1. Overview

Vision

To defeat underdevelopment in semi-urban and rural areas through sustainable agricultural growth for food security and socio-economic development.

Mission

Facilitating, promoting and coordinating sustainable homestead food production and commercial agricultural through equitable access to resources and meaningful participation by all stakeholders.

Core functions and responsibilities

- To provide technical support services to farmers in order to ensure infrastructure development for sustainable management of agricultural resources.
- To assist with the social processes of farmers with special emphasis to develop (emerging subsistence etc) farmers.
- To promote animal health so as to safeguard human health and animal welfare by controlling animal diseases of economic and zoonotic importance.
- To promote agricultural development through supporting institutional capacity building, land reforms projects and initiatives, infrastructure development and implementing the Comprehensive Agricultural Support Programme (CASP) for increased economic participation.
- To provide economic support to internal and external clients with regard to marketing, statistical information, financial feasibility studies and economic viability studies.

Main Services

In the endeavour to deliver, the department shall concentrate on the following:

- Fencing of arable and grazing land through the erection of some 2000 km of fence;

- Provision of 37 upgraded or new dipping tanks and supply of dipping material;
- Provision of 13 stock-water systems and dams;
- Provision of Tractors and Implements;
- Provision of Irrigation Infrastructure within 16 irrigation developments; and
- Human Resource Development;

Demands and changes in services

The agricultural infrastructure backlogs in the communal areas in the eastern side of the province are a serious constraint for agricultural development. Programmes such as CASP and EPWP, to assist land-users with infrastructure, have created a very high demand for engineering services for the planning and design of the infrastructure and soil conservation works. These infrastructure developments, together with the need to increase levels of production require levels of technical support, training and complimentary financial assistance beyond the current capacity of the Department. The organisational re-structuring of the Department, the increase in the staff compliment and the CASP funded extension recovery initiative, funded at R 29 million for 2009/10, are planned to contribute a great deal to addressing the listed challenges.

Acts, rules and regulations

The above mentioned core functions are governed by the following main Acts, rules and regulations:

- Agricultural Development Act of 1999
- Annual Division of Revenue Act
- Basic Conditions of Employment Act, 1997 (Act 75 of 1997)
- Implementation of Conservation of Agricultural Resources Act (Act no.43 of 1983)
- Borrowing Powers of Provincial Government Act, 1996 (Act 48 of 1996)
- EC Rural Finance Corporation Act of 1999.
- Animal Disease Act (Act no. 35 of 1984) or Animal Health Act (Act 7 of 2002)
- Meat Safety Act (Act 40 of 2001)
- Employment Equity Act, 1998 (Act 55 of 1998)
- Animal Health Bill
- Animal Identification Bill
- Livestock Improvement Bill
- Agricultural Land Use Planning Bill
- Constitution of the Republic of South Africa
- PFMA (Act 1 of 1999)

1.7 Budget decisions

The budget is based on the departmental Annual Performance Plan which flows from Strategic Plan and is in line with the PGDP. The implementation of the department's overarching strategy called "Green Revolution" is the central focus of this budget. Demands to be addressed by the

budget are: Fencing of arable and grazing land, provision of dipping tanks and dipping material, provision of stock-water dams, provision of tractors and implements, provision of irrigation infrastructure and Human Resource Development. These “six pegs” are an embodiment of the aspirations of the farmers and emerging farmers in particular. They are a product of extensive consultation. The department is also committed to gradually populate the newly approved organogram over the MTEF period which will have a significant impact on service delivery.

2. Review of the current financial year (2008/09)

The 2008/09 departmental performance was very close to intent (as captured in the 2007/08 outlook). What follows is a brief summary of the performance to date.

Bio-fuels: National Bio-fuel strategy has prioritized increasing the use of currently underutilised cropland presently lying fallow. This is a key National ASGISA intervention. The department put aside R45.1 million in the 2008/2009 year towards fencing of arable and grazing areas to increase the area of dis-used cropland that can be managed for cropping without threat of uncontrolled grazing.

