FOREWORD

The current unfavorable economic conditions, should not be a stumbling block and an excuse for Bokone Bophirima Government not to implement programmes that seek to comprehensively deal with the triple challenges of unemployment (youth and women in particular), poverty and inequality. The 2015 budget serves as a commitment by the provincial government to fight these challenges.

Given the limited resources and the state of the economy, the emphasis over the MTEF would be on efficiency and continuously evaluating how we deliver services and transform our institutions to make them more responsive to the needs of our People. The 2015 budget focuses on programmes that promote economic growth through Agriculture, Culture and Tourism, investment in key economic infrastructure and enterprise development with more emphasis on villages, townships and small "dorpies" (VTSD) economy.

The 2015 MTEF budget reflects the policy priorities contained in government's Medium-Term Strategic Framework (MTSF), which identifies the key actions required to implement the National Development Plan (NDP). Key principles informing the 2015 budgets are Rebranding, Repositioning and Renewal (RRR); Reconciliation, Healing and Renewal (RHR); sustaining funding for social sector departments (Education, Health and Social Development) and implementation of Setsokotsane and Bua le Puso programmes.

Being true to our "Saamwerk Saamtrek" philosophy and given the limited resources at our disposal, the 2015 budget requires that our people, government, business and civil society work together in order to contribute to the economic growth and job opportunities in our Province.

1. Socio-economic Outlook

1.1 Introduction

Against the backdrop of current global economic conditions, where economic growth generally remains benign for most developed economies and for the South African economy, economic conditions in the North West province are no different with subdued economic growth rate of 0.6 per cent having been registered in recent times, income inequality as measured by the Gini coefficient is at 0.6, and official unemployment and poverty still remain stubbornly high at 26,8 per cent and 40 per cent respectively in 2014.

More innovative, efficient and cost saving strategies need to be adopted in resource allocation if these challenges are to be tackled effectively. Tight economic conditions and growing national debt has recently forced the National treasury to impose budget cuts with strict fiscal control measures. This clearly requires provincial government to do more with little to address the socio-economic conditions facing citizens of this country.

Forming the backbone of this document is the South African National Development Plan (NDP) which aims to eliminate poverty and reduce inequality as measured by the Gini coefficient to 0.5 by 2030. This compels provincial government and municipalities to work collaboratively and tirelessly towards attaining these goals, among other key priorities of the plan. The National Planning Commission's Diagnostic Report, released in June 2011 set out nine primary challenges:

- 1. Too few people work
- 2. The quality of school education for black people is poor
- 3. Infrastructure is poorly located, inadequate and under-maintained
- 4. Spatial divides hobble inclusive development
- 5. The economy is unsustainably resource intensive
- 6. The public health system cannot meet demand or sustain quality
- 7. Public services are uneven and often of poor quality
- 8. Corruption levels are high
- 9. South Africa remains a divided society

It is on these bases that a continuous socio-economic review must be carried out to assess if the provincial consumption and investment of public resources is assisting in addressing the identified socio-economic challenges as mapped out by the NDP.

1.2 Demography

1.2.1 Population growth

Population growth in North West Province has increased from 2.9 million in 1996 to 3.6 million in 2013 and is expected to increase to 3.8 million in 2017. There are more female children aged 0 to 9 years in the province. Between 2006 and 2011 the North West Province has experienced

the highest population growth rate of 1.6 per cent compared to 1996 to 2001 and 2001 to 2006 with population growth rate of 0.9 per cent and 1.1 per cent, respectively. From 1996 to 2013, the NWP has recorded the population growth rate of 1.2 per cent.

The significance of population growth can be noticed in an increase of budgetary allocation from National Treasury to the Provincial government (increase in equitable share). On the other flip side of the coin, increased population growth means demand increase for public goods and services such as housing, health facilities, schools, construction of new roads, provision of water, sanitation, electricity, etc. With the current backlog in infrastructure and service delivery, this is likely to place more pressure on government as a provider of basic services.

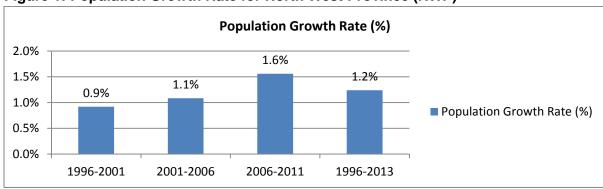

Figure 1: Population Growth Rate for North West Province (NWP)

Data Source: IHS Global Insight (2014)

Figure 2 below indicates that the NWP population has increased from 2, 9 million in 1996 to 3, 6 million in 2013. According to Global Insight estimates, the population for the North West Provinces is projected to increase to 3, 8 million by 2017.

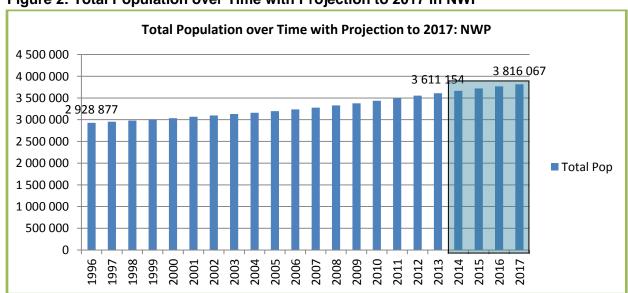

Figure 2: Total Population over Time with Projection to 2017 in NWP

Data Source: IHS Global Insight (2014)

1.2.2 Age and Gender

Figure 3 below shows the North West population by age and gender. There are more children aged 0 to 9 years in the province which means the province has to ensure that there is sufficient budget allocation on education and healthcare. This is followed by a large number of young people in the province which is largely dominated by males. From the age 55 to 75+, there are more females than males; government needs to also cater for the elderly by budgeting sufficiently to care for the elderly, especially old women.

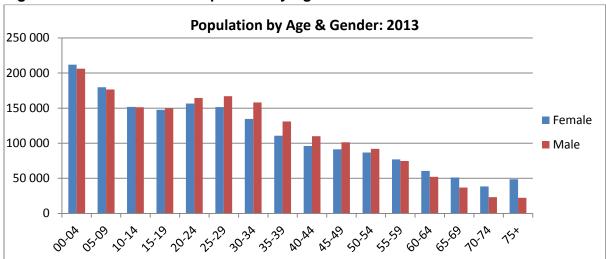

Figure 3: North West Total Population by Age and Gender in 2013

Data Source: IHS Global Insight (2014)

The gender dynamic in the North West Province is worth noting. Amongst children there are more females than males. From the age of 10 to 19 females and males are equal and from 20 years to 54 years there are more males than females.

1.3 Socio-economic indicators

1.3.1 Poverty

Figure 4 below shows a total number of people leaving in poverty in the North West Province. Poverty levels started to decline from 2004 until 2007, thereafter increasing moderately to 1,668,117 in 2008 before declining to 1,532,151 in 2013.

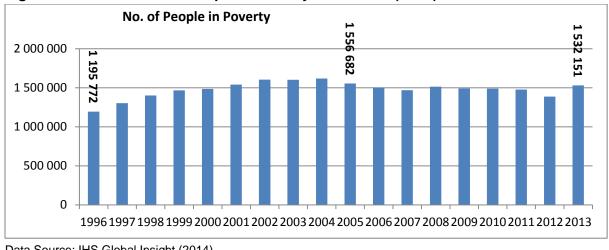

Figure 4: Total Number of People in Poverty: 1996-2013 (NWP)

Data Source: IHS Global Insight (2014)

Between 2011 and 2012, number of Asians living in poverty has slightly increased while that of Africans, Coloured and Whites has decreased. Most important to note, is the fact that in there are more Africans who still experience poverty and most of them are women and are living in rural areas.

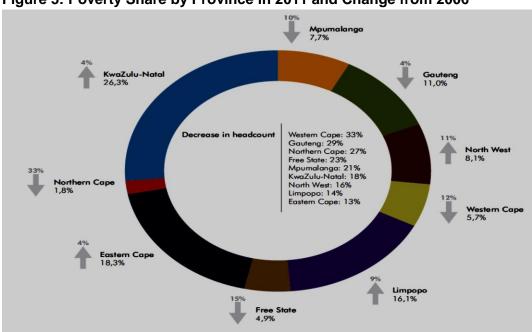

Figure 5: Poverty Share by Province in 2011 and Change from 2006

Source: StatsSA, 2014

Figure 5 indicates that despite Gauteng having the lowest headcount of individuals living below the poverty line, it had the fourth highest number of poor people (11.0 per cent) in 2011. As one would expect, the Northern Cape - with a poverty headcount of 46.8 per cent in 2011 - was home to only 1.8 per cent of the country's poor because of the small number of people that live in the province.

Western Cape and Gauteng – had the lowest headcounts in 2006. The two provinces had the lowest headcounts from 2006 to 2011 of 33 per cent and 29 per cent respectively. At the other end of the scale, Eastern Cape (13 per cent) and Limpopo (14 per cent) saw the smallest reduction in poverty headcounts.

The poverty gap for Limpopo was the highest in all three periods – it was 36.8 per cent in 2006 before increasing to 44.4 per cent in 2009 and then decreasing to 300 per cent in 2011.

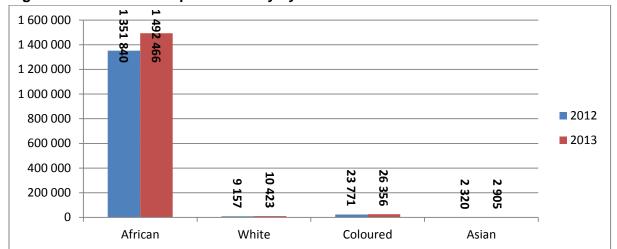

Figure 6: Number of People in Poverty by Race in North West Province: 2012 & 2013

Data Source: IHS Global Insight (2014)

Poverty in the North West Province requires intensive investment in rural development with emphasis on programmes and projects such as agriculture, manufacturing and provision of basic service including access to technology. Amongst others, embracing golden economy in the NWP could come a long way in pulling people in rural areas out of poverty

1.3.2 Household Income

According to IHS Global Insight (2014), Annual total disposable income is the total disposable income for all households in the region summed together. Disposable income includes:

- Labour remuneration
- Income from property (including dividend receipts, interest receipts less interest payments rent receipts less maintenance cost, mortgage interest and consumption of fixed capital)
- Current transfers from general government
- Current transfers from incorporated business enterprises
- Transfers from the rest of the world

As shown in figure 7 below, South Africa has experienced a general increase in Annual Disposable income across all provinces.

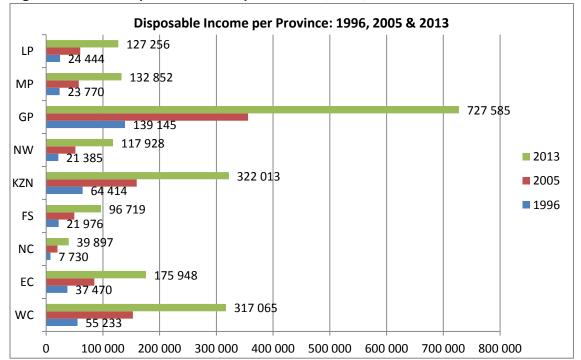

Figure 7: Annual Disposable Income per Province, 1996, 2005 &2013

Data Source: IHS Global Insight (2014)

Though North West the lowest disposable income across provinces, it has also recorded increase in annual disposable income in 2013 (117.928 million) from 21.385 million in 1996. With mining sector and Community Services as major contributors to North West employment and economic growth, more opportunities can still be explored in the North West province which can result in job creation, economic growth and ultimately increased disposable income for citizens of the province.

Figure 8 below shows that Africans received the largest share of increase in disposable income, followed by whites, with Coloureds and Asians still remaining far below R10 million per annum in the North West. This is attributable to the fact that the Africans constitute about 70 per cent of the provincial population.

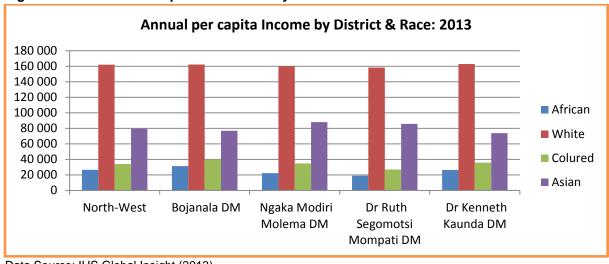

Figure 8: Annual Total Disposable Income by Race in NWP: 2013

Data Source: IHS Global Insight (2013)

Generally, income is derived from different sources including social grants which are paid by government to deserving individuals. The impact of social grants on poverty in South Africa can never be undermined. According to figure 3.9, South African has witnessed an upward increase in social grants expenditure providing poorer families across the country with income to acquire basic necessities amongst others.

