### **1. STRATEGIC OVERVIEW OF INFRASTRUCTURE PROGRAMME FOR 2008/09**

#### **MTEF**

##### **Strategic departmental objectives**

The infrastructure programme of the department is guided by the following strategic objectives:

- Provision of accessible, affordable, reliable, safe, integrated and environmentally sustainable public transport system.
- Supporting economic growth and investments through the provision of appropriate transport systems and socio-economic infrastructure.
- Implementing the Expanded Public Works Programmes in a manner that optimizes employment and addresses economic and social needs of the poor.

The programme is further shaped by the following three provincial key thrusts:

- Building Gauteng as a globally competitive city region;
- Implementing the Gauteng social development strategy; and
- Building the capacity and the organisation of the state.

##### **Legislative mandate**

All implemented projects should comply with the following legislations/ policies:

- Standards Act, 1982 (and particularly the associated National Building Regulations);
- Skills Development Act, 1998;
- Occupational Health and Safety Act, 1993;
- Architectural Profession Act 2000;
- Built Environment Profession Act, 2000;
- Construction Industry Development Board, 2000;
- Engineering Profession Act, 2000;
- Landscape Architect Profession Act, 2000;
- Project and Construction Management Act, 2000;
- Property Valuers Profession Act, 2000; and
- Quantity Surveyors Profession Act, 2000;

##### **Special projects**

###### *Gautrain Rapid Rail Link*

The Gautrain project is a modern state-of-the-art rapid rail link. Approximately 80 kilometres (km) of railway lines, 15 km of which is underground, and ten stations will be constructed through a PPP arrangement. The system may be extended in the future. General commuter services will be operated on both the Johannesburg-Tshwane spine and on the link between Sandton and Rhodesfield in Kempton Park. A dedicated, purpose-designed train service suited for the specific needs of domestic and international air passengers will be operated between Sandton and

OR Tambo International Airport (ORTIA). About 100 train coaches will be provided to transport the expected more than 130 000 passengers per day that would use the system at opening.

The trains will travel at speeds of more than 160 km/h, to meet a required travel time between Johannesburg and Tshwane of about 42 minutes and 15 minutes between Sandton and ORTIA. Trains will operate more than 15 hours a day, with reliability, punctuality and predictability being key features of the service.

Passenger safety and security are one of the key features of the system. Extensive door-to-door services by means of dedicated feeder and distribution bus services will be available at each station as part of the service. More than 200 buses will operate on 560 km Gautrain bus routes. For passengers that travel with vehicles to the stations, safe parking and adequate facilities to stop and drop off train passengers will be provided.

The project will be developed in two phases:

- Phase I includes the sections between OR Tambo International Airport and Sandton and between Sandton and Midrand. It is expected that Phase 1 would be completed by June 2010.
- Phase II includes the sections between Midrand and Hatfield in Tshwane and between Sandton and Johannesburg Park Station, which is expected to be completed by April 2011.

The strategic objectives of the Gautrain Rapid Rail Link are:

- Stimulate economic growth and job creation;
- To alleviate severe traffic congestion in the Tshwane – Johannesburg corridor;
- To achieve the province's goals with SMME's, tourism and BBBEE;
- To promote the use of public transport;
- To improve the image of public transport and attract more car users to public transport;
- To promote business tourism through the link between Sandton and ORTIA;
- To significantly contribute towards urban restructuring, shortening of travel distances and improving city sustainability;
- To provide links to the Tshwane ring rail project – linking also Mamelodi, Attridgeville, Soshanguve and Mabopane;
- To stimulate the renovation and upliftment of the Johannesburg and Tshwane Central Business Districts;
- To link the main economic nodes in Gauteng; and
- To comprise a significant part of a holistic transport plan and network for Gauteng.

