## Foreword

---

The 2013 MTEF budget is tabled under constrained domestic economic environment and an uncertain global economic outlook which will be with us for some time. The current unfavorable economic outlook is continuing to have a negative impact on the country and Province's limited resources and is placing unprecedented strain on our provincial resources.

Whilst recognizing the need not to constrain growth on programmes that supports the National Development Plan (NDP) and government priorities, the emphasis is and would remain over the MTEF, implementation of the cost saving measures by reducing the budgets of non-core items and reprioritization within the limited resources with the main objective of directing savings towards initiatives and programmes that support the government priorities.

In preparing the 2013 MTEF budget and having considered the minimal growth in the equitable share as a result of the updates to the equitable share formula based on the 2011 Census data, the budget continues to support outcomes approach; the National Development Plan (NDP) and the funding proposals are informed by the following key assumptions:

- Alignment to the 2011 Medium Term Strategic Framework and resource constraints;
- Allocations support funding for government outcomes approach and the implementation of National Development Plan (NDP);
- Sustained growth for education, health, social welfare and security services;
- Provision for key government priorities: economic and social infrastructure development and maintenance, provision of water and sanitation, improvements in education and health, strengthening growth and employment creation of jobs, reducing the levels of property in the Province and promotion of progress towards a more equal society and an inclusive growth path;
- Departmental spending patterns including the capacity and readiness to implement infrastructure projects

The priority area with the highest funding is social sector and has been increased steadily over the next three years of the MTEF. Funding for economic, investment, employment cluster including governance and administration sector also continue to record moderate growth over the MTEF.

The 2013 MTEF allocations are as a result of detailed and extensive intergovernmental consultations. The Province followed a credible and inclusive budget process which ensured support and endorsement by the Executive Council. In implementing the budget, the Province should at all times guard against fruitless and wasteful expenditure and this would be achieved through quality spending in support of the Annual Performance Plans aligned programmes which supports the government priorities and departmental mandates.

I trust that this document will be a useful tool to understand and measure the extent to which the Provincial government has been able to respond to the socio-economic challenges experienced by the citizens of the Province.

# 1. Socio-economic Outlook

This chapter outlines the general economic outlook of the North West Province using national and provincial and municipal statistics. It also gives an overview of Geographic, Demographic, socio-economic and economic developments in the North West Province. Various statistical information has been sourced from Stats SA, Census data (2001, 2007 and 2011) Community Survey (2007), mid-year population estimates (2011), general Household Survey (2011) and the GDP release third quarter 2012.

The highest real annual economic growth rates per region - as measured by the gross domestic product per region (GDPR) at market prices - for 2011 compared with 2010 were recorded in Gauteng at 4.0 per cent, followed by Western Cape and Kwa-Zulu- Natal at 3.6 per cent each respectively. The relative ranking of the contribution of the nine provinces to the South African economy did not change between 1996 and 2011. Gauteng remains the largest (34.5 per cent), followed by KwaZulu-Natal (15.7 per cent) and Western Cape (14.2 per cent). These three dominant provinces (collectively contributing nearly two-thirds to the South African economy) have, however, shown a decline in their contribution over the period.

The North West province registered Gross Domestic Product (GDP) growth rate of 2.7 per cent in 2011, 0.8 per cent less than the preliminary National GDP growth rate of 3.5 per cent. The GDP contribution of the North West province to the South African economy was around 6.5 per cent in 2011, relatively low compared to the contribution by dominant provinces stated above. The largest contributors to the North West GDP are mining and quarrying, and general government services.

The consumer price index (CPI) for all urban areas, which is a measure of consumer inflation, averaged 5.6 per cent in 2012 for the South African economy and is expected to average 5.8 per cent in 2013, and 5.2 per cent in 2014. Annual CPI Inflation for the North West is at 6.1 per cent for 2012, 0.5 per cent higher than the National average.

South Africa's employment increased in five of the nine provinces between the third and the fourth quarter of 2012, compared to the third and the fourth quarter of 2011, with the North West being the third largest contributor. Access to basic services like quality health care, basic education, water and sanitation are comparatively low relative to other provinces. The events in Marikana and other mines in the province undermined GDP growth in the province in 2012 and continue to underpin unemployment to some extent. The unemployment rate of North West is at 23.3 per cent for the fourth quarter of 2012, emanating from national and provincial economic and socio-economic pressures and challenges.

## 1.1 Geographical Landscape of the North-West Province

### *1.1.1 Provincial boundary changes from 2001 to 2011*

A number of changes occurred in terms of provincial and municipal boundaries during the period between Census 2001 and 2011. Of the nine provinces, only two provinces (Western Cape and Free State) were not affected by changes, as depicted by an almost unchanged land area in square kilometres from table 1 below. The provincial boundary changes were mostly as a result of eight cross boundary municipalities which were absorbed in full into respective provinces.

**Table 1: Geographical land area changes since 2001**

Province name	Provincial code	Land area in square kilometres 2011	Land area in square kilometres 2001
Western Cape	1	129 462	129 449
Eastern Cape	2	168 966	169 954
Northern Cape	3	372 889	362 599
Free State	4	129 825	129 824
KwaZulu-Natal	5	94 361	92 305
North West	6	104 882	116 231
Gauteng	7	18 178	16 936
Mpumalanga	8	76 495	79 487
Limpopo	9	125 754	122 816
<b>Total</b>		<b>1 220 813</b>	<b>1 219 602</b>

Source: Census 2011, StatsSA

The shift of the national boundary over the Indian Ocean in the North East corner of KwaZulu-Natal to cater for the iSimangaliso Wetland Park led to the increase in South Africa's land area. North West province was affected the most by being decreased in size to an extent of 113 48,9 square kilometres.

Most of this was absorbed by the Northern Cape Province. The second largest decrease in size was the extent of Mpumalanga which decreased by 2 992 square kilometres with Limpopo province being the main recipient of this land area. It should be noted that the increased extent of KwaZulu-Natal is not mainly based on the exchange of Umzimkulu (formerly in the Eastern Cape Province) and Matatiele (formerly in KwaZulu-Natal), but due to the shift of the national boundary over the Indian ocean in the North East corner of KwaZulu-Natal to cater for the iSimangaliso Wetland Park.

#### *1.1.2 Local municipal boundary changes, 2001–2011*

In 2001, the geographical frame consisted of 262 local municipalities. This total has been reduced to 234 local municipalities in the 2011 geographical frame. The difference of 28 municipalities is explained as follows: In total 25 District Management Areas (DMAs) were absorbed into the existing provinces. The City of Tshwane absorbed a further two municipalities (Nokeng Tsa Taemane and Kungwini). A new municipality (Kagisano Molopo – NW379) was established by merging NW391 (Kagisano) and NW395 (Molopo). A total of 107 municipalities decreased in geographical area while 155 municipalities had an increase in geographical area.

## 1.2 Demographic Profile

Demographic factors that affect the development and economy of the province are outlined in this section. The table below shows an increase in South African population from around 44.8 million in 2001 to 51.8 million in 2011. This represents a total increase of about 7 million or a percentage increase of 16 per cent over this period. The population of the North West increased from 3 million to 3.5 million people over the same period.

**Table 2: Population distribution by province, population group, sex and functional age group (number & Percentage), census 1996, 2001, and 2011**

Source: General Household Survey 2011, StatsSA

Table 3 shows that Gauteng, with approximately 11 million residents, was the most populous province in 2011, followed by KwaZulu-Natal and Eastern Cape with respectively 10.6 million and 6.7 million residents. Although Northern Cape is the largest province geographically, it remains the least populous province in the country with about 1.2 million people.

**Table 3: Number of Individuals per province, 2002-2011**

Table 4 below outlines the estimated number of households in each province. The General Household Survey (GHS) was benchmarked against 14.8 million households in South Africa for 2011. Gauteng contained the largest number of households, followed by KwaZulu-Natal, Eastern Cape and Western Cape. Northern Cape, the least populous province, also had the smallest number of households

**Table 4: Number of households per province, 2002-2011**

Province	Number of households (Thousands)									
	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011

Source: General Household Survey 2011, StatsSA

Table 5 below shows demographic profile change of the North West Province over a decade, 2002 to 2011. The population of the province increased by 0.3 million to 3.5 million, a 9 per cent increase which translates, on average, into a 0,9 per cent annual increase over the period under review.

**Table 5: Changes in provincial demographic profile, 2002-2011**

Description	Period	Effective change
Population growth	2002 – 2011	0,9 per cent per annum; 3,2 million to 3.5 million
Population increase	2002 – 2011	Increase of 0.3 million or 9 per cent
Number of households	2002	0.8 million
	2011	1.0 million (25 per cent increase)

Table 6 and graph 1 below outline the distribution of age and gender in the province. It is clear that a large percentage of the North West population is below the age of 40. Population is inversely related to age, in that an increase in age corresponds to population declines. The economically active population therefore decays with time.

