## 1. Overview

### 1.1. Vision

A quality health service to the people of the Eastern Cape Province promoting a better life for all.

### 1.2. Mission

To provide and ensure accessible comprehensive integrated services in the Eastern Cape, emphasizing the primary health care approach, optimally utilising all resources to enable all its present and future generations to enjoy health and quality of life.

### 1.3. Core functions and responsibilities

The core functions and responsibilities of the Department of Health, which are aligned to national and provincial priorities include:

- Overhauling the provincial healthcare system by implementing and sustaining an evidence and results-based provincial health system which is aligned to the National Health System (NHS) 10-point plan, national and provincial legislative requirements and disease profiles.
- Building the required capacity to oversee and manage health services in the province.
- Improving the quality and continuum of primary healthcare (including community-based and hospital services) by implementing a resourced package of services and improving clinical governance systems and processes.

- Reducing morbidity and mortality due to communicable diseases and non-communicable illnesses and conditions by implementing high impact strategies to address prevention, detection, management and support at all levels of care.

#### 1.4. Main services

The main purpose of the Department of Health is to develop and implement a sustainable, coordinated, integrated and comprehensive health system based on the primary health care approach. The department provides health services primarily to the uninsured population of the province. The following four categories of health services are provided by the department:

- **Primary health care services:** Prevention of illness and provision of basic curative health services such as HIV/Aids prevention and treatment, nutrition, maternal, child and women's health, communicable disease control, prevention and treatment of tuberculosis (TB), etc.
- **Hospital services:** District, general and provincial hospitals cater for patients who require admission for treatment at general practitioner and/or specialist level. There are also specialised hospitals that cater for patients suffering from TB, mental illnesses, and patients who require long-term nursing care. Tertiary hospitals provide facilities and expertise needed for sophisticated medical procedures.
- **Forensic pathology services:** Render forensic pathology and medico-legal services.
- **Emergency medical services:** Provide emergency care and transport for victims of trauma, road traffic accidents, and emergency medical and obstetric conditions. Planned patient transport is provided for inter-hospital transfer, while indigent patients are transported between clinics and hospitals.
- **Other services:** Delivery of support services to ensure efficient health services; overall management and administration of public healthcare within the province; as well as the development of organisational structures that enable effective quality service delivery, and regulation of private healthcare.

#### 1.5. The Acts, rules and regulations

Section 27 of the Constitution declares health, including reproductive health, a basic human right. In carrying out its functions, the department is governed mainly by the following Acts and regulations: Allied Health Professions Act (of 1982), Births and Death Registration Act (of 1992), Chiropractors, Homeopaths and Allied Health Service Professions Act (of 1982), Choice of Termination of Pregnancy Act (of 1996 as amended), Dental Technicians Act (of 1979), Foodstuffs, Cosmetics and Disinfectants Act (of 1972), Health Act (of 1977), Health Professions Act (of 1974), Human Tissue Act (65 of 1983), International Health Regulations Act (of 1974), Medical Schemes Act (of 1997) Medicines and Related Substances Act (of 1965, as amended), Mental Health Care Act (of 2002), National Health Act (of 2003), National Health Laboratories Services Act (of 2000), Nursing Act (of 2005), Pharmacy Act (of 1974, as amended), Prevention and

Treatment of Drug Dependency Act (of 1992), and South African Medical Research Council Act (of 1991).

## **2. Review of the current financial year (2011/12)**

### **Key achievements**

The department scaled up and expanded services targeting women and children by implementing the comprehensive plan for Maternal, Neo-natal Child and Women's Health (MNC&WH) and nutrition. Special focus was on the reduction of preventable causes of child morbidity and mortality, and improvement of maternal and neonatal health. Focus was also given to immunisation and vitamin A coverage, integrated management of childhood illnesses (IMCI), prevention of mother to child transmission (PMTCT) of HIV, antenatal and postnatal care and contraceptive services, and screening of cervical cancer.

The department scaled-up implementation of the National Strategic Plan for HIV/Aids and sexually transmitted infections (STIs). This involved the integration and comprehensive management of HIV/Aids, STIs and TB, including voluntary medical circumcision, provider-initiated voluntary testing and counselling (VCT), rollout of roving teams for initiation of anti-retroviral therapy (ART) and scaling up of the ART programme at all levels. The department also scaled-up and expanded the implementation of the TB plan in all districts. Focus was also given to the integration of services with HIV/Aids to manage co-infection and multidrug resistant and exclusively drug resistant (MDR/XDR) TB. This integration, done to ensure better health outcomes, has improved detection and surveillance of the directly observed treatment short-course (DOTS). This ensured that patients complete their treatment and do not default, as this can result in an escalation of infection to MDR/XDR TB, which is harder and more expensive to treat.

The department continued with the implementation of the Provincialisation of primary healthcare. This is in line with the consolidation of one single authority in terms of health service delivery.

Five thousand two hundred and eighty two (5 282) students were recruited from the disadvantaged communities for training as community health workers, nurses and emergency medical services personnel and other health professionals. Seven hundred and fifty (750) bursaries were provided to assist with the recruitment of health professional staff including doctors, pharmacists and therapists.

The department also implemented a three-pronged strategy to accelerate infrastructure delivery. The first entailed accelerating the delivery of health infrastructure through Public Private Partnerships (PPPs), especially for the construction and refurbishment of the Nelson Mandela Academic Hospital. The second element of the strategy entailed improving primary health facilities. The third consisted of enhancing health technology and Information Communication Technology (ICT) infrastructure. The department commenced with an audit of essential equipment in the province. The audit will inform the finalisation of the National Health Technology Strategy. Maintenance of health technology ensures safety is prioritised. An ICT strategy was also finalised and implemented.

For example, the following hospitals are in the process of revitalisation: Cecilia Makiwane, Frontier, St Elizabeth, St Patricks and Dr Malizo Mpehle. In addition, the health infrastructure grant allocation for the current financial year has primarily been used for the Cecilia Makiwane Student Nurses Training College, and oncology divisions of Frere and Livingstone hospitals.

The urge to improve the standard of service delivery necessitated the development of the National Core Standards to assess the performance of health facilities. These standards have been adjusted extensively to better suit provincial needs. The department supported all health facilities to produce quality improvement plans. The plans focus on improving clinical patient safety, safety of employees and visitors, implementing infection prevention and control, ensuring availability of medicines at all material times, enhancing cleanliness to restore the public image of health facilities and reducing the spread of infection, reducing waiting times, and promoting positive and caring attitudes of health professionals and administrators.

### **Significant challenges**

In recent years and the current financial year, the department has been confronted with the challenges of poor service delivery and financial performance. Audit reports were unfavourable and pointed to weak management of human resources. These areas, coupled with three consecutive years of over spending especially on the compensation of employees have resulted in the need to implement measures to turn around the management and performance of the department.