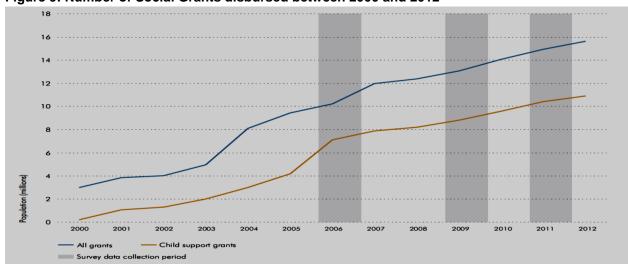

Figure 9: Number of Social Grants disbursed between 2000 and 2012

Source: StatsSA, 2014

1.3.3 Income Inequality

Income inequality is measured by the Gini coefficient which generally varies from 0 to 1. If the Gini Coefficient is equal to zero it means that incomes are distributed in a perfectly equal manner, indicating a low variance between high and low income earners in the population. If the Gini coefficient is equal to one, income is completely inequitable, with one individual in the population earning income, whilst everyone else earns nothing.

According to IHS global insight (2014), income inequality remains one of the major challenges in South Africa with North West Province not being an exception. Income inequality is one of the indicators showing the extent to which the large population in a country remains excluded from participating in the economy.

According to figure 10 below, the provincial Gini Coefficients appear to be rather similar across all provinces, ranging from 0.59 to 0.64. Thus, all provinces are burdened with unequal societies. In addition, figure 10 indicates that levels of inequality within provinces are lower than that of national average.

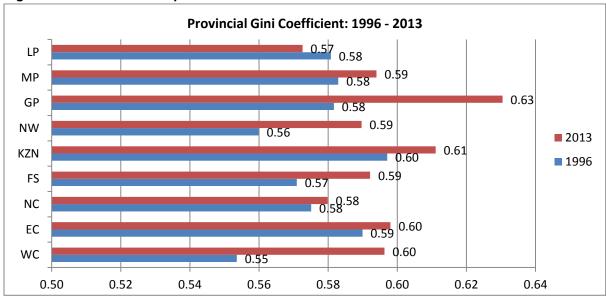

Figure 10: Gini Coefficient per Province for the Years 1996 & 2013

Data Source: IHS Global Insight (2013)

Figure 10 further shows income inequality amongst different provinces between 1996 and 2013. Provinces such as Western Cape, Gauteng and North West shows to recoded a wider increase in income inequality between the periods under review. Gini-coefficient for North West Province was 0.56 in 1996 and increased t0.59. Such increase in income inequality remains unacceptable and more efforts are required to reduce income inequality to below 0.50.

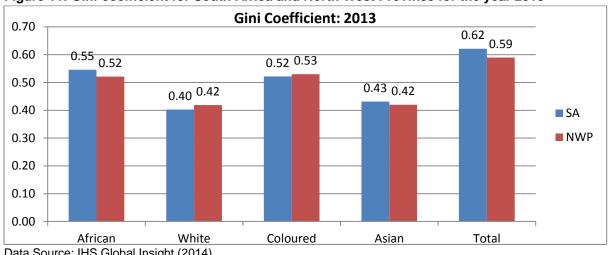

Figure 11: Gini-coefficient for South Africa and North West Province for the year 2013

Data Source: IHS Global Insight (2014)

Amongst all racial groups as shown above, the income inequality for North West province remained higher than that of South Africa. Worth noting is that within the coloured race group, North West Province has a higher Gini Coefficient than that of South Africa. As shown in figure 12 below, within the North West district municipalities Dr Kenneth Kaunda District Municipality (0.61) had the highest Gini-coefficient followed by Ngaka Modiri Molema (0.58), Bojanala (0.58) and Dr Ruth Segomotsi Mompati being the lowest with 0.57. Dr Kenneth Kaunda District municipality is the most unequal district in the North West Province.

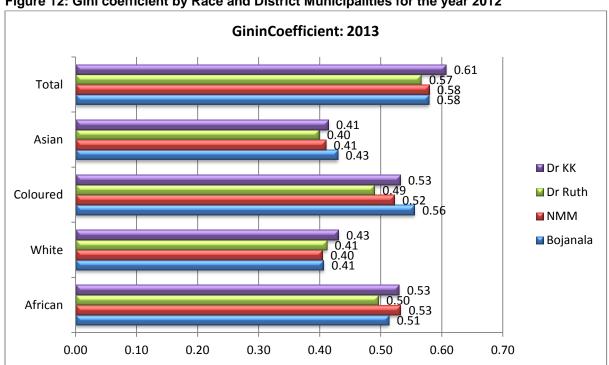

Figure 12: Gini coefficient by Race and District Municipalities for the year 2012

Data Source: IHS Global Insight (2014)

1.3.4 Human Development

According to IHS Global Insight (2014), The Human Development Index (HDI) is a composite relative index used to compare human development across population groups or regions. HDI is the combination of three basic dimensions of human development

- A long and healthy life
- Knowledge
- A decent standard of living

A long and healthy life is typically measured using life expectancy at birth. Knowledge is typically measured using adult literacy and / or the combination of enrolment in primary, secondary and tertiary schools. A decent standard of living is typically measured using GDP per capital.

The HDI can assume a maximum value of 1, indicating a very high level of human development. It has a minimum value of 0, indicating no human development. Figure 13 below shows that there is a general improvement across all provinces with Western Cape and Gauteng taking the lead in human development followed by Northern Cape and Free State province.

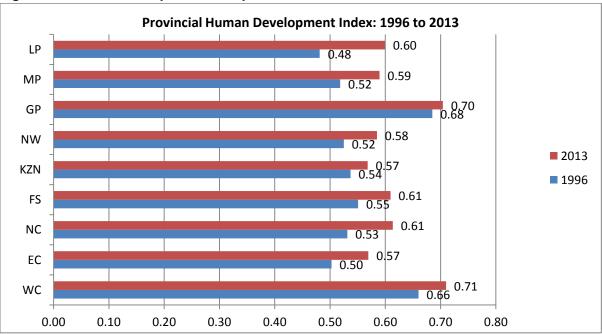

Figure 13: Human Development Index per Province: 1996 & 2013

Data Source: IHS Global Insight (2014)

Figure 14 below shows the trend of human development in South Africa and North West Province for the period 1996 to 2013. The HDI moved from an average of 0.58 in 1996 to just above 0.63 in 2013 for South Africa and North West following the same trend (0.52 in 1996 to 0.58 in 2013) just below the national human development trend.

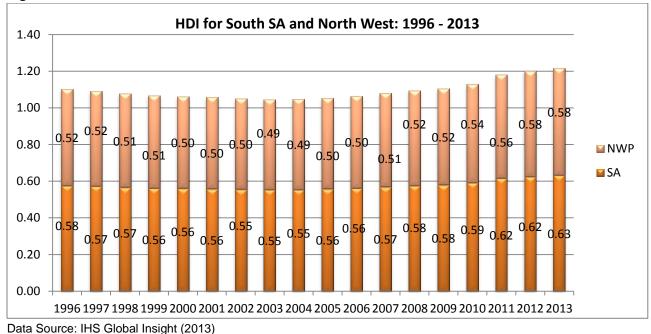

Figure 14: HDI for South Africa and North West Province: 1996-2012

Generally, in the North West Province whites are more developed than the blacks. Taking into account that most black in the North West Province reside in rural areas, the importance of rural development, women and youth empowerment should remain priority in resource allocation.

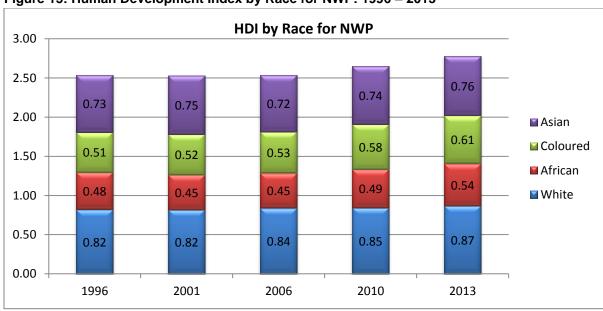

Figure 15: Human Development Index by Race for NWP: 1996 - 2013

Data Source: IHS Global Insight (2014)

Figure 16 below shows the HDI for all district municipalities by race. Across all district municipalities, white people shows to be the most developed society followed by Asians, Coloureds and Africans showing to be the most underdeveloped society in the province and across all districts.

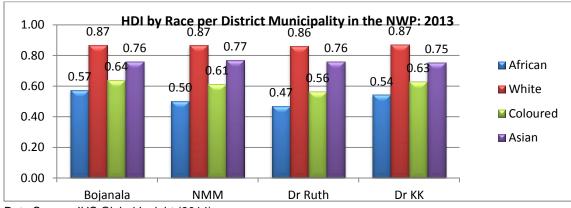

Figure 16: HDI for Dr Ruth Segomotsi Mompati & Dr Kenneth Kaunda for 2013

Data Source: IHS Global Insight (2014)

1.3.5 Education

The role of education in economic growth and development, human development and alleviation of poverty can never be over-emphasised. According to StatsSA (2014), in 2006, approximately half (49.8 per cent) of the population aged 18 and above in South Africa were living below the upper-bound poverty line.

By 2009, the proportion had not changed much (49.6 per cent), whereas there was a significant decrease to less than two-fifths (39.4 per cent) of the population living below the poverty line by 2011. This reflects a 21 per cent reduction in the levels of poverty amongst adults from 2006 to 2011.

Figure 17 shows the significant differences in levels of poverty amongst the adult population when looked at by the level of education they had attained. In 2006, only 6.0 per cent of individuals with an education level higher than matric were living in poverty. While this proportion increased to 10.6 per cent in 2009 it had decreased again to 5.5 per cent in 2011.

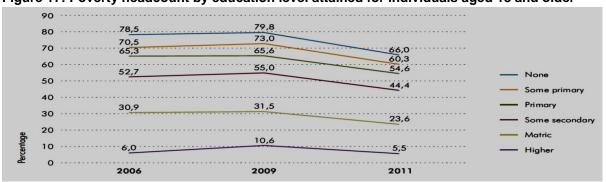

Figure 17: Poverty headcount by education level attained for individuals aged 18 and older

Source: StatsSA, 2014

In stark contrast, those individuals with little or no education displayed significantly higher levels of poverty. More than three-quarters (78.5 per cent) of adults with no formal schooling were poor in 2006, as were seven out of every ten (70.5 per cent) adults with some primary school education.

While these high levels of poverty increased in 2009, there were significant decreases by 2011 – this trend was seen within each different category of educational attainment. Nevertheless, despite a 16 per cent decrease in poverty headcount for adults with no formal schooling from 2006 to 2011, almost two-thirds (66.0 per cent) remained impoverished in 2011.

The North West province is not an exception to this situation. However, on a positive note, there has been an improvement in access to education and education attainment in the province with the number of individual with no schooling decreasing from 224,076 in 2012 to 220,536 in 2013; individuals with matric increasing from 540,443 in 2012 to 546,824 in 2013 and individuals with Bachelor degrees slightly increasing from 53,688 in 2012 to 54,447 in 2013.

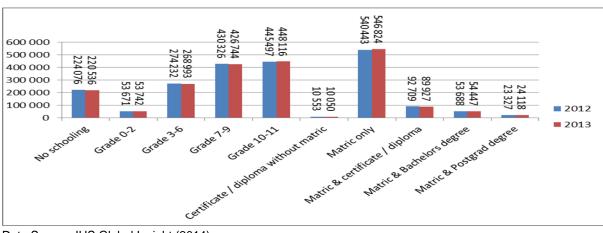

Figure 18: Highest Level of Education for individuals aged 15+ for NWP: 2012 & 2013

Data Source: IHS Global Insight (2014)

1.3.5.1 Mathematics

As per the preliminary assessment of Department of Basic Education (DBE), the following extract is made for Mathematics and Physical sciences to determine the performance of Grade 12 learners.

According to the North West Department of Education, the overall performance of Grade 12 learners in mathematics in the 2008 to 2012 period has been a negative one. In 2012, the number of mathematics passes was 22 per cent below the Action Plan target value. However, between 2011 and 2012 there was an improvement that reduced the gap between the target and actual values, from 25 per cent to 22 per cent. The number of Grade 12 learners passing physical science in the 2008 to 2012 trend has been more negative than the mathematics one. In 2012, however, the actual value was 26 per cent below the target value. As in the case of mathematics, the 2011 to 2012 improvement is roughly compatible with the trajectory of targets

beyond 2012. As seen in the above table, the performance of North West Grade 12 learners is second lowest in Mathematics and the lowest in physical science if compared with other provinces.

Table1: Mathematics and Physical Science Passes

Province	2008	2009	2010	2011	2012

WC	9,688	7,074	7,524	7,137	7,984
SA	119,823	81,590	98,260	96,441	109,918

Source: Official DBE examination reports. Note: All figures refer to full-time students. The Bachelors level figures include supplementary examination results, whilst the mathematics and physical science figures do not, due to difficulties in obtaining the relevant province-level statistics.

According to the 2012 performance of Grade 3 learners in mathematics, as per the Annual National Assessments (ANA), 36 per cent of learners obtained an 'adequate' score for mathematics. The 2012 ANA for Grade 6 learner performance in mathematics, 11 per cent of learners obtained an 'adequate' score for mathematics while Grade 9 learner performance in mathematics, 2 per cent of learners obtained an 'adequate' score.