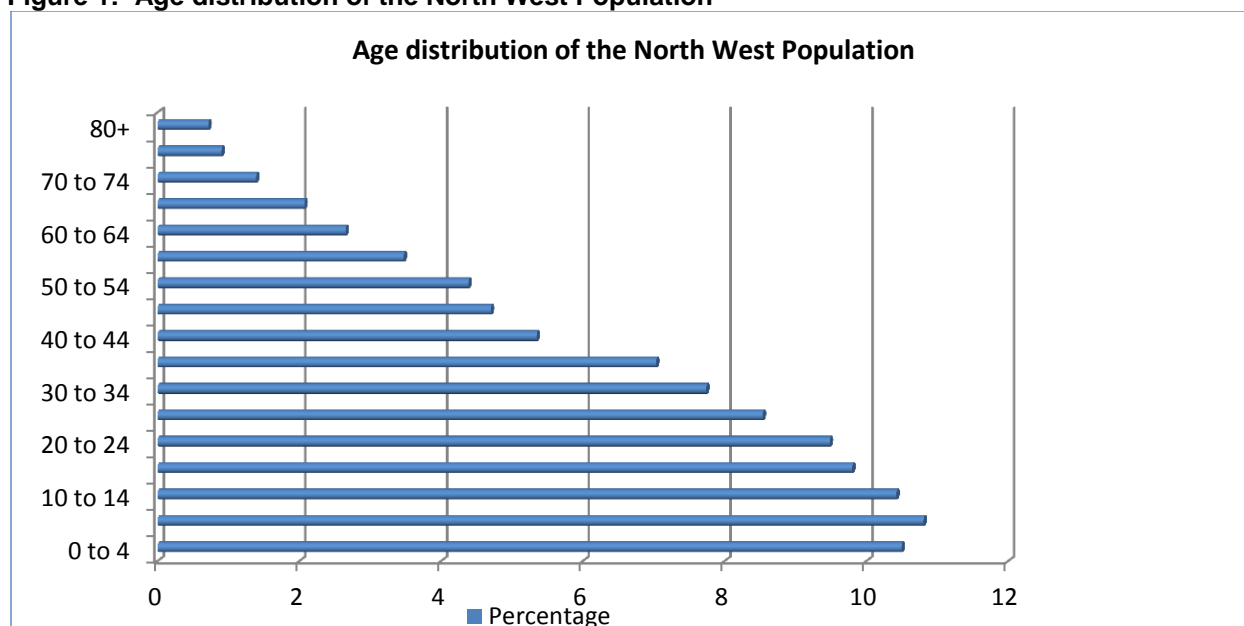

**Table 6 Gender and age distribution**

North West Province				Percentage Age Distribution	Percentage Male in NW	Percentage Female in NW
Age	Male	Female	Total			
0 to 4	205 133	199 215	404 348	12	50.73	49.27
5 to 9	168 156	164 147	332 303	9	50.60	49.40
10 to 14	156 197	147 516	303 713	9	51.43	48.57
15 to 19	161 776	154 756	316 532	9	51.11	48.89
20 to 24	177 506	165 885	343 391	10	51.69	48.31
25 to 29	171 887	155 775	327 662	9	52.46	47.54
30 to 34	145 356	126 327	271 683	8	53.50	46.50
35 to 39	122 520	114 219	236 739	7	51.75	48.25
40 to 44	104 298	100 628	204 926	6	50.90	49.10
45 to 49	95 401	91 718	187 119	5	50.98	49.02
50 to 54	82 551	78 015	160 566	5	51.41	48.59

Source: Provincial mid-year population estimates by age and sex, 2011.

The gender distribution of population shows that there are more males in the North West province than females up to the age of 54. Beyond the age of 54, statistics show that females exceed males measurably, which could also imply that females live longer than males in the North West province.

**Figure 1: Age distribution of the North West Population**

### 1.2.1 Education

Education is considered a principal instrument to achieve empowerment, economic growth and a general improvement in welfare. The South African Bill of Rights, as part of the Constitution of South Africa, protects the right of everyone to basic education. This also includes adult basic education and further education.

The initial focus of this section is to provide an overview of various aspects of the education profile of South Africans, particularly in the North West province, over the period 2002 to 2011.

#### 1.2.1.1 Educational profile of learners aged 0–4 years

Government has made significant efforts to increase access to early childhood development (ECD) by introducing a reception programme as well as expanding the provisioning of services to children from birth to four years. Figure 2 summarises attendance of centres for young children aged 0–4 years and the extent to which they were exposed to activities across provinces during 2011. Approximately 35 per cent of South African children attended ECD centres. In North West about 30 per cent of children aged 0–4 attended early learning centres, with a large percentage of children receiving ECD anywhere else other than at centres and at home. This implies that there is still a significantly large number of children in this age group not exposed to early learning centres.

**Figure 2: Percentage of children attending learning centres and being exposed to Early Childhood Development per province, 2011**

Source: StatsSA

### 1.2.1.2 General attendance of individuals aged 5 years and older at educational institutions

In 2011, 35.9 per cent of individuals aged 5 years and older attended an educational institution. Table 7 shows that nationally, just under 89 per cent of individuals above the age of five years attended school, while a further 4.3 per cent attended universities. By comparison, only 1.6 per cent of individuals attended further education and training (FET) colleges. North West has the highest percentage of ABET enrolment but is one of the lowest performing provinces when it comes to pre-school education and Higher education institution attendance.

**Table 7: Percentage of persons aged 5 years and older attending educational Institutions by province and type of Institution, 2011**

	Province

Unspecified was excluded from the denominator when calculating percentages

Nationally, the proportion of persons aged 7 to 24 who were attending educational institutions remained relatively stable between 2002 and 2011, decreasing only slightly from 73.9 per cent to 73.6 per cent over this time. Enrolment rates declined in four of the nine provinces over this period. The highest enrolment in 2011 was recorded in Limpopo (79.3 per cent), and the lowest in Western Cape (68.9 per cent) compared to other provinces. The main reasons provided by persons in the age group 7–24 years for not attending any educational institutions are depicted in Figure 3. Nationally, almost two-thirds (35.9 per cent) of individuals cited a lack of money for not studying as being the main reason for not attending an educational institution. This reason was offered by 41.6 per cent of respondents in North West.

**Figure 3: Main reasons given by persons aged 7 to 24 years for not attending an educational institution by province<sup>3</sup>, 2011**

Source: StatsSA

The most important problems experienced by those currently enrolled at educational institutions are presented in Figure 4. Nationally, a lack of books (6.1 per cent) and high tuition fees (5.8 per cent) were singled out as the most challenging problems, followed by large class sizes (4.9 per cent). In North West, 11.4 per cent of learners complained about a lack of books.

**Figure 4: Problems experienced in schools**

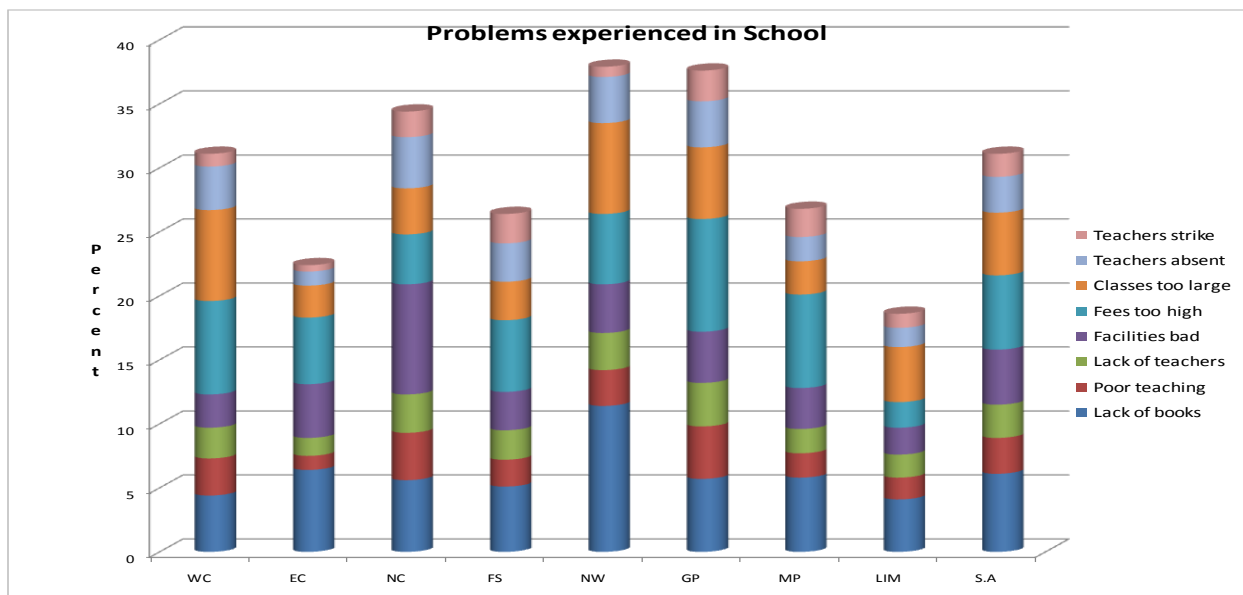

Figure 5 illustrates that the largest increase in the percentage of persons over the age of 20 years with no education took place in Limpopo and Mpumalanga while the smallest changes were observed in Gauteng and Western Cape. North West was somewhere close to the median, registering percentages of around 15 per cent and 10 per cent for 2002 and 2011 respectively.

**Figure 5: Percentage of persons aged 20 years and older with no formal education per province, 2002 and 2011**

## 1.2.2 Health

Table 8 and table 8(i) shows that the users of private health-care facilities seemed to be more satisfied with those facilities than users of public health-care facilities across all provinces. Whereas 97.2 per cent of users were satisfied with private facilities (92.9 per cent were very satisfied), only 83.6 per cent of users of public health-care facilities were satisfied. Only 61.9 per cent of individuals that used public health care facilities were very satisfied. Respondents using public health-care facilities in North West (73.9 per cent), Gauteng (80.5 per cent), and Northern Cape (81 per cent) were least satisfied with these facilities, while 90.3 per cent of households in Limpopo reported being satisfied.

**Table 8: Level of satisfaction with public health care, 2011**

White individuals remain much more likely to belong to a medical aid than members of other population groups. While almost 69.7 per cent of the white population belonged to some medical scheme, only 41.1 per cent of the Indian/Asian, 20.3 per cent of the coloured and 8.9 per cent of the black African population groups were covered by such schemes at the time the survey was conducted in 2011. Figure 6 reveals that Western Cape (25.1 per cent) and Gauteng (23.9 per cent) contained the highest percentage of medical aid members while Limpopo (7.2 per cent) and Eastern Cape (11.1 per cent) had the lowest proportion of medical aid membership. Noticeable drops in the percentage of medical aid members are observed in all provinces between 2002 and 2011 except Western Cape and Northern Cape where slight increases occurred.

**Figure 6: Percentage of individuals who are members of medical aid schemes per province, 2009 - 2011**

*Source: StatsSA*

### 1.2.3 Disability

The findings are presented in Table 6 below. 5.2 per cent of South Africans aged 5 years and older were classified as disabled. Women (5.4 per cent) were slightly more likely to be disabled than men (5 per cent). Northern Cape (10.2 per cent), North West (7.7 per cent) and Free State (6.7 per cent) presented the highest rates of disability in the country. No clear patterns emerge when the findings are compared to the results from 2009 and 2010. Nationally, the percentage of disabled individuals over the age of four years increased from 5.7 per cent in 2009 to 6.3 per cent in 2010, before declining again to 5.2 per cent in 2011.

**Table 9: Number and percentage of persons aged 5 years and older with disability by gender and Province, 2011**

### 1.2.4 Social security services

Figure 9 summarises the provincial distribution of individuals and households that benefited from social grants in 2011. More than a third of individuals in Eastern Cape (38.5 per cent), Limpopo (38.1 per cent) and Northern Cape (37.7 per cent) are grant beneficiaries, compared to 17.2 per cent in Gauteng and 20.2 per cent in Western Cape. Similarly, more than half of households in Limpopo (58.9 per cent), Eastern Cape (56.7 per cent) and Northern Cape (55.7 per cent) received at least one grant compared to 28.5 per cent of households in Gauteng and 37 per cent of households in Western Cape.