With the assistance of the Provincial Treasury and the cabinet budget sub-committee, the department has put in place a comprehensive Turnaround Plan (TAP). The plan targets the optimisation and efficiency of three critical areas, namely: operations, human resource management and financial management.

To achieve operational efficiency, a number of initiatives were undertaken: rationalisation of all health facilities (hospitals, community health centres and clinics), revitalisation of the seven health districts and 27 sub-districts with social compacts, restoration of public confidence in primary healthcare for an effective referral system, effective distribution of maternal obstetrics units, equitable distribution of trauma units especially along national roads, and revitalisation of primary healthcare, pharmaceutical and radiology services.

With regards to human resource management, efforts were concentrated on the following: organisational realignment, Persal clean-up, document management (HR Rems which is an electronic document management software and leave administration and management tool), enhancing HR effectiveness and efficiencies, strengthening case management (labour relations), capacity building and talent management (including a recruitment and retention strategy of critical skills), change management and employee communication, initiating a culture of change and leadership, and improving HR strategy and planning.

Focus on finance has been on the creation of an adequately resourced finance structure, provision of working tools (such as Systems, BAS and LOGIS), and striving to achieve unqualified audit opinion by 2012/13. Focus also geared towards normalising the accounts payables component by strengthening controls, rollout cost centre

management, applying reform standards for the formulation and implementation of performance budgeting, maximising revenue generation, collection, retention and recovery of debts through improved systems of identification, as well as recording and collection.

Another key area of finance is supply chain management, where special attention was given to ensuring measures are in place to make informed sourcing and supply management decisions, maximising buying leverage, improving contract compliance and supplier performance, ensuring payment of suppliers are made within 30 days, and reducing direct procurement and administrative costs.

### **3. Outlook for the coming financial year (2012/13)**

Over the MTEF, the department will continue to work intensively on its multi-year turnaround processes and its rationalised service delivery platform for the proposed reclassification of health facilities. This includes the following:

- Optimum distribution based on population distribution and travel times to facilities at all levels of the system
- Analysis of activities to develop thresholds for the minimum and maximum catchment populations for facilities at all levels of the system
- Analysis of minimum and required staffing levels by level of care to deliver a full package of care and the network of healthcare facilities to be supported by them.

In terms of the Revitalised Primary Healthcare (RPHC), each sub-district will be expected to provide the following components of primary healthcare: community-based services, health posts, mobile clinic services, fixed clinics and community health hospitals.

The RPHC service delivery platform will have 85 community health hospitals, 413 Type A (8-hour clinics), 68 Type B (24-hour clinics), 216 satellite and 128 mobile PHC facilities (including health posts).

Hospital services will be provided through 27 district hospitals with Level 1 beds, 20 specialised hospitals (12 of which are TB hospitals and eight are psychiatric hospitals); and four tertiary hospitals.

National Health Insurance (NHI) pilots, as a key priority over the MTEF, will be on the ward-based primary healthcare model with trained workers per ward including community health workers (CHW). The pilots will also include district-based specialist teams to focus on child and maternal mortality and the school health model to address basic eye and hearing care, immunisation, contraceptive and reproductive health as well as substance abuse advice at school level.

The national Maternal and Child Health Plan indicates a set of activities. A number of these have been prioritised for implementation over the MTEF including community-based post-natal checks, training and supervision of obstetric and paediatric services in district hospitals, development of school health services partly in preparation for the introduction of Human Papillomavirus (HPV) vaccine to prevent cancer of the cervix.

In previous years, the department moved to the earlier treatment threshold for pregnant mothers and persons with TB. Treatment at CD4 of 350 for all patients will now be initiated.

Although the forensic pathology grant was shifted into the provincial equitable share (PES) in 2011/12, funding has been retained in the forensic pathology sub-programme and the capital upgrading of mortuaries will continue. To improve health technology, clinical engineering workshops will be upgraded and the maintenance of clinical equipment will be prioritised. The filling of a number of registrar posts (trainee specialist) in a range of disciplines including paediatric and obstetric services will be prioritised. This will result in improvement in capacity whilst contributing to governments' priority of job creation.

The department will continue to address norms and standards for public hospitals. It is also intending to support the strengthening of public hospitals in preparation for NHI. Funding for hospitals will be gradually directed towards hospitals with higher workloads in keeping with the report on hospital funding undertaken by the Oxford Policy Research Organisation and jointly approved. As capacity improves and these projects accelerate, expenditure on this grant will increase as a result of the Cecilia Makiwane Construction.

The department intends to establish a fully-developed and functioning tertiary/academic hospital and an integrated teaching environment primarily within the Nelson Mandela Academic Hospital complex in Mthatha. There are also plans to integrate the academic hospital complexes in East London and Port Elizabeth to the same standard. The first phase of upgrading and recapitalisation includes immediate maintenance. A detailed plan for upgrading dilapidated colleges will be conducted during 2012/13.

#### **4. Reprioritisation**

To enforce the implementation of the austerity measures of Circular 7 of 2009, the department has also put in place processes to monitor and evaluate the implementation of the austerity measures. These measures are targeted at non-core Standard Chart of Account (SCOA) items such as venues and facilities, catering at departmental meetings, travel and subsistence and communication. Furthermore, the department expects to realise savings from the implementation of its turnaround strategies and austerity measures. A major reprioritisation exercise was undertaken within the budget baseline and realised an amount of R208 million. Funds were reprioritised from programme two (goods and services) and programme eight (capital payments). The amounts were allocated to the compensation of employees' budget which resulted in a nominal growth of 4.3 per cent.

#### **5. Procurement plans**

Eighty five per cent of the department's budget is spent on goods and services under main SCOA items, namely: Inventory, medicine and medical supplies, food and food supplies, other consumables, communication, consultants/professional services such as laboratory services, contractors, lease payments (including operating leases but

excluding finance leases), property payments, and agency and support/outsourced services.

The department's procurement plans over the MTEF will be sourced from the national contracts for inventory (for medicine, medical supplies and the provincial transport trading entity for operating leases/fleet). National agreements are already in place with the National Health Laboratory Services, South African National Blood Services and Telkom.

The Multi-Agency Working Group (MAWG) on supply chain management will continue with the intervention to focus on the procurement system of the department. It is anticipated that this intervention will lead to an improved functioning of the department which will in turn enhance the capacity of the department to provide more and better quality health services to the population of the province.