1.3.5.2 Education Ratios

Taking into account different abilities and capabilities of learners to understand subjects being taught, teachers are expected to give all the necessary support and attention to individuals in

class. To successfully do this, a reasonable number which is at most 30 leaners in one classroom per teacher should be adhered to.

The learner Educator Ratio indicates the number of learners assigned to one educator for a specific subject in a particular year. While in total the North West Province has been doing well with Learner Educator Ration standing at 29.9 in 2012, when looking into the Public Ordinary Schools in isolation, the province is not doing well. Table 3.5 shows that Learner Teacher Ration has increased from 29.7 in 2009 to 31.8 in 2012.

Table 2: Leaner Educator Ratio (LER) for North West Province

Province	Learner Educator Ratio							
	2009	2010	2011	2012				
North West	29.1	29.2	29.5	29.9				

Source: SNAP Ordinary Schools 2009 and 2012

Definition: It is calculated by dividing the total number of learners enrolled in schools by the total number of teachers in the school.

Table 3: Learner educator Ratio in ordinary public schools (LER)

Province	Learner educator ratio in ordinary public schools							
FIOVILICE	2009	2010	2011	2012				
North West	29.7	29.8	31.3	31.8				

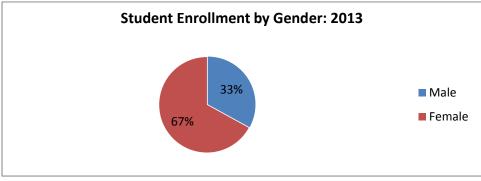

Source: SNAP Ordinary Schools 2009 and 2012

The situation requires an improved increased investment in both education infrastructure and teacher training and development to ensure that there are sufficient schools and teachers with adequate knowledge and skills to educate learners at ordinary schools.

1.3.5.3 Tertiary Education in the North West Province

According to figure 19, the number of female and male students enrolled at the North West University remained the same at 67 per cent and 33 per cent respectively between the 2012 and 2013 academic year.

Figure 19: Gender Composition of student Enrolment at NWU: 2013

Source: NWU, Annual Report, 2013

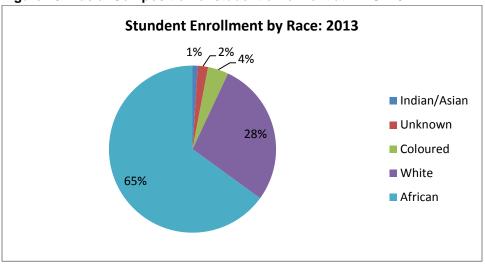

Figure 20: Racial Composition of student enrolment at NWU: 2012

Source: NWU, Annual Report, 2013

In 2013, the NWU had more Black students (65 per cent) enrolled followed by whites (28 per cent), coloured and other racial groups each contributing 6 per cent to the university total enrolment and Indian/Asians only contribute only 1 per cent of student enrolment.

In 2013, the North West University had registered 60 975 students. According to table 4 below, total degrees and diplomas awarded for both contact and distance learning was 15 464 in 2013 compared to 14 669 in 2012.

Table 4: Degrees and Diplomas Awarded 2004 – 2012

Degrees and diploma conferred	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013
First degree	3 032	3 237	3 719	3 646	3 698	3 902	4 162	4 249	4 771	5 624

PhDs	87	82	110	124	100	123	129	115	154	168
Total	9 657	7 753	9 824	11 345	12 337	13 445	15 083	15 094	14 669	15 464

Source: NWU Annual Report, 2013

One of the key factors contributing to access to tertiary education is finance. Students depend on various sources of financial support such as own source (family support) in cases where students do not have families that can support or finance their tertiary education they depend on bursaries or loans. According to tables 3.8 below, for students learning at North West University, government and other external funding remain the largest funders at 40 per cent each, while NWU contributes the remaining 20 per cent.

1.3.5 Health

According to the world health organisation (WHO), health is defined as the state of complete physical and social wellbeing and not merely the absence of disease. There are two aspects of health:

- PHYSICAL HEALTH-is maintained through physical activities such as exercising good nutrition and enough rest and relaxation.
- MENTAL HEALTH-According to WHO, mental health is "a state of well-being in which the
 individual realizes his or her own abilities, can cope with the normal stresses of life, can
 work productively and also able to make a contribution to his or her community mainly
 through creativity thinking.

Being healthy as an individual is beneficial for individuals and the community at large, healthy individual bring about innovation, and speedy atmosphere, enhancing mass production. It is also important to note that there are personal, social and economic consequences of being unhealthy.

1.3.5.1 Life Expectancy and Adult Mortality

According to table 6, life expectancy in the North West Province has basically remained unchanged from 2012 to 2013 with the average life expectancy being 58 years. Females are expected to live longer (61 years) than males (55 years) in the North West Province. The average life expectancy Limpopo, Northern Cape, Western Cape and Gauteng are some which are higher than that of North West. Short life expectancy is a threat to economic development of any country or province as it might result in the loss of, amongst others the intellectual capacity and human resource capacity which may contribute to reduced productivity.

Table 6: Life Expectancy at Birth

	EC	FS	GP	KZN	LP	MP	NC	NW	wc	SA	Ref

Source: SAHR (2012/13)

Though the life expectancy shows to be above 55 years across all provinces, the adult mortality rate is way below that. Most people dies around the age of 40 years with Western Cape having more young people dying followed by Northern Cape and Gauteng on average, people in the North West shows to be living up to the age of 44 years with women mortality standing at 38 years and males 50 years of age in 2013.

Table 8: Number of recorded deaths (2013)

District	Number	Percentage
South Africa	458933	
North West	35531	7.7%
Bojanala	12633	35.6%
Dr Kenneth Kaunda	7755	21.8%
Dr Ruth Segomotsi Mompati	5494	15.5%
Ngaka Modiri Molema	9131	25.7%
District Unspecified	517	1.5%

Table 8 shows the number of recorded deaths in the North West Province per district municipality. Bojanala district municipality is leading with a number of death occurrence with 12 633 (35.6 per cent) followed by Ngaka Modiri Molema 9 131 (25.7 per cent), Dr Kenneth Kaunda 7 755 (21.8 per cent) and Dr Ruth Segomotsi Mompati being the lowest with 5 494 (15.5 per cent).

The pattern of death occurrence in the North West Province per district follows the population distribution across the province and the economic activities.

Source: StatsSA, (2014)

Figure 23 below shows the number of recorded deaths by sex and provinces. Gauteng is leading followed by KZN and Eastern Cape. Northern Cape has the lowest deaths recorded followed by Free State, North West and Mpumalanga which are within the same bracket. Except for Limpopo, in all other eight provinces male deaths recorded exceed that of females.

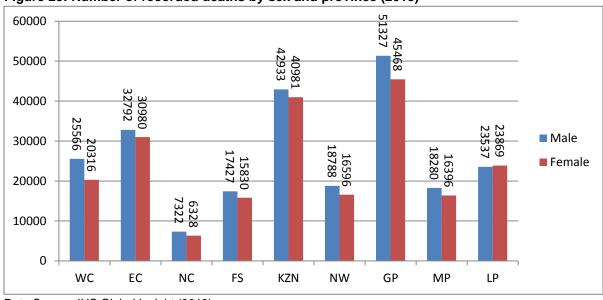

Figure 23: Number of recorded deaths by sex and province (2013)

Data Source: IHS Global Insight (2013)

Table 9 shows the Leading underlying natural causes of Death in North West for the year 2013. Tubercolosis, influenza and heart diseases are the three leading causes of death in the North West Province.

Table 10 shows that the number of people living with HIV in South Africa has increased from 5 350 803 in 2009 to 5 786 603 in 2013. The number of people living with HIV has also increased from 422 850 in 2009 to 441 816 in 2013. The percentage of deaths due to AIDS also increased 41.0 per cent in 2009 to 36.2 per cent in 2013 while the at national level, percentage of deaths due to AIDS have slightly declined from 32.9 per cent in 2009 to 31.9 per cent in 2013.

1.4 Economic indicators

1.4.1 Employment

According to figure 23 below, employment has slightly increased between 2012 and 2013. North West province increased from 719,759 to 733,157. Gauteng is one of the leading employers in South Africa followed by KwaZulu-Natal and Western Cape.

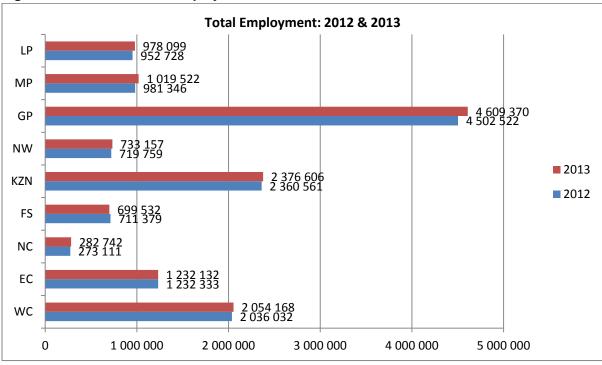

Figure 23: Total Provincial Employment: 2012 & 2013

Data Source: IHS Global Insight (2013)

Three major employing sectors in the North West Province are mining, Community Service and Trade. Employment in the agricultural sector has been on a decline since 1996 and it over taken by household in 2008/2009 but the increased slightly above household in 2013. Figure 24 below shows employment in the North West Province by economic sector.

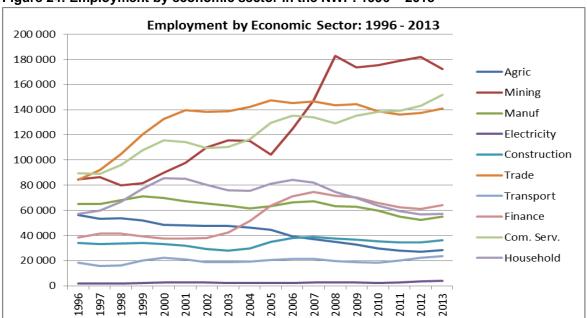

Figure 24: Employment by economic sector in the NWP: 1996 - 2013

Data Source: IHS Global Insight (2013)

The economic recovery has increased employment recorded this year in the North West Province. Some economic sectors have recorded and decrease in the number of people employed. Employment contracted in sectors such as construction, trade and manufacturing.

While other economic sector are on an increase in employment, as shown in figure 25 below employment in the mining sector has declined from 182,061 in 2012 to 172,243 in 2013. Community services showed the highest increase in employment to 151,949 in 2013 from 142,922 in 2012. Agriculture also recorded an increase in employment moving from 27,248 of people employed in the sector in 2012 to 28,339 in 2013.

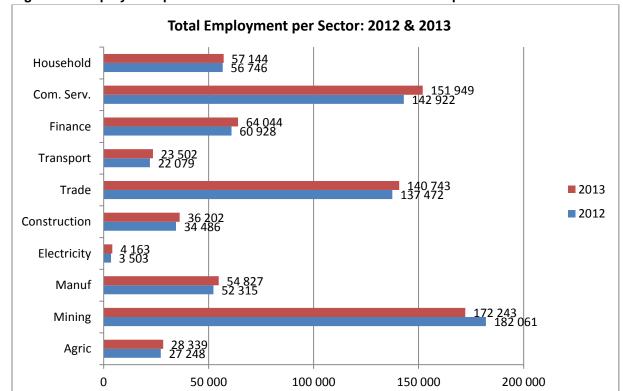

Figure 25: Employment per Sector in the North West Province for the period 2011 & 2012

Data Source: IHS Global Insight (2013)

1.4.2 Unemployment

Since 1996, the North West Province had high unemployment levels amongst females compared to male. However, since 2012 the province experienced a change in gender unemployment patterns where the number of unemployed males became larger than that of females. In 2013, there were 146,633 males unemployed compared to 136,605 females unemployed. Despite a slight decline in total unemployment in 2011, figure 26 further shows that there has been a slight increase in unemployment in the North West Province.

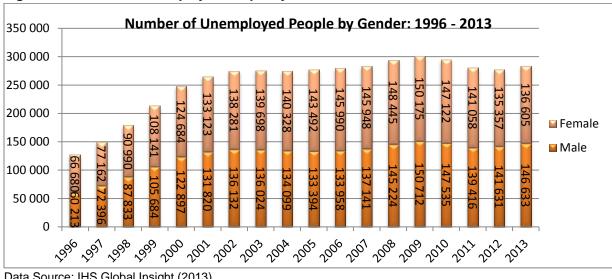

Figure 26: Number of Unemployed People by Gender in NWP: 1996 - 2013

Data Source: IHS Global Insight (2013)

In percentage terms, as depicted in figure 27 below, 32,3 per cent of females were unemployed as compared to 22,3 per cent of males. Unemployment generally increased between 2011 and 2013 for both males and females.