More than a third of black African individuals (33.5 per cent) received a social grant, compared to 23.3 per cent of coloured individuals, and 12.4 per cent Indian/Asian individuals. Only 6.0 per cent of the white population received grants. North West grant beneficiaries were in the region of around 31 per cent of its population.

**Figure 7: Percentage of individuals and households benefiting from social grants per province, 2011**

Source: StatsSA

According to census 2011, as presented in figure 8 below, Limpopo remained the province with the lowest average annual household income at R56 844, followed by Eastern Cape where the average was R64 539. At the other end of the scale, Gauteng had the highest average annual household income at R156 243 followed by Western Cape with a figure of R143 460. The order of provinces from 2001 to 2011 remained the same in terms of average annual household income. The five provinces with the lowest average annual household income in 2001 have seen the largest percentage increases during the period 2001 to 2011. Households in Mpumalanga had the largest increase of 148.9 per cent followed by those in Limpopo (147.3 per cent), Free State (145.1 per cent), North West (131.7 per cent) and Eastern Cape (120 per cent). In contrast the average annual household income for households in Western Cape increased by 83.6 per cent during this period and the increase in Gauteng was 98.9 per cent.

**Figure 8: Average annual household income by province**

Source: StatsSA

## 1.3 Socio-economic indicators

### 1.3.1 Housing conditions

This section presents selected findings over the period 2002 to 2011. The analysis will focus on the type of dwellings in which South African households live and then on the extent of use of state-subsidised housing as well as the perceived quality thereof. The characteristics of the dwellings in which households live and their access to various services and facilities provide an important indication of the well-being of household members. It is widely recognised that shelter satisfies a basic human need for physical security and comfort. Figure 9 shows the percentage of households according to their tenure status. The percentage of households that fully own the dwellings they inhabit decreased from 58.1 per cent in 2010 to 53.6 per cent in 2011. This decline was accompanied by a slight decline (of 0.9 percentage points to 10 per cent in 2011) for households that partially owned their house, and a slight increase in the percentage of households that rented accommodation. The greatest increase was observed for households maintaining 'other' tenure arrangements (10.4 per cent in 2010 to 15.5 per cent in 2011).

**Figure 9: Dwelling ownership status for households living in formal dwellings, 2002–2011**

Source: StatsSA

The percentage of households living in informal dwellings per province is presented in Figure 10. Households in Gauteng (20.4 per cent), North West (18.5 per cent) and Western Cape (15.1 per cent) were most likely to live in informal dwellings, while the smallest prevalence of informal dwellings was observed in Limpopo (4.5 per cent) and Eastern Cape (6.5 per cent). The percentage of households that maintained what is described as 'other' tenure arrangements increased from 7.7 per cent in 2008 to 15.5 per cent in 2011. These arrangements include living in dwellings rent-free, for example with parents or other relatives, and are a sign of financial stress as households bundle together their living arrangements to save some money on rent or perhaps rates and taxes. It is important to note that these arrangements started to become more prevalent after the financial crisis of 2008 – a time during which an increasing number of households started to experience financial strain.

**Figure 10: Percentage of households living in informal dwellings per province, 2011**

Source: StatsSA

According to statistics SA, respondents were asked to indicate whether the walls and roof of their dwellings were: very good, good, needed minor repairs, weak or very weak. Figure 11 summarises the findings specifically for 'RDP' or state-subsidised dwellings. It was found that across the country, 15.5 per cent of households felt that the walls of their dwellings were weak or very weak, whilst 16.1 per cent felt that the roof was weak or very weak. There was considerable variation between provinces in the perceptions about housing quality. Most complaints were noted in the three Cape provinces: Western, Eastern and Northern Cape. Households in Gauteng and Limpopo seemed most content with the quality of their home's walls and roofs. North west' quality of state-subsidised dwellings was somewhere in between.

**Figure 11: Percentage of households that said that their 'RDP' or state-subsidised house has weak or very weak walls and/or roof by province, 2011**

Source: StatsSA

### 1.3.2 Electricity

The percentage of South African households that were connected to the mains electricity supply increased from 76.8 per cent in 2002 to 82.7 per cent in 2011. This is presented in Figure 12. The highest percentage of households that were connected to the mains electricity supply was recorded in Free State (92.9 per cent) and Northern Cape (90.3 per cent). By contrast, less than three-quarters (74.7 per cent) of households in Eastern Cape and 77.9 per cent of households in KwaZulu-Natal had similar connections. Gauteng (-53 per cent) and Western Cape (-3.4 per cent) experienced decreases in the number of households connected to the mains electricity supply between 2010 and 2011, while the biggest increases were recorded in Limpopo (+5.6 per cent) and Eastern Cape (+4.9 per cent). North West has consistently been hovering around the commendable 85 per cent mark for households connected to electricity for years: 2002, 2003, 2005, 2007, 2009 and 2011.

**Figure 12: Percentage of households connected to the mains electricity supply by province, 2002, 2003, 2005, 2007, 2009 and 2011**

Source: StatsSA

The results portrayed in Figure 13 below show that the proportion of households using electricity as a source of energy for lighting by province increased over the period. The highest proportion was recorded in Western Cape (93.4 per cent) while the lowest was recorded in Eastern Cape (75 per cent).

**Figure 13: Percentage of households using electricity for lighting by province: Census 1996, 2001, 2011 and Community Survey 2007**

Source: StatsSA

Figure 14 shows the upward trend in the proportion of households using electricity for cooking in all the provinces from over time 1996 to 2011.

**Figure 14: Percentage of households using electricity for cooking by province: Census 1996, 2001, 2011 and Community Survey 2007**

Source: StatsSA

The proportion of households using electricity for heating increased over time in all provinces as shown in Figure 15. The highest proportion was recorded in Gauteng (74.3 per cent) followed by Western Cape (63.1 per cent).

**Figure 15: Percentage of households using electricity for heating by province: Census 1996, 2001, 2011 and Community Survey 2007**

Source: StatsSA

The main sources of energy used for cooking in 2011 by province are presented in Figure 16. As it could be expected, the use of electricity as the main source of energy for cooking was highest in Western Cape (89.5 per cent) and Free State (88.0 per cent), and the lowest in provinces considered to be more rural, such as Eastern Cape (59.8 per cent) and Limpopo (50.4 per cent). Eastern Cape contained the highest proportion of households using paraffin (16.7 per cent), followed by North West (10.9 per cent) and Gauteng (10.2 per cent). By contrast, only 2 per cent of households in Western Cape used paraffin for cooking. Almost half (44.5 per cent) of households in Limpopo still used wood for cooking, followed by a fifth of households in Eastern Cape (19.3 per cent), Mpumalanga (18.9 per cent) and KwaZulu-Natal (18.6 per cent). Only approximately 1.7 per cent and 1.2 per cent respectively of households in Western Cape and Gauteng used wood for cooking.

**Figure 16: Main source of energy used for cooking by province, 2011**

Source: StatsSA

### 1.3.3 Access to piped water

The proportion of households having access to piped water in the dwelling in North West increased from 85.6 per cent in 2002 to 89.6 per cent in 2011. This was slightly above the national average 89.5 per cent in 2011. The proportion of households with access to piped or tap water in the dwelling, off-site or on-site by province is presented in Figure 17.

Households in Western Cape (99.5 per cent) and Gauteng (97.4 per cent) enjoyed almost universal access to water. Despite noticeable improvements since 2002, the percentage of households with access to water in Eastern Cape (74.8 per cent), Limpopo (82.2 per cent), KwaZulu-Natal (84.5 per cent) and Mpumalanga (86.9 per cent) still lagged the national average of 89,5 per cent. Figure 18 differentiates between on site and off site.

**Figure 17: Percentage of households with access to piped or tap water in the dwelling, off-site or on-site by province, 2002–2011**

Source: StatsSA

**Figure 18: Percentage of households with access to piped water by province: Census 2011**

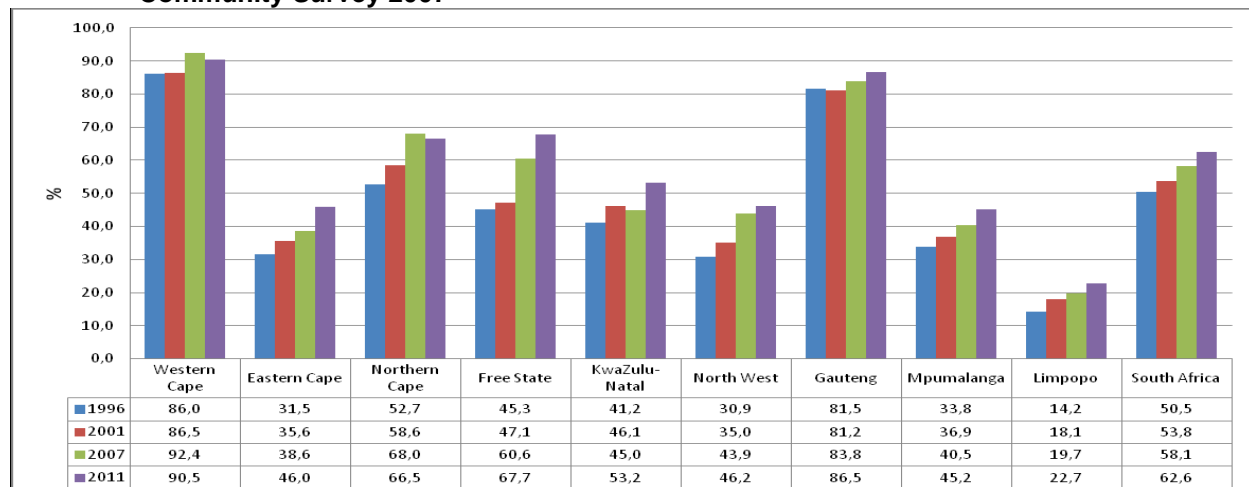

Source: StatsSA

### 1.3.4 Toilet facilities

Figure 19 shows that the percentage of households with access to flush or chemical toilet has increased in all the provinces since 1996. Western Cape is the province with the highest percentage (90.5) of households with access to flush or chemical toilet, followed by Gauteng, Free State and Northern Cape with 86.5 per cent, 67.7 per cent and 66.5 per cent respectively. The percentage of households that have access to flush or chemical toilet in Eastern Cape, KwaZulu-Natal, North West, Mpumalanga and Limpopo is below the national average of 62.6 per cent.