## 6. Receipts and financing

### 6.1. Summary of receipts

**Table 3.2: Summary of departmental receipts: Vote 3: Health**

R' 000	2008/09	2009/10	2010/11	2011/12			2012/13	2013/14	2014/15	% change

Nursing Colleges	-	-	-	-	-	-	14 660	21257	25 760	-
National Health Insurance	-	-	-	-	-	-	11 500	26 835	38 334	-
Expanded Public Works Programme Incentive Grant for Provinces	-	-	6 012	16 578	16 578	-	1 000	-	-	-
Social Sector Expanded Public Works Programme Incentive Grant for Provinces	-	-	-	-	-	-	13 780	-	-	-
Departmental receipts	90 102	79 815	85 973	77 518	78 337	81201	81 394	85 850	91001	0.24
Total receipts	10 499 083	12 090 018	13 272 828	14 237 249	14 812 568	15 590 424	15 166 038	16 346 338	17 440 175	( 2.72)

Total receipts for the department are made up of equitable share, conditional grants and own revenue. Table 3.2 shows that total departmental receipts grew substantially from R10.5 billion in the 2008/09 financial year to R13.2 billion in 2010/11. In 2011/12, receipts are estimated at R15.6 billion. Equitable share decreases by 1.54 per cent from the 2011/12 revised estimate. This is due to the projected over expenditure in 2011/12 arising from compensation of employees. Major contributors to the projected over expenditure are the costs of unfunded mandates such as Human Resources Operational Project Task Team (HROPT) and OSD (Occupational Specific Dispensation).

For the 2012 MTEF, a decline is evident in all sources of funding, except for departmental receipts showing an increase of 0.24 per cent. This is mainly attributed to rollovers received during the adjustment estimates of 2011/12. Within conditional grants, only the comprehensive HIV/Aids grant and the newly introduced NHI and nursing colleges' grants show positive growth of 15.88 per cent and 5.46 per cent, respectively.

## 6.2. Departmental receipts collection

Table 3.3: Departmental receipts collections: Vote 3: Health

R' 000	2008/09	2009/10	2010/11	2011/12			2012/13	2013/14	2014/15	% change from 2011/12
	Audited			Main budget	Adjusted budget	Revised estimate	Medium-term estimates			
Tax receipts	-	-	-	-	-	-	-	-	-	
Casino taxes	-	-	-	-	-	-	-	-	-	
Horse racing taxes	-	-	-	-	-	-	-	-	-	
Liquor licences	-	-	-	-	-	-	-	-	-	
Motor vehicle licences	-	-	-	-	-	-	-	-	-	
Sales of goods and services other than capital assets	79 844	73 598	81 024	73 442	75 044	76 644	77 114	81 355	85 422	0.61
Transfers received	-	-	-	-	-	-	-	-	-	
Fines, penalties and forfeits	-	-	-	-	-	-	-	-	-	
Interest, dividends and rent on	200	239	( 37)	160	121	206	168	177	186	( 18.45)
Sales of capital assets	-	-	-	-	-	360	-	-	859	( 100.00)
Transactions in financial assets and liabilities	10 058	5 978	4 986	3 916	3 172	3 991	4 112	4 318	4 534	3.03
<b>Total</b>	<b>90 102</b>	<b>79 815</b>	<b>85 973</b>	<b>77 518</b>	<b>78 337</b>	<b>81 201</b>	<b>81 394</b>	<b>85 850</b>	<b>91 001</b>	<b>0.24</b>

Table 3.3 shows that own receipts are projected to increase from a revised estimate of R81.2 million to R91 million in the 2014/15 financial year. The fluctuating trend of own receipts over the period 2008/09 to the 2011/12 is due to transactions in financial assets and liabilities, whereby once-off recoveries of staff debts are difficult to estimate with accuracy. The department collects the bulk of its own revenue from the sale of goods and services other than capital assets in respect of patient fees. Revenue is also collected from board and lodging from staff that utilise the departmental accommodation facilities. The collection of patient fees relates to the recovery of the cost of services provided to patients.

The tariffs for patient fees are reviewed annually and the fees charged at hospitals are based on the fees introduced by the National Department of Health. The fluctuating trend is also evident against patient fees, as the department has over the years collected most of its revenue through claims submitted to the Road Accident Fund (RAF). The conditions of the contract with RAF have changed and this has had a negative impact on the revenue collected by the department.

It should also be noted that during 2008/09 to 2011/12, the impact of high unemployment resulted in more people making use of free health services, thereby resulting in less revenue being collected for the treatment of patients at health facilities. Own revenue increases from the 2012/13 MTEF, which is in line with the department's strategy to retain the over-collection of revenue at certain identified wards at public hospitals where higher tariffs for patient fees will be charged.

The department has been allowed to retain own revenue with the provision that it does not overspend its future allocated budget. An amount equal to any over-expenditure of the department will be withheld from available surplus revenue in order for the provincial revenue fund to accommodate any unauthorised expenditure. This will allow these wards to be self-sustainable.

## 6.3. Donor funding

Table 3.6: Summary of departmental donor funding receipts: Vote 3: Health

R' 000	2008/09	2009/10	2010/11	2011/12			2012/13	2013/14	2014/15	% change from 2011/12
	Audited			Main budget	Adjusted budget	Revised estimate	Medium-term estimates			
Donor organisations										
European Union	21 000		36 059							
Total receipts	21 000		36 059							

Table 3.6 shows the summary of donor funding received from various institutions from 2008/09 to 2010/11. This funding was earmarked and used for treatment and/or training around primary healthcare programmes, HIV/Aids and TB programmes. The European Union fund was used for primary healthcare programmes whereas the global, Centre for Disease Control (CDC) USA and Belgium funds all supported HIV/Aids and TB programmes. There is currently no indication from the donors that the department will receive any donations during the 2012 MTEF.

Table 3.7: Summary of departmental donor funding payments: Vote 3: Health

Table 3.7: Summary of departmental donor funding payments, vote 3: Health

Global	1 147									
<b>Total payments</b>	<b>12 518</b>	<b>15 492</b>	<b>12 640</b>							

Table 3.7 gives a summary of how donor funding received was used for intended purposes.

## 7. Payment summary

### Key assumptions

The following assumptions were taken into consideration when this budget was formulated:

- Salary increases have taken into account, amongst others, adjustments contained in the wage agreement.
- Reprioritisation has been done due to financial resource constraints experienced by the department.

### Programme summary

Table 3.8: Summary of provincial payments and estimates by programme: Vote 3: Health

Table 3.6. Summary of provincial payments and estimates by programme for 2008/09 to 2014/15

## Expenditure trends

Table 3.8 shows a summary of payments and estimates per programme, whereas Table 3.9 shows the same summary per economic classification. The tables show that total payments grew from R10.5 billion in 2008/09 to a revised estimate of R15.6 billion in 2011/12. From the 2012/13 to 2014/15, the growth is from R15.2 billion to R17.4 billion, which is a negative 2.72 per cent growth.

At programme level, focus on spending continues to be on district health services, provincial hospital services, central hospital services, and health facilities development and maintenance (programmes 2, 4, 5 and 8 respectively). District health services, provincial hospital services, and central hospital services (programmes 2, 4 and 5 respectively) are patient-driven service delivery programmes, and health science and training is a health professions training and development support programme.

Comparing the revised estimates in the 2011/12 financial year and the 2012/13 estimates, health facilities development and maintenance (programme 8) shows a significant negative growth of 20.4 per cent. This negative growth is a result of roll-overs received by the Hospital Revitalisation and Hospital Infrastructure Conditional Grants and reprioritisation to cater for compensation of employees.