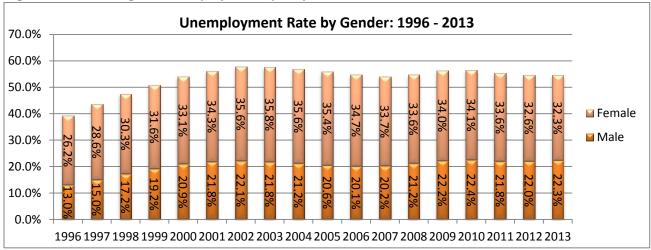

Figure 27: Percentage of Unemployed People by Gender in NWP: 1996 – 2012

Data Source: IHS Global Insight (2013)

1.4.3 Economic Growth

A shown in table 11 below, Gauteng province (34.57 per cent) remains one of the largest economies contributing to South African economy followed by KwaZulu-Natal (15.87 per cent) and Western Cape (13.71 per cent). North West remains amongst the lowest growing economies in South Africa with its contribution to national economy recording 6.24 per cent in quarter 4 of 2014.

Table 11: GDP per Province in South Africa: 2012 & 2013

Province	GDP 2012	GDP 2013	Percentage change (2012/2013)	Contribution Per Province(2013)
Western Cape	R 397 191	R 406 409	2.32%	13.71%
Eastern Cape	R 223 675	R 226 071	1.07%	7.63%

Source: StatsSA, (2014)

Tertiary Industries is the leading contributor to North West economy followed by primary industries and secondary industries being the lowest. However, the mining sector which is within the primary industry remains the dominating economic sector in the North West economy.

Table 12: GDP contribution by industry (Million Rand): 2014

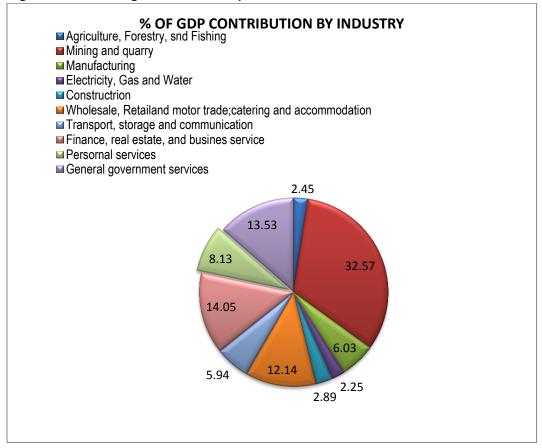

Provinces	North West	South Africa	
Primary Industry	58 558	298 788

Source: StatsSA, (2014)

As shown in Table 11 above and Figure 30 below mining sector remains the leading economic sector in the North West Province with its GDP contribution to North West economy setting at 32.57 per cent in the year 2013 followed by Finance sector at 14.05 per cent and General Government Service with 13.53 per cent.

Figure 30: Percentage share of GVA per economic sector in the NWP: 2013

Source: StatsSA, (2014)

Generally, since the economic recession the South Africa and North West economic performance has been very low. The economy has not been able to absorb labour with various sectors in the North West continuously declining in productivity excluding that of mining sector.

The pronouncement by the North West Premier to focus on Agriculture, Arts & Culture, and Tourism has the potential to unleash the economic potential of the North West Province. Of utmost importance is to ensure gender mainstreaming and mainstreaming of Renewable Energy Strategy for the North West Province which has the potential to create jobs.

1.5 Household Infrastructure

1.5.1 Water

North West province is one of the rural provinces in South Africa which has its unemployment and population size being on the rise on annual basis. According to figure 31, There are still more households (177,305) in the North West province with no access to piped water and while Bojanala has the highest population size, it has the highest piped water in yard compared to other district municipalities.

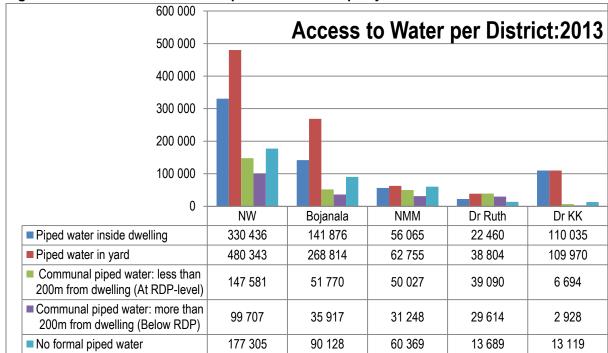

Figure 31: Access to Water in NWP per District Municipality in 2013

Source: IHS Global Insight (2014)

Figure 32 shows that the percentage of households with access to piped water inside the dwelling or yard has increased in all the nine provinces. Gauteng had the highest percentage at 89, 4 per cent, followed by Free State, Western Cape and Northern Cape at 89, 1 per cent, 88, 4 per cent and 78, 0 per cent respectively. Eastern Cape, KwaZulu-Natal, North West, Mpumalanga and Limpopo were at 49, 4 per cent, 63, 6 per cent, 69, 3 per cent, 71, 7 per cent and 52, 3 per cent respectively, which is lower than the recorded national average of 73, 4 per cent.

Figure 32: Percentage of households with access to piped water inside the dwelling/yard by province: Census 1996, 2001, 2011 and Community Survey 2007

Source: StatsSA, Census 2011

1.5.2 Electricity

Access to energy is fundamental to fulfilling basic social needs, driving economic growth and fuelling human development. Services such as electricity, natural gas, modern cooking fuel and mechanical power are necessary for improved health and education, better access to information and agricultural productivity, Gaye (2007)1.

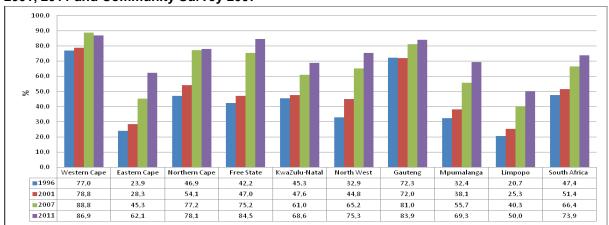

Figure 33: Percentage of households using electricity for cooking by province: Census 1996, 2001, 2011 and Community Survey 2007

Source: StatsSA, Census 2011

Figure 33 shows the percentage of households which use electricity for cooking. The graph shows an increase in all the provinces since 1996. Nationally, it increased from 47, 4 per cent in 1996 to 73, and 9 per cent in 2011. Western Cape recorded the highest at 86, 9 per cent, followed by Gauteng at 83, 9 per cent and the lowest being Limpopo at 50, 0 per cent.

¹ Gaye A., (2007), Access to Energy and Human Development, Human Development Report 2007/2008, UNDP

70,0 60,0 50,0 40.0 30.0 Western Cape **=1996** 22.0 44.9 40,1 44.8 33.0 31.6 46,5 **200** 80,0 32,6 64,9 54,6 56,9 57,9 76,5 45,0 36,8 **2011**

Figure 34: Percentage of households using electricity for heating by province: Census 1996, 2001, 2011 and Community Survey 2007

Source: StatsSA, Census 2011

Figure 34 shows the percentage of households that use electricity for heating in various provinces. The increase in the proportion of households using electricity for heating has significantly increased in eight of the nine provinces over the period 1996 – 2011.

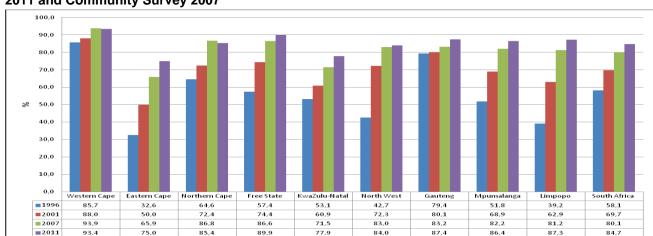

Figure 35: Percentage of households using electricity for lighting by province: Census 1996, 2001, 2011 and Community Survey 2007

Source: StatsSA, Census 2011

Figure 35 shows that over the period 1996 – 2011, electricity was the main source of energy for lighting for most households in all provinces. The proportion of households using electricity for lighting in South Africa increased from 58, 1 per cent in 1996 to 84.7 per cent in 2011. Western Cape recorded a highest proportion at 93, 4 per cent, followed by Free State (89, 9 per cent). Eastern Cape had a lowest at 75.0 per cent.

Access to electricity for cooking in the North West province increased from 65.2 per cent to 75.3 per cent; for heating, it increased from 57.9 per cent to 61.8 per cent, and a minor increase from 83.0 per cent to 84.0 per cent for lighting. This indicates a reduction in energy poverty which is defined as the "inability to cook with modern cooking fuels and the lack of a bare

minimum of electric lighting to read or for other household and productive activities at sunset", UNDP (2005).

1.5.3 Refuse removal

Figure 36 shows that the proportion of households with access to refuse removal by local authority/private company at least once a week increased in all provinces since 1996. Western Cape had the highest proportion of households with access to refuse removal at 91, 1 per cent, followed by Gauteng at 89, 8 per cent in 2011. Limpopo and Eastern Cape had percentages below the national average at 43, 7 per cent and 43, 5 per cent respectively. The National average was at 63, 6 per cent in 2011.

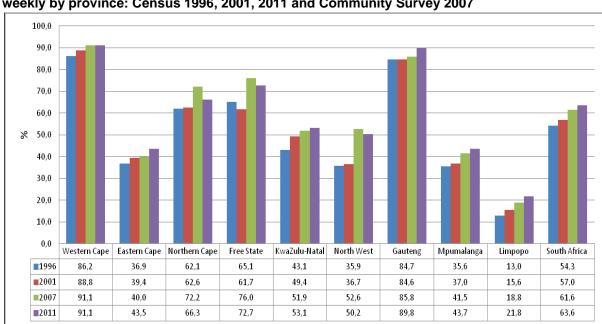

Figure 36: Percentage of households where refuse is removed by local authority/private company weekly by province: Census 1996, 2001, 2011 and Community Survey 2007

Source: Stats SA, Census 2011

1.5.4 Toilet facilities

Figure 37 shows that the percentage of households with access to flush or chemical toilet has increased in all the provinces since 1996. Western Cape is the province with the highest percentage (90, 5 per cent) of households with access to flush or chemical toilet, followed by Gauteng, Free State and Northern Cape with 86, 5 per cent; 67, 7 per cent and 66, 5 per cent respectively. The percentage of households that have access to flush or chemical toilet in Eastern Cape, KwaZulu-Natal, North West, Mpumalanga and Limpopo is below the national average of 62, 6 per cent.

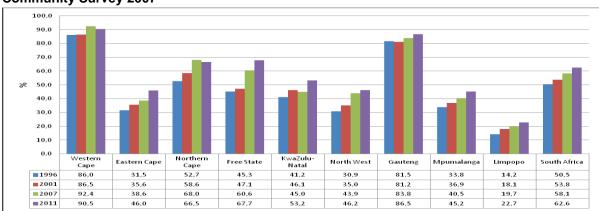

Figure 37: Percentage of households with a flush toilet by province: Census 1996, 2001, 2011 and Community Survey 2007

Source: Stats SA, Census 2011

According to Census 2011, service provision in the North West Province stands at 69, 3 per cent in access to water within the dwelling, 50, and 2 per cent in refuse removal and 46, 2 per cent in flush toilets. This clearly indicates the low level of service provision compared to other provinces.

1.6 Network Infrastructure

1.6.1 Cell phone

Figure 38 shows that the percentages of households that have a cell phone in working order increased from 32,3 per cent in 2001 to 73,3 per cent in 2007 and 88,9 per cent in 2011 nationally. Gauteng had the highest percentage in 2001 at 44, 4 per cent and it has highly increased to 93, 8 per cent in 2011. 24,5 per cent of households in Northern Cape owned cell phones in 2001, however, it increased to 81,1 per cent in 2011, which is the lowest in the country.

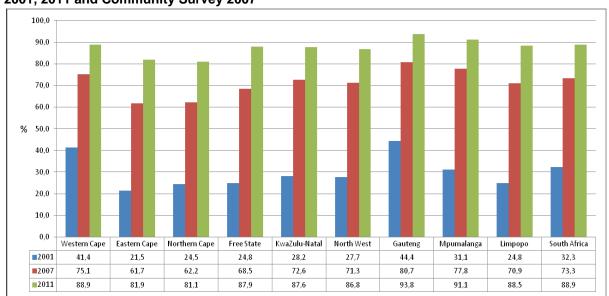

Figure 38: Percentage of households that have a cell phone in working order by province: Census 2001, 2011 and Community Survey 2007

Source: StatsSA, Census 2011

1.6.2 Landline

Figure 39 gives the percentage of households that had a landline telephone in 2001, 2011 and 2007 Community Survey. The figure shows that all provinces recorded decrease in the proportion of households with landline telephones. Western Cape recorded the highest decrease of 11, 5 per cent from 2007 to 2011 followed by Northern Cape and Gauteng. This significant decrease is attributable to the shift to the cell phone usage, which is easily accessible as compared to the landline.

