, training, public awareness and research among role players and communities to improve disaster risk avoidance, reduce disaster risk and build community resilience.
- *Disaster Preparedness, Response and Recovery Coordination* develops and oversees the implementation of response and recovery strategies and projects, following a disaster, in an integrated manner.
- *Municipal Disaster Recovery Grant* aims to rehabilitate and reconstruct municipal infrastructure damaged by disasters. This subprogramme makes transfers only when a disaster has been declared.

- *Disaster Response Grant* aims to provide immediate relief for legally classified disasters. This subprogramme makes transfers only when a disaster has been classified.

**Programme 5: Community Work Programme**

**Programme purpose**

Create income security and work experience for participants, and promote social and economic inclusion by targeting areas of high unemployment.

**Objective**

- Provide and maintain 250 000 work opportunities per year over the medium term by managing programmes and strategic partnerships effectively and efficiently.

**Subprogrammes**

- *Coordination, Partnerships and Implementation* ensures the effective management and coordination of partnerships and special projects with both the private and public sectors to meet the objective of the programme.
- *Monitoring and Evaluation* provides oversight and monitors the implementation of projects to ensure adherence to the programme’s norms and standards so that set targets are achieved.

Process for delimitation of municipal ward boundaries for local government elections per year	Demarcation and spatial transformation excellence	Priority 5: Spatial integration, human settlements and local government	Engage with all stakeholders on the ward delimitation process for the 2021 local government elections	4 468 wards published in terms of the Local Government: Municipal Systems Act (2000)	–1	–1	–1	Finalise draft plan for 2026 ward delimitation process for the 2026 local government elections	Draft wards delimited
Process for determination of municipal boundaries per year	Demarcation and spatial transformation excellence		–2	–2	Municipal boundary determination proposals analysed	Determined or redetermined municipal outer boundaries published for class 1 redeterminations	Conclude municipal boundary redeterminations for classes 2 to 4	–1	–1
Number of research reports published per year on improved spatial information	Research, spatial information and intelligence development		–2	–2	–2	1	1	1	1
Number of outreach activities to strengthen public and stakeholder awareness and education on demarcation processes per year	Stakeholder engagement and partnership		8	20	16	20	20	8	16

1. Targets driven by the municipal election cycle.

2. No historical data available.

#### Entity overview

The Municipal Demarcation Board derives its legislative mandate from chapter 7 of the Constitution and section 3 of the Local Government: Municipal Demarcation Act (1998). The board is mandated to determine and redetermine municipal boundaries and render advisory services. In terms of the Local Government: Municipal Structures Act (1998), the board is also mandated to delimit wards, conduct capacity assessments for municipalities, and assess the capacity of the executive council responsible for local government.

Over the MTEF period, the board will continue to improve its administrative and legislative functions, and begin ward delimitation processes to ensure that all municipalities that qualify to have wards are finalised in time for the 2026 local government elections.

Spending on compensation of employees accounts for an estimated 57.1 per cent (R140.9 million) of total expenditure over the period ahead for the board’s 48 funded posts. Expenditure is expected to increase at an average annual rate of 0.1 per cent, from R81.6 million in 2022/23 to R81.7 million in 2025/26. The board expects to derive 96.6 per cent (R229.3 million) of its revenue over the MTEF period through transfers from the department.

**Entity overview**

The Municipal Infrastructure Support Agent was established in terms of section 7(5)(c) of the Public Service Act (1994). The agent provides technical support to and builds technical capacity in municipalities to enhance their capability to efficiently plan, deliver, operate and maintain municipal infrastructure.

Over the medium term, the agent will continue to provide technical support to selected municipalities to improve access to basic services and the reliability of services. To ensure the effective and efficient development, implementation and maintenance of municipal infrastructure, the agent plans to enrol 450 candidates for the young graduate programme and provide 1 250 municipal officials with technical skills training over the MTEF period. Compensation of employees accounts for an estimated 62.1 per cent (R705.6 million) of the agent's total expenditure over the period ahead.

Expenditure is expected to decrease at an average annual rate of 1.4 per cent, from R400.2 million in 2022/23 to R383.6 million in 2025/26, mainly due to the retention of surplus funding from a one-off allocation in 2021/22 for the innovative solid waste management project as part of the presidential employment initiative. The agent is set to derive 99.2 per cent (R1.1 billion) of its revenue over the MTEF period through transfers from the department. Revenue is set to decrease in line with spending.

**South African Local Government Association****Entity overview**

The South African Local Government Association is an association of municipalities recognised by the Organised Local Government Act (1997). The association's strategic role is to represent the interests of local government within the overall system of government, assist members to fulfil their developmental goals, participate actively in intergovernmental relations, voice local government interests and provide solutions to challenges in local government. However, after reviewing the association's legislative mandate, National Treasury has resolved that it has been incorrectly classified in the Public Finance Management Act (1999). The process to delist the association from the act is under way.

As the association's core functions of research and municipal governance support are labour intensive, spending on compensation of employees accounts for an estimated 53.7 per cent (R1.2 billion) of its total budget over the medium term for 406 personnel.

Total expenditure is expected to increase at an average annual rate of 4.7 per cent, from R679.9 million in 2022/23 to R802 million in 2025/26. The association is set to derive 91.9 per cent (R2.5 billion) of its revenue over the MTEF period through membership fees from municipalities. Revenue is expected to increase in line with expenditure.

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Provide a comprehensive communication service on behalf of government to facilitate the involvement of the majority of South Africans in governance, reconstruction and development, nation building, and reconciliation.

### Mandate

The mandate of the Government Communication and Information System is derived from section 195(1)(g) of the Constitution, which stipulates that the public should be provided with information that is timely, accurate and accessible. This is in support of the constitutional principles of freedom of expression, and transparent and open governance. The department is responsible for providing strategic leadership and coordinating government communication to ensure that members of the public are informed and have access to government programmes and policies that benefit them.

1. No historical data available.

## Expenditure overview

Over the medium term, the department will continue to focus on providing and facilitating strategic government communication and facilitating active citizen participation by rendering core communication activities and driving key national priority campaigns.

The national digital and physical distribution of the Vuk'uzenzele newspaper is integral to the department's rendering of core communication services. It is the only national publication that is focused on government's key priorities, with an emphasis on service delivery programmes and the opportunities created by government. The department aims to print and distribute 10.2 million copies of the newspaper per year at a cost of R63 million over the medium term in the *Products and Platforms* and *Communication Service Agency* subprogrammes in the *Content Processing and Dissemination* programme.

The department will conduct activations across the country that entail direct interactions with citizens, mostly in area-specific local languages. Key activities include printing pamphlets and information brochures, and advertising on social media, and radio and television stations. Activations will be initiated based on domestic

and foreign media engagements, and important government and national events such as the State of the Nation Address. These functions are performed by the department's regional offices at a cost of R11 million in each year over the MTEF period in the *Provincial and Local Liaison* subprogramme in the *Intergovernmental Coordination and Stakeholder Management* programme.

Over the medium term, the department plans to drive national priority campaigns on gender-based violence, anti-corruption in government, and the economic reconstruction and recovery plan. These campaigns are primarily aimed at raising awareness and informing the public on progress made in dealing with these challenges, and will be conducted through social media, community radio stations, television, newspapers, and distributing leaflets and flyers. For this purpose, R60 million over the MTEF period is allocated in the *Media Buying* subprogramme in the *Content Processing and Dissemination* programme.

As the department relies on human resources to carry out its mandate, spending on compensation of employees accounts for 38.4 per cent (R890.3 million) of its total budget, increasing at an average annual rate of 2.1 per cent, from R291.2 million in 2022/23 to R309.6 million in 2025/26. Capital expenditure and transfers to the department's entities, Brand South Africa and the Media Development and Diversity Agency, account for 35.3 per cent.

## Programme 2: Content Processing and Dissemination

### Programme purpose

Provide strategic leadership in government communication to ensure coherence, coordination, consistency, quality, impact and responsiveness.

### Objectives

- Provide strategic leadership and support in government communications by conducting research on public opinion and analysing media coverage to understand the communications environment and inform government messaging over the medium term.
- Increase the share of government's voice and messaging in the public domain by producing government communication products and services over the medium term.
- Improve the dissemination of information by providing effective and efficient marketing and distribution services, cost-effective media bulk-buying services, and media products and services for government on an ongoing basis.

### Subprogrammes

- *Programme Management for Content Processing and Dissemination* coordinates strategic planning for communications in the department and other government departments, and ensures adherence to standards for government communications.
- *Policy and Research* conducts research to assess the information needs of the public and how government should address these needs, monitors media coverage of issues affecting government and the country, provides analysis on how the media interprets and reports on government policies and programmes, formulates policy proposals, assesses public perceptions on government performance, and oversees the process of reviewing government communications policy by monitoring its implementation and facilitating workshops.
- *Products and Platforms* develops content for the department, provides language services for products that require translation, provides editing and proofreading services, manages the department's and government's websites, produces government publications, provides social media and news services, and develops the national communication strategy.
- *Communication Service Agency* provides media bulk-buying services and media production services to all spheres of government, develops distribution strategies for all government communications, oversees the outsourcing of distribution services to service providers, manages government's corporate identity, and provides marketing services for the department and other government departments.
- *Entity Oversight* monitors the implementation of policies by Brand South Africa and the Media Development and Diversity Agency, and provides guidance on and oversees their governance matters.
- *Media Policy* conducts research and develops print media, new media and communications policies for government.

## Programme 3: Intergovernmental Coordination and Stakeholder Management

### Programme purpose

Implement development communication through mediated and unmediated communication channels, and foster sound stakeholder relations and partnerships.

### Objectives

- Improve interdepartmental coordination to ensure that all government messages are coherent and aligned by jointly planning messaging and sharing communications functions across the 3 spheres of government over the medium term.

- Ensure that citizens are informed and empowered on government's policies, plans, programmes and achievements, and increase public participation in government's activities by engaging with stakeholders over the medium term.
- Implement a proactive and reactive media engagement system by building, maintaining and improving relations with the media, and driving government's communications agenda over the medium term.

### Subprogrammes

- *Programme Management for Intergovernmental Coordination and Stakeholder Management* ensures a functioning communications system that informs and engages the public, and manages and oversees the implementation of development communications by building sound stakeholder relations and partnerships, and ensuring that the public is informed about government policies and programmes.
- *Provincial and Local Liaison* ensures that the national communication strategy is aligned with provincial and local communication strategies, procures advertising on media platforms to promote local government messages for the public, promotes the Thusong service centres, and coordinates the imbizo programme.
- *Media Engagement* leads and drives interaction and communication between government and the media; ensures effective liaison between ministers and the media; manages government's media liaison services by providing information; establishes, strengthens and maintains relationships with foreign and independent media; and establishes relations with South African missions to disseminate government information and key targeted messages.
- *Cluster Supervision (Human Development, Social Protection, and Governance and Administration)* provides strategic advice and support to national departments and leadership on key cluster communication issues and campaigns, and coordinates Cabinet cluster communications and the development of government's communications programme. This subprogramme also develops communications strategies and key messages for the campaigns of departments in these clusters.
- *Cluster Supervision (Economic and Infrastructure, Justice and International)* provides strategic advice and support to national departments and leadership on key cluster communication issues and campaigns, and coordinates Cabinet cluster communications and the development of government's communications programme. This subprogramme also develops communication strategies and key messages for the campaigns of departments in these clusters.

### Entity overview

Brand South Africa was established in 2002 to manage South Africa's nation brand with the aim of improving the country's global reputation and competitiveness. The entity's primary objective is to develop and implement proactive and coordinated reputation management, communications and marketing strategies for South Africa to attract investment, trade and tourism.

Over the medium term, the entity will focus on implementing activities that contribute to positively shaping South Africa's image and reputation. This includes using research to monitor sentiment and the nation brand's performance; analysing trends and providing insights to inform decision-making and communications strategies; and communicating the country's value proposition and values, and highlighting progress. These activities are expected to result in expenditure of R93.5 million over the MTEF period.

The entity plans to intensify work on its flagship programmes, Play Your Part and the nation brand forum, to promote stakeholder alignment and encourage South Africans to use some of their time, money, skills or goods to contribute to a better future for all. The programmes will further contribute towards addressing challenges such as racism, gender-based violence, unequal access to land and xenophobia, which threaten the values enshrined in the Constitution. These activities are expected to result in expenditure of R310.1 million over the medium term.

Total expenditure is set to increase at an average annual rate of 3.3 per cent, from R229.1 million in 2022/23 to R252.3 million in 2025/26. Transfers from the department account for an estimated 95.1 per cent (R688.6 million) of the entity's total revenue over the period ahead. Revenue is set to increase in line with expenditure.

**Entity overview**

Over the medium term, the agency will continue to provide financial and non-financial support to community and small commercial media, with an emphasis on promoting indigenous languages and contributing to community development. The agency also plans to intensify its focus on ensuring the sustainability of media projects in communities that are underserved by mainstream media.

Most of the agency's budget over the period ahead is directed at grant funding for 64 community broadcast projects, which assist with initiating new projects and strengthening existing ones, and 18 community and small commercial media print and digital projects. Funding for these projects is set to amount to R116 million over the MTEF period.

In line with the agency's plans to ensure the sustainability of community media, it plans to contribute to skills development by providing training in areas such as governance and social media to 120 community media projects through partnerships with stakeholders and training providers. Related activities are expected to cost R8.5 million over the medium term.

Total expenditure is expected to amount to R305.8 million, decreasing at an average annual rate of 9.7 per cent, from R139.6 million in 2022/23 to R102.8 million in 2025/26. This decrease is mainly due to an anticipated decrease in contributions from traditional media funders whose business has been affected by the growth in digital media. The agency is set to derive 56 per cent (R171 million) of its revenue over the period ahead through the mainstream community broadcast sector as donations deductible from the Universal Service and Access Fund levy, and 37.9 per cent (R115.9 million) through transfers from the department.

### Vote purpose

*Efficiently determine and safeguard the identity and status of citizens. Regulate immigration to ensure security, promote development and fulfil South Africa's international obligations.*

### Mandate

The Department of Home Affairs derives its mandate from the Constitution and various acts of Parliament and policy documents. This mandate entails the management of citizenship and civil registration, the management of international migration and the management of refugee protection. It allows the department to be a key enabler of national security, citizen empowerment, efficient administration and socioeconomic development. These functions must be managed securely and strategically. The department's services are divided into 2 broad categories: civic services and immigration services.

### Selected performance indicators

**Table 5.1 Performance indicators by programme and related priority**

Indicator	Programme	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Percentage of machine-readable adult passports (new live capture system) issued within 13 working days for applications collected and processed within South Africa per year	Citizen Affairs	Priority 1: A capable, ethical and developmental state	95% (745 331/ 782 047)	94% (108 385/ 114 109)	88% (277 739/ 314 841)	90%	90%	90%	90%
Number of births registered per year within 30 calendar days	Citizen Affairs	Priority 6: Social cohesion and safer communities	845 253	606 569	798 025	750 000	800 000	800 000	810 000
Number of smart identity cards issued to citizens 16 years and older per year	Citizen Affairs		2 816 544	1 210 851	2 369 245	2 200 000	2 500 000	2 500 000	2 500 000
Percentage of machine-readable passports for children (new live capture system) issued within 18 working days for applications collected and processed within South Africa per year	Citizen Affairs	Priority 1: A capable, ethical and developmental state	– <sup>1</sup>	– <sup>1</sup>	– <sup>1</sup>	90%	90%	90%	90%
Percentage of permanent residence applications for critical skills (S 27b), general work (S 26a) and business (S 27c) adjudicated within 8 months for applications collected within South Africa per year	Immigration Affairs	Priority 2: Economic transformation and job creation	95.8% (8 142/ 8 497)	43.7% (793/ 1 815)	85.6% (351/ 410)	85%	85%	85%	85%
Percentage of business and general work visa applications adjudicated within 8 weeks for applications processed within South Africa per year	Immigration Affairs		98% (1 444/ 1 471)	83.3% (570/ 684)	89.2% (812/910)	90%	90%	90%	90%
Percentage of critical skills visa applications adjudicated within 4 weeks for applications processed within South Africa per year	Immigration Affairs		86.7% (4 707/ 5 431)	91.1% (2 299/ 2 523)	57.2% (2 790/ 4 876)	95%	95%	95%	95%

1. No historical data available.

## **Expenditure overview**

Over the medium term, the department will continue to focus on securing international migration through the establishment of the Border Management Authority, modernising ICT infrastructure to ensure integrated planning and efficient administration, ensuring access to rights and services, and digitising records. Expenditure is expected to increase nominally at an average annual rate of 0.7 per cent, from R10.8 billion in 2022/23 to R11 billion in 2025/26. This is mainly due to a one-off allocation of R839.9 million in 2023/24 for the digitisation of records project. The department plans to facilitate the function shift from various national departments towards the establishment of the Border Management Authority, which explains an increase of 14.4 per cent in spending on transfers and subsidies.

The department is set to receive additional funding of R900 million over the MTEF period for the establishment of the Border Management Authority. Spending on compensation of employees accounts for an estimated 35.8 per cent (R11.3 billion) of total expenditure over the MTEF period, and spending on goods and services for an estimated 27.5 per cent (R8.4 billion).

### ***Securing international movement***

The Border Management Authority is expected to facilitate and manage the legitimate movement of people and goods within the border law enforcement area and at ports of entry, and cooperate with and coordinate its border law enforcement functions with other organs of state. Processes are under way to establish the authority as a schedule 3A public entity from 1 April 2023, and the entity is set to be fully operational by 2025/26. Transitional arrangements for this include transferring the frontline immigration function and personnel at ports of entry to the authority, seconding personnel to the authority from other organs of state, and conducting physical verification and asset inventories. The entity has signed a memorandum of understanding with the department to share corporate services. An amount of R4.2 billion is transferred to the Border Management Authority over the next 3 years for its establishment and to fulfil its mandate. These transfers are made through the *Border Management Authority* subprogramme in the *Institutional Support and Transfers* programme.

### ***Modernising ICT infrastructure***

The department is committed to screening all passengers and crew travelling to, from or through South Africa by air or sea in advance. For this purpose, the passenger name record is expected to be rolled out over the MTEF period to enable improved risk assessment by including data from airline reservation systems, such as payment details, travel itineraries and baggage information. Preparatory work has begun to implement the system. This includes the purchasing of hardware, software design, system and hosting maintenance, and the appointment of service providers. For this purpose, R225.5 million is allocated in 2023/24 in the *Immigration Affairs* programme.

Other ICT modernisation projects across the department over the medium term include rolling out biometric movement control systems at identified ports of entry; developing a live-capture system for births, marriages and deaths; managing asylum seekers; and developing and rolling out the e-visa system. These projects will be funded at an estimated cost of R875 million in 2023/24 in the *Transversal Information Technology Management* subprogramme in the *Administration* programme.

### ***Ensuring access to rights and services***

The department's planned hybrid access model is expected to provide for the optimal number and location of physical offices (321) and mobile units (127) to reach 778 visiting points over the MTEF period. In 2023/24, the department plans to procure 100 mobile units at a cost of R145 million. These mobile units will be equipped with the necessary hardware, systems and connectivity to function as physical offices. To manage these units, 100 mobile operators and 100 mobile unit clerks are set to be recruited at a cost of R70 million in 2023/24. To fund these activities, R55 million is allocated in 2023/24 in the *Transversal Information Technology Management* subprogramme in the *Administration* programme, and R90 million is made available in 2023/24 through self-financing expenditure.

Over the medium term, the department plans to introduce self-service machines that will allow clients to directly apply for smart ID cards and passports, and for re-issuing birth, marriage and death certificates. These machines will be installed in offices to increase the number of clients that can be served, as well as in strategic locations

such as shopping centres. The department is running a pilot programme at Menlyn Mall in Pretoria. These initiatives are expected cost R10 million in 2023/24 in the *Transversal Information Technology Management* subprogramme in the *Administration* programme.

### Digitising records

Through its digitisation of records project, the department intends to convert more than 340 million paper-based South African civic records into an electronically searchable format by 2025/26. In doing so, it also plans to contribute to public and social employment by recruiting unemployed young graduates to work on the project. For this purpose, R500 million was allocated towards the project in 2022/23, which saw the recruitment of 6 000 graduates at a cost of R289 million. The remainder was used to procure capital assets such as digital scanners, storage and backup hardware, and barcode printers. The department plans to recruit a further 4 000 graduates in early 2023/24. To further the project, R839.9 million is allocated in 2023/24 in the *Citizen Affairs Management* subprogramme in the *Citizen Affairs* programme. These funds will mainly be used for recruiting more graduates, compensation of employees and payment for capital assets.

## Programme 2: Citizen Affairs

### Programme purpose

Provide secure, efficient and accessible services and documents to citizens and lawful residents.

## Objectives

- Ensure that registration at birth is the only entry point to the national population register by increasing the number of births registered within 30 calendar days per year from 800 000 in 2023/24 to 810 000 in 2025/26.
- Ensure a high standard of service delivery over the medium term by:
  - issuing 2.5 million smart identity cards
  - issuing 90 per cent of machine-readable adult passports through the live-capture system within 13 working days
  - issuing 90 per cent of machine-readable children’s passports through the live-capture system within 18 working days.

## Subprogrammes

- *Citizen Affairs Management* provides for the overall management of head office and frontline offices, and provides policy direction, sets standards and manages back-office processes.
- *Status Services* regulates all matters relating to the national population register. These include: maintaining an accurate register of all citizens and immigrants who have acquired the right to permanent residence; registering births, deaths and marriages; providing travel and citizenship documents; providing financial assistance to citizens abroad who wish to return to South Africa but have no means to; and determining and granting citizenship.
- *Identification Services* oversees issues relating to identity such as fingerprints, photographs and identity documents. This entails establishing and maintaining national identity systems such as the automated fingerprint identification system.
- *Service Delivery to Provinces* provides for all civic, immigration and refugee affairs functions in provinces. This entails providing a client interface for the collection and processing of applications, issuing enabling documents that are available on demand (such as temporary identity certificates), and conducting quality assurance checks for civic and immigration applications.

## Programme 3: Immigration Affairs

### Programme purpose

Facilitate and regulate the secure movement of people through ports of entry into and out of the Republic of South Africa. Determine the status of asylum seekers and regulate refugee affairs.

### Objectives

- Maintain the standard of service delivery for enabling documents over the medium term by:
  - adjudicating 85 per cent of permanent residence applications (collected within South Africa for selected categories) within 8 months
  - adjudicating 90 per cent of business and general work visa applications (processed within South Africa) within 8 weeks
  - adjudicating 95 per cent of critical skills visa applications (collected within South Africa) within 4 weeks.

### Subprogrammes

- *Immigration Affairs Management* provides for the overall management of the branch and policy direction, sets standards, and manages back-office processes.
- *Admission Services* is responsible for issuing visas; securely facilitating the entry and departure of people to and from South Africa, in line with the Immigration Act (2002); recording their movements on the movement control system; and controlling the processing of applications for permanent and temporary residence

permits or visas, including those for work, study and business.

- *Immigration Services* deals with immigration matters in foreign countries; detects, detains and deports illegal immigrants in terms of the Immigration Act (2002); conducts investigations with other law enforcement entities; and provides policy directives on immigration matters.
- *Asylum Seekers* considers and processes applications for asylum, issues enabling documents to refugees, and facilitates processes to find durable solutions to refugee problems in line with the Refugees Act (1998). The head office is responsible for providing strategic leadership and refugee reception offices are responsible for operations.

## Programme 4: Institutional Support and Transfers

### Programme purpose

Provide institutional support and transfer funds to the Electoral Commission, the Represented Political Parties' Fund and the Border Management Authority.

### Objective

- Defend, protect, secure and manage South Africa's borders by operationalising the Border Management Authority at 72 ports of entry, 10 land border law enforcement areas and 2 community crossing points over the medium term.

### Subprogrammes

- Border Management Authority* transfers funds to the Border Management Authority to ensure South Africa's borders are effectively defended, protected, secured and managed.
- Electoral Commission* transfers funds to the Electoral Commission, which manages national, provincial and local government elections, ensures those elections are free and fair, and declares the results within a prescribed period.
- Represented Political Parties' Fund* transfers funds to the Represented Political Parties' Fund to provide funding for political parties participating in Parliament and provincial legislatures.

1. No historical data available.

#### Entity overview

The Border Management Authority was established in terms of the Border Management Authority Act (2020) to strengthen border control within the border law enforcement area and at ports of entry. The act empowers the authority to facilitate and manage the legitimate movement of people and goods at ports of entry, prevent illegitimate activities at ports of entry and within the border law enforcement area, and cooperate and coordinate its border law enforcement functions with other organs of state and border communities.

Processes for the establishment of the Border Management Authority as a schedule 3A public entity with effect from 1 April 2023 are under way. This entails, among other things, transitional arrangements that include sharing some corporate services with the department in 2023/24; transferring the frontline immigration, health, environment and agricultural functions and personnel at ports of entry to the authority through ministerial delegations; seconding personnel to the authority from other organs of state; and physically verifying assets and inventories. The authority will continue using some of the department's shared corporate services for 2023/24 as guided by a service-level agreement.

Expenditure is expected to increase at an average annual rate of 4.6 per cent, from R1.3 billion in 2023/24 to R1.5 billion in 2025/26. Total expenditure amounts to R4.2 billion over the MTEF period. The authority will focus its spending over the period ahead on deploying 200 additional border guards and gradually operationalising the corporate back office with 5 senior positions. These positions are expected to anchor the port functions being transferred from the departments of agriculture, land reform and rural development; forestry, fisheries and the environment; health; and home affairs. Spending will also be directed to assuming full responsibility once the shared service-level agreement for corporate services ends. The authority is set to derive all its

revenue, amounting to R4.2 billion over the next 3 years, through transfers from the department. Revenue is expected to increase in line with spending.

### Entity overview

The Electoral Commission was established in terms of the Electoral Commission Act (1996), which sets out the commission's composition, powers, functions and duties. It is mandated to manage national, provincial and local government elections, ensure that those elections are free and fair, and declare results within a prescribed period.

Over the medium term, the commission will focus on preparing for and conducting the 2024 national and provincial elections, for which R3.5 billion is allocated over the MTEF period for electoral operations. These include the procurement, printing, distribution and warehousing of registration and election materials; rental and infrastructure payments for about 23 400 voting stations; the procurement of electoral material such as an additional ballot type; the appointment and training of an estimated 350 000 electoral and expansion staff; the maintenance of the voters' roll; technological improvements such as rewriting candidate nomination, ballot generation and election result systems; and the procurement of a building for its national office.

The commission plans to undertake extensive civic and democracy education and communication campaigns ahead of the 2024 national and provincial elections, as well as for rolling out the amended Electoral Act (1998) once it becomes law. Through these campaigns, which will be rolled out on various media platforms, particularly

social media, the commission aims to keep the electorate informed and improve voter turnout. The commission's expenditure on outreach is expected to amount to R654 million over the medium term, with a further R296 million earmarked for holding an additional national registration event.

To ensure compliance with applicable provisions of the Political Party Funding Act (2018), the commission's party funding unit will focus on the management and administration of the Represented Political Parties' Fund and the Multiparty Democracy Fund, for which R75 million has been allocated over the MTEF period. This work is expected to include oversight, monitoring and enforcement, and the production of quarterly publications containing declarations of direct funding by political parties. Through this unit, the commission aims to undertake research to enhance monitoring and compliance policies for the act, as well as publicity campaigns to raise awareness of the Multiparty Democracy Fund.

Total expenditure is expected to increase at an average annual rate of 5.5 per cent, from R1.7 billion in 2022/23 to R2 billion in 2025/26. As a result of the appointment of contractors ahead of the 2024 national and provincial elections, spending on compensation of employees is set to increase at an average annual rate of 7.3 per cent, from R827.2 million in 2022/23 to R1 billion in 2025/26. The commission derives an estimated 97.8 per cent (R7 billion) of its revenue over the next 3 years from the department and the remainder through interest on investments. Revenue is expected to increase at an average annual rate of 2.9 per cent, from R2.3 billion in 2022/23 to R2.5 billion in 2025/26.

### Entity overview

Government Printing Works is mandated to provide secure printing and ancillary services to all organs of state in all spheres of government. The entity operates on sound business principles and fulfils its mandate subject to policies as prescribed by the Minister of Home Affairs. It produces enabling documents such as smart identity cards and passports, and facilitates communication by various government institutions through coordinating and distributing the Government Gazette.

Over the medium term, the entity will focus on revamping its ICT infrastructure by procuring a new enterprise resource planning system at a projected cost of R324 million. It will also focus on completing its master plan to renovate the administration building on Visagie Street, Pretoria, at an estimated cost of R1 billion over the period ahead.

Expenditure is projected to increase at an average annual rate of 12.1 per cent, from R1.3 billion in 2022/23 to R1.8 billion in 2025/26. The entity is set to generate 99.1 per cent (R5.5 billion) of its revenue over the medium term through its business operations. Revenue is expected to increase at an average annual rate of 12.2 per cent from R1.4 billion in 2022/23 to R2 billion in 2025/26.

### Vote purpose

*Formulate, coordinate, implement and manage South Africa's foreign policy and international relations programmes.*

### Mandate

According to the Constitution, the president is ultimately responsible for the foreign policy and international relations of South Africa. It is the president's prerogative to appoint heads of mission, receive foreign heads of mission, conduct state-to-state relations, and negotiate and sign all international agreements. International agreements that are not of a technical, administrative or executive nature bind the country only after being approved by Parliament, which also approves the country's ratification of or accession to multilateral agreements. All international agreements must be tabled in Parliament. The Minister of International Relations and Cooperation is entrusted with the formulation, promotion, execution and daily conduct of South Africa's foreign policy.

The department is mandated to work for the realisation of South Africa's foreign policy objectives by:

- coordinating and aligning South Africa's international relations
- monitoring international developments
- communicating government's policy positions
- developing and advising government on policy options, and creating mechanisms and avenues for achieving objectives
- protecting South Africa's sovereignty and territorial integrity
- contributing to the creation of an enabling international environment for South African businesses
- sourcing developmental assistance
- assisting South African citizens abroad.

## Selected performance indicators

**Table 6.1 Performance indicators by programme and related priority**

Indicator	Programme	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of regional political reports, including the outcomes of structured bilateral mechanisms and high-level visits, aligned with the achievement of the National Development Plan and government's 2019-2024 medium-term strategic framework per year	International Relations	Priority 7: A better Africa and world	- <sup>1</sup>	12	12	12	12	12	12
Number of regional reports per year on the regional trade and investment initiatives undertaken in support of the one government investment approach	International Relations		- <sup>1</sup>	12	12	12	12	12	12

1. No historical data available.

## **Expenditure overview**

Over the medium term, the department will continue to focus on advancing the African Agenda, participating in global forums, and enhancing its infrastructure portfolio in foreign missions.

Total expenditure over the MTEF period is expected to be R21 billion. Allocations are set to increase from R6.8 billion in 2022/23 to R7.3 billion in 2025/26 at an average annual rate of 2.5 per cent. The department operates mainly through the 116 diplomatic missions in 102 countries in which South Africa has representation. As such, compensation of employees is the department's main cost driver, accounting for an estimated 44.7 per cent (R9.4 billion) of expenditure over the medium term.

### ***Advancing the African Agenda***

In its efforts to advance peace and security and prevent conflict in Africa, the department will continue to play an active role in the structures and processes of the African Union (AU). Accordingly, South Africa will continue to advance the implementation of the African Continental Free Trade Area and the AU's Agenda 2063. To support these activities, the department anticipates spending R952.2 million over the medium term on AU membership fees. This expenditure is in the *Membership Contribution* subprogramme in the *International Transfers* programme.

The Southern African Development Community (SADC) is a major vehicle for South Africa's pursuit of regional development and integration. As such, the department intends to produce 4 reports per year on the outcomes of South-South engagements reflecting South Africa's participation and interests, such as enhancing trade relations and reducing conflict in Southern Africa. As a member of the SADC, South Africa will continue to ensure that its interests and those of other members are advanced. An amount of R477.2 million over the MTEF period is set aside in the *Membership Contribution* subprogramme in the *International Transfers* programme for South Africa's membership contributions to the SADC.

### ***Participating global forums***

South Africa advances its interests at the global level through its membership of and participation in United Nations (UN) programmes and forums. Accordingly, over the medium term, South Africa will continue to promote and advance its foreign and domestic policy imperatives, which include advancing the African Agenda on peace and security, human rights, and economic and social development, as well as supporting the UN's 2030 Agenda for Sustainable Development. The department plans to spend R624.4 million over the next 3 years on membership fees. This expenditure is in the *Membership Contribution* subprogramme in the *International Transfers* programme.

### ***Managing infrastructure projects and properties***

In an effort to strengthen its property portfolio over the MTEF period, the department plans to purchase properties for office and residential purposes to cut down on rental costs, and repurpose underused state-owned properties in its global portfolio. Repurposing involves converting offices or large official residences into staff quarters. Plans are in place to build on state-owned vacant land in New Delhi, India, and Luanda, Angola, over the MTEF period, and refurbish, renovate and maintain 24 existing properties across the world in accordance with the outcomes of conditional assessments to preserve and prolong the department's property portfolio. To carry out these activities, R633.3 million over the medium term is allocated in the *Foreign Fixed Asset Management* subprogramme in the *Administration* programme.

## Programme 2: International Relations

### Programme purpose

Promote relations with foreign countries.

### Objective

- Strengthen political, economic and social relations through structured bilateral agreements and high-level engagements to advance South Africa's national priorities, the African Agenda and South-South cooperation on an ongoing basis.

### Subprogrammes

- Africa* embraces relevant national priorities by strengthening bilateral cooperation with countries in Africa by focusing on increasing exports of South African goods and services, foreign direct investment with technology transfers into value-added industries and mineral beneficiation, and inbound tourism and skills enhancement. South Africa has representation in 47 diplomatic missions in Africa.

- *Asia and Middle East* embraces relevant national priorities by strengthening bilateral cooperation with individual countries in Asia and the Middle East, with a focus on increasing exports of South African goods and services, foreign direct investment with technology transfers into value-added industries and mineral beneficiation, and inbound tourism and skills enhancement. South Africa has representation in 30 diplomatic missions in Asia and the Middle East.
- *Americas and Caribbean* embraces relevant national priorities by strengthening bilateral cooperation with individual countries in the Americas and the Caribbean, particularly through increasing exports of South African goods and services, foreign direct investment with technology transfers into value-added industries and mineral beneficiation, and inbound tourism and skills enhancement. South Africa has representation in 13 diplomatic missions in the Americas and the Caribbean.
- *Europe* embraces relevant national priorities by strengthening bilateral cooperation with individual countries in Europe, focusing on increasing exports of South African goods and services, foreign direct investment with technology transfers into value-added industries and mineral beneficiation, and inbound tourism and skills enhancement. South Africa has representation in 23 diplomatic missions in Europe.

## Programme 3: International Cooperation

### Programme purpose

Participate in initiatives of international organisations and institutions in line with South Africa's national values and foreign policy objectives.

### Objectives

- Contribute to a reformed and strengthened multilateral system based on equal rules that is responsive to the needs of developing countries and Africa by participating in the global system of governance on an ongoing basis.
- Strengthen the AU and its structures by providing ongoing financial support for the operations of the Pan-African Parliament in terms of the country host agreement.
- Improve governance and capacity in the SADC secretariat by implementing the secretariat's job-evaluation plan and assisting with recruitment on an ongoing basis.
- Strengthen bilateral, trilateral and multilateral interests and relations within the dialogue forum of the Brazil-Russia-India-China-South Africa group of countries through participation in forum structures on an ongoing basis.
- Strengthen political solidarity, economic cooperation and sociocultural relations with Asian countries by participating in structures of the New Asian-African Strategic Partnership over the medium term.
- Strengthen North-South economic and political relations and cooperation to advance the African Agenda through financing development initiatives and providing support for institutional and governance reforms on an ongoing basis.

### Subprogrammes

- *Global System of Governance* provides for multilateralism and a rule-based international order. This entails participating and playing an active role in all forums of the UN system and its specialised agencies, and funding programmes that promote the principles of multilateral activity.
- *Continental Cooperation* provides for the enhancement of the African Agenda and Africa's sustainable development.
- *South-South Cooperation* provides for partnerships with countries from the South in advancing South Africa's development needs and the needs of the African Agenda; and creates political, economic and social convergence for the fight against poverty, underdevelopment and the marginalisation of the South.
- *North-South Dialogue* provides for South Africa's bilateral and multilateral engagements to consolidate and strengthen relations with organisations from the North to advance and support national priorities, the African Agenda and the developmental agenda of the South.

## Programme 4: Public Diplomacy and Protocol Services

### Programme purpose

Communicate South Africa's role and position in international relations in domestic and international arenas, and provide state protocol services.

### Objectives

- Provide ongoing consular assistance to South African citizens abroad.
- Ensure a better understanding of South Africa's foreign policy by providing ongoing strategic public diplomacy direction and state protocol services nationally and internationally.

## Subprogrammes

- *Public Diplomacy* promotes a positive image of South Africa; communicates foreign policy positions to domestic and foreign audiences; and markets and brands South Africa by using public diplomacy platforms, strategies, products and services.
- *Protocol Services* facilitates incoming and outgoing high-level visits and ceremonial events; coordinates and regulates engagement with the local diplomatic community; provides protocol advice and support to various spheres of government; facilitates the hosting of international conferences in South Africa; and manages state protocol lounges and guesthouses.

## Programme 5: International Transfers

### Programme purpose

Fund membership fees and transfers to international organisations.

### Objectives

- Promote multilateral activities that enhance South Africa's economic and diplomatic relations on the continent and with the world by:
  - providing for South Africa's annual membership fee contributions to international organisations such as the UN, the AU and SADC
  - providing annual transfers to recapitalise the African Renaissance and International Cooperation Fund as a contribution to its operations.

### Subprogrammes

- *Departmental Agencies* facilitates transfer payments to the African Renaissance and International Cooperation Fund.
- *Membership Contribution* facilitates transfer payments to international organisations.

### Entity overview

The African Renaissance and International Cooperation Fund was established in terms of the African Renaissance and International Cooperation Fund Act (2000) to enhance cooperation between South Africa and other countries, particularly African ones; promote democracy and good governance; prevent and resolve conflict; encourage socioeconomic development and integration; provide humanitarian assistance; and develop human resources.

Over the MTEF period, the entity will continue to focus on supporting projects that will enhance African trade, goods exchange, economic development and integration. Total expenditure is expected to increase at an average annual rate of 2.7 per cent, from R51.2 million in 2022/23 to R55.5 million in 2025/26. The entity is set to derive 97.5 per cent (R157 million) of its revenue over the period ahead through transfers from the department. These are expected to increase at an average annual rate of 3.1 per cent, from R49.7 million in 2022/23 to 54.5 million in 2025/26. The remainder is set to be generated through interest income.

 Website: [www.thensg.gov.za](http://www.thensg.gov.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Provide or coordinate the provision of learning, training and development interventions that lead to improved performance and service delivery in the public sector.

### Mandate

The National School of Government is mandated to provide training or effect its provision in terms of the Public Service Amendment Act (2007). The school carries out its mandate by developing relevant training and development programmes for delivery to South African public service officials at all levels. Through education and training, the school promotes the progressive realisation of the values and principles governing public administration, and enhances the quality of human resource capacity in public service institutions. The school uses its trading account, which was established in terms of the Public Finance Management Act (1999), as a delivery vehicle for its core output.

Number of ICT projects enabling National School of Government operations per year	Administration		– <sup>1</sup>	4	6	6	6	6	6

1. No historical data available.

### Expenditure overview

The department's overarching objective is to contribute to fulfilling the educational, training and development needs of the public service. To achieve this, over the MTEF period, the department will focus on continuing and increasing its active online learning interventions, and revising the funding model of its entity to improve revenue generation.

The number of online education, training and development interventions provided over the medium term is expected to increase from 8 in 2022/23 to 10 in 2025/26. To achieve this, the department will continue to implement 6 ICT projects per year in fields such as learning and training management systems to enable the school to operate more efficiently in its operations. These projects will assist the school in increasing the number of learners accessing compulsory and demand-led training, and education and development programmes. These activities will be carried out in the *Administration* programme, which is allocated R355.4 million over the MTEF period.

The department will continue to work on revising its entity's funding model by looking at alternative and broader sources of revenue beyond the fiscus to ensure financial sustainability. This will entail, among other interventions, a drive to increase the uptake of the school's education, training and development offerings from 75 per cent in 2022/23 to 80 per cent in 2025/26. Spending for these activities is within an allocation of R338.9 million over the medium term in the *Management* and *Corporate Services* subprogrammes in the *Administration* programme. Spending on the revised funding model is expected to increase at an average annual rate of 3.2 per cent, from R5 million in 2022/23 to R5.5 million in 2025/26.

Total expenditure is expected to increase at an average annual rate of 2.6 per cent, from R231.1 million in 2022/23 to R249.4 million in 2025/26. Transfers to the training trading account constitute 50.4 per cent (R361.8 million) of the department's budget over the medium term, while the remaining 49.6 per cent is allocated to the *Administration* programme.