In terms of economic classification, significant declines of 12.4 per cent and 26.9 per cent are evident when the 2011/12 financial year revised estimate is compared with the 2012/13 financial year estimates for goods and services and payments for capital assets. The decline in goods and services is due to a higher base in 2011/12. This is a result of rollovers and projected over expenditure due to accruals, increased demand for health, higher rates of inflations for medical supplies and services, and increases in fuel prices and food for patients.

The substantial drop of 24.9 per cent between the 2011/12 financial year and the 2012/13 financial year in expenditure on buildings and other fixed structures is due to the roll-over

received. The significant drop of 32.1 per cent in machinery and equipment is due to the department's last minute decision to lease ambulance fleet services rather than procuring its own fleet.

## 7.1. Expenditure by district municipality

The expenditure of the department by the benefiting district

Expenditure on conditional grants is projected to increase from R1.3 billion in the 2008/09 financial year to a revised estimate of R2.9 billion in the 2011/12 financial year. During the 2012 MTEF period, estimates will increase from R2.6 billion to R3.3 billion. The increase is mainly attributed to increased allocation towards the implementation of government's key policy priorities such as controlling the spread and impact of HIV/Aids, improving infrastructure facilities and increasing the delivery capacity of health personnel. The Forensic Pathology Services Grant ceases to be a conditional grant and gets absorbed into equitable share. Two new conditional grants, Nursing Colleges and National Health Insurance, are introduced in the 2012 MTEF period. These are meant for infrastructure upgrades of nursing colleges and address national government's strategic policy on providing equitable healthcare to all.

### Conditional grant payments by economic classification

Of which: Capitalised goods and services	-	-	-	-	-	-	-	-	-	-
Payments for financial assets	-	-	-	-	-	-	-	-	-	-
Total	1 313 995	1 591 434	1 993 373	2 415 458	2 871 191	2 854 612	2 624 508	2 939 270	3 313 523	(8.06)

The framework as set out in the Division of Revenue Act and the departmental business plans of each conditional grant determines the economic classification of each conditional grant. Conditional grants contributing largely to payment for capital assets are hospital revitalisation, national tertiary services, health infrastructure and the newly introduced nursing colleges grants. All other grants contribute in varying degrees to the other economic classifications, but predominantly to goods and services. The significant increase in payments for capital assets from R402 million in 2008/09 to R1.019 billion in the 2011/12 financial year is predominantly due to the roll-overs received and challenges experienced with procurement processes.

## 9. Infrastructure payments

### Departmental infrastructure payments

Table 3.15: Summary of departmental payments and estimates on infrastructure: Vote 3: Health

Table 3.15: Summary of departmental payments and estimates on infrastructure: Vote 3: Health										
R' 000	2008/09	2009/10	2010/11	2011/12			2012/13	2013/14	2014/15	% change from 2011/12
	Audited			Main budget	Adjusted budget	Revised estimate	Medium-term estimates

Maintenance and repairs	146 277	200 964	211 178	238 613	292 997	223 634	239 602	262 042	274 941	7.14
Infrastructure transfers	-	-	9 500	-	-	-	-	-	-	-
Current	-	-	9 500	-	-	-	-	-	-	-
Capital	-	-	-	-	-	-	-	-	-	-
Current infrastructure	146 277	200 964	220 678	238 613	292 997	223 634	239 602	262 042	274 941	7.14
Capital infrastructure	877 708	841 299	676 822	949 378	1 150 119	773 245	918 992	957 776	1 079 784	18.85
Total	1 023 985	1 042 263	897 500	1 187 991	1 443 116	996 879	1 158 594	1 219 818	1 354 725	16.22

In the period 2008/09, infrastructure spending decreased from R1 billion to R897.5 million in 2010/11. From the 2011/12 revised estimate, infrastructure allocation increased from R996.9 million to R1.2 billion in 2012/13, resulting in a 16.22 per cent increase.

Over the 2012 MTEF period, the department will spend at least R3.7 billion on its health infrastructure facilities which represents a 16.22 per cent increase in infrastructure payments from 2008/09. R1.3 billion of this budget will go towards hospitals under the hospital revitalisation programme, of which the upgrade of Cecelia Makiwane Hospital will constitute a majority share estimated to be more than R700 million. The new facility is expected to be fully functional by December 2014. Maintenance of general health infrastructure and purchase of medical equipment remain priorities. To this extent, over R700 million is expected to be spent on this item over the next three financial years. This has led to a 20.2 per cent increase in existing infrastructure assets of which there is an increase of 30.8 per cent in upgrades and additions. The decrease of 4.5 per cent on refurbishment is due to the change of the status of projects from refurbishment to upgrades.

The year 2012 has been earmarked to be a starting period for the piloting of the National Health Insurance (NHI). The infrastructure programme is setting aside a minimum of R29 million as a top up to the general maintenance and refurbishment and upgrade in the affected facilities.

Water treatment remains one of the challenges facing health facilities, more so in the rural areas. In an attempt to deal with this issue, an amount of R96 million will be spent on water and sanitation projects at various levels. TB still remains a problem in the province and it is for this reason that the infrastructure programme will invest R50 million on TB facilities.

The department is in the process of commissioning a full condition assessment of the identified facilities. This exercise will be done in collaboration with the Council for Scientific and Industrial Research (CSIR). It is the outcome of this assessment that will detail the scope of the work to be done and possible associated costs.

The condition assessment exercise will start in these facilities and the subsequent refurbishment is expected to cost more than R200 million. Nursing colleges will also receive attention and over R63 million will be used to refurbish the existing facilities at Lilitha College.

As with other service delivery areas, focus will also be placed on psychiatric hospitals. Accordingly, more than R70 million will be spent in the next three financial years.

## 10. Departmental public-private partnership (PPP) projects

<b>Total</b>	<b>17 708</b>	<b>37 616</b>	<b>38 524</b>	<b>56 650</b>	<b>56 650</b>	<b>56 650</b>	<b>58 483</b>	<b>61 407</b>	<b>65 092</b>	<b>3.24</b>

Operations of the Humansdorp, Port Alfred and Settlers hospitals account for the unitary charges allocated in projects under implementation. Other project costs allocated in proposed projects are for planning other PPPs that the department might pursue in future, such as upgrading nursing colleges.

## 11. Transfers

### 11.1. Transfers to public entities

The department does not have any transfers to public entities.

### 11.2. Transfers to other entities

The department does not have entities.

### 11.3. Transfers to local government by category

Table 3.19: Summary of departmental transfers to local government by category: Vote 3: Health

R' 000	2008/09	2009/10	2010/11	2011/12			2012/13	2013/14	2014/15	% change from 2011/12

Category C	72 239	77 969	75 617	-	-	-	-	-	-	-
<b>Total</b>	<b>234 316</b>	<b>201 570</b>	<b>274 281</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>-</b>

Note: Excludes regional services council levy.