**Figure 19: Percentage of households with a flush toilet by province: Census 1996, 2001, 2011 and Community Survey 2007**

Source: StatsSA

### 1.3.5 Refuse removal

Figure 20 shows that the proportion of households with access to refuse removal by local authority/private company at least once a week increased in all provinces since 1996. Western Cape had the highest proportion of households with access to refuse removal at 91.1 per cent, followed by Gauteng at 89.8 per cent in 2011. Limpopo and Eastern Cape had percentages below the national average with 43.7 per cent and 43.5 per cent respectively. Overall most provinces recorded significant increases 54.3 per cent in 1996 to 63.6 per cent in 2011 nationally.

**Figure 20: Percentage of households where refuse is removed by local authority/private company weekly by province: Census 1996, 2001, 2011 and Community Survey 2007**

Source: StatsSA

### 1.3.6 Household goods

#### 1.3.6.1 Cell phone

Figure 21 shows that the percentages of households that have a cell phone in working order increased from 32.3 per cent in 2001 to 73.3 per cent in 2007 and 88.9 per cent in 2011 nationally. Gauteng had the highest percentage in 2001 at 44.4 per cent and it has highly increased to 93.8 per cent in 2011. In Northern Cape, 24.5 per cent of households owned cell phones in 2001 and it increased to 81.1 per cent in 2011, which is the lowest in the country. North West is well on its way to reaching 90 per cent.

**Figure 21: Percentage of households that have a cell phone in working order by province: Census 2001, 2011 and Community Survey 2007**

Source: StatsSA

#### 1.3.6.2 Radio

Figure 22 shows that the proportion of households with a radio decreased significantly from 73.0 per cent in 2001 to 67.5 per cent in 2011. The figure also indicates that Western Cape, Northern Cape and Gauteng recorded the highest decline in households owning radio. The declining trend could be as a result of households shift to digital media like the cell phone and television.

**Figure 22: Percentage of households that have a radio in working order by province: Census 2001, 2011 and Community Survey 2007**

Source: StatsSA

### 1.3.6.3 Computer

Figure 23 shows an increase in the percentage of households having a computer from 8.6 per cent 2001 to 21.4 per cent in 2011 nationally. Western Cape was the highest at 18.2 per cent in 2001 and it has increased to 34.4 per cent, followed by Gauteng with 14.5 per cent in 2001 and 31.1 per cent in 2011. Limpopo had the lowest percentage of household owning a computer with 2.4 per cent in 2001 and it has increased to 12.4 per cent in 2011. Eastern Cape was 4.1 per cent in 2001 and it is the lowest amongst all the provinces in 2011 with 11.9 per cent alongside North West.

**Figure 23: Percentage of households that have a computer in working order by province: Census 2001, 2011 and Community Survey 2007**

Source: StatsSA

### 1.3.6.4 Refrigerator

Figure 24 shows that the proportion of households with a refrigerator increased from 51.2 per cent in 2001 to 63.9 per cent in 2007 and 68.4 per cent in 2011. All provinces recorded increases in the proportion of households with a refrigerator between 2001 and 2011. Western Cape had the highest percentage of households owning a refrigerator at 73.5 per cent in 2001 and increasing to 80.5 per cent in 2011, followed by Gauteng at 61.9 per cent in 2001 to 72.8 per cent in 2011. Eastern Cape had the lowest percentage at 32.1 per cent in 2001 and 53.9 per cent in 2011. North West improved from 49.8 per cent in 2001 to 65.1 per cent in 2011.

**Figure 24: Percentage of households that have a refrigerator in working order by province: Census 2001, 2011 and Community Survey 2007**

Source: StatsSA

### 1.3.6.5 Television

Figure 25 shows that the proportion of households with a television increased from 53.8 per cent in 2001 to 65.5 per cent in 2007 and 74.5 per cent in 2011. All provinces recorded increases in the proportion of households with a television between 2001 and 2011. Western Cape had the highest percentage of households owning a television at 74.1 per cent in 2001 to 84,1 per cent in 2007 and it has increased to 85.5 per cent in 2011, followed by Gauteng with 65.4 per cent in 2001 to 74.0 per cent in 2007 and 80,8 per cent in 2011. Eastern Cape had the lowest percentage at 39.0 per cent in 2001 to 51.3 per cent 2007 and 63.2 per cent in 2011. North West improved from 62.5 in 2007 to 71.9 in 2011.

**Figure 25: Percentage of households that have a television in working order by province: Census 2001, 2011 and Community Survey 2007**

### 1.3.6.6 Internet

Figure 26 shows a proportion of households with access to internet increase drastically in 2011 compared to 2007. In 2007, Western Cape (16.4 per cent) had the highest access to the internet, followed by Gauteng (11.6 per cent). Limpopo and Eastern Cape recorded the lowest access at 1.8 per cent and 3.2 per cent respectively. In 2011, Gauteng had the highest access to internet at 46.4 per cent followed by Western Cape at 43.7 per cent. Limpopo and Eastern Cape has the lowest proportion of the household with access to internet at 24.3 per cent and 24.1 per cent respectively. North West has improved its connection rate from 2.9 per cent to 26.3 per cent.

**Figure 26: Percentage of households with access to the internet: Community Survey 2007 and Census 2011**

Source: StatsSA

### 1.3.6.7 Landline telephone

Figure 27 gives the percentage of households that had a landline telephone in 2001, 2011 and 2007 Community Survey. The figure shows that all provinces recorded decrease in the proportion of households with landline telephones. Western Cape recorded the highest decrease of 11.5 per cent from 2007 to 2011 followed by Northern Cape and Gauteng. This significant decrease is attributable to the shift to the cell phone usage, which is easily accessible as compared to the landline. North West is one of the lowest users of landline telephones from 2001 to 2011.

**Figure 27: Percentage of households that have a landline telephone by province: Census 2001, 2011 and Community Survey 2007**

Source: StatsSA

## 1.4 Economic Indicators

### 1.4.1 Provincial Gross Domestic Product (GDP)

Preliminary estimates indicate that the highest real annual economic growth rates per region - as measured by the gross domestic product per region (GDPR) at market prices - for 2011 compared with 2010 were recorded in Gauteng at 4 per cent, followed by Western Cape and KwaZulu-Natal at 3.6 per cent each respectively. The relative ranking of the contribution of the nine provinces to the South African economy did not change between 1996 and 2011, as shown in Figure 28. Gauteng remains the largest (34.5 per cent), followed by KwaZulu-Natal (15.7 per cent) and Western Cape (14.2 per cent). These three dominant provinces (collectively contributing nearly two-thirds to the South African economy) have, however, shown a decline in their contribution over the period. The North West Gross Domestic Product (GDP) growth rate is estimated to be at 2.7 per cent for 2011, 0.8 per cent less than the preliminary National GDP growth rate of 3.5 per cent.

**Figure 28: Real annual economic growth rate per region: 2011**

Source: StatsSA

The lowest performing province between 2001 and 2011 is the Northern Cape as depicted in figure 29. North West grew by 3.1 per cent on average over the period, 0.9 per cent lower than the National average real economic growth rate of 4 per cent.

**Figure 29: Average real annual economic growth rate per region: 2001 – 2011**

Source: StatsSA

Gauteng remains the largest contributing province to the GDP at (34.5 per cent), followed by KwaZulu-Natal (15.7 per cent) and Western Cape (14.2 per cent). These three dominant provinces (collectively contributing nearly two-thirds to the South African economy) have, however, shown a decline in their contribution over the period. North West is contributing, on balance, 6.5 per cent to GDP for the years: 1996, 2006 and 2011 as illustrated in figure 30.

**Figure 30: Provincial contribution to South African economy: 1996, 2006 and 2011**

Source: StatsSA

From table 10 below, it is clear that the North West Province is driven mainly by the mining and Quarrying industry, which contributes a measurable 33.6 per cent to the North West Gross Domestic Product, followed by general government services and Finance, real estate and business services sector.

**Table 10: Relative size of formal and non-observed economy by industry: 2011**

Industry	Western Cape	Eastern Cape	Northern Cape	Free State	KwaZulu-Natal	North West	Gauteng	Mpumalanga	Limpopo
Agriculture, forestry and fishing	3,5	1,5	6,0	4,3	3,8	2,1	0,4	2,8	2,5
Mining and quarrying	0,3	0,2	26,7	13,3	1,9	33,6	3,3	24,9	29,4
Manufacturing	11,8	12,2	2,1	8,5	15,8	4,4	13,5	11,5	2,5

#### 1.4.2 Employment by province

The table below shows that between Quarter 3:2012 and Quarter 4:2012, there were job losses in four of the nine province with the largest declines observed in Eastern Cape (69 000), KwaZulu-Natal (40 000) and Gauteng (16 000). There were employment gains in Mpumalanga (31 000), Western Cape (18 000) and Limpopo (8 000) over the same period. Compared to the year ended December 2011, employment increased in five of the nine provinces, with Limpopo (107 000), Gauteng (63 000) and North West (47 000) being the biggest contributors, while job losses were observed in KwaZulu-Natal (69 000), Eastern Cape (65 000) and Free State (21 000).

**Table 11: Employment by province**

Province	Oct-Dec 2011	Jul-Sep 2012	Oct-Dec 2012	Qtr-to- qtr change	Year-on- year change	Qtr-to- qtr change	Year-on- year change
	Thousand				Per cent		
<b>South Africa</b>	<b>13 497</b>	<b>13 645</b>	<b>13 577</b>	<b>-68</b>	<b>80</b>	<b>-0,5</b>	<b>0,6</b>
Western Cape	1 842	1 806	1 824	18	-18	1,0	-1,0
Eastern Cape	1 326	1 330	1 261	-69	-65	-5,2	-4,9
Northern Cape	291	290	292	2	1	0,7	0,3

## **2. Summary of Budget Strategy and Aggregates**

### **2.1 Overview of the Budget Strategy**

The current unfavorable economic outlook is continuing to have a rippling effect on the country's limited resources and therefore placing unprecedented strain on our provincial budget regardless of the slight improved equitable share we have received as a result of the new data updates. For the province to utilize the available resources efficiently, it is to comply with the existing budget reforms with more emphasis on reprioritization of the baselines allocations, eradication of wasteful expenditure including fighting corruption and cutting frills. As part of the budget process, the Province shifted funds from low efficiency/ priority expenditures towards areas of higher efficiency over the 2013 MTEF. .