## Programme 2: Public Sector Organisational and Staff Development

### Programme purpose

Facilitate transfer payments to the training trading account, which provides education, development and training to public sector employees.

## Objectives

- Ensure competent public servants who are empowered to do their jobs by:
  - assessing public servants through online diagnostic tools to determine skills gaps and needs over the medium term
  - ensuring that public servants undergo ethics education, training and development interventions annually
  - providing accredited and non-accredited education, training and development interventions annually
  - establishing sustainable partnerships and collaboration with local and international stakeholders to support education, training and development interventions on an ongoing basis.
- Ensure the provision of quality education, training and development by practitioners of the school by ensuring that:
  - 46 480 learners undergo education, training and development interventions on compulsory and demand-led courses or programmes in the 3 spheres of government, the legislative sector and state-owned enterprises by March 2024
  - 7 compulsory in-service training programmes are implemented by March 2024.

### Entity overview

The department carries out its expanded mandate of building capacity in all spheres of government, state-owned entities and organs of state through its training trading account. Over the medium term, the entity is expected to foster collaborations with training, higher education, and further education and training institutions, as well as private-sector training providers. Accordingly, it intends to increase its collaboration with higher education institutions from 20 per cent in 2022/23 to 40 per cent in 2025/26. In addition, the school is planning to conduct training and examinations or tests required for specified appointments or transfers to meet the development needs of all employees. These interventions are expected to enable the entity to increase the number of learners trained through compulsory and demand-led education, training and development from 40 460 in 2022/23 to 54 520 in 2025/26.

Expenditure is expected to increase at an average annual rate of 2.8 per cent, from R220.6 million in 2022/23 to R239.8 million in 2025/26, with goods and services accounting for an estimated 51.7 per cent (R356 million) of this spending. The entity will continue to outsource support services such as ICT, spending on which is expected to account for 5.3 per cent (R18.7 million) of the goods and services budget over the period ahead. Revenue is expected to increase in line with expenditure.

### Vote purpose

Support economic growth and development, good governance, social progress and rising living standards through the accountable, economical, efficient, equitable and sustainable management of public finances, the maintenance of macroeconomic and financial sector stability, and the effective financial regulation of the economy.

### Mandate

National Treasury's legislative mandate is based on section 216(1) of the Constitution, which calls for the establishment of a national treasury to ensure transparency, accountability and sound financial controls in the management of South Africa's public finances. This role is further elaborated on in the Public Finance Management Act (1999) as well as the Municipal Financial Management Act (2003). The department is mandated to:

- promote national government's fiscal policy and the coordination of macroeconomic policy
- ensure the stability and soundness of the financial system and financial services
- coordinate intergovernmental financial and fiscal relations
- manage the budget preparation process
- enforce transparency and effective management in respect of revenue and expenditure, assets and liabilities, public entities, and constitutional institutions
- oversee the implementation of the provincial and local government infrastructure portfolio

- ensure financial management governance and compliance with the Public Finance Management Act (1999) and the Municipal Financial Management Act (2003) across all spheres and entities in government.

Section 5(2) of the Municipal Financial Management Act (2003) further mandates the department to monitor municipal budgets, and promote good budgeting and fiscal management by municipalities. The mandate extends to the issuance of regulations on all aspects of the act, including investments, borrowing, budgeting, accounting, assets, reporting, competencies, expenditure, cost containment, supply chain, public-private partnerships, financial misconduct and criminal procedures.

1. No historical data available.

## Expenditure overview

Over the medium term, the department will focus on: reviewing tax policy; supporting sustainable employment; supporting infrastructure development and economically integrated cities and communities; managing future spending growth, fiscal risk and government's assets and liabilities; streamlining government procurement; strengthening financial management in government; and facilitating regional and international cooperation.

The department's budget over the medium term is R3 trillion, of which 59.2 per cent (R1.8 trillion) is for transfers to provincial governments for the provincial equitable share. Cabinet has approved budget increases amounting to R76.9 billion over the MTEF period to the provincial equitable share for adjustments related to compensation of employees. Debt-service costs account for 35.6 per cent (R1.1 trillion) of direct charges against the National Revenue Fund over the medium term. However, Cabinet has approved an increase on debt-service costs of R18.6 billion over the period.

The following increases have been made for transfers to departmental agencies over the medium term: R1.5 billion for the South African Revenue Service to implement capital projects; R226.4 million for Secret Services for operations; and R265.3 million for the Financial Intelligence Centre, also for operations. An additional R91.3 million is allocated to compensation of employees for cost-of-living adjustments.

### Reviewing tax policy

To meet government revenue requirements and improve the fairness of the tax system, over the MTEF period,

the department will continue developing tax policy proposals, drafting tax legislation such as the Rates Bill and Taxation Laws Amendment Bill, and drafting tax regulations to implement proposals. To this end, allocations to the *Tax Policy* subprogramme in the *Economic Policy, Tax, Financial Regulation and Research* programme amount to R98.4 million over the medium term, comprising 19.2 per cent of the programme's budget.

### **Supporting sustainable employment**

The Jobs Fund offers matched funding grants across 4 funding windows – enterprise development, work opportunities through infrastructure development, support for work seekers and institutional capacity building. Grant funding is made available through a competitive process to initiatives that innovatively solve employment challenges and have the potential to be scaled up. The fund's portfolio of projects is valued at an estimated R9 billion. Since the Jobs Fund's inception in 2011, project partners in the private sector, as well as non-governmental organisations, have committed R13.5 billion in matched funding. As at 31 December 2022, the fund had disbursed R6.4 billion and leveraged an additional R12.7 billion from project partners. The fund is allocated R1.4 billion over the medium term in the *Government Technical Advisory Centre* subprogramme in the *Public Finance and Budget Management* programme.

### **Supporting infrastructure development and economically integrated cities and communities**

The department will continue to facilitate conditional grants and provide financial incentives for infrastructure planning and development to municipalities. This is through the *local government financial management grant*, aimed at promoting and supporting financial management reform and building capacity in municipalities; the *neighbourhood development partnership grant*, aimed at developing and implementing urban network plans; the *project preparation support grant*, aimed at and supporting metropolitan municipalities in developing a pipeline of investment-ready capital programmes and projects; and the *infrastructure skills development grant*, aimed at increasing the pool of professional engineers, planners and other built environment professionals in local government. Transfers to the grants are projected to be R6.3 billion over the medium term in the *Facilitation of Conditional Grants* subprogramme in the *Public Finance and Budget Management* programme.

### **Managing future spending growth, fiscal risk and government's assets and liabilities**

Over the next 3 years, the department will continue to coordinate the national budgeting process and oversee expenditure planning in the *Programme Management for Public Finance and Budget Management*, *Public Finance and Budget Office and Coordination* subprogrammes. These subprogrammes are allocated R519.7 million over the period ahead in the *Public Finance and Budget Management* programme. The department will also continue to promote and enforce prudent financial management of state-owned entities through financial analysis and oversight. To this end, over the MTEF period, the department will review all corporate plans, annual reports and guarantee applications received from schedule 2 and 3B public entities. To carry out these activities, R409.9 million is allocated over the medium term across subprogrammes in the *Asset and Liability Management* programme.

### **Streamlining government procurement**

The Office the Chief Procurement Officer plans to ensure that the Public Procurement Bill is passed through Parliament in 2023/24. The bill is aimed at ensuring that the state uses and leverages procurement to advance economic opportunities for historically disadvantaged people, women, young people, people with disabilities and small businesses; and promote local production. Preferential procurement regulations that provide for categories of preference in the awarding of bids in government were approved in January 2023 and will be implemented over the MTEF period. As such, over the next 3 years, the department will support the implementation of regulations across government. These activities will be carried out in the *Programme Management for Financial Accounting and Supply Chain Management Systems* subprogramme in the *Financial Accounting and Supply Chain Management Systems* programme, which is allocated R375.7 million over the medium term.

### **Strengthening financial management in government**

Government's integrated financial management system is designed to enhance the effectiveness of back-end public service functions by improving access to information and the quality of data, eliminating the duplication of systems and resources, and limiting the use of manual processes. Over the MTEF period, the department will

continue to develop the system. Preliminary work for the implementation of some of its modules, such as eRecruitment, a centralised public service recruitment system and the establishment of a centre of excellence, which will provide technical support to users, commenced in 2022. The department will work towards their implementation over the medium term. R1.1 billion over the medium term is allocated towards the integrated financial management system.

### **Facilitating international and regional cooperation**

Activities carried out in the *International Financial Relations* programme will continue to advance South Africa's interests through representation in international and regional financial institutions, as well as managing bilateral and multilateral relationships through regional engagements.

International commitments for the acquisition of shares in the African Development Bank and World Bank, along with related transfer payments, constitute an estimated 31.3 per cent (R2.7 billion) of spending in the *International Financial Relations* programme over the MTEF period. The department also facilitates regional cooperation within the Common Monetary Area with a budget allocation of R4.9 billion over the medium term. These funds are made available for compensation payments to Namibia, Lesotho and Eswatini for the use of the rand currency in these countries.

The department's key regional engagements over the next 3 years include providing technical support to regional capacity building institutions such as the Collaborative Africa Budget Reform Initiative, the International Finance Facility for Immunisation, the Commonwealth Fund for Technical Cooperation, the African Institute for Economic Development and Planning, and the International Monetary Fund's Regional Technical Assistance Centre for Southern Africa. To support these engagements, R88.8 million over the medium term is allocated in the *African Integration and Support* subprogramme in the *International Financial Relations* programme.

**Programme 2: Economic Policy, Tax, Financial Regulation and Research****Programme purpose**

Provide specialist policy research, analysis and advisory services in the areas of macroeconomics, microeconomics, the financial sector, taxation and regulatory reform.

**Objectives**

- Improve South Africa's macroeconomic and microeconomic framework by conducting ongoing analytical work and research, and developing policy advisory services.

- Build and maintain research capacity to inform economic policy in South Africa by providing academic and research institutions with funding annually.
- Promote an effective, equitable and efficient tax policy framework and tax administrative system by developing and updating tax policies, and supporting legislation for the annual budget process.

### Subprogrammes

- *Programme Management for Economic Policy, Tax, Financial Regulation and Research* provides overall programme management and policy advice to government on the promotion of economic growth, employment, microeconomic and macroeconomic stability.
- *Financial Sector Policy* is responsible for developing policy on the regulation of the financial sector in South Africa, developing policies to broaden access to financial services for all South Africans, and developing policies to improve the national savings rate through reforms to the legislative framework governing the savings industry, including work undertaken towards the implementation of proposals for retirement reform.
- *Tax Policy* is responsible for drafting annual tax proposals and tax legislation as part of the national budget to promote an effective, equitable and efficient tax policy framework and tax administrative system that ensures sustainable growth and delivery on government's mandate to address the needs of all South Africans. This includes providing tax proposals towards improved environmental sustainability.
- *Economic Policy* provides macroeconomic and microeconomic forecasts, policy analysis on microeconomic and regulatory issues, economic impact assessments and scenario modelling to provide sound policy advice on the economic environment for the annual budget and other government processes. Although policy advice is mainly focused on creating decent employment through inclusive growth, this subprogramme also provides analytical work and policy advice on a wide range of issues, including: inflation management; electricity pricing; economic growth; structural budget balances; industrial policy; policy on small, medium and micro enterprises (SMMEs); and the exchange rate.
- *Cooperative Banks Development Agency* facilitates the transfer payment to the Cooperative Banks Development Agency, which provides for the registration, supervision and regulation of cooperative banks and the development of cooperative financial institutions – such as savings and credit cooperatives, community banks, village banks and financial services cooperatives – into cooperative banks.

## Programme 3: Public Finance and Budget Management

### Programme purpose

Provide analysis and advice on fiscal policy and public finances, intergovernmental financial relations, expenditure planning and priorities. Manage government's annual budget process and provide public finance management support. Facilitate employment creation and high-impact government initiatives, and strengthen infrastructure planning and delivery.

### Objectives

- Promote growth, social development and the reduction of poverty through the implementation of sound fiscal and financial policies, and the effective, efficient and appropriate allocation of public funds annually.

- Prepare an annual national budget that gives effect to government's economic, fiscal, social and developmental goals as expressed in the National Development Plan and government's 2019-2024 medium-term strategic framework to provide fiscal policy advice by monitoring economic and fiscal trends, and advising on policy options and the budget framework.
- Deepen transparency in the allocation of public finances through the annual production and publication of: the Budget Review, Estimates of National Expenditure, Medium-term Budget Policy Statement, Adjusted Estimates of National Expenditure, and appropriation legislation containing relevant, accurate and clear financial information and associated indicators of service delivery and performance.
- Contribute to public policy and programme development by providing support for planning, policy and programme analysis, budgeting, project management and public finance reform in provinces and municipalities on an ongoing basis.
- Promote public and private investment in infrastructure and public services on an ongoing basis by providing technical support for capital expenditure planning and project analysis, advice on financing alternatives, support for municipal development, and financial assistance for neighbourhood development projects.
- Measure the use of public financial resources by monitoring, supporting and analysing public expenditure and service delivery for social and economic development and infrastructure investment on an ongoing basis.
- Support and enable budget analysis by a broad range of stakeholders, including Parliament, on an ongoing basis through increased public participation with regards to the budget.
- Build capacity in the public sector by providing diagnostic and advisory services and support for organisational development, specialised procurement, improved public finance management, and programme and project implementation on an ongoing basis.
- Enhance budget and financial management practices by strengthening public finance management capacity in municipalities and supporting provincial treasury oversight of local government financial management on an ongoing basis.
- Ensure liveable, sustainable, resilient, efficient and integrated towns and cities by promoting public and private investment in city development, integrated urban networks and neighbourhood development initiatives on an ongoing basis.
- Stimulate employment and inclusive growth by supporting innovative and partnership-based approaches to employment creation, work-seeker support and enterprise development on an ongoing basis.
- Ensure technical capacity in local government built environment by supporting infrastructure planning and implementation in all provinces and infrastructure skills development in all municipalities on an ongoing basis.

### **Subprogrammes**

- *Programme Management for Public Finance and Budget Management* provides support to the programme's planning, monitoring and delivery functions. Key activities include oversight and managing the processes related to the annual publication of the Medium-term Budget Policy Statement, the coordination of the annual budget and the production of the Division of Revenue Bill for the 3 spheres of government.
- *Public Finance* provides financial and budgetary analysis of government programmes, advises on policy and service delivery trends, and manages National Treasury's relations with other national departments.
- *Budget Office and Coordination* is responsible for the national budget process including the publication of the Budget Review, Estimates of National Expenditure, Medium-term Budget Policy Statement and Adjusted Estimates of National Expenditure. This subprogramme also leads the budget reform programme, coordinates international technical assistance and donor finance, provides advice on public service remuneration and pension arrangements, compiles public finance statistics, and provides fiscal policy advice.
- *Intergovernmental Relations* coordinates fiscal relations between national, provincial and local government; promotes sound provincial and municipal budgetary planning, reporting and financial management; and provides support for government with the aim of promoting improved infrastructure planning and management to support the service delivery targets in all spheres of government.
- *Financial and Fiscal Commission* facilitates the annual transfer payment to the Financial and Fiscal Commission, which provides independent, objective, impartial and unbiased advice to all 3 spheres of

government on the division of revenue, as well as advice on the enactment of legislation pertaining to provincial taxes, municipal fiscal powers and functions, and provincial and municipal loans.

- *Facilitation of Conditional Grants* facilitates conditional grants administered by National Treasury aimed at strengthening public and private investment in improved living and working conditions in townships, and creating spatially resilient, efficient and integrated towns and cities. These grants are further aimed at promoting accelerated and inclusive development in major urban areas through better governance and built environment planning, improved human settlements and public transport management, local economic development, environmental sustainability and climate resilience.
- *Catalytic Infrastructure and Development Support Programme* provides technical assistance and support to National Treasury, provincial treasuries and municipalities by assigning professional advisers with experience and expertise in municipal financial management to facilitate key reforms and skills transfer through the municipal finance improvement programme. Activities in this subprogramme also help with developing infrastructure planning and project management capacity.
- *Government Technical Advisory Centre* provides technical consulting services, specialised procurement and project management support, infrastructure advice and knowledge management in support of the efficient, effective and transparent management of public finances. This subprogramme also comprises a fund to facilitate the creation of employment. The fund supports innovative and partnership-based approaches to sustainable employment creation; provides work-seeker support and enterprise development through the Jobs Fund; and supports research on employment, income distribution and inclusive growth.

## Programme 4: Asset and Liability Management

### Programme purpose

Manage government's annual funding programme in a manner that ensures prudent cash management, and an optimal portfolio of debt and other fiscal obligations. Promote and enforce the prudent financial management of state-owned entities through financial analysis and oversight.

### Objectives

- Exercise oversight of state-owned entities on an ongoing basis by:
  - reviewing the corporate plans and annual financial statements of state-owned entities
  - coordinating the borrowing programmes of state-owned entities
  - tracking progress on capital expenditure programmes

- reviewing applications for funding, guarantees and borrowing limits in terms of the Public Finance Management Act (1999), and monitoring progress.
- Meet government’s annual gross borrowing requirement – consisting of the budget deficit and maturing debt – by sourcing funds from domestic and international markets, and servicing government’s debt optimally.
- Ensure that government’s liquidity requirements are consistently met within credit risk guidelines by implementing effective cash management and making sound cash flow forecasts on an ongoing basis.
- Minimise and mitigate risks emanating from government’s fiscal obligations to develop and maintain a risk management framework for the debt and contingent liabilities of government by implementing debt management strategies that minimise government’s exposure to adverse risks on an ongoing basis.

## Subprogrammes

- *Programme Management for Asset and Liability Management* provides support for planning, monitoring and delivering the programme’s activities.
- *State-owned Entity Financial Management and Governance* oversees and enables state-owned entities to meet government’s policy objectives in a financially and fiscally sustainable manner, and promotes sound corporate governance.
- *Government Debt Management* is responsible for government’s long-term funding needs. This subprogramme manages domestic and foreign debt, contributes to the development of financial markets, and maintains sound investor relations.
- *Financial Operations* provides for government’s short-term funding needs, the prudent management of cash, the efficient accounting of debt and investment transactions in government, and quality information relating to the subprogramme’s operations. This subprogramme also invests government’s surplus cash, and supplies reliable computer systems to service government’s debt portfolio and cash operations.
- *Strategy and Risk Management* develops and maintains a risk management framework for the debt and contingent liabilities of government, and implements debt management strategies that minimise government’s exposure to adverse risks.

## Programme 5: Financial Accounting and Supply Chain Management Systems

### Programme purpose

Facilitate governance and accountability by promoting and enforcing the transparent, economic and effective management of revenue, expenditure, assets, liabilities and supply chain processes in the public sector.

### Objectives

- Ensure compliance with the Public Finance Management Act (1999) and the Municipal Finance Management Act (2003) across the 3 spheres of government by facilitating and undertaking special investigations to reduce fraud and corruption on an ongoing basis.
- Ensure sound financial management systems to meet the requirements of the Public Finance Management Act (1999) and the Municipal Finance Management Act (2003) by:
  - providing capacity and support to all spheres of government on policies relating to accounting and reporting, internal auditing and risk management on an ongoing basis
  - developing and implementing government transversal accounting and reporting systems over the medium term
  - maintaining government's financial systems at 98 per cent availability, including providing reliable, efficient and effective support and user training, over the medium term
  - completing the development of the remaining integrated financial management system's modules on payroll, core financial management and inventory management, and beginning its rollout over the medium term.
- Support government's efforts to build capacity in financial management across the 3 spheres of government by introducing minimum competency profiles and offering graduate internships in financial management annually.
- Improve financial management in provincial and local government by:
  - developing and implementing financial recovery plans and providing technical assistance on an ongoing basis
  - supporting municipalities in implementing financial management reforms and ensuring their compliance with the Municipal Finance Management Act (2003), as required, over the medium term.

- Modernise the supply chain management system for government over the medium term by:
  - introducing policy reforms to ensure that all procuring government institutions implement a single supply chain management policy
  - providing training solutions to bridge the skills gap for existing and future supply chain management practitioners.

### Subprogrammes

- *Programme Management for Financial Accounting and Supply Chain Management Systems* supports the planning, monitoring and coordination of the deliverables of the programme plan, such as the development and implementation of the integrated financial management system; and facilitates accountability and governance in the public sector, especially in terms of financial management.
- *Office of the Chief Procurement Officer* aims to modernise the state procurement system to be fair, equitable, transparent, competitive and cost effective; enable the efficient, economic, effective and transparent use of financial and other resources, including state assets, for improved service delivery; and promote, support and enforce the transparent and effective management of state procurement and the sound stewardship of government assets and resources.
- *Financial Systems* maintains and improves existing financial management systems, and develops and implements the new integrated financial management system, which aims to replace financial, supply chain and human resources management systems across national and provincial departments.
- *Financial Reporting for National Accounts* is responsible for accounting for the National Revenue Fund and the Reconstruction and Development Programme Fund, providing banking services to national government, providing support for all spheres of government in implementing financial reporting frameworks, and preparing consolidated financial statements.
- *Financial Management Policy and Compliance Improvement* improves financial management and develops financial management regulatory frameworks with local and international best practice; develops and implements accounting policies; and improves the financial management, risk management and internal audit capacity in government.
- *Audit Statutory Bodies* is a transfer payment to the Auditor-General of South Africa for the implementation of the amendments in the Public Audit Act (1995).
- *Service Charges: Commercial Banks* is a transfer payment that provides for bank charges for the deposit accounts of all government departments.

## Programme 6: International Financial Relations

### Programme purpose

Manage South Africa's interests in shaping regional and global policies that advance the economic, financial and development objectives of the country and Africa.

## Objectives

- Advance South Africa and Africa's economic interests by undertaking strategic analyses, engagements and negotiations at regional and global financial and economic forums on an ongoing basis.
- Increase sub-Saharan Africa's voice and South Africa's influence in multilateral international institutions such as the International Monetary Fund, the World Bank Group, the G20 and other influential global financial and economic forums by advancing the reform of these institutions through the lobbying of regional groupings on an ongoing basis.
- Enhance South Africa's participation in strategic regional, continental and global governance institutions by seconding South Africans into strategic positions in these institutions, as informed by government's secondment policy, on an ongoing basis.
- Promote regional economic integration in the Southern African Development Community (SADC) region and the Southern African Customs Union, and strengthen economic links within Africa by:
  - providing ongoing support to the committees of the SADC dealing with economic and financial protocols
  - providing ongoing support to the Southern African Customs Union to resolve regional challenges.

## Subprogramme

- *Programme Management for International Financial Relations* supports the planning, monitoring and delivery of the programme's activities with the World Bank country office, the African Development Bank regional resource centre and the New Development Bank. This subprogramme oversees South Africa's representation in international and regional financial institutions; manages bilateral and multilateral relationships on behalf of National Treasury; and plans, implements and monitors programmes and activities that advance South Africa's national interests.
- *International Economic Cooperation* focuses on improving South Africa's participation in regional and international economic institutions. This entails working through key economic institutions and forums such as the Southern African Customs Union, the SADC, the United Nations Economic Commission for Africa, the African Union's New Partnership for Africa's Development, the International Monetary Fund, the G20, the G24, the Brazil-Russia-India-China-South Africa group of countries, the Organisation for Economic Cooperation and Development, and the World Economic Forum.
- *African Integration and Support* enables National Treasury's participation in African interventions and arrangements that are aimed at bringing about support and integration between African states and institutions. This subprogramme facilitates the transfer of funds to Lesotho, Namibia and Eswatini for the Common Monetary Area compensation. In this agreement, South Africa compensates the member countries for the use of the rand within their borders. It also includes technical support provided to regional capacity-building institutions such as the Collaborative Budget Reform Initiative, the Infrastructure Consortium for Africa, the African Capacity Building Foundation, the African Institute for Economic Development and Planning, and the International Monetary Fund's Regional Technical Assistance Centre for Southern Africa.
- *International Development Funding Institutions* provides for subscriptions and contributions to international development institutions and banks. This subprogramme transfers funds to the African Development Bank and the International Bank for Reconstruction and Development to pay for shares, and to the African Development Fund and the World Bank Group's International Development Association for the provision of concessional loans and grants to low-income countries. In line with South Africa's shareholding agreement, this subprogramme also facilitates capital transfers for the New Development Bank.
- *International Projects* transfers funds to international projects and interventions for various causes such as capacity building, and catastrophe and disaster relief for affected low-income countries. To this end, National Treasury contributes to the Commonwealth Fund for Technical Cooperation and the International Finance Facility for Immunisation. The facility transfers funds to the Global Alliance for Vaccines and Immunisation, a public-private global health partnership, to support health care, particularly the provision of vaccines to reduce the number of deaths preventable by vaccination among children in low-income countries.

## Programme 7: Civil and Military Pensions, Contributions to Funds and Other Benefits

### Programme purpose

Provide for government's pension and post-retirement medical benefit obligations to former employees of state departments and bodies. Provide for similar benefits to retired members of the military.

### Objectives

- Ensure the effective administration of pension, retirement and other policies on an ongoing basis by completing annual reviews and implementing recommendations in accordance with stakeholder agreements on pension reforms, post-retirement medical benefits, political office bearers and pension legislation.
- Ensure good service to eligible applicants and recipients on an ongoing basis by:
  - processing member applications and making payments punctually, as required by applicable legislation
  - processing post-retirement medical benefit applications within 60 days of receipt, and paying all medical subsidies within 7 days of receipt of a valid and correct claim
  - processing and paying injury-on-duty benefits to civil servants within 45 days of receipt of completed documentation
  - ensuring the accurate payment of military pensions within 45 days of receipt and medical accounts within 30 days of receipt of the claim with no backlog.

### Subprogrammes

- *Government Pensions Administration Agency* provides administrative services, in accordance with the Temporary Employees Pension Fund Act (1979) and the Associated Institutions Pension Fund Act (1963), for post-retirement medical subsidies, as provided for and regulated by resolutions of the Public Service Coordinating Bargaining Council, the Military Pensions Act (1976) and military pensions in terms of this act; for injury-on-duty payments in terms of the Compensation for Occupational Injuries and Diseases Act (1993); and special pensions in terms of the Special Pensions Act (1996) on behalf of National Treasury.
- *Civil Pensions and Contributions to Funds* provides for the processing and payment of pensions and medical subsidies to retired civil servants; and pension payments to injured or disabled civil servants and former struggle veterans or, if they are deceased, their dependants in terms of various statutes, collective bargaining agreements and other commitments. All payments related to this subprogramme are administered by the *Government Pensions Administration Agency* subprogramme.
- *Military Pensions and Other Benefits* provides for the processing and payment of military pension benefits and medical claims arising from injuries sustained during various wars, including South Africa's liberation wars. These include payments to former members of the legislative assembly of the former Venda, Transkei, Ciskei and Bophuthatswana governments; judges or their widows/widowers in terms of the Judges' Remuneration and Conditions of Employment Act (2001); and former state presidents, among other benefits.

## Programme 8: Revenue Administration

## Programme purpose

Ensure the efficient transfer of funds to the South African Revenue Service for the administration of an efficient tax system and for the provision of tax education to the public. Ensure maximum compliance with tax and customs legislation, maximise revenue collection and facilitate trade.

## Objective

- Ensure the monthly transfer of funds to the South African Revenue Service for the administration of an effective tax system, the provision of tax education to the public, and maximum compliance with tax and customs legislation; maximise revenue collection.

## Subprogrammes

- *South African Revenue Service* transfers funds to the South African Revenue Service to provide core tax administration services and maintain the ICT services that support its operations.

## Expenditure trends and estimates

## Programme 9: Financial Intelligence and State Security

### Programme purpose

Ensure the efficient transfer of funds to the Financial Intelligence Centre and State Security Agency to enhance the state's ability to combat financial crime, including money laundering and terror financing activities. Gather intelligence for the purposes of national security, defence and combating crime.

### Objective

- Ensure the monthly transfer of funds to the Financial Intelligence Centre and State Security Agency to enhance the state's ability to combat financial crime, including money laundering and terror financing activities, and gather intelligence for the purposes of national security, defence and combating crime.

### Subprogrammes

- *Financial Intelligence Centre* facilitates transfer payments to the Financial Intelligence Centre, which enhances the integrity of the South African financial system while creating new ways for investigating authorities to combat criminal activity.
- *Secret Services* facilitates transfer payments to the South African Secret Services, which provides government with accurate, topical, policy-relevant and timeous foreign intelligence to promote, enhance and protect national security and the interests of South Africa and its citizens.

## Entities

### Accounting Standards Board

#### Selected performance indicators

**Table 8.21 Accounting Standards Board performance indicators by programme/objective/activity and related priority**

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of Accounting Forum meetings hosted on generally recognised accounting practice standard application issues per year	Administration	Priority 3: Education, skills and health	8	8	8	8	8	8	8
Number of articles per year to raise awareness on any new developments in relation to accounting practice standards among stakeholders	Administration	Priority 1: A capable, ethical and developmental state	5	5	4	4	4	4	4
Number of international board meetings attended per year	Administration	Priority 7: A better Africa and world	4	4	4	4	4	4	4

#### Entity overview

The Accounting Standards Board was established to develop uniform standards of generally recognised accounting practice for all spheres of government in terms of section 216(1)(a) of the Constitution and the Public Finance Management Act (1999). The board also promotes transparency and the effective management of the revenue, expenditure, assets and liabilities of the entities to which the standards apply.

In line with its mandate, the board will implement its Taking Stock programme, which involves a mix of projects to ensure that stakeholders are not overburdened with too many new or revised reporting requirements. Over

the next 3 years, a major focus of the board will be on developing and implementing standards of generally recognised accounting practices using the information contained in the annual financial statements of its stakeholders, and ensuring these are in line with best practice.

Expenditure is expected to increase at an average annual rate of 3.1 per cent, from R14.7 million in 2022/23 to R16.1 million in 2025/26. Compensation of employees of the board's 7 employees account for an estimated 72.6 per cent (R33.3 million) of its expenditure over the period ahead, increasing from R10.9 million in 2022/23 to R11.7 million in 2025/26 at an average annual rate of 2.4 per cent. Expenditure on goods and services, the second-largest spending item, is expected to increase at an average annual rate of 5.5 per cent, from R3.7 million in 2022/23 to R4.3 million in 2025/26, due to the anticipated appointment of a consultant to assist with standard-setting activities for the Taking Stock programme. Revenue, which is derived mainly through transfers from the department, is expected to increase in line with expenditure.

### Programmes/Objectives/Activities

Number of cooperative financial institutions provided with direct technical assistance per year	Capacity building and information		39	66	72	64	64	64	64

### Entity overview

The Cooperative Banks Development Agency was established in terms of the Cooperative Banks Act (2007). The agency is mandated to facilitate, support and develop cooperative banking with the strategic focus of driving growth and sustainability in the cooperative banking sector, and contributing to a transformed financial services sector in terms of ownership and meaningful participation in the mainstream banking sector. The agency also promotes access to finance for SMMEs and the financial inclusion of underserved communities through the provision of retail banking services.

Over the medium term, the agency will focus on expanding the footprint of sustainable, professionalised, modernised and technology-enabled cooperative banking institutions, thereby increasing the sector's membership base, member deposits and assets. This plan includes collaboration and partnerships with

stakeholders to assist in developing institutions, strengthening organisations, enhancing operational efficiency through innovative technology interventions and solutions, and expanding the footprint of sustainable cooperative banking institutions through a holistic support programme. The agency will also work towards merging with the Small Enterprise Development Agency and the Small Enterprise Finance Agency over the MTEF period. The aim of the merger is to address the fragmentation and poor coordination of support provided to SMMEs and cooperatives at the local and provincial levels of government.

Expenditure is expected to decrease at an average annual rate of 0.5 per cent, from R27.1 million in 2022/23 to R26.7 million in 2025/26. This is due to a projected decrease in spending on goods and services owing to a reduction in operational activities in anticipation of the merger. Spending on the compensation of 18 employees is the agency's main cost driver, increasing at an average rate of 3.2 per cent, from R13.9 million in 2022/23 to R15.3 million in 2025/26. Revenue, which is expected to decrease in line with expenditure, is derived mainly through transfers from the department.

**Entity overview**

The Development Bank of Southern Africa was reconstituted in terms of the Development Bank of Southern Africa Act (1997) as a development finance institution with the primary purpose of promoting economic development and growth. The bank also promotes the development of human resources and institutional capacity by mobilising financial and other resources from national and international private and public sector

partners for sustainable development projects and programmes in South Africa and other Southern African countries.

Over the medium term, the bank aims to create a sustainable infrastructure development ecosystem while accelerating and scaling up its development and implementation of catalytic infrastructure, which will entail driving investments in sectors such as energy, transport and logistics, water and sanitation, ICT, health, human settlements and education. For example, in the energy sector, the bank will intensify activities around the Just Transition framework, which seeks to address the strategic positioning of the bank as a responsible investor, in line with nationally determined contributions and South Africa's commitments to decarbonisation. This includes supporting and financing the implementation of the independent power producer programme. For purposes of scaling up the development and implementation of catalytic infrastructure over the MTEF period, the bank plans to disburse R15 billion by 2025/26.

Interest payments account for a projected 53.2 per cent (13.6 billion) of the bank's total spending over the period ahead. Expenditure is expected to increase at an average annual rate of 5.7 per cent, from R7.3 billion in 2022/23 to R8.6 billion in 2025/26, driven mainly by the high level of expected disbursements over the MTEF period. The bank derives revenue mainly from interest and fees from investments. Revenue is expected to increase at an average annual rate of 9.1 per cent, from R9.3 billion in 2022/23 to R12.1 billion in 2025/26.

## Financial and Fiscal Commission

### Selected performance indicators

**Table 8.33 Financial and Fiscal Commission performance indicators by programme/objective/activity and related priority**

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of policy briefs published per year	Research		8	4	11	10	10	10	10
Number of technical reports published per year	Research	Priority 1: A capable, ethical and developmental state	1	1	1	1	1	1	1
Annual submission to Parliament for the Division of Revenue Bill with recommendations	Research		1	1	1	1	1	1	1

### Entity overview

The Financial and Fiscal Commission derives its mandate from the Financial and Fiscal Commission Act (1997), which requires the commission to advise relevant authorities on financial and fiscal requirements for national, provincial and local spheres of government in terms of section 220 of the Constitution. Other legislation that informs the commission's mandate includes the Borrowing Powers of Provincial Governments Act (1996), the Intergovernmental Fiscal Relations Act (1997), the Provincial Tax Regulation Process Act (2001), the Municipal Finance Management Act (2003), the Municipal Systems Amendment Act (2003), the Municipal Fiscal Powers and Functions Act (2007), and the Money Bills Amendment Procedure and Related Matters Act (2009).

Over the medium term, the commission will focus on providing stakeholders, including Parliament, with recommendations to improve the credibility of the South African fiscal framework and the effectiveness of public spending. The commission's contribution will include other policy research papers and briefings on a wide range of fiscal and financial topics. It will also focus on its organisational redesign and the relocation of its Johannesburg office to its office in Cape Town. After the organisational redesign, the commission is set to increase its number of personnel from 42 in 2022/23 to 60 in 2025/26.

Accordingly, spending on compensation of employees, the commission's main cost driver, is expected to increase at an average annual rate of 9.3 per cent, from R37.4 million in 2022/23 to R48.8 million in 2025/26. Spending on goods and services is expected to decrease at an average annual rate of 5.2 per cent, from R26.4 million in 2022/23 to R22.5 million in 2025/26, due to an expected decrease in spending on consultants and travel as a result of the relocation. The commission derives its revenue mainly through transfers from the department. These are set to increase in line with expenditure over the period ahead.

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of Financial Intelligence Centre inspection reports issued per year	Delivery of intelligence on financial crimes and regulatory services in terms of the Financial Intelligence Centre Act (2001)	Priority 6: Social cohesion and safer communities	287	381	404	430	430	440	450
Number of proactive high-priority financial intelligence reports issued to stakeholders per year	Delivery of intelligence on financial crimes and regulatory services in terms of the Financial Intelligence Centre Act (2001)		32	52	131	65	70	75	80
Percentage response to requests for technical assistance from countries within the Eastern and Southern Africa Anti-Money Laundering Group region per year	Delivery of intelligence on financial crimes and regulatory services in terms of the Financial Intelligence Centre Act (2001)		100% (9)	100% (5)	100% (3)	100%	100%	100%	100%
Number of policy-making activities attended within regional and intergovernmental organisations per year	Delivery of intelligence on financial crimes in terms of the Financial Intelligence Centre Act (2001)	Priority 7: A Better Africa and world	8	7	8	8	8	8	8
Percentage of reactive financial intelligence reports issued to stakeholders per year	Delivery of intelligence on financial crimes in terms of the Financial Intelligence Centre Act (2001)		134% (2 010/ 1 500)	134% (2 077/ 1 550)	144% (2 300/ 1 600)	100%	100%	100%	100%
Number of medium-priority to lower-priority financial intelligence reports issued to stakeholders per year	Delivery of intelligence on financial crimes in terms of the Financial Intelligence Centre Act (2001)		713	713	651	600	650	700	750
Number of elevated financial intelligence reports issued to stakeholders on illicit financial flows per year	Delivery of intelligence on financial crimes in terms of the Financial Intelligence Centre Act (2001)	– <sup>1</sup>	– <sup>1</sup>	32	20	35	40	45	

1. No historical data available.

### Entity overview

The Financial Intelligence Centre was established by the Financial Intelligence Centre Act (2001) to combat money laundering activities and the financing of terrorist and related activities, identify the proceeds of unlawful activities, exchange information with law enforcement and other local and international agencies, supervise and enforce compliance with the act, and facilitate effective supervision and enforcement by supervisory bodies in

terms of the act. To deliver on this mandate and protect the integrity of South Africa's financial system, the act works in conjunction with other legislation, which includes the Prevention of Organised Crime Act (1998), the Protection of Constitutional Democracy Against Terrorist and Related Activities Act (2004), and the South African Police Service Act (1995).

To address concerns identified in the Financial Action Task Force action plan, as well as in response to the recommendations from the state capture commission, over the medium term, the centre will focus on augmenting its human resource capacity, and enhancing and maintaining its ICT network and systems. This is expected to enable it to improve its oversight responsibility and combating of financial crimes and terror financing by enhancing analytical software to reinforce the integrity of South Africa's financial system and improving access to information for clients. As a result, expenditure is expected to increase at an average annual rate of 7.2 per cent, from R371.1 million in 2022/23 to R457.5 million in 2025/26. An additional R265.3 million over the period ahead is allocated to augment human resource capacity.

The centre plans to add 107 permanent personnel to its establishment over the medium term with interdisciplinary skills in supervision and monitoring, forensic accounting, enforcement, compliance and strategic analysis to combat money laundering and counter terror financing and related activities. This is expected to drive an increase over the MTEF period in the number of high-priority financial intelligence reports issued to stakeholders from 65 to 80, the number of medium-priority to lower-priority reports from 600 to 750, and the number of elevated financial intelligence reports on illicit financial flows from 20 to 45. Spending on compensation of employees is expected to increase at an average annual rate of 13 per cent, from R203.9 million in 2022/23 to R294.5 million in 2025/26. Spending on goods and services is expected to decrease at an average annual rate of 0.8 per cent, from R150.1 million in 2022/23 to R146.7 million in 2025/26 as contract staff are made permanent.

### Programmes/Objectives/Activities

### Entity overview

The Financial Sector Conduct Authority was established in 2018 by the Financial Sector Regulation Act (2017) as 1 of the 2 pillars of the twin peaks model for regulating the financial sector. As such, the authority assumes the role of the market conduct regulator of financial institutions that provide financial products and services, and financial institutions licensed in terms of financial sector legislation. The authority assumed the business operations of the Financial Services Board in 2018/19. The authority's ongoing objective is to play a meaningful role in promoting growth and employment, and reducing poverty through regulating the financial services sector and protecting consumers, and promoting an integrated approach to financial inclusion and employment.

Over the medium term, the authority will focus on implementing its revised strategy, which is aimed at enabling it to be more responsive and forward-looking, and includes an expanded mandate to supervise banks. These objectives are intended to improve industry practices to achieve fair outcomes for financial customers; act against misconduct to support confidence and integrity in the financial sector; promote the development of an innovative, inclusive and sustainable financial sector; empower households and small businesses to be financially resilient; and accelerate the transformation of the authority into a socially responsible, efficient and responsive conduct regulator. This will be done by conducting environmental assessments to identify and understand trends; attracting specialist expertise to deal with emerging issues such as climate change; and proactively monitoring pricing and selling practices, new business models and financial products. The authority's expenditure estimates include an amount of R13 million per year to establish the Ombud Council, which is a distinct regulatory body over the financial sector and statutory ombud schemes over the period ahead.

Compensation of employees accounts for an estimated 64.1 per cent (R1.9 billion) of the authority's expenditure, increasing from R587.3 million in 2022/23 to R672 million in 2025/26 at an average annual rate of 4.6 per cent. Total spending is expected to increase at an average annual rate of 4.9 per cent, from R905.9 million in 2022/23 to R1 billion in 2025/26.