A funding of about R22.5 million for fencing has enabled 500 km of fence to be erected to protect 7 000 ha with the balance of the funds to be paid on receipt of invoices following the completion of the fencing of a further 7 000 ha. The establishment of an Eastern Cape bio-fuels entity is currently in the planning phase. This entity will be established to oversee the development of the bio-fuels industry in the province.

Revitalisation of Irrigation Schemes: The department has allocated R25 million towards the resuscitation of the irrigation schemes, viz. Ncorha, Qamata, Bilatye, Shiloh, Tyhefu, Zanyokwe, Kieskammahoek and Alice/Kat irrigation projects as part of a commitment not only in investing in infrastructure but also in promoting the implementation of the “Green Revolution”. The Alice/Kat citrus and the Tyhefu pomegranate project are well advanced with commercial partners operating with farmers in routine production processes.

In the citrus operation, old irrigation infrastructure has been upgraded on 14 properties and also new irrigation infrastructure developed. The project is managed by a commercial partner and significant further investment by IDC has accelerated development. At Tyhefu 100 ha of pomegranate has been established under irrigation and a further 200 ha has fully developed irrigation infrastructure and land preparation, ready for planting. At the other schemes, the process of upgrading the balancing dams and underground pipe networks continues. The engagement of commercial development partners, particularly for dairy production at Ncorha and Shiloh, is modelled on experiences at Fort Hare and Kieskammahoek.

Livestock development: Through extension of the secondment of selected Extension Officers to work as specialist in sheep and wool, training of wool classers and facilitating marketing of wool is being conducted to ensure that the quality and quantity of wool production improves in the rural areas. Recent statistics show an increase of R15 million in the wool income realised by small scale wool production in the previously underdeveloped areas.

A bulk of the envisaged 3 200 quality rams to the under-developed areas will be distributed during March 2009 through the ram exchange program. Only 50 rams have been distributed to replace the stock that has died during the 2008/09 financial year. Training for both livestock management and wool classing receives portion of the ten per cent of the Provincial Infrastructure Grant being allocated for training. The training for improved wool classing has been provided in some 200 shearing sheds.

Beef Production: The department has distributed 50 bulls to improve the quality of genetic material in the livestock farming communities and another 50 will be distributed in the 2009/10 financial year. Dairy Production is being promoted in Amatole, Chris Hani, O.R. Tambo and

Western districts through the provision of infrastructure (milking facilities, irrigation and fencing infrastrucuture). Training is provided through engagements with joint venture commercial partners that contribute milk cows and skilled management in return for a sliding profit sharing model that progresses to land users taking full responsibility over time as dictated by skills levels and achievement milestones.

Human Resource Provision: The department started populating the newly approved organogram during 2008/09 and is continue throughout the MTEF period in order to enhance service delivery. Of the total vacant posts of 858 for the department, 12 posts have been filled, 54 are in the interview stages and 70 have been advertised.

Focus on Further Education and Training: The department is busy upgrading the Tsolo Agricultural Institute as it plans to intensify the training of farmers at that institution.

The department also planned to take the development of farmer support centres forward and R9 million has been set aside in the current year for this purpose.

- The fencing of arable lands at TARDI is part of the development of FSC's as TARDI has been earmarked through the Budget Speech of 2007/2008 and continuing, that it will be developed into a Farmer Support Centre as it will serve to cater as a support base for satellite ones,
- An amount of R2.7 million has been spent and R3 million committed to date for infrastructure development. Of the remaining amount that is to be utilised for the construction of animal handling facilities, farmshed, piggery unit, etc, the indication is that only R1.1 million will be utilised this financial year,
- Program 7 was given a budget of R15.1 million under sub-program 7.1 and of this amount, R5.4 million was for farmer training, R9 million for infrastructure development in the FSC with TARDI and Mpofu was given a priority and the rest was allocated to fund the internship program.
- The amount for training will not be fully utilised as some of the management of Irrigation Schemes that were targeted for training have indicated that they will provide the training in the next financial year. The reason for not providing training was influenced by staff shortages.
- Training has been started and is continuing through the utilisation of service providers and trainers from both departmental institutes which are Tsolo Agricultural Institute and Mpofu Training College.