Implementation of cost saving measures including reduction of budgets of non-core items in order to fund government key priorities is one of the features of this budget. Projects without proper plans were not considered and those that have been considered, departments must ensure implementation of projects within stipulated timeliness and budgets. This has yielded positive results as funds were realized and directed to fastrack ongoing projects and assists to build capacity around infrastructure delivery units.

The Province would continue with the implementation of budget reforms with is supported by forward planning and reduction on non-core items. The province followed a credible budget process which was supported by the Executive Council including extensive consultation with all departments.

#### **Changes in the Budget for the 2013/14 financial year**

There has been no changes in the current budget approach as the province continues to pursue the performance budgeting which emphasizes the reprioritization of the budget baselines in order to ensure optimal allocations and utilization of available resources. Under the current uncertain economic conditions, departments are expected to implement stringent financial controls in line with the revised Cost Reduction Measures that was approved by EXCO during September 2012.

Notably, the 2013/14 MTEF budget process is a complete the last budget of the 2009 electoral cycle. Consequently, the 2013/14 allocation responds to the key priorities such as poverty, inequality and unemployment. Moreover, the 2011 census data resulted in the revision to the equitable share of the Province and such a review led to an increase in the equitable share allocation of the Province by 6.7 per cent in 2013/14 first year of the MTEF. Regardless of the increases in the resource envelope, monies are always not enough to meet all provincial demands. The Province will continue to do more with less and limit departmental requests to what is available.

The Revenue Enhancement Strategy which seeks to institutionalize all initiatives of geared towards the maximization of the provincial resource has been approved by EXCO in June 2012. This initiative will be cascaded to Public Entities and Municipalities. The impact of the strategy would be monitored and communicated through the revision to allocations of departments.

#### **Provincial Government Main Strategic Policy Direction**

The 2013/14 Medium Term Expenditure Framework budget updates the fiscal policy framework for the province and makes further progress towards the funding of the provincial objectives of long term sustainable economic development and poverty alleviation, in the key targeted areas through the improved management of public funds as defined in the Provincial Growth Development Strategy which currently is under review, the Growth Path, the National Development Plan 2030 and the 2012 Medium Term Budget Policy Statement.

With this budget, the provincial government confirms its focus on the creation of decent jobs and sustainable livelihoods; provision of quality education and health care, rural development, food security and land reform and the fight against crime and corruption.

The North West Province has also embarked on a drive to ensure integrated planning across departments and other spheres of the government. Some of the key interventions programmes that would be implemented over the MTEF include the following:-

- Cascading the Revenue Enhancement Strategy to all provincial departments Public Entities and Municipalities;
- Building capacity around Supply Chain in order to aggressively deal with fraud and corruption;
- Approved Infrastructure Development Management System (IDMS) by EXCO will be rolled out to Departments, Public Entities and Municipalities, with the aim to improve the delivery of infrastructure in the province
- Support to build capacity within the infrastructure units of the department in order to fast-track delivery of infrastructure;
- Implementation of initiatives which are geared towards attainment of the clean audit.

The North West Province's strategic priorities agreed upon by the Executive Council, which are aimed at halving unemployment and poverty by 2014, are as follows;

- Enhancing the quality of basic education and skill development;
- Improving the quality of health care and health infrastructure;
- Investing in new infrastructure and proper maintenance of economic infrastructure networks;
- Develop vibrant, equitable and sustainable rural communities that contribute to adequate food supply;
- Creation of decent jobs and sustainable livelihoods;
- Create sustainable human settlements and improved quality of household life

### **Enhancing the Quality of Education and skilled development**

The province has committed itself to development of ECD practitioners in order to strengthen the foundation phase of schooling and ensure that more primary schools introduce grade R. This will be possible through a sound partnership between the Department of Education and the Department of Social Development. Improving learner performance is fundamental in ensuring the provision of quality of education.

Effective teaching and learning requires strong partnership between learners, parents, communities and other Departments and through this partnership the Quality Learning and Teaching Campaign (QLTC) would remain a focal point in the department education. Improving the condition of schools in terms of infrastructure; provision of water and sanitation, provision of meals and transport to deserving learners while implementing the No-Fee Policy is part of the Province's programme of enhancing the quality of education and skill development.

In support to Outcome 5, FET colleges will increase intake of learners on NC(V) and Nated programmes with an additional emphasis on Artisan programmes. Adult Education Training (AET) centres will continue to offer skills programmes for the adult communities who have not gone to school before. The HIV and AIDS support programme is being intensified in Public Ordinary Schools in order to support vulnerable and orphaned children.

### **Improving the Quality of Health Care and Health Infrastructure**

The province has directed more resources towards primary health care programmes. Overhauling the healthcare system and improving its management is key to the successful the implementation of National Health Insurance (NHI). Of paramount importance is to ensure effective implementation of the NHI and to radically improve the quality of services rendered in public health facilities. Massive investment in improving the health infrastructure, both buildings and equipment is a necessity. Additional funding has provided in order to assist with maintenance of health institutions, purchase of essential equipment and procurement of medicines.

The Government is committed to the process of establishing a healthcare financing system that will make sure that all citizens of Province are provided with equitable, universal access and coverage of essential healthcare services, regardless of their employment status and ability to make a direct monetary contribution to the NHI fund. In an attempt to increase the human resource capacity in this sector, the province will continue to improve training on nursing, EMRS and medical care to strengthen PHC and health care service delivery towards a well-functioning NHI. Plans are in place to continue to increase the intake of students attending medicine programmes in Cuba as well as increasing nursing students' intake.

The province is also looking at building MDR TB units in all the districts as part of improving the delivery of services for TB patients. The eligibility criteria of initiating patients at CD four counts of 350 will still be strengthened. In changing the face of the primary health care the province will align its programmes to the following Ministerial six priorities: which are cleanliness of the facilities; patient's safety; infection control; waiting time; medical supplies and value and attitude of staff to patients.

With regard to delivery of health infrastructure, the entire allocation of hospital revitalization programme and health infrastructure programme would be directed towards good and readily available plans which would improve the state of health institutions in the Province.

### **Investing in new infrastructure and proper maintenance of economic infrastructure networks**

The province is committed to the process of improving forward planning and quality spending on infrastructure. To this end, the Provincial Executive Council adopted the NW IDMS on 31 October 2012 as the framework for planning and implementation of Infrastructure in the province. The province will continue with the roll out of road construction projects as part of implementing the Strategic Infrastructure Project (SIP4) aimed at accelerating investment in infrastructure including unlocking economic potential opportunities as well as supporting the development of mining, agricultural activities and tourism initiatives premised on beneficiation.

SANRAL recently reported to the Extended EXCO Lekgotla that, the organization is implementing road maintenance projects across the province that involve road repair and resealing. The road repair projects include the Bloemhof to Rietpan, Delaryville to Sannieshof and the Ventersdorp to Krugersdorp road which is nearing completion.

Over R1 billion has been budgeted for the SANRAL-Bakwena Toll Projects on the N4 for construction of an additional carriageway covering 32 kilometers between Brits and Marikana on the N4, construction of 22 kilometers between Zeerust –Rustenburg, Rehabilitation of the N4 between Brits/Marikana/Swartruggens including periodic and routine maintenance. Most of the projects on the N4 which are at different stages are expected to be completed next year. Through this initiative, substantial number of jobs would be created. Departmental infrastructure plan makes provision for the upgrade and construction of certain roads which amongst others include, the Ganyesa road, Beerkkraal to Mantsho, storm water drainage bridges in DR Kenneth Kaunda and Bojanala Districts.

### **Create sustainable human settlements and improved quality of household life**

Provision of social infrastructure is necessary for meaningful participation in economic, social and political activity. The province has established integrated and productive communities where economic activities are facilitated through the provision of social amenities, including education, health, housing and transport to learners.

In line with the National Development Plan (NDP) 2030, as developed by the National Planning Commission, particularly Chapter eight (8) on transforming Human Settlements, the department will be implementing integrated forward planning, effective project monitoring and management. This strategy will provide a variety of housing solution to the unemployed and low income earners. An amount of R1.2 billion has been reaffirmed for this purpose in 2013/14 financial year.

The 2030 Human Settlements vision and the North West Youth in Human Settlements Summit Resolutions pay special attention to the needs of young people and women. Through this innovation there will be empowerment and advancement of the youth through capital programmes and procurement decisions.

This initiative will also include women empowerment programmes. Special emphasis will be put on these programs during the Women's Month. The project will identify and build capacity to emerging women-contractors with a view of enabling them to become independent and sustainable contractors. Through housing development, the Province has always been on the forefront of job creation and development of infrastructure and therefore remains committed to commitments of job creation through this sector funding.

### **Develop vibrant, equitable and sustainable rural communities that contribute to adequate food supply**

Our Province is rural in nature, therefore rural development mandate seeks to ensure that all rural development programmes are coordinated and streamlined by the department of Agriculture and Rural Development and this mandate permeates all provincial departments in terms of services at identified rural sites. The province is making significant strides, that is, moving in the direction of establishing the Taung campus of the college of agriculture as a center for irrigation technology. This work will ensure that the Taung irrigation scheme receives necessary advice in terms of engineering work in the irrigation scheme and production of crops.

The Province has entered into agreement with the International water management Institute (IWMI) in order to work with the college in establishing various irrigation systems to be used for student training. Once this institute is established it will be the first centre of irrigation technology in the country and within the SADC (Southern African development community). Servicing this agreement will cost R5 million.

Kgora resource center has seen an injection of new concept of farmer training center, which will see in-house training for farmers assisted through the nationally allocated grants. While work has begun in the current year with base-infrastructure for the envisaged facility, more will be done in the following years to bring the facility to the required level.

Through the MTEF allocation, the department intends to make an impact through strategic projects that will contribute to the provincial economic outlook. The DORA allocated funds shall be used for the developmental projects on the smallholder farmers. In advancing that goal, the department intends exploiting vast acres of land that is lying fallow within the Ngaka Modiri Molema District Municipality as a launching district. Working with stakeholders in this sector, it is anticipated that through partnership the department will maximize the current financial resources which will be juxtaposed to the required skills by using economies of scale principle.