The authority generates revenue mainly through levies raised from financial institutions and fees for their licensing. Revenue is expected to increase at an average annual rate of 6.9 per cent, from R887.4 million in 2022/23 to R1.1 billion in 2025/26. This includes additional allocations of R13 million per year over the medium term to establish the Ombud Council and appoint its personnel.

Percentage of benefits, excluding death benefits, paid per year within 45 working days of liability date after receiving duly completed documents	Benefit administration	Priority 6: Social cohesion and safer communities	81% (R111bn/ R137bn)	61.4% (R108bn/ R176bn)	76.6% (R134bn/ R175bn)	86%	87%	87%	87%
Percentage of National Treasury benefits <sup>1</sup> , excluding death benefits, paid per year within 20 working days of receipt of duly completed documents	Benefit administration		90% (R5.5bn/ R6.1bn)	99.8% (R5.1bn/ R5.11bn)	99.3% (R5.9bn/ R6bn)	89%	90%	91%	91%

1. Benefits include civil and military pensions, post-retirement medical subsidies, civil pensions not administered by the agency and injury-on-duty payments.

### Entity overview

The Government Pensions Administration Agency provides pension administration services to the Government Employees Pension Fund in terms of the Government Employees Pension Law (1996) and the Associated Institutions Pension Fund Act (1963). Post-retirement medical subsidies are administered as provided for and regulated by resolutions of the Public Service Coordinating Bargaining Council, military pensions are administered in terms of the Military Pensions Act (1976), injury-on-duty payments are administered in terms of the Compensation for Occupational Injuries and Diseases Act (1993), and special pensions are administered in terms of the Special Pensions Act (1996).

The agency aims to optimise its performance over the medium term through its modernisation programme. This will entail procuring new pension administration, client relationship management and financial management solutions. These interventions are expected to lead to a reduction in turnaround times for processing and paying benefits from 45 days to less than 25 days, improve the management and accuracy of client data, and enable the agency to reach 65 per cent of clients through digital platforms.

These investments are expected to drive an increase in spending on goods and services at an average annual rate of 11 per cent, from R479.9 million in 2022/23 to R656.6 million in 2025/26, and an increase in total expenditure at an average annual rate of 6.4 per cent, from R1.2 billion in 2022/23 to R1.5 billion in 2025/26. Spending on compensation of employees, which accounts for 47.7 per cent of the agency's planned spending, is expected to increase at an average annual rate of 3.2 per cent, from R620.8 million in 2022/23 to R683.2 million in 2025/26. The agency derives its revenue mainly through administration fees charged to its major clients – the Government Employees Pension Fund and National Treasury. Revenue is expected to increase in line with expenditure.

Number of project appraisal reports completed per year	Transaction and advisory services	5	11	12		12	14	19	21

### Entity overview

The Government Technical Advisory Centre was established in terms of the Public Service Act (1994) and is mandated to assist organs of state in building their capacity for efficient, effective and transparent financial management. The centre's overarching objectives are to render consulting services to government departments and other organs of state, provide specialised procurement support for high-impact government initiatives, render advice on the feasibility of infrastructure projects, and provide knowledge management and ancillary support for projects.

Over the medium term, the entity will focus on assisting organs of state to build their capacity for efficient public financial management, and work towards a revised funding model that will allow it to be more financially sustainable. To achieve this, it plans to strengthen partnerships between government, the private sector and civil society by convening spaces for policy formulation, service delivery and accountability; become a thought leader on impediments to the effective functioning of government; and provide fast-tracked, flexible and specialised expertise within the remit of the Public Finance Management Act (1999).

Expenditure is expected to decrease, from R321.7 million in 2022/23 to R283.3 million in 2025/26, as the centre anticipates low demand from departments for technical services as a result of funding limitations. Compensation of employees accounts for a projected 57.1 per cent (R510 million) of planned spending, increasing at an average annual rate of 6.6 per cent, from R146.7 million in 2022/23 to R177.9 million in 2025/26. This increase will be offset by an anticipated decrease in spending on goods and services.

The centre derives its revenue through allocations from the department, the recovery of costs from other departments and organs of state, donor funds, administration fees and interest. Revenue is expected to decrease at an average annual rate of 4.1 per cent, from R321.7 million in 2022/23 to R283.3 million in 2025/26, in line with the expected low demand for the centre's services.

## Independent Regulatory Board for Auditors

### Selected performance indicators

**Table 8.53 Independent Regulatory Board for Auditors performance indicators by programme/objective/activity and related priority**

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of planned inspections completed per year	Inspections	Priority 3: Education, skills and health	136	125	121	117	117	117	117
Number of monitoring visits completed per year	Inspections		42	44	46	43	43	43	43
Percentage of target dates met for issuing audit pronouncements, audit reports and comment letters per year according to the committee for accounting standards project timetable	Standards		100% (16)	100% (10)	100% (17)	85%	85%	85%	85%

### Entity overview

The Independent Regulatory Board for Auditors was established in terms of the Auditing Profession Act (2005) and became operational in April 2006. The board is mandated to: protect the public by regulating audits performed by registered auditors; improve the development and maintenance of internationally comparable ethical and auditing standards for auditors that promote investment and, as a consequence, employment in South Africa; set out measures to advance the implementation of appropriate standards of competence and good ethics in the auditing profession; and provide for procedures for disciplinary action in instances of improper conduct. Over the medium term, the board will focus on ensuring that it is sustainable and relevant; ensuring the quality of industry audits; facilitating comprehensive stakeholder engagements; and conducting disciplinary hearings and investigations, which will require the appointment of consultants.

Expenditure is expected to increase at an average annual rate of 7.5 per cent, from R182.5 million in 2022/23 to R226.6 million in 2025/26. Spending on compensation of employees, the board's main cost driver, is expected to increase at an average annual rate of 6.9 per cent, from R122 million in 2022/23 to R149.2 million in 2025/26. The board is set to receive 23.6 per cent (R147.9 million) of its revenue over the period ahead through transfers from the department and the remainder through the registration of auditors and trainees, annual renewal charges, and fees for the inspection of registered auditors. Revenue is expected to increase in line with expenditure.

**Entity overview**

As a development finance institution, the mandate of the Land and Agricultural Development Bank of South Africa is to address agricultural and rural development. The bank operates in the primary agriculture and agribusiness sectors, and is regulated by the Land and Agricultural Development Bank Act (2002) and the Public Finance Management Act (1999). The bank is expected to play a pivotal role in advancing agriculture and rural development. Due to liquidity constraints, over the MTEF period, the bank will aim to reduce the size of its loan book, funding liabilities and the ratio of non-performing loans to total gross loans. It also plans to increase its development loan book over the medium term to become a predominant portfolio.

Expenditure is expected to decrease at an average annual rate of 18.9 per cent, from R3.1 billion in 2022/23 to R1.6 billion in 2025/26, mainly driven by the projected decrease in interest expenses as a result of constrained disbursements and customer settlements. Interest expenses account for an estimated 48.5 per cent (R3.1 billion) of total expenditure, and decrease at an average annual rate of 23.7 per cent, from R1.8 billion in 2022/23 to R801.6 million in 2025/26. Expenditure on goods and services, the second-largest cost area, is expected to decrease at an average annual rate of 13.6 per cent, from R872.7 million in 2022/23 to R563.1 million in 2025/26, due to cost-cutting measures implemented in line with the projected reduction in the loan book. Spending on compensation of employees also decreases, at an average annual rate of 13.5 per cent, from R367.7 million in 2022/23 to R238.1 million in 2025/26, mainly as a result of the bank not approving salary and board member fee increases and performance bonuses over the MTEF period.

The bank has been operating in default since April 2020. Despite its challenges, it has been able to repay 43 per cent of its debt at the time of default. The bank expects to generate R8.4 billion in revenue over the medium term, 95.1 per cent of which is expected to be derived through interest income, decreasing at an average annual rate of 9 per cent, from R2.7 billion in 2022/23 to R2 billion in 2025/26, in line with the projected reduction in the loan book.

Number of activities related to brand awareness, financial literacy and customer awareness activities per year	Enhanced stakeholder management	Priority 3: Education, skills and health	70	28	185	65	117	117	117

**Entity overview**

The legislative mandate of the Office of the Ombud for Financial Services Providers is stated in the Financial Advisory and Intermediary Services Act (2002), in terms of which the organisation is established. The act gives the ombud statutory powers to consider and dispose of complaints against financial services providers, primarily intermediaries selling investment products. The ombud will focus on the needs and requirements of its stakeholders over the medium term by ensuring that cases are properly assessed and appropriately handled until finalisation, informing stakeholders on the role and functions of the ombud, acquiring and retaining appropriate skills to fulfil its mandate, ensuring that risk is adequately managed across the enterprise, and ensuring that appeals or reviews of its decisions are appropriately dealt with.

Expenditure is expected to increase at an average annual rate of 3.7 per cent, from R69.9 million in 2022/23 to R77.9 million in 2025/26. Spending on compensation of employees accounts for 62.1 per cent (R151.1 million) of the ombud's total planned expenditure, increasing at an average annual rate of 4.2 per cent, from R43.3 million in 2022/23 to R49 million in 2025/26. The ombud derives revenue mainly through levies collected by the Financial Sector Conduct Authority from financial services providers. This is set to increase at an average annual rate of 7.8 per cent, from R62.2 million in 2022/23 to R77.9 million in 2025/26, in line with the introduction of the special levy on banks.

1. No historical data available.

**Entity overview**

The Office of the Pension Funds Adjudicator is mandated to investigate and determine complaints lodged in terms of the Pension Funds Act (1956). The office's mandate became effective in January 1998. The adjudicator is required to ensure the procedurally fair, economical and expeditious resolution of complaints in terms of the act by: ensuring that its services are accessible to all; investigating complaints in a procedurally fair manner; justly and expeditiously resolving complaints in accordance with the law; incorporating innovation and proactive thought and action in its activities; and providing opportunities for individual growth. The adjudicator has jurisdiction only over funds that are registered under the Pension Funds Act (1956).

Over the MTEF period, the adjudicator plans to develop the capability of its staff, restructure internal processes and continue to modernise its ICT systems in an effort to resolve 85 per cent of pension fund complaints within 6 months. It will also aim to intensify its engagements with relevant stakeholders such as regulators and pension funds, and continue to conduct outreach programmes to create awareness about its existence and mandate.

Expenditure is expected to increase at an average annual rate of 6.2 per cent, from R87.4 million in 2022/23 to R104.7 million in 2025/26, mainly due to planned capital investments in ICT infrastructure and the automation of key processes, as well as increased legal and professional fees related to complaints management. Spending on compensation of employees, the main cost driver, is expected to increase at an average annual rate of 3.1 per cent, from R54.7 million in 2022/23 to R60 million in 2025/26. The adjudicator derives its revenue mainly through levies collected from pension funds. Revenue is projected to increase at an average annual rate of 5.9 per cent, from R83.1 million in 2022/23 to R98.6 million in 2025/26.

**Entity overview**

The Public Investment Corporation was established by the Public Investment Corporation Act (2004) as a registered financial services provider wholly owned by government, with the Minister of Finance as its shareholder representative. The corporation is mandated to invest funds on behalf of its clients, as agreed upon with each client and approved by the Financial Sector Conduct Authority. The corporation's clients are public sector entities, most of which are pension, provident, social security, development and guardian funds.

Over the medium term, the corporation will focus on implementing client mandates through its highly skilled investment team, maintaining a robust communication technology platform, applying risk management practices, and ensuring that its investment decisions are based on sound principles.

Expenditure is expected to increase at average annual rate of 2.6 per cent, from R913.6 million in 2022/23 to R988.1 million in 2025/26. Spending on compensation of employees accounts for 47.5 per cent (R1.4 billion) of the corporation's expenditure over the medium term, increasing at an average annual rate of 2.2 per cent, from R438.1 million in 2022/23 to R467 million in 2025/26.

The corporation derives its revenue mainly through fees charged for the management of client assets, board fees and interest income. Revenue is set to increase at an average annual rate of 14.7 per cent, from R1.3 billion in 2022/23 to R2 billion in 2025/26, mainly as a result of an anticipated increase in management fees, growth in the corporation's equities portfolio, and an increase in assets under management.

**Entity overview**

In terms of the South African Revenue Service Act (1997), the South African Revenue Service is mandated to collect all revenue due to the state and administer trade to support government in meeting its key developmental objectives for growth. This involves facilitating legitimate trade, protecting South Africa's ports of entry, and eliminating illegal trade and tax evasion.

As its principal contribution to South Africa's economic and social development, the revenue service's focus over the medium term will continue to be on providing government with more than 90 per cent of the revenue it requires to meet its policy and delivery priorities by collecting all of the revenue target set by the Minister of Finance. As the achievement of this goal is contingent on how easy it is for taxpayers and traders to comply with their tax obligations, by 2025/26, the entity plans to ensure that 85 per cent of taxpayers and traders are satisfied with the clarity of guidance it provides, and to conduct auto-assessments on 95 per cent of standard taxpayers. It aims to do this effectively through modernising its ICT systems to encourage eFiling, improve the experience of taxpayers, monitor compliance and make tax collection more efficient, develop and administer a

tax and customs system of voluntary compliance, and, where appropriate, enforce tax directives responsibly and decisively.

The entity plans to collaborate with law enforcement agencies such as the South African Police Service, the National Prosecuting Authority, the Financial Intelligence Centre and the Special Investigating Unit to enforce tax compliance by taxpayers and traders, and address illicit financial flows. The entity has established a syndicated tax and customs crime division responsible for investigating criminal and illicit organised crime and syndicated evasion schemes across all taxes. The division is mandated to investigate suspected tax-related crimes specifically identified by the state capture commission reports, and to support the entity's investigating directorate in cases relating to other unlawful activities where tax fraud or evasion are implied, given the strong link between tax crimes and other financial crimes such as money laundering and illicit financial flows.

Accordingly, the entity has used additional funding of R1 billion per year allocated for the 2022 MTEF period to recruit critical skills and ICT capacity to improve tax compliance and contribute towards countering money laundering and terror financing. The entity has filled 187 of the targeted 337 posts to be filled through this allocation and will continue its recruitment drive into the MTEF period. A further R1.5 billion is added to the entity's baseline over the medium term to fund its capital projects.

Expenditure is expected to increase at an average annual rate of 1 per cent, from R12.2 billion in 2022/23 to R12.6 billion in 2025/26. The entity is set to derive 95.8 per cent (R35.9 billion) of its revenue through transfers from the department. These allocations are set to increase at an average annual rate of 1.4 per cent, from R11.6 billion in 2022/23 to R12.1 billion in 2025/26.

### Entity overview

The South African Special Risks Insurance Association was established in 1979 and registered in terms of section 21 of the Companies Act (1973). In line with the amendments of the South African Special Risks Insurance Association Act (1998) and the Companies Act (2008), government became the company's sole shareholder. The association is mandated to support the insurance industry by providing cover for special risks such as riots, strikes, political unrest, terrorist attacks, civil commotion, public disorder and labour disturbances.

Over the medium term, the insurer aims to rebuild its capital base through: passing on higher premiums to the industry; revising its reinsurance structure, which requires 40 per cent of its insurance business to be ceded in 2023/24 and 2024/25 to reinsurers with catastrophe cover of R10 billion; and taking account of equity contributions to settle all valid claims related to the civil unrest in KwaZulu-Natal and Gauteng in July 2021.

The association's expenditure is expected to increase at an average annual rate of 7.1 per cent, from R4 billion in 2022/23 to R4.9 billion in 2025/26, due to the ceding of projected reinsurance costs to reinsurers. The bulk of this spending is on goods and services, which accounts for an estimated 95.7 per cent (R14.6 billion) of the insurer's budget over the period ahead. Compensation of employees is expected to increase at an average annual rate of 4 per cent, from R173.4 million in 2022/23 to R194.8 million in 2025/26, mainly due to new appointments, annual increases and performance bonuses. To reduce reliance on consultants, the association's number of personnel is expected to increase from 159 to 187 over the MTEF period.

The association is set to derive 99.3 per cent (R18.7 billion) of its revenue through annual premium increases and customer retentions. Revenue is expected to increase at an average annual rate of 3 per cent, from R5.9 billion in 2022/23 to R6.4 billion in 2025/26.

### Vote purpose

*Improve government service delivery through integrated planning, monitoring and evaluation.*

### Mandate

The Department of Planning, Monitoring and Evaluation is mandated to:

- support the National Planning Commission
- facilitate the implementation of the National Development Plan (NDP) through the development of sector-specific and outcome-specific medium-term plans and delivery agreements, and monitor and evaluate their implementation
- ensure the alignment of departments' strategic and annual plans and budget allocations with government's medium-term strategic framework (MTSF)
- monitor the performance of individual national and provincial government departments and municipalities, and facilitate targeted intervention programmes
- monitor frontline service delivery and manage the presidential hotline
- develop and implement the annual national evaluation plan, and support the national evaluation system
- promote good planning, monitoring and evaluation practices in government.

### Selected performance indicators

Number of evaluation reports produced per year	Evaluation, Evidence and Knowledge Systems		4	4	4	4	4	4	4

## Expenditure overview

Over the medium term, the department will focus on supporting the implementation of the NDP, coordinating planning programmes across government, and monitoring and evaluation to support the implementation of government programmes and priorities. As the department mainly relies on its human resources to drive its mandate, expenditure on compensation of employees accounts for an estimated 67.6 per cent (R1 billion) of the total budget over the medium term.

### ***Supporting the implementation of the NDP through the National Planning Commission***

The department is tasked with facilitating the implementation of the NDP. This is carried out by the National Planning Commission and its secretariat, which is mandated to provide an independent and critical view of the country's developmental trajectory, monitor its implementation, and provide feedback and guidance. Over the medium term, the commission plans to participate in and initiate 3 research projects in support of the implementation of the NDP while engaging all social partners and forging new partnerships. To realise this, the commission plans to facilitate 1 strategic engagement and partnership in each year over the medium term to develop cross-cutting views on specific issues with the aim of finding sustainable and innovative solutions to obstacles that hinder the implementation of the NDP. This work will be facilitated by the commission's secretariat through an allocation of R138.3 million over the medium term in the *National Planning Coordination* programme.

### ***Coordinating planning programmes across government***

In an effort to strengthen coherence and harmony across government's planning system, the department has developed a policy framework for integrated planning. To give effect to this, it has developed guidelines on the institutionalisation of the MTSF to support the integration of its priorities and targets across the planning system.

The department aims to ensure that enhanced planning finds expression across all spheres of government through the district development model, which addresses challenges to government service delivery by promoting local procurement to enhance job creation, promote and support local businesses, and involve communities. The model's approach to planning and implementation aims to improve coherence among all spheres of government, as well as the 44 districts and 8 metros across the country, as development spaces that can be used as centres of service delivery and economic development, including job creation.

This work will be facilitated through the custodian of the government planning system, the *National Planning Coordination* subprogramme, which has a budget of R117.7 million over the medium term.

### ***Monitoring to support the implementation and achievement of government programmes and priorities***

To promote the alignment, coordination and integration of development planning, in line with realising the NDP's development outcomes, the department will monitor the implementation of government's 2019-2024

MTSF over the medium term, which entails the production of a targeted 2 integrated monitoring reports per year. These activities will take place in the *Outcomes Monitoring and Support* subprogramme in the *Sector Monitoring Services* programme. The subprogramme has a budget of R182.6 million over the medium term.

To improve the quality of service delivery, the department is also tasked with monitoring frontline services, including complaints and compliments received through the presidential hotline, and plans to produce 2 reports per year over the medium term on frontline service delivery. These activities are carried out in the *Public Service Monitoring and Capacity Development* subprogramme in the *Public Sector Monitoring and Capacity Development* programme, spending in which accounts for 95.1 per cent (R254.4 million) of the programme's total budget over the MTEF period.

### **Evaluating to support the implementation and achievement of government programmes and priorities**

In line with the NDP's vision to build a capable and developmental state, the department will, through the national evaluation policy framework, manage and support the evaluation of priority government policies, programmes and systems, and produce a targeted 12 evaluation reports over the medium term to support evidence-based planning, monitoring and evaluation across government. These activities will be carried out in the *Evaluation, Research, Knowledge and Data Systems* subprogramme, which accounts for 92.9 per cent (R124.9 million) of the *Evidence and Knowledge Systems* programme's budget.

The department will continue to develop the centralised data management system, which is expected to provide users – including government departments, members of the public and academics – with an improved interface for accessing, retrieving, analysing and reporting on government performance information. The system is envisaged to act as a knowledge hub to enable a greater understanding of the effectiveness of government interventions and their impact on society. To develop the system, R9.6 million is allocated over the medium term in the *Evaluation, Research, Knowledge and Data Systems* subprogramme in the *Evidence and Knowledge Systems* programme.

## Programme 2: National Planning Coordination

## Programme purpose

Facilitate and coordinate macro and transversal planning functions across government, and coordinate planning functions in the department.

## Objectives

- Ensure the realisation of the NDP Vision 2030 by:
  - developing an annual budget prioritisation framework
  - embedding the national spatial development framework in the strategic and annual performance plans of national and provincial departments over the medium term
  - coordinating planning functions across government by annually assessing the alignment of the strategic and annual performance plans of national departments, public entities and provincial departments with government's 2019-2024 MTSF
  - regulating institutional strategic plans and annual plans in line with government's development goals over the medium term
  - embedding the national spatial development framework in the strategic and annual performance plans of national and provincial departments over the medium term
  - coordinating planning functions across government by ensuring integrated planning policy and legislation over the medium term
  - convening the national steering committee on integrated planning and other integrated planning structures for national and provincial government planners annually
  - assessing the alignment of the strategic and annual performance plans of national and provincial departments with government's 2019-2024 MTSF on an annual basis.

## Subprogrammes

- *Management: National Planning Coordination* provides management and support services to the *National Planning Coordination* subprogramme.
- *National Planning Coordination* develops and implements planning frameworks and facilitates the alignment of the planning and budgeting functions across government and in the department.
- *National Planning Commission Secretariat* provides support services to the National Planning Commission, an independent expert advisory body that aims to take a long-term, cross-cutting approach to research on the country's development agenda.

## Programme 3: Sector Monitoring Services

### Programme purpose

Ensure government policy coherence. Develop, facilitate, support and monitor the implementation of sector plans and intervention strategies.

### Objectives

- Ensure the effective implementation of government’s 2019-2024 MTSF by:
  - monitoring the achievement of priorities 1 to 7 and reporting progress to Cabinet bi-annually
  - supporting the development and implementation of special intervention programmes as and when required.

### Subprogrammes

- *Management: Sector Monitoring Services* provides management and support services to the programme.
- *Outcomes Monitoring and Support* facilitates the implementation of MTSF priorities through continual performance monitoring and the provision of appropriate support.
- *Intervention Support* develops and supports special intervention strategies and plans.

## Programme 4: Public Sector Monitoring and Capacity Development

### Programme purpose

Support the implementation of the medium-term strategic framework by monitoring and improving the capacity of state institutions to develop and implement plans and provide services.

### Objectives

- Strengthen state governance, efficiency, effectiveness and equity by:
  - monitoring the achievement of targets related to priority 1 of government's 2019-2024 MTSF and reporting progress to Cabinet bi-annually
  - ensuring the alignment of performance agreements for heads of departments with government's 2019-2024 MTSF annually
  - producing 2 reports to monitor service delivery annually through frontline monitoring visits, citizen-based monitoring and the presidential hotline.

## Subprogrammes

- *Management: Public Sector Monitoring and Capacity Development* provides management and support services to the programme.
- *Public Service Monitoring and Capacity Development* monitors and supports the implementation of the priorities outlined in government's MTSF. This subprogramme also develops and implements strategic interventions to support and unblock implementation.

## Programme 5: Evidence and Knowledge Systems

### Programme purpose

Coordinate and support the generation, collation, accessibility and timely use of quality evidence to support planning, monitoring and evaluation across government.

### Objectives

Support the planning, monitoring and evaluation functions of the department by:

- managing and supporting evaluations of priority government policies, programmes and systems in line with the national evaluation policy framework over the medium term
- conducting research and evaluation in identified key policy areas, and producing 4 evidence reports annually
- improving the department's capability for data integration, analytics and knowledge management to support its role in evidence-based planning, monitoring and evaluation across government over the MTEF period.

### Subprogrammes

- *Management: Evidence and Knowledge Systems* provides management and support services to the programme.
- *Evaluation, Research, Knowledge and Data Systems* provides evaluation, research, knowledge management, and data integration and analysis services.

### Expenditure trends and estimates

Executive authority: Minister of Public Enterprises  
 Accounting officer: Director-General of Public Enterprises  
 Website: [www.dpe.gov.za](http://www.dpe.gov.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Drive investment, productivity and transformation in the department's portfolio of state-owned companies to unlock growth, drive industrialisation, create jobs and develop skills.

### Mandate

The Department of Public Enterprises undertakes shareholder oversight of the state-owned companies in its portfolio. The department is the primary interface between government and these companies, and provides input into the formulation of policy, legislation and regulation. In executing its responsibilities, the department seeks to direct and support improvements in the financial, commercial and operational performance of these companies and their contribution to the South African economy, and support transformation.

### Selected performance indicators

**Table 10.1 Performance indicators by programme and related outcome**

Indicator	Programme	MTSF Priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of shareholder compacts signed per year	Business Enhancement, Transformation and Industrialisation	Priority 2: Economic transformation and job creation	7	5	5	4	5	5	5
Percentage of corporate plans reviewed per year	Business Enhancement, Transformation and Industrialisation		100% (7)	100% (5)	100% (6)	100%	100%	100%	100%
Percentage of quarterly financial reviews conducted per year	Business Enhancement, Transformation and Industrialisation		100% (28)	100% (20)	100% (24)	100%	100%	100%	100%

### Expenditure overview

The department oversees 6 state-owned companies: Alexkor, Denel, Eskom, South African Airways, the South African Forestry Company and Transnet. Over the medium term, the department will continue to focus on enhancing reforms to stabilise these companies and strengthen its oversight capacity to ensure that they are sustainable and contribute to economic development and transformation.

The department has reprioritised R12 million over the medium term from consultancy projects in the *State-owned Companies Governance Assurance and Performance* programme to the same functions in the *Business Enhancement, Transformation and Industrialisation* programme. The reprioritisation is intended for developing an optimal shareholding structure for the state's diamond mineral assets; and conducting a study to understand

the deterioration of energy availability, and provide solutions on how Eskom can improve its power generation. As a result, overall spending on consultants, which includes the reprioritisation, is set to increase at an average annual rate of 2.3 per cent, from R42.2 million in 2022/23 to R45.2 million in 2025/26.

Expenditure is expected to decrease at an average annual rate of 78.7 per cent, from R34.4 billion in 2022/23 to R330.4 million in 2025/26. This is due to allocations in 2022/23 to Eskom (R21.9 billion for debt and interest); Transnet (R5.8 billion for repairing infrastructure that was damaged by flooding in KwaZulu-Natal and Eastern Cape, and the repair and maintenance of long-standing locomotives that are out of service); Denel (R3.6 billion for implementing its turnaround plan and settlement of guaranteed debt and interest); and South African Airways (R2.8 billion for settling guaranteed debt and settling obligations related to its business rescue plan).

With no further allocations to state-owned companies over the period ahead, the department's main cost driver is compensation of employees, spending on which increases at an average annual rate of 4.2 per cent, from R173.5 million in 2022/23 to R202 million in 2025/26. To ensure that the department remains within the expenditure ceiling for compensation of employees over the MTEF period, only critical vacant posts will be filled.

## Programme 2: State-owned Companies Governance Assurance and Performance

### Programme purpose

Provide and enforce state-owned companies' governance, legal assurance, and financial and non-financial performance monitoring, evaluation and reporting systems in support of the shareholder to ensure alignment with government priorities.

### Objectives

- Ensure effective shareholder oversight of state-owned companies on an ongoing basis by:
  - providing governance systems and legal support
  - developing and maintaining shareholder risk profiles and mitigating strategies
  - monitoring, evaluating and reporting on financial and non-financial performance, and proposing intervention measures when required.

### Subprogrammes

- *Management* comprises the office of the deputy director-general, which provides strategic leadership and management for the programme's personnel.
- *Legal* provides external legal services and support, including transaction and contract management support, to sector teams and the commercial activities of the state-owned companies within the sector teams' portfolio.
- *Governance* develops, monitors and advises on legislative, corporate governance and shareholder management systems for the department and its portfolio of state-owned companies. This subprogramme develops and implements risk and compliance management guidelines and systems for the shareholder.
- *Financial Assessment and Investment Support* analyses state-owned companies' capital plans, operational performance, the execution of capital programmes and proposed restructuring proposals, and advises on appropriate action.

## Programme 3: Business Enhancement, Transformation and Industrialisation

## Programme purpose

Provide sector oversight to ensure that state-owned companies contribute to the advancement of industrialisation, transformation, intergovernmental relations and international collaboration services. Support the shareholder in strategically positioning and enhancing the operations of state-owned companies.

## Objectives

- Contribute to the performance of state-owned companies on an ongoing basis by:
  - conducting reviews, research and modelling of pipeline and new business enhancement opportunities within state-owned companies
  - assessing the operations of state-owned companies and developing mitigation instruments in conjunction with policy departments, regulatory bodies and industry
  - conducting research, modelling job creation, and transforming instruments for state-owned companies to inform compact alignment imperatives.

## Subprogrammes

- *Energy Resources* exercises shareholder oversight over Alexkor, Eskom and the South African Forestry Company.
- *Research and Economic Modelling* conducts cost-benefit analysis reviews on business enhancement and transformation initiatives and develops economic sustainability models for proposed work packages and projects.
- *Transport and Defence* exercises shareholder oversight of Denel, South African Airways and Transnet.
- *Business Enhancement Services* develops and coordinates the implementation of state-owned companies' strategies to leverage localisation programmes; provides intergovernmental coordination and support to programmes and state-owned companies in relation to economic development programmes, as agreed with provincial and local governments; maintains a register of commitments made by state-owned companies and enables the implementation of special programmes focusing on skills development, transformation and youth.

## State-owned companies

### Alexkor

#### Company overview

Alexkor was established in terms of the Alexkor Limited Act (1992) to mine marine and land diamonds in Alexander Bay, Northern Cape. The outcome of the land and restitution award to the Richtersveld Community resulted in the formation of the Alexkor Richtersveld Mining Company Pooling and Sharing Joint Venture, wherein Alexkor holds a 51 per cent share interest on behalf of government, and the Richtersveld Community holds 49 per cent. Alexkor does not have any other mining operations outside the joint venture.

Over the medium term, the company will focus on implementing the turnaround strategy for its diamond mining operations, which have significantly declined in the past 3 years. Symptomatic of this was production averaging below 30 000 carats over the period and the company not being able to reach the benchmark of more than 45 000 carats that had been achieved previously. Some challenges to underproduction include a lack of funds to undertake exploration activities and maintenance of old infrastructure. An immediate intervention is to seek mining contractors with the financial and technical capabilities to undertake large-scale mining operations.

In the long term, Alexkor's role should be determined in accordance with the challenges it faces. To achieve this, the Department of Public Enterprises is conducting a study, which is expected to be completed in 2023/24, to determine the optimal shareholding structure for Alexkor. This study will take into account the current market characteristics of the diamond mining industry in relation to government's developmental agenda.

The company was not able to submit detailed performance, expenditure, revenue and personnel data at the time of publication, hence no tables are included.

### Denel

#### Company overview

Denel was incorporated as a private company in 1992 in terms of the Companies Act (1973), with the South African government as its sole shareholder. It operates in the military aerospace and landward defence environment and provides strategic defence equipment.

The company's broad focus over the medium term will be on implementing its turnaround plan, which entails rolling out its new operating model, restructuring and optimising its cost structure. The new operating model reduces Denel's structure from 6 core business units to 3 – engineering, manufacturing, and maintenance and overhaul. This change will not only result in decreased expenditure, but in the improved allocation of critical resources. It will also require that the company accelerate its disposal of non-core assets and businesses, improve supply chain policies and align its IT infrastructure with its new organisational structure.

The company's revenue decreased from R2.8 billion in 2020/21 to R1.5 billion in 2021/22 due to persistent liquidity challenges. This was exacerbated by fixed costs and under-recoveries across the group, resulting in the company continuing to be loss making, thereby eroding its solvency. This, among other things, is related to the

company having lost experienced personnel with critical skills over the years, which threatens its sustainability. To fund the turnaround plan's response to these challenges, the company expects to access funds through proceeds from the sale of non-core disposals and shareholder recapitalisation.

To improve the company's 2021/22 and 2022/23 balance sheets, government allocated R3.2 billion over that period to settle guaranteed debt. To augment this, government allocated an additional R3.4 billion in 2022/23 through the Special Appropriation Act (2022). The cash injection will be used to implement the turnaround plan, settle legacy obligations and address the company's liquidity requirements to support operations and execute its order pipeline.

The company was not able to submit detailed performance, expenditure, revenue and personnel data at the time of publication, hence no tables are included.

## Eskom

### Selected performance indicators

**Table 10.12 Eskom performance indicators by programme/objective/activity and related priority**

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Percentage of energy availability factor per year	Generation	Priority 1: A capable, ethical and developmental state	66.6%	64.2%	62%	57%	65.5%	66%	66.5%
System average interruption duration index (hours) per year	Distribution		36.9	35.4	35.5	36.6	38.0	37.5	37.2
System average interruption frequency index (events) per year	Distribution		14.4	13.2	12.3	13.1	18.0	17.5	17.6

System minutes lost in less than 1 minute per year	Transmission	Priority 1: A capable, ethical and developmental state	4.36	3.48	2.88	3.2	3.53	3.53	3.53

### Company overview

Eskom is mandated to generate, transmit and distribute electricity to industrial, mining, commercial, agricultural and residential customers and redistributors. Significant progress has been made on the company's legal separation into 3 subsidiaries: transmission, generation and distribution. In this regard, the National Transmission Company of South Africa was corporatised in December 2021, and will be operationalised once the National Energy Regulator of South Africa issues its licence. The National Electricity Distribution Company of South Africa is expected to be corporatised during 2023/24.

The company's new board was appointed in October 2022 and has been tasked with ensuring a performance turnaround for operations. This is expected to result in improving energy availability from 58 per cent as at 30 September 2022 to 66.5 per cent by 2025/26. The current low availability of energy is due to high unplanned breakdowns and unit trips, which account for 30.8 per cent of the company's non-availability of generation capacity.

To improve operational performance, the board is working with the national energy crisis committee, which was established by the president in July 2022. The committee's purpose is to oversee the implementation of an action plan to end load shedding and achieve energy security in the country. As part of the company's build programme, the Kusile power station is expected to be completed in May 2024. Interventions and modifications to repair construction defects at the Medupi and Kusile power stations are expected to be completed by the end of 2023. This includes the recent failure of the flue-gas ducting that has impacted units 1 to 3 of the Kusile power station.

To support the transition from coal to renewable energy, in line with government's energy policy, Komati power station was shut down on 31 October 2022 and is being repurposed with renewable energy technologies that

will supply clean electricity to the economy and the public.

Based on the company's 2022/2023 to 2026/27 financial plan, expenditure is projected to increase at an average annual rate of 5.4 per cent, from R299.6 billion in 2022/23 to R351.1 billion in 2025/26. Generation is Eskom's main cost driver, constituting 59.7 per cent (R570.6 billion) of its total budget over the medium term. Spending on goods and services across divisions constitutes 61.5 per cent (R604.1 billion) of the company's budget.

Revenue is expected to increase at an annual average rate of 8.9 per cent, from R279.5 billion in 2022/23 to R361.3 billion in 2025/26. Revenue is mainly derived from the sale of electricity, which increased by 2.1 per cent, from R204.5 billion in 2020/21 to R247 billion in 2021/22, due to a regulatory tariff increase of 15.1 per cent imposed on customers supplied directly by Eskom. Revenue in 2022/23 is projected to increase to R279.5 billion, driven by a 9.61 per cent tariff increase. The company's net loss is projected to increase to R20 billion in 2022/23, worsening from the R12.3 billion reported in 2021/22. Net debt decreased by R11.7 billion to R389.1 billion in 2021/22, while municipal arrears amounted to R44.89 billion in 2021/22 and are expected to increase to R57.7 billion in 2022/23. As such, Eskom's financial position remains weak and the company is not able to generate enough cash from operations to cover debt obligations. Given this weak financial position, government has committed an additional R21.9 billion in 2022/23 to assist with the company's debt-service obligations.

1. No historical data available as these are new indicators that were adopted after the airline's business rescue process.

**Company overview**

South African Airways operates a full-service network in the international, regional and domestic markets. The airline is responsible for promoting air links with South Africa's key business, trading and tourism markets across the world, and contributing to key domestic air linkages.

The company was placed under business rescue in December 2019 and exited the process in April 2021. It resumed operations in September 2021, operating domestically and regionally, and has since been operating 6 aircraft. Over the MTEF period, the airline plans to increase its operations and improve its service offering, for example, by expanding its route network.

Government is in the process of concluding the sale of its majority shareholding in the company to a strategic equity partner. This is expected to attract the funding and skills required to strengthen the airline's balance sheet and improve its operations. The partnership was expected to be finalised by the end of 2022/23, but due to outstanding matters such as regulatory approvals from the Competition Commission and the Air Services Licensing Councils, it is expected to be concluded in 2023/24.

Expenditure is expected to increase at an average annual rate of 50.8 per cent, from R4.6 billion in 2022/23 to R15.9 billion in 2025/26. This significant increase is attributed to an increase in operations with the lifting of COVID-19 restrictions. Spending on goods and services constitutes 87.2 per cent (R32 billion) of total expenditure, mainly driven by fuel, leases and maintenance costs. Revenue is expected to increase at an average rate of 62.8 per cent, from R3.9 billion in 2022/23 to R16.6 billion in 2025/26. It is mainly derived from the sale of air tickets, which constitutes 99.7 per cent of total revenue. This significant increase is attributed to the airline's anticipated increase in operations.

### Company overview

The South African Forestry Company was established in 1992 in terms of the Management of State Forests Act (1992). It is mandated to ensure the sustainable management of plantation forests, increase downstream timber processing, and play a catalytic role in rural economic development and transformation. The company contributes to approximately 1 772 direct jobs and more than 1 000 employment positions in small to medium companies through community projects and other services.

Over the medium term, the company plans to improve its performance by implementing its 50:50 revenue strategy, which entails plantation, processing and other businesses contributing equally. The company will also focus on increasing its processing capacity through upgrading the Timbadola processing plant in Limpopo. This will reduce operating costs at the plant, particularly for repairs and maintenance.

Expenditure is expected to increase at an average annual rate of 8.4 per cent, from R1.4 billion in 2022/23 to R1.8 billion in 2025/26. The operations of Komatiland Forests, the company's main revenue-generating division, constitutes 80.7 per cent of total expenditure over the MTEF period. Overall, spending on goods and services constitutes 72.6 per cent (R3.7 billion) of the company's budget, while compensation of employees accounts for 22.8 per cent (R1.3 billion) over the next 3 years. The company derives most of its revenue from the sale of sawlogs and lumber. Revenue is expected to increase at an average annual rate of 10.1 per cent, from R1.5 billion in 2022/23 to R2 billion in 2025/26, due to an anticipated higher demand for the company's products over the medium term.

In 2021/22, the company reported R1.2 billion in revenue, a 33 per cent increase from the R920.8 million realised in 2020/21. The increase was due to a favourable log and lumber market. Following years of losses, the company reported a profit of R83.6 million and declared a R1 million dividend at its 2022 annual general meeting. The company's fixed costs remain high, something it plans to monitor over the period ahead to remain profitable. Liquidity and solvency positions remain strong and the company is not highly indebted. As such, it is in a position to raise funds on the strength of its balance sheet without government support.

### Company overview

Transnet provides and operates freight transportation services and infrastructure. The company's key strategic objectives include improving logistics competitiveness, promoting a modal shift from road to rail, increasing logistics connectivity, attracting private investment, developing skills and promoting reindustrialisation.

To sustain and expand its capacity, over the 5-year period ending in 2026/27, Transnet planned to invest

R99 billion, 44.5 per cent (R44 billion) of which was earmarked to be invested in the rail sector, another 44.5 per cent (R44 billion) at ports and 6 per cent (R6 billion) on pipeline infrastructure. However, these investments were hindered due to the company having to reduce capital expenditure in 2022/23 by 9.2 per cent, from R18 billion to R16.4 billion, because of liquidity constraints associated with limited profitability.

Significant turnaround in operations, and as such the company's financial position, in the short term have been impacted by events such as severe damages at the port of Durban and along the KwaZulu-Natal rail corridor due to flooding in the province in April 2022. To assist the company with repairs, government allocated R2.9 billion in 2022/23 through the Special Appropriation Act (2022).

To assist with clearing the backlog in its infrastructure build, maintenance and modernisation programme, Transnet is actively seeking private sector participation in its operations. Investment from the private sector is also expected to contribute to the migration from road to rail, with the aim of reducing the total national cost of logistics. The Department of Public Enterprises is working with Transnet to develop a turnaround plan that will address various operational and infrastructure funding challenges.