Table 3.19 shows the summary of departmental transfers to local government for the 2012 MTEF. There are no projected transfers to local government due to the department having provincialised municipal clinics.

## 12. Programme description

### Programme 1: Administration

**Description and objective:** This programme comprises two sub-programmes, namely, the Office of the MEC and management. The objectives of these sub-programmes are detailed below:

- **Office of the MEC:** Provides political and strategic direction to the department by focusing on transformation and change management. This includes liaising with branches on major policy and administration matters, circulating cabinet resolutions to the HOD for implementation, and responding to parliamentary questions and ensuring that resolutions of the legislature are implemented.
- **Management:** Oversees human, financial, information and infrastructure resources. It is made up of the Office of the Superintendent General, policy, strategic planning, coordination and regulatory functions.

### Expenditure trends

The management sub-programme accounts for bulk expenditure in this programme. The programme's total expenditure grew significantly from R507.5 million in the 2008/09 financial year to a revised estimate of R604.4 million in the 2011/12 due to the expansion in the organogram, introduction of allocations to projects driven through the superintendent general's office and payment for accruals.

In line with the National Service Delivery Agreement element of strengthening health system's effectiveness in the 2012 MTEF, the programme shows positive growth. However, overall growth declines from 2011/12 and the 2012/13 estimate by 14.8 per cent due to the shifting of funds to sub-programme two in order to fund cost pressures in compensation of employees.

The summary of payments and estimates for this programme according to economic classification is shown in Table 3.22. The major cost drivers of the programme are compensation of employees and goods and services. In line with both the President's and

the Minister of Finance's utterances on job creation and filling critical administration posts, the funding for compensation of employees has grown by 16.5 per cent in the 2012/13 financial year. The projected growth means that vacant posts will be filled as a matter of urgency in 2012/13 since the imposed moratorium in the 2011/12 financial year.

### ***Programme 2: District health services***

**Description and objective:** Ensure delivery of primary healthcare services through the implementation of the district health system. This programme has nine sub-programmes with the following objectives:

- **District management** is responsible for the effectiveness and functionality of seven districts and municipalities within the social needs cluster, especially within the Integrated Sustainable Rural Development Programme (ISRDP) and Urban Renewal Programme (URP) nodes and the identified 12 poorest municipalities. It also coordinates health services, referrals, supervision, evaluation and reporting.
- **Community health clinics** manage the provision of preventive and curative care and implements the priority health programme through accessible clinics and mobile services in 24 sub-districts.
- **Community health centres** render 24-hour health services, maternal health at midwifery units and the provision of trauma services as well as the integration of community based mental health services within the down referral system.
- **Community based services** manage the implementation of the community-based health services framework.
- **Other community services** manage the devolution of MHS to the municipalities and implements the strategy aimed to control the spread of communicable diseases through ports of entry in the province, provides oral health services at community level (including schools and old age homes), strengthens the traditional health services through health education campaigns, prevention of substance, drug, and alcohol abuse to reduce unnatural deaths and geriatric services for the elderly as a supportive and rehabilitation service.
- **HIV/Aids** sub-programme renders primary healthcare services in respect of the prevention of HIV/Aids infections through campaigns, continuous care, management and treatment (CCMT) and strengthening the accreditation process of ART sites for accessibility.
- **Nutrition** sub-programme renders nutrition services as a poverty alleviation program, providing nutrition supplements including inter alia Vitamin A, Iodine and Zinc aimed at specific target groups (children, pregnant mothers and the aged) to address malnutrition, provision of formula feeds for health facilities, establishment of food gardens at clinics, hospitals and CHCs, as well as assisting communities to start community gardens in consultation with the Department of Rural Development and Agrarian Reform.
- **Coroner services** render forensic pathology services in order to establish the circumstances and causes surrounding unnatural deaths.
- **District hospitals** provide comprehensive and district hospital service to the province.

### Expenditure trends

The summary of payments and estimates for this programme per sub-programme is depicted in Table 3.24. Significant growth from R4.9 billion in the 2008/09 financial year to a revised estimate of R7.6 billion in the 2011/12 financial year took place in the programme. When comparing the 2012/13 financial year estimates with the 2011/12 financial year revised estimates, sub-programmes 2.3 and 2.8 show significant decreases of 17.66 per cent and 11.30 per cent respectively. The reduction in sub-programme 2.3 is due to correcting a misallocation. The decrease in sub-programme 2.8 is due to the rollover of the Forensic Pathology Grant.

Positive growth is projected in sub-programmes 2.6 and 2.7. These sub-programmes relate to key priorities like improved health system effectiveness, nutrition, HIV/Aids and job creation. Their effective operations contribute significantly to reducing morbidity and mortality associated with malnutrition, tuberculosis and HIV/Aids. The drastic increase in sub-programme 2.5 is due to the shifting of funds from administration (programme 1) in order to fund the cost pressures in compensation of employees in this sub-programme.

Table 3.25 shows the summary of payments and estimates for this programme according to economic classification. Due to the nature of core services rendered by this programme, its main cost drivers are compensation of employees and goods and services which together account for 97.9 per cent of the total estimates for the programme in the 2012/13 financial year.

Despite the enormous growth of the HIV/Aids conditional grant from which ARVs and laboratory services are sourced, the department shows huge pressure under goods and services. This pressure is likely to increase with the introduction of the 350 CD4 count threshold at which ART is to be administered. Requirements from national health for increased immunisation of babies and children under five years will also add to the challenges experienced under goods and services.

The decrease in estimates for transfers to departmental agencies and municipalities is a result of provincialisation of such. Projected expenditure on buildings and other fixed structures declines because such expenditure now takes place in health facilities development and maintenance (programme 8). Machinery and equipment also drops because the department has taken a strategic decision to lease machines, such as those for radiology, instead of buying them.

### Service delivery measures

	Number of patients referred from districts to Tertiary Hospitals	20 023	19 623	18,785	17 060
	Number of PAH's completely provincialized	13	5	10	

Table 3.26 shows the selected service delivery measures for district health services (programme 2) per sub-programme. This programme is one of the main service delivery programmes of the department. Due to the nature of services provided, performance is measured by the reduction of the rate of disease incidence such as TB and the increase in the number of facilities equipped to provide anti-retroviral treatments. Performance under nutrition is measured by Vitamin A coverage rates and the number of learners screened in schools. The performance of district hospitals is measured by the expenditure per day equivalent (PDE), average length of stay and bed utilisation rates. Most of these indicators are projected to improve over the MTEF period.

### Programme 3: Emergency medical services

**Description and objective:** Renders an equitable efficient, effective, professional and sustainable emergency medical service. The programme comprises two sub-programmes with the following objectives:

- **Emergency medical services:** Renders emergency medical services including ambulance services, special operations, communications and air ambulance services; and
- **Planned patient transport:** Renders planned patient transport including local outpatient transport (with the boundaries of a given town or local area) and inter-city/town outpatient transport (into referral centres).