Field crops production research: The research on tillage and cultivation systems, cultivar evaluation of high value crops and cereals at different ecological zones, soil management and nutrient cycling for the benefit of small holder and commercial farmers is conducted on a continous basis after the harvest to test the suitability of soil for crop planting. Databases are also continuosly managed on plant disease and weeds of economical importance.

Focus on marketing management: Small scale farmers were encouraged to enter into contracts with marketing institutions and thereby create outlets for their products. e.g 10 ha paprika project at Keiskammahoek got contracted to a spice firm in Durban; sorghum farmers at Ndonga, Maqashu grain (sorgum belt) in Chris Hani District were linked to Mthiza Corporation. The challenge is that in most cases farmers produce whatever they decide to produce and then approach the Directorate for markets. Directorate swiftly responds by identifying and securing market outlets. Social and institutional mobilization and organization was done for 416 Soyabean farmers scattered around the whole province i.e Great Kei, Buffalo City, Amahlathi, Nyandeni, Mhlontlo, Mnquma, Ndlambe, Ntsika Yethu, Mbizana, Mzimvubu and Elundini. A market outlet

for soyabean production for bio-fuel was identified with Rainbow Nation Renewable Fuels (Australia Company based in Port Elizabeth) for Buffalo City farmers.

3. Outlook for the coming financial year (2009/10)

Most of the priority areas identified for the current 08/09 year are to continue as focus areas in the 2009/10 financial year as the development backlogs in agriculture are extensive and the annual skills development and growth margins are small and require a sustained intervention over a number of years to consolidate progress . These interventions include the following priority areas:-

Bio-fuels: Besides the intervention through the ASGISA program the department will also intensify the Food Security program and the Sugar Beet will contribute directly and indirectly to this bio-fuel program.

Revitalisation of Irrigation Schemes: The resuscitation of these irrigation schemes, viz. Ncorha, Qamata, Bilatye, Shiloh, Tyhefu, Zanyokwe and Kieskammahoek has just started with very minimal allocations to these schemes to ensure that these schemes are making the intended progress and impact in the implementation of the strategy of the department.

Field crops production research: The demand for food and fibre crops in the Eastern Cape Province exceeds the supply from local farmers. Therefore, research on tillage and cropping systems, cultivar evaluation of high value crops and cereals at different ecological zones, soil management and nutrient cycling for the benefit of small holder and commercial farmers will be conducted to mitigate high demand. The developmet of databases will continue to be maintained and managed on plant diseases and weeds of economical importance.

Focus on Further Education and Training: The department will be continuing with the upgrading of the Tsolo Agricultural Institute as it plans to intensify the training of farmers in that institution.

The directorate is finalising the recruitment of its staff and is anticipating an increase on farmer training needs as Skills Development Facilitators (SDF's) will be placed at district level so as to easily access farmers and attend to their training and education needs.

TARDI will be implementing the Piggery Unit project and the project will have to be done in phases despite the fact that this is going to affect the Re-stocking Programme and Training Program it is intended for.

Livestock development: The partnership with the National Wool Growers' Association continues to be strengthened to ensure that the quality and quantity of wool production improves in the rural areas to boost the second economy. Training of farmers and the distribution of rams is progressing very well with ten per cent of both PIG and CASP allocated for this training.

Beef Production: The department continues with the distribution of bulls to improve the quality of genetic material in the livestock farming communities and 50 bulls will be distributed in the 2009/10 financial year.

Human Resource Provision: The department has started populating the newly approved organogram in order to enhance service delivery. This will be gradually implemented given the financial constraints in the fiscus.