Expenditure is expected to increase at an average annual rate of 2.5 per cent, from R81.3 billion in 2022/23 to R87.6 billion in 2025/26. Over the period ahead, Transnet Freight Rail operations constitute 59 per cent (R152.7 billion) of total expenditure. Overall, spending on compensation of employees constitutes 34.4 per cent (R86.5 billion), while goods and services constitutes 29.3 per cent (R75.9 billion) and provision for depreciation accounts for 18.5 per cent (R46.7 billion).

Transnet derives most of its revenue from freight, port and pipeline operations, amounting to 97.6 per cent (R261.7 billion) of total revenue. Revenue is expected to increase at an annual average rate of 4.2 per cent, from R83.9 billion in 2022/23 to R95.1 billion in 2025/26. The relatively low revenue growth was offset by cost savings and significant fair value adjustments. The latter was linked to the reversal of previous downward valuations during the COVID-19 pandemic. As a result, the entity reported a net profit of R5 billion in 2021/22 compared to a loss of R8.4 billion in 2020/21.

### Programmes/Objectives/Activities

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Lead the modernisation of the public service, through a generally applicable framework of norms and standards, to improve service delivery.

### Mandate

The Department of Public Service and Administration draws its mandate from section 195(1) of the Constitution, which sets out basic values and principles to which the public service should adhere; and the Public Service Act (1994), which makes the Minister for Public Service and Administration responsible for establishing norms and standards relating to:

- the functions of the public service
- the establishment and organisational structures of departments and other organisational and governance arrangements in the public service
- labour relations, conditions of service and other employment practices for employees in the public service
- the health and wellness of employees in the public service
- information management and electronic government in the public service
- integrity, ethics, conduct and anti-corruption in the public service
- transformation, reform, innovation and any other matters to improve the effectiveness and efficiency of the public service and its delivery of services to the public.

Implementation of a legislative framework to institutionalise the national e-government strategy per year	e-Government Services and Information Management		Public service digitalisation strategic framework submitted to the director-general	Audit report on the implementation of the national e-government strategy issued	Legislative frameworks to institutionalise the national e-government strategy issued	Legislative framework to institutionalise the national e-government strategy implemented	5 strategic e-government interventions coordinated for the implementation of the legislative framework for the public service	5 strategic e-government interventions coordinated for the implementation of the framework	5 strategic e-government interventions coordinated for the implementation of the framework
Development of a public service data governance directive to improve business intelligence in the public service per year <sup>2</sup>	e-Government Services and Information Management		– <sup>1</sup>	Public service data governance standards submitted to the director-general	Data and information management maturity assessment of the public service conducted	Determination and directive for the management of public service data and information approved by the minister	Support provided to selected national and provincial departments on the implementation of the directive	Support provided to selected national and provincial departments on the implementation of the directive	Maturity assessment for the implementation of e-service directive conducted
Implementation report on the second-generation review of the African Peer Review Mechanism per year	Government Service Access and Improvement		– <sup>1</sup>	Public dialogue forums conducted in preparation for the second-generation review of the African Peer Review Mechanism	African Peer Review Mechanism review conducted	Report developed on the monitoring of the institutionalisation of the African Peer Review Mechanism national action plan	Support provided to 3 state institutions for the implementation of the national action plan	Support provided to 4 state institutions for the implementation of the national action plan	Support provided to 5 state institutions for the implementation of the national action plan
Monitoring the implementation of the revised Batho Pele programme per year	Government Service Access and Improvement		Report on the implementation of the Batho Pele standards by all national and provincial departments submitted to the director-general	Batho Pele revitalisation strategy submitted to the director-general	Development and approval of Batho Pele standards	Support provided to departments on the implementation of the Batho Pele programme	Support provided to 10 national departments for the implementation of the revised programme	Support provided to 15 national departments for the implementation of the revised programme	Support provided to 15 national departments for the implementation of the revised programme
Monitoring the implementation of the business process modernisation programme per year	Government Service Access and Improvement		– <sup>1</sup>	Business process modernisation programme developed	Monitoring and evaluation of the implementation of the programme	Programme implemented in 3 partner departments	Support provided to 5 national departments for the implementation of the programme	Support provided to 5 national departments for the implementation of the programme	Support provided to 5 national departments for the implementation of the programme

1. No historical data available.

2. Wording of indicator changed. Legal services advised that a standard has no legal standing and, as such, the department adopted a directive based on the outcome of the assessment.

## Expenditure overview

The department provides an enabling environment to ensure government departments that deliver services have adequate capacity to carry out their mandates. In seeking to do this, over the medium term, the department will focus on intensifying the fight against corruption in the public service, reducing government's

wage bill, ensuring adherence to Batho Pele principles, and developing regulations and reviewing key legislation.

The department has a total budget of R1.7 billion over the MTEF period, with compensation of employees accounting for 54.3 per cent (R940.8 million) of this amount as the department relies on human capital with niche expertise to fulfil its mandate. This amount includes an additional R28.8 million over the MTEF period for cost-of-living adjustments. The department plans to fill only identified critical posts, particularly at middle and senior management levels, where it has been experiencing high numbers of vacancies in recent years.

### ***Intensifying the fight against corruption***

The department will continue to intensify the fight against corruption in the public service over the MTEF period by strengthening disciplinary action in such cases, and promoting a culture of accountability and ethical and professional behaviour. Part of combating corruption entails limiting the scope for conflicts of interest through measures such as prohibiting public servants from conducting business with the state. This entails conducting lifestyle audits on certain categories of employees and monitoring the implementation of the financial disclosure framework. The public administration ethics, integrity and disciplinary technical assistance unit developed guidelines for this in 2021/22.

The unit provides technical assistance and support to institutions in all spheres of government; develops norms and standards on ethics, integrity, conduct and discipline management in public administration; and will monitor adherence to the financial disclosure framework once it is adopted. The unit also forms part of the anti-corruption task team and serves in the intergovernmental fusion centre at the Financial Intelligence Centre, where it assists with identifying public service employees investigated for fraud related to government's response to the COVID-19 pandemic.

The department plans to support 12 departments over the medium term on the implementation of the guidelines while increasing awareness of public-sector lifestyle audits, especially in terms of the repercussions of committing fraudulent activities; and providing support to all government departments on the implementation of the guidelines. To carry out activities related to intensifying the fight against corruption, R75.8 million is allocated over the period ahead in the *Public Administration Ethics, Integrity and Disciplinary Technical Assistance Unit* subprogramme in the *Negotiations, Labour Relations and Remuneration Management* programme.

### ***Reducing government's wage bill***

The department is tasked with ensuring that the public-sector wage bill becomes more affordable. As such, in collaboration with National Treasury and other departments, the department plans to review remuneration policies across government with the aim of developing a single remuneration framework for the public sector (excluding state-owned enterprises). This is expected to be achieved over the medium term, and will be in line with the principles of fair, equitable and sustainable remuneration. The implementation of the framework is also expected to reduce remuneration inequality for employees performing similar tasks in different spheres of government. To carry out these activities, R73.7 million is set aside over the medium term in the *Remuneration, Employment Conditions and Human Resource Systems* subprogramme in the *Negotiations, Labour Relations and Remuneration Management* programme.

### ***Improving the implementation of Batho Pele principles***

Adherence to Batho Pele principles means putting people first in the delivery of public services. Accordingly, over the medium term, the department will continue to provide the necessary support to departments by monitoring the quality and implementation of the revised Batho Pele programme, and the extent to which departments promote and implement the principles. Each department is required to develop standards to guide its implementation of the principles. To this end, R48.4 million is allocated over the MTEF period in the *Service Delivery Improvement, Citizen Relations and Public Participation* subprogramme in the *Government Service Access and Improvement* programme.

### ***Developing regulations and reviewing key legislation***

Over the period ahead, the department will focus on developing regulations to enable the full implementation of the Public Administration Management Act (2014). Following consultations with internal and external stakeholders on the draft white paper on the transformation and modernisation of public administration,

regulations for the act were submitted to relevant stakeholders. The amended act is expected to be finalised and tabled in Parliament in 2023/24. Once in effect, it will inform the formulation of further regulations and other legislative provisions to enhance the principles of a unified public administration. The department also plans to review the Public Service Act (1994) and related policies over the period ahead. To carry out these activities, R34.8 million over the medium term is allocated in the *Legal Services* subprogramme in the *Administration* programme.

## Programme 2: Human Resource Management and Development

### Programme purpose

Manage, oversee and facilitate human resource planning, management and development in the workplace. Facilitate compliance with minimum norms and standards set by the Minister for Public Service and Administration, in line with the Public Administration Management Act (1994), through the office of standards and compliance.

### Objectives

- Contribute to improving the stability and credibility of the public service by:
  - implementing the directive on mandatory in-service training by March 2024
  - implementing identified compulsory programmes by 2023/24
  - developing and implementing the revised human resource development strategic framework for the public service by 2024/25.
- Ensure compliance with the department's legislation and policies by:
  - implementing the skills audit methodology framework for the public service by March 2024
  - developing an early warning system for detecting the public service's noncompliance with the department's legislation and policies over the medium term.

## Subprogrammes

- *Management: Human Resource Management and Development* provides administrative support and management to the programme.
- *Office of Standards and Compliance* facilitates compliance with the minimum norms and standards set by the minister, in line with section 16 of the Public Administration Management Act (1994).
- *Human Resource Planning, Employment and Performance Management* manages, develops and monitors the implementation of policies and programmes related to human resource planning, employment practices and employee performance management.
- *Human Resource Development* manages, develops and monitors the implementation of policies and programmes related to human resource development.
- *Transformation and Workplace Environment Management* manages, develops and monitors the implementation of policies and programmes related to diversity, transformation and workplace environment management.

## Programme 3: Negotiations, Labour Relations and Remuneration Management

### Programme purpose

Manage, oversee and facilitate organisational development, job grading, macro organisation, remuneration, human resource information systems, conditions of service, labour relations and dispute management in the public service. Administrate the implementation of the Government Employees Housing Scheme and the macro organisation of the state, and ensure coordinated collective bargaining.

### Objectives

- Improve the stability of the public service over the medium term by:
  - finalising the personnel expenditure review for the public service
  - developing wage-setting mechanisms
  - implementing a job-evaluation system for the public service.
- Intensify the fight against corruption in the public service over the medium term by:
  - reporting quarterly on discipline management within the public service
  - supporting national and provincial departments to implement the guidelines on lifestyle audits in the public service.

### Subprogrammes

- *Management: Negotiations, Labour Relations and Remuneration Management* provides administrative support and management to the programme.
- *Negotiations, Labour Relations and Dispute Management* manages, develops and monitors the implementation of policies and programmes in labour relations and dispute management in the public service, and facilitates and manages collective bargaining in the Public Service Coordinating Bargaining Council and the General Public Service Sector Bargaining Council.
- *Remuneration, Employment Conditions and Human Resource Systems* manages, develops and monitors the implementation of policies and practices related to remuneration and employment conditions in the public service. This subprogramme also manages and coordinates data on governance and human resource information systems specifically related to human resources.
- *Macro Benefits and Government Employees Housing Scheme* manages, develops and monitors the implementation of policies and programmes on macro benefits in the public service, administers the housing allowance scheme, provides stakeholder management, and facilitates employee access to affordable housing finance and housing supply (ownership and rental).
- *Organisational Development, Job Grading and Macro Organisation of the State* manages, develops and monitors the implementation of policies and programmes related to organisational design, job grading and job descriptions; and manages and coordinates processes related to national macro organisations of the state.

- *Public Administration Ethics, Integrity and Disciplinary Technical Assistance Unit* manages, develops and monitors the implementation of policies, strategies and programmes related to ethics and integrity in the public service, and provides technical assistance and support when required.

## Expenditure trends and estimates

## Programme 4: e-Government Services and Information Management

### Programme purpose

Manage, oversee and facilitate ICT governance, e-enablement, ICT infrastructure, information and knowledge management, and innovation in the public service. Coordinate and facilitate ICT stakeholder management.

### Objectives

- Contribute towards improving the stability of the public service on an ongoing basis by:
  - monitoring the implementation of the national e-government strategy and roadmap towards the digitalisation of government services
  - monitoring the implementation of recommendations to improve public service ICT infrastructure
  - monitoring the implementation of policies and programmes on ICT governance, ICT risk and security standards, business continuity and service management, information management, and data and information archiving.

### Subprogrammes

- *Management: e-Government Services and Information Management* provides administrative support and management to the programme.
- *e-Enablement and ICT Service Infrastructure Management* manages, develops and monitors the implementation of policies and programmes on e-services and ICT infrastructure.
- *Information and Stakeholder Management* manages, develops and monitors the implementation of policies and programmes in information management, data and information archiving, and coordinates and facilitates ICT stakeholder management.
- *ICT Governance and Management* manages, develops and monitors the implementation of policies and programmes for ICT enterprise architecture, ICT risk, security standards, business continuity and service management.
- *Knowledge Management and Innovation* manages, develops and monitors the implementation of policies and programmes for knowledge management and innovation.

## Programme 5: Government Service Access and Improvement

## Programme purpose

Manage, oversee and facilitate service access, operations management and service delivery improvement in the

public service. Coordinate and facilitate citizen relations and public participation programmes.

## Objectives

- Contribute towards improving the stability of the public service by monitoring the implementation of the business process modernisation programme and organisational functionality assessments by national and provincial departments over the medium term.
- Promote good governance by:
  - monitoring and reporting on the institutionalisation of the African Peer Review Mechanism’s national action plan in 2023/24
  - monitoring the implementation of the revised Batho Pele programme to ensure that measurable, uniform Batho Pele standards are put in place over the medium term to enable recipients of public services to monitor departments’ adherence to Batho Pele principles
  - developing an integrated service delivery improvement framework by 2025/26.

## Subprogrammes

- *Management: Government Service Access and Improvement* provides administrative support and management to the programme.
- *Operations Management* manages, develops and monitors the implementation of policies and programmes related to service delivery mechanisms and business process management.
- *Service Delivery Improvement, Citizen Relations and Public Participation* manages and facilitates the development and implementation of social compacts and complaints management policy, and manages and coordinates citizen relations and public participation programmes.
- *Service Access* manages, develops and monitors the implementation of policies and programmes related to service planning, and manages and coordinates service centres and frontline service delivery programmes and interventions.
- *International Cooperation and Stakeholder Relations* establishes and manages the department’s bilateral, multilateral and institutional relations and cooperation programmes with international organisations, including the African Peer Review Mechanism and the open government partnership project.
- *Centre for Public Service Innovation* facilitates transfer payments to the Centre for Public Service Innovation, which unlocks innovation in the public sector and creates an enabling environment for improved and innovative service delivery through activities targeted at capacity development.

Executive authority	Minister for Public Service and Administration					
Accounting officer	Chief Executive Officer of the Centre for Public Service Innovation					
Website	www.cpsi.co.za					

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Department purpose

Facilitate the unearthing, development and practical implementation of innovative solutions within and throughout the public service.

### Mandate

In terms of section 3(1)(i) of the Public Service Act (1994), the responsibility for innovation in the public sector is vested in the Minister for Public Service and Administration. The Centre for Public Service Innovation is tasked by the minister to fulfil this mandate, which includes establishing norms and standards relating to transformation, reform and innovation to improve the effectiveness and efficiency of the public service and its delivery of services to the public.

### Selected performance indicators

**Table 42.1 Performance indicators by programme and related priority**

Indicator	Programme	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of innovation research and development initiatives undertaken per year	Public Sector Innovation	Priority 1: A capable, ethical and developmental state	2	6	5	4	4	4	4
Number of innovative solutions replicated in the public sector per year	Public Sector Innovation		2	1	2	2	2	2	2
Number of knowledge platforms sustained to nurture an enabling environment for innovation in the public sector per year	Public Sector Innovation		6	10	10	9	9	9	9

### Expenditure overview

Over the medium term, the department aims to use innovation to identify and offer solutions to service delivery challenges. It plans to do so by partnering with other government departments, non-governmental organisations, the private sector, tertiary institutions, academics and international entities to enhance government's implementation of the district development model.

The process of developing innovative solutions involves investigating challenges and then finding or creating a prototype, approach, model, service or product for further testing, piloting and/or replication. Accordingly, in 2023/24, the department plans to initiate 4 new research and development projects, such as the development of apps for emergency medical services. These are expected to enhance the delivery of services such as forensics and transport. These and other related activities will be carried out in the *Research and Development* and

*Institutional Support and Replication* subprogrammes in the *Public Sector Innovation* programme. The programme is allocated R70.3 million over the MTEF period.

As part of its efforts to bring about a culture of innovation in the public sector, the department will continue to coordinate 9 innovation knowledge platforms that share innovative approaches, solutions and models across all spheres of government. Many of these initiatives are aimed at supporting the development of digital skills among young people. These activities are allocated R28.1 million over the medium term in the *Enabling Environment and Stakeholder Management* subprogramme in the *Public Sector Innovation* programme.

One of these platforms is the annual public sector innovation awards, through which the department identifies at least 2 innovative solutions submitted to the awards for replication in targeted government sectors, particularly for identified service delivery challenges. Replication initiatives are carried out in the *Institutional Support and Replication* subprogramme, which is allocated R20.4 million over the period ahead.

The department's budget is set to increase at an average annual rate of 3.6 per cent, from R45 million in 2022/23 to R50.1 million in 2025/26. Compensation of employees accounts for 57.2 per cent (R83 million) of the department's total budget, increasing from R25.1 million in 2022/23 to R28.9 million in 2025/26 at an average annual rate of 4.8 per cent.

## Programme 2: Public Sector Innovation

### Programme purpose

Drive service delivery innovation in the public sector in line with government priorities.

### Objectives

- Contribute to improving the delivery of public services by:
  - developing innovative solutions to address service delivery challenges on an ongoing basis
  - investigating challenges in service delivery to identify solutions for possible development, adaptation, piloting and/or replication, in partnership with relevant stakeholders, on an ongoing basis
  - hosting knowledge platforms to unearth, demonstrate, share, encourage and award innovation in the public sector annually.

## Subprogrammes

- *Research and Development* establishes the knowledge base in support of the programme to inform the selection and development of potential innovative models and solutions.
- *Institutional Support and Replication* facilitates the testing, piloting, demonstration, replication and mainstreaming of innovative solutions for the public sector.
- *Enabling Environment and Stakeholder Management* nurtures and sustains an enabling environment, entrenches a culture and practices of innovation in the public sector through innovative platforms and products, and develops and maintains partnerships and stakeholder relations to enhance collaboration.

 Accounting officer: Director-General of the Public Service Commission  
 Website: [www.psc.gov.za](http://www.psc.gov.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Promote constitutional values and the principles of public administration in the public service.

### Mandate

The Public Service Commission is an independent institution established in terms of chapter 10 of the Constitution. It derives its mandate from sections 195 and 196 of the Constitution, which set out the values and principles governing public administration. The commission is vested with custodial oversight responsibilities for the public service, and monitors, evaluates and investigates public administration practices. It has the power to issue directives on compliance with personnel procedures relating to recruitment, transfers, promotions and dismissals.

### Selected performance indicators

Table 12.1 Performance indicators by programme and related priority

## Expenditure overview

Over the MTEF period, the Public Service Commission will continue to promote constitutional values and principles; investigate grievances; conduct research and monitor compliance with the public service monitoring and evaluation system and adherence to applicable procedures and standards of service delivery; and produce reports on human resource management in the public service. Total expenditure is expected to increase from R295.5 million in 2022/23 to R318.5 million in 2025/26, with compensation of employees comprising an estimated 75.4 per cent (R689.6 million) of this spending.

By promoting constitutional values and the principles governing public administration, the commission hopes to change the behaviour and attitude of public servants in their daily activities. To give effect to this, the commission, in collaboration with various spheres of government, plans to host 20 engagements per year on constitutional values and principles to promote service delivery and functionality in the public service. Spending for these engagements is within the *Monitoring and Evaluation* programme, which has an allocation of R138.9 million over the medium term.

The commission will continue to investigate grievances related to labour or human resources lodged by public servants to their respective departments, and finalise 85 per cent of them by recommending appropriate actions within 30 days of receipt. This is budgeted for in the *Leadership and Management Practices* programme, which has an allocation of R154.7 million over the medium term.

The commission is tasked with conducting investigations following the receipt of complaints from the public or of its own accord. Complaints could be related to, among other things, corruption, appointment and procurement irregularities, and the conduct of public servants. The objective of investigations is to identify shortcomings and/or wrongdoings and provide redress to citizens through the effective and efficient delivery of public services. Accordingly, the commission will continue to manage the functioning of the national anti-corruption hotline and conduct research and advocacy work to promote professional ethics in the public service. To quantify its progress, the commission intends to produce 3 oversight reports on the implementation of the ethics framework and 4 articles on the promotion of professional ethics per year over the medium term. Expenditure on these activities is within an allocation of R181.4 million over the MTEF period in the *Integrity and Anti-corruption* programme.

## Programme 2: Leadership and Management Practices

### Programme purpose

Promote sound public service leadership, human resource management, labour relations and labour practices.

### Objectives

- Improve labour relations in the public service by investigating grievances lodged with the commission, drafting communication on emerging grievance-management trends to guide the public service, and conducting awareness campaigns on an ongoing basis.
- Promote effective and efficient leadership and human resource management in the public service by conducting research in these areas on an ongoing basis.

### Subprogrammes

- *Labour Relations Improvement* promotes labour relations and practices through the timeous investigation of properly referred grievances and the provision of best practices in the public service.
- *Leadership and Human Resource Reviews* identifies and promotes sound human resource management and leadership practices in the public administration.
- *Programme Management: Leadership and Management Practices* provides overall management services to the programme.

### Expenditure trends and estimates

## Programme 3: Monitoring and Evaluation

### Programme purpose

Establish a high standard of service delivery, monitoring and good governance in the public service.

### Objective

- Improve the functionality of the public service by conducting ongoing evaluations to assess its performance and determine whether the values and principles of the public administration are being upheld.

### Subprogrammes

- *Governance Monitoring* provides institutional assessments and programme evaluations that support policy and management decisions.
- *Service Delivery and Compliance Evaluations* provides participative evaluations, including the evaluation of service delivery models and processes to support policy and management decisions.
- *Programme Management: Monitoring and Evaluation* provides overall management services to the programme.

## Programme 4: Integrity and Anti-corruption

### Programme purpose

Undertake public administration investigations, analyse and refer cases of alleged corruption to respective departments for investigation, and scrutinise the financial disclosure forms of senior managers to ensure an integrity-driven public service and administration.

## Objectives

- Improve public administration practices by investigating appointment and procurement irregularities, in particular, to promote good governance in the public service on an ongoing basis.
- Promote professional ethical conduct over the medium term by scrutinising financial disclosure forms, monitoring the implementation of the commission's recommendations in cases of financial misconduct, conducting workshops to promote and create awareness of the code of conduct, and managing the national anti-corruption hotline by referring cases to relevant departments for further investigation.

## Subprogrammes

- *Public Administration Investigations* investigates and improves public administration practices, makes recommendations to departments on the promotion of good governance, and issues directives on compliance with the Public Service Act (1994).
- *Professional Ethics* promotes ethical conduct among public servants through the management of the financial disclosure framework and the national anti-corruption hotline, and provides advice on professional and ethical conduct in the public service.
- *Programme Management: Integrity and Anti-corruption* provides overall management services to the programme.

Executive authority: Minister of Public Works and Infrastructure  
 Accounting officer: Director-General of Public Works and Infrastructure  
 Website: [www.publicworks.gov.za](http://www.publicworks.gov.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Provide policy formulation for, and coordination, regulation and oversight of, the public works sector in relation to the accommodation, housing, land and infrastructure needs of national departments. Enhance intergovernmental relations by coordinating concurrent public works functions. Lead and direct the implementation of the national expanded public works programme. Promote growth, job creation and transformation in the construction and property industries.

### Mandate

As set out in the Government Immovable Asset Management Act (2007), the Department of Public Works and Infrastructure is mandated to be the custodian and portfolio manager of government's immovable assets. Since the establishment of the Property Management Trading Entity in 2015/16, the department's role includes policy formulation, coordination, regulation and oversight relating to the provision of accommodation and expert built environment services to client departments at the national level; and, through the entity, the planning, acquisition, management and disposal of immovable assets in the department's custody. The department is also mandated to coordinate and provide strategic leadership in initiatives for the creation of jobs through the implementation of the expanded public works programme. Public works is constitutionally designated as a concurrent function exercised by the national and provincial levels of government.

### Selected performance indicators

**Table 13.1 Performance indicators by programme and related priority**

Indicator	Programme	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of beneficiaries participating in the department's skills pipeline intervention programmes per year	Intergovernmental Coordination	Priority 5: Spatial integration, human settlements and local government	1 212	1 009	2 008 <sup>1</sup>	1 100	1 200	1 200	1 300
Number of reports prepared on work opportunities in the expanded public works programme's reporting system by public bodies per year	Expanded Public Works Programme	Priority 2: Economic transformation and job creation	- <sup>2</sup>	- <sup>2</sup>	- <sup>2</sup>	4	4	4	4

**Table 13.1 Performance indicators by programme and related priority (continued)**

Indicator	Programme	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of integrated reports on the status of strategic infrastructure projects developed per year	Property and Construction Industry Policy and Research	Priority 2: Economic transformation and job creation	– <sup>2</sup>	– <sup>2</sup>	– <sup>2</sup>	4	4	4	4
Number of planned state events supported with movable structures per year	Prestige Policy	Priority 1: A capable, ethical and developmental state	8	1	6	5	6	8	8

1. Higher achievement due to additional funding reprioritised within the department towards the economic reconstruction and recovery plan.

2. No historical data available.

## Expenditure overview

Over the medium term, the department will continue to focus on creating work opportunities by leading and coordinating the expanded public works programme; providing policy and sector oversight; building state capacity to facilitate skills development and strengthen the skills pipeline; and providing direct support to sponsors of priority public infrastructure projects.

Expenditure is expected to increase at an average annual rate of 5.5 per cent, from R8.2 billion in 2022/23 to R9.6 billion in 2025/26. An estimated 85.6 per cent (R23.5 billion) of the department's total budget over the next 3 years is allocated to transfers and subsidies for the operations of its entities, and for conditional grants to provinces and municipalities to implement the expanded public works programme.

### **Coordinating the expanded public works programme**

The department will continue its efforts to coordinate the expanded public works programme, which aims to create work opportunities using labour-intensive methods across the 3 spheres of government. An estimated R8.5 billion is allocated over the medium term for transfers and subsidies, mainly to public bodies such as provinces and municipalities across government, as well as non-profit organisations, to carry out activities as part of the programme. In its efforts to continually improve the programme, the department plans to monitor and evaluate reports and impact studies on the programme's implementation over the period ahead, and provide 269 public bodies with technical support in the infrastructure, social, environment and culture sectors. To enhance the budgets of public bodies implementing and reporting on expanded public works programme projects, R1.3 billion over the medium term is allocated through incentive grants to support the programme's coordination function. All departmental activities related to the expanded public works programme are carried out through the *Expanded Public Works Programme* programme, which is allocated R9.7 billion over the next 3 years.

### **Providing policy and legislative oversight**

The department plays an oversight role in the implementation of key legislation and policy frameworks in the public works sector. These include the Intergovernmental Relations Framework Act (2005) and the district development model, which guide the implementation of the public works function at the provincial and municipal levels. The department gives effect to these frameworks by supporting joint programmes across all 3 spheres of government through its provision of coordination and intervention services, which are aimed at improving the coherence and impact of government's service delivery across the country. The department's work in this regard involves regular meetings with sector governance structures such as the committee of the public works and infrastructure minister and members of the executive council. For the department to carry out its oversight role, R80.5 million is allocated over the period ahead in the *Intergovernmental Relations and Coordination* subprogramme in the *Intergovernmental Coordination* programme.

### **Building state capacity to strengthen the skills pipeline**

Building state capacity in the property management and built environment sectors is central to the department's work. This entails either restoring or replacing the skills pipeline, through which a variety of skills required within the built environment sector emerge. The department aims to increase the number of beneficiaries participating

in skills pipeline intervention programmes, such as the economic reconstruction and recovery programme, from 1 100 in 2022/23 to 1 300 in 2025/26. For this purpose, R90.1 million is allocated over the period ahead in the *Professional Services* subprogramme in the *Intergovernmental Coordination* programme.

### Providing support to public infrastructure projects

The department's Infrastructure South Africa division has identified the need to provide direct support through the allocation of project preparation resources to sponsors of priority public infrastructure projects, with the aim of expediting investor-friendly projects. The department will support sponsors with business planning packaging, prefeasibility and feasibility studies, technical designs, and legal and regulatory approvals in alignment with the Infrastructure Development Act (2014), as amended. To prepare these projects, R600 million over the period ahead is allocated in the *Infrastructure Development Coordination* subprogramme in the *Property and Construction Industry Policy and Research* programme.

## Programme 2: Intergovernmental Coordination

### Programme purpose

Promote sound sectoral and intergovernmental relations and strategic partnerships. Coordinate with provinces on immovable asset registers, construction and property management, and the reporting of performance information within the public works sector.

### Objectives

- Coordinate the updating of immovable asset registers, the construction and management of state infrastructure, the implementation of the Government Immovable Asset Management Act (2007) and performance information reporting within the public works sector by holding regular meetings and engagements with provinces over the medium term.
- Ensure coordination in the public works sector through the development, implementation and monitoring of the approved sector plan by holding regular meetings over the medium term.
- Coordinate and manage the supply of built environment skills to support the delivery of state infrastructure by increasing the number of built environment graduates in the department's skills pipeline strategy to 3 700 over the medium term.

### Subprogrammes

- *Monitoring, Evaluation and Reporting* promotes good governance by supporting provinces in strengthening their governance and coordination capabilities.
- *Intergovernmental Relations and Coordination* improves the coordination and alignment of public works sector policies and programmes by providing oversight, intervention and support services to provinces.
- *Professional Services* contributes to the development of competent, skilled and motivated built environment professionals through supported learning interventions and focused experiential learning processes.

### Expenditure trends and estimates

**Programme 3: Expanded Public Works Programme**

**Programme purpose**

Coordinate the implementation of the expanded public works programme, which aims to create work opportunities and provide training for unskilled, marginalised and unemployed people.

**Objectives**

- Monitor and evaluate the implementation of public employment programmes within the expanded public works programme over the medium term by:
  - supporting 269 public bodies in implementing public employment programmes within the expanded public works programme in the infrastructure, social, environment and culture sectors
  - preparing quarterly reports on work opportunities in the expanded public works programme reporting system.

**Subprogrammes**

- *Expanded Public Works Programme: Monitoring and Evaluation* reports on and monitors the outputs of the expanded public works programme, and evaluates the effect of the work opportunities and training on unskilled, marginalised and unemployed people.
- *Expanded Public Works Programme: Infrastructure* aims to ensure that publicly funded construction and maintenance infrastructure projects are implemented using labour-intensive methods to create work opportunities.
- *Expanded Public Works Programme: Operations* facilitates the creation of work opportunities in the environmental, culture, non-state and social sectors.
- *Expanded Public Works Programme: Partnership Support* coordinates and supports national, provincial and municipal programmes of the expanded public works programme, and provides an enabling environment for

training, enterprise development and communication across the 4 sectors of the expanded public works programme.

- *Expanded Public Works Programme: Public Employment Coordinating Commission* consolidates progress reports on the implementation of public employment programmes such as the expanded public works programme, and produces strategic reports for the interministerial committee on public employment programmes.

## Programme 4: Property and Construction Industry Policy and Research

### Programme purpose

Promote the growth and transformation of the construction and property industries. Promote a standardised approach and best practice in construction and immovable asset management in the public sector.

### Objectives

- Promote growth, transformation and competition in the property sector by conducting research and developing policies, legislation and best practices over the medium term.
- Coordinate the strategic integrated projects and phase 2 of the national infrastructure plan over the medium term.

### Subprogrammes

- *Construction Policy Development Programme* creates an enabling environment for transforming the construction industry by developing appropriate legislation and implementing monitoring mechanisms for the sector. This subprogramme aims to facilitate the transformation and regulation of the construction industry for economic growth and development.
- *Property Policy Development Programme* provides leadership and guidance on the transformation of the property industry. It also promotes uniformity and best practices on immovable asset management in the public sector through policy development, sets best practice standards for compiling and maintaining immovable asset registers, and provides administrative rights over state and private land through guidelines. This subprogramme aims to ensure effective and efficient strategic leadership in immovable asset management and in the delivery of infrastructure programmes through the development of guidelines on immovable asset performance and condition assessments.
- *Construction Industry Development Board* transfers funds to the Construction Industry Development Board annually.
- *Council for the Built Environment* transfers funds to the Council for the Built Environment annually.
- *Independent Development Trust* transfers funds to the Independent Development Trust annually.
- *Construction Education and Training Authority* aims to influence training and skills development across the construction industry.
- *Property Management Trading Entity* transfers funds to the Property Management Trading Entity annually.
- *Assistance to Organisations for the Preservation of National Memorials* provides funding to the Commonwealth War Graves Commission and the United Nations for maintaining national memorials.
- *Infrastructure Development Coordination* coordinates sectoral planning for and the implementation of development and investment in public infrastructure.

## Programme 5: Prestige Policy

### Programme purpose

Provide norms and standards for the prestige accommodation portfolio, and meet the protocol responsibilities for state functions.

### Objectives

- Oversee the efficient delivery of identified services to prestige clients over the medium term by:
  - supporting 22 planned state events with movable structures
  - providing movable assets to prestige clients within 120 working days.

### Subprogrammes

- *Prestige Accommodation and State Functions* funds activities for the residence of parliamentarians, ministers, deputy ministers, the deputy president and the president.
- *Parliamentary Villages Management Board* provides for the transportation and related costs of parliamentarians and officials living in parliamentary villages.

#### Entity overview

Agrément South Africa was established by the Agrément South Africa Act (2015) to evaluate the fitness of purpose of non-standardised products or systems used in the construction industry for which a national standard does not exist. The implementation of the entity's mandate is dependent on the synchronisation of its work plan with government's national priorities and other national plans. The entity has indirect links with strategic national planning documents in this regard. The functioning and operations of the entity are guided by the department, and legislation and mandates governing the built environment.

Over the medium term, the entity will focus on the implementation of programmes that promote social cohesion and safer communities. So that consumers are assured that manufacturers conform to recognised environmental standards, the entity plans to issue 45 eco-labelling schemes over the medium term and conduct annual quality and compliance inspections. Through collaborations with various entities, Agrément South Africa plans to certify 82 products and systems over the period ahead, and conduct a market usage analysis of the certified products and systems. These activities are expected to cost R41.6 million over the next 3 years.

Total expenditure is expected to increase at an average annual rate of 4.3 per cent, from R36.8 million in 2022/23 to R41.7 million in 2025/26. Spending on compensation of employees accounts for an estimated 69.4 per cent (R83.4 million) of the entity's budget over the MTEF period. The entity expects to generate 90.2 per cent (R106.8 million) of its revenue through departmental transfers. Revenue is set to increase at an average annual rate of 4.3 per cent, from R36.8 million in 2022/23 to R41.7 million in 2025/26.

2. Target expected to be achieved by 2024/25.

**Entity overview**

The Construction Industry Development Board is a schedule 3A public entity established in terms of the Construction Industry Development Board Act (2000). The board is mandated to provide strategic leadership to stakeholders in the construction industry to stimulate sustainable growth in the sector, oversee transformation in construction by encouraging and facilitating the participation of historically disadvantaged groups in the industry, and establish and promote best practice among public and private sector role players in the construction delivery process. It also ensures the uniform application of policy across all spheres of government, sets and upholds ethical standards across the industry, ensures improved procurement and delivery management and equitable procurement practices, and develops systematic methods for monitoring and regulating the performance of the industry and its stakeholders, including the registration of projects and contractors.

Over the medium term, the board plans to introduce the best-practice project assessment scheme in the provincial and local spheres of government. The scheme will continue to focus on developing small and emerging contractors in the sector. Accordingly, the board plans to develop at least 4 guidelines and instruction notes.

Expenditure is expected to increase at an average annual rate of 4.4 per cent, from R195.6 million in 2022/23 to R222.5 million in 2025/26. Spending on compensation of employees accounts for an estimated 62 per cent (R396.5 million) of the entity's budget over the MTEF period. Transfers from the department account for

39.9 per cent (R251.9 million) of the board's revenue over the period ahead, and 44 per cent is set to be generated through registrations and interest on investments. Revenue is set to increase at an average annual rate of 4.4 per cent, from R195.6 million in 2022/23 to R222.5 million in 2025/26.

**Entity overview**

The Council for the Built Environment is a statutory entity established by the Council for the Built Environment

Act (2000). The act mandates the council to: promote and protect the interests of the public regarding built environment issues; promote and maintain a sustainable built and natural environment; promote the ongoing development of human resources in the built environment and the sound governance of built environment professions; facilitate participation by built environment professionals in integrated development in the context of national goals; ensure the uniform application of norms and guidelines set by councils for professions throughout the built environment; and promote appropriate standards of health, safety and environmental protection within the built environment and cooperation between the councils and government on training issues that affect the sector and the standards of such training. In addition, the council serves as a forum where built environment professionals can discuss relevant issues. The council is an overarching body that coordinates the 6 councils for built environment professions (architecture, engineering, landscape architecture, project and construction management, property valuation and quantity surveying).

One of the council's key interventions over the medium term is to transform the built environment sector, and build partnerships and collaborations with an emphasis on including women and young graduates in the skills pipeline. This will be achieved by implementing the structured candidacy programme in workplaces, which involves establishing a functional database of built environment mentors to guide candidates employed by the state. Another key intervention is to rebuild the built environment sector to drive demand and increase productivity. An estimated R16.7 million is set aside to carry out these activities.

Expenditure is expected to increase at an average annual rate of 3.1 per cent, from R58.4 million in 2022/23 to R64.1 million in 2025/26. The council expects to derive 93.2 per cent (R171.6 million) of its projected revenue over the medium term through transfers from the department. Revenue increases in line with expenditure.

### Entity overview

The Independent Development Trust was established in 1990 as a grant-making institution for the development of disadvantaged communities in South Africa, particularly in rural areas. It is listed as a schedule 2 public entity in terms of the Public Finance Management Act (1999). In terms of the act, the trust is expected to operate on a full cost-recovery basis. Since the decline in interest rates brought on by the global financial crisis in 2008, the trust has experienced a notable decrease in income from its investment accounts, prompting it to repeatedly turn to the fiscus for bailouts. It is against this background that the trust is working with the department to develop a sustainable business and funding model to ensure its continued operation.

The entity is uncertain about its future operations and is awaiting direction from the board and Minister of Public Works and Infrastructure. If it continues to exist, it will focus on empowering poor communities by providing project management services for delivering and refurbishing social infrastructure such as schools, clinics and community centres, mainly in rural areas. Should this be the case, it expects to create an estimated 240 000 work opportunities through the expanded public works programme over the medium term, and an additional 14 335 work opportunities through other programmes. To carry out these activities, the trust is dependent on an estimated allocation of R19.4 billion over the MTEF period from the Department of Public Works and Infrastructure and other client departments.

Expenditure is expected to increase at an average annual rate of 10.8 per cent, from R358.7 million in 2022/23 to R487.6 million in 2025/26. Spending on compensation of employees accounts for an estimated 51.5 per cent (R710.9 million) of the entity's total expenditure. The trust derives its revenue mainly from project management fees and government grants. If the trust continues to exist, total revenue is expected to increase at an average annual rate of 23.2 per cent, from R267.5 million in 2022/23 to R499.7 million in 2025/26, mainly driven by an increase in management fees charged to client departments.

### Entity overview

The Property Management Trading Entity was established following a decision in 2006 to devolve accommodation costs from the Department of Public Works and Infrastructure to client departments. The entity manages immovable assets on behalf of the department, including the provision of residential and office accommodation for user departments at the national government level; and acquires, manages, operates, maintains and disposes of immovable assets in the department's custody. The entity was established to apply professional business approaches in managing and optimising the state's immovable asset portfolio to ensure

that returns cover expenditure. On a cost-recovery basis, the entity finances the purchase, construction, refurbishment and maintenance of state-owned government properties, and manages the leases of privately owned properties accommodating national departments.

Over the medium term, the entity will focus on developing precincts to support efficient and integrated government planning by grouping departments that provide similar services, and refurbishing and maintaining government buildings in its portfolio. To achieve these objectives, the entity plans to spend R68.8 billion over the medium term, which includes R4.5 billion for ad hoc building maintenance.

A key component of the entity's funds will be channelled towards improving access for people with disabilities, which will include completing 26 infrastructure projects to retrofit buildings to ensure that they are accessible. The entity also plans to carry out refurbishment, repair and capital projects for 24 departments, including correctional centres, police stations, courts and office buildings. These projects are expected to cost R17.1 billion over the medium term.