### **Alignment of National Spatial Development Perspective (NSDP) and Provincial Strategies**

The North West Spatial Development Framework and Zoning Plan of 2008 adopted the normative principles of the National Spatial Development Perspective and categorized all municipalities in terms of their absolute potential and needs.

In unlocking the provincial potential in accordance with the National Spatial Development Programme principles, the future settlement and economic development opportunities have been channeled in to activity corridors and nodes that are adjacent to or link up with the main growth center such as Gauteng. The Province has strengthen its growth and development potential by way of the promotion of development corridors that link up with Gauteng and promoting the East West corridor through the Platinum Corridor within the Province with Botswana/ Namibia and Maputo.

These three Spatial Development Initiatives have been launched to strengthen a potential activity corridor link in to North West and created a diamond of competitive advantage within the province. Over the last five years the gaps in intergovernmental integration, co-ordination and alignment, as well as the underlying reasons and challenges for this state of affair have been explored in number of studies, assessment and projects as well as the research commissioned for the Ten Year Review. Increasingly so, a consensus position is developing which holds to co ordinate government priority setting, resource allocation and implementation.

The provincial government has made significant strides of integrating its plans with other spheres of government such as the Municipalities. Such strides attempt to streamline provincial planning, as well as avoiding duplication of functions and to deliver services in terms of the spatial distribution across the province. The departments will have to calculate their spending at district municipal levels and submit reports. With the inclusion of the Regional Identifier in the BAS Structure it is now easy for the departments to quantify their operations by district municipality. The province has not been able to distribute funds up to the level of the Municipal wards as it is fundamental to ensure that proper systems and controls as well as capacity are implemented.

Government spending on fixed investment, beyond the constitutional obligation to provide basic services to all citizens (such as water, electricity as well as health and educational facilities), will be directed towards economic growth initiatives in order to attract private-sector investment, stimulate sustainable economic activities and/or create long-term employment opportunities.

The Provincial Growth and Development Strategy is in the process of review and hoped to be finalized by the end of 2013/14 financial year. This review process will also incorporate new challenges and policies that have been developed since the first version of the Provincial Growth and Development Strategy in 2004.

## **2.2 Aligning provincial budgets to government Outcomes Based Approach**

The outcomes approach is designed to ensure that government departments focus on achieving the expected real improvement on the lives of all South Africans. This approach also assists the provincial departments to improve planning and implementation on annual basis, monitor and evaluate systems that are geared to manage the twelve outcomes that collectively respond to the main strategic priorities of the government as approved by the Cabinet.

All provincial departments' programmes respond to the twelve outcomes and this chapter only reflects on few departments:

**Outcome No 1:** *Improved Quality of Basic Education - Responsible Department - Basic Education and Outcome 5: A skilled and capable workforce to support an inclusive growth path" of the 12 identified outcomes of government.*

This department has aligned its strategic goals and objectives to these Presidential Outcomes as well as to Education Action Plan 2014 Goals. This is an attempt to make sure that resources are targeted at processes that will give impetus to the attainment of the set targets. A sufficient budget allocation has been made for Learner Teacher Support Material (LTSM) and workbooks in the 2013 MTEF

Additional funds have been made available in the second and the final year of the MTEF for Grade R teachers and increased number of teachers in Quintile 1 schools. These will ensure expansion of no-fee schools in order to broaden access and the universalisation of Grade R through incorporation of community based facilities into public primary schooling.

Increasing access to Special schools is also a priority for this department. Assistive devices including transport to Special schools will be provided. Expanding opportunities for skills development in special schools to enable learners and youth with disabilities to participate in the economy is a drive not to be compromised. Professional support by specialists e.g. Psychologists, Social Workers, occupational therapists, etc will be provided.

**Outcome no 2:** *A long healthy life for South Africans - Responsible Department - Health*

The budget of the department of Health has improved substantially, increasing from R7.1 billion to R7.7 billion. The province is in the process of re-engineering Primary Health Care which is core to the department of Health. Areas of focus such as school health, ward based teams and teams of specialists have been identified. In addition to that, stakeholders such as tribal authorities, local councils, faith based organizations, NGOs and society at large are expected to support school health programmes and ward based teams. This approach will strengthen health care provision at local level where services are mostly needed.

**Outcome No 3:** *All people in South Africa are and feel safe - Responsible Department - Public Safety and Liaison Branch*

In addition to the current baseline, an amount of R25 million in 2013/14, R26.5 million in 2014/15 and R27.8 million in 2015/16 respectively was injected in the budget of this department to assist in strengthening the Law Enforcement as well as Civilian Oversight and Crime prevention.

**Outcome No 4:** *Decent Employment through inclusive economic growth - Responsible Department- Economic Development, Environment, Conservation and Tourism*

One of the main programme of the North West government since 1994 is the empowerment of the previously disadvantaged groups and individuals to benefit from the inclusive Provincial economy. Its role in this regard will be more visible when the access to finance for new business will take a different form in the context of the National Credit Act and the implementation of Tsogang Lo Itirele Fund.

As part of the second economy intervention, the procurement process of government will benefit SMMEs and this will be achieved when the ten aside products are implemented with the assistance of the department working together with the Department of Finance and stakeholders.

**Outcome No 5:** *A skilled and capable workforce to support an inclusive Growth Path. Responsible - Department(s) - All Provincial Departments*

In support to delivering effective service, strengthening capacity in all departments remains core over the MTEF. The following core functions will be rolled out:-

Department of Finance – This department renders a financial transversal function which amongst others is to ensure that the finances of the province are managed with prudence as well as ensuring that proper financial systems and controls are in place to enable the province to attain the provincial turn around to clean audit, extend financial services, guidance and support to the Municipalities and build the necessary financial capacity in order to support all relevant stakeholders. An amount of R152 million has been provided over the MTEF period to fulfill this mandate.

**Outcome No 6:** *An efficient effective, competitive and responsive economic infrastructure network - Responsible Department – Department of Public Works, Roads and Transport*

The province is committed to the implementation of road construction projects as part of implementing the Strategic Infrastructure Project (SIP4) aimed at accelerating investment in infrastructure and to unlock economic potential and support the development of mining, agricultural activities and tourism opportunities and open up beneficiation opportunities in the province.

Funding has provided to the department of Public Works, Roads and Transport for rehabilitation and maintenance of road networks in the province over the 2013 MTEF. Furthermore, this department's mandate is also to oversee the government fixed structure and grounds. To this end the department has been mandated to champion the "War on Poverty" Projects. This intended project(s) is aimed at fast tracking infrastructure development in the province in particular in the Taung area. To ensure the successes of this initiative and an amount of R225 million over the MTEF period was injected.

**Outcome No 7:** *Vibrant, Equitable and Sustainable rural communities with food security for all- Responsible Department- Department of Agriculture and Rural Development as well as Social Development, Women, Children and Persons with Disabilities*

*Department of Agriculture and Rural Development*

This department has initiated what is termed 72 mechanisation packages to be distributed to farmers around Ngaka Modiri Molema District in order for them to produce grains in the district.

Ngaka Modiri Molema is one of the 23 prioritised district Municipalities due to good potential in producing maize under dry land cropping. The Department has obtained an approval from the National Department of Agriculture to enter into agreement with Grain SA based in Pretoria to produce maize under dry land cropping in order to enhance crop production projects for the province.

### *Department of Social Development, Women, Children and Persons with Disabilities*

The North West Province is continuing to make a huge impact in response to the national goals of poverty eradication and reduction of inequality, through the department of Social Development. The department prioritized the following programmes, targeting the needy and vulnerable learners to receive sets of uniforms, continue fast-tracking Social Relief Programme as initiated by the National Minister which is “Food for All Campaign”, to distribute food and blankets to destitute communities.

#### **Outcome No 8:** *Sustainable Human Settlements and improved quality of household life - Responsible Department - Human Settlements Branch*

This department is funded mainly through a conditional grant allocation. The department has received R1.2 billion in 2013/14. With the allocated budget, the department is planning to build about in excess of 15 000 housing units. The department has also received an earmarked allocation of R26.3 million in the first year of the MTEF as earmarked funds for the repairs of infrastructure damaged by the natural disasters as declared in Government Gazette 33943.

#### **Outcome No 9:** *A responsive, accountable, effective and efficient local government system - Responsible Department - Local Government and Traditional Affairs*

The core mandate of this department is to support municipalities to enable them to render effective service delivery as well as providing strategic support to the institutions of the traditional leadership. An additional amount of R20 million over the three years of the MTEF was provided for municipal support and a further R25 million for provincial committee on dispute resolution over the 2013 MTEF which initially was a national function and now devolved to provinces.

## **2.3 Budget strategy and aggregates**

The 2013 Medium Term Expenditure Framework gives effect to spending priorities and reflects government determination to achieve value for money in order to improve performance in the public sector. Amongst others, the 2013 MTEF allocations has been guided mainly by the 2012 Medium Term Strategic Framework including consideration of resource constraints, the readiness of departments to implement projects especially given the slow spending on infrastructure, impact of new data updates, including the 2011 Census data and alignment to the National Development Plan.

The province critically looked at its provincial revenue baseline and this led to the revised allocation in this area. The review resulted on aggregate, in an increase of the revenue projections over the 2013 MTEF. The additional own revenue realized were added to the total fiscal envelop and made available to fund key provincial priorities.

In line with the President's State of Nation Address presented on the 14 February 2013, the Premier welcomed and fully supported key priorities as mentioned as well as the National Development Plan of 2030 which seek to address inequality, poverty and unemployment. As pronounced by the Premier, the five priorities namely education, health, fight against crime, creating decent work as well as rural development and land reform will form part of the provincial programmes supported by the 2013 MTEF budgets.

North West Provincial Government has made commitment itself to the eradication of backlog in school infrastructure, clinics, electricity, roads and water. This commitment should be accomplished in the next two years from 2013/14 as pronounced by the president.

Education will be a key priority for the next five years, that is, teachers, learners and parents should work together with government to turn schools into thriving centers of excellence. The North West province has been able to improve the Grade 12 Matriculation results from 67.5 per cent in 2009 to 79.5 per cent in 2012 academic year. Mathematics and Science teachers will be capacitated in order to continuously improve learners' performance in these subjects. Improvement on Math's literacy and numeracy will also be given more attention in Grade 3, 6 and 9.