In addition to the current activities and priorities, the department will also focus on establishing partnebrships during the 2009/10 financial year. The department will facilitate Public Private Partnerships (PPP) to promote Agri-Business development for farmers (Agri-Bus) and facilitate securing of equity share holdings for establishing Agri- BEE companies as prescribed in the Agri-BEE charter (Agri-Bus).

4. Receipts and financing

The main sources of funding for the department are equitable share, conditional grants and own revenue. The main sources of own revenue are departmental activities such as, sale of livestock, farm produce, commission on insurance, veterinary services, tender document, medicines and vaccines.

4.1 Total departmental receipts

Table 8.2 gives a summary of the receipts the department is responsible for collecting.

Table 8.2 reflects a summary of departmental receipts which indicates a growth of 10.8 per cent from R1.27 billion in 2008/09 to R1.408 billion in 2009/10. The high growth in CASP is determined by National Department, based on addressing the infrastructure backlogs for development in the Eastern Cape.

There are two new grants that have been allocated to the department comprising of R4 million for Disaster Management and R5 million for Ilima/Letsema Projects. No changes in the Provincial Infrastructure Grant throughout the MTEF.

Own revenue is mainly raised from auctions that are depending on demand and supply hence the fluctuating trends in own revenue amounts.

5. Payment Summary

5.1 Key assumptions

In determining the compensation of employees budget provision for salary increases have been taken into account. The population of the newly approved organogram in a phased in approach has also been taken into account which process has already started. The HROPT payable amounting to R126 million has been included in the budget as part of ccompensartion of employees

In funding the departmental core business related items inflation and CPIX projections have also been considered.

As shown in table 8.3 above, the 2008/09 main appropriation was R1,17 billion. This was adjusted to R1,243 billion in the 2008 adjustment estimate. However in the December 2008 IYM, the revised estimate is pegged at R1,271 billion showing an increase of R96.8 million. From the revised estimated, the 2009/10 budget increases marginally by 10.8 per cent to R1,408 billion.

Compensation of employees is putting pressure on the budget due to upgrading of posts that is implemented with effect from 2008/09.

Four of the departmental programmes, which are service delivery oriented, are indicating negative growth while programmes 4 and 7 are reflecting substancial growth.

Table 8.3.1 reflects summary of departmental payments and estimates by economic classification. Compensation of employees grows by 47.3 per cent from a revised estimate of R597.9 million in 2008/09 to R880.9 million in 2009/10. This due to plans to fill the vacancies that currently exists within the department and the payment of HROPT obligations.

Goods and services decrease by 22.02 per cent due to a shift of funds from goods and services and transfers and subsidies to compensation of employees.

The shift of funds from transfers was because of a decision to implement projects within the department other than using Uvimba Bank as an agent due to capacity constraints.

Payments for capital assets reflects 94.85 per cent decrease as the funds have been shifted to compensation of employees.

Table 8.6 reflects summary of departmental payments on infrastructure. The budget for infrastructure grows from a revised estimate of R173.2 million in 2008/09 financial year to R179.7 million in 2009/10 financial year. This represents a growth of 3.8 per cent. The increase in the budget is a reflection of improved capacity in agricultural engineers. The department is in partnership with agricultural experts from Israel. These engineers are responsible for the revival of irrigation infrastructure in all provincial irrigation schemes, appropriate fencing and provision of fencing in those schemes.

New infrastructure reflects a growth of 5.5 per cent and a gradual increase over the MTEF while there is no change in the financing of existing infrastructure assets which stays at R54.9 million in 2009/10.

5.7 Transfers to Local Government

The department makes no transfers to municipalities.

6. Programme description

6.1 Description and objectives

Programme 1: Administration

The overall purpose of the programme is to manage and formulate policy directives and priorities and, to ensure there is appropriate support service to all other programmes with regard to finance, personnel, information, communication and procurement.

Office of the MEC: To set priorities and political directives in order to meet the needs of clients. (For the efficient running of the MEC's office)

Senior Management: To translate policies and priorities into strategies for effective service delivery and, to manage, monitor and control performance.