In line with the entity's mandate, expenditure is expected to decrease at an average annual rate of 7.5 per cent, from R18.8 billion in 2022/23 to R14.9 billion in 2025/26, as the entity's clients gradually begin to take over payment for their own municipal services. Spending on goods and services, the department's main cost driver, accounts for an estimated 77.1 per cent (R42.8 billion) of its total budget over the medium term. Revenue, which is mainly generated from charging management fees to client departments for accommodation, is expected to decrease at an average annual rate of 4.2 per cent, from R22.4 billion in 2022/23 to R19.7 billion in 2025/26. This is because of a projected decrease in the collection of management fees as a result of the municipal payment function being devolved to client departments.

### Programmes/Objectives/Activities

Executive authority: Minister in the Presidency  
 Accounting officer: Statistician-General of Statistics South Africa  
 Website: [www.statssa.gov.za](http://www.statssa.gov.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Lead and partner in the production of statistics, in line with internationally recognised principles and standards, to inform users about socioeconomic dynamics for evidence-based decisions.

### Mandate

Statistics South Africa is a national department accountable to the Minister in the Presidency. The department's activities are regulated by the Statistics Act (1999), which mandates it to advance the production, dissemination, use and coordination of official and other statistics to assist organs of state, businesses, other organisations and the public in planning, monitoring, policy development and decision-making. The act also requires that the department coordinates statistical production among organs of state in line with the purpose of official statistics and statistical principles.

### Selected performance indicators

Table 14.1 Performance indicators by programme and related priority

Indicator	Programme	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of GDP estimate releases per year	Economic Statistics	Priority 1: A capable, ethical and developmental state	4	4	4	4	4	4	4
Number of releases on industry and trade statistics per year	Economic Statistics		150	150	150	150	150	150	150
Number of releases on financial statistics per year	Economic Statistics		17	15	18	16	16	16	16
Number of price index releases per year	Economic Statistics		48	48	48	48	48	48	48
Number of releases on labour market dynamics per year	Population and Social Statistics		8	8	8	8	8	8	8

**Table 14.1 Performance indicators by programme and related priority (continued)**

Indicator	Programme	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of releases on living circumstances, service delivery and poverty per year	Population and Social Statistics	Priority 1: A capable, ethical and developmental state	4	4	4	4	4	4	4
Number of releases on the changing profile of the population per year	Population and Social Statistics		16	16	16	16	16	16	16

## Expenditure overview

Over the medium term, the department will continue to focus on modernising its operating model, implementing a continuous population survey and releasing the results of Census 2022 in 2023/24, and strengthening statistical reform. Expenditure is expected to decrease at an average annual rate of 0.6 per cent, from R3 billion in 2022/23 to R2.9 billion in 2025/26, as allocations for Census 2022 are phased out.

### **Modernising the operating model**

To deliver statistical products and services better, faster and more cost effectively, the department is modernising its operating model. This entails introducing and implementing various innovative technologies over the medium term to optimise and automate statistical operations, including digital data collection methods for household surveys such as the census. In response to the increasing demand for data and statistics, the department will be establishing an interconnected statistical system that facilitates data acquisition, integration, analysis and visualisation. To carry out activities related to the modernisation project, R186.5 million is allocated over the MTEF period in the *Business Modernisation* subprogramme in the *Statistical Support and Informatics* programme.

### **Implementing the continuous population survey**

In 2023/24, the department will work on reconceptualising the continuous population survey. This entails integrating several existing household surveys into a single continuous data collection vehicle with the objective of producing frequent lower-level data. Once the reconceptualisation process is endorsed, the department aims to use the existing allocation within the *Population and Social Statistics* programme to conduct integrated surveys to measure poverty and household living conditions. The department is also in the process of conducting a national income and expenditure survey to measure living conditions by collecting data on household income and expenditure patterns. A sample of 30 000 households across the country has been included in the survey, which is expected to be published in 2024/25. To carry out these activities, R492 million is allocated over the medium term in the *Poverty and Inequality Statistics* subprogramme in the *Population and Social Statistics* programme.

### **Releasing the results of Census 2022**

The department has concluded Census 2022 and plans to publish and disseminate the results in July 2023 through interventions such as media campaigns and electronic tools at the national, provincial and district levels. To carry out these activities, R18 million is reprioritised in the *Statistical Support and Informatics* programme.

### **Strengthening statistical reform**

The Statistics Amendment Bill, which was drafted in 2019/20 to drive statistical reform, was approved by Cabinet in September 2022. It is expected to be tabled by Parliament and rolled out over the medium term. Among other things, the bill makes provision for developing and implementing a national statistics system and national strategy for the development of statistics, and enhancing coordination and collaboration among producers of statistics; and stipulates that censuses must be conducted every 10 years. For costs related to legislative reform and other activities concerning statistical reforms, R144.8 million is allocated over the medium term in the *South African National Statistics System* programme.

2. Rand million.

## Programme 2: Economic Statistics

### Programme purpose

Produce economic statistics to inform evidence-based economic development.

### Objectives

- Produce economic indicators to inform evidence-based planning, monitoring, evaluation and decision-making for use by the public and private sectors by:
  - publishing monthly, quarterly, annual and periodic statistical releases on various industries in the private and public sectors
  - publishing monthly statistical releases on a range of price indexes
  - publishing quarterly and annual estimates of GDP
  - improving the measurement of economic indicators through the application of internationally recognised standards and practices on an ongoing basis.

### Subprogrammes

- *Programme Management for Economic Statistics* provides strategic direction and leadership to the programme.
- *Business Cycle Indicators* provides information on turnover and volumes in various industries in the economy through the publication of monthly, quarterly and annual releases.
- *Structural Industry Statistics* publishes periodic statistical information on the income and expenditure structure of industries, as well as non-financial variables.
- *Price Statistics* provides information on inflation by compiling the consumer price index and various producer price indexes.
- *Private Sector Finance Statistics* tracks the financial performance of the private sector.
- *Government Finance Statistics* tracks public sector spending.

- *National Accounts* produces GDP data and other integrative statistical products.

## Programme 3: Population and Social Statistics

### Programme purpose

Produce population and social statistics to inform evidence-based socioeconomic development.

## Objectives

- Sustain national population and social indicators to inform evidence-based planning, monitoring and decision-making for use by the public and private sectors by:
  - publishing quarterly and annual statistical information on the labour market, and on employment and earnings in the formal and informal sectors
  - publishing monthly and annual statistical information on vital registrations based on administrative sources
  - publishing annual and periodic statistical information on poverty levels, living conditions, service delivery, population dynamics and demographic trends
  - improving the measurement of social indicators through the application of internationally recognised standards and practices on an ongoing basis.

## Subprogrammes

- *Programme Management for Population and Social Statistics* provides strategic direction and leadership to the programme.
- *Demographic and Population Statistics* publishes population statistics, demographic trends and mid-year population estimates collected through population censuses and surveys and other administrative sources.
- *Health and Vital Statistics* publishes statistics on births, deaths, marriages, divorces, tourism and migration based on administrative records.
- *Social Statistics* provides information on living conditions, domestic tourism and crime collected through household surveys.
- *Labour Statistics* provides information on employment levels in the formal non-agricultural sector, and labour market trends in South Africa.
- *Poverty and Inequality Statistics* provides information on poverty levels, and income and expenditure trends in South Africa.

## Programme 4: Methodology and Statistical Infrastructure

### Programme purpose

Develop standards, statistical frames and methodologies, and conduct statistical research.

### Objectives

- Improve the quality and methodological soundness of statistical information by researching, developing, applying and reviewing statistical methods, standards, classifications and procedures in the statistical value chain annually.
- Monitor and evaluate methodological compliance of statistical operations by conducting independent evaluations on statistical practices annually.

- Ensure complete and accurate sampling frames to enhance the quality of economic and social statistics by maintaining and updating the business and geographic information frames annually.

## Subprogrammes

- *Programme Management for Methodology and Statistical Infrastructure* provides strategic direction and leadership to the programme.
- *Statistical Methods* provides technical expertise and advice on statistical methodologies and practices for producing official statistics.
- *Statistical Standards* develops standards, classifications and definitions for surveys undertaken by the department.
- *Business Register* maintains and improves the sampling frame for economic statistics.
- *Geography* maintains and improves the geographic information frame for household surveys and censuses.
- *Survey Monitoring and Evaluation* monitors the quality of statistical operations for surveys and censuses, and conducts independent evaluations.
- *Innovation and Research* conducts statistical research, and innovates statistical methods, practices and processes for improved efficiency and agility.

## Programme 5: Statistical Support and Informatics

### Programme purpose

Enable statistical production through technology and promote the use of statistics.

### Objectives

- Modernise business processes by building an enterprise architecture and applying emerging technologies for data collection, processing and the dissemination of statistical information over the medium term.
- Enable the department's production of official statistics by providing a technology infrastructure that is reliable, sustainable and cost effective over the medium term.
- Increase awareness and the use of official statistics by government and the public on an ongoing basis by:
  - reaching out to stakeholders and responding to user enquiries
  - educating users
  - improving the accessibility and ease of use of statistical information.
- Manage external and internal communications on statistical matters by issuing daily, weekly and monthly information updates through the media on an ongoing basis.

### Subprogrammes

- *Programme Management for Statistical Support and Informatics* provides strategic direction and leadership to the programme.
- *Advocacy and Dissemination* manages internal and external communication, and increases the use of official statistics through stakeholder engagement and the dissemination of official statistics through various platforms.
- *Business Modernisation* improves data and information management across the department by modernising the way business is conducted and supported by technology.
- *Publication Services* provides editing, publishing and distribution services to survey areas.
- *Information, Communication and Technology* provides technology infrastructure to the department and supports data management across statistical series.
- *Analytical Studies* provides integrated statistical advice and support to policy planners and development practitioners, and participates in research and innovation on key development themes.

## Programme 6: Statistical Operations and Provincial Coordination

### Programme purpose

Collect and process data, and interact with stakeholders and users at the provincial and local levels.

### Objectives

- Provide integrated data collection services and disseminate quality statistics to provincial and local stakeholders and the public by ensuring an average annual response rate of 85 per cent.
- Expand the statistical information base for use by government, the private sector and the public by conducting a population census every 10 years, and large-scale population surveys between censuses.
- Ensure the efficiency and effectiveness of survey operations conducted by the department by coordinating household survey operations, with an average annual response rate of 85 per cent.
- Improve the quality and timeliness of the editing and processing of statistical data by administering a common data processing platform for censuses, household surveys, administrative records and ad hoc survey data over the medium term.

### Subprogrammes

- *Programme Management for Statistical Operations and Provincial Coordination* provides strategic direction and leadership to the programme.
- *Provincial and District Offices* provides integrated data collection and dissemination services, and promotes the use and coordination of official statistics to provincial and local stakeholders.
- *Data Operations* manages the editing and processing of census, survey and administrative data.
- *Household Survey and Censuses* conducts periodic population censuses or large-scale population surveys, and coordinates and integrates collection activities across household surveys.

## Programme 7: South African National Statistics System

### Programme purpose

Develop and coordinate the national statistical system in South Africa.

### Objectives

- Ensure national statistics are produced based on common statistical standards and principles by providing statistical support and advice, and certifying statistics as official annually.
- Ensure the sharing of statistical information by establishing and providing mechanisms, platforms and criteria for the sharing of data annually.
- Drive statistical reporting on behalf of the country by coordinating the compilation of statistical reports annually in line with the integrated indicator framework.

### Subprogrammes

- *Programme Management for the South African National Statistics System* provides strategic direction and leadership to the programme.
- *Economic Subsystem* coordinates and facilitates the production of economic and environmental statistics in the national statistical system, and provides statistical support and advice to producers of official statistics.
- *Social Subsystem* coordinates and facilitates the production of population and social statistics in the national statistical system, and provides statistical support and advice to producers of official statistics.
- *Independent Quality Assessment* conducts independent statistical reviews to assess the quality of statistical information in line with the South African Statistical Quality Assessment Framework to certify statistics as official.
- *Statistical Reporting* coordinates the reporting of statistics to fulfil the country's statistical reporting obligations.
- *Data and Information Management* coordinates and manages the transfer and sharing of data among organisations in the national statistical system.

### Expenditure trends and estimates

Executive authority	Minister of Cooperative Governance and Traditional Affairs				
Accounting officer	Director-General of Traditional Affairs				
Website	www.dta.gov.za				

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Coordinate traditional affairs across government through the development of appropriate policies, norms, standards, systems and regulatory frameworks; and promote culture, heritage and social cohesion.

### Mandate

The Department of Traditional Affairs is mandated to oversee matters related to traditional affairs and support the development of stable and cohesive traditional communities. The 2003 White Paper on Traditional Leadership and Governance sets out the national framework, norms and standards that define the role of institutions of traditional leadership in South Africa. It seeks to support and transform the institutions in accordance with constitutional imperatives and restore the integrity and legitimacy of traditional leadership in line with African indigenous law and customs subject to the Constitution.

The department's mandate is informed by the following legislation:

- the Commission for the Promotion and Protection of the Rights of Culture, Religious and Linguistic Communities Act (2002)
- the Traditional and Khoi-San Leadership Act (2019)
- the Customary Initiation Act (2021).

### Selected performance indicators

Table 15.1 Performance indicators by programme and related priority

Indicator	Programme	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of kingships/queenships/royal families monitored on the implementation of the Traditional and Khoi-San Leadership Act (2019) and the Traditional Leadership and Governance Framework Act (2003) per year	Research, Policy and Legislation	Departmental mandate	–1	–1	–1	–1	4	4	4
Number of provincial houses of traditional leaders monitored per year on the implementation of and compliance with identified priorities of the Customary Initiation Act (2021)	Research, Policy and Legislation		–1	–1	–1	–1	9	9	9
Number of provincial houses of traditional leaders in which workshops have been held per year on the implementation of section 24 of the Traditional Khoi-San Leadership Act (2019)	Institutional Support and Coordination		–1	–1	–1	8	8	8	8

1. No historical data available.

## Expenditure overview

Over the medium term, the department will continue to focus on monitoring the implementation of the Traditional and Khoi-San Leadership Act (2019) and ensuring that customary initiation is practised safely, as guided by the Customary Initiation Act (2021).

This will entail monitoring the development of principal and senior traditional leadership in royal families' customary laws of succession and genealogies in 8 provinces per year over the period ahead to mitigate against disputes and claims, in line with the provisions of the Traditional and Khoi-San Leadership Act (2019). By 2025/26, the Commission on Khoi-San Matters aims to research and investigate all applications it receives for the recognition of Khoi-San communities and leaders, and to make recommendations to the Minister of Cooperative Governance and Traditional Affairs on the recognition of Khoi-San communities and leaders. To create a safe and regulated environment for initiates in all provinces, the department plans to monitor and ensure compliance in implementing the Customary Initiation Act (2021) over the medium term. These activities are expected to drive an increase in expenditure in the *Institutional Support and Coordination* programme from R91.7 million in 2022/23 to R101.8 million in 2025/26, at an average annual rate of 3.5 per cent.

Total expenditure is expected to increase at an average annual rate of 5.2 per cent, from R180.1 million in 2022/23 to R209.7 million in 2025/26, due to an additional allocation of R30 million over the MTEF period to support the implementation of priorities of the Traditional and Khoi-San Leadership Act (2019). As a result, spending in the *Research, Policy and Legislation* programme is expected to increase at an average annual rate of 5.9 per cent, from R29.7 million in 2022/23 to R35.2 million in 2025/26.

The compensation of the department's 134 employees accounts for an estimated 50.2 per cent (R303.8 million) of total expenditure over the MTEF period, increasing at an average annual rate of 5.5 per cent, from R89.7 million in 2022/23 to R105.4 million in 2025/26.

## Programme 2: Research, Policy and Legislation

### Programme purpose

Develop, review, coordinate and monitor the implementation of traditional affairs policies, norms and standards, and support traditional affairs entities to restore the integrity and dignity of traditional leadership.

### Objectives

- Facilitate the transformation of institutions and improve the functionality of traditional leadership structures by:
  - developing regulations on the establishment of local houses of traditional and Khoi-San leaders by March 2026
  - monitoring compliance with and the implementation of the Traditional and Khoi-San Leadership Act (2019) over the medium term
  - enhancing information management for faith structures, traditional leadership institutions and communities through research and developing and maintaining a traditional leadership database on an ongoing basis
  - facilitating safe initiation practices by regulating and standardising the minimum requirements for cultural initiation practices in line with the Customary Initiation Act (2021) on an ongoing basis.

### Subprogrammes

- *Management* provides strategic oversight to the programme.
- *Policy and Legislation* develops, reviews and monitors the implementation of traditional policies, legislation, frameworks, norms and standards. This subprogramme also ensures the alignment of provincial traditional leadership.
- *Research and Information Management* conducts and provides anthropological research for the department's entity, develops and maintains traditional affairs information systems, implements national frameworks and strategies for the coordination of social cohesion within the sector to promote interfaith affairs, and promotes the progressive culture and heritage practices of traditional and Khoi-San communities.

2. Rand million.

## Programme 3: Institutional Support and Coordination

### Programme purpose

Provide comprehensive support to the institutions of traditional leadership, including Khoi-San leadership structures, to coordinate traditional affairs across all 3 spheres of government.

### Objectives

- Increase the number of functional structures of traditional leadership by supporting provincial departments and houses of traditional leaders through workshops on the implementation of partnerships and agreements and the establishment of local houses of traditional leadership on an ongoing basis.
- Transform traditional leadership institutions by implementing the Traditional and Khoi-San Leadership Act (2019) and associated regulations on an ongoing basis.

### Subprogrammes

- *Management* provides strategic oversight to the programme.
- *Institutional Development and Capacity Building* ensures that traditional communities are empowered by reviewing and developing national support programmes for these communities and their governance structures.
- *Intergovernmental Relations and Partnerships* promotes and integrates the role of traditional leaders and the institution of traditional leadership in the South African governance system by establishing relationships with other governance structures across the 3 spheres of government.
- *National House of Traditional Leaders* enhances cooperation between government and institutions of traditional leadership, and advises government on programmes, policies and legislation that affect traditional communities.
- *Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities* makes transfers to the Commission for the Promotion and Protection of the Cultural, Religious and Linguistic Rights of Communities.
- *Disputes and Claims Resolution* processes and finalises traditional leadership disputes and claims.

#### Entity overview

The Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities was established in terms of section 181(1)(c) of the Constitution to protect and promote the rights of cultural, religious and linguistic communities, and to strengthen constitutional democracy. The commission's core functions include research, conflict resolution and public education on the rights of cultural, religious and linguistic communities.

Expenditure is expected to increase at an average annual rate of 3.2 per cent, from R47.1 million in 2022/23 to R51.7 million in 2025/26. Spending on compensation of employees accounts for an estimated 66.5 per cent (R100.4 million) of total expenditure over the period ahead. The commission is set to derive 99.3 per cent (R147.4 million) of its revenue over the period ahead through transfers from the department.

### Vote purpose

*Provide quality basic education for all, and lead the establishment and development of a South African schooling system for the 21st century.*

### Mandate

The mandate of the Department of Basic Education is to monitor the standards of the provision, delivery and performance of education annually or at other specified intervals across South Africa, with the objective of assessing compliance with the provisions of the Constitution and national education policy.

The department derives its mandate from the following legislation:

- the National Education Policy Act (1996), which inscribes into law the policies, legislative and monitoring responsibilities of the Minister of Basic Education, and formal relations between national and provincial authorities
- the South African Schools Act (1996), which promotes access to education, promotes quality and democratic governance in the schooling system, and makes schooling compulsory for children aged 7 to 15 to ensure that all learners have access to quality education without discrimination
- the Employment of Educators Act (1998), which regulates the professional, moral and ethical responsibilities of educators, and the competency requirements for teachers.

## Expenditure overview

Over the medium term, the department will focus on: improving school infrastructure; providing support to improve matric completion rates; providing high-quality support materials for learners and teachers; facilitating the increase in supply of quality teachers while preparing serving teachers to teach new subjects that will prepare learners for a changing world; improving services provided through the early childhood development (ECD) function taken over from the social development sector; and providing nutritious meals for learners through the national school nutrition programme.

The department's allocations increase at an average annual rate of 5.6 per cent, from R29.7 billion in 2022/23 to R34.9 billion in 2025/26. Transfers and subsidies account for 84.9 per cent (R85.1 billion) of the department's allocation over the MTEF period, increasing at an average annual rate of 6.4 per cent, from R24.8 billion in 2022/23 to R29.9 billion in 2025/26.

### Improving school infrastructure

The department is mandated to ensure that the physical infrastructure and environment of every school is safe and appropriate for teaching and learning. To achieve this, R48.7 billion is allocated to the *education infrastructure grant* and the *school infrastructure backlogs grant* over the MTEF period, accounting for

95.9 per cent of spending in the *Planning, Information and Assessment* programme. The *school infrastructure backlogs grant* is allocated R2.1 billion in 2023/24 to address infrastructure backlogs at schools that do not meet the basic norms and standards. In 2023/24, funds from the grant will be used to build a targeted 9 new schools to replace those that are built with inappropriate material such as mud, provide sanitation to 350 schools, and supply water to 1 school.

Funds from the *education infrastructure grant* are transferred to provinces as supplementary funding to accelerate the construction, maintenance, upgrading and rehabilitation of new and existing infrastructure in the basic education sector. Over the period ahead, the department plans to use funds from the grant to repair school infrastructure damaged by flooding in KwaZulu-Natal and Eastern Cape, and to reduce overcrowding in classes and schools. To achieve this, the grant is allocated R42.2 billion over the MTEF period, which includes an additional R283.2 million in 2023/24 to repair schools damaged by the floods.

### ***Providing support to improve matric completion rates***

To reduce the learner dropout rate, the Second Chance Matric programme provides support to matrics who do not meet the pass requirements of the national senior certificate examinations or senior certificate (amended). Over the MTEF period, the programme aims to increase the number of learners obtaining subject passes from 50 000 to 100 000, partly driven by its expansion to include learners with barriers to learning, starting with visually and hearing-impaired learners in 2023. The programme is allocated R182.1 million over the medium term in the *Curriculum Policy, Support and Monitoring* programme.

### ***Providing high-quality learning materials***

In recognition that access to workbooks is essential for quality learning and teaching, the department plans to print and distribute an estimated 60 million workbooks over the MTEF period for grades R to 9 in languages, mathematics and life skills to all public schools that request them. An estimated R3.8 billion is allocated over the period ahead for this in the *Curriculum and Quality Enhancement* subprogramme in the *Curriculum Policy, Support and Monitoring* programme.

### ***Facilitating more quality teachers***

The Funza Lushaka bursary programme collaborates with the Department of Higher Education and Training in its efforts to address critical educator shortages in priority subject areas such as inclusive education, mathematics, coding, robotics, and science and technology. To award a targeted 36 400 bursaries over the period ahead, the bursary programme is allocated R4.2 billion in the *Teachers, Education Human Resources and Institutional Development* programme.

### ***Improving early childhood development services***

The department took over the ECD function, including the *early childhood development grant*, from the Department of Social Development from 2022/23. Over the MTEF period, the grant will provide subsidies for children accessing ECD services, provide infrastructure support to ECD providers and pilot the construction of low-cost ECD centres. The grant is allocated R5.5 billion over the next 3 years, including an additional R1.6 billion to increase the number of children receiving the ECD subsidy, provide pre-registration support packages, and launch a pilot programme for nutrition support and a results-based delivery model. A further R228 million over the medium term is allocated specifically to provide ECD resource packages in 2023/24 and to improve the department's capacity to support and provide oversight of ECD.

### ***Providing nutritious meals for learners***

The department's national school nutrition programme will continue to contribute to eliminating poverty and supporting food security by providing meals to an estimated 9 million learners on each school day at 19 550 schools in 2023/24, increasing to a targeted 20 000 schools in 2025/26. A total of R29.3 billion, including an additional R1.5 billion, is allocated over the MTEF period to the *Educational Enrichment Services* programme for transfers to the *national school nutrition programme grant*.

## Programme 2: Curriculum Policy, Support and Monitoring

### Programme purpose

Develop curriculum and assessment policies, and monitor and support their implementation.

### Objectives

- Increase the number of learners who complete grade 12 by providing the Second Chance Matric programme for learners who failed to meet the national senior certificate and the senior certificate (amended) requirements annually.

- Improve the learning and teaching of critical foundational skills by developing, printing and distributing 2 volumes of workbooks for grade R, grades 1 to 6 literacy/languages, grades 1 to 3 life skills (quintile 1 to quintile 3), grades 1 to 9 numeracy/mathematics, and grades 1 to 6 English first additional language to all learners in public schools annually.
- Improve learners' reading proficiency in the foundation phase in all underperforming rural and township schools by using the early grade reading assessment toolkit to assess learners' reading levels by 2023/24. This includes phonic knowledge, word recognition, and fluency and comprehension skills in the early grades.
- Fast-track the rollout and implementation of ICT in schools by providing teacher training, ICT devices, digital content, software, connectivity, IT support to schools, and online learner and teacher support materials annually.
- Increase learner participation and success rates in mathematics, science and technology by providing ICT equipment, machinery, subject-specific resources and teacher development to schools each year over the medium term by:
  - providing 485 schools, including those in the coding and robotics pilot project, with subject-specific computer hardware and related software in accordance with the minimum specifications prescribed by the curriculum assessment policy statement
  - repairing, maintaining or replacing workshop equipment and machinery for technology subjects at 232 technical schools
  - providing 232 schools with funds for the maintenance of equipment and machinery
  - providing 1 256 schools with laboratory equipment, apparatus and consumables, including manipulatives for mathematics
  - supporting 50 000 learners in co-curricular services related to mathematics, science and technology
  - supporting 1 500 teachers and subject advisers in curriculum assessment policy statement training
  - supporting 1 000 teachers in structured teacher development programmes specific to mathematics, science and technology.

### Subprogrammes

- *Programme Management: Curriculum Policy, Support and Monitoring* manages delegated administrative and financial responsibilities, and coordinates all monitoring and evaluation functions in the programme.
- *Curriculum Implementation and Monitoring* supports and monitors the implementation of the national strategy for learner attainment to monitor the quality of teaching and improve the quality of mathematics, science, technology and languages in all public schools from grades R to 12.
- *Curriculum and Quality Enhancement Programmes* supports programmes that enhance curriculum outcomes in the basic education system, and increases participation and success in mathematics, science and technology through structured programmes.

## Programme 3: Teachers, Education Human Resources and Institutional Development

### Programme purpose

Promote quality teaching and institutional performance through the effective supply, development and use of human resources.

### Objectives

- Ensure an adequate supply of qualified teachers by securing 4 500 posts for Funza Lushaka bursary holders, by June of the year after qualifying, in each year over the medium term.
- Improve the quality of teaching and learning by ensuring an adequate supply of young and qualified teachers through awarding 36 400 Funza Lushaka bursaries to prospective teachers over the medium term.
- Improve the quality of teaching and learning by monitoring and supporting the implementation of the policy on educator post provisioning in all provincial education departments annually.
- Strengthen accountability by monitoring and supporting the implementation of educator performance management systems and school evaluations annually.

### Subprogrammes

- *Programme Management: Teachers, Education Human Resources and Institutional Development* manages administrative and financial responsibilities, and coordinates all monitoring and evaluation functions in the programme.
- *Education Human Resources Management* plans, monitors and provides for education human resources, and oversees and strengthens educator performance management systems, school evaluations, education labour relations and conditions of service.
- *Education Human Resources Development* oversees and translates the integrated strategic planning framework for teacher education and development into a wide range of teacher training programmes, collaborative professional development activities, and agreements with partners and relevant service providers. This subprogramme also coordinates activities with the National Institute for Curriculum and Professional Development to promote best practice in classroom teaching and teacher development.
- *Curriculum and Professional Development Unit* manages and develops an innovative and effective system for teacher development and curriculum implementation. This entails the creation of teacher development platforms, and the evaluation and impact assessment of testing tools for determining teacher needs in content and pedagogical knowledge.

## Programme 4: Planning, Information and Assessment

### Programme purpose

Promote quality and effective service delivery in the basic education system through planning, implementation and assessment.

### Objectives

- Improve the delivery of school infrastructure over the medium term by providing oversight and support to provinces through quarterly reporting on schools' furniture needs and deliveries, the national education infrastructure management system, and the *education infrastructure grant*.
- Contribute to enhanced teaching and learning by improving and upgrading infrastructure by March 2024 by:
  - building 9 schools to replace unsafe structures
  - providing water to 1 school
  - providing sanitation to 350 schools.
- Track improvements in the quality of teaching and learning by providing standardised national assessments for grade 3, grade 6 and grade 9 learners, and administering credible public examinations for grade 12 learners in each year over the medium term.
- Strengthen the capacity of district offices on an ongoing basis to support schools through quarterly provincial visits that monitor, evaluate and make recommendations on curriculum oversight, institutional management, the provision of governance support and human resource management operations.

### Subprogrammes

- *Programme Management: Planning, Information and Assessment* delegates administrative and financial responsibilities, and coordinates all monitoring and evaluation functions in the programme.
- *Financial Planning, Information and Management Systems* develops systems and procedures to support and maintain integrated education management systems based on learner record information. This is done to monitor and report on the implementation of education information policy in the basic education sector. This subprogramme also focuses on cross-cutting aspects such as resource planning, financial support, and the development and monitoring of national funding norms and standards with provincial education departments. In addition, this subprogramme monitors, supports and evaluates the implementation of conditional grants and donor grant funding in coordination with line function units while overseeing the implementation of other transversal duties assigned to the national transferring officer by the annual Division of Revenue Act.
- *School Infrastructure* uses funding from the *school infrastructure backlogs grant* to eradicate infrastructure backlogs. This includes replacing school buildings constructed with inappropriate materials such as mud and providing water and sanitation to schools that do not have these facilities. The *education infrastructure grant* provides co-funding for the ongoing infrastructure programme in provinces to allow for the provision of infrastructure requirements. This includes the maintenance of existing infrastructure and the construction of new infrastructure, where required, to progressively meet minimum norms and standards.
- *National Assessments and Public Examinations* provides standardised national assessments for grade 3, grade 6 and grade 9 learners; oversees the implementation of a learning approach assessment in all grades; and administers credible public examinations in grade 12. This provides reliable data on learner performance to support the improvement of the quality of basic education.
- *National Education Evaluation and Development Unit* facilitates school improvement through systematic evaluation. This subprogramme evaluates how district offices, provincial departments and the national department monitor and support schools, school governing bodies and teachers. This entails identifying critical factors that inhibit or advance the attainment of sector goals and school improvement, and making focused recommendations for addressing problem areas that undermine school improvement and the attainment of sector goals.
- *Planning and Delivery Oversight Unit* monitors the planning and delivery of selected priorities, and assists provinces with this. This subprogramme works with provinces to ensure that provincial initiatives are aligned with national priorities, and provides institutional support for their effective delivery.

**Programme 5: Educational Enrichment Services**

**Programme purpose**

Monitor and support provinces to implement care and support programmes for learning and teaching.

**Objectives**

- Ensure the holistic development of learners, enhance their learning experience, and maximise their school performance by implementing sport, safety and social cohesion programmes to reduce barriers to learning in each year over the medium term.
- Improve learner health and wellness by implementing school health programmes, including the provision of nutritious meals, to all learners in quintiles 1 to 3 primary, secondary and identified special schools annually.
- Mitigate the impact of HIV and AIDS and TB by providing a caring, supportive and enabling environment for learners and educators annually.

**Subprogrammes**

- *Programme Management: Educational Enrichment Services* manages delegated administrative and financial responsibilities, and coordinates all monitoring and evaluation functions in the programme.
- *Partnerships in Education* partners with stakeholders to make education a societal issue; and manages policy, programmes and systems aimed at creating a safe and cohesive learning environment. This subprogramme focuses on promoting holistic learner development through facilitating sports and enrichment programmes in schools; and promoting social cohesion, an understanding of human rights, gender equity, non-racism, non-sexism, and democratic and constitutional values in education in public schools and school communities.
- *Care and Support in Schools* manages policies, the provision of meals and the promotion of learner access to public services. This includes interventions aimed at encouraging healthy habits and alleviating poverty.

Percentage of eligible cases investigated and finalised per year	Ethics and code of conduct		-1	0.9% (4/443)	44.4% (339/764)	70%	40%	40%	40%

1. No historical data available.

2. Indicator reworded in 2022/23 to reflect percentage instead of number.

#### Entity overview

The South African Council for Educators is mandated by the South African Council for Educators Act (2000) to enhance the status of the teaching profession by providing for the professional registration of all educators, promoting the continuing professional development of educators, and maintaining ethical and professional standards in the teaching profession.

Expenditure and revenue are expected to decrease at an average annual rate of 2 per cent over the MTEF period, from R123 million in 2022/23 to R115.7 million in 2025/26. The decrease in revenue is mainly due to higher-than-expected revenue in 2022/23 due to the one-off increase in revenue from registration fees owing to the reinstatement of previously suspended educators who were once again eligible for registration as educators in 2022/23.

The council expects to generate 81.6 per cent (R381.4 million) of its revenue over the MTEF period through membership and registration fees, and the remainder through interest on investments, reprints of certificates and transfers from the department for continuing professional teacher development programmes. Transfers from the department are expected to increase by 3.4 per cent over the period ahead, from R15.5 million in 2022/23 to R17.2 million in 2025/26.

**Entity overview**

The Umalusi Council for Quality Assurance in General and Further Education and Training derives its mandate from the General and Further Education and Training Quality Assurance Act (2001) and the National Qualifications Framework Act (2008). As an external and independent quality assurance body, the council is mandated to set and maintain standards in general and further education and training by developing and managing the general and further education and training qualifications sub-framework.

To fulfil this mandate, the council’s expenditure is expected to increase at an average annual rate of 4.7 per cent, from R187.7 million in 2022/23 to R215.2 million in 2025/26. The council is set to derive 83.4 per cent (R671.3 million) of its revenue over the period ahead through departmental transfers, increasing at an average annual rate of 3 per cent, from R162 million in 2022/23 to R177 million in 2025/26.

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

*Develop and support a quality higher and vocational education sector. Promote access to higher education, vocational education and skills development training opportunities.*

### Mandate

The Department of Higher Education and Training derives its mandate from:

- the Higher Education Act (1997), which provides for a unified national system of higher education
- the National Student Financial Aid Scheme Act (1999), which provides for the granting of loans and bursaries to eligible students attending public higher education and training institutions, and the subsequent administration of such loans and bursaries
- the Skills Development Levies Act (1999), which provides for the imposition of skills development levies
- the Continuing Education and Training Act (2006), which provides for the regulation of continuing education and training, the establishment of governance structures for and the funding of public technical and vocational education and training (TVET) colleges and community education and training (CET) colleges, the registration of private colleges, and the promotion of quality in continuing education and training
- the National Qualifications Framework Act (2008), which provides for the national qualifications framework, the South African Qualifications Authority, and quality councils for the issuing and quality assurance of qualifications required by the sub-frameworks of the national qualifications framework
- the Skills Development Act (2008), which enables the creation of the National Skills Authority; sector education and training authorities (SETAs); the establishment of the Quality Council for Trades and Occupations; and the regulation of apprenticeships, learnerships and other matters relating to skills development.

## Expenditure overview

Over the medium term, the department will focus on supporting the post-school education and training system by expanding access to higher education and facilitating the transition to work, and enhancing performance by upgrading infrastructure and increasing capacity.

Total expenditure over the MTEF period is expected to reach R432.4 billion, with transfers and subsidies to departmental agencies and accounts and higher education institutions comprising 91.2 per cent (R394.1 billion) of this amount. Spending on compensation of employees accounts for an estimated 8.1 per cent of total expenditure over the period ahead, comprising 62.8 per cent (R25.4 billion) of spending in the *Technical and Vocational Education and Training* programme for TVET college lecturers and support staff, and 91.6 per cent (R7.7 billion) of spending in the *Community Education and Training* programme for CET educators. Expenditure on compensation of employees across programmes is expected to increase at an average annual rate of 4.6 per cent, from R10.7 billion in 2022/23 to R12.2 billion in 2025/26.

Cabinet has approved a decrease of R1.8 billion to the baseline in 2023/24, and increases of R2.7 billion in 2024/25 and R104.9 million in 2025/26. These changes result in a reduction of R900 million over the period ahead on infrastructure grants to the University of Mpumalanga and Sol Plaatje University to fund early childhood development in the basic education sector.

An amount of R2.2 billion is shifted from the *university infrastructure and efficiency grant* in 2023/24, of which R1.2 billion is moved to 2024/25, when universities will be better equipped to use these funds; and R1.1 billion is reprioritised to CET infrastructure. A further R300 million is allocated to provide student accommodation at universities and TVET colleges. This amount is shifted from 2023/24 to 2024/25, in line with the capacity to spend these funds. The baseline increase over the MTEF period is attributed mainly to an additional allocation of R688.5 million to compensation of employees for cost-of-living adjustments. Revenue from the skills development levy is set to increase by R1.3 billion over the period ahead, and will be added to allocations to SETAs and the National Skills Fund.

### Expanding access to higher education and facilitating the transition to work

The National Student Financial Aid Scheme is set to receive R153.2 billion over the MTEF period for student bursaries, accounting for 93.6 per cent (R153.2 billion) of the entity's total estimated expenditure of R163.7 billion. The scheme aims to use these funds to provide financial assistance to an estimated 1.3 million university and 1.2 million TVET college students from poor and working-class backgrounds.

The department has 2 programmes in the presidential youth employment initiative. These are aimed at facilitating the transition to work by providing unemployed young people with employment and training opportunities. In 2023/24, the university graduate assistants programme aims to provide employment to 2 559 unemployed graduates at 26 universities in fields related to their areas of study. This will be funded through an allocation of R99.2 million. The second project is a pay-for-performance model through which a targeted 4 500 young people will receive demand-responsive training in priority growth sectors. This project, which is allocated R110 million in 2023/24, is co-funded by the National Skills Fund. Training providers will be paid based on the number of graduates from the programme who find permanent employment.

### Enhancing performance by upgrading infrastructure and increasing capacity

The department will ensure that its institutions have appropriate infrastructure to accommodate students who access higher education. To alleviate overcrowding and upgrade ailing infrastructure at universities, the *university infrastructure and efficiency grant* is allocated R6.1 billion over the medium term. This allocation is set to increase at an average annual rate of 2 per cent, from R2.2 billion in 2022/23 to R2.4 billion in 2025/26. The *TVET infrastructure and efficiency grant* is allocated R1.7 billion over the same period. Allocations to the grant are set to decrease at an average annual rate of 5.9 per cent, from R710.5 million in 2022/23 to R591.6 million in 2025/26, due to budget reductions implemented in the 2021 Budget to ensure that funding was more closely aligned with the sector's capacity to spend. These allocations will enable infrastructure repairs and maintenance in priority areas such as bulk services, sanitation, teaching and learning facilities, and student accommodation.

The majority of community learning centres are hosted at schools. Their programme offering is affected by the lack of proper tools, equipment, security and suitable furniture to support teaching and learning. To reduce this dependency, R1.1 billion is allocated over the medium term to enable the construction of basic skills centres, teaching and learning facilities, workshops and ICT laboratories at CET colleges.

## Programme 2: Planning, Policy and Strategy

### Programme purpose

Provide strategic direction in the development, implementation and monitoring of departmental policies and in the human resource development strategy for South Africa.

### Objectives

- Expand access to post-school education and training opportunities to include those outside the schooling system by developing, gazetted and implementing 7 policies over the MTEF period related to the national qualifications framework, career development services, and open and e-learning.

- Monitor social inclusion and equity in the post-school education and training system by producing an annual monitoring report, to be approved by the director-general, on the implementation of social inclusion in the post-school education and training system.
- Provide strategic direction in the development and implementation of departmental policies by monitoring and evaluating the department's policy outputs and coordinating research in the fields of higher education and training over the next 3 years.
- Improve success and efficiency in the post-school education and training sector by producing and publishing 5 reports over the medium term aimed at supporting decision-making, enrolment planning, funding and policy-making.
- Promote international relations by entering into at least 2 new international scholarship agreements with foreign countries each year over the medium term.
- Improve the responsiveness of the post-school education and training system by producing 9 research reports over the medium term aimed at supporting decision-making for enrolment planning, funding and policy-making on critical skills, occupations in high demand, priority skills, and skills supply and demand.
- Improve infrastructure delivery at post-school education and training institutions over the medium term by managing the implementation of the integrated infrastructure development support programme for the post-school education and training system; ensuring a functioning ministerial advisory committee that provides technical expertise; and providing oversight of the planning, expenditure, monitoring and evaluation of infrastructure delivery.
- Build and manage relations with post-school education and training sector formations (Universities South Africa, the South African College Principals Organisation, the South African Union of Students, and the South African Technical Vocational Education and Training Student Association) by holding ongoing engagements.
- Facilitate the coordination of economic development, address social challenges in a sustainable manner, and manage and facilitate constructive intergovernmental relations by implementing government's district development model over the medium term.