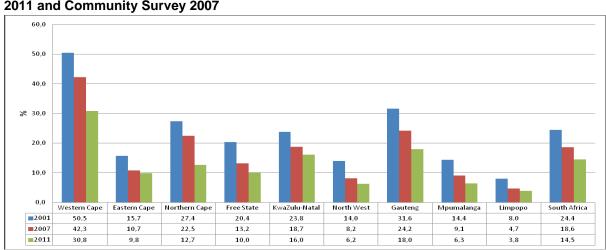

Figure 39: Percentage of households that have a landline telephone by province: Census 2001, 2011 and Community Survey 2007

Source: StatsSA, Census 2011

1.6.3 Internet

Figure 40 shows a proportion of households with access to internet increased drastically in 2011 compared to 2007. In 2007, Western Cape (16.4 per cent) had the highest access to the internet, followed by Gauteng (46, 6 per cent). Limpopo and Eastern Cape recorded the lowest access at 1, 8 per cent and 3, 2 per cent, respectively. In 2011, Gauteng had the highest access to internet at 46, 4 per cent followed by Western Cape at 43, and 7 per cent. Limpopo and Eastern Cape had the lowest proportion of the households with access to the internet at 24, 3 per cent and 24, 1 per cent respectively.

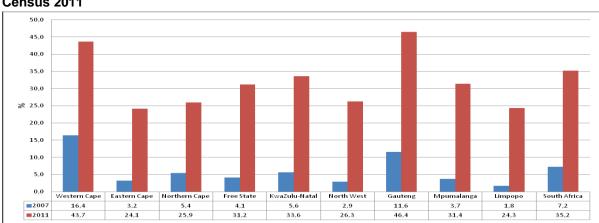

Figure 40: Percentage of households with access to the internet: Community Survey 2007 and Census 2011

Source: StatsSA, Census 2011

Generally, there is an improvement in access to means of communication in the country with more people gaining access to internet and reduction in usage of landline telephones to increased usage of cell phones.

Sufficient and access to communication infrastructure is likely to increase access to markets and increased business opportunities for many. It is therefore important for the North West province to increase its investment in communication infrastructure coupled with public education on the effective and efficient use of technology and such means of communication.

1.7 Community Safety

1.7.1 Crime Statistics

Figure 41 below shows top seven crimes in the North West Province for the financial year 2012/13. Bojanala District Municipality has the highest crime rate in North West followed by Dr Kenneth Kaunda District, Ngaka Modiri Molema District and Dr Ruth Segomotsi Mompati has the lowest crime statistics in general. The most commonly occurring crime across all district municipalities burglary at residential properties followed by assault and drug related crimes being the third highest in the province.

There is a relationship amongst the top four crimes in the North West Province which calls for an integrated crime prevention approach in dealing with crime.

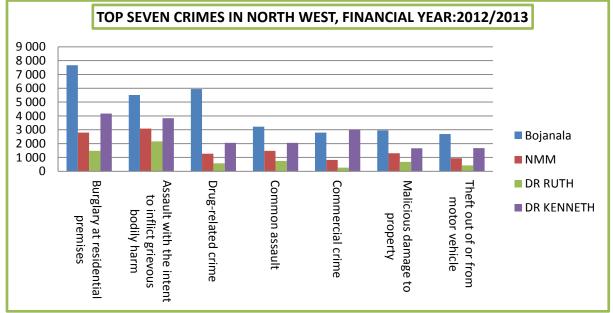

Figure 41: Top Seven Crimes in North West Province: 2012/13

Data Source: IHS Global Insight (2014)

Figure 42 below compares types of crime by province for some selected crimes. Western Cape (WC) and Gauteng Province (GP) shows to be leading in terms of crime with WC having high levels of drug related crimes and GP leading in burglary at residential property. As shown in figure 43 below, the North West province has the lowest crime rate compared to other provinces after Northern Cape (NC); Limpopo (LIM) and Mpumalanga (MP) in some crime categories.

Of importance to note is the impact of crime on economic development and crime also being to some extent a reflection of the socio-economic conditions in country and specific region. Various challenges such as unemployment and poverty may to some extend be related to crime of contributing to crime in South Africa. Hence it remains imperative for government to not to only investment its resource in direct fighting of crime by to go a step further in addressing roots causes of crime.

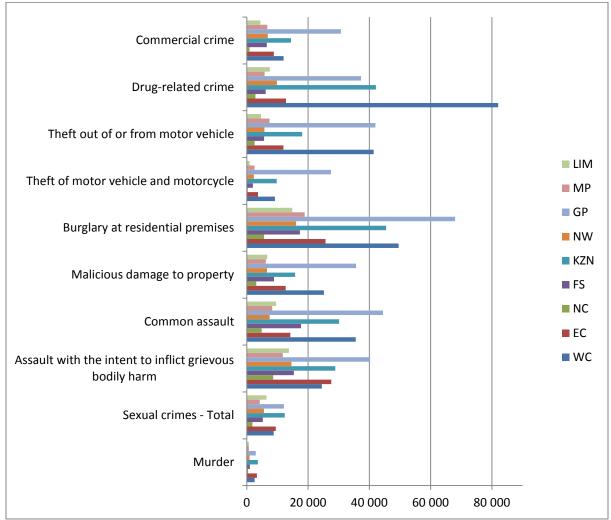

Figure 42: Crime Statistics per Province - 2012/13

Data Source: IHS Global Insight (2014)

1.8 Conclusion

South Africa has the potential and capacity to eliminate poverty and reduce inequality over the next two decades. This requires a new approach – one that moves from a passive citizenry receiving services from the state to one that systematically includes the socially and economically excluded, where people are active champions of their own development, and where government works effectively to develop people's capabilities to lead the lives they desire, (National Development Plan, 2011).

A completely new approach is required; a more evidence based allocation of resource for the North West Province could provide a basis for the beginning of a new era in dealing with poverty, unemployment and inequality. North West is still faced with high income inequality amongst the blacks, challenges with regards to access to water, high unemployment which is largely dominated by youth and poverty remains stubbornly high.

2. Summary of Budget Strategy and Aggregates

2.1 Overview of the Budget Strategy

The 2015 MTEF budget provides an opportunity for the fifth administration to outline and implement the provincial government strategy for the achievement of the 2030 National Development Plan. The budget process afforded the Executive Council an opportunity to reflect on the scale of developmental challenges confronting the province and decide on the short to long-term budget policy framework to achieve maximum impact over time. The 2015 MTEF budget is presented during a difficult period where the country is facing budget constraints, high levels of indebtness, people are still confronted with the scourge of unemployment, and provincial economic growth is still low. Not with standing that the effects of the 2008 financial crisis are still being felt by both developed and developing economies including South Africa. Bokone Bophirima as a major contributor to the high volume trade of minerals in the country remains vulnerable to the prevailing global economic conditions.

Pursuant to the achievement of the objective of the National Development Plan (NDP) and in consideration of the current economic condition, much remains to be done in the short, medium and long term. The provincial budget will accordingly continue to play a key role as a policy instrument to address the socio- economic challenges such as poverty, unemployment and service delivery backlog confronting the province. The table below highlights the Bokone Bophirima service delivery backlogs in five areas; housing, sanitation, water infrastructure, electricity connections and refuse removal.

Table: 2013 NW Service Delivery Backlogs

						Ngaka Modiri		Dr Ruth Segomotsi		Dr Kenneth

Data Source: Global Insight (2013)

Integrated planning is still one of the stumbling blocks to effective and efficient delivery of services especially on infrastructure projects. In an attempt to deal with this challenge, the North West Province is implementing "Saamwerk Saamtrek" philosophy. The 2015 MTEF budget is informed by the continuous engagement between the provincial departments, national

department, government business enterprise and the provincial municipalities. Furthermore, the province is taking a new direction in ensuring that the needs of all citizen are expressed in the budget. The 2015 MTEF budget is informed by the needs of the people of Bokone Bophirima from a municipal ward level.

The Budget reflects the policy priorities contained in government's Medium-Term Strategic Framework (MTSF), which identifies the key actions required to implement the National Development Plan (NDP). Over and above the MTSF and NDP the following principles informed the 2015 MTEF allocations:

- Promoting the Key Provincial Economic Pillars Agriculture, Culture and Tourism (ACT);
- Promoting the economic growth through investment in key economic infrastructure, and enterprise development with more emphasis on Villages, Townships and Small "Dorpies" economy;
- Incentivize departments undertaking socio-economic projects that translate into job creation;
- Sustain funding for social sector departments (Education, Health and Social Development),
 crime prevention initiatives and infrastructure development and maintenance;
- Implementing projects that create jobs and alleviate poverty; and
- Contain and reduce expenditure on non-essential items such as, catering, consultants and general administration.

To unlock the economic potential of the province with more focus on Villages, Townships and Small "Dorpies", investment in and maintenance of infrastructure, and the management of the asset portfolio of our province is of paramount importance. The focus on infrastructure will include involving the private sector investment where there is a potential for private provision of public goods. Empirical evidence suggests that, investments on infrastructure can yield tremendous benefits in the form of economic growth and employment creation.

As pronounced by the Premier during the Sate of Provincial Address an estimated amount of R1.9 billion was availed by the Department of Water Affairs to address various water and Sanitation infrastructure challenges. Thus far water projects are at different stages of planning and implementation. Some of the areas that will benefit from this project include Madibeng, Bloemhof, Schweizer Reneke, Setlagole, Tlapeng Majementsho, Tlapeng, etc. The entire project is envisaged to be completed by 2017/18. Well planned infrastructure will play a major role in supporting social and economic development.

The Infrastructure funding for the 2015 MTEF is geared towards the realization of the following key priority areas;

- Strengthening the Infrastructure HR Capacitation in the departments of Health and Education in line with Conditional Grant Bidding Process;
- Addressing the Provincial Roads Infrastructure Challenges and backlogs with specific focus on Villages, Townships and Small Dorpies;

- Mitigating on the housing needs of the impoverished communities;
- Creation of employment opportunities and growing the provincial construction and consulting capacity;
- Supporting the co-funding for the Bulk Water Infrastructure projects funded through the Department of Water and Sanitation;

The provincial growth strategy is aligned to the National Development Plan (NDP) which offers a long-term perspective of economic growth. The strategy defines a desired destination and identifies the role different sectors of society need to play in reaching that goal. As a long-term strategic plan it serves to provide overarching goals for what the province wants to achieve by 2030. Among other niche areas of employment creation, rural development and poverty eradication is to develop and grow the following strategic sectors of the North West Province economy namely, Agriculture, Culture and Tourism (ACT). In his State of the Province Address, the Premier pronounced ACT as the three pillars of the economic growth in the province with other sectors such as mining as tributaries.

North West Provincial Government's strategy is to revive agricultural sector as a priority for economic development and to address the youth unemployment. Therefore the department of Rural, Environment and Agricultural Development will assist beneficiaries of leased farms from the National Rural Development and Land Reform, with the post settlement programme to enable productive farming.

Agricultural projects identified for support includes the rehabilitation of Kraaipan, Springbokpan and Vryhof grain silos, with the total storage capacity of 230 000 tons, to stimulate crop production by planting over 120 000 hectares of fallow land over the next five years period. The storage infrastructure is in accordance with government's approach of Strategic Integrated Projects (SIP's) to revitalize the grain storage and marketing infrastructure initiatives.

The draught experienced in the province recently pose a considerable risk for the provincial economy and; if agricultural employment is continued to be lost due to various factors, many other economic sectors will as well struggle to maintain the growth potentials. In response to that, the Citrus irrigation schemes in Taung, Disaneng, Molatedi and Tsholofelo will be resuscitated and expanded in 2015 MTEF. The department will also implement the Taung Skull project (Taung Heritage Site) which will unlock the tourism potential of the area and thus create job opportunities.

Culture, Arts and Traditional Affairs

The North West province adopted the National Golden Economy strategy where Culture serves as a vehicle of development. As part of Rebranding, Repositioning and Renewal of Bokone Bophirima province, the department of Culture, Arts and Traditional Affairs will promote Mahika Mahikeng music and cultural festival, re -establish of the North West Ensemble, establish a publishing house for the creative writers, promote the Motswako and Setswana cultural dance brands.

Tourism and Heritage Sector

The development of Provincial tourism sector has potential to create employment and raise income in rural areas through community tourism programmes. It is critical to develop and protect the existing parks and reserves. The new Department of Tourism will embark on tourism product development, development of new tourism enterprises, grow and expand the existing enterprises thereby marking the Province the ultimate tourism destination. The objective is to ensure that the province is able to compete in the national and global tourist market. Through Parks and Tourism Board, the department has in 2014/15 transferred an amount of R3.9 million to improve Taung Hotel School.

2.2 Aligning provincial budget to achieve government's prescribed outcomes

Notwithstanding the focus on the three key pillars for economic growth as indicated above, the Bokone Bophirima Province shall continue to support the key national priorities as espoused in the National Development Plan (NDP) and Medium Term Budget Policy Statement (MTBPS) for implementation in the 2015 MTEF.

The departments' strategic plans for 2015 MTEF are predominantly informed by the national and the provincial strategic imperatives. The Provincial Development Plan (PDP), which still needs to be submitted to EXCO for approval. During the preparation of the 2015 MTEF, all departments were requested to focus on National Outcomes (14 Chapters) and to demonstrate the alignment of programmes to relevant outcome(s).