## 2. REVIEW OF THE 2007/08 FINANCIAL YEAR

### Transport

In respect of the construction of new roads and the development of the road network, the 2007/08 target of 17 km (that is, 6 km of new roads and 11 km of developed roads) was met and the following projects were executed:

- Construction of the dual carriageway (Phase 1) of Voortrekker road (K71/R55) between the Monavoni circle and Wierda road (M10, Sunderlandridge);
- Construction of the dual carriageway of Main road (K54/M71) between Zinnia road (Kyalami A.H) and Woodmead drive (P66-1/R55);
- Upgrading and rehabilitation of the Albertina Sisulu highway (R21) between the Benoni Interchange and the Pomona Interchange from a four lane to a six lane highway started;
- Completion of the surfacing of the access road (Phase 1) to the Eye of Africa development and the surfacing of the access road (Phase 2) started;
- Completion of T2 tourism route surfacing which resulted in overall completion of the initiative to surface all the gravel roads within the Cradle of Humankind area; and
- Construction of the dual carriageway of Adcock Street (K15/R558) between Leratong hospital and Protea Glen as Phase 1.

In respect of the reconstruction and/or rehabilitation of the existing road network, the target of 34 km of road was achieved.

The following projects were executed during the 2007/08 financial year:

- The reconstruction and widening of the existing road, R513 between Pretoria and Cullinan. This project was completed during this financial year.
- The reconstruction of the existing road, R42 between Bronkhorstspruit and Delmas up to the Provincial border.
- The reconstruction and widening of the existing road, R550 between Devon and Nigel.
- The completion of the reconstruction of the existing road, R42 between Suikerbosrand and Three Rivers East (Vereeniging).

The continuation of the Job Creation: Roads programme (Siyakha) to the amount of R15 million per annum. A total of seven projects within the municipality's jurisdiction were executed.

The continuation of the three-year program where R262 million (2007/08 financial year) was earmarked for all the streets to be surfaced within the 20 prioritised townships by the end of March 2009. Additional funds to the amount of R82.678 million was made available as part of the scaling up of EPWP in road infrastructure projects. These areas are Atteridgeville, Boipatong, Bophelong, Daveyton, Kagiso, Katlehong, Kwa-Thema, (Duduza, Tsakane) Mamelodi, Mohlakeng, Munsieville, Ratanda, Refilwe, Rethabisaeng, Sebokeng, Sharpeville, Soshanguve, Soweto, Tembisa and Wattville.

### **Public Works**

During 2007/08, the focus of the Public Works programme has been on rendering a client centred and efficient building and infrastructure development and maintenance service to the Gauteng Provincial Government. Rehabilitating, upgrading and maintaining of existing provincial social infrastructure is also implemented.

Most of the work undertaken by the department is in support of the delivery of infrastructure on behalf of client departments i.e. Department of Health (DOH), Department of Social Development (DSD), Department of Agriculture, Conservation and Environment (DACE) as well as the Department of Sport, Arts, Culture and Recreation (DSACR).

With regards to the Gauteng Department of Education (GDE) being a potential client, the department initiated the migration process, where the capital and maintenance works functions of GDE would migrate to DPTRW allowing GDE to focus on their core business of providing education. The migration process was completed on the 1st of June 2007. Post 1st June 2007 the capital projects to the value of R88 million were migrated to Public Works, who immediately applied the monitoring and the evaluation system as currently being utilised to manage all client department capital infrastructure projects.

The types of facilities built, upgraded and/or maintained on behalf of client departments include:

- Health facilities (central hospitals, provincial hospitals, district hospitals, community health centres, laboratories, clinics, mortuaries, nursing training colleges, nurses residences, houses, and radio communications);
- Social welfare facilities include places of safety, old age homes, and staff housing;
- Conservation and environment facilities include nature reserve facilities, and radio communications;
- Community safety facilities include rehabilitation centres, traffic offices, and radio communications; and
- Sport facilities (2010 legacy stadia).