### Expenditure trends

Table 3.27 shows the summary of payments and estimates for emergency medical services (programme 3) according to sub-programmes. Emergency medical services is the most important of this programme. Total expenditure for this programme has grown substantially from R457.7 million in the 2008/09 financial year to an estimated R737.2 million in the 2012/13 financial year. The increase in expenditure is primarily attributable to the employment of qualified personnel to deliver emergency services and eradicate one-man crews in ambulances. From the 2011/12 revised estimate to 2012/13, expenditure is estimated to grow by 4.59 per cent.

The summary of payments and estimates for this programme according to economic classification is shown in Table 3.28. When compared to the 2011/12 financial year, the estimated expenditure in the 2012/13 financial year shows an increase of 3.39 per cent in goods and services. For 2012/13, compensation of employees increases by 20.48 per

cent to accommodate the required additional qualified personnel. Due to continuing leases of ambulances instead of outright purchase, there is a reduction of 97.93 per cent in expenditure on machinery and equipment.

### Service delivery measures

Table 3.29: Service delivery measures: Vote 3 - P3: Emergency Medical Services

Table 3.29: Service delivery measures: Vote 3 - P3: Emergency Medical Services					
Outputs	Performance indicators	2011/12	2012/13	2013/14	2014/15
		Estimate	Medium-term estimates		
Emergency Medical Services					
	Number of Emergency Vehicles operational		100	100	100
	Number of additional Planned Patient Transport vehicles procured		15 PVT Busses	15 PVT Busses	15 PVT Busses
	% calls from obstetric services responded to within 30 minutes in urban areas.	50%	55%	60%	70%
	% of obstetric emergencies responded to within 60 minutes in rural areas.	50%	60%	65%	70%
Planned Patient Transport					
	. Rostered Ambulances	0.29	0.36.	0.44.	0.50.
	. Percentage of P1 calls with a response time <15 minutes in an urban area	62.5%	65%	67.5%	70%
	. Percentage of P1 calls with a response time of <40 minutes in a rural area	55%	60%	65%	70%

Table 3.29 shows the selected service delivery measures for emergency medical services (programme 3) per sub-programme. Performance in this programme is measured by the number of emergency vehicles in operation as well as response rates in urban and rural areas. The department is projecting enhanced performance under this programme over the MTEF period.

### Programme 4: Provincial hospital services

**Description and objectives:** Provides cost effective, good quality, effective and efficient secondary hospital services. The programme has three sub-programmes with the following objectives:

- **General/regional hospitals:** Rendering hospital services at general specialist level, and providing a research and training platform for health workers.
- **TB hospitals:** Converting current TB hospitals into strategically placed centres of excellence, catering for hospitalisation of a small percentage of patients in conditions allowing for isolation during the intensive phase of treatment, as well as application of standard multi-drug resistant (MDR) protocols.
- **Psychiatric mental hospitals:** Rendering specialist psychiatric hospital services for people with mental illness and intellectual disability, and providing a research and training platform for health workers.

### Expenditure trends

Table 3.30 gives a summary of payments and estimates for provincial hospital services (programme 4) per sub-programme. Expenditure for this programme increased moderately from R2.7 billion in the 2008/09 financial year to a revised estimate of R3.9 billion in the 2011/12 financial year. Comparing the revised estimate with the 2012/13 estimate indicates an increase of 0.8 per cent.

Sub-programme 4.1(regional hospitals) is the most important cost driver of this programme, accounting for R3.1 million of the total estimates of R4 billion in the 2012/13 financial year. The growth in sub-programme 4.2 (TB hospitals) from the 2011/12 financial year to the 2012/13 financial year is maintained at a positive level of 4 per cent. Of concern is the minimal growth in psychiatric hospitals. This is an indication that more attention is required in establishing the appropriate funding levels for this category of health care.

Table 3.31 shows the summary of payments and estimates for provincial hospital services (programme 4) per economic classification. The major cost drivers are current payments comprising of compensation of employees and goods and services. A major portion of the total expenditure for the programme in the 2012/13 financial year is accounted for by these payments.

Spending on compensation of employees increases to R3.2 billion in the 2012/13 financial year due to carry through costs of the payment of Occupational Specific Dispensation (OSD) to nurses, medics, specialists, dentists, pharmacists and therapeutic professionals; as well as the payment of the HR operational task team (HROPT) claims. When comparing the revised estimate of the 2011/12 financial year with the 2012/13 financial year estimates, expenditure increases minimally at a positive rate of 0.2 per cent. In line with the general increasing burden of disease, expenditure on goods and services in the 2012/13 financial year increases to R760.6 million or 5.9 per cent when compared to the revised estimate of the 2011/12 financial year.

Payments for capital assets are projected to decrease to R18.2 million in the 2012/13 financial year. This is because the procurement of most of essential machinery and equipment will be completed in the 2011/12 financial year, and over the MTEF, only the replacement of outdated machinery and/or entering into lease agreements for the provisioning of essential medical equipment will be done (and does not require a major

financial outlay). This will also address the ever challenging problem of obsolescence of highly specialised equipment.

### Service delivery measures

Table 3.32: Service delivery measures: Vote 3 - P4: Provincial Hospital Services					
Outputs	Performance indicators	2011/12	2012/13	2013/14	2014/15
		Estimate	Medium-term estimates		
General (Regional) Hospitals	Perinatal mortality rate in regional hospitals	30/1000 live births	30/1000 live births	30/1000 live births	30/1000 live births
	Caesarean section rate	32	32	32	32
	Separations - Total	234 507	249 783	265 059	280 335
	Patient Day Equivalents - Total	1 646 963	1 660 362	1 673 761	1 687 160
	OPD Headcounts - Total	1 536 085	1 785 527	2 020 969	2 263 411
	Average length of stay	4.8	4.8	4.8	4.8
	Bed utilisation rate	75	75	75	75
	Expenditure per patient day equivalent (PDE)	1 647	1 838	2 029	2 220
	Percentage of complaints of users of Regional Hospital Services resolved within 25 days	75	80	85	90
	Percentage of Regional Hospitals with monthly Maternal Mortality and Morbidity Meetings	100	100	100	100
TB Hospitals	Number of TB Hospitals implementing the National Core Standards (6 Priority Areas)	5	7	9	11
	Number of TB Hospitals conducting clinical audits	11	11	11	11
	Number of Health care professionals working in TB Hospitals contracting	Not measured	10	5	
Psychiatric Mental Hospitals	Number of mentally ill clients admitted	4 680	4 580	4 360	4 000
	Number of dedicated beds for child and adolescent care in psychiatric institutions	20	20	20	20
	Number of Psychiatric Hospitals conducting clinical audits	4	4	4	4
	Number of eligible patients completing rehabilitation	90	120	150	180

Table 3.32 shows the selected service delivery measures for provincial hospital services (programme 4) per sub-programme. Performance in general hospitals is measured by the patient day equivalent, bed utilisation and average length of stay rates. TB hospitals' performance is measured by the number of hospitals implementing National Core Standards, number of hospitals conducting clinical audits and number of healthcare professionals working in TB hospitals. Performance in psychiatric mental hospitals is measured by the reduction in the number of mentally ill clients admitted and the number of dedicated beds available. The key indicators are estimated to improve over the MTEF.