### **Other major policy decisions of the Executive Council that have been publicly announced**

Road rehabilitation and maintenance through contract work have also been prioritized for the 2013 MTEF. To this end about in excess of R200 million has been set aside in 2013/14 financial year. Of these projects, 80 per cent will be allocated to the Small Medium and Micro Enterprises (SMME'S). Apart from that, 30 roads in the province will be under construction in 2013/14 as well as twenty-four building construction projects.

Construction of multi sport facility will also be prioritized in the 2013 MTEF. A number of Libraries will be completed early in 2013 and others will be completed during the 2013/14 financial year. The province is also committed to construct about 15 230 human settlements (houses). As part of the skills development and training, 119 bursaries for scarce skill programmes to the deserving students has been awarded.

As part of the commemoration of 100 years of the Native Land Act of 1913, the province will dedicate resources to provide post settlement support to the beneficiaries of land restitution in the province to ensure that the acquired land is used productively. Funding in the region of R10 million in 2013/14 MTEF has been provided with the aim to improve the skills of farmers so that the agricultural and farming projects can be enhanced in order to improve the socio-economic imperatives of the province as well as production in order to sustain food security projects for the vulnerable groups and for job creation. The Tang Irrigation scheme will also receive particular attention. As part of tourism and improving the conditions of citizens of Taung, work will be starting in earnest with the implementation of the Taung Skull Project. An amount of R40 million in 2013/14 has been set aside for this purpose.

The province has made a commitment to purchase the former Taung Tusk for conversion in to a fully hotel school in the 2013/14. Agreement was also reached with Gauteng to transfer/ release the Garankuwa Hotel School with no liabilities attached.

The following projects will be implemented over the MTEF as part of economic development initiatives;

- Implementation of social and economic infrastructure projects;
- Agro processing- livestock and game beneficiation;
- Agro processing- Small Scale Maize Milling;
- Mining Supply Park;
- Metal fabrication, capital and transport equipment and Sector Development Zone;
- Green economy projects;
- Automotive Products and components sector development zone;
- Platinum beneficiation development zone;
- Plastic and chemical sector development zone;
- Electronics sector development zone and Business process services (BPSs) sector development zone

The table below provide for the summary of provincial budget summary over the period of seven years from 2009/10 to 2015/16 financial year.

Table 1: Provincial budget summary

The table above makes comparison of receipts and payments to ascertain budget surplus or deficit. The data for 2009/10 to 2011/12 present the audited financial outcome while the 2012/13 reflects the revised estimates as at the end of December 2012. The 2013/14 to 2015/16 data reflects the estimated receipts and expenditure for the 2013 MTEF period. Notably, the province continues to table a balanced budget over the 2013 MTEF period.

The province lost an amount of R52.9 million in 2013/14 financial year, R113.2 million in 2014/15 and R178.5 million in 2015/16 from the equitable share as a result of savings realised to assist in addressing the country's accumulated debt. However, the impact of the loss was not severe due to the gains received on equitable share as a result of data updates and the 2011 Census. Given the current constraint economic outlook, cabinet further approved savings on specific conditional grants. The savings on conditional grants and the revision of the Further Education and Training grant resulted in an overall decrease of 4.3 per cent in the 2013/14 and a further 5.1 per cent in 2014/15 on grants.

## Financing

The North West Province has never budgeted for a deficit budget and has not budgeted for a deficit over the MTEF. The province continues to present a balanced budget for the 2013 MTEF period.

### 3. Budget Process and the Medium Term- Expenditure

Good budgeting is about the choices that government makes when allocating resources to spending programmes that deliver services and provide for the human and capital investments that drive the economic growth. It is essential to note that budget is an instrument that the government utilizes to achieve its strategic objectives of creating jobs, eradicating poverty and promoting equity. The 2013/14 MTEF budget process was aimed at ensuring that planning is aligned to both National and Provincial Government priorities and that resources are prioritized and directed to areas that will ensure maximum impact.

The distribution of the Treasury Guideline to provincial departments marked the beginning of the 2013/14 budget process. This document outlined the policy framework and the format that departments had to use to prepare the 2013/14 budget submissions. The Provincial Lekgotla held in October 2012, where strategic political and service delivery imperatives and the MTEF budget cycle was confirmed marked the highlight of the budget process through the support from the Executive Council. The priorities identified included amongst others water, energy, education, health and job creation.

The indicative allocations linked to the provincial priorities were discussed during the Provincial Budget Lekgotla in November 2012. Further budget deliberations allowed departments to present the budget proposals designed to achieve strategic objectives linked to national and provincial priorities for consideration by EXCO.

The budget process was guided by amongst others the following principles:

- Investment in priority areas that support social development, and economic growth and transformation;
- Finding the resources to sustainably undertake this investment be the primary focus of the coming budget;
- A pool of saved resources be identified with urgency in order to fund critical interventions;
- To objectively evaluate the performance and efficiency of each of the programmes and activities, with a view to identifying those that can be closed and discontinued in order to provide fiscal space for more productive or urgent priorities to be financed;
- Further and more urgent efforts be made to find savings;
- Much more effective management of the public sector wage bill through:
  - Increases in labour productivity, linked to deliberate human resource development through improved education and skills training;
  - Much better controls over human resource administration for example, leave and sick leave;
  - Stringent management of personnel growth, proportional to the demand for programme outputs; and
  - Serious limit on hiring of additional staff and if hiring then only for front line service delivery.
- Review of government entities and agencies to rationalize these and find synergies and other cost-saving opportunities, for example whether boards are needed and the size of boards.

The Medium Term Expenditure Committee which is a technical committee responsible for the evaluation of the budgets of the departments met in October 2012. This Committee ensured that there is alignment of strategies to the budgets through engagement on emerging policy developments and challenges. This Committee included the MEC'S and HOD'S where budget bids were discussed. Preliminary budget allocations were made available to departments on the 30 November 2012. The final budget allocations were presented to the Provincial Executive Council on the 25<sup>th</sup> February 2013 and the approved final allocations were issued to departments to revise and align their plans and budgets in line with the final approved budgets as well as finalizing the budget documentations.

## National and Provincial Budget Reforms

The ongoing reforms over the past years have resulted in a number of improvements to the way in which the North West Province budget is crafted. The major reform that was introduced in the province over the past years has been aimed at improving operational and allocative efficiency in public finance. The following are some of the reforms that were implemented:-

- Reprioritization of the baselines budgets in order to realize savings for redirection to key provincial service delivery mandates.
- Implementation of the Cost Saving Measures in order to contain the provincial costs and redirect money to frontline services;
- Ensuring implementation of the Infrastructure Development Management Systems (IDMS) in order to transform the planning and implementation process for infrastructure projects;
- Implementation of National Conditional Grant Framework by reporting monthly and quarterly as per the requirement of the DORA;
- Implementation of an improved budgetary process which includes MTEF hearings and systematic engagement with department throughout the budget process;
- Progressively implementing the budget programme structure for all provincial departments;

## 4. Receipts

### 4.1 Overall position

The North West Province relies largely on the nationally raised revenue which is divided amongst the three spheres of government in line with section 214 (1) of the Constitution of South Africa. This revenue, called equitable share allocation contributes about 79.7 per cent to the total provincial receipts for the 2013/14 financial year. This allocation is augmented by the provincially raised revenue which contributes about 2.9 per cent and conditional grants contributing 17.5 per cent to the provincial fiscal envelope for the 2013/14 financial year.

Table 2 :Provincial receipts: North West Province

## **4.2 Equitable share**

The provincial equitable share allocation of the nationally raised revenue is allocated through a formula. On an annual basis a consideration is given to the changes in the data used for the calculations. For the 2013 MTEF the formula was mainly influenced by the impact of data updates and the use of the 2011 census. This resulted in the province benefiting from the additional allocations. It is important to note that due to the constraint economic outlook, nationally, a savings of 1 per cent, 2 per cent and 3 per cent for the three years of the MTEF respectively were implemented on the baseline allocation of non social services department. This resulted in the province losing R344.6 million over the 2013 MTEF period.

After the revision of the equitable share, the province received an additional R3.9 billion over the 2013 MTEF period (R848 million in 2013/14, R1.2 billion in 2014/15 and R1.9 billion in 2015/16). About 78 per cent of this additional allocation relates to inflationary adjustment allocation which in the main caters for the higher than anticipated salary agreement. An amount of R203.5 million in 2013/14 relates to the phasing in of the Devolution of Property rates grant into the equitable share.

The additional allocation also makes provision for the national priorities funded in the 2013 MTEF period. An amount of R54.8 million has been earmarked for the Grade R teacher and R69.3 million for the increased number of teachers in quintile 1 school in the outer year of the MTEF. The Department of Social Development, Women, Children and Persons with Disabilities received an amount of R63.9 million over the MTEF period for the absorption of social worker graduate and R40.9 million for the support of the NGO sector. The Department of Health received R23 million over the 2013 MTEF for tuberculosis (GeneXpert).

## **4.3 Conditional grants**

Conditional grants are allocated as earmarked funds by national government with certain pre-determined conditions and targets attached to it. The conditional grants allocation declines from R5.2 billion in 2012/13 to R5 billion in 2013/14, representing a decline of 4.3 per cent. On average, over the MTEF, the grants grow at an average of 1.1 per cent. This minimal average growth over the MTEF is due to the revision of the Further Education and Training Grant framework to allow part of the initial grant to flow directly from National Department of Higher Education to FET colleges as a subsidy, revision of the Human Settlement Development grant as a result of the data updates from the 2011 Census as well as phasing of the Property Rates Grant into the equitable share.

**Table 1.3: Summary of Conditional grants**

New reforms implemented on conditional grants. The *Health Facility Revitalization Grant* – is a newly reformed grant representing a consolidation of already existing infrastructure grants which would now be referred to as components namely: (a) *Health Infrastructure Component*, (b) *Hospital Revitalization Component* and (c) *Nursing Colleges and Schools Component*. This reform is created with a purpose of providing greater flexibility for the department of Health to shift funds within the three grants on condition that approval by the National Treasury is sought to avoid under/over-expenditure in any one area of the health infrastructure. The North West province is allocated an amount of R496 million in 2013/14; R509 million in 2014/15 and R 514 million in the outer year.

The National Department of Public Works still remains the custodian of the two EPWP grants that is the *EPWP: Social Sector and Integrated Infrastructure grants to provinces*. Furthermore these grants have been reclassified as schedule 5 grants. The grants remain an incentive to departments, which will be based on meeting job targets in the preceding financial year. The transfers of funds dependent on provincial departments reporting on jobs created on the EPWP system and implementing labour intensive projects.