Notably, the provincial departmental chapters in this publication provide a clear linkage and the provincial response to the relevant outcome. There has been a close working relationship between the Provincial Treasury, the Office of the Premier through Planning Commission and Monitoring and Evaluation to ensure alignment of the budget to the Strategic Plan, APP, MTSF and Presidential Outcomes and budgets. Of critical importance is to ensure synergies so that planning is well integrated for better service delivery.

Strategic principles for infrastructure investment and development spending

In reviewing its policy priorities for 2015 MTEF budget cycle, the government of the Bokone Bophirima has made a goal of placing the province on the right path for growth as its main priority. The priorities would be driven by a comprehensive programme of action titled "Rebranding, Repositioning, and Renewal Programme" which was announced by the Premier when the new Administration assumed duty in May 2014. The vision is to achieve balanced, inclusive and sustainable economic growth.

The 14 national outcomes are listed below and linked to the relevant department in the province;

Nat	onal Outcome	Departments
1	Quality basic education;	Vote 8
2	A long and healthy life for all South Africans;	Vote 3
3	All people in South Africa are and feel safe;	Vote 5
4	Decent employment through inclusive growth;	All
5	Skilled and capable workforce to support an inclusive growth path;	Vote 11, 6, 7 and 13
6	An efficient, competitive and responsive economic infrastructure network;	Vote 11, 5 and 6
7	Vibrant, equitable, sustainable rural communities contributing towards food security for all;	Vote 13
8	Sustainable human settlements and improved quality of household life;	Vote 9 and 12
9	Responsive, accountable, effective and efficient local government;	Vote 9
10	Protect and enhance our environmental assets and natural resources;	Vote 13
11	Create a better South Africa, a better Africa and a better world;	All
12	An efficient, effective and development- oriented public service;	All
13	Social protection and;	Vote 5 and 12
14	Nation building and social cohesion.	Vote 1, 4 and 8

The **Department of Education and Sports Development** is committed to ensure the realisation of outcome 1 (improve the quality of basic education) in respect of Grade 12 with more emphasis on maths and science and also to put more focus on lower grades (Grade 3, 6 and 9) with a view to better the outcomes of the Annual National Assessment (ANA). Increasing the enrolment of learners with barriers in full service schools and provision of assistive devices and other relevant equipment to Full Service and Special Schools remains a priority.

Support and Monitoring through the District office is intended to ensure quality delivery of curriculum in public schools and attainment of learner performance as captured in the Action Plan to 2014, towards the realisation of schooling 2025. During the 2015/16 financial year, the department will ensure there is a conducive environment for teaching and learning by increasing the number of class rooms, upgrades and maintenance of existing schools, ensure that all public schools in the province have sufficient number of sanitation facilities and supply of water drinking.

In response to outcome 2, to ensure a long and health life for all South Africans, **the Department of Health** is moving from a predominantly curative and hospital-based system to a preventative and promotive community-based, PHC approach will form the foundation of transformation in addressing issues of equity, access, quality and efficiency, and sustainability. In 2015/16 MTEF, the department shall continue to rollout the PHC outreach teams to reach a total of 296 wards across the province and, an amount of R9.952 million has been set aside for this purpose.

The **Department of Local Government and Human Settlement** aligned its strategic goals and objectives to the 14 identified Medium Term Strategic Framework Outcomes and it is mainly responsible for Outcome 8: Sustainable Human Settlements and Improved Quality of Household Life and Outcome 9: Responsive, accountable, effective and efficient developmental local government system.

The Department has further aligned its strategies with other departmental Plans. This is an attempt to make sure resources are targeted at processes that will give impetus to the attainment of the set targets. Details of the alignment with the Strategic Goals and Strategic Objectives are reflected in the Five Strategic Plan and Annual Performance Plan of the Department.

The Department of Public Works and Roads contributes to outcome 4 and 7 of the National Development Plan. In order to create decent employment through inclusive Economic Growth (Outcome4), the department created 23 976 work opportunities though the labour intensive projects across different sectors and districts of the Bokone Bophirima in 2014/15. The 2015/16 financial year will usher in 7 407 job opportunities though labour intensive infrastructure development, green economy and social economy.

In respect of the department's contribution to the **Vibrant**, **equitable & sustainable rural communities & food security for all (outcome 7)**, brick making projects in Mafikeng, Bloemhof, Moretele and Ventersdorp have been established in 2014/15 while Danville and Itsoseng are planned to be established in 2015/16 as part of community development. Moreover, the department is in the process of establishing cooperatives in order to sustain job creation for sustainable livelihood.

The **Department of Rural, Environment and Agricultural Development**'s contribution towards realization of **Outcome 7** is evident through rehabilitation of Silos to provide value adding support to the Provincial Industrialization Plan. Over 300 jobs are anticipated to be created. Furthermore, the department will also be providing production start-up packages that include mechanisation packages and production inputs thorugh the Tshimo ya Kgosi project.

In terms of the contribution to **outcome 4**, the department expanded the irrigation scheme by 340 hectares during the 2014/15 financial year while a total of 60 hectares has already been debushed and irrigation infrastructure covering 10 hectares has been installed. There is also a need to expand 26 kilometer canal to convey water from Vaalharts to Taung and only 2 kilometers of the expansion is appropriated under the department of Water Affairs. The project has created over 200 Work Opportunities through Labour Intensive initiatives.

2.3 Summary of budget aggregates

Table 1 below provides an analysis of the provincial budget performance between the receipts and total payments over a period of seven years (2011/12- 2017-18). The data for 2011/12-2013/14 is audited payments whereas the 2014/15 figures provides a revised financial position as at December 2014. Notably, the historical number reflects the changes that came as a result of function shift due to reconfiguration. From 2015/16 -2017/18 the figures represents the financial position (receipts and payment for the 2015 MTEF budget.

Previous surpluses									
Surplus / (deficit) after financing	154 282	331 729	356 769		951 335	286 685			

The total estimated receipts for the 2015/16 financial year amounts to R34.2 billion which represent an increase of R1.8 billion or 5.6 per cent from the revised estimate of 2014/15 financial year. The less than inflationary increase is mainly influenced by the rollovers and additional funding through financing, allocated to departments during the 2014/15 adjustment budget and the reduction in the equitable share due to function shift.

2.4 Financing

An amount of R100 million is allocated in the current financial year from the previous years' under expenditure. This allocation is mainly earmarked for the resuscitation of Mahikeng and Pilanesberg airline routes in 2015/16. Financing in the previous year's mainly relates to the additional allocation provided to departments during the adjustment budget and the approved rollovers.

3. Budget Process and the Medium- Term Expenditure Framework

In an effort to strengthen the provincial budget process the Provincial Treasury established a Provincial Budget Forum (which is a technical forum) that serve as a platform aimed at facilitating, sharing best practices and to standardize budget documentation, and to improve budget planning and implementation within the Province.

The 2015 MTEF budget process emphasized the implementation of a three phased approach which establish the preliminary 2015 budget baselines for institutions and function groups, using the 2014 budget baseline as a basis; engage extensively with the Provincial Departments and Public Entities during the Medium Term Expenditure Committee (MTEC) on issues of funding efficiency and also consolidating and analysing the MTEC resolutions in consideration of the urgency of spending pressures and opportunities for financing through the reprioritisation of existing resources.

The Planning Commission from the Office of the Premier was part of the MTECs, the process which assisted to improve integrated planning in the province. Furthermore, the Premier of Bokone Bophirima initiated the process of ward based budgeting where all municipalities, provincial departments and public entities agreed on projects to be implemented in the province. The process of ward based budgeting will be further refined during the 2015/16 financial year.

The 2015 MTEF allocations were made following robust engagements with departments during the MTEC and the one-on-one engagement of the Premier with all departments to confirm the strategic focus of the province and the contribution from each department. The final allocations were approved by the Executive Council in consideration of the current economic situation and the need to invest in projects that will stimulate growth.

Preparatory of budget work undertaken by the departments

The preparatory work started around June/July with departments reviewing their expenditure outcomes for the previous years, second quarter spending of the current year, estimates of the following budget year assessed against the strategic/ annual performance plans. The strategic/ annual performance plans were reviewed in relation to the strategic priorities as identified by the Political Executive with strict alignment to the NDP, MTSF, PDP, national and provincial priorities. The departments used their baseline allocations to determine their resource envelope for the forthcoming financial year.

The review process assisted with re-prioritization which is a critical part in the budget process. Department submitted their first budget submission to the Provincial Treasury by the end of July after which the budget analysts from Treasury work closely with the provincial departments to evaluate the budget submissions for linkage with provincial and national priorities in considering resource envelope.

4. Receipts

4.1 Overall Position

The provincial revenue is made up of national payments in the form of equitable share, conditional grants as well as own revenue. Table 1.7 below presents a summary of provincial revenue and the split between national sources and own revenue which relates to the 2011/12-2013/14 actual audited outcomes, the adjusted and revised estimates for 2014/15 as well as the budget estimates from 2015/16 to 2017/18 financial years.

Table 2: Provincial receipts: North West Province

4.2 Equitable Share

The equitable share remains the main source of provincial funding contributing 76 per cent to the total fiscal framework. Notably, the 2015 MTEF equitable share is informed amongst others by the data from the 2014 Mid-year Population Estimates, 2014 School Reality Survey (SNAP Survey) and the District Health Information Services Patient day data for 2012/13 and 2013/14 respectively.

Regardless of the favorable statistics, for example, the increase in population from 3.5 million in 2011 (Census 2011) to 3.8 million (2014 Mid-year Population Estimates), the overall equitable share for the province declined. This was mainly due to the effect of the 2008 economic down turn and the protracted mining strike which affected the tax baseline of the country. Consequently, the provincial equitable share baseline declined by R137.9 million in 2015/16 and a further reduction of R457.9 million in 2016/17 with a marginal increase of R6.5 million in the outer year.

Despite these reductions, the provincial equitable share grows from R24.7 billion in the 2014/15 financial year to R29.5 billion in the 2017/18 financial year, which represents an average growth of 6.1 per cent over the MTEF.

4.3 Conditional Grants

The conditional grants system has been shaped by major reform that was introduced to enhance accountability, monitoring and reporting and administrative responsibility of the grants. The legal framework pertaining to each grant is contained in the Division of Revenue Act. The Conditional grants are the second largest source of funding in the province. In the first year of the MTEF, a significant growth of 20 per cent has been observed in 2015/16 due to changes in

the funding arrangement especially for HIV and AIDS Grant (14.6 per cent), Human Settlements Development Grant (30 per cent), Education Infrastructure grant (14.33 per cent) and Provincial Road Maintenance Grant grows by 11.35 per cent.

The conditional grants grows from R5.8 billion in 2014/15 to R6.9 billion in 2015/16 financial year. Included in the conditional grants allocation is an amount of R148.5 million distributed amongst Education, Health and Local Government and Human Settlement to address the consequences of the disaster that strike Matlosana during August 2014. This money will be used to repair or rebuilt the infrastructure damaged as a result of the tremor.

Further Education and Training (FET) colleges and the Adult Education and Training (AET) functions were assigned to the Minister of Higher Education and Training. Both functions will shift to the national sphere from 1 April 2015. Consequently, an amount of R88 million in 2015/16 for the Further Education and Training Grant will move to the national sphere. Based on provincial policy shifts, R40.7 million in 2015/16, R46 million in 2016/17 and R48.8 million in 2017/18 for Mass Participation Grant was moved from Department of Culture, Arts and Traditional Affairs to department of Education and Sports Development.

The table below provides more details on provincial conditional grants per departments:

4.4 Total Provincial Own Receipts

The overall provincial revenue budget grew by 7.3 per cent in 2015/16, 5.4 per cent in 2016/17 and 5.3 per cent in the last year of the MTEF. This pattern of growth is very minimal when compared with previous years (2013/14 and 2014/15) which recorded 16 percent or increase of R139 million of revenue budget estimates. The 2015 MTEF minimal growth was exacerbated by sluggish and/or uncertainty of the current economic conditions.

The major contributors of revenue in the province are patient fees, motor vehicle licenses, gambling and Casino taxes. The own revenue continue to remain an important marginal source of funding. Its allocation in 2015/16 represents 3.01 per cent of the total provincial revenue envelope.

The province will embark on number of measures to enhance own revenue in the 2015/16 financial year. Amongst others, the following measures will be explored;

- Engagement with service providers collecting revenue on behalf of the provincial government with the view to reduce the payment for commission to a maximum of 10 per cent effective from 1 April 2015, and this will generate a saving of at least R50 million during 2015 from collection costs (Charge rates would be decreased from an average of 25 per cent to 10 per cent);
- During the 2015/2016 financial year, as part of the review of the terms and conditions of employment, all public servants including public entities and municipalities in the Province would be encouraged to register their cars in the Province, failing which, processes would be started to consider the processing of claims for only "NW" registered vehicles;
- During 2015, all tariffs and rates would be reviewed to ensure that they are cost reflective and competitive and the reviewed tariffs would be applicable in the second quarter of the 2015/2016 financial year;

• Introduction of market related rental fee for all government houses and explore the creation of a trading account for maintenance of properties without using the provincial resources.