Departmental facilities that have been maintained during the financial year include:

- Houses;
- Roads laboratories
- Licensing offices;
- Office accommodation (including Kopanong GPG Precinct buildings);
- Gauteng Province owned buildings;
- Official residences;
- Road camps;
- Special and historical buildings (State Theatre, Emoyeni),
- Training colleges.

The following rehabilitation/ upgrading work were completed during the financial year:

| Institution    | Action    | Description                        |
|----------------|-----------|------------------------------------|
| Vaal Dam       | Upgrading | Concept design development         |
| Loveday Street | Upgrading | Upgrading of the existing building |

| Institution                 | Action                    | Description  |
|-----------------------------|---------------------------|--|
| Radio Communication Centres | Upgrading                 | Replacing existing consoles, repeaters, etc. Involve in new communication system for EMS and Community Safety in conjunction with S.A.P.S. |
| Emoyeni Centre              | Rehabilitation /upgrading | Renovation and upgrading of the existing building  |

Rehabilitation/upgrading work commenced at the following institutions, and work will continue into the next financial year as scheduled:

| Institution           | Action                    | Description               |
|-----------------------|---------------------------|---------------------------|
| Johannesburg Hospital | Rehabilitation/ upgrading | Replacement of the boiler |

During 2007/08, the department was also responsible for the ongoing maintenance of the provincial radio communication network and radio equipment, which consists of 1 600 mobile and portable radios and 80 repeater stations at 27 high sites.

Regarding key performance indicators, participation by BBBEE and SMME enterprises has been implemented on projects in the form of joint ventures and/or sub-contracting of up to 40 percent. Professional services contracts have also been adapted to facilitate BBBEE. Progress has also been made with the application of the learner and internship target of 6 percent per annum. Training and management of departmental learnerships for 128 learners for building, mechanical and electrical trades for 2007/08 conducted by five private service providers is being implemented. Preferential procurement has been applied in the adjudication of tenders. Furthermore, with regards to Public Works capital and maintenance projects, the labour intensity targets of 30 percent have been met and even exceeded in a number of instances.

A review and revision of planning cycles, preparation of facilities' master plans has been implemented in relation to client department projects. Regular monitoring and reporting takes place to develop corrective actions if required. Maintenance will phase out approximately 150 period contracts and introduce a call centre based system.

## Special projects

### Gautrain Rapid Rail Link

The activities on the Gautrain Rapid Rail Link during 2007/08 were focused on the construction of the project, environmental aspects, procurement of land and the integration with other role players. The ramping up phase of the construction of the Gautrain project continued as work on more sections of the route commenced. Extensive work has already been undertaken on the project.

An Environmental Management Plan (EMP) was drafted. The EMP will be the main tool used to guide environmental management through the final design, construction and ultimately operational periods. Community Liaison Forums were established along the route to receive feedback from and inform Interested and Affected Parties (I&APs) about the project as construction commences. An overarching Environmental Management Committee (EMC) was formed to oversee implementation of the EMP and to deal with any transgressions during the construction and operational periods.

A number of environmentally related permits are being applied for to various authorities in terms of the conditions contained in the record of decisions (RoD) for the Gautrain project (e.g. river crossings, heritage authorizations, demolition permits etc). Such applications will continue as the project progresses.

It is expected that all the required environmental permits will be obtained during the 2007/08 financial year that are required to complete the land procurement process.

The Gauteng Transport Infrastructure Act (Act 8 of 2001) has certain requirements with regards to the determination of all new routes, the preparation of a preliminary design to establish a railway reserve, the proclamation of the route including the stations and the expropriation of the properties within the railway reserve.

All the land required for the first development phase has been procured. Although the procurement of the remaining land has been delayed by the delay in obtaining the RoDs for the variants, it is expected that the remaining land required for the project will be procured in the 2007/08 financial year and handed over to the concessionaire.

The Gautrain Rapid Rail Link project has created various liaison and co-ordination committees to ensure the integration with other governmental entities and parastatals and various meetings were held.