Corporate Services: To provide support service to the other programmes with regard to human resources management and development, Information Technology.

Financial Management: To provide effective support services (including monitoring and control) regarding financial management in areas like Budgeting, Supply Chain Management, Financial Control, Accounting Services, and Internal Control Unit.

Communication Services: This sub programme is focusing on internal and external communication of the department through written, verbal, visual and electronic media as well as marketing and advertising of the departmental services.

The programme budget is decreased by 11.18 per cent from a revised budget of R360.2 million in 2008/09 to R319.9 million in 2009/10 financial year.

This decrease is attributable to the Office of the MEC, Corporate Services and Communication Services.

Compensation of Employees has increased substantially from a revised estimate of R169,8 million in 2008/09 financial year to R255,7 million in the 2009/10 financial year. This represents a growth of 50,6 per cent. This increase is attributable to the provision of R126 million for payment of HROPT.

The department has started populating the newly approved organogram in order to enhance service delivery. This will be done in a phased manner as some of the posts will be filled in 2009/10 MTEF.

Goods and Services are decreased by 66.9 per cent from a revised estimate of R171.7 million to R58.2 million for the 2009/10 financial year.

Programme 2: Sustainable Resource Management

To provide Agricultural support service to farmers in order to ensure that there is sustainable management of Agricultural resources.

Engineering Services Objectives: To Plan, design and develop agricultural infrastructure mechanisation, promote commercial crop production and render engineering advice to farmers and other institutions.

Land Care: To set up Land Care institutional structures in targeted areas of the Province, to promote community based and led resource management, to protect arable and grazing land against excessive erosion, conserve the environment.

Resource Planning and Management of Communal Land: To ensure that IDP's of municipalities for all agricultural projects are in compliance with the Conservation of Agricultural Resources Act (Act 43 of 1983). Enhance the sustainable utilization of natural agricultural resources.

Although the overall budget for this programme has marginally increased by 9.6 per cent from a revised estimate of R95,16 million in 2008/09 financial year to R104,289 million, the budget for the subprogramme – Engineering Services decreased substantially by 18.94 percent. This is as a result of shifting funds to compensation of employees.

Current payments indicate growth of 21.24 per cent from RR86 million in 2008/09 to R104.3 million in 2009/10. This is attributable to the plan to employ more consultants to assist with planning and design of projects. In addition, more staff will be employed for site inspections and surveys. The increase in CoE is financed by a decrease in goods and services and transfers and subsidies.

Number of awareness campaigns on LandCare		7	30
Number of LandCare projects completed		-	51
2.3 Land Use Management			
Number of farm plans developed for sustainable farming purposes		-	132
Number of recommendations made for subdivision/rezoning/change of agricultural land use		-	40

Programme 3: Farmer Support and Development

To provide extension and training to farmers with special emphasis to developing or emerging farmers implementation of land reform programme and Agricultural Rural development projects.

Post Farmer Settlement: To provide training, co-ordination and support of the LRAD programme. CASP programs are also driven from this sub-programme.

Farmer Support Services: To provide and facilitate training, mentorship, co-ordination, research transfer and advice to commercial and emerging farmers. The whole extension services function is taken care of in this sub-programme.

Food Security: To co-ordinate and implement various food security projects as highlighted and adopted in the Integrated Food Security Strategy of South Africa.

The budget of the programme increase by 16.51 per cent from R533.9 million in 2008/09 to R622.093 million in 2009/10. This is largely due to almost 55.2 per cent decline in Food Security Services which has been transferred to fund other priorities mainly compensation of employees.

Post Farmer Settlement and Farmer Support Services indicates high growth and are the programmes in which personnel will be employed.

Payments for capital assets and transfers and subsidies reflecting negative growth while compensation of employees and goods and services indicate substantial increases from 2008/09 to 2009/10.