EPWP Social Sector grant is allocated a total amount of R50.9 million in 2013/14 which is composed of R24.8 million for Health; R16.4 million for Social Development; R8.8 million for Education and Training and R870 thousand for Sport, Arts and Culture. With regard to EPWP Integrated grant for Infrastructure the total fund amounting to R17.3 million is allocated to Public Works, Roads and Transport.

### 4.3 Provincial own receipts

The provincial own revenue form a small proportion of the total provincial fiscal framework. It is derived mainly from tax receipts which comprises motor vehicle licenses, casino taxes and patient fees. The main contributing departments generate up to 96.6 per cent which is the department of Public Safety and Liaison, Economic Development and Tourism and Department of Finance (interest earned), Department of Public Works, Roads and Transport and Department of Health on Patient fees. Overall, the provincial revenue increases by 5 per cent every year of the MTEF period. With the implementation of the Revenue Enhancement Strategy, the province is moving in to a right direction of exploring and identifying new sources of revenue.

### *Motor vehicle licence fees*

Motor vehicle is the largest contributor to the provincial own revenue and has shown a significant increase over the past years. This item contributes about 38.2 per cent to the provincial revenue. From 2012/13 to 2013/14 this item shows an increase of 5 per cent and 10 per cent in the two outer years of the MTEF

### *Casino and Liquor Licenses*

The income received from these two sources of revenue becomes the second largest contribution to the provincial revenue fund, contributing 11 per cent. These revenue items have shown a minimal increase over the past years and project to increase by 5 per cent over the 2013 MTEF period.

### *Sales of goods and services other than capital assets*

The revenue received from this item increases by 9.8 per cent from the 2012/13 budget to the 2013/14 estimates and thereafter by 10 per cent in the two outer years of the MTEF. From the sale of goods and services, approximately 5 per cent can be attributed to the department of Health. The revenue retention strategy has also set targets on maximization of the own revenue. Sales of goods and other services other than capital assets contributes 37 per cent to the 2013/14 estimates.

### *Interest, Dividends and rent on land*

This item has over the years generated more revenue although it is not a revenue source to rely on entirely due to instability. It contributes 12.7 per cent to the provincial revenue fund. This revenue item increases by 5 per cent in 2012/13 to 5.2 per cent in 2013/14 and continues to increase constantly by 5 per cent over the MTEF.

## **5. Payments**

### **5.1 Overall Position**

The total payments for the North West Province grow from R20.5 billion in 2009/10 financial year to R26 billion in 2012/13. This growth is set to continue over the 2013 MTEF with the aggregated estimates growing to R32.5 billion in 2015/16 financial year. The provincial payments take in to account the priorities as pronounced by national government and those that were adopted by the provincial EXCO.

The additional funding allocated in the 2013 MTEF (over and above the existing 2012 baseline) caters, amongst others for the following;

- Funding for the carry through effect of the 2012 wage settlement;
- New and expansion of existing priorities funded from national government, such as the GeneXpert, funding for Grade R and quintile one teachers, support to NGO and the absorption of social workers graduate;
- Funding for various provincial priorities such as water, sanitation and irrigation system
- An allocation to build technical capacity within the provincial department responsible for infrastructure delivery

For the 2013/14 MTEF the allocations are as follows:-

- Financial year 2013/14 : R28.6 billion
- Financial year 2014/15 : R30 billion
- Financial year 2015/16 : R32.5 billion

## 5.2 Payments by Vote

The trend analysis from 2009/10 to 2014/15 which is seven years period demonstrates an annual average growth of 8 per cent. The provincial budget is projected to grow by 6.2 per cent in 2013/14, and a further growth of 5 per cent in the second year and a significant increase of 8.3 per cent in the last year of the MTEF. The significant increase of 8.3 per cent in the last year is attributable to the new data updates and the impact of the 2011 Census to the equitable share allocation.

A sharp increase of 18 per cent is evident in the department of Local Government and Traditional Affairs, followed by the Department of Finance at 19 per cent, Human Settlements and Public Safety equally at 18 per cent. From the 2012/13 adjustment budget, an aggregate growth of 6.2 per cent is recorded to the 2013/14 provincial estimates.

Additional amount of R75.3 million over the 2013/14 MTEF was allocated for absorption of Social Work Graduates. Furthermore, an amount of R.40.8 million over the MTEF earmarked funds to support Non Governmental Organisations (NGO's) has been made available for the department of Social Development, Women, Children and Persons with Disabilities. The overall budget for this department is R1.1 billion in 2013/14; R1.2 billion in 2014/15 and R1.3 billion in 2015/16 respectively.

The department of Education priorities have been allocated an additional amount of R69.8 million in the two outer years of the MTEF for attracting Grade R teachers as well as an amount of R69.3 million in the last outer year of the MTEF being funds earmarked for increasing the number of Quintile 1 teachers. The total budget of the department of Education amounts to R11.3 billion in 2013/14; R12.3 billion in 2014/15 and R13.3 billion in 2015/16 budget periods.

The department of Health received additional priority funding of R23 million over the MTEF being funds earmarked for Tuberculosis – GeneXpert. The overall budget of the department of Health accounts for R7.7 billion in 2013; R8.1 billion in 2014/15 and R8.6 billion in 2015/16 respectively

Department of Public Works, Roads and Transport received an amount of R643 million over the 2013 MTEF period being funds earmarked for Devolution of Property Rates and phased in to the equitable share of this department. This department has received R3.4 billion in 2013/14; R3.5 billion in 2014/15 and R3.9 billion in 2015/16 of the MTEF.

### 5.3 Summary of Payments and Estimates by Economic Classifications

The summary of Economic Classifications revealed that the current payments account for approximately 6.8 per cent in 2013/14, Transfer Payments accounting for 11.5 per cent while Capital payments have been revised downward by 4.8 per cent. It is worth reflecting that the bulk of the current payments in the main constitute Compensation of Employees. The provincial personnel expenditure is growing by 6.8 per cent in 2013, 6.9 per cent in 2014/15 and 6.3 per cent in 2015/16. The bigger portion of Goods and Services is used by the department of Education and Health respectively.

The transfer and subsidy allocation includes both current and capital transfers. The substantial allocation of transfers goes to non governmental institutions such as NGO's whose role is to undertake services such as HIV/AIDS programmes to the community home based care, rendering service to children in secure care centers, as well as transfers to schools in terms of the School Act as well as to Public Entities residing in the department of Economic Development, Conservation, Environment and Tourism.

The budget provision for Capital Payments amount to R2.2 billion in the first year of the MTEF and increases to R2.5 billion in the second year and R2.9 billion in the last year. This budget in the main will be utilised by the department of Public Works, Roads and Transport for the construction of roads and buildings, rehabilitation of existing structures, maintenance of buildings, building of schools and clinics

### 5.4 Social and Non Social Sector Split

The Social sector overall split makes up the largest portion of the provincial payments and estimates. The Social Sector amounts to 70 per cent of the total provincial payments and estimates. The percentage growth shows that Education constitute the highest share of 39 per cent, followed by Health at 27 per cent, Social Development at 27 per cent and increase of 30 per cent for other sectors. One of the contributory factors that led to the reduction of Educations' budget were the attributes of the downward revision of the FET grant from R237 million to R76 million in 2013/14 MTEF.

## 5.5 Payment by Functional Area

Functional budgeting is a mechanism through which the outcomes approach of government is brought on the budget. Government activities are grouped according to broad policy purpose. Functional budgeting spans across different spheres of government where institutions are grouped together aiming to integrate planning for efficiency gain. The allocations meant to support the reprioritization of funds in line with outcomes which is a government focal point in its quest to strengthen performance and achieve its objectives.

The payment of functional area is indicated in the table below: which depicts:

- Significant growth in the areas of Education (R3.1 billion) Health (R2.4 billion) Economic affairs (R779 million between 2009 and 2013)
- Significant growth is also observed in areas of Education (R421 million) Health (R528 million) and Social Development (R119 million between 2012 and 2013)
- Slight increase of R62 million in the area of environmental protection between 2009/10 and 2013/14 and R27 million between 2013/14 to 2015/16 MTEF

**Table 7: Summary of provincial payment and estimates by functional area**

## 5.6 Infrastructure Payments

The province has made a commitment of focusing on infrastructure that is, shifting the composition of spending from consumption in favour of investment. This is one of the key objectives of the 2013/14 MTEF. Infrastructure is one of the essential programme and a vehicle that enable the project departments such as Education, Health, Social Development, Public Works, Roads and Transport to name a few, to deliver services and thus create jobs.

The total provincial infrastructure budget accounts for R4.2 billion in 2013 which is 14.5 per cent of the total provincial budget in 2013/14; 12.8 per cent in 2014/15 and 13.2 per cent in 2015/16. The total infrastructure budget has increased by 6.3 per cent mainly in the department of Public Works, Roads and Transport.

**Table 8: Summary of provincial infrastructure payments and estimates by Vote**

## 5.7 Provincial Public- Private Partnership

The province does not have PPP ventures

## 5.8 Transfer Payments

The total allocation for this economic classification is R12.3 billion over the MTEF period . This allocation has increased by 6.5 per cent in 2013/14, decreased by 11.2.per cent in 2014/15 and increased by 4.8 per cent In 2015/16 respectively. The highest allocation is for the department of Education for school funding which amounts to R629.3 million in 2013; million; R763 million in 2014/15 and R798 million in 2015/16 respectively.

### *Transfers to Public Entities*

Transfers to Public Entities reflect a constant growth over the MTEF period. This is mainly observed in Youth Development Trust and Provincial Arts Culture and Council. One of the focal point of the 2013/14 MTEF is to review government entities and agencies in order to rationalize these and find synergies and other cost-saving opportunities. In an attempt to implement this National Treasury's directive, the province is in the process of merging three public entities, namely, Mafikeng Industrial Development Zone, Invest North West and North West Development Corporation in order to establish a new entity by the 1 April 2014. The table below the details of the NW Government Entities:

**Table 9: Summary of provincial transfers to public entities by transferring departments**

## 5.10 Training

The table below demonstrates a trend in the training costs of the province. Overall, the trend is increasing by 9 per cent. Although Education's training budget shows a decline of 20 per cent between 2012/13 and 2013/14 it remains the highest contributor to the total cost for training within the province. Health, with its training cost accounting for an average of over 30 per cent per annum of the total training cost over the MTEF, is the second highest.

**Table 13: Summary of provincial payments on training by vote**