Third party agreements have been developed with the three affected Metropolitan Municipalities (Ekurhuleni, Johannesburg and Tshwane), ACSA and the SARCC. Freedom Park approved a Memorandum of Understanding with the Province, Transnet and the Tshwane Metro. Various meetings were held with these institutions.

Various meetings were also held with a wide variety of parties and organisations with regard to the integration of the Gautrain project in current transportation planning.

### **3. OUTLOOK FOR THE 2008/09 FINANCIAL YEAR**

#### **Transport/Roads**

##### **Construction and maintenance**

Due to the economic growth of the last few years, the growing middle class resulting from government policies of wealth distribution, and the growing urbanisation, the province has experienced a tremendous increase in the number of vehicles using our roads. The construction of new roads will not ease congestion but could instead perpetuate congestion on the roads by encouraging increased private car usage. Therefore during the next MTEF period we will increase the expenditure for the construction of new roads but the following factors will influence the programme for construction:

- Prioritising accessibility and mobility from the previously disadvantaged areas;
- Revitalising existing roads to accommodate public transport priority lanes;
- Implementing public transport friendly measures;
- Addressing outstanding links in the road network especially in respect of freight congestion hotspots and hazardous traffic intersections.

In addition to increasing the budget allocation, over the MTEF we will be increasing the number of partnerships we have with property developers to contribute to road infrastructure that increase access to their developments.

On the construction of new roads and the development of the existing road network it is envisaged that 17 km roads (that is, 14 km of new roads and 3 km of developed roads upgrading) will either be added to the existing network and/or upgraded either to surfaced roads and/or dual carriageways.

The following projects will be executed during this 2008/09 financial year:

- The construction of the dual carriageway (Phase 1) of Voortrekker road (K71/R55) between the Monavoni circle and Wierda road (M10, Sunderlandridge).
- Envisaged the start of the construction of the dual carriageway (Phase 2) of Voortrekker road (K71/R55) between Wierda road (M10, Sunderlandridge) and Main road (M26, Laudium)
- The construction of the dual carriageway of Main road (K54/M71) between Zinnia road (Kyalami A.H) and Woodmead drive (P66-1/R55) which will be due for completion.
- The upgrading and rehabilitation of the Albertina Sisulu highway (R21) between the Benoni Interchange and the Pomona Interchange from a four lane to a six lane highway started which will be due for completion.
- The completion of the surfacing of the access road (Phase 2) to the Eye of Africa development.
- The initiative to surface all the gravel roads within the Cradle of Humankind area was completed when the last road, T2 tourism route was surfaced.
- The construction of the dual carriageway of Adcock Street (K15/R558) between Leratong hospital and Protea Glen as Phase 1.
- The construction of the dual carriageway of Hans Strijdom Drive (K29/R512) between Kya Sands and the N14. This section will be Phase 2.
- Safety improvements to be implemented on the Albertina Sisulu (R24) by the provisioning of high mast lighting.

Only one project is on the program for reconstruction and it is the road between Devon and Nigel. This road will also be completed during the 2008/09 financial year. It is envisaged that 8 km will be constructed.

The continuation of the Job Creation: Roads programme (Siyakha) will cost R15 million per annum.

The implementation of the three year program for roads upgrading where almost R173 million is allocated for all

the streets to be surfaced within the 20 prioritised townships by the end of March 2009. Additional funding to the amount of R103 million was made available as part of the scaling up of EPWP in road infrastructure projects.

Due to the additional funds allocated for the scaling up of EPWP this program will continue beyond the initial period of three years.

The identified 20 prioritised townships are: Atteridgeville, Boipatong, Bophelong, Daveyton, Kagiso, Katlehong, Kwa-Thema, (Duduza, Tsakane) Mamelodi, Mohlakeng, Munsieville, Ratanda, Refilwe, Rethabiseng, Sebokeng, Sharpeville, Soshanguve, Soweto, Tembisa and Wattville.