### **Subprogrammes**

- *Programme Management: Planning, Policy and Strategy* manages delegated administrative and financial responsibilities, and coordinates all monitoring and evaluation functions in the programme.
- *Human Resource Development Council of South Africa* provides strategic, technical and administrative support to the Human Resource Development Council of South Africa by developing the council's strategy and plans, and ensuring that they are implemented efficiently.
- *Policy, Planning, Monitoring and Evaluation* monitors and evaluates the policy outputs of the department; coordinates research in the fields of higher education and training; and ensures that education policies, plans and legislation are developed into systems.
- *International Relations* develops and promotes international relations; supports the United Nations Educational, Scientific and Cultural Organisation (UNESCO) in the higher education subsystem; and manages, monitors and reports on international donor grant funding.
- *Legal and Legislative Services* manages the legal and legislative services of the department, universities, colleges, SETAs and the National Skills Fund.
- *Social Inclusion and Quality* promotes access to open and e-learning opportunities, coordinates career development services across all spheres of government, provides career development services, promotes and monitors social inclusion and equity in the post-school education and training system, and advances the implementation of the national qualifications framework.

## Programme 3: University Education

### Programme purpose

Develop and coordinate policy and regulatory frameworks for an effective and efficient university education system. Provide financial and other support to universities, the National Student Financial Aid Scheme and national institutes for higher education.

### Objectives

- Ensure an effective and efficient university education system by developing and coordinating 3 policies, plans, guidelines and regulatory frameworks, and ensuring their implementation, by March 2024.
- Ensure the success of students from poor and working-class backgrounds by providing financial support, through the National Student Financial Aid Scheme, for 1.3 million students to access universities and national institutes for higher education over the medium term.
- Improve student success and efficiency within the public university system by implementing the university capacity development programme and providing a management information and a statistical report for monitoring and evaluation in each year over the medium term.
- Recruit 85 new permanent university academics each year and improve staff demographic profiles by implementing the new generation of academics programme over the medium term.

- Improve the responsiveness of the post-school education and training system and ensure entrepreneurial development in higher education and international scholarship programmes by revising public university academic planning guidelines to ensure a diverse mix of programmes and qualifications by March 2024.

## Subprogrammes

- *Programme Management: University Education* manages delegated administrative and financial responsibilities, and coordinates all monitoring and evaluation functions for the programme.
- *University Planning and Institutional Funding* manages planning and funding for the public higher education sector.
- *Institutional Governance and Management Support* monitors and supports institutional governance management and provides sector liaison services.
- *Higher Education Policy Development and Research* develops higher education policy, supports research and regulates the private higher education sector.
- *Teaching, Learning and Research Development* promotes, develops, monitors and evaluates the implementation of qualifications policies, programmes and systems for the development of high-quality teaching across all education sectors, including pre-schooling, schooling and post-schooling; and supports effective teaching, learning and research development in university education, including through international scholarship opportunities.
- *University Subsidies* transfers payments to universities.

## Programme 4: Technical and Vocational Education and Training

### Programme purpose

Plan, develop, implement, monitor, maintain and evaluate national policy, programme assessment practices and systems for technical and vocational education and training. Provide financial and other support to technical and vocational education and training colleges and regional offices.

### Objectives

- Expand access to post-school education and training opportunities by planning, developing and implementing 3 policies, 102 strategic or annual performance plans, 2 frameworks, 33 guidelines, 3 programme assessment practices and 3 systems for TVET colleges by March 2024.
- Improve the success and efficiency of students in the post-school education and training system over the medium term by:
  - improving the teaching and learning environment at TVET colleges through the effective use of the

*TVET infrastructure and efficiency grant*

- operationalising the new examination system, aimed at transforming the conduct of national examinations across the value chain, from the setting of question papers to the certification of successful candidates
- reducing the certification backlog
- steering TVET colleges towards greater responsiveness in the provision of skills for the labour market
- enrolling students in prevocational learning programmes to improve pass and throughput rates
- improving the competency of TVET college lecturers through dedicated online curriculum training and placement in industry for workplace exposure
- reviewing TVET college programmes and qualifications to make them more responsive to and aligned with government priorities
- improving the governance capacity of TVET colleges and intensifying the oversight function of college councils
- increasing the number of TVET college lecturers with professional qualifications through formal university-based programmes
- improving the competence of TVET college lecturers through various short programmes such as project-based teaching methodologies and digital skills.
- Improve service delivery for students by mainstreaming occupational programme offerings through the centres of specialisation programme to expand the TVET curriculum and align it more directly with industry requirements, and by establishing 2 additional disability support units at TVET colleges over the medium term.
- Improve opportunities for work placement by developing entrepreneurial and digital skills through the addition of 3 new or reviewed TVET programmes with integrated digital skills training approved by the director-general by March 2024.

**Subprogrammes**

- *Programme Management: Technical and Vocational Education and Training* manages delegated administrative and financial responsibilities, and coordinates all monitoring and evaluation functions.
- *Technical and Vocational Education and Training System Planning and Institutional Support* provides support to management and councils, ensures that colleges have fully constituted and functioning councils, provides guidance and support for the planning processes at TVET colleges, monitors and evaluates the performance of the TVET system against set indicators, develops regulatory frameworks for the system, manages and monitors the procurement and distribution of learning and teaching support materials, provides leadership for TVET colleges to enter into partnerships for the use of infrastructure and funding resources, and maps out the institutional landscape for the rollout of the TVET college system.
- *Programmes and Qualifications* manages and coordinates curriculum development processes; ensures the development of quality learning and teaching materials; monitors and supports the implementation of curriculum statements and assessment regulations, the development of lecturers, and the development and implementation of student support programmes; and provides strategic leadership for TVET colleges to diversify their programmes, qualifications and curriculums.
- *National Examinations and Assessment* administers and manages the conduct of national assessments in TVET and CET colleges.
- *Technical and Vocational Education and Training Financial Planning* develops and maintains financial management reporting systems for TVET colleges, develops and monitors the implementation of national norms and standards for funding TVET colleges, manages and determines the fair distribution of funding to TVET colleges in accordance with national norms and standards, monitors the compliance of TVET colleges with the conditions for infrastructure funding, and ensures the timely submission of TVET colleges' audited annual financial statements and quarterly financial reports.
- *Regional Offices* manages, supports, coordinates and monitors the implementation of the department's programmes in regional offices.

## Programme 5: Skills Development

### Programme purpose

Promote and monitor the national skills development strategy. Develop skills development policies and regulatory frameworks for an effective skills development system.

### Objectives

- Implement the national skills development plan over the MTEF period by ensuring that SETAs comply with service-level agreements with industry to:
  - identify and increase the production of skilled workers for occupations in demand to create a link between education and work
  - improve the level of skills in the South African workforce
  - increase access to occupationally directed programmes
  - support the growth of the public college system
  - support skills development for entrepreneurship and cooperative development
  - encourage and support worker-initiated training
  - support career development services.
- Improve skills development to support an inclusive growth path by:
  - producing and certifying 21 000 artisans by March 2024 with the aim of meeting the National Development Plan's target of producing 30 000 artisans per year by 2030
  - prioritising 110 500 workplace-based learning programmes for learnerships, internships and work-integrated learning by March 2024
  - producing 1 consolidated report on sectoral occupations in high demand and 21 sector skills plans aligned with the updated sector skills plan framework by March 2024.

### Subprogrammes

- *Programme Management: Skills Development* manages delegated administrative and financial responsibilities, and coordinates all monitoring and evaluation functions.
- *Sector Education and Training Authority Coordination* supports, monitors and reports on the implementation of the national skills development strategy at the sectoral level by establishing and managing the performance of service-level agreements with SETAs and conducting trade tests at the Institute for the National Development of Learnerships, Employment Skills and Labour Assessments.
- *National Skills Authority Secretariat* manages projects identified in the national skills development strategy and advises the minister on the national skills development policy and strategy.
- *Quality Development and Promotion* transfers funds to the Quality Council for Trades and Occupations as a contribution to its operations.

- National Artisan Development manages and monitors the development of artisans.

## Programme 6: Community Education and Training

### Programme purpose

Plan, develop, implement, monitor, maintain and evaluate national policy, programme assessment practices and systems for community education and training. Provide financial and other support to community education and training colleges.

### Objectives

- Contribute towards achieving the outcomes, impact and equity targets outlined in the department's 2020-2025 strategic plan by March 2024 by:
  - implementing the sustainable funding model and diversifying programme offerings in CET colleges geared towards expanded access and responsive colleges
  - implementing the advocacy strategy to support and guide CET colleges to meet their enrolment targets by attracting more young people
  - accrediting 148 community learning centres to provide opportunities for further study to individuals who do not meet the requirements for entry into TVET colleges and other institutions of further learning
  - introducing skills programmes and developing entrepreneurship programmes that seek to address issues of unemployment, poverty and inequality within communities
  - building lecturer capacity to ensure the provision of quality programmes and increased success in CET colleges
  - implementing monitoring and evaluation instruments to enable the department to perform its oversight role of CET colleges effectively
  - enabling the holistic implementation of norms and standards for funding CET colleges
  - improving the quality of CET provisioning by building the capacity of student leadership, centre managers, management and councils
  - building a CET system that is responsive to the needs of communities by piloting the CET concept in 54 community learning centres.

### Subprogrammes

- *Programme Management: Community Education and Training* manages delegated administrative and financial responsibilities, and coordinates the monitoring and evaluation function.
- *Community Education and Training System Planning, Institutional Development and Support* provides support to management and councils, monitors and evaluates the performance of the CET system, develops regulatory frameworks for the system, and manages and monitors the procurement and distribution of learning and teaching support materials. This subprogramme also provides leadership for CET colleges to enter into partnerships for the use of infrastructure for college site-hosting centres and the funding of these partnerships, maps an institutional landscape for the rollout of the CET system, and is responsible for the planning and development of CET infrastructure.
- *Community Education and Training Colleges Financial Planning and Management* sets up financial management systems; develops the financial management capacity of CET colleges; manages and determines the fair distribution of funding to CET colleges in accordance with norms and standards for their funding; and monitors compliance with supply chain management policy. This subprogramme also ensures the timely submission of audited performance information, annual financial statements, and quarterly and annual reports.
- *Education, Training and Development Assessment* manages and coordinates curriculum development processes; ensures the development of quality learning and teaching materials; and monitors and supports the implementation of curriculum statements, assessment regulations and examinations policy. This subprogramme also monitors and supports the development of lecturers; provides leadership for CET colleges to diversify their programmes, qualifications and curriculums; monitors and supports the implementation of policy on student and community support services; and provides leadership for colleges to form partnerships and linkages for programme diversification.

#### Entity overview

The Council on Higher Education is a statutory body established in terms of the Higher Education Act (1997), as amended. The council's mandate is to advise the minister responsible for higher education on all matters pertaining to higher education; develop and manage the higher education qualifications sub-framework; develop and implement a suite of policies and criteria; and facilitate the implementation of the higher education qualifications sub-framework and the national qualifications framework and protect their integrity.

Over the medium term, the council will continue to focus on becoming a recognised centre for information and policy analysis on higher education, and on conducting sector research and monitoring to advise the minister on all higher education matters. As these activities require skilled personnel, spending on the compensation of 52 employees accounts for a projected 40.6 per cent (R115.4 million) of the council's total budget, decreasing

at an average annual rate of 4 per cent, from R45.6 million in 2022/23 to R40.2 million in 2025/26, due to one-off payments for back pay and allowances for the previous 3 years made in 2022/23. The council expects to derive 91.5 per cent (R263.1 million) of its revenue through transfers from the department. Revenue is projected to increase at an average annual rate of 4.7 per cent, from R87.2 million in 2022/23 to R100.1 million in 2025/26.

### Entity overview

The National Skills Fund was established in terms of the Skills Development Act (1998). It funds projects identified in the national skills development strategy as national priorities; projects related to the achievement of the purposes of the act, as determined by the director-general; and any activity undertaken by the minister to achieve a national standard of good practice in skills development.

Over the medium term, the fund aims to: contribute to the development of skills for 5 100 small, medium and micro enterprises and cooperatives; fund 17 000 learners; facilitate the acquisition of various skills for 36 000 learners through community-based skills development initiatives; fund education and training for occupations in high demand for 120 000 learners; fund education and training programmes for 108 200 learners from rural areas; fund innovation and digital technology education and training programmes for 3 000 learners from rural areas; fund education and training programmes for 2 120 learners for worker education; and fund workplace experience for 1 780 learners. The fund will pursue priority projects such as the development of infrastructure at TVET and community colleges; and research and innovation aimed at expanding, integrating and improving the effectiveness of the post-school education and training system. An estimated R12.4 billion over the MTEF period is allocated for these projects.

The fund is set to derive 88 per cent (R15 billion) of its revenue over the medium term through the skills development levy and 12 per cent (R2.1 billion) from interest earned on investments held at the Public Investment Corporation. The skills development levy is collected from employers by the South African Revenue

Service and transferred to the fund as a direct charge against the National Revenue Fund. Transfers from the levy are projected to increase at an average annual rate of 7.1 per cent, from R4.3 billion in 2022/23 to R5.3 billion in 2025/26.

### Entity overview

The National Student Financial Aid Scheme was established in terms of the National Student Financial Aid Scheme Act (1999). The scheme is responsible for providing bursaries and loans to students; developing criteria and conditions for the granting of loans and bursaries to eligible students in consultation with the minister; raising funds; recovering loans from debtors; maintaining and analysing a database of funded students; undertaking research for the better use of financial resources; advising the minister on matters relating to student financial aid; and undertaking other functions assigned to it by the act or by the minister.

The scheme aims to provide bursaries to 1.4 million university students and 1.7 million TVET students from poor and working-class backgrounds at 76 public higher education institutions at a projected cost of R159.8 billion over the MTEF period. It will also look to improve the bursary application process so that applicants can get immediate confirmation of funding and resolve issues with the disbursement of tuition and student allowances.

Transfers from the department constitute an estimated 94 per cent (R154.2 billion) of the scheme's total revenue over the medium term. Allocations are set to increase at an average annual rate of 5.7 per cent, from R46 billion in 2022/23 to R54.3 billion in 2025/26.

**Entity overview**

The Quality Council for Trades and Occupations was established in terms of the Skills Development Act (1998). The council's mandate is to develop and quality assure occupational qualifications and part qualifications (including trades and skills programmes), manage the occupational qualifications sub-framework, and advise the minister on all matters of policy concerning occupational standards and qualifications.

Over the medium term, the council will continue to focus on overseeing the conversion of national accredited technical education diploma qualifications into occupational qualifications that have greater industry relevance, and developing and submitting new occupational qualifications to the South African Qualifications Authority for registration. The occupational qualifications management programme will carry out these activities at a cost of R80.2 million over the next 3 years. Total expenditure is set to increase at an average annual rate of 7.2 per cent, from R129.3 million in 2022/23 to R161.2 million in 2025/26.

The council derives 76.4 per cent (R351.9 million) of its revenue over the MTEF period from SETA grant funding. Transfers from the department constitute an estimated 20.2 per cent (R93.1 million) of total revenue, increasing at an average annual rate of 7.6 per cent. Revenue is expected to increase in line with expenditure.

### Entity overview

The Skills Development Act (1998) mandates SETAs to fund skills development; implement national, sector and workplace strategies to develop and improve skills in the South African workforce; and provide learnerships that lead to recognised occupational qualifications.

Over the medium term, the authorities will focus on strengthening and delivering relevant priority skills to South Africa's labour market, with particular emphasis on partnering with TVET colleges, universities and the market. The authorities will continue to establish partnerships with industry to scale up the placement of graduates, work-integrated learning, research, and the facilitation of industry exposure for TVET college lecturers in line with industry needs. These partnerships also allow authorities to garner labour market intelligence that informs sector skills plans and curriculum development, which improves the quality of programmes offered and the employability of graduates. These activities are expected to cost R61.5 billion over the medium term. Expenditure is set to increase at an average annual rate of 1.4 per cent, from R20.8 billion in 2022/23 to R21.7 billion in 2025/26.

The authorities derive the bulk of their revenue through the skills development levy, which is collected from employers by the South African Revenue Service and transferred as a direct charge against the National Revenue Fund. Revenue from the levy is set to constitute 89.2 per cent (R54.7 billion) of total revenue over the medium term. It is projected to increase at an average annual rate of 4.9 per cent, from R16.5 billion in 2022/23 to R19.1 billion in 2025/26. The remainder is expected to be generated through interest on investments.

### Entity overview

The South African Qualifications Authority is a statutory body established in terms of the South African Qualifications Authority Act (1995). It exists under the National Qualifications Framework Act (2008), as amended, with the role of providing decisive and coherent leadership to coordinate, simplify, monitor and evaluate the implementation of an effectively articulated national qualifications framework.

The authority will focus on enhancing its ICT infrastructure over the medium term to automate the national learner records database and verify qualifications. It will also continue to refurbish, repair and maintain its headquarters while continuing its efforts to sell the building. As the authority is service delivery orientated, compensation of employees accounts for a projected 62.3 per cent (R238.3 million) of total expenditure, increasing at an average annual rate of 1.2 per cent, from R78.8 million in 2022/23 to R81.7 million in 2025/26.

Transfers from the department account an estimated for 71.1 per cent (R282.3 million) of total revenue over the MTEF period, while revenue generated from operations accounts for 27.6 per cent (R107.8 million). Total revenue is expected to increase at an average annual rate of 6 per cent, from R115.7 million in 2022/23 to R137.6 million in 2025/26.

### Vote purpose

Lead and coordinate health services to promote the health of all people in South Africa through an accessible, caring and high-quality health system based on the primary health care approach.

### Mandate

The Department of Health derives its mandate from the National Health Act (2003), which requires that it provides a framework for a structured and uniform health system for South Africa and sets out the responsibilities of the 3 levels of government in the provision of health services. Its mission is to improve health by preventing illness and disease, and promoting healthy lifestyles. It aims to consistently improve the health care delivery system by focusing on access, equity, efficiency, quality and sustainability.

1. No historical data available.

## Expenditure overview

The department's focus over the medium term will be on preventing and treating communicable and non-communicable diseases, overseeing primary health care services, strengthening the health system, supporting tertiary health care services, improving health infrastructure, and developing human resources for the health sector.

An estimated 89.2 per cent (R169 billion) of the department's budget over the MTEF period will be transferred to provincial departments of health through conditional grants. Total spending is projected to increase at an average annual rate of 0.4 per cent, from R64.6 billion in 2022/23 to R65.4 billion in 2025/26. This nominal increase is due to baseline reductions implemented in the 2021 Budget and one-off allocations to the department in 2020/21, 2021/22 and 2022/23 for government's response to the COVID-19 pandemic, including the vaccination programme. The baseline reductions in the 2021 Budget included the conditional grants for HIV and AIDS and tertiary services. These may need to be reviewed in future budgets. The COVID-19 vaccination programme is increasingly being integrated into routine services and does not have dedicated budget allocations over the medium term.

### ***Preventing and treating communicable and non-communicable diseases***

South Africa has a high burden of communicable and non-communicable diseases, many of which require dedicated and targeted prevention and treatment programmes. The comprehensive HIV and AIDS component of the *district health programmes grant* in the *Communicable and Non-communicable Diseases* programme is allocated an average of R25 billion per year over the medium term to fund the prevention and treatment of HIV and TB. These funds are expected to ensure that a targeted 7 million people per year receive antiretroviral treatment by 2025/26. During the COVID-19 pandemic, adherence to antiretroviral treatment decreased and the budget for this programme may need to be reviewed over the MTEF period as performance improves. Allocations of R10 million per year in 2023/24 and 2024/25 have been reprioritised from the *Administration* programme to the *Communicable Diseases* subprogramme to provide for the COVID-19 vaccine no-fault compensation scheme, which was established by the department to provide compensation to individuals who suffered severe injury from adverse reactions to COVID-19 vaccinations. The large variability in spending across the *Communicable and Non-communicable Diseases* programme relates mostly to the large allocations for the COVID-19 vaccine programme, mainly from 2020/21 to 2022/23.

### ***Overseeing primary health care services***

From 1 April 2023, the department's port health services function will be shifted from the *Primary Health Care* programme to the Border Management Authority, a newly established entity of the Department of Home Affairs. This involves shifting R162 million in 2023/24, R171.1 million in 2024/25 and R178.9 million in 2025/26;

and an estimated 295 employees from the programme to the authority. The department will continue to provide policy guidance to the authority for port health services. The district health component of the *district health programmes grant* is allocated R9.2 billion over the medium term to fund the prevention and treatment of malaria, human papillomavirus and outreach services provided by community health workers. The large one-off increase in the *Primary Health Care* programme in 2022/23 was to support provinces to roll out COVID-19 vaccinations.

### ***Strengthening the health system and planning for national health insurance***

The National Health Insurance Bill is being considered by Parliament. If enacted, it will have considerable implications for how health care in South Africa is funded and organised. An amount of R2.2 billion over the medium term is allocated to the direct *national health insurance grant* for provincial health departments to contract health professionals and health care services, including primary health care doctors, oncology services and mental health services. The department also manages the *national health insurance indirect grant*, which has 3 components and a budget of R6.9 billion over the medium term. The non-personal services component of R2 billion over the next 3 years supports activities aimed at strengthening the health system, such as health information systems, quality improvement initiatives and the dispensing and distribution of chronic medicines. The personal services component is allocated R299.9 million over the MTEF period and is aimed at piloting the establishment of contracting units for primary care, through which public and private health care providers will be contracted. The third component of the grant, which seeks to revitalise health facilities, falls within the department's infrastructure interventions.

### ***Supporting tertiary health care services***

The *national tertiary services grant* is allocated R14 billion in 2023/24, R14.7 billion in 2024/25 and R15.3 billion in 2025/26 in the *Hospital Systems* programme to subsidise highly specialised services at the country's 31 tertiary and central hospitals. These hospitals are generally in urban areas and are unequally distributed across provinces, resulting in a large number of referrals of patients from rural provinces to provinces with greater tertiary services capacity. The grant aims to compensate these provinces for providing hospital care and has a developmental allocation earmarked to establish tertiary services in provinces with limited access to them. For example, oncology services are planned to be rolled out in Mpumalanga and Limpopo to reduce referrals to Gauteng.

### ***Improving health infrastructure***

South Africa's public health infrastructure has many shortcomings, including old and often poorly maintained health facilities in need of repair, refurbishment and sometimes replacement. There is also a need to invest in new infrastructure where there are gaps in service delivery because of historical inequities or demographic changes. In an effort to address this, the department plans to invest a projected R26.9 billion in the *Hospital Systems* programme over the medium term. Of this amount, R22.2 billion is set to be transferred to provinces through the *health facility revitalisation grant*, and the remainder through the health facility revitalisation component of the *national health insurance indirect grant*. This includes provisions for continuing with the construction of the Limpopo Central Hospital in Polokwane, which will be the first central hospital in the province.

### ***Developing human resources for the health sector***

Compared to other middle-income countries, South Africa has a shortage of medical doctors and specialists. To improve the country's doctor-to-patient ratio, government has increased the number of doctors trained at domestic medical schools through a combination of bursary schemes that target students from underprivileged areas, and has increased the general intake at medical schools. As a supplementary measure, government has also funded training for South African doctors in other countries such as Cuba. As part of the final stages of their training, medical students must complete statutory internships and community service in the public sector. In line with the increased training, the number of medical interns appointed by provinces has increased from 1 500 in 2015 to 2 625 in 2022, and community service doctors from 1 322 to 2 369 over the same period. This increase was funded in the 2022 Budget. Provinces are partially compensated for employing these interns and doctors through the statutory human resources component of the *human resources and training grant*, which is allocated R7.8 billion over the medium term in the *Health System Governance and Human Resources*

programme. A further R8.7 billion is allocated to the grant's training component for doctors to pursue specialist training.

## Programme 2: National Health Insurance

### Programme purpose

Achieve universal health coverage by improving the quality and coverage of health services through the development and implementation of policies and health financing reforms.

### Objectives

- Expand access to chronic medication, including antiretroviral drugs, for stable patients by delivering 6 million medicine parcels per year through the central chronic medication dispensing and distribution programme by March 2026.
- Progressively implement an equitable budgeting system and reduce fragmentation by developing a capitation-based model for contracting primary health care services and testing it in 9 contracting units for primary care by March 2024.

### Subprogrammes

- *Programme Management* provides leadership to the programme to improve access to high-quality health care services by developing and implementing universal health coverage policies and health financing reform.
- *Affordable Medicine* is responsible for developing systems to ensure the sustained availability of and equitable access to pharmaceutical commodities. This is achieved through the development of the governance frameworks to support: the selection and use of essential medicines, the development of standard treatment guidelines, the administration and management of pharmaceutical tenders, the development of provincial pharmaceutical budget forecasts, the reformation of the medicine supply chain, and the licensing of people and premises that deliver pharmaceutical services.
- *Health Financing and National Health Insurance* designs and tests policies, legislation and frameworks to achieve universal health coverage and to inform proposals for national health insurance. It develops health financing reforms, including policies affecting the medical schemes environment; provides technical oversight of the Council for Medical Schemes; and manages the direct *national health insurance grant* and the *national health insurance indirect grant*. It also implements the single exit price regulations, including policy development and implementation initiatives in terms of dispensing and logistical fees. This subprogramme will increasingly focus on evolving health financing functions such as user and provider management, health care benefits and provider payment, digital health information, and risk identification and fraud management.

## Programme 3: Communicable and Non-communicable Diseases

### Programme purpose

Develop and support the implementation of national policies, guidelines, norms and standards, and the achievement of targets for the national response needed to decrease morbidity and mortality associated with communicable and non-communicable diseases. Develop strategies and implement programmes that reduce maternal and child mortality.

## Objectives

- Reduce the risk of women developing cervical cancer by vaccinating 80 per cent of eligible girls in grade 5 against the human papillomavirus in each year over the medium term.
- Support the effective implementation of the national strategic plan on malaria elimination over the medium term by:
  - ensuring indoor residual insecticide spray coverage of at least 95 per cent of households in malaria-endemic municipalities
  - conducting information and communication campaigns on malaria prevention
  - investigating and classifying confirmed cases within 72 hours.
- Increase the total number of HIV-positive people accessing antiretroviral treatment from 5.2 million in March 2022 to 7 million in March 2026 by implementing the universal test-and-treat policy.
- Reduce new HIV infections by implementing a combination of prevention interventions such as providing HIV counselling and testing, offering medical male circumcision, and distributing condoms over the medium term.
- Contribute to the reduction of HIV infections among young people by ensuring that 2 300 primary health care facilities have youth zones that provide HIV prevention and other sexual and reproductive health services tailored for young people by March 2026.
- Reduce premature mortality as a result of non-communicable diseases by screening 60 per cent of clients for hypertension and diabetes in 2023/24.

## Subprogrammes

- *Programme Management* is responsible for ensuring that efforts by all stakeholders are harnessed to support the overall purpose of the programme. This includes ensuring that the efforts and resources of provincial departments of health, development partners, donors, academic and research organisations, and non-governmental and civil society organisations all contribute in a coherent and integrated way.
- *HIV, AIDS and STIs* is responsible for policy formulation for HIV and sexually transmitted disease services, and the monitoring and evaluation of these services. This entails ensuring the implementation of the health sector's national strategic plan on HIV, TB and STIs. This subprogramme also manages and oversees the comprehensive HIV and AIDS component of the *district health programmes grant* implemented by provinces, and the coordination and direction of donor funding for HIV and AIDS. This includes the United States President's Emergency Plan for AIDS Relief; the Global Fund to Fight AIDS, Tuberculosis and Malaria; and the United States Centres for Disease Control and Prevention.
- *Tuberculosis Management* develops national policies and guidelines for TB services, sets norms and standards, and monitors their implementation in line with the vision of eliminating infections, mortality, stigma and discrimination. This subprogramme is also responsible for the coordination and management of the national response to the TB epidemic, and incorporates strategies needed to prevent, diagnose and treat both drug-sensitive TB and drug-resistant TB.
- *Women's Maternal and Reproductive Health* develops and monitors policies and guidelines for maternal and women's health services, sets norms and standards, and monitors and evaluates the implementation of these services. This subprogramme supports the implementation of key initiatives as indicated in the maternal and child health strategic plan and the reports of the ministerial committees on maternal, perinatal and child mortality.
- *Child, Youth and School Health* is responsible for policy formulation and coordination for, and the monitoring and evaluation of, child, youth and school health services. This subprogramme is also responsible for the management and oversight of the human papillomavirus vaccination programme, and coordinates stakeholders outside of the health sector to play key roles in promoting improved health and nutrition for children and young people. It supports provincial units responsible for the implementation of policies and guidelines, and focuses on recommendations made by the ministerial committee on morbidity and mortality in children. These are aimed at reducing mortality in children younger than 5, increasing the number of HIV-positive children on treatment, strengthening the expanded programme on immunisation, and ensuring that health services are friendly to children and young people.

- *Communicable Diseases* develops policies and supports provinces in ensuring the control of infectious diseases with the support of the National Institute for Communicable Diseases, a division of the National Health Laboratory Service. It improves surveillance for disease detection; strengthens preparedness and core response capacity for public health emergencies in line with international health regulations; and facilitates the implementation of influenza prevention and control programmes, tropical disease prevention and control programmes, and malaria elimination. This subprogramme comprises 2 components – communicable disease control, and malaria and other vector-borne diseases.
- *Non-communicable Diseases* establishes policy, legislation and guidelines, and assists provinces in implementing and monitoring services for chronic non-communicable diseases. This includes disability and rehabilitation, as well as for older people; eye health; palliative care; mental health and substance abuse; and forensic mental health. The department supports a continuum of care for these diseases, from primary prevention, early identification and screening through to treatment and control at all levels of care, including palliative.
- *Health Promotion and Nutrition* formulates and monitors policies, guidelines, norms and standards for health promotion and nutrition. Focusing on South Africa's quadruple burden of disease (TB, HIV and AIDS; maternal and child mortality; non-communicable diseases; and violence and injury), this subprogramme implements the health-promotion strategy of reducing risk factors for disease and promotes an integrated approach to working towards an optimal nutritional status for all South Africans.

## Programme 4: Primary Health Care

### Programme purpose

Develop and oversee the implementation of legislation, policies, systems, and norms and standards for a uniform, well-functioning district health system, including for emergency, environmental and port health services.

### Objectives

- Improve the quality of care at primary health care facilities by ensuring that 2 400 of these qualify as ideal clinics by March 2024.
- Mitigate the spread of communicable diseases by ensuring that 35 points of entry are compliant with international health regulations by March 2025.
- Ensure continuity of care in line with the referral policy by ensuring that community health workers conduct 23.9 million household visits per year over the medium term.
- Strengthen environmental health services by ensuring that 52 metropolitan and district municipalities are compliant with national environmental health norms and standards by March 2025.
- Improve the quality and safety of care by assessing all provinces for compliance with emergency medical services regulations in each year over the medium term.

### Subprogrammes

- *Programme Management* supports and provides leadership for the development and implementation of legislation, policies, systems, norms and standards for a uniform district health system, and emergency, environmental and port health systems.
- *District Health Services* promotes, coordinates and institutionalises the district health system, integrates programme implementation using the primary health care approach by improving the quality of care, and coordinates the traditional medicine programme. This subprogramme is responsible for managing the district health component of the *district health programmes grant*.
- *Environmental and Port Health Services* coordinates the delivery of environmental health services, including the monitoring and delivery of municipal health services; and ensures compliance with international health regulations by coordinating port health services at all of South Africa's points of entry. This subprogramme provides oversight and support through policy development, support and implementation monitoring for district and metropolitan municipalities to deliver municipal health services.
- *Emergency Medical Services and Trauma* is responsible for improving the governance, management and functioning of emergency medical services in South Africa by formulating policies, guidelines, norms and standards; strengthening the capacity and skills of emergency medical services personnel; identifying needs and service gaps; and providing oversight to emergency medical services in provinces.

## Programme 5: Hospital Systems

### Programme purpose

Develop national policies and plans for all levels of hospital services to strengthen the referral system and facilitate the improvement of hospitals. Ensure that the planning, coordination, delivery and oversight of health infrastructure meet the country's health needs.

## Objectives

- Expand the package of services available to the population based on cost effectiveness and equity by developing a comprehensive hospital strategy by March 2024.
- Improve the financing and delivery of health care infrastructure by March 2026 by:
  - constructing or revitalising 58 primary health care facilities
  - constructing or revitalising 50 hospitals
  - maintaining, repairing and/or refurbishing 600 public health facilities.

## Subprogrammes

- *Programme Management* supports and provides leadership for the development of national policy on hospital services, including the management of health facility infrastructure and hospital systems.
- *Health Facilities Infrastructure Management* coordinates and funds health care infrastructure to enable provinces to plan, manage, modernise, rationalise and transform infrastructure, health technology and hospital management, and improve the quality of care. This subprogramme is also responsible for the direct *health facility revitalisation grant* and the health facility revitalisation component of the *national health insurance indirect grant*.
- *Hospital Systems* focuses on the modernised and reconfigured provision of tertiary hospital services, identifies tertiary and regional hospitals to serve as centres of excellence for disseminating best practices for quality improvements, and is responsible for the management of the *national tertiary services grant*.

## Programme 6: Health System Governance and Human Resources

### Programme purpose

Develop policies and systems for the planning, managing and training of health sector human resources, and for planning, monitoring, evaluation and research in the sector. Provide oversight to all public entities in the sector and statutory health professional councils in South Africa.

### Objectives

- Improve the quality and safety of care by ensuring that 400 primary health care facilities and 300 hospitals implement the quality improvement programme by March 2026.
- Improve the quality and safety of care by supporting the development of curriculums for nurse/midwifery specialist training in 9 nursing colleges by March 2024.
- Monitor the compliance of public entities and statutory health councils with applicable legislation, policies and guidelines by producing biannual governance reports over the medium term.
- Improve food safety by finalising and gazetting food labelling regulations by March 2025.

### Subprogrammes

- *Programme Management* supports and provides leadership for health workforce programmes, key governance functions such as planning and monitoring, public entity oversight, and forensic chemistry laboratories.
- *Policy and Planning* provides advisory and strategic technical assistance on policy and planning, coordinates the planning system of the health sector, and supports policy analysis and implementation.
- *Public Entities Management and Laboratories* supports the executive authority's oversight function and provides guidance to health entities and statutory councils that fall within the mandate of health legislation

with regards to planning and budget procedures, performance and financial reporting, remuneration, governance and accountability.

- *Nursing Services* develops and monitors the implementation of a policy framework for the development of required nursing skills and capacity to deliver effective nursing services.
- *Health Information, Monitoring and Evaluation* develops and maintains an integrated national health information system, commissions and coordinates research, and monitors and evaluates departmental performance and strategic health programmes.
- *Human Resources for Health* is responsible for medium-term to long-term health workforce planning, development and management in the public health sector. This entails facilitating the implementation of the national human resources for health strategy, health workforce capacity development for sustainable service delivery, the coordination of transversal human resources management policies, and the provision of in-service training for health workers. This subprogramme is responsible for the *human resources and training grant*.

### Entity overview

The Council for Medical Schemes was established in terms of the Medical Schemes Act (1998) as the regulatory authority responsible for overseeing the medical schemes industry in South Africa. Section 7 of the act sets out the functions of the council, which include protecting the interests of medical scheme beneficiaries, controlling and coordinating the functioning of medical schemes, collecting and disseminating information about private health care, and advising the Minister of Health on any matter concerning medical schemes.

The council plays a significant role in supporting the department and coordinating the medical industry's efforts towards realising universal health coverage. Over the MTEF period, the council aims to complete a review of the prescribed minimum benefits that all medical schemes must cover, promote the consolidation of options and medical schemes, and support presidential health compact activities related to the standardisation of health care technology, infrastructure and architecture.

Total expenditure is expected to increase at average annual rate of 4.7 per cent, from R193.4 million in 2022/23 to R221.9 million in 2025/26. The council expects to generate an estimated 95.2 per cent (R616.4 million) of its revenue over the medium term through the collection of levies from medical schemes and 3.2 per cent (R20.4 million) through transfers from the department. Revenue is set to increase in line with spending.

### Entity overview

The Mines and Works Compensation Fund was established in terms of the Occupational Diseases in Mines and Works Act (1973). It is not yet listed as a public entity and the administration of the fund is done by the department, but legislation is being prepared to formally establish it as a schedule 3A public entity. The act mandates the fund to collect levies from controlled mines and works; compensate workers, former workers and the dependants of deceased workers in controlled mines and works who have developed occupational diseases in their cardiorespiratory organs; and reimburse workers for any loss of earnings while being treated for TB.

Over the MTEF period, the fund will focus on increasing the number of benefit payments made from 7 600 in 2022/23 to 8 600 in 2025/26 and the number of certifications finalised from 13 200 to 15 000 over the same period. Beneficiary payments are expected to increase from R449.8 million in 2022/23 to R543.3 million in 2025/26 at an average annual rate of 6.5 per cent, mainly driven by the unwinding adjustment on the provision for the outstanding claims liability, which increases from R312.2 million in 2022/23 to R396.5 million in 2025/26.

Over the medium term, the fund expects to derive 74.4 per cent (R1.2 billion) of its revenue through interest received from investments and 25.6 per cent (R399.9 million) through the levies it receives from controlled mines and works. Revenue is expected to increase at an average annual rate of 7.8 per cent, from R433.1 million in 2022/23 to R542.3 million in 2025/26.

## National Health Laboratory Service

### Selected performance indicators

**Table 18.25 National Health Laboratory Service performance indicators by programme/objective/activity and related priority**

Indicator	Programme/ Objective/Activity	MTSF priority	Audited performance		Estimated performance		MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Percentage of outbreaks responded to per year within 24 hours of notification	Surveillance of communicable diseases	Priority 3: Education, skills and health	100% (33 373)	100% (1 193)	100% (126)	100%	100%	100%	100%
Percentage of occupational and environmental health laboratory tests conducted within the predefined turnaround time per year	Occupational health		93% (15 478/ 16 706)	97% (14 491/ 14 959)	98% (2 839/ 2 906)	90%	90%	90%	90%
Percentage of CD4 tests performed within 40 hours per year	Laboratory tests		94% (2 576 647/ 2 752 726)	95% (2 122 442/ 2 324 176)	93% (2 118 943/ 2 268 494)	94%	95%	95%	95%
Percentage of HIV viral load tests performed within 96 hours per year	Laboratory tests		79% (4 445 591/ 5 631 340)	80% (4 692 425/ 5 838 922)	93% (5 707 235/ 6 125 024)	82%	94%	95%	95%
Percentage of TB GeneXpert tests performed within 40 hours per year	Laboratory tests		94% (1 958 190/ 2 094 401)	95% (1 451 824/ 1 535 865)	94% (2 031 792/ 2 155 430)	93%	94%	95%	95%
Percentage of HIV polymerase chain reaction tests performed within 96 hours per year	Laboratory tests		72% (436 147/ 605 978)	83% (561 792/ 673 596)	90% (631 796/ 703 346)	81%	92%	94%	95%
Percentage of cervical smear tests performed within 5 weeks per year	Laboratory tests		86% (1 729 128/ 2 022 064)	95% (622 123/ 654 225)	97% (732 283/ 755 252)	91%	95%	95%	95%
Total number of national central laboratories accredited by the South African National Accreditation System	Research		51	53	52	53	53	53	53
Percentage of laboratories achieving proficiency testing scheme performance standards of 80% per year	Research		88% (618/ 699)	99% (247/ 249)	99% (250/ 252)	92%	94%	96%	98%
Number of articles published in the peer-reviewed journals per year	Research	600	620	688	660	680	700	720	

### Entity overview

The National Health Laboratory Service was established in terms of the National Health Laboratory Service Act (2000), and provides pathology services for the majority of the South African population through its 233 laboratories across the country. This includes forensic chemistry laboratory services, which the service took

over from the department in 2022/23. The service also houses the National Institute for Communicable Diseases and the National Institute for Occupational Health.

Total expenditure is expected to increase at an average annual rate of 9.6 per cent, from R11.6 billion in 2022/23 to R15.3 billion in 2025/26. Laboratory tests are expected to comprise 73.8 per cent (R32 billion) of the service's total spending over the medium term. Expenditure on these tests is projected to increase at an average annual rate of 11.1 per cent due to the projected increase in test volumes other than COVID-19 tests as services normalise. This will result in increased expenditure on material (reagents) and the maintenance of laboratory equipment. Accordingly, the service expects to improve turnaround times for laboratory tests, with the majority of HIV viral load tests set to be completed within 96 hours and TB GeneXpert tests within 40 hours.

The National Institute for Communicable Diseases is responsible for disease surveillance, specialised diagnostic services, outbreak response, public health research and capacity building. To carry out related activities, R1.5 billion is allocated over the next 3 years through the surveillance of communicable diseases programme. The primary responsibility of the National Institute for Occupational Health is to develop and support occupational health initiatives to improve and maintain the health of the South African workforce. It is allocated R551.9 million over the medium term through the occupational health programme.

The service expects to derive 92.4 per cent (R40 billion) of its revenue over the MTEF period through fees charged for laboratory tests and 5.6 per cent (R2.3 billion) through transfers from the department. Laboratory tests are funded through revenue generated from fees charged for the tests. This revenue is expected to increase at an average annual rate of 10.1 per cent, from R10.7 billion in 2022/23 to R14.3 billion in 2025/26, in line with the projected increase in test volumes. The service's research programme and institutes are primarily funded through transfers from the department.