### Programme 5: Central hospital services

**Description and objectives:** Provide cost-effective, good quality and efficient tertiary hospital services.

R' 000	2008/09	2009/10	2010/11	2011/12			2012/13	2013/14	2014/15	% change from 2011/12

### Expenditure trends

Table 3.33 depicts the summary of payments and estimates for central hospital services (programme 5) per sub-programme. In relation to the revised estimate of the 2011/12 financial year, the growth in the 2012/13 financial year is 5.5 per cent.

The summary of expenditure and estimates for central hospital services (programme 5) per economic classification is shown in Table 3.34. The major cost drivers for the programme are current payments comprising of compensation of employees and goods and services. Goods and services account for the majority of total expenditure whereas with other programmes compensation of employees takes up the largest proportion of expenditure.

In relation to the 2011/12 financial year revised estimates, compensation of employees shows substantial positive growth of 22.2 per cent and a decrease of 2.6 per cent for goods and services. This is due to reprioritisation to fund cost pressures in compensation of employees. Expenditure for machinery and equipment in the 2011/12 financial year declines by 4.2 per cent and buildings and other fixed structures increase significantly by 62 per cent to R46 million. This increase is due to buildings and other fixed structures that need to be completed at Fort England Psychiatric Hospital, PE Hospital Complex and at Nelson Mandela Academic Hospital.

## Service delivery measures

Table 3.35: Service delivery measures: Vote 3 - P5: Central Hospital Services

Outputs	Performance indicators	2011/12	2012/13	2013/14	2014/15
		Estimate	Medium-term estimates		
Provincial Tertiary Services	Number of designated tertiary beds available	Not measured	1 190	1 190	1 190
	Number of oncology patients treated	Not measured	18 500	19 320	19 750
	Number of hematology patients treated	Not measured	4 225	5 000	5 500
	Caesarean section rate	49.4	50	50	50
	Total separations	227 028	227 492	227 886	227 50
	Patient Day Equivalents	1 626 046	1 626 544	1 626 875	1 626 800
	OPD Total Headcounts	861 450	861 863	862 112	862 050
	Average length of stay	5	5.5	5	5
	Bed utilisation rate (based on usable beds)	75	75	75	75
	Expenditure per patient day equivalent (PDE)	1,431	2,660	3,112	3,560

Table 3.36 shows the selected service delivery measures for central hospital services (programme 5) per sub-programme. Performance in this programme is measured by the number of patients treated and the number of tertiary beds available. It is envisaged that the performance will improve in the next three years.

## Programme 6: Health science and training

**Description and objective:** Provides training, development and academic support to all health professionals and employees in the province. The programme has five sub-programmes with the following aims:

- **Nursing training colleges:** Training of nurses at undergraduate and post-basic level
- **EMS training college:** Training of rescue and ambulance personnel
- **Bursaries:** Provision of bursaries for health science training programmes at undergraduate and postgraduate levels
- **Other training:** Provision of PHC related training for personnel provided by the regions, and skills development interventions for all occupational categories in the department.

### Expenditure trends

Table 3.36 portrays the summary of payments and estimates for health science and training (programme 6) per sub-programme. Total payments grew from R548 million in the 2008/09 financial year to an estimated R651 million in the 2012/13 financial year. Health professions training and development grant largely accounts for this growth. A decrease of 1.1 per cent in relation to the 2011/12 financial year revised estimates is shown due to the rollover of funds for other training.

The summary of payments and estimates for health science and training (programme 6) according to economic classification is shown by Table 3.37. As this is a training programme, the major cost driver for the programme is compensation of employees. However, when comparing the revised estimates of the 2011/12 financial year with the 2012/13 financial year, goods and services decreases by 46 per cent and transfers to households increases by 14852 per cent. This is a result of the reclassification of bursaries issued to non-employees from goods and services to transfers to households per SCA.

### Service delivery measures

Table 3.38: Service delivery measures: Vote 3 - P6: Health Science And Training

Outputs	Performance indicators	2011/12	2012/13	2013/14	2014/15
		Estimate	Medium-term estimates		
Nursing Training Colleges	Number of Post-basic nurses graduated	120	200	200	200
	Number of one year midwifery course nurses graduated	117	200	200	200
	Intake of nurse students	1 437	1 508	1 579	1 600
	Basic nurse students graduating	1 332	1 398	1 450	1 500
EMS Training College	Number of emergency care technicians graduated	New course		30	100
	Number of rescue practitioners graduated	36	60	60	60
Bursaries	Students with bursaries from the province	750	887	950	1 000
Other Training	Number of Clinical associate students trained	79	60	72	12
	Number of Health Workers Trained in Comprehensive Emergency Obstetric Care	65	24	24	9
	Number of Registrars in training	115	130	150	20
	Number of clinical Technicians trained	6	10	12	2
	Number of Orthotists Prosthetists students trained	5	8	13 (new)	18 (5 new)

Table 3.38 shows the selected service delivery measures for health science and training (programme 6) per sub-programme. Performance in this programme is measured by the number of professionals trained and students with bursaries in the province. To meet the service delivery requirements, the department is projecting an increase in the number of health professionals trained annually.

### Programme 7: Healthcare and support services

**Description and objective:** Deals with orthotic and prosthetic services and houses clinical support management. The latter is composed of laboratory services, radiography services and rehabilitation services. All clinical support services are budgeted for under programmes dealing with hospital services, ie programmes 2 (district health services), 4 (provincial health services) and 5 (central hospital services).

The programme has two sub-programmes with the following objectives:

- **Orthotic and prosthetic services:** Renders specialised clinical orthotic and prosthetic services

- **Medicine trading account (pharmaceuticals depot management):** Renders specialist cross-functional pharmaceutical, supply chain, financial, risk and human resources management to strengthen service delivery in the two pharmaceutical depots.

### Expenditure trends

Table 3.39 shows the summary of payments and estimates for healthcare and support services (programme 7) according to sub-programmes. Expenditure increased significantly from R46.7 million in the 2008/09 financial year to a revised estimate of R97.8 million in the 2011/12 financial year. In the 2012/13 financial year, payments increase by 4.6 per cent to R102.3 million.

The department expects to employ more staff at the medical depots, hence the increase in compensation of employees by 10.7 per cent as shown in Table 3.40.