The department has resolved to stop the transfers to Uvimba Bank, resulting to 77.9 per cent decline in transfers, and shift the funds to goods and services for the procurement of goods and services will be done internally due to capacity constraints within Uvimba Bank. One of the challenges is that the funds get transferred to Uvimba Bank and reflects as expenditure in the departmental accounts while the funds stay unspent and accumulate interest in the account of Uvimba Bank. This explains the negative growth in transfers and a very high growth of 131,2 per cent for goods and services.

Infrastructure programs of the department are driven through this program. Allocation to the resuscitation of irrigation schemes can only be funded at bare minimums against the wish of the department to make a meaningful contribution in that area for noticeable impact to be realised.

The department has allocated R48 million for irrigation development in 2009/10 to ensure that these irrigation schemes are making the intended progress and impact in the implementation of the strategy of the department.

Programme 4: Veterinary Services

To provide Veterinary Services to clients in order to ensure healthy animals and welfare of people of South Africa.

Animal Health: To facilitate and provide Animal Disease control services in order to protect the animal population against highly infectious and economic diseases, through the implementation of the Animal Disease Act (Act 35 of 1984) or Animal Health Act (Act 7 of 2002) and Primary Animal Health Care programme/projects.

Export Control: To provide control measures including Health Certification, in order to facilitate the importation and exportation of animals and animal products; and To implement Risk Assessment measures in order to assess the impact of various Animal Disease outbreaks and the risk of importing or exporting animals or animal products from/to other countries.

Veterinary Public Health: To coordinate and implement various Food Safety projects, including the implementation of Meat Safety Act (Act 40 of 2000) and prevention of Zoonotic or food borne diseases.

Veterinary Laboratory Services: To provide support services to Veterinary personnel, medical practitioners and farmers with regard to Diagnostic service and Epidemiological investigations of Animal Disease outbreaks.

The growth of 58.8 per cent for the programme has been as a result of increase in compensation of employees. The table clearly indicates that the programme will spend its entire budget towards the compensation of employees in favour of other SCOA items.

This programme provides dipping materials, veterinary medicines, animal vaccinations, sheep scab treatment, animal disease surveillance, etc and allocating funds only to compensation of employees will compromise service delivery.

Programme 5: Technical Research and Development

To render Agricultural research service and development of information systems with regard to crop production technology, pastures and animal production technology and resource utilisation technology assisted by GIS data.

Research: To Research, facilitate, conduct and co-ordinate the identification and implementation of Agricultural Research needs.

Information Services: To co-ordinate the development and dissemination of information to clients including the development and utilisation of various Information Systems.

Infrastructure: To provide and maintain infrastructure facilities for the line function to perform their research and other functions, i.e. experiment farms.

Programme 7: Structured Agricultural Training

To facilitate and provide education to all participants in the agricultural sector in order to establish a knowledgeable and competitive sector.

Tertiary Education: To provide formal education on post grade 12 level (NQF LEVELS 5 to 8) to anybody who qualifies and has the desire to obtain a formal qualification.

Further Education & Training: To provide non-formal training within the provisions of NQF levels 1 to 4 and in the form of short courses to anybody who desires to participate with special emphasis on emerging farmers and farm workers.

The growth in this programme is an indication that the department is committed in skills development both internally (departmental staff) and externally (emerging farmers). The budget grows by 25.8 per cent from R61.3 million in 2008/09 to R77.1 million in 2009/10 due to high allocation in Tertiary Education.

Compensation of employees grows by 47.8 per cent from R22 million in 2008/09 to R32.6 million in 2009/10 while goods and services decreases by 0.9 per cent due to commitment of financial resources to personnel-related expenditure.

Included in the budget of this programme is R8 million for the upgrading of the Tsolo College of Agriculture and R5.4 million for the training of farmers in the province.

The department is busy upgrading the Tsolo Agricultural Institute as it plans to intensify the training of farmers in that institution.

The programme is finalising the recruitment of its staff and is anticipating an increase on farmer training needs as Skills Development Facilitators (SDF's) will be placed at district level so as to easily access farmers and attend to their training and education needs.

The department also plans to take the development of farmer support centres forward in the 2009/10.