### Programmes/Objectives/Activities

## Entity overview

The Office of Health Standards Compliance was established in terms of the National Health Amendment Act (2013) to promote and protect the health and safety of the users of health services. It is mandated to monitor and enforce the compliance of health establishments with the norms and standards prescribed by the Minister of Health in relation to the national health system; and ensure the consideration, investigation and disposal of complaints relating to noncompliance with prescribed norms and standards in a procedurally fair, economical

and expeditious manner.

In an effort to strengthen the quality of health care delivery, the office is expected to increase the number of health establishments it inspects and certifies for compliance with norms and standards. The percentage of public health facilities inspected is expected to increase from 14.5 per cent in 2021/22 to 18.4 per cent in 2025/26. This is enabled by additional allocations of R10 million in 2023/24, R12 million in 2024/25 and R15 million in 2025/26. The bulk of this funding is allocated to the compliance inspectorate programme, which carries out most of the office's work and constitutes an estimated 35.7 per cent (R182.1 million) of its total projected expenditure over the MTEF period. Expenditure is expected to increase at an average annual rate of 4.9 per cent, from R157.5 million in 2022/23 to R181.7 million in 2025/26. The office derives its revenue entirely through transfers from the department. These are expected to amount to R516.1 million over the medium term.

### Programmes/Objectives/Activities

### Entity overview

The South African Health Products Regulatory Authority derives its mandate from the National Health Act (2003) and the Medicines and Related Substances Act (1965). The authority's key focus over the medium term will be on registering medicines and medical devices to support public health needs; licensing medicine and medical device manufacturers and importers; authorising, monitoring and evaluating clinical trials; and managing the safety, quality, efficacy and performance of health products throughout their life cycles.

The core activities of evaluating the safety, quality and therapeutic efficacy of medicines, and registering them, is expected to account for 31 per cent (R392.4 million) of the authority's expenditure over the MTEF period. To improve efficiency and enable access to medicines to be rapidly scaled up by improving timelines for scientific evaluation and clinical trials, the authority plans to upskill its personnel through talent management and recruit expertise in core areas. Accordingly, its number of personnel is set to increase from 292 in 2022/23 to 331 in 2023/24 and for the remainder of the MTEF period. This is expected to result in an increase in spending on compensation of employees, from R210.5 million in 2022/23 to R286 million in 2025/26. Total revenue and expenditure are expected to increase at an average annual rate of 7 per cent, from R349.4 million in 2022/23 to R428.4 million in 2025/26. The authority expects to derive 54.9 per cent (R696.8 million) of its revenue over the MTEF period through fees charged for its services and 40.1 per cent (R478.5 million) through transfers from the department.

1. No historical data available.

### Entity overview

The council's mandate in terms of the South African Medical Research Council Act (1991) is to promote the improvement of the health and quality of life of the population through research, development and technology transfer. In line with this mandate, the council conducts and funds relevant and responsive health research, capacity development, innovation and research translation.

Over the MTEF period, the council aims to accept or publish approximately 1 900 journal articles, books and book chapters by authors affiliated with and/or funded by it. Core research of this kind accounts for an estimated 50.2 per cent (R2.1 billion) of the council's budget over the medium term. Of this amount, R1.2 billion is earmarked for university research programmes, R69 million for self-initiated research projects at universities, R18 million for TB research and R15 million for COVID-19 research.

Innovation and technology projects that aim to improve health are expected to account for an estimated 24.8 per cent (R1 billion) of the council's spending over the medium term. This includes building capacity in low-income and middle-income countries to produce mRNA vaccines, providing scholarship funding to build a vaccine-manufacturing workforce, and tracking COVID-19 viral RNA in wastewater across more than 80 wastewater treatment plants in South Africa to ensure that outbreaks of COVID-19 are detected early.

Total spending is projected to increase at an average annual rate of 0.7 per cent, from R1.4 billion in 2022/23 to R1.5 billion in 2025/26. The decrease in 2023/24 is due to one-off allocations for COVID-19 vaccine research in 2021/22 and 2022/23.

Transfers from the department comprise an estimated 60 per cent (R2.5 billion) of the council's revenue over the medium term, with the remaining R1.5 billion coming from research contracts with international donors, other funders and interest earned. Revenue is expected to increase at an average annual rate of 3.3 per cent, from R1.3 billion in 2022/23 to R1.5 billion in 2025/26.

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

*Ensure protection against vulnerability by creating an enabling environment for the provision of a comprehensive, integrated and sustainable social development service.*

### Mandate

The social development sector provides social development services and leads government's efforts to forge partnerships through which vulnerable individuals, groups and communities become capable and active participants in their own development. Several pieces of legislation determine the department's mandate:

- the Non-profit Organisations Act (1997) establishes an administrative and regulatory framework within which non-profit organisations can conduct their affairs, and provides for their registration by the department
- the 1997 White Paper for Social Welfare sets out the principles, guidelines, policies and programmes for developmental social welfare in South Africa. A draft white paper for social development is under review
- the 1998 White Paper on Population Policy for South Africa is aimed at promoting the sustainable development of all South Africans by integrating population issues with development planning in all spheres of government and all sectors of society
- the Social Assistance Act (2004) provides a legislative framework for the provision of social assistance. The act and its regulations set out the different types of social grants payable, including those for social relief of distress, and their qualifying criteria
- the South African Social Security Agency Act (2004) establishes the South African Social Security Agency as an entity responsible for the administration and payment of social grants
- the Children's Act (2005), as amended, gives effect to certain rights of children, as contained in the Constitution, and sets out principles and processes relating to their care and protection
- the Older Persons Act (2006) is aimed at maintaining and promoting the rights, status, wellbeing, safety and security of older people. It provides for older people to enjoy quality services while staying with their families and in their communities for as long as possible, and to live in residential care facilities
- the Prevention of and Treatment for Substance Abuse Act (2008) and associated regulations provide a legal framework for the establishment, registration and monitoring of in-patient treatment centres and halfway houses.

## Selected performance indicators

**Table 19.1 Performance indicators by programme and related priority**

## Expenditure overview

Over the MTEF period, the department will focus on: providing income support to the poor and vulnerable through social grants administered by the South African Social Security Agency; facilitating the development of a comprehensive social security reform strategy; preventing fraud in the social security system; providing and increasing access to developmental social welfare services, particularly for vulnerable groups; and building sustainable communities to alleviate poverty.

The payment of social grants accounts for an estimated 96.4 per cent (R735.2 billion) of the department's total budget over the MTEF period. Through provincial social development departments, the delivery of social welfare services is estimated to result in expenditure of R65.2 billion over the medium term.

### ***Providing income support to the poor and vulnerable***

Through the provision of social grants to qualifying beneficiaries, the department's *Social Assistance* programme plays a critical role in government's strategy to tackle poverty and inequality. Expenditure in the programme is expected to increase at an average annual rate of 1.3 per cent, from R239.1 billion in 2022/23 to R248.4 billion in 2025/26. The discontinuation of the *COVID-19 social relief of distress grant* after 2023/24 leads to a reduction in the total number of grant beneficiaries from an estimated 26.6 million in 2022/23 to 19.6 million in 2025/26.

### ***Reforming social security and preventing fraud***

The department plans to continue developing policy proposals on social security reform. This includes working with other departments to develop a white paper on social security that is expected to culminate in a social security bill that the department aims to submit to Cabinet in 2024/25. These activities will be carried out through the *Social Security Policy Development* subprogramme in the *Social Security Policy and Administration* programme. The subprogramme is allocated R217.6 million over the next 3 years.

With the introduction of a direct appeals process for social grants in 2020/21 and the continuation of the *COVID-19 social relief of distress grant* in 2023/24, the Independent Tribunal for Social Assistance Appeals is likely to continue to have a significant workload. To manage this, the *Appeals Adjudication* subprogramme in the *Social Security Policy and Administration* programme has a budget of R128.8 million over the medium term.

The proclamation of the Social Assistance Amendment Act (2020) has paved the way for the department to finalise the operationalisation of the Inspectorate for Social Assistance, which is mandated to ensure that there is independent capacity to address and prevent fraud in the social grant system. The inspectorate is allocated R72.6 million over the next 3 years in the *Social Security Policy Development* subprogramme in the *Social Security*

*Policy and Administration* programme. In addition, R226.7 million over the MTEF period is allocated to the *Social Grants Fraud Investigations* subprogramme in the same programme. The subprogramme transfers funds to the South African Social Security Agency to carry out fraud prevention, investigation and mitigation activities.

### ***Providing and increasing access to developmental social welfare services***

The Children's Amendment Act (2022) is intended to strengthen the protection of vulnerable children through the coordinated provision of care and protection services, address gaps and challenges in the child care and protection system, and identify strategies to address these challenges. Over the MTEF period, the department will focus on increasing awareness and providing training to workers in the social development sector on the act and the practice guidelines for national and international adoption of children. The department will also monitor the implementation of the guidelines for community-based prevention and early intervention services to vulnerable children. To carry out this work, the *Children* subprogramme in the *Welfare Services Policy Development and Implementation Support* programme is allocated R248.3 million over the next 3 years.

Over the period ahead, the department will aim to provide stakeholders in gender-based violence hotspot districts with training on the psychosocial services policy. This is expected to lead to better structured, regulated and timely responses that also reduce the likelihood of victims becoming perpetrators themselves, as well as of repeat victimisation. These services are also provided through a toll-free line. As part of its efforts to improve the response, care and healing of victims of gender-based violence, the department will finalise the intersectoral policy on sheltering over the MTEF period. The policy is expected to make provisions for short-term alternative accommodation where victims of abuse can positively transform their lives through empowerment programmes. To carry out these activities, the *Social Crime Prevention and Victim Empowerment* subprogramme in the *Welfare Services Policy Development and Implementation Support* programme is allocated R242.1 million over the MTEF period.

The department will continue to monitor the implementation of the universal treatment curriculum in 12 public substance abuse treatment centres, review the national drug master plan, and finalise the Prevention of and Treatment for Substance Use Disorders Bill and accompanying regulations. Expenditure for these initiatives is within the *Substance Abuse* subprogramme in the *Welfare Services Policy Development and Implementation Support* programme. The subprogramme is allocated R65.2 million over the medium term.

### ***Building sustainable communities to alleviate poverty***

Over the medium term, the department aims to strengthen community engagements in 34 districts through implementing the community mobilisation and empowerment framework, which promotes the use of household and community profiling to inform service and support provision. It also aims to link 2 per cent of grant recipients with sustainable livelihood opportunities, including through the expanded public works programme. These activities are carried out in the *Community Development* subprogramme in the *Social Policy and Integrated Service Delivery* programme. The subprogramme has a budget of R94.3 million over the next 3 years.

In its efforts to strengthen the regulatory environment, the department will aim to monitor the implementation of the Non-profit Organisations Act (1997) and ensure improved turnaround times for processing non-profit organisation applications and reports. Expenditure for these initiatives is in the *Registration and Monitoring of Non-profit Organisations* subprogramme in the *Social Policy and Integrated Service Delivery* programme. The subprogramme has a total budget of R132.5 million over the MTEF period.

## Programme 2: Social Assistance

### Programme purpose

Provide social assistance to eligible individuals whose income and assets fall below set thresholds.

### Objectives

- Provide social assistance over the medium term to eligible beneficiaries whose income and assets fall below the set thresholds by providing income support to:
  - 4.2 million elderly people
  - 1.1 million people with disabilities
  - 13.9 million children
  - 174 063 children with disabilities requiring care and support services
  - 211 361 foster children.

### Subprogrammes

- *Old Age* provides income support to people aged 60 and older earning less than R96 840 (single) and R193 680 (married) a year, whose assets do not exceed R1 372 800 (single) and R2 745 600 (married).
- *War Veterans* provides income support to people who fought in World War II or the Korean War earning less than R96 840 (single) and R193 680 (married) a year, whose assets do not exceed R1 372 800 (single) and R2 745 600 (married).
- *Disability* provides income support to people with permanent or temporary disabilities earning less than R96 840 (single) and R193 680 (married) a year, whose assets do not exceed R1 372 800 (single) and R2 745 600 (married).
- *Foster Care* provides grants for children in foster care.
- *Care Dependency* provides income support to caregivers earning less than R249 600 (single) and R499 200 (married) a year to help them care for children who are mentally or physically disabled.
- *Child Support* provides income support to parents and caregivers of children younger than 18 earning less than R60 000 (single) and R120 000 (married) a year.
- *Grant-in-Aid* provides additional benefit to recipients of the *old age grant, disability grant or war veterans grant* that require regular care.
- *Social Relief of Distress* provides temporary income support, food parcels and other forms of relief to people experiencing undue hardship.

1. An amount of R3.7 billion is expected to be deducted from this programme in line with the Second Adjustments Appropriation Bill tabled with this publication.

## Programme 3: Social Security Policy and Administration

### Programme purpose

Provide for social security policy development and the fair administration of social assistance.

### Objectives

- Enable fair administration of social assistance through the following initiatives by:
  - developing a draft policy on integrating children’s grant beneficiaries with government services, and submitting it to Cabinet for approval by March 2025
  - developing a draft policy on maternal support and submitting it to Cabinet for approval by March 2025
  - developing a draft policy on income support for 18- to 59-year-olds and submitting it to Cabinet for approval by March 2025
  - increasing the percentage of appeals adjudicated within 90 days of receipt to 90 per cent by March 2025
  - producing 1 audit report in each year over the MTEF period on social assistance frameworks and systems
  - submitting the draft policy on voluntary cover for retirement and risk benefits for atypical and informal-sector workers to Cabinet for approval by March 2026
  - developing a draft social security bill and submitting it to Cabinet for approval by March 2025.
- Establish and operationalise the Inspectorate for Social Assistance to ensure the integrity of the social assistance framework by 2024/25.

### Subprogrammes

- *Social Security Policy Development* develops and reviews policies and legislation on social assistance, and contributory income support aimed at protecting households against life cycle contingencies such as the unemployment, ill health, retirement, disability or death of a breadwinner.
- *Appeals Adjudication* seeks to provide a fair and just adjudication service for social assistance appeals.
- *Social Grants Administration* provides for the South African Social Security Agency’s operational costs for administering social grants and the reimbursement of payment contractors.
- *Social Grants Fraud Investigations* funds fraud investigations through the South African Social Security Agency’s special investigations unit.
- *Programme Management* provides for the expenses of the deputy director-general related to social security policy initiatives.

## Programme 4: Welfare Services Policy Development and Implementation Support

### Programme purpose

Create an enabling environment for the delivery of equitable developmental welfare services through the formulation of policies, norms, standards and best practices; and the provision of support to implementing agencies.

### Objectives

- Enable the delivery of quality social welfare services by:
  - monitoring the implementation of the universal treatment curriculum in 12 public substance abuse treatment centres and evaluate the effectiveness of the implementation in 2023/24 and 2024/25
  - improving social welfare services to children and older people by increasing awareness of 30 per cent of the social development sector workforce on the Children’s Amendment Act (2022) in each year over the medium term
  - protecting and promoting the rights of people with disabilities by developing a compliance and monitoring tool for facilities for people with disabilities and training all provinces on the guidelines on respite care services for families of children and persons with disabilities by March 2025
  - implementing prevention and early intervention measures to curb social ills (including gender-based violence and femicide, and substance abuse) among children and young people in 30 campuses per year over the medium term
  - implementing pillar 4 (response, care, support and healing) of the national strategic plan on gender-based violence and femicide by training 45 gender-based violence and femicide hotspot districts on the provision of psychosocial services, and submitting the intersectoral policy on sheltering services to Cabinet by March 2025.

### Subprogrammes

- *Service Standards* ensures the transformation and standardisation of social welfare services through the development and coordination of overarching policies and legislation that promote integrated, quality-driven, professional and accountable service delivery.
- *Substance Abuse* develops, supports and monitors the implementation of policies, legislation, norms and standards for combating substance abuse.
- *Older Persons* develops, supports and monitors the implementation of policies, legislation, norms and standards for the provision of social welfare services to older people.
- *People with Disabilities* promotes the empowerment and rights of people with disabilities through the accelerated mainstreaming of disability considerations and the strengthening of disability-specific services.
- *Children* develops, supports and monitors the implementation of policies, legislation, norms and standards for the provision of social welfare services to children.
- *Families* develops, supports and monitors the implementation of policies, legislation and programmes for services aimed at strengthening families.
- *Social Crime Prevention and Victim Empowerment* develops, supports and monitors the implementation of policies, legislation and programmes aimed at protecting, empowering and supporting victims of crime and violence, including gender-based violence.
- *Youth* develops and facilitates the implementation of policies, legislation and programmes aimed at mobilising, protecting and developing skills among vulnerable young people.
- *HIV and AIDS* develops, supports and monitors the implementation of policies, programmes and guidelines aimed at preventing and mitigating the impact of HIV and AIDS, in line with the 2017-2022 national strategic plan for HIV, TB and STIs.
- *Programme Management* provides for the expenses of the deputy director-general related to the coordination and management of social welfare services.

## Programme 5: Social Policy and Integrated Service Delivery

### Programme purpose

Support community development and promote evidence-based policy making in the department and the social development sector.

### Objectives

- Create an enabling environment for non-profit organisations and increase public trust and confidence in them through effective and fair regulation by March 2024 by:
  - monitoring their compliance with the Non-profit Organisations Act (1997)
  - ensuring that 90 per cent of non-profit organisation registration applications are processed within 2 months of receipt
  - building the capacity of provincial departments to implement the sector funding policy and the non-profit organisation sector payment system.
- Harness the implementation of community development in South Africa with emphasis on the creation of vibrant and sustainable communities by finalising a national community development policy and framework by March 2024.
- Empower communities through community capacity enhancement programmes and link 2 per cent of social grant beneficiaries with economic development opportunities by March 2024.
- Support the provision of nutritious food to the poor and vulnerable by coordinating interventions including centre-based feeding programmes, partnerships with civil society organisations, social partners and other agencies by March 2024.
- Finalise the sustainable livelihoods framework to empower community development practitioners to implement the sustainable livelihoods approach by March 2024.
- Provide evidence-based advisory services on social development policy by developing and disseminating 4 research and policy briefs in each year over the MTEF period.

### Subprogrammes

- *Social Policy Research and Development* provides strategic guidance in terms of evidence-based social policy development, coordination and evaluation.
- *Special Projects and Innovation* provides for the coordination, incubation and innovation of departmental and social cluster initiatives such as the expanded public works programme.
- *Population Policy Promotion* supports, monitors and evaluates the implementation of the 1998 White Paper on Population Policy for South Africa by conducting research on the country's population trends and dynamics; raising awareness on population and development concerns; and supporting and building the technical capacity of national, provincial and local government and other stakeholders to implement population policy strategies.
- *Registration and Monitoring of Non-profit Organisations* registers and monitors non-profit organisations in terms of the Non-profit Organisations Act (1997).
- *Substance Abuse Advisory Services and Oversight* monitors the implementation of policies, legislation, norms and standards aimed at combating substance abuse.
- *Community Development* develops and facilitates the implementation of policies, guidelines, frameworks, norms and standards for ensuring the empowerment of local communities, strengthening the capacity of people as active citizens through their community groups, organisations and networks; and strengthening the capacity of institutions and agencies (public, private and non-governmental) to work with citizens to shape and determine change in their communities.
- *National Development Agency* provides for transfers to the National Development Agency to support civil society organisations in poverty alleviation programmes.
- *Programme Management* provides for the expenses of the deputy director-general related to the coordination and management of community development programmes and initiatives.

#### Entity overview

The National Development Agency is a schedule 3A public entity established in terms of the National Development Agency Act (1998). Its primary mandate is to contribute towards the eradication of poverty and its causes by granting funds to civil society organisations to implement development projects in poor communities.

Over the next 3 years, the agency plans to support on average 3 000 civil society organisations per year by strengthening institutional areas such as governance, compliance, financial management, reporting and conflict resolution; and providing grant funding to stimulate economic activity and create job opportunities in poor communities where these organisations operate. In line with its aim of reducing poverty and developing communities, the agency plans to partner with research and academic institutions to produce 9 research publications and host 15 development policy dialogues over the MTEF period to engage with relevant stakeholders. These are intended to inform the development of policy on job creation, economic development, and training and development. Spending on these activities is expected to amount to R56.9 million over the period ahead.

Expenditure is expected to decrease at an average annual rate of 4 per cent, from R274.3 million in 2022/23 to R242.6 million in 2025/26. Compensation of employees is the main cost driver, spending on which accounts for 64.1 per cent (R475.1 million) of total spending over the medium term. The agency derives almost all of its revenue over the MTEF period from departmental transfers, amounting to R690.4 million. It expects to earn an

additional R6.6 million over the period from interest. Revenue is set to increase in line with spending.

**Entity overview**

The South African Social Security Agency Act (2004) provides for the establishment of the South African Social Security Agency. The agency's objectives are to ensure effective and efficient administration, management and payment of social assistance to qualifying beneficiaries.

The agency expects to increase the number of people receiving social assistance from 19 million in 2022/23, excluding those receiving the *COVID-19 social relief of distress grant*, to 19.6 million in 2025/26. The majority of applications for social grants over this period are expected to be finalised within 1 day, with the exception of the disability grant, which requires appointments with health care practitioners.

Over the MTEF period, the agency will prioritise interventions such as improving financial management to address the findings from internal and external audits; implementing measures to reduce the cost of administering social assistance, including encouraging beneficiaries to move to more cost-effective grant access channels such as retail merchants; building management capacity for a streamlined organisational environment that will help in the fight against fraud and corruption; and migrating to a web-based system.

The agency's project to re-engineer its business processes is expected to be completed in June 2023 at a total cost of R23.9 million. A more suitable operating model and organisational structure are expected to lead to optimised processes, policies and procedures, and build the capacity of staff to operate in a technology-friendly environment. This will be complemented by the implementation of an electronic content management solution

by 2024/25, which is expected to create an electronic repository for the agency's records and automate the management of grant beneficiaries from inception. The solution is estimated to cost R44.6 million.

Total expenditure is expected to amount to R24.2 billion, increasing from R8.2 billion in 2022/23 to R8.3 billion in 2025/26. This nominal increase is mainly due to the *COVID-19 social relief of distress grant* having been discontinued. The agency derives 99.9 per cent (R24.1 billion) of its revenue over the next 3 years through transfers from the department. Revenue is expected to increase at an average annual rate of 3.7 per cent, from R7.4 billion in 2022/23 to R8.3 billion in 2025/26.

Executive authority: Minister of Women, Youth and Persons with Disabilities  
 Accounting officer: Director-General of Women, Youth and Persons with Disabilities  
 Website: [www.women.gov.za](http://www.women.gov.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Lead, coordinate and oversee the transformation agenda for the socioeconomic empowerment, rights and equal treatment of women, youth and persons with disabilities.

### Mandate

The mandate of the Department of Women, Youth and Persons with Disabilities is to regulate the socioeconomic transformation and implementation of the empowerment and participation of women, youth and persons with disabilities.

### Selected performance indicators

1. No historical data available.

## Expenditure overview

Over the MTEF period, the department will continue to focus on addressing gender-based violence and supporting empowerment; promoting responsive planning, budgeting, monitoring and evaluation across government; supporting youth empowerment; and promoting the rights of people with disabilities.

Total expenditure is expected to decrease at an average annual rate of 4.7 per cent, from R991.7 million in 2022/23 to R858.3 million in 2025/26, mainly because allocations to the National Youth Development Agency for the implementation of the presidential employment initiative come to an end in 2023/24. An estimated 76.7 per cent (R2.1 billion) of the department's budget over the medium term is earmarked for transfers and subsidies to the agency and the Commission for Gender Equality.

### **Addressing gender-based violence and supporting empowerment**

The National Council on Gender-Based Violence and Femicide Bill was submitted to Parliament in 2022/23 and the launch of the council is expected in 2023/24. The council will be tasked with coordinating and overseeing the national response to gender-based violence and femicide. The cost for operationalising a lean council is projected at R15 million over the medium term in the *Social Empowerment of Women* subprogramme in the *Mainstreaming Women's Rights and Advocacy* programme. The department will facilitate public awareness and advocacy events, and support and monitor the implementation of the national strategic plan on gender-based violence and femicide. For this purpose, a further R26.4 million over the next 3 years is allocated in the programme's *Economic Empowerment of Women* subprogramme.

With an allocation of R295.3 million over the MTEF period, the Commission for Gender Equality will work towards gender equality by strengthening the legislative environment, public information and education, and investigating issues that undermine gender equality.

### **Promoting responsive planning, budgeting, monitoring and evaluation**

Over the medium term, the department will continue to coordinate, monitor and evaluate the implementation of responsive planning, budgeting, monitoring, evaluation and auditing frameworks across government for women, young people and people with disabilities. It will continue to assess the strategic and annual performance plans of other departments to ensure that they are responsive to policy priorities relating to the rights of women, young people and people with disabilities; and monitor compliance with international commitments on issues pertaining to these groups, as well as develop country reports. An allocation of R29.7 million over the MTEF period is made available for these activities in the *Research and Knowledge Management* subprogramme in the *Monitoring, Evaluation, Research and Coordination* programme.

In each year over the next 3 years, the department plans to conduct 12 stakeholder engagements on the empowerment of women, young people and people with disabilities, and 4 community mobilisation events on national commemoration days. On average, R24 million is allocated in each year over the MTEF period for these

activities in the *International Relations, Stakeholder Management and Capacity Building* subprogramme in the *Monitoring, Evaluation, Research and Coordination* programme.

### Supporting youth empowerment

To advance the socioeconomic empowerment of young people, the department will continue to develop and review policies, legislation and frameworks to guide government and other stakeholders on youth development. Through transfers amounting to an estimated R1.8 billion over the next 3 years, the National Youth Development Agency will continue to support and foster entrepreneurship among young people, and create employment pathways through cross-sectoral collaborations. The agency is allocated a further R250 million in 2023/24 for the national youth service programme, a component of the presidential employment initiative that is aimed at training young people through participation in community services.

### Promoting the rights of people with disabilities

Over the period ahead, the department will continue to advocate for services for people with disabilities. As part of these efforts, it plans to develop the Disability Rights Bill in partnership with the South African Law Reform Commission. For this purpose, R58.1 million is allocated over the medium term in the *Advocacy and Mainstreaming for the Rights of Persons with Disabilities* subprogramme in the *Advocacy and Mainstreaming for the Rights of Youth and Persons with Disabilities* programme.

## Programme 2: Mainstreaming Women's Rights and Advocacy

### Programme purpose

Promote good governance regarding the rights and transformation of the social and economic empowerment of women.

## Objectives

- Advance the socioeconomic empowerment of women on an ongoing basis by:
  - proposing and developing interventions to empower women and encourage their participation in the economy
  - developing interventions to advance gender equality and establish a just and safe society.

## Subprogrammes

- *Management: Advocacy and Mainstreaming for the Rights of Women* provides strategic leadership and management to the programme.
- *Social Empowerment of Women* promotes good governance to further transformation, social justice and the empowerment of women.
- *Economic Empowerment of Women* mainstreams and promotes practices to further transformation, economic justice and the empowerment of women.
- *Commission for Gender Equality* facilitates transfer payments to the Commission for Gender Equality, which promotes gender equality and respect for women's rights.

## Expenditure trends and estimates

## Programme 3: Monitoring, Evaluation, Research and Coordination

### Programme purpose

Provide research, knowledge management, international relations, stakeholder management and monitoring and evaluation for women, youth and persons with disabilities.

### Objectives

- Inform decision-making, policy development and implementation on the socioeconomic empowerment of women, young people and people with disabilities in South Africa in line with national, regional, continental and global development goals by generating, accessing and analysing available data, knowledge, research and information on the implementation of policy and international commitments annually.
- Improve planning, monitoring and evaluation for women, young people and people with disabilities by analysing other departments' plans and performance against priority indicators and targets for the development, facilitation and evaluation of key policies and programmes, and making recommendations for improvement annually.
- Enable the fulfilment of commitments to and effective participation in international multilateral forums on the empowerment of women, young people and people with disabilities towards inclusive, transformed and equitable society by instituting timely reporting and convening consultative workshops with relevant stakeholders annually.
- Ensure that stakeholder relations that contribute to the socioeconomic empowerment of women, young people and people with disabilities are built, strengthened and maintained annually.

### Subprogrammes

- *Management: Monitoring, Evaluation, Research and Coordination* provides strategic leadership and management to the programme.
- *Research and Knowledge Management* provides research and knowledge management services on the rights of women, young people and people with disabilities to encourage transformation in their interests.
- *International Relations, Stakeholder Management and Capacity Building* manages and coordinates the provision of international relations, stakeholder participation and capacity building for women, young people and people with disabilities.
- *Monitoring and Evaluation: Women, Youth and Persons with Disabilities* ensures the effective monitoring and evaluation of policy priorities that encourage transformation in the interests of and empower women, young people and people with disabilities throughout government.

## Programme 4: Mainstreaming Youth and Persons with Disabilities Rights and Advocacy

### Programme purpose

Promote good governance regarding the rights and transformation of the social and economic empowerment of youth and persons with disabilities.

### Objectives

- Promote the development and empowerment of young people by reviewing legislative frameworks to advance their rights over the medium term.
- Support, monitor and coordinate government's implementation of the 2015 White Paper on the Rights of Persons with Disabilities over the MTEF period.

### Subprogrammes

- *Management: Advocacy and Mainstreaming for the Rights of Youth and Persons with Disabilities* provides strategic leadership and management to the programme.
- *Advocacy and Mainstreaming for the Rights of Youth* manages advocacy for and the mainstreaming of rights for young people, their social and economic empowerment, and transformation in their interests. This subprogramme also oversees the performance of the National Youth Development Agency.
- *Advocacy and Mainstreaming for the Rights of Persons with Disabilities* advocates for the mainstreaming of rights for people with disabilities, their social and economic empowerment, and transformation in their interests.
- *National Youth Development Agency* makes transfers to the National Youth Development Agency.

#### Entity overview

The Commission for Gender Equality is an independent statutory body established in terms of section 181 of the Constitution. It is mandated to strengthen and deepen constitutional democracy with a focus on attaining a society free from gender oppression and inequality. Its powers and functions are laid out in section 187 of the Constitution and further prescribed in the Commission for Gender Equality Act (1996), as amended.

Over the medium term, the commission will continue to focus on activities that advance legislation, policies and advocacy that contribute to gender equality. In pursuit of this, the commission plans to engage with relevant stakeholders, conduct outreach programmes for awareness and education, handle complaints, investigate issues that undermine the attainment of gender equality and the empowerment of women, conduct research to inform government's response, and make written submissions to Parliament.

Human capital plays a crucial role in the commission's work because it focuses on research and engagement with stakeholders. As such, spending on compensation of employees accounts for an estimated 66.7 per cent (R205.1 million) of its budget over the MTEF period, increasing from R65.1 million in 2022/23 to R71.4 million in 2025/26 at an average annual rate of 3.1 per cent. The commission derives all of its revenue through transfers from the department, which are set to amount to R295.3 million over the MTEF period.

**Entity overview**

The National Youth Development Agency Act (2008) is the founding legislation of the National Youth Development Agency. The agency's role is to initiate, implement, facilitate and monitor youth development interventions aimed at promoting the empowerment of young people and their participation in economic activities. As such, over the MTEF period, the agency will continue to focus on implementing interventions to support skills development, entrepreneurship and the creation of employment for young people. The interventions will take the form of providing financial and non-financial enterprise support; providing support to transition young people into the formal, informal and social economies; and linking young people to opportunities.

Over the MTEF period, the agency plans to support 10 400 enterprises owned by young people and provide business development interventions to 87 000 young people at a projected cost of R990.9 million through the youth entrepreneurship programme. This accounts for 43.4 per cent of the agency's total projected expenditure over the period ahead. A further R329.3 million is allocated to help young people find sustainable employment opportunities through jobs programmes.

The *national youth service* programme has an allocation of R335.1 million over the medium term to support young people and encourage them to stay engaged in service to their communities and build the spirit of patriotism, solidarity and social cohesion. As part of the presidential employment initiative, the agency has partnered with the Jobs Fund to implement the revitalised national youth service. This funding is expected to provide for project management costs, training and stipends for young people participating in the programme.

The agency expects to derive 84.6 per cent of its revenue over the MTEF period through transfers from the department. Revenue is expected to decrease at an average annual rate of 6 per cent, from R752.2 million in 2022/23 to R618 million in 2025/26, mainly as a result of allocations from the presidential employment initiative coming to an end in 2023/24.

### Vote purpose

Provide strategic advice and support to the Minister of Police. Exercise civilian oversight of the South African Police Service to ensure a transformed and accountable police service that reflects the democratic values and principles of the Constitution of the Republic of South Africa.

### Mandate

The Civilian Secretariat for the Police Service was established in terms of the Civilian Secretariat for Police Service Act (2011) and section 208 of the Constitution, which provides for the establishment of a civilian secretariat for the police service to function under the direction of the Minister of Police. In terms of the act, the secretariat's mandate is to conduct civilian oversight of the police service and provide policy and strategic support to the minister, including administrative support for international obligations. The act also makes the secretariat responsible for monitoring the implementation of the Domestic Violence Act (1998) by the South African Police Service.

### Selected performance indicators

Table 21.1 Performance indicators by programme and related priority

Indicator	Programme	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of anti-crime campaigns conducted per year	Intersectoral Coordination and Strategic Partnerships	Priority 6: Social cohesion and safer communities	8	3 <sup>1</sup>	8	3	3	3	3
Number of national policing policies submitted to the Secretary for the Police Service for approval per year <sup>2</sup>	Legislation and Policy Development		2	1	1	1	1	1	1
Number of bills submitted to the minister for approval per year	Legislation and Policy Development		4	3	5	2	2	2	2
Number of police oversight initiatives undertaken per year <sup>2</sup>	Civilian Oversight, Monitoring and Evaluations		2	3	4	2	2	3	3
Number of assessments of the implementation of and compliance with the Domestic Violence Act (1998) by the South African Police Service conducted per year <sup>2</sup>	Civilian Oversight, Monitoring and Evaluations		2	2	2	2	2	2	2

1. Outcome revised from 5 to 3 in the department's 2021/22 annual report.

2. Indicator revised to align with the department's draft 2023/24 annual performance plan.

## Expenditure overview

Over the medium term, the department will continue to develop policies and legislation for the police sector; facilitate events such as imbizos and public participation programmes to encourage community participation in the fight against crime; and assess and monitor the performance of the police service in relation to its constitutional mandate and other legal prescripts affecting its work, such as the Domestic Violence Act (1998).

The department plans to finalise 6 bills over the medium term – the South African Police Service Amendment Bill, the Independent Police Investigative Directorate Amendment Bill, the Stock Theft Amendment Bill, the Firearms Control Amendment Bill, the Second-hand Goods Amendment Bill and the Civilian Secretariat for Police Service Amendment Bill. The Criminal Law (Forensic Procedures) Amendment Bill and the Protection of Constitutional Democracy Against Terrorist and Related Activities Amendment Bill, which were finalised in 2022/23, are expected to be enacted over the period ahead.

The department also plans to consult on and finalise the development of the national policing policy over the medium term, which will entail reviewing existing policing policy to identify gaps and make policy proposals to fast-track the transformation and professionalisation of the police service. It will also continue to work with key stakeholders such as the Presidency, the Department of Cooperative Governance and premiers' offices to facilitate the implementation of the integrated crime and violence prevention strategy. All of this work will be carried out in the *Legislation and Policy Development* programme, which has a budget of R73.6 million over the MTEF period.

The department aims to facilitate 24 imbizos and public participation programmes in municipalities over the next 3 years, and conduct 3 anti-crime campaigns per year to enhance communities' awareness of crime prevention and other interventions such as community policing and safety forums. Expenditure for these activities is within an allocation of R83.3 million over the MTEF period in the *Intersectoral Coordination and Strategic Partnerships* programme.

As part of its efforts to transform and improve case management in the police related to gender-based violence, the department aims to assess and compile 2 reports per year over the medium term on the South African Police Service's implementation of and compliance with the Domestic Violence Act (1998). Expenditure for this is within the *Civilian Oversight, Monitoring and Evaluations* programme's medium-term allocation of R104.6 million.

Total expenditure is set to increase at an average annual rate of 2.5 per cent over the MTEF period, from R155.9 million in 2022/23 to R168.1 million in 2025/26. This is mainly due to the allocation of an additional R11.2 million for compensation of employees, which constitutes 70.7 per cent of the total budget and remains the department's largest cost driver, increasing at an average annual rate of 2.3 per cent, from R110.8 million in 2022/23 to R118.6 million in 2025/26. The number of personnel in the department is expected to increase from 162 in 2023/24 to 166 in 2025/26, although new staff members will be employed at lower salary notches than their predecessors to save costs. The department has 28 posts additional to the establishment, mainly due to the appointment of cleaning and security personnel on a contract basis following the relocation to a new and bigger office building in April 2022. The average cost for these posts is about R3 million per year.

## Programme 2: Intersectoral Coordination and Strategic Partnerships

### Programme purpose

Manage and encourage national dialogue on community safety and crime prevention.

### Objectives

- Contribute to creating a safe and secure environment for society through ongoing partnerships with stakeholders such as community safety forums and community policing forums by:

- conducting 24 imbizos and public participation programmes with communities over the medium term to promote community safety
- conducting 3 anti-crime campaigns per year over the medium term.

## Subprogrammes

- *Intergovernmental, Civil Society and Public-Private Partnerships* manages and facilitates intergovernmental, civil society and public partnerships.
- *Community Outreach* promotes, encourages and facilitates community participation in safety programmes.

## Programme 3: Legislation and Policy Development

### Programme purpose

Develop policy and legislation for the police sector, and conduct research on policing and crime.

### Objectives

- Provide for constitutionally compliant legislation, research and evidence-led policies for policing and public safety over the medium term by:
  - finalising 1 policy per year for approval by the Secretary for the Police Service
  - submitting 2 bills per year for approval by the Minister of Police.

### Subprogrammes

- *Policy Development and Research* develops policies and undertakes research in various areas of policing and crime.
- *Legislation* produces legislation for effective policing, and provides legal advice and legislative support to the Minister of Police and the Secretary for the Police Service.

## Programme 4: Civilian Oversight, Monitoring and Evaluations

### Programme purpose

Oversee, monitor and report on the performance of the South African Police Service. Provide for the functions of the Office of the Judge for the Directorate for Priority Crime Investigation, and the National Forensic Oversight and Ethics Board.

### Objectives

- Provide effective oversight, monitoring and evaluation that contributes to an accountable and transformed police service by:
  - conducting regular oversight visits at selected police stations over the medium term and compiling 8 reports on the outcomes of these visits for approval by the Secretary for the Police Service
  - compiling 2 compliance reports on the implementation of Independent Police Investigative Directorate recommendations to the South African Police Service in each year over the medium term for approval by the Secretary for the Police Service.

### Subprogrammes

- *Police Performance, Conduct and Compliance* monitors the performance, conduct and transformation of the South African Police Service, and its compliance with policing legislation and regulations.
- *Policy and Programme Evaluations* evaluates the effectiveness of all crime prevention and other programmes implemented by the South African Police Service.
- *Office of the Directorate for Priority Crime Investigation Judge* funds the operations of the Office of the Judge for the Directorate for Priority Crime Investigation, which investigates complaints by any member of the public and/or the Directorate for Priority Crime Investigation, in terms of sections 17L(4)(a) and 17L(4)(b) of the South African Police Service Amendment Act (2012).
- *National Forensic Oversight and Ethics Board* funds the operations of the National Forensic Oversight and Ethics Board, which oversees processes relating to the collection, retention, storage, destruction and disposal of DNA samples.

*The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).*

### Vote purpose

*Contribute to a just, peaceful and safer South Africa through the effective and humane incarceration of inmates and the rehabilitation and social reintegration of offenders.*

### Mandate

The Department of Correctional Services derived its mandate from the Correctional Services Act (1998), as amended; the Criminal Procedure Act (1977); the 2005 White Paper on Corrections; and the 2014 White Paper on Remand Detention Management in South Africa. This legislation requires the department to contribute to maintaining and promoting a just, peaceful and safe society by correcting offending behaviour in a safe, secure and humane environment, thus facilitating optimal rehabilitation and reducing the likelihood of repeat offending.