**TABLE 4: JOB CREATION: ROADS (TEMPORARY)**

|                                    | 2008/09      | 2009/10      | 2010/11      |
|------------------------------------|--------------|--------------|--------------|
| New Construction                   | 600          | 600          | 660          |
| Rehabilitation/ Upgrading          | 2,700        | 2,850        | 2,878        |
| Maintenance                        | 3,000        | 3,125        | 3,156        |
| <b>Total Number of Jobs: Roads</b> | <b>6,300</b> | <b>6,575</b> | <b>6,694</b> |

### **Public Works Infrastructure**

During 2008/09 the Public Works branch will further enhance a client focus infrastructure delivery strategy that will promote the department as a preferred service provider to client departments.

The work that will be undertaken by the department will continue to be in support of the delivery of infrastructure on behalf of client departments i.e. DOH, DSD, DACE and DSACR.

### **Capital Works**

The budget available for capital works in 2008/09 is R115 million with increases proposed for subsequent years. Rehabilitation/upgrading work is to proceed at a number of departmental institutions and is scheduled to be completed during the financial year in some cases.

Projects for implementation in 2008/09 include the following:

| Institution                      | Action                           | Description  |
|----------------------------------|----------------------------------|--|
| Vereeniging Regional Office      | Rehabilitation/ upgrading        | Upgrading of offices   |
| Heidelberg Regional Office       | Rehabilitation/ upgrading        | Upgrading of offices   |
| Koedoespoort Regional Office     | Rehabilitation/ upgrading        | Upgrading and additions to office building   |
| Koedoespoort Laboratories        | Rehabilitation/ upgrading        | Upgrading of offices   |
| Pretoria Regional Office         | Rehabilitation/ upgrading        | Upgrading of offices   |
| Various                          | Upgrading (radio communications) | Acquisition of new radio communication equipment for Department of Health, Community Safety, Premier's Office, DACE and Transport branch of the department; and upgrading of redundant equipment |
| Hammanskraal Region              | Rehabilitation/ upgrading        | Upgrading  |
| Bronkhorstspruit District Office | Upgrading                        | Upgrading of offices   |
| Krugersdorp District Office      | Rehabilitation/ upgrading        | Upgrading of offices   |

It is anticipated that jobs will be created through the capital works and maintenance of Public Works Programme in the MTEF as outlined in the following table.

**TABLE3: JOB CREATION: PUBLIC WORKS**

|   | 2008/09       | 2009/10       | 2010/11       |
|---|---------------|---------------|---------------|
| Capital Works                             | 8,702         | 9,572         | 10,529        |
| Maintenance                               | 4,219         | 4,640         | 5,104         |
| <b>Total Number of Jobs: Public Works</b> | <b>12,921</b> | <b>14,212</b> | <b>15,633</b> |

## **Special projects**

### *Gautrain Rapid Rail Link*

The continuing construction of the Gautrain Rapid Rail Link would be the primary focus in the 2008/09 financial year. Other major aspects such as the finalisation of the re-imbursement of landowners and the integration with other role players will be also be addressed during the 2008/09 financial year.

## **Cross cutting issues**

The achievement of targets for key performance indicators will be promoted on all capital and maintenance work for which the Public Works unit is responsible. These targets are as follows:

- Women – 14 percent in 2008/09; and 15 percent in 2009/10;
- Youth - 29 percent in 2008/ 09; and 32 percent in 2009/ 10;
- People with disabilities - 4 percent in 2008/ 09; and 4percent in 2009/10;
- Labour content- 30 percent in 2008/ 09; and 40 percent in 2009/ 10.

**TABLE 1: DETAIL OF 2008/09 INFRASTRUCTURE EXPENDITURE BY CATEGORY - ROADS**

| NEW CONSTRUCTIONS                     |              | Municipality  | No        | Project description / type of structure | Project duration | Total Project Cost | Programme     | Professional Fees | Construction   | Total         | MTEF 2009/10 R'000 | MTEF 2010/11 R'000 |  |