4.5 Donor Funding

The department of Public Safety and Transport Management has received a once-off amount of R40 million in June 2014 from Road Transport Management Corporation (RTMC) for the construction and upgrading of weighbridges. The bulk of these monies (R36 million) was directed towards construction of Lichtenburg Weighbridge while R4 million was allocated for road safety equipment.

5. Payments

5.1 Overall Position

The total outlays for provincial programmes are set out in the summary below:

Financial year 2015/16: R 34 224 million
Financial year 2016/17: R 35 739 million
Financial year 2017/18: R 38 025 million

The 2015/16 allocation represents an overall growth of 5.6 per cent from the adjusted allocation of 2014/15 financial year and a marginal growth of 4.4 per cent in 2016/17. The minimal growth in 2016/17 is mainly as a result of the increased equitable share cut and the non-allocation of the incentive portion of the Health and Education infrastructure grants.

5.2 Payments by Vote

Office of the Premier

The budget for the Office of the Premier represents 2.13 per cent in 2015/16, 1.83 per cent in 2016/17 constantly in 2017/18 of the total provincial allocation. This Office is primarily intended to optimize coordination and monitoring the provincial departmental functions. The Office has re-organised its function during the reconfiguration of departments in 2014/15 by moving out a function "Special Programmes" to the department of Social Development.

Basically the amount allocated to the Office will be utilized to ensure effective and efficient governance in the province with a budget allocation of R730.6 million in 2015/16, reduced to R655.4 million in 2016/17 and R691.2 million in 2017/18 respectively. This translates in to a decrease of 3.4 per cent in 2015/16 due to once off financing of R36.1 million in 2014/15. Included in the budget is an amount of R76 million, R81 million and R85.1 million over the MTEF as allocation for Community Development Workers transferred from department of Local Government and Housing to be managed by the Office of the Premier.

Over and above that, an amount of R9.4 million and R17 million in the two outer years was provided as addition to the baselines as well as once –off allocation of R100 million in 2015/16 was availed as additions to the baseline to enable the Office to lead in the development of Mafikeng Rebranding, Renewal and Repositioning Programme.

Changes to the baselines resulted due to budget cuts of R13.9 million, R15.8 million and R20.8 million respectively in compliance to National Treasury's equitable share reductions based on annual data revisions.

Provincial Legislature

The budget comprises of 0.79 per cent in 2015/16, 0.81 per cent in 2016/17 and constantly in the last year of the MTEF of the total budget of the province. Additional budget provision of R3 million has been made in the last outer year of the MTEF for correction of the baseline. The growth in budgets between 2014/15 and 2015/16 has recorded a decline by 12.9 per cent due to a once off financing of R61 million in 2014/15 allocated to correct the baselines and; continue to grow slightly above the inflation by 6.2 per cent in 2016/17 and 6.0 per cent in the last year of the MTEF.

Department of Health

The vote constitutes 26 per cent of the total provincial allocation which is constant over the period of the MTEF. Just like other non-social sector departments, Health experienced a budget cut of R34.8 million in 2015/16, R75.2 million in 2016/17 and gained R58 million in 2017/18. The department was also affected by changes to the baselines where Port Health function was shifted to National through funds follow function approach with an amount of R2.943 million, R3.104 million and R3.268 million respectively followed by National Health Laboratory Services (NHLS) whose budget of R22.1 million in 2015/16, R23.2 million in 2016/17 and R24.3 million in 2017/18 were also transferred to National. As can be noted, the bulk of the budget of this

department has been allocated to District Health Services with 52.45 per cent and Provincial Hospital with 14.43 per cent, while Central Hospital Services received a share of 12.5 per cent in 2015/16.

Transformation of health services is of paramount importance to meet the increasing demands of the community health care. Job Shimankane and Klerksdorp Tshepong Hospitals have move from Programme 4 to Programme 5 in line with government gazette. That is, substantial amount of R1 billion in 2015/16, R1.2 billion in 2016/17 and R1.4 billion was reduced from Programme 4 to increase the allocation for Central Hospital Services.

Budget to budget grows by 8.8 per cent in 2015/16, 4.4 per cent in 2016/17 and 7.2 per cent in 2017/18 respectively. The Primary Health Care re-engineering priority has been allocated an amount of R9.952 million in 2015/16 as well as R15.6 million for Tuberculosis GeneXpert The department has during the 2014/15 Adjustment Budget received R14 million for Hospital Revitalization Grant as well as a rollover of R17 million on the unspent Hospital Revitalization.

Department of Culture, Arts and Traditional Affairs

This department is aiming to promote arts and culture in the province. The vote constitutes 1.84 per cent, 1.86 per cent and 1.89 per cent of the total provincial budget over the MTEF period. The relative share of this department increases by 2.7 per cent in 2015/16 below the inflation, due to once off financing of R46 million in 2014/15, 5.9 per cent (2016/17) and 8.0 per cent (2017/18) respectively. This department is one of the key provincial pillars and therefore its budget has been protected. In the first two year of the MTEF the department received R10 million in the two outer years for baselines correction. A further allocation of R29.9 million in 2017/18 was injected to enable the department to jerk up its core activities.

Promotion of cultural activities in this department is core and within the 2015 MTEF allocations, the department to a stance to provide an amount of R11.7 million, R10 million and R21.4 million for its cultural and artistic priorities.

The effects of the reconfiguration process also brought some changes to the baselines of this department. An amount of R6.5 million in 2014/15, R10.6 million in 2015/16, R11.2 million in 2016/17 baselines and R11.7 million in 2017/18 for function shift "Recreation of Activities" from the department of Education augmented the MTEF budgets of this department.

Department of Safety and Transport Management

In the main this department promotes community and road safety, exercise civilian oversight of police and coordinate transport services through integrated approach. Its budget of R1.8 billion, R1.9 billion, R2 billion constitutes 5.4 per cent constantly over the MTEF of the entire provincial allocation. This department also experienced changes to the baselines due to equitable share budget cuts in compliance with National directive. That is, an amount of R3.9 million in 2014/15, R92.4 million in 2015/16, R12.3 million in 2016/17 were decreased in the first two years of the

MTEF. Over and above that, an amount of R84 million was availed for the resuscitation of Mafikeng and Pilansberg airline route plus an injection of R10 million in 2017/18 for correction of the budget baseline.

Conversely, an amount of R6 million in 2015/16, R6.3 million in 2016/17and R7.5 million has been earmarked for activation of Driver's License Testing Centers and upgrade Vehicles Testing Stations in Ganyesa and Taung, Establishment of Community Forums in Municipal areas and installation of security in number plates has been prioritized with a cost of R1.9 million in 2015/16. All these resulted in to a growth of 15.5 per cent in 2015/16, slight increase of 4.7 in 2016/17 due to once- off allocation of R84 million in 2015/16 and 6.3 percentage growth in 2017/18.

Department of Economy and Enterprise Development

The vote constitutes 0.75 per cent of the total budget of the North West Province for 2015/16 financial year. The total departmental budgets amount to R255 million in 2015/16, R271 million in 2016/17 and R286.3 million in the last year of the MTEF which translate to a decrease of 1.9 per cent in 2015/16 due to once off financing of R20 million in 2014/15, increase of 6.1 per cent and 5.8 per cent respectively. This departmental equitable share was also reduced by R651 thousand in 2014/15, 26.9 million, R61.5 million, and R62.3 million in last outer year of the MTEF in compliance with National Directive.

The department has during the reconfiguration process lost Tourism component which became a standalone vote as well as Environmental Services function that was moved to the former department of Agriculture. Other key planned activities revolve around the Village, Township and Small dorpies strategy whereby an amount of R4 million has been set aside in 2015/16 to establish a bakery in Mokgalwaneng, erection of stall's for hawkers in the vicinity of Barolong Boo-ratshidi.

Department of Finance

The department of Finance is charged with the promotion of efficient and effective public finance management in the province. This vote constitutes 1.42 per cent of the total provincial allocation for 2015/16. The total budget amounts to R486 million, R478.4 million and R507 million respectively which is an increase of 12.2 per cent, decrease of 1.6 per cent and increase of 5.9 per cent in 2017/18. The sharp increase in 2015/16 is mainly attributable to an allocation of R52 million in 2015/16 for Forensic investigation and MFMA HR capacity building, in which the department plans to beef up the Municipal Finance unit to enhance support to Municipalities in a quest to reduce reliance on Consultants.

An amount of R20 million was earmarked constantly over the MTEF for MFMA reforms, establishment of a database for unemployed graduates and retired experts in order to tap the scares skills and talent management required in the financial fraternity for financial advancement in the province.

A substantial decrease in the second year represents the net effect of R121.2 million attributable to budget cuts in line with National directive and to redirect other funds to newly identified policy imperatives.

Department of Education and Sports Development

The core function of this department is to provide quality education to develop human capital, maintain and support education and training system. The department is funded at 39 per cent of the total provincial equitable share and 4.33 per cent for the conditional grants in 2015/16. Year-on -Year, the budget of Education increases by 6.9 per cent in 2015/16, slight increase of 4.8 per cent in 2016/17 and 5.7 per cent in the last outer year of the MTEF. The revenue base of this department stood at R17.9 million in 2015/16, recorded a growth of 5 per cent between 2014/15 and 2015/16 constantly in the outer years of the MTEF.

Significant budget changes to the baselines were observed as a result of function shifts to National. Adult Education and Training's budget to the amount of R184.3 million, R194 million and R203 million was transferred to Higher Education. The province further lost Further Education and Training Grant to the amount of R88.2 million in 2015/16 and R93.1 million in 2016/17 respectively. Part of the budget of Auxiliary and Associated Services with an amount of R8.629 million, R9.128 million and R9.599 million was also transferred to National.

Through reconfiguration process, a budget of R6.5 million in 2014/15, R10.6 million, R11.2 million and R11.7 million for Recreation activities was lost in favour of department of Culture, Arts and Traditional Affairs. Contrary, this department gained Mass Participation and Sport Development Grant to the amount of R43.5 million in 2014/15, R40.7 million in 2015/16, R46 million in 2016/17 and R48.8 million in 2017/18 respectively through the same process.

Over and above that, administration/ operational budget for FET was reduced with an amount of R21.2 million, R22.6 million and R23.8 million in each year of the MTEF and transferred to National. Just like Health, Education equitable share was reduced by R31.2 million in 2014, R29.1 million in 2015/16, and R75 million in 2016/17 in compliance to National Treasury's directive of reducing the baselines budget due to annual revision of data.

This department has prioritized to establish a provincial Sports Academy and to strengthen Maths and Science Teacher development with a budget of R17.2 million in 2015/16 increased to R18 million and R19 million in the last outer years of the MTEF.

Department of Local Government and Housing Settlements

The vote constitutes 7.35 per cent of the total provincial allocation in 2015/16. Over the MTEF, the relative budget share of this vote increases sharply by 14.7 per cent, 10.5 per cent and 6.3 per cent year on year. The attributes of the substantial increase in 2015/16 was due to an added amount of R548 million to the Housing development grant as well as an amount of R50 million towards the resuscitation of North West Housing Corporation receiving R20 million and R30

million for the baselines corrections to address the effects of the 2014/15 reconfiguration process. Changes to the baselines demonstrated an amount of R94 million in 2015/16, R89 million in 2016/17 and R73 million in 2017/18 reduced to address other provincial priorities. While Community Development Workers function was shifted to the Office of the Premier with a budget of R76 million in 2015/16 including the associated funding for carry through effects over the MTEF.

Department of Tourism

This vote was newly established during the 2014/15 reconfiguration process and declared as one of the apex priority in the province. Its budget constitutes 0.42 per cent of the provincial total budget in 2015/16. Over the MTEF the relative budget share of this vote increases by 26.2 per cent in 2015/16, 8 per cent in the second year and 12.7 per cent in the last year. The substantial increases year on year is meant to support the newly mandate of this department.

Parks Board (Public Entity) which was linked to the tourism function was transferred to the Office of the Premier with a total funding of R166.5 million, R175.4 million constant in the last outer year. Include in the allocation of the department is an amount of R109.8 million, R102 million constant in the last outer years of the MTEF (effects of the reconfiguration). These funds were moved from department of Local Government and Human Settlements in 2014/15 in order to create a new baseline budget for this department. Within the 26.2 per cent increase, the department made an undertaking to amongst others; develop a tourism product that will determine supply and demand for tourism growth in 19 townships and fifty-six villages, increasing the economic profile of tourism as well as carrying out a bed capacity audit. An amount of R7.7 million in 2015/16 has been set aside in this regard.

Department of Public Works and Roads

This vote constitutes 7.5 per cent of the total provincial budgets in 2015/16. The vote's share of the provincial budget over the MTEF amounts to a decrease of 15.6 per cent in 2015/16, minimal increase of 1.3 per cent in 2016/17 and 6.5 per cent in the last year of the MTEF. A sharp declined of 15.6 per cent between 2014/15 and 2015/16 is attributed to once-off financing of R464 million 2014/15 constituting additional funding and roll overs.

This department is the provincial implementing agent of roads and building of fixed structures. During the 2014/15 reconfiguration process the department transferred the Transport function to the Department of Public Safety and Liaison. The amount involved was R1 050 billion, R1 102 billion constant in the last two years of the MTEF.