### Selected performance indicators

**Table 22.1 Performance indicators by programme and related priority**

Indicator	Programme	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Percentage of inmates who escape from correctional facilities per year	Incarceration	Priority 6: Social cohesion and safer communities	0.022% (34/ 154 449)	0.083% (117/ 140 948)	0.015% (22/ 143 223)	0.031%	0.030%	0.029%	0.028%
Percentage of inmates injured as a result of reported assaults in correctional facilities per year	Incarceration		3.7% (5 714/ 154 449)	4.04% (5 699/ 140 948)	2.61% (3 738/ 143 223)	4.55%	4.5%	4.45%	4.4%
Percentage of overcrowding in correctional facilities in excess of approved bed space capacity per year	Incarceration		28% (33 945/ 120 567)	27% (30 112/ 110 836)	32% (34 419/ 108 804)	32%	45% <sup>1</sup>	45%	45%
Percentage of sentenced offenders with correctional sentence plans who complete correctional programmes per year	Rehabilitation		99% (94 694/ 95 747)	77% (64 399/ 84 159)	90% (78 148/ 86 459)	80%	84% <sup>2</sup>	84%	84%

**Table 22.1 Performance indicators by programme and related priority (continued)**

Indicator	Programme	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Percentage of offenders participating in long occupational skills programmes per year	Rehabilitation	Priority 6: Social cohesion and safer communities	99% (3 925/ 3 978)	95% (7 161/ 7 506)	99% (39 560/ 39 846)	90%	90%	90%	90%
Percentage of viral load suppression (at 12 months) of HIV-positive offenders per year	Care		90% (14 831/ 16 401)	91% (3 104/ 3 415)	91% (1 034/ 1 134)	91%	91%	91%	91%
Percentage of parolees without violations per year	Social Reintegration		99% (52 742/ 53 257)	99% (51 901/ 52 275)	99% (51 586/ 52 054)	97%	97%	97%	97%
Percentage of probationers without violations per year	Social Reintegration		99% (12 471/ 12 604)	99% (7 530/ 7 597)	99% (7 714/ 7 803)	97%	97%	97%	97%

1. Target revised upwards due to the consistent increase in the inmate population in 2022/23.

2. Target revised upwards due to the department exceeding the target in 2021/22.

## Expenditure overview

The department is committed to creating safe, secure and dignified conditions for inmates and department personnel, and ensuring that the public is safe. To this end, the department carries out activities involving security operations, the provision and maintenance of appropriate facilities, remand detention, offender management, the proper administration and profiling of inmates, and the consideration of offenders for release or placement into the system of community corrections. Accordingly, over the medium term, the department will focus on providing adequate security and security equipment at correctional facilities; improving facilities; offering effective rehabilitation programmes, which includes implementing the self-sufficiency and sustainability framework; and successfully reintegrating offenders into society.

The department's expenditure is expected to increase at an average annual rate of 2.3 per cent, from R26.5 billion in 2022/23 to R28.4 billion in 2025/26. Allocations to the *Incarceration* programme account for 58.8 per cent (R48 billion) of its budget over the next 3 years. Compensation of employees accounts for 67.2 per cent of the department's budget over the medium term.

### **Providing adequate security and security equipment at correctional facilities**

Over the next 3 years, the department aims to keep the percentage of escapes at or below 0.031 per cent and the percentage of injuries at less than 4.6 per cent. To achieve this, it will enhance its security operations by providing personnel with appropriate equipment, including body armour, ammunition, leg irons, handcuffs, metal detectors, tonfas, gas or fire filters, pepper spray, neutralisers and mobile parcel scanners. To provide for this, R24.7 billion is allocated in the *Security Operations* subprogramme in the *Incarceration* programme.

### **Improving facilities**

To continue implementing strategies to reduce expected overcrowding in correctional facilities, over the next 3 years, the department will provide for the construction and refurbishment of facilities. This will ensure that a targeted 1 000 additional bed spaces are made available over the next 3 years. Funding for this is provided through the *Facilities* subprogramme, which is allocated R13.8 billion in the *Incarceration* programme.

### **Effective rehabilitation**

The department will continue to ensure that all sentenced offenders are provided with effective rehabilitation programmes to enable their successful reintegration into society. In its efforts to achieve this, the department will implement programmes that focus on addressing the underlying causes of offending behaviour, providing educational and vocational training to offenders to improve their life skills and employability upon release, and continuing to implement the self-sufficiency and sustainability framework. The framework is intended to guide the department towards finding innovative ways to generate its own revenue and contribute to economic development while upskilling and rehabilitating offenders. Implementing the framework primarily entails running production workshops and agricultural farms where offenders are trained to produce items – such as furniture, uniforms, shoes, baked goods and agricultural products – that can be sold or used within the

department. The department plans to supplement these potential income streams by hiring out offender labour.

The percentage of sentenced offenders on correctional sentence plans is expected to remain at 84 per cent over the period ahead, and 90 per cent of offenders are expected to participate in occupational skills programmes. All funding related to the rehabilitation of offenders is provided through the *Rehabilitation* programme, which has a total budget of R7 billion over the next 3 years.

### Reintegrating offenders into society

In its efforts to enable the effective reintegration of offenders into society, the department provides aftercare support through the facilitation of programmes and skills that seek to assist parolees and former offenders to be self-sufficient. To reintegrate offenders into the system of community corrections, all parole considerations should include victim participation to provide a platform for dialogue between offenders and victims, and thereby contribute to healing and restoration. The department plans to increase the number of victims participating in dialogues and other restorative justice programmes from 4 100 in 2022/23 to 5 900 in 2025/26. These activities are carried out through an allocation of R5.1 billion in the *Social Reintegration* programme.

## Programme 2: Incarceration

### Programme purpose

Provide for safe and secure conditions of detention consistent with maintaining the human dignity of inmates. Administer, profile and consider offenders for release or placement into the system of community corrections.

## Objectives

- Enhance safety and security in correctional centres and remand detention facilities over the medium term by maintaining the percentage of:
  - escapes at or below 0.031 per cent
  - inmates injured as a result of reported assaults at less than 4.6 per cent
  - confirmed unnatural deaths in correctional facilities at 0.032 per cent.
- Provide facilities that contribute to humane incarceration by ensuring:
  - overcrowding remains at or below 45 per cent over the medium term
  - that 4 infrastructure projects are completed by 2023/24.
- Provide effective and efficient remand detention system consistent with human rights in a safe and secure environment by ensuring that 80 per cent of remand detainees are subjected to continual risk assessment over the medium term.

## Subprogrammes

- *Security Operations* funds activities aimed at providing safe and secure conditions for inmates, consistent with human dignity.
- *Facilities* provides physical infrastructure that supports safe custody, humane conditions and the provision of correctional and development programmes, care and general administration.
- *Remand Detention* ensures an effective and efficient remand detention system consistent with human rights in a safe and secure environment.
- *Offender Management* funds administrative activities and operations for correctional services that create an environment that supports the rehabilitation and safety of offenders. This subprogramme also funds the activities of correctional supervision and parole boards, and ensures that eligible offenders are considered for parole through cases submitted by case management committees.

## Programme 3: Rehabilitation

### Programme purpose

Provide offenders with needs-based programmes and interventions to facilitate their rehabilitation and enable their social reintegration.

### Objectives

- Improve access to rehabilitation and developmental interventions over the medium term by ensuring that:
  - 84 per cent of sentenced offenders with correctional sentence plans complete correctional programmes
  - 90 per cent of offenders meet the qualifying criteria for registration in long and short occupational skills programmes
  - 90 per cent of offenders participate in further and general education and training programmes
  - the pass rate of offenders who write the grade 12 national senior certificate examinations remains at 77 per cent for 2023/24 and 2024/25 and increases to 78 per cent in 2025/26.
- Enhance self-sufficiency over the medium term by ensuring that:
  - 90 per cent of offenders participate in agricultural initiatives
  - 80 per cent of offenders participate in production workshops.
- Enhance the social functioning and reintegration of offenders into communities by increasing the percentage of:
  - offenders, parolees and probationers receiving social work services from 58 per cent in 2023/24 to 62 per cent in 2025/26
  - inmates receiving spiritual care services from 84 per cent in 2023/24 to 88 per cent in 2025/26

- inmates receiving psychological care services from 23 per cent in 2023/24 to 25 per cent in 2025/26.

## Subprogrammes

- *Correctional Programmes* provides needs-based correctional programmes targeting offending behaviour based on the correctional sentence plans of offenders. The aim of this subprogramme is to raise awareness, provide information and develop life skills.
- *Offender Development* provides offenders with needs-based programmes and interventions to facilitate their rehabilitation and personal development.
- *Psychological, Social and Spiritual Services* manages and ensures the rendering of needs-based psychological, social work and spiritual services to inmates and people under correctional supervision. The aim of this subprogramme is to improve health and emotional wellbeing, and assist offenders with their rehabilitation and reintegration into communities.

## Programme 4: Care

### Programme purpose

Provide needs-based care services for the personal wellbeing of all inmates in the department's custody.

### Objectives

- Maintain the health and personal wellbeing of inmates over the medium term by:
  - maintaining the viral load suppression rate of HIV-positive offenders at 91 per cent
  - maintaining the pulmonary cure rate of TB-positive offenders at 91 per cent

– screening 90 per cent of inmates for diabetes and hypertension.

- Ensure that inmates with special dietary needs are catered for by providing therapeutic diets to 12 per cent of inmates over the medium term.

## Subprogrammes

- *Nutritional Services* provides inmates with appropriate nutritional services during their incarceration.
- *Health and Hygiene Services* ensures that inmates are provided with appropriate access to health care and hygiene services.

## Programme 5: Social Reintegration

### Programme purpose

Provide effective supervision for offenders placed under the system of community corrections, and facilitate their social reintegration into communities.

### Objectives

- Improve the effectiveness of the parole system by:
  - maintaining the percentage of parolees and probationers without violations at 97 per cent over the medium term
  - increasing the number of victims participating in restorative justice programmes from 4 700 in 2023/24 to 5 900 in 2025/26
  - increasing the number of offenders, parolees and probationers participating in restorative justice programmes from 3 500 in 2023/24 to 4 500 in 2025/26
  - increasing the number of economic opportunities facilitated for offenders, parolees and probationers from 48 in 2023/24 to 60 in 2025/26
  - increasing the number of parolees and probationers participating in community initiatives from 6 600 in 2023/24 to 7 000 in 2025/26.

### Subprogrammes

- *Supervision* provides effective supervision for offenders placed under correctional and parole supervision in order to enhance public safety.
- *Community Reintegration* provides and facilitates support systems for the reintegration of offenders into society.
- *Office Accommodation: Community Corrections* funds 218 community corrections offices (including satellite offices and service points) to enhance community reintegration.

### Vote purpose

*Defend and protect the Republic of South Africa, its territorial integrity and its people, in accordance with the Constitution and the principles of international law regulating the use of force.*

### Mandate

The Department of Defence derives its mandate from section 200 of the Constitution; the Defence Act (2002), as amended by the Defence Amendment Act (2010); the 1996 White Paper on Defence; and the 2015 South African Defence Review. The department is required to provide, manage, prepare and employ defence capabilities that are commensurate with South Africa's needs.

### Selected performance indicators

## Expenditure overview

Over the medium term, the department will continue to focus on protecting the country's people and territorial integrity through internal and external operations such as safeguarding its borders, providing maritime security, and providing support to the South African Police Service and other peace-support operations in the Democratic Republic of the Congo and Mozambique.

The department is allocated an additional R3.1 billion over the period ahead to enhance border security (air, land and maritime) and territorial integrity. This allocation is expected to provide for the procurement of prime mission equipment and technology that will serve as a force multiplier in internal and external operations, as well as repair and maintain navy defence systems to improve maritime security. An additional R850 million is allocated in 2023/24 to support the deployment of the South African National Defence Force in Mozambique through Operation Vikela, on condition that personnel are deployed there beyond 2022/23.

Over the MTEF period, the South African National Defence Force will continue to maintain 15 landward subunits to facilitate border safeguarding in Free State, KwaZulu-Natal, Limpopo, Mpumalanga, Northern Cape and North West. Additional investments in vehicle and technology enhancements to maximise the impact of the subunits in reducing transnational crimes, the illegal flow of undocumented migrants and illicit economic activities are expected to amount to R500 million in 2024/25 and R200 million in 2025/26 in the *Force Employment* programme.

To ensure maritime safety, in each year over the period ahead, the South African Navy will continue to conduct a targeted 4 coastal patrols and spend 8 000 hours at sea. The additional allocation of R1 billion in 2023/24 to procure or upgrade the medium air transport capability is expected to ensure that 12 000 hours are flown per year over the medium term. This will enhance the South African National Defence Force's capability to transport troops and equipment during urgent internal and external deployments.

As the department's work is labour intensive, an estimated 61.6 per cent (R127.3 billion) of its budget over the medium term is allocated to compensation of employees, including an additional R2.5 billion for cost-of-living adjustments. To ensure the department remains within the expenditure ceiling for compensation of employees, it will continue to implement various human resource reforms over the medium term. These include the implementation of the voluntary severance packages for South African National Defence Force personnel at an estimated cost of R800 million in 2023/24, reducing the number of reserve force person days to 1.9 million per year, recruiting military skills development system intakes every alternate calendar year, and capping the annual increases of regimental and operational allowances.

In consultation with the department, National Treasury conducted a spending review in 2021/22 that highlighted the need for efficiency improvements in the management of commuted overtime. In response to this, R188.2 million is reprioritised over the next 3 years from compensation of employees in the *Military Health Support* programme towards payments for capital assets – such as ambulances, X-ray machines and deployable field medical equipment – within the same programme.

## Programme 2: Force Employment

### Programme purpose

Provide and employ defence capabilities, including an operational capability, to successfully conduct all operations as well as joint, interdepartmental, interagency and multinational military exercises.

### Objectives

- Ensure successful joint force employment by:
  - providing and employing a special operations capability in accordance with national requirements by

## March 2026

- ensuring full participation in the number of peace missions instructed by the president by March 2026
- conducting 7 joint interdepartmental, interagency and multinational military force preparation exercises, excluding Special Forces exercises, by March 2026
- conducting internal operations in the interest of protecting the territorial integrity and sovereignty of South Africa on an ongoing basis
- supporting other government departments and complying with international obligations on an ongoing basis.

## Subprogrammes

- *Strategic Direction* formulates and controls strategies, policies and plans for the employment of forces to promote peace, stability and security in the region and on the continent.
- *Operational Direction* provides operational direction to joint and multinational task forces and joint tactical headquarters through an operational-level headquarters.
- *Special Operations* provides and employs a special operations capability within the approved Special Forces mandate for the South African National Defence Force.
- *Regional Security* provides for the external deployment of forces in support of South Africa's commitment to regional, continental and global security.
- *Support to the People* provides for the internal deployment of forces in support of the South African Police Service and other government departments. This includes border safeguarding, assistance during disaster situations, and search and rescue missions.

## Programme 3: Landward Defence

### Programme purpose

Provide prepared and supported landward defence capabilities for the defence and protection of South Africa.

### Objectives

- Defend and protect South Africa and its territory over the medium term by:
  - providing 1 infantry capability for external deployment and for internal safety and security, including border safeguarding per year
  - exercising 1 tank and armoured car capability and providing 1 squadron for internal deployment per year
  - exercising 1 composite artillery capability and providing 1 battery for internal deployment per year
  - exercising 1 air defence artillery capability and providing 1 battery for internal deployment per year

- providing 1 sustained composite engineer capability for external deployment, and for internal safety and security; and exercising 1 field engineer capability per year
- providing 1 signal capability for external deployment and for internal signal support, and exercising 1 composite signal capability per year.

## Subprogrammes

- *Strategic Direction* directs, orchestrates and controls the South African Army in achieving its mission to prepare and provide supported landward capabilities for the defence and protection of South Africa.
- *Infantry Capability* provides combat-ready infantry capabilities through training, preparing, exercising and supporting mechanised, motorised, specialised and airborne infantry units.
- *Armour Capability* provides combat-ready armour capabilities through training, preparing, exercising and supporting tank and armoured car units.
- *Artillery Capability* provides combat-ready artillery capabilities through training, preparing, exercising and supporting composite and light artillery units.
- *Air Defence Artillery Capability* provides combat-ready air defence artillery capabilities through training, preparing, exercising and supporting air defence artillery units.
- *Engineering Capability* provides combat-ready engineering capabilities to ensure mobility and establish infrastructure during exercises and deployments through training, preparing, exercising and supporting field and construction engineer units.
- *Operational Intelligence* provides combat-ready operational intelligence capabilities to enable the successful planning and execution of operations through training, preparing, exercising, and supporting intelligence units.
- *Command and Control Capability* provides combat-ready tactical command and control capabilities for integrated forces during force preparation and employment.
- *Support Capability* provides first-line, second-line and third-line support capabilities to units and bases, and ensures support to deployed combat units through training, preparing, exercising and supporting first-line and second-line maintenance units and workshops.
- *General Training Capability* provides general training capabilities through basic military training, junior leader training, common landward training, and command and management training at the training depot and decentralised units, the South African Army Gymnasium, the combat training centre and the South African Army College.
- *Signal Capability* provides combat-ready signal capabilities to ensure command, control and communications during exercises and deployments through training, preparing, exercising and supporting signal units.

## Programme 4: Air Defence

### Programme purpose

Provide prepared and supported air defence capabilities for the defence and protection of South Africa.

### Objectives

- Defend and protect South Africa and its airspace over the medium term by providing:
  - 4 helicopter squadrons and 1 combat support helicopter squadron per year
  - 3 medium transport squadrons (1 VIP squadron, 1 maritime and transport squadron and 1 light transport squadron) and 9 reserve squadrons per year
  - 1 air combat squadron per year
  - ongoing 24-hour air command and control capability.

### Subprogrammes

- Strategic Direction* provides strategic direction to the programme by formulating and controlling strategies, policies and plans through the air force office to prepare and provide the capabilities required by the Chief of the South African National Defence Force.
- Operational Direction* provides operational direction to the programme by means of an air command.
- Helicopter Capability* provides and sustains operationally ready light utility helicopters, medium transport helicopters and combat support helicopters crewed by appropriately qualified personnel.
- Transport and Maritime Capability* provides and sustains operationally ready transport and maritime aircraft crewed by appropriately qualified personnel.
- Air Combat Capability* provides and sustains operationally ready fighter aircraft crewed by appropriately qualified personnel.
- Operational Support and Intelligence Capability* prepares, develops, provides and supports protection, intelligence systems and counterintelligence support to the South African Air Force through protection squadrons, intelligence subsystems and intelligence training.
- Command and Control Capability* supplies and maintains operationally ready command and control elements in support of air battle space operations.
- Base Support Capability* provides air base infrastructure facilities to squadrons and resident units on bases, including the maintenance of all relevant systems and personnel, to support flying operations.
- Command Post* renders command and control over all missions flown.
- Training Capability* provides for the general education, training and development of air force personnel.
- Technical Support Services* establishes, maintains and prepares optimised technical and tactical logistic support capabilities to provide support to system groups and manage air service units.

## Programme 5: Maritime Defence

### Programme purpose

Provide prepared and supported maritime defence capabilities for the defence and protection of South Africa.

### Objectives

- Defend and protect South Africa and its maritime zones over the medium term by providing:
  - a surface combat and patrol capability of 3 frigates, 1 combat support vessel, 2 offshore patrol vessels and 3 inshore patrol vessels per year
  - a subsurface combat capability of 2 submarines per year
  - a mine warfare capability of 2 vessels in each annual operational cycle to ensure safe access to South Africa's harbours and mine clearance, where required
  - a maritime reaction squadron capability, comprising an operational boat division, an operational diving division and a naval reaction division per year
  - ongoing hydrographic survey capability to ensure safe navigation by charting areas and to meet international obligations.

### Subprogrammes

- Maritime Direction* provides strategic direction to the programme by formulating and controlling strategies, policies, plans and advice to prepare and provide maritime defence capabilities.
- Maritime Combat Capability* provides mission-ready and supported maritime combat capabilities in accordance with the approved force design of the department.
- Maritime Logistic Support Capability* sustains the availability of the force structure elements in the naval force design to ensure compliance with ordered operational commitments.
- Maritime Human Resources and Training Capability* ensures that the maritime combat and support capability requirements are met in terms of qualified personnel.
- Base Support Capability* provides a general base support capability to ships and submarines, shore units and other identified clients to ensure that the fleet complies with the specified operational readiness levels.

## Programme 6: Military Health Support

### Programme purpose

Provide prepared and supported health capabilities and services for the defence and protection of South Africa.

### Objectives

- Ensure prepared and supported health capabilities and services by providing:
  - a health support capability of 5 medical battalion groups and 1 specialist medical battalion group for deployed and contingency forces over the medium term
  - a comprehensive, multidisciplinary military health service to a projected patient population of 302 000 principal members and their beneficiaries per year.

### Subprogrammes

- *Strategic Direction* formulates strategy, policies and plans; and provides advice from the Surgeon-General's office to prepare and provide the capabilities required by the Chief of the South African National Defence Force.
- *Mobile Military Health Support* provides health-support elements for deployed and contingency forces, and provides health services to provincial hospitals and the Department of Health as and when ordered.
- *Area Military Health Service* provides a comprehensive, self-supporting, multidisciplinary geographic military health service through a formation headquarters and commanding and controlling military health units to ensure a healthy military community. The military hospitals also attend to health care activities, medical support and health activities in the specialist aviation environment.
- *Specialist/Tertiary Health Service* provides a specialist health service to develop and maintain tertiary military health capabilities within the parameters of relevant legislation, as contained in the South African military health service strategy.
- *Military Health Product Support Capability* provides for warehousing pharmaceuticals, sundries, military health mobilisation equipment and unique stock; the procurement of military health products, materials and services; and an asset management service, military health product systems and cooperative common military health logistics.
- *Military Health Maintenance Capability* provides general base support services to identified military health service units to sustain and maintain the approved force design and structure.
- *Military Health Training Capability* provides a military health training service to develop and maintain military health training capabilities within the parameters of relevant legislation and policies.

## Programme 7: Defence Intelligence

### Programme purpose

Provide defence intelligence and counterintelligence capabilities, and defence diplomacy administrative support to the department.

### Objective

- Provide intelligence and counterintelligence capabilities, a defence intelligence service and defence diplomacy administrative support to the department by March 2026.

### Subprogrammes

- *Operations* provides timely defence prediction, intelligence and counterintelligence capabilities and services.
- *Defence Intelligence Support Services* provide defence diplomacy capability.

## Programme 8: General Support

### Programme purpose

Provide general support capabilities and services to the department.

### Objectives

- Provide ongoing logistics services to the department in terms of warehousing for ammunition, main equipment and stores; and provide the defence works capability, the capital works programme and the defence facility refurbishment programme by ensuring:
  - appropriate, ready and sustained centralised common matériel management to the department
  - appropriate, ready and sustained centralised facilities management to the department
  - appropriate, ready and sustained centralised common logistics services and movement management to the department
  - sound logistics strategic direction to the department.
- Provide command and management information systems and related services to the department over the medium term by providing:
  - strategic direction and staff support services to the general support division
  - integrated ICT solutions and enablers
  - an information warfare strategic direction capability
  - maintenance and support for information systems.
- Provide a military policing capability to the department over the medium term by:
  - investigating new and backlog criminal cases reported
  - conducting planned crime prevention operations
  - sustaining 4 regional headquarters, 22 area offices and 22 detachments for crime prevention and the investigation of criminal cases
  - investigating reported corruption and fraud cases
  - sustaining a provost company for operational deployments
  - sustaining 2 military correctional facilities for detention and rehabilitation.

### Subprogrammes

- *Joint Logistic Services* provides logistics services to the department in terms of warehousing for ammunition, main equipment and stores. It also provides the defence works capability, the capital works programme and the defence facility refurbishment programme.
- *Command and Management Information Systems* provides command and management information systems and related services to the department.
- *Military Police* provides a military policing capability to the department.

- *Technology Development* provides for establishing and sustaining selected science and technology capabilities in the defence industry.
- *Departmental Support* provides for the payment of corporate departmental obligations such as transfer payments to public entities, legal fees, external audits and bank charges.

Percentage of technology requirements executed per year	Management of strategic facilities: Research and development	Priority 6: Social cohesion and safer communities	100% (R251.7m)	97.5% (R232m/ R238m)	97.9% (R126.6m/ R129.4m)	95%	95%	95%	95%
Value of defence industrial participation credits awarded in terms of contractually agreed milestones per year	Management of defence matériel acquisition		R116.3m	R95.8m	R260m	R111.3m	R84m	R23m	R23m

#### Entity overview

The Armaments Corporation of South Africa derives its mandate from the Armscor Act (2003). Its mission is to meet the acquisition, maintenance and disposal needs of the Department of Defence and other clients in terms of defence matériel and related products and services. In this way, the corporation maintains strategic capabilities and technologies and promotes the local defence-related industry, ensuring that the South African National Defence Force receives quality equipment to carry out its mandate.

Over the medium term, the corporation will continue to focus on meeting the department's defence matériel requirements, as well as its requirements pertaining to technology, research, development, analysis, tests and evaluation. To meet these requirements, the corporation will aim to ensure that 95 per cent of the department's capital and technology requirements over the medium term are converted into orders placed and executed. To achieve these targets, spending is projected at R1.5 billion over the medium term.

As part of the corporation's efforts to improve its viability and efficiency, as well as to remain within the expenditure ceiling for compensation of employees, 109 personnel took voluntary severance packages in 2021/22. The majority of vacant posts resulting from this will not be filled as they are not considered critical to the corporation's core functions, and therefore this decrease is not expected to have an impact on the corporation's performance. Critical posts will be filled. Spending on compensation of employees is set to increase nominally, at an average annual rate of 6.4 per cent, from R1.1 billion in 2022/23 to R1.3 billion in 2025/26.

The corporation is set to derive 68.7 per cent (R6.2 billion) of its revenue through transfers from the department, increasing at an average annual rate of 3.2 per cent, from R1.5 billion in 2022/23 to R1.6 billion in 2025/26. The remainder is set to be derived through interest from investments, and will be used to finance operational expenditure, administrative expenses, training, building maintenance, and other goods and services.

Indicator	Programme/Objective/Activity	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Gross revenue generated per year	Increased public profile and positive perception across all sectors of the community	Priority 6: Social cohesion and safer communities	R5.5m	R5.7m	R8.7m	R10m	R10.5m	R9.1m	R9.8m
Number of visitors to the Castle of Good Hope per year	Maximising the tourist potential of the Castle of Good Hope		195 054	14 522	33 452	120 000	125 000	130 000	170 000
Number of interns hosted at the Castle of Good Hope per year	Increased public profile and positive perception across all sectors of the community	Priority 2: Economic transformation and job creation	23	4	7	12	12	12	14

**Entity overview**

The Castle Control Board primarily derives its mandate from the Castle Management Act (1993), which requires it to preserve and protect the military and cultural heritage of the Castle of Good Hope. Aspects of the board’s mandate are also derived from the Defence Endowment Property and Account Act (1922) and the National Heritage Resources Act (1999).

Over the medium term, the board aims to implement its revenue optimisation strategy with the aim of maintaining its viability as a self-sufficient entity. The primary means of achieving this goal is to optimise the heritage tourism potential of the Castle of Good Hope and increase its accessibility to the broader public.

Accordingly, key activities over the medium term include delivering a comprehensive range of visitor services. These include an improved tourist guide script, better curated museums and exhibitions, an upgraded information centre and website, better and clearer signage to allow for effective self-guided tours and directions to the site, and an improved security system in and around the precinct to ensure the safety and wellbeing of all visitors. As a result, the number of visitors to the Castle of Good Hope is expected to increase from 120 000 in 2022/23 to 170 000 in 2025/26. An estimated R826 000 over the next 3 years is allocated for these activities.

As a self-sustaining entity, the board generates all of its own revenue. However, during the previous MTEF period, the board received funding from the department to alleviate the impact of the COVID-19 pandemic on its capacity to generate revenue. Spending over the medium term is expected to decrease at an average annual rate of 0.5 per cent, from R10 million in 2022/23 to R9.8 million in 2025/26, as transfers from the department come to an end in 2023/24. Revenue from operating activities is expected to increase at an average annual rate of 35 per cent, from R4 million in 2022/23 to R9.8 million in 2025/26, due to the expected increase in the number of visitors.

Executive authority: Minister of Police  
 Accounting officer: Executive Director of the Independent Police Investigative Directorate  
 Website: [www.ipid.gov.za](http://www.ipid.gov.za)

The Estimates of National Expenditure is available at [www.treasury.gov.za](http://www.treasury.gov.za). Additional tables in Excel format can be found at [www.treasury.gov.za](http://www.treasury.gov.za) and [www.vulekamali.gov.za](http://www.vulekamali.gov.za).

### Vote purpose

Ensure independent oversight of the South African Police Service and the Municipal Police Services. Conduct independent and impartial investigations of identified criminal offences allegedly committed by members of the South African Police Service and the Municipal Police Services; and make appropriate recommendations.

### Mandate

The Independent Police Investigative Directorate exercises its functions in accordance with the Independent Police Investigative Directorate Act (2011). The act gives effect to the provisions of section 206(6) of the Constitution, which provides for the establishment of an independent police complaints body that must investigate any alleged misconduct of, or offence committed by, a member of the police service. The thrust of the directorate's work is to investigate serious and priority crimes allegedly committed by members of the South African Police Service and Municipal Police Services.

The act grants the directorate an extended mandate and changes the focus of the directorate's work from a complaints-driven organisation to one that prioritises investigations. It also places stringent obligations on the South African Police Service and Municipal Police Services to report matters that must be investigated by the directorate, and ensures that the disciplinary recommendations made by the directorate are implemented.

### Selected performance indicators

**Table 24.1 Performance indicators by programme and related priority**

Indicator	Programme	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of investigations of death in police custody that are decision-ready per year	Investigation and Information Management	Priority 6: Social cohesion and safer communities	174	195	205	80	150	175	200
Number of investigations of death as a result of police action that are decision-ready per year	Investigation and Information Management		141	259	286	240	240	240	240
Number of investigations of rape by a police officer that are decision-ready per year	Investigation and Information Management		90	81	86	30	86	90	90
Number of investigations of torture that are decision-ready per year	Investigation and Information Management		62	137	139	80	139	140	150

**Table 24.1 Performance indicators by programme and related priority (continued)**

Indicator	Programme	MTSF priority	Audited performance			Estimated performance	MTEF targets		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Number of investigations of corruption that are decision-ready per year	Investigation and Information Management	Priority 6: Social cohesion and safer communities	35	52	90	70	70	70	70
Number of formal engagements held with key stakeholders per year <sup>1</sup>	Compliance Monitoring and Stakeholder Management		190	199	185	166	180	180	180

1. Indicator also includes community outreach events.

## Expenditure overview

Over the medium term, the directorate will focus on the development of a new case management system; prioritise the investigation and finalisation of cases where the victims are women, children and people with disabilities; and improve access to its services.

Expenditure is expected to increase at an average annual rate of 3 per cent, from R363.5 million in 2022/23 to R397.4 million in 2025/26. Due to the labour-intensive nature of the directorate's activities, an estimated 66.7 per cent (R1 billion) of its total budget over the MTEF period is allocated to compensation of employees. Spending on compensation of employees is expected to increase at an average annual rate of 4.7 per cent, from R233.9 million in 2022/23 to R268.2 million in 2025/26, due to additional funding of R19.5 million over the MTEF period to cover annual cost-of-living adjustments.

The number of personnel in the directorate is expected to increase from 393 in 2022/23 to 430 in 2025/26, mainly due to the appointment of interns. The directorate will continue to realign its organisational structure and streamline its functions, where necessary, for the optimal use of its limited human resources. Only core posts, such as for investigators, that enable the directorate to address its case backlog and improve its services are expected to be filled over the period ahead.

### **Implementing a new case management system**

The directorate's current case management system requires costly regular enhancements and updates to suit the changing nature of its operations, as well as the payment of licensing fees. To limit these costs, over the medium term, the directorate plans to develop a new system, which is expected to integrate seamlessly with similar systems used by other law enforcement agencies in the justice cluster to enable information sharing and collaboration on investigations. Once implemented, the new system will enable the directorate to record and classify cases according to specific categories of importance, such as gender-based violence, to ensure easier tracking and reporting. The system is also expected to help the directorate address inconsistencies in its performance reporting. To save on licensing costs and future upgrades, the directorate will own the system upon completion and updates to its specifications will be developed in-house. The new system is expected to be developed at a cost of R15 million in the *Investigation and Information Management* programme.

### **Strengthening the investigation of cases where victims are vulnerable groups**

In recognition that women, children and people with disabilities are particularly vulnerable in cases of death, rape, assault and torture resulting from police action, over the MTEF period, the directorate plans to give these cases high priority. The new case management system will be key in enabling the directorate to track and report on the progress made. This includes the identification of areas where such cases are predominant in order to make appropriate interventions and recommendations to the police. Related activities will be carried out in the *Investigation and Information Management* programme, which has a total budget of R741.8 million over the medium term.

### **Improving access to services**

To expand its footprint and improve access to its services, in 2022/23, the directorate partnered with provincial community safety departments in Gauteng, KwaZulu-Natal and Western Cape to establish regional and district offices. This was part of implementing the directorate's broader district model, which entails sharing office space, collaborating with provincial community safety departments on investigations and monitoring police performance. In addition to 11 district offices, the directorate has established a national task team to focus on implementing the district model more broadly across provinces over the medium term. The task team will work

with provinces to identify additional office space that can be used by the directorate to improve access to its services, especially in provinces with a high number of cases. The task team will also explore the viability of partnerships with other provincial state entities. Although the task team comprises representatives from all programmes, its activities will be funded from the budget allocated to the *Administration* programme, which amounts to R343 million over the MTEF period.

## Programme 2: Investigation and Information Management

### Programme purpose

Coordinate and facilitate the directorate's investigation processes through the development of policy and strategic frameworks that guide and report on investigations.

### Objectives

- Strengthen the directorate's oversight of the police service by:
  - conducting investigations, as per the Independent Police Investigative Directorate Act (2011), on an ongoing basis
  - making appropriate recommendations on investigations in the various categories, as outlined in section 28 of the Independent Police Investigative Directorate Act (2011), within 30 days of finalising investigations
  - submitting feedback to complainants within 30 days of the closure of an investigation.

### Subprogrammes

- *Investigation Management* develops and maintains investigation systems, procedures, norms, standards and policies in line with the Independent Police Investigative Directorate Act (2011) and other relevant prescripts.
- *Investigation Services* manages and conducts investigations in line with the provisions of the Independent Police Investigative Directorate Act (2011).
- *Information Management* manages information and knowledge management services through the development and maintenance of a case-flow management system and database, and analyses and compiles statistical information.

## Programme 3: Legal and Investigation Advisory Services

### Programme purpose

Manage and facilitate the provision of investigation advisory services. Provide legal, civil and labour litigation services.

### Objective

- Ensure that investigations are conducted efficiently and within the ambit of the law by providing investigators with appropriate legal advice and guidance, during investigations and after their completion, on an ongoing basis.

### Subprogrammes

- *Legal Support and Administration* manages the directorate's legal obligations by developing and maintaining systems, procedures and standards to assist, guide and direct legal support within the directorate.
- *Litigation Advisory Services* coordinates civil and labour litigation, and facilitates applications to the Minister of Police for the granting of policing powers to investigators. Other key activities and outputs include finalising contracts and service-level agreements.
- *Investigation Advisory Services* provides support to investigators during and after investigations, provides legal advice and guidance to investigators, and ensures that all cases forwarded for prosecution comply with the requirements of the prosecution process.

## Programme 4: Compliance Monitoring and Stakeholder Management

## Programme purpose

Monitor and evaluate the quality of the recommendations made to the South African Police Service, Municipal Police Services and the National Prosecuting Authority in terms of the Independent Police Investigative Directorate Act, 2011.

## Objectives

- Safeguard the principles of cooperative governance and stakeholder management on an ongoing basis by:
  - monitoring and evaluating the quality of recommendations made to the South African Police Service and Municipal Police Services to ensure successful disciplinary and criminal convictions

- monitoring the implementation of recommendation reports sent to the South African Police Service and Municipal Police Services
- monitoring and reporting on the police service's compliance with reporting obligations in terms of the Independent Police Investigative Directorate Act (2011)
- monitoring and evaluating the quality of dockets referred to the National Prosecuting Authority
- monitoring and reporting on the National Prosecuting Authority's implementation of referral reports from the directorate, including recommendations on criminal prosecutions against members of the police.

## Subprogrammes

- *Compliance Monitoring* monitors and evaluates the quality of recommendations made and responses received on such recommendations from the South African Police Service, the Municipal Police Services and the National Prosecuting Authority in compliance with reporting obligations in terms of the Independent Police Investigative Directorate Act (2011).
- *Stakeholder Management* manages relations and liaises with the directorate's key stakeholders, such as the South African Police Service, the Municipal Police Services, the Civilian Secretariat for the Police Service, the National Prosecuting Authority, the Special Investigating Unit, the Public Protector of South Africa, the State Security Agency and civil society organisations, in line with the requirements of the Independent Police Investigative Directorate Act (2011).

### Vote purpose

*Uphold and protect the Constitution and the rule of law, and render accessible, fair, speedy and cost-effective administration of justice in the interests of a safer and more secure South Africa.*

### Mandate

The Department of Justice and Constitutional Development derives its mandate from the Constitution and a number of acts that assign functions to the department. These include: the establishment of magistrate's courts and the appointment of magistrates and other judicial officers; the establishment and functioning of the National Prosecuting Authority; the conducting of criminal proceedings; the prosecution of organised crime and corruption, and the forfeiture of assets obtained through illicit means; the provision of witness protection to vulnerable and intimidated witnesses and their related persons in judicial proceedings; the establishment and functioning of bodies responsible for legal aid, law reform and rule-making; the appointment of masters of the high courts; the management of third-party funds; the administration of the Guardian's Fund and deceased and insolvent estates; the management of state litigation; the regulation and provision of legal advisory services to government departments; the promotion, protection and enforcement of human rights; the protection of vulnerable groups; and the provision of support to chapter 9 institutions.

## Expenditure overview

As part of its overarching goal of ensuring that South Africans feel safe and are able to live without fear, the department invests in initiatives to serve everyone in South Africa as efficiently as possible. Accordingly, over the medium term, it will focus on implementing the recommendations of the state capture commission and Financial Action Task Force, and reducing gender-based violence and femicide.

Total expenditure is expected to amount to R95.3 billion, increasing at an average annual rate of 3.2 per cent, from R22.9 billion in 2022/23 to R25.2 billion in 2025/26. Spending on compensation of employees accounts for an estimated 56.4 per cent (R53.7 billion) of the department's total budget, increasing at an average annual rate of 2.4 per cent, from R13.2 billion in 2022/23 to R14.1 billion in 2025/26. This modest increase reflects the expected decrease in the department's number of personnel, from 24 172 in 2022/23 to 23 991 in 2025/26, as a result of natural attrition and contract termination. The department will fill critical vacant posts and share services where possible to ensure that this decrease does not affect service delivery.

**Implementing state capture commission and Financial Action Task Force recommendations**

The National Prosecuting Authority is allocated R1.3 billion over the next 3 years to support the implementation of the state capture commission and Financial Action Task Force recommendations. This entails increasing capacity in the authority's National Prosecutions Service and Investigating Directorate through the appointment of 26 and 94 personnel, respectively; procuring specialist prosecution services for complex matters (especially financial crimes); commissioning contracted forensic auditors and accountants to deal with high-priority asset forfeiture matters; establishing a digital forensic data centre; providing close protection services and integrated security systems; and financing increased operational costs for witness protection. Accordingly, the number of prosecutions of state capture, fraud or corruption and related matters enrolled in the courts is expected to increase from 9 in 2022/23 to 18 in 2025/26. Targets for a new indicator to measure the number of prosecutions involving money laundering charges are expected to be introduced from 2024/25 onwards, after establishing a baseline for such prosecutions in 2023/24.

Civil litigation will be initiated based on the special tribunal's recommendations related to the state capture commission. To this end, the Special Investigating Unit is allocated R100 million over the next 3 years, which is expected to enable it to increase the number of cases enrolled at the tribunal from 35 in 2022/23 to 65 in 2025/26.

**Reducing gender-based violence and femicide**

In its efforts to afford greater protection to citizens, particularly vulnerable groups, the department has moved towards a more gender-focused criminal justice system. A key aspect of this entails implementing the recommendations of the presidential summit declaration against gender-based violence and femicide and the national strategic plan on gender-based violence and femicide. This includes establishing a targeted 40 sexual offences courts as designated courts over the next 3 years, and improving the management of the national register for sex offenders to ensure the strict vetting of anyone working with vulnerable people. An allocation of R15 million over the medium term is available to support the establishment of sexual offences courts. The allocation does not affect the department's budget as it is from the criminal assets recovery account.

Thuthuzela care centres are 24-hour facilities where victims of sexual offences have access to all relevant services, including police, counselling, doctors, court preparation and prosecutors. The centres were introduced as a critical part of South Africa's anti-rape and gender-based violence strategies, which aim to reduce secondary victimisation, improve conviction rates and reduce the time taken to finalise cases. There are 60 centres across the country. To strengthen capacity at these centres, R27.5 million over the MTEF period is reprioritised in the *National Prosecuting Authority* programme to appoint 15 additional personnel, who include site coordinators, victim assistant officers and state advocates. This reprioritisation is from the *National Prosecutions Service* subprogramme's compensation of employees budget as vacant posts for support services in the subprogramme were terminated. The department also plans to increase the number of centres to 68 by 2025/26 at an estimated cost of R15 million in the *National Prosecuting Authority* programme.