### Service delivery measures

Table 3.41: Service delivery measures: Vote 3 - P7: Health Care And Support Services

Outputs	Performance indicators	2011/12	2012/13	2013/14	2014/15
		Estimate	Medium-term estimates		
Orthotic and Prosthetic Services	Number of Health Facilities requiring 24 hour emergency blood services	68	82	97	112
	Number of clients supplied with wheelchairs	2 475	2 875	3 275	3 675
	Number of clients supplied with hearing aids	1 275	1 475	1 675	1 875
	Number of clients supplied with orthoses	4 000	6 000	7 000	8 000
Medicine Trading Account	% of order fulfillment of essential drugs at the depot.	75%	80%	85%	90%
	% Tracer drug stock out rate at the Depots	<5%	<4%	<3%	<2%
	% supplies to depots received within contract lead time.	80%	85%	90%	95%
	% facilities received their order supplies from depots within 5 days	80%	85%	90%	97%
	% of hospital pharmacies with pharmacist responsible	100%	100%	100%	100%
	% of hospital pharmacies that comply with requirements relating to storage of medicines	90%	100%	100%	100%
	% of medicine which has expired at all pharmaceutical facilities	<4%	<3%	<3%	<3%

Table 3.41 shows the selected service delivery measures for healthcare and support services (programme 7) per sub-programme. Performance is measured by the efficiency of healthcare and support services offered. These are measured by the fulfilment of

essential drug orders, the percentage of pharmacists that comply with the requirements for the storage of medicines.

### **Programme 8: Health facilities development and maintenance**

**Description and objective:** Provides new health facilities, upgrades and maintains existing facilities. The programme has three sub-programmes with the following objectives:

- **Community health facilities:** Focuses on the construction of new clinics and community health centres (CHC) and the upgrade of existing clinics and CHCs
- **Emergency medical rescue services:** Focuses on improving emergency medical rescue services infrastructure
- **District hospital services:** Focuses on the upgrade of district hospitals
- **Provincial hospital services:** Focuses on the upgrade of provincial hospitals.

### **Expenditure trends**

The summary of payments and estimates per sub-programme are shown in Table 3.42. Total payments increased from R934.3 million in the 2008/09 financial year to an estimate of R1.1 billion in the 2012/13 financial year. The summary of payments and estimates for health facilities development and maintenance (programme 8) according to economic classification is shown in Table 3.43. The major cost drivers for the programme are goods and services and payments for capital assets. These two cost items account for the majority of the budget for the 2012/13 financial year.

Expenditure on goods and services showed a fluctuating trend in the past but grows strongly from the 2010/11 financial year. This includes money spent on contracts relating to the maintenance of infrastructure and machinery and equipment. In the 2012/13 financial year, estimates for buildings and other fixed structures as well as machinery and equipment decrease by 26.32 and 34.52 per cent respectively. This is due to rollovers received and challenges in the procurement processes.

### Service delivery measures

Outputs	Performance indicators	2011/12	2012/13	2013/14	2014/15
		Estimate	Medium-term estimates		
Community Health Facilities	Number of health facilities rehabilitated and refurbished in line with RSDP & NHI service standards	New PI	New PI	5 hospitals	5 hospitals
	Number of new Clinics commissioned	21	6	10 clinics/CHCs	1
	Number of Clinics Upgraded and commissioned	1	2		2
	Number of Community Health Centres commissioned	2			1 (new)
District Hospital Services	Number of projects within District Hospitals new and upgraded	8	3	10	4
Provincial Hospital Services	Number of projects within provincial hospitals new and upgraded	4	2	2	1
	Number of projects within an institution completed and commissioned.	6	1	4	1
	Number of hospitals equipped as per norms & standards	10	20	30	40
Other Facilities	Number of water and sanitation plants upgraded	8	4	3	2
	Number of services maintained annually	Not measured	10	10	10
	Equitable share capital programme as % of total health expenditure	2.1	2.3	2.1	2.5
	Expenditure on facility maintenance as % of total health expenditure	2.1	2.7		4
	Average backlog of service platform in PHC facilities	22	20	18	15

Table 3.44 shows the selected service delivery measures for health facilities development and maintenance (programme 8) per sub-programme. Due to the fact that this programme relates primarily to infrastructure, performance is measured by the number of institutions upgraded, refurbished, commissioned and completed.

## 13. Other programme information

### Personnel numbers and costs per programme

Programme R'000	As at 31 March 2009	As at 31 March 2010	As at 31 March 2011	As at 31 March 2012	As at 31 March 2013	As at 31 March 2014	As at 31 March 2015
1. Health Administration	1 086	3 600	7 815	1 648	1 095	1 084	1 082

5. Central Hospital Services	28	28	29	26	26	21	21
6. Health Science And Training	1 894	3 510	2 777	2 922	2 269	2 246	2 242
7. Health Care And Support Services	62	59	179	188	181	179	179
8. Health Facilities Development And Maintenance	39	80	60	61	66	66	66
<b>Total personnel numbers</b>	<b>39 225</b>	<b>41 866</b>	<b>46 807</b>	<b>50 555</b>	<b>50 439</b>	<b>49 930</b>	<b>49 831</b>
Total personnel cost (R'000)	6 084 689	7 398 367	8 390 748	9 383 637	9 790 294	10 206 534	10 738 770
Unit cost (R'000)	155	177	179	186	194	204	216

Table 3.51 shows personnel numbers and costs per programme. As at 31 March 2009, the department had 39 225 personnel on its system. This number has grown rapidly to a projected 50 555 as at 31 March 2012. A major portion of personnel fall within programme 2 (district health services) and programme 4 (provincial hospital services). The reason for the significant increase in personnel numbers is due to the appointment of additional doctors and clinical staff during this period, while the increase in cost is due to

the adjustments in OSD, HROPT and annual improvement in conditions of service (ICS). The total cost of personnel grows steadily from R6.1 billion in the 2008/09 financial year to an estimated R10.7 billion in the 2014/15 financial year. The unit cost of personnel grows accordingly from R155 thousand to R216 thousand in the same period. The establishment currently consists of 40 439 filled posts, 1 frozen post and 36 924 vacant posts, and in total amounts to 77 364 approved posts.

Table 3.52 shows personnel numbers and costs by component. The number of staff increased significantly in the human resources component from the 2010/11 financial year, from 651 to a revised estimate of 2,555 in the current financial year. The number of staff in the finance component declined from 790 to 394 in the same period. In the current financial year, the total number of staff is made up of 37,256 full time workers, 360 part-time workers and 12,981 contract workers.

Table 3.54 shows the information on training for the department. The number of personnel trained varies from year to year. In the current financial year, the department is targeting to have 46 205 personnel trained, 24 643 male and 21 563 female. It should be noted that there are personnel who have attended more than one course, these have

been captured as separate staff trained. Therefore the number of staff trained is not a true reflection, but rather the number of training opportunities attended.

***Structural changes***

There were no changes made to the department's structure.