Within the allocation of R2.6 billion is a budget of R100 million allocated in 2015/16 to enable the department to address shortfall on planned key service delivery mandates. Property rates and taxes budget was augmented with an amount of R50 million in 2015/16 with carry through effects over the MTEF period. By the same token, an amount of R100 million earmarked for War on poverty (seed funding) in 2015/16 and including its allocation for subsequent years, was recouped and redirected to other provincial priority needs.

Contributing to roads infrastructure, the department has earmarked R76 million in 2015/16 to address roads infrastructure leading to the Mafikeng and Pilanesberg airport. An amount of R25 million was also set aside for alternative accommodation for MPLS whereas R20 million will be directed for establishment of brick making plants for paving Municipal roads (Itsoseng and Danville included).

Reduction of an amount of R31.6 million, R65 million and R51 million was effected over the medium term in this vote as a result of the National annual data revision

Department of Social Development

The department has been allocated a budget of R1.334 billion in 2015/16 which constitutes 4 per cent of the total budget of North West province. The MTEF period show a year on year growth of 6.4 per cent, 4.7 per cent and 6.1 per cent respectively. During 2014/15 reconfiguration process this department has received Special Programmes function from the Office of the Premier with a budget of R9.9 million in 2015/16, R10.9 million in 2016/17 and R11.4 million in 2017/18 respectively. Department also suffered a loss of R3.1 million in 2014/15, R37 million, R45.2 million and R32.4 million respectively from its equitable share budgets due to National annual revision of the data.

Within the allocation of R1.334 billion, an amount of R101 million have been allocated to fund amongst others; NPO's to establish food banks in the districts, Increase services to access to early childhood development by reaching 404 347 children between 0-4 years, address the deprived community's participation in poverty eradication initiatives, venture in to a project of preserving families as a basic unit of society through efficient service delivery targeting 115 160 families and 412 602 orphans and vulnerable children in the next five years, build Rehabilitation Centre in Dr RSM Mompati and Ngaka Modiri Molema in 2015/16 at a cost of R17 million provided through the Conditional Grant.

Department of Rural, Environment and Agricultural Development

The department's share of the total provincial budgets over the MTEF amounts to 3.27 per cent (2015/16), 3.2 per cent (2016/17) and 3.3 per cent (2017/18). No equitable share reduction has been effected on this vote as it is one of the apex priorities of the province. Basically, the MTEF show a relative year on year growth of 1.6 per cent, 2.7 per cent and 8.4 per cent respectively.

During the 2014/15 reconfiguration process, this department received Environmental Services function with an allocation of R147.3 million in 2015/16, R92.9 million constant in the last two years of the MTEF. Apart from that, the department received an amount of R8 million in 2015/16, R38.5 million in 2016/17 and R73.9 million in 2017/18 aimed to support and improve the mandate of this department in relation to the ACT strategy.

Identified key departmental priorities such as Crop massification programme with an amount of R28 million, development of livestock breeding material allocated R3 million, establishment of

feedlot in Mafikeng to the amount of R5 million, rehabilitation of Springbokpan, Kraaipan and Vryhof grain silos allocated R15 million, establishment of grain milling at a cost of R4.2 million all these were provided for within the allocation of R1.1 billion in 2015/16.

5.3 Summary of Payments and Estimates by Economic Classifications

The summary of Economic Classifications revealed that the current payments account for approximately 75.1 per cent of the provincial budget in 2015/16, Transfer Payments accounting for 15.2 per cent while Capital payments have registered 9.7 per cent. It is worth reflecting that the bulk of the current payments in the main constitute Compensation of Employees.

Table 6: Summary of provincial payments and estimates by economic classification: North West Province

Compensation of Employees

The provincial personnel share is 58.11 per cent of the total provincial allocation in 2015/16 financial year. Year on year the expenditure is growing by 5.31 per cent in 2015, 7.42 per cent in 2016/17 and 4.83 per cent in 2017/18 respectively. The bigger portion of Compensation of Employees is evident in the Department of Education by R10.3 billion, followed by Health (R5.8 billion), Public Works and Roads (R752 million) as well as Social development with R703 million in 2015/16. The trends are in line with the provincial strategy to limit expenditure on personnel, particularly the non-critical posts/ non-professional category. EXCO has also passed a resolution that guides departments to confirm availability of funds with Treasury prior the filing of posts (only funded posts may be filled).

Goods and Services

The summary of Economic Classifications revealed that this category accounts for a decline of approximately 18.5 per cent in 2015/16. The bulk of funding was reduced from non- core items in compliance with National directive proposal of reducing the equitable share. Notably, the bigger portion of goods and services is observed in the department Health and Education whereby medicines and medical supplies were budgeted R324 million, laboratory services R255 million, security services R151 million and ARV's R234 million while learner teacher support material for Education received R408 million in 2015/16 financial year.

Transfer Payments and Subsidies

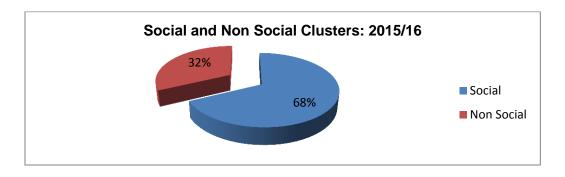

The transfer and subsidy allocation includes both current and capital transfers. The substantial allocation of transfers goes to non-governmental institutions such as NGO's whose role is to undertake services such as HIV/AIDS programmes to the community home based care, rendering service to children in secure care centres, as well as transfers to schools in terms of the School Act as well as to Public Entities residing in the department of Economy and Enterprise Development, Office of the Premier and Culture, Arts and Traditional Affairs. The department of Social Development takes a lead in transferring funds to NGO's at a cost of R297 million in 2015/16.

Capital Expenditures

The budget provision for Capital Payments amount to R2.3 billion in the first year of the MTEF and decreased to R3.9 billion and slightly increased to R3 billion in the last year of the MTEF. This budget in the main will be utilised by the department of Public Works and Roads which is the provincial implementation agent for the construction of roads and buildings, rehabilitation of existing structures, maintenance of buildings, building of schools and clinics.

Social Services Sector Versus Non-Social Services

The Social sector overall split makes up the largest portion of the provincial payments and estimates. The Social Sector amounts to 68 per cent of the total provincial payments and estimates. The percentage growth shows that Education constitute the highest share of 39 per cent, followed by Health at 26 per cent, Social Development at 4 per cent while 31 per cent of the total provincial budget constitutes a share for non-social cluster.

5.4 Payments by Functional Area

As can be noted from the table below, the major areas of expenditure by policy area for the 2015/16 financial year are Education, Health and Economic affairs with an estimation of R26.3 billion. In total these three policy areas account for 77 per cent of provincial expenditure.(Education is R13.3 billion or 39 per cent, Health is R8.9 billion or 26 per cent and Economic affairs is R4.2 billion or 12 per cent. Each of these three major policy areas has increased as compared to the adjusted budget for 2014/15.

5.5 Infrastructure Payments

The North West Province is making significant stride in terms of addressing the infrastructure development issues especially in areas of roads, clinics and schools. In an attempt to clear some of the backlogs, the provincial spending in 2014/15 as at October recorded 50.92 per cent with optimal spending emphasized. This is a remarkable stride when compared with 2013/14 spending pattern of 47.03 per cent during the same period. The implementation of the Infrastructure Development Model Strategy (IDMS) has assisted to address and improve the monitoring and reporting system which links infrastructure projects with the financial accounting system and has enabled the province to submit the infrastructure plans, which listed planned projects.

The table below shows that the province will spend an amount of R6 billion in 2015/16 on infrastructure projects. The allocation declines slightly in 2016/17 to an amount of R5.8 billion and thereafter increases to R6 billion in 2017/18. The decline in 2016/17 financial year is mainly

due to infrastructure bidding process that must still happened before the finalization of the MTEF period.

Of the R797 million allocations to Health infrastructure, R695.4 million relates to Hospital revitalization programme. Furthermore, the department made provision for infrastructure maintenance, other infrastructure such as district, regional, provincial hospitals and clinics from the equitable share. *Infrastructure schedule (B5) has more details*.

The allocation of R51.7 million to Social Development will largely fund the new construction of Taung Old Age Home (R16.8 million), Witrand Inpatient Centre (R15 million), Ganyesa Children's Home (R5.1 million), Upgrading for Sonop Old Age Home (R1 million), Taung Inpatient Treatment Centre (R930 thousand) and Maintenance of R2.8 million.

The Public Works and Roads with allocation of R1.3 billion will focus mainly on roads construction, upgrading and roads maintenance.

The Education expenditure on infrastructure will be used to fund new schools, additional classrooms etc. The budget allocation of R713.9 million in 2014/15 has increased to R1 billion.

In general, infrastructure spending in 2014/15 has been improved in this province coupled with the improvement impetus in the infrastructure monitoring as well as implementation. The emphasis is now on achieving quality spending. The IDIP process has really assisted to achieve this objective.

5.6 Provincial Public Private Partnership (PPP) Projects

The province does not have any public private partnership venture.

5.7 Transfers

5.7.1 Transfers to public entities

An amount of R372.2 million, R382.2 million and R392.5 million over the three years of the MTEF has been allocated to various provincial departments for transfer to public entities. The department that is most significant in terms of these transfers is the Office of the Premier followed by the department of Economy and Enterprise Development. Amount allocated to the Office of the Premier for Parks and Tourism Board (entity) and Provincial Aids Councils is R184.2 million while Economy and Enterprise received R110.4 million which translates to 49.50 per cent and 29.67 per cent in 2015/16 financial year.

5.7.2 Transfers to Development Corporation

The province is utilising the services of Independent Development Corporation as intermediate agent for certain provincial project. The necessary Service Level Agreements were signed for accountability purposes. The affected departments are: Education and Sports Development, Public Works and Roads, Department of Local Government and Human Settlements.

5.7.3 Transfers to Local Government

In terms of Section 30 (2) of the Division or Revenue Act, the Provincial Treasury must publish with annual budget the allocations to the Municipalities for every allocation made by the province to a municipality in the province.

According to Section 155(1) of the Constitution the Municipalities are defined as follows:

Category A: a municipality that has exclusive municipal executive and legislative authority in the area. Municipalities of this type are normally referred to as Metropolitan area, In this province we do not have any municipality of this nature.

Category B: a municipality that share a municipal executive and legislative authority in its area with a category C municipality. Municipalities of this nature are referred to as local municipalities.

Category C: a municipality that has municipal executive and legislative authority in an area that included more than one municipality. Municipalities of this type normally referred to as district municipalities. The table below seeks to demonstrate detailed information as per municipalities in the province. This information must be published through the Gazette. Further details appear in the departmental chapter of the affected departments.

The Department of Local Government and Human Settlements planned to transfer an amount of R71.1 million in 2015/16, R75.2 million in 2016/17 and R59 million to the Municipalities. The allocation in the first year is constituted by R13 million for Disaster Management and R58.1 million for Bucket replacement with carry through effect over the MTEF. Secondly, the department of Culture, Arts and Traditional Affairs shall transfer an amount of R24.4 million, R9.2 million constantly in the last year of the MTEF. Such funding is earmarked to provide assistance to the Municipalities.

5.8 Personnel numbers and costs

The personnel share of the total provincial allocation stood at 57.87 per cent in 2015/16. As depicted in the table below, the total number of personnel between 2014/15 and 2015/16 is decreasing substantially from 87 619 to 75 827 due to amongst others, the ending contract of EPWP workers (LIP) by January 2015. The total number of labour intensive employees appointed in 2014/15 was 26 000 at a rate of R2 200.00 pm and with a budget allocation of R572 million.

However, the department of Education and Sports Development as well as Department of Health are expected to be the most significant employers in the 2015/16 MTEF. The department of Health's personnel is growing from 28 800 in 2014/15 to 30 984 in 2015/16 which is an increase of 2 184 staff complement while department of Education personnel has decreased from 32 773 in 2014/15 to 31 066 due to reduction of employees attached to AET, FET and LIP.

The next most significant employers is the department of Public Works and Roads whose numbers still need to be reviewed before the finalization of the 2015/16 MTEF budgets.

5.9 Payments on Training

The table below depicts expense on training and bursaries by departments on their own staff in line with the requirement of Section 30 of the Skill Development Levies Act, 1999 which requires that each public service employer in both national and provincial spheres of government must budget for at least 1 per cent of the payroll for the training and education of their employees.

As noted in the table it is expected that an amount of R142.6 million will be spent on training for the year 2015/16 which is an increase of 12 per cent when compared with the revised estimates of 2014/15. The increase is mainly observed in Health at 21 per cent in 2015/16 as well as Education with an increase of 5 per cent between 2014/15 and 2015/16. Both departments have a huge mandate of building capacity on health professionals as well as for Educators and ECD practitioners. It is worth noting to reflect that, the Office of the Premier has decentralised the transversal training to provincial departments' hence insignificant training budgets is observed.

Table 15: Summary of provincial payments on training by vote
